My dear Sir,

I thank you very much for your letter of the 21st July, and the set of books you sent to me.

I am sorry to say that I have not been able to read them with the care and attention that they deserve. But I have seen enough to know that they must be of great value to students of religious thought.

With regards,
Your Sincere

Introduction

The Text of Gaṇadhara-vāda

(a) Sources.

It is now a wellknown fact that *Riṣabhadeva Swāmi*, the first *Tirthāṅkara* of the present series, was the founder of the *Jaina Canon*. It was during his regime that the Sacred Works of the Jainas came into existence. After him, the Sacred Works increased in number and quality, when the religion was exalted to a high rank, but they were reduced considerably in times of disorder and anarchy. Generally speaking, preachings of all the *Tirthāṅkaras* happened to be of the same kind, and their lives were almost similar to each other in principal characteristics.

Śramaṇa Bhagavāna Mahāvira, the elder contemporary of *Gautama Buddha*, was the last, but Supreme *Tirthāṅkara* in the whole dynasty. Like His predecessors, He too had got his preachings composed in books. His *Gaṇadharas* or principal disciples arranged those preachings in twelve *Āṅgas*, the last one being divided into fourteen *Pūrvas*. The Absolute Knowledge of these *Pūrvas* began to fade gradually, till at last it was totally extinct. *Ārya Jambū Swāmī* was the last *Kévalin*. After him there were half a dozen *Paṭṭadharas* designated as *Śruta-Kévalins*. Then there were ten *Daśapūrvins*, possessing the knowledge of ten *Pūrvas* only. *Ārya Vajra Swāmī* was the last *Daśapūrvin*, after whom the knowledge of *Pūrvas* began to fade quickly. *Dévardahigaṇi Kṣamāśramaṇa* was the last of the type

Thus, when the knowledge of the original preaching of *Śramaṇa Bhagavān Mahāvira* was fast disappearing, it was rightly felt by some of his successors to commit those preachings to writing. As a result of such efforts, forty-five Sacred Works

came into existence: 11 *Āṅgas*, 12 *Upāṅgas*, 10 *Prakṛṣṇas* 6 *Chēda-Sūtras*, 2 *Sūtras*, and 4 *Mūla-Sūtras*.^{*} Of these, the four *Mūla-Sūtras* are considered as the Original *Sūtras* or Commandments, because they are primarily needed to guide the Jaina Monks in their religious practices. *Āvaśyaka*, *Daśavaikālika*, *Uttarādhyayana* and *Pinḍa Nirvyukti* (or *Ogha Nirvyukti*) are the four *Mūla Sūtras*, According to Weber the order or composition of these *Sūtras* is this: --(1) *Uttarādhyayana* (2) *Āvaśyaka* (3) *Daśavaikālika* and (4) *Pinḍa Nirvyukti*.

Though *Āvaśyaka Sūtra* is not the oldest of the four *Mūla Sūtras*, it is the most important of all, as its name suggests. *Sāmāyika* (*Sāmāiya*) *Caturviṃśati Stava Paḍikkamaṇa*), *Vandana ka* (*Vandaṇayam*), *Pratikramaṇa* (*Paḍikkamaṇa*), *Kāyotsarga* (*Kā-ussagga* and *Pratyākhyāna* (*Paccakkhāṇa*), are the six divisions of the *Āvaśyaka Sūtra*. It should be noted that though all these *Sūtras* were dedacted into books by *Gaṇadhars* they were originally preached by *Śramaṇa Bhagavān Mahāvira*.^x

Bhādrabāhu Swāmi had already written a *Nirvyukti* on the *Āvaśyaka Sūtras* and number of *Cūrṇis* were also composed by several authors as detailed commentaries on the *Āvaśyaka Sūtra*. Still, however, *Jinabhadra-Gaṇi Kṣamāśramaṇa* felt the need of elucidating the original *Nirvyukti*; hence he wrote a *Bhāṣya* or Commentary in *gāthās* or verse on the *Nirvyukti*. Since this was an additional *Bhāṣya* to the *Nirvyukti*, which itself was a Commentary on the *Āvaśyaka Sūtra*, it was known as *Viśeṣāvaśyaka Bhāṣya*. The whole work runs into 3603 *gāthās* or verses. It could further be divided into several sub-sections such as *Piṭhikā*, *Varavarikā*, *Upasargas*, *Sāmācārī* of ten (varieties), *Gaṇadhara-*

^x In addition to these, some enumerate 20 more *Prakṛṣṇas*, 12 *Nirvyuktis*, and several more arriving at the total number of 84. Again in order to supplement the information supplied by those 84 *āgamas*, there are several other works known as *Nigamas* or *Upanisads* which, in turn, are 36 in all and bring the total number to 120.

vāda, *Gaṇadharas*, *Nihnavas*, *Nihnava-vāda*, *Śeṣa Upodghāta*, *Nir-yukti* and a *svādhyāya Nivṛtyukti*. Of these, *Gaṇadhara vāda* and *Nihnava-vāda* are the most important of all, because they discuss both positively and negatively, several philosophical topics that are vitally connected with the Jain Āgamas.

Commentaries.

These commentaries are said to have been written on the text of *Vīśeṣāvaśyaka Bhāṣya*. The author himself is said to have written a commentary on his own work, but unfortunately, his commentary is not available at present. The second commentary has been written by *Kotyācārya* (or *Śilānkācārya*) the manuscript of which dated 1135 V. S. is preserved in a tattered condition in the *Bhāṇḍārkhara* Research Institute, Poona. This commentary has not been published as yet. The only commentary that has been published and popularly accepted at present, is that of *Maladhāri Hemacandrācārya*.

Maladhāri Hemacandrācārya is different from *Kali-Kāla Sarvajña Hemcandrācārya*, the wellknown author of *Kvyās'raya*. Originally, he was wellknown as *Pandit Svetāmbarācārya Bhaṭṭāraka*. But his worldly name was *Pradyumna* and in the prime of his youth, it is said, he was a minister. By the advice of *Śrī Abhaya-dēva Śūri* he renounced the worldly life and having left his four wives, he entered the *aṣṭetic* life. *Siddharāja Jayasinha*, the great monarch of Gujarat, of the twelfth century V. S., was highly impressed by his great personality and wide-spread well-versedness.

(c) *Ganadharas*—their names, lineage etc.

Śramaṇa Bhagavāna Mahāvīra had eleven *gaṇadharas* in all. All except *Indrabhūti Gautama* and *Sudharmā Swāmī* had attained *Nirvāṇa* or Final Emancipation during the life-time of their celebrated preceptor. *Indrabhūti Gautama* and *Sudharmā Swāmī* had attained *mokṣa* at *Rājagrihā*, after the *Nirvāṇa* of *Śramaṇa Bhagavāna Mahāvīra*.

All *gaṇadharas* belonged to the high-born families. Being directly under the guidance of *Śramaṇa Bhagavāna Mahāvīra* they became wide-read professors and knew all the twelve *Angas* along with fourteen *Pūrvas*.

The Table attached herewith supplies all information about the eleven *gaṇadharas*.

(b) *Summary of the Text.*

We give below a summary of the text of *Gaṇadhara-vāda* which is contained in *Gāthās* running from 1549 to 2054 of the *Viśeṣāvaśyaka Bhāṣya*.

(i) *Jīva*:—*Indrabhūti Gautamā*, the first *Gaṇadhara*, puts forward his doubt about the existence of Soul and *Śramaṇa Bhagavāna Mahāvīra* removes the doubt by means of various evidences and Illustrations. Explaining the meaning of the word ' *Jīva* ' the *Bhagavāna* remarks that ' *Jīva* ' does not signify body-*dēha*-but it signifies the soul-*ātmā*-which is full of cognizance. Body is only inanimate.

Smṛti (remembrance), *jijñāsā* (desire for knowledge), *ckīrṣā* (desire for activity), *jigamiṣā* (desire for movements) and *sams'aya* (doubt) etc are the properties of Soul, which being self-evident is *pratyakṣa* or directly apprehended. Since body is corporeal and physically visible, properties, like cognizance etc. cannot reside into it. These properties are contained in Soul, because it is *a-mūrta* or incorporeal and *a-cākṣuṣa* or beyond the range of physical sight. This shows that Soul is absolutely different from body.

In reply to the argument of the Védāntists that Soul, being one and the same everywhere, can never be classified, *Śramaṇa Bhagavāna Mahāvīra Swāmī* contends that if the Soul were one absolute entity pervading everywhere, it ought to have been apprehended as one all-pervading element like *ākāśa* even in case of each and every *piṇḍa* or body. But that is not so. The Soul varies with the shape and size of *piṇḍa* or body. Besides, if we deny the existence of Soul, there would be nothing like *sukha-duḥkha* and *Bandha-Mokṣa* in this world.

The Soul is accepted as *vijñānaghana* or an assemblage of many *vijñānas* (cognitions), firstly because it is identical with *vijñāna* which is *upayoga* (attention) either of the type of *jñāna* (knowledge) or that of *darśana* (perception) and

secondly because the soul has its each and every *pralēsa* (the minutest portion) formed from the assemblage of infinite modifications of *vijñāna*.

According to the *Naiyāyika* School, the Soul is devoid of *vijñāna* and hence inanimate. The *Jaina* Preceptor refutes this theory by arguing that the soul is said to have been produced and destroyed only with regard to *upayoga* or attention, but it is indestructible so far as *vijñāna* is concerned, on account of its *vijñāna-santati* or the perpetual continuance of cognition.

(ii) *Karma* : Solving the doubt of *Agnibhūti*, the second *Gapadhara*, *Śramaṇa Bhagavāna Mahāvīra Swāmī* establishes the existence and significance of *Karma* as follows :—

Just as a sprout has seed as its *hetu* or cause, pleasure and pain experienced by the people of this world must also have some sort of *hetu*. This *hetu* is nothing but deeds or *Karma* of the living beings in their past life. Just as the body in youth has the body in childhood to precede it, the body in childhood has also some sort of body to precede it. The body formed of *Karmas* of the past life and hence known as *Kārmaṇa Śarīra*, precedes the body in childhood.

Just as, each and every act performed by a living being in this world yields a fruit, as is seen in case of tilling the ground and many other acts, so also, the acts of charity etc. undertaken by a living being undoubtedly yield fruit which is nothing but *Karma*.

Since a majority of living beings, is found unhappy and only a few of them are found happy, we can easily infer that there are only a few who perform good actions and there are many who perform evil actions. It should be noted that *Karma* here, is different from *Kriyā* or action, as *Karma* becomes *Kārya*, and *Kriyā* the *Kāraṇa*.

Since pleasure and pain etc. are the properties of soul,

the soul would become their *samavāysi-kāraṇa* or the intimate cause, and *Karma*, a *nimitta* or the external cause. *Karma* is corporeal

Since *Kārmaṇa Śarīra* is closely connected with *jīva*, it is beyond the power of sense to perceive it. But there is no doubt that it is a sort of *sūkṣma* (subtle) *śarīra* of an interior nature. Consequently, like the variegated transformations found in cloud, *vicitratā* or variations should be accepted in case of *Kārmaṇa Śarīra* as well

The Soul is connected with *Karma* as intimately as a *mūrta ghaṭa* is connected with *a-mūrta ākāśa* or a *mūrta* finger is connected with the *a-mūrta* actions of expansion and contraction.

So like seed and sprout, body and *Karma* are mutually related as *hetu* and *hetumat* rendering theory the *Karma-santāna anādi* or beginningless.

Finally, by the help of *Vēda-padas*, the *Bhagavāna* establishes *Karma* as the intervening agent which helps the soul in the production of body. He further explains that *puṇya* is produced by holy deeds and *pāpa* by unholy deeds.

(iii) *Relation Between Soul and body*: According to *Vāyubhūti*, the third *Gaṇadhara*, soul and body are identical. But the Great Preceptor explains to him the relation between soul and body in details and removes his illusion. According to him, *cētanā* or consciousness is not the property of each one of the five *bhūtas* or principal elements which constitute the body, but *cētanā* is the intrinsic quality of soul residing into a group of *bhūtas*. For, if *cētanā* were the quality of all *bhūtas* taken together, it ought to exist in a dead body as well. But it does not happen so.

Just as *Dēvadatta*, who recollects an object perceived through the five windows of a palace in the past, is different

from the five windows, as well as, the palace, so also a person recollecting an object apprehended by the five senses of a body, is different from the body and its five senses.

When *Dēvadatta* recalls an objects seen through a number of windows, even the windows are closed, it is *ātman* or soul that recollects the objects perceived through sense-organs even when the sense-organs have ceased working as in case of benumbed state of blindness, deafness etc. This shows evidently that *ātman* is different from *indriyas*. Or, say, for example, a soul who observes a person eating tamarind by means of eyes, and exhibits *vikāras* or perversion by distilling saliva etc. by means of tongue, is decidedly different from eyes as well as tongue. Or, *ātman* is different from *indriyas*, because having seen an object by means of eyes, *ātman* holds it by means of hands.

In reply to the *Buddhistic* theory that like all objects, *jīva* is destructible, it is argued that one who remembers the incidents that happened in former time and place, is existing like *Dēvadatta* who is able to recollect his experience of childhood. So, the soul also can never vanish on account of its being able to recollect the past life.

Bauddhas advocate the destructibility of *jñāna* (knowledge) by means of statements such as “*Yat sat tat sarvam kṣaṇikam*” and “*Ekavijñānasautatayaḥ sattvāḥ*” etc. But if the destructibility of knowledge were accepted, there would be absolute negation of *smaraṇa*. *Jñāna* of the *pramātā* (or the perceiver) should, therefore, be taken as indestructible. *Jñāna* being a quality, could never exist without a substance. This shows distinctly that soul is distinguished from body.

Further, according to *Bauddhas*, *kṣaṇikatā* or impermanence is recognized neither by means of self-perception nor by the help of perception through sense-organs, but by means of *anumāna* or inference only. They further believe that the

earlier moments of apprehension create such a desire during the later moments of apprehension that by virtue of that desire, even a *kṣāṇika vijñāna* having only one support, is able to apprehend other *jñānas* and their *viśayas*. This theory of *Bauddhas* seems fallacious. For, *vāsanā* or desire mentioned above, could be applied only when it is related to *vāsaka* or *vāsaviya* and could never be applied to the knowledge that vanishes immediately after its birth.

Lastly, if *ātman* were taken to be *kṣṇika*, a number of faults such as production of many objects at a time, retention of *vijñāna*, and violation of the law of cause and effect etc., would crop up. These faults could only be avoided if soul were taken as susceptible to *utpāda* or production, *vyaya* or destruction, and *dhrauvya* or retention.

In addition to all these arguments, the sentence of *Vēdas* also leads to establish that *ātman* is different from body.

(iv) *Existence of Elements* : In courses of discussion with the fourth *Gaṇadhara* named *Vyakta*, the *Bhagavāna* explains the validity of the view that elements do exist.

Since *jīva* etc are contained in *bhūtas* or elements, doubt about *bhūtas* gives rise to doubts about the existence of all leading to the idea of all-pervading negation. Consequently, we will be compelled to take the whole Universe as nothing but illusion or dream. And according to this notion of all pervading negation, there will be no distinction between *svamata* or one's own opinion and *papa mata* or another's opinion, *hrasva* or small, and *dīrgha* or long, and so on.

Some objects are self-accomplished like a cloud produced as a result of collision, with the element as a case without the help of any *Kartā* or agent. Some objects are accomplished like *ghaṭa* by means of an outside agent, while some other objects, are produced by means of their virtues, as well as, the outside agents as in the case of a child produced by means

of its parents, as well as its, own *Karmas*. Lastly, there also exist some objects like sky which are permanently accomplished.

Whatever is accepted and apprehended by us as being produced by means of *sāṃgarī* or a group of materials, is nothing but a collection of atoms. This naturally leads us to believe in the existence of atoms.

Out of the five main *bhūtas* or elements, the first four *viz* *Prithvi* (earth), *ap* (water), *téjaṣ* (fire) and *vāya* are *sa-cetana* or animate, because the symptoms of *cetanā* are found in all of them. But the fifth element *viz*, *ākāśa* (sky) being *a mūrta* or incorporeal, acts only as a support and has no life.*

Though distinct from the variations of clouds etc, bodies made of the first four elements are *sa-cetana* only so long as they are unstruck by any implement. These bodies turn lifeless immediately if and when they are struck by some implement.

At this point, the *Bhagavāna* explains the important doctrine of *Ahiṃsā* or non-violence. He dictates that according to the specific laws of morality, that which results in evil consequences, is called *hiṃsā* and that which results in good fruition is called *a-hiṃsā*

One does not commit *hiṃsā* in spite of his striking a *jīva* if his motive in doing so is beneficial at the end; on the other hand, a person is said to have committed *hiṃsā* on account of his evil motive, inspite of his abstention from striking a living being.

All these facts lead to prove that *bhūtas* do exist, and that out of the five main *bhūtas*, the first four are *sa-cetana*.

(v) *Identity of Existence*: *Sudharman*, the fifth *Gaṇadhara*, asksd a question as to whatever a living being in

* Vegetables being only a variety of *Prithvi* should be included under *Prithvi*.

this world lived a similar life in the other world. *Śramaṇa Bhagavāna Mahāvīra Swānā* removes his illusion by the following explanation:—

Attainment of re-birth or existence in the other world depends upon the *Karmas* of an individual. The *Karma-bandha*—which binds the soul to the body—is caused by *nūthyātva* (wrong belief), *a-vīratī* (non-renunciation) *pramāda* (carelessness), and *yoga* (vibrations set up in the soul through mind, body, and speech). *Para-bhava*, being dependent upon *Karma*, happens to be *vicitra* like *Karma*. So, if the life in two existences were one and the the same, there would be no scope for an increase or decrease in it. In such a case, one who is rich in this life would become rich in the next life also, and a poor man in this life, would remain poor in the next life also Thus, there would be nothing like progress or retardation, if this and the other life were to be the same or identical. Consequently, there would be no justification for the praetice of religious duties and pious deeds in this world.

This shows clearly that similarity or identity between the two *bhavas* or existences would never be possible, and the belief is refuted by means of *Vēda-padas* like “ *Śrugālo vai eṣa jāyate yuḥ sa-purīṣo dahyaté* ” etc. also.

(vi) *Bandha and Mokṣa*: Since body and soul are connected with each other as *hētu* and *hētumat*, they must have perpetual continuance. The tendency of body is such that it becomes the cause of the future body and effect of the past *Karmas* In case of an *anādi santāna* also, that which is the cause of future body and effect of the past one, becomes decidedly a perpetual continuance of body and *Karma*. This proves the existence of *Karma-bandha*

The mutual relation between *Jīva* and *Karma* is endless and beginningless (*anādi ananta*) like sky, and at the same time beginningless, but limited (*anādi sānta*), like that between

gold and stone. The *anādi-ananta* relation exists with regard to *a-bhavya* or mean *jīvas*, and the *anadi santa* relation exists with regard to *bhavya* or higher souls

Bhavya means that which is fit for the attainment of *Siddhi*. The group of such *bhavyas*, is endless like *akāśa*, and hence it could never be destroyed.

Mokṣa means separation or shedding off of the *Karma-pudgalas* from soul. *Mokṣa* is neither *kṛitaka* or artificial, nor *a-nitya* or impermanent. It can be said to be *a-nitya* only to the extent that everything is *nitya* or everlasting as *dravya* (substance) and *a-nitya* or impermanent as *pariyāya* or modification. Like consciousness, movement is also an important property of soul.

Free souls possess movements. But these free souls cannot go beyond *Siddhakṣétra* in absence of *dharmāstikāya*. *Dharmāsīkāya* and *Adharmāstikāya* are the two factors which distinguish *loka* from *a-loka*.

Like *Kāla*, *Mukātmā* is also *anādi*. That is, just as nobody knows which was a first day or a first night, since the stream of *Kāla* flows on from times immemorial, in the same way, nobody knows when the first free soul came into existence. Innumerable *siddhas* or *mukta* beings could be contained in one *siddha-kṣétra* by virtue of their *a-mūrtatva* or form lessness as the *Siddha-kṣetra* has only limited dimensions.

Bandha and *Mokṣa* are, therefore, laid down as positive factors existing by virtue of *Karmas*, as shown above.

(vii-viii) *Existence of Dévas and Nārakas*: Existence of *dévas* or gods and *Nārakas* or hellish denizens could be proved in various ways.

At the time of a *Tīrthānkara's* birth, many gods and goddesses come to this world to pay their homages.

Like luminary gods such as Moon etc., other gods are also perceptible. Here if it is said that Moon etc., are not luminary gods but they are mere places of habitation, there ought to exist inhabitants of these places also. And these inhabitants are none but gods.

It is impossible to find people in this world who are cent per cent happy or cent per cent unhappy. For, in this world, a happiest man is undoubtedly affected by some sort of disease, or old age, and an extremely miserable man will experience the happy breeze of cool wind, and the brightness of light. From this point of view, human beings could never be called cent per cent happy or cent per cent unhappy. It is the *Nārakas* or hellish denizens only, who are destined to the cent per cent misery and it is the *dēvas* or divine beings who enjoy cent per cent happiness. It is true that sometimes a human being is allegorically called a 'god' but we should not forget that unless and until the principal meaning of a world is attained, the secondary meaning could never be and *nārakas* are *acākṣuṣa* i. e., beyond the perception of senses, they do exist.

(ix) *Pāpa Punya*: There are five different theories about the existence of *pāpa-punya*:—

(1) There exists *punya* alone which increases or decreases causing pleasure or pain. (2) There exists *pāpa* alone which increases or decreases causing pain or pleasure. (3) *Punya* and *pāpa* exist in a combined state like *mecakamani* (4) *Punya* and *pāpa* are independent of each other. (5) There is nothing like *Karma*, and hence there is nothing like *punya* and *pāpa* also.

S'ramaṇa Bhagavāna Mahāvira Swāmī refutes all the above-mentioned theories and establishes his own in this way:—

Just as a potter accompanied by earth, stick, wheel etc. happens to be the cause of *ghaṭa*, there do exist *punya* and

pāpa which are but respectively good and evil forms of *Karma* that works as the *hetu* or cause in the production of body. Though there exist visible *hétus* like father and mother in the production of body, there do exist invisible *hétus* like *puṇyas* and *pāpas* also, which determine the form proportionate or im-proportionate, beautiful or ugly, according as it is due to *puṇya* or *pāpa*. In other words, *śubha śarīra* is the product of *puṇya karma*, and *a-śubha śarīra* is the product of *pāpa karma*.

Like the *mūrta ghaṭa* which becomes the cause of *a-mūrta jñāna*, the *mūrta karma* is also the cause of *a-mūrta sukha-duḥkha* or pleasure and pain etc. The experience of exquisite happiness is caused by the abundance of *puṇya* and the experience of utmost miseries is due to the abundance of sins.

Puṇya and *pāpa* which thus act as the causes of happiness and misery are independent of each other. Since, there is no reason for the *Karma-bandha* of *puṇya* and *pāpa* taken together, they can never exist in a combined state like *mecāka-mani*. As seen before, *mithyātva*, *a-virati*, *kaṣāya*, *pramada* and *yoga* are the main causes of *Karma-bandha*. None of these causes happens to operate in case of the production of a combined state of *mecakamaṇi*.

Fruition of *jīva śubha* or *aśubha* turns the *Karma śubha* or *aśubha*-at the time of apprehension.

Food of the same kind produces blood, flesh and saliva etc. in the body on one hand. results in useless refuse of faeces and urine also on the other hand. In the same way, *Karma* though apprehended in similar ways, results as *śubha* or *a-śubha* by virtue of *pariṇāma* and *āśraya*. Thus, according to Jainism, there do exist *puṇya* and *pāpa* as separate entities.

(x) *Para-bhava* or the Other World: Since *Ātman* is susceptible to production, destruction, and retention as seen before, it must have an access to the next world. When *jīva* first apprehended *ghaṭa* and then apprehendeds *paṭa* the

apprehension of *ghaṭa*—known as *ghāṭa-cētanā*—is destroyed, that about *paṭa*—or *paṭa-cētanā*—is produced and the *cētanā* is retained in a continuous range of consciousness existing from times immemorial.

The same is the case with *jīvas* which are staying in this world, or which have already passed to the other world. For, since they are susceptible to *utpāda*, *vyāpa*, and *dhrauvya*, they have a natural access to the next world.

Moreover, if there were absolute negation of *para-loka* the commandments of performing *agnihotra* etc. for one desirous of Salvation, and the prescription of the rewards of righteous deeds such as charity etc. would be of no avail.

(xi) *Nirvāṇa or Final Emanicipation* : Buddhistic theory of *Nirvāṇa* is this:—A lamp, when extinguished, does never fade into any sort of earth, ether or space, but it only pacifies itself; so also, the Soul, when finally liberated (from body) does never fade into earth or sky, nor does it pass to any of the directions, but it only attains pacification at the removal of worldly bondages of *sukha-duḥkha*.

There is another theory also, which asserts that *mokṣa* or *nirvāṇa* is a peculiar positive condition of the soul, at the attainment of Absolute Knowledge and Perception, when all sorts of miseries such as affection, enmity, pride, avarice, infatuation birth, death, old age, and diseases etc. have been removed.

Refuting both the above-stated theories, *Sramaṇa Bhagavāna Mahāvira* asserts that *mokṣa* means the entire separation of *Karma* from the region of soul. Since the mundane world has its production due to *Karma*, it vanishes with *Karma*. But *jīvatva* happens to exist from times immemorial, and is not produced by *Karma*. So, *jīvatva*, naturally, can never vanish with *Karma*. It is not proper, therefore, to believe that at the time of *Nirvāṇa*, *jīva* vanishes like a lamp.

Really speaking, the flame of a lamp does not vanish entirely but it only changes its form. Just as milk changes its form into curds, the flame of a lamp changes into darkness. The minute particles of the flame of a lamp transform themselves into still more minute particles of darkness which are not perceptible. But that does not mean that they have ceased to exist entirely. As a matter of fact, the light-particles of the flame which were perceptible to the eye, would become perceptible to nose when turned into darkness. So, the lamp does not entirely die away, but it only changes from light into darkness which is perceptible. Like lamp, *jīva* is also said to have attained *Nirvāṇa* or Final Emancipation, when that *jīva* passes into a new form which is *a-mūrta*, free from *Karma-bandhas* and which is unobstructible. This, therefore, shows that the pure, eternal, positive condition of *jīva* at the removal of obstructions like *sukha-duḥkha* is called the state of *Nirvāṇa* or Final Emancipation to the *jīva*.

Like a sage, engrossed in the highest bliss of Absolute Knowledge, a *Muktātmā* liberated from the bondages of all sorts of worldly miseries, like birth, death, and old age etc enjoys a blissful state of Perfect Knowledge.

Finally, explaining the real interpretation of the sentences of *Vēdas* such as “ *Na ha vai saśarīrasya priyā'priyāyora-pahatīrasti* ” as well as “ *Aśarīram vā vasantam priyā'priye na spṛṣataḥ* ” etc., *Śramaṇa Bhagavān Mahāvīra Swāmī* convinces the *Gaṇadhara* of the validity of the theory of *Nirvāṇa*, and removes all his doubts. (For further explanation see discussion with the last *Gaṇadhara*).

Gaṇadharavāda and Nihnavavāda,

Although both the *Vādas* ultimately point to the common goal of the realisation of truth, there is a great contrast between *Gaṇadhara-vāda* and *Nihnavavāda*. In so far as their subjects, method of discussion, debators, and the consequences of debate are concerned. These points of contrast could be explained briefly as follows :—

*Gaṇadhara*vāda deals with a positive type of discussion while *Nihnavā*vāda deals with negative type of discussion. *Gaṇadhara*vāda strengthens the hands of *Jaina Āgamas* by asserting certain cardinal virtues of the *Jaina Religion* *Nihnavā*vāda tries to repudiate the principle of Jainism in one way or the other weakening thereby its influence over the people. Discussions in G. V. are based on the interpretations of certain *Védavacanas*; those in N. V. are based on the interpretations of the *Jaina Āgamas*. *Gaṇadharas* enjoy the proud privilege of entering into debate with *Śramaṇa Bhagavāna Mahāvira* Himself; *Nihnavas* enter into controversy with Preceptor or of one *Gaccha* or the other *Gaṇadharas* entertain honest doubts in their minds from the beginning and hence accept the principles of *Tīrthaṅkara* as soon as they are convinced; *Nihnavas*, in most cases, do not leave their rigid beliefs in spite of any number of solid arguments advanced by their opponents. Debates of *Gaṇadharas*, therefore, seem to have generated for the realisation of truth, while those of *Nihnavas*, are caused out of jealousy, anger, vanity, or infatuation in many cases. Thus, love of truth is at the root of N. V. All the *Gaṇadharas* argue with their Celebrated Preceptor frankly with true desire for knowledge, and hence they do not hesitate in accepting the *Dikṣā* ultimately, when all their doubts are dispelled; *Nihnavas* on the other hand, deliberately try to hide the truth in order to refute the theory amongst the monks and create disruption in the *Gaccha*.

Faith in *Āgamas* is the guiding spirit of *Gaṇadharas* scepticism is the main characteristic of *Nihnavas*. In G. V., the debators are non-Jaina persons who are initiated into Jainism at the end; in N. V. the debators not only *Jainas* but the learned *Jaina* monks themselves who abandon the *Jaina* church and try to establish their own School. Logic, pure and simple, brings the debators to the right path in G. V.; physical punishment brings the debators to the right path in many cases in N. V. a

In G. V., the discussions are held on a very high level as they treat philosophical subjects from beginning to end; while

in N. V, the discussions sometimes fall to the level of mere logical tricks employed for refuting a small argument related to a certain statement of *āgama*. *Ġaṇadhara*s never went against the *Jaina Canon*; on the contrary they sponsored the movement of establishing its influence over the masses by dedacting the principles of preachings of *Śramaṇa Bhagavāna Mahāvira* into books. It was not so with *Nihnavas*. Since they were prominent monks holding strong influence over the public, the *Nihnavas* actually propogated their wrongly-based theories among the dull-witted monks and defiled certain portions of the *Ġaccha*, by dragging some of its members on their sides. *Rohagupta* and *Śivabhīti* are the glaring instances of this type. In short, the tendency of being at perfect agreement with the preachidgs of *Śramaṇa Bhagavāna Mahāvira* signifies the character of *Ġaṇadhara*s; while that of being at disagreement with the same, either in part or in toto, reflects the character of *Nihnavas*.

The Author-His Life, Works, and Date

Life—

Jinabhadaragaṇi Kṣamaśramaṇa is the author of this splendid work. Very little is known about his life. Yet, there is no doubt that the author was a highly-esteemed scholar of his age†

He was the first *Jaina* writer and preacher who had consistently attempted to interpret and explain the principles of the *Jaina Canon* in such a manner as to appeal to the intellect of the people. That is to say, he did not instruct his pupils or followers only in a traditional way without caring for the inner motive or spirit of the preachings. Though he preached the same old traditional principles of the *Jaina Canon*, he interpreted and

† Here are the tributes paid to him by several commentators:—

explained them in a logical way so as to appeal to their intellect. He was, therefore, accepted by the people as an unparalleled preacher and scholar of the age, and hence was awarded the title of “yugapradhāna” *

His knowledge was not confined to the religious fore, but he was well-versed in the sciences of mathematics, etymology, prosody, and phonology also. ‡

Still, however, Ācārya Jinabhadra Āṇi was the staunch and orthodox upholder of the traditional Jaina Canon. Though he knew many sciences, his extensive knowledge and intelligence, were taken advantage of only for establishing the authenticity and validity of the Jaina Āgamas. He is therefore taken as one of the pioneer āgama-pradhāna or orthodox Ācāryas*

He used to take the support of logical illustrations and inferences only partially in the sense that such illustrations or inferences were quoted only if they strengthened the view-point

of the traditional Jaina Āgamas, and were rejected if they went against the traditional preachings. The example of his predecessor Siddhaséna Divākara is well-known. Siddhaséna was a free-minded, but logical interpreter. His works are full of original thoughts and independent ideas, irrespective of their being different from or similar to the traditional Jaina Āgamas. The theory that Absolute Knowledge and Absolute Perception do not take place simultaneously but one after the other, has been proved by him by the help of logical inferences and concrete illustrations. Siddhaséna thus went against the traditional view of the Jaina Āgamas according to which the Kévala-Jñāna and the Kévala-Darśana took place simultaneously. Jinabhadra Gaṇi Kṣamāśramaṇa repudiates the theory of Siddhaséna Divākara in his Viśeṣāvaśyaka Bhāṣya and re-establishes the original theory of the Jaina Āgamas that Kévala Darśana and Kévala Jñāna take place simultaneously.* Jinabhadra Gaṇi is, thus, well-renowned as the up-holder of the Jaina traditions.

That Jinabhadra Gaṇi Kṣamāśramaṇa was an orator of established reputation is known from several sources. The commentator Hémcandrācārya Maladhāri refers to Jinabhadragāṇi as “Upa Jinabhadra Kṣamāśramaṇāḥ Vyākhyātāraḥ”. Another commentator named Koṭyācārya, who has written a commentary on the Viśeṣāvaśyaka Bhāṣya, pays him a tribute to the same effect in the last verse of his commentary. He says †

Works—

Jinabhadra Gaṇi Kṣamāśramaṇa is said to have composed the following works:—

(i) Viśeṣāvaśyaka Bhāṣya. This wellknown work has been ranked as one of the most important and highly esteemed works of Jainism. The author himself wrote a commentary on this Bhāṣya, in Sanskrit. Jinabhadragaṇi has earned the reputation as a commentator mainly from this work. For, wherever he has been referred to as Bhāṣyakāra, the references have been quoted from Viśeṣāvaśyaka Bhāṣya. But as has been suggested in the Preface to the Jīta Kālpā Sūtra* it is not improbable if Jinabhadra Gaṇi Kṣamāśramaṇa had composed other bhāṣyas as well. Take, for example, the following verse from the Viśeṣāvaśyaka Bhāṣya—

पोग्गल-मोदय-दन्ते फरुसमवडसालमंजने चैव ।
धीणादियस्स ए ए दिह्ठा होति नायब्बा ॥ २३५ ॥

In this verse, the examples of poggala (flesh), modaya, (sweet-balls), danta (teeth), pharusaga (a potter) and vaḍasāla (the branch of a tree) have not been explained in details by the commentators. Ācārya Hēmacandra Maladhāri suggestively remarks that “एतान्युदाहरणानि विशेषतो निशोधाद्भक्सेयानि” (These examples should be understood in details from Niśeetha).

Ḳoṭyācārya‡ also leaves the remark unexplained merely by saying “निशोथे वक्ष्यामः” (We shall explain in this Niśeetha)

* Vide Jīta Kālpā Sūtra, Preface, Page 9.

‡ Whose commentary has not been published, but is preserved in the Bhāndārkar Research Institute, Poona.

The question arises as to who is the author of Niśeeth. The tradition does not give the credit of authorship either to Hēma-
candrācārya Maladhārī or to Koṭyācārya. So, it is probable that
the commentary must have been written by Jinabhadra Gaṇi and
the sentence “निशेथे वक्ष्यामः” found in the commentary of Koṭ-
yācārya, might have originally belonged to the commentary written
by Śrī Jinabhadra Gaṇi Kṣamāśramaṇa himself.

(ii) Brihat Saṃgrahāṇī—This work runs in almost 500 ver-
ses. Ācārya Malayagiri Sūri has written a commentary on this
work in Sanskrit. The work along with the Commentary has
already been published.

(iii) Brihat Kṣétra-Samāsa—This is also a similar work.
Ācārya Śrī Malayagiri Sūri and others, have written commen-
taries and the work along with the commentaries is published.

(iv) Jīta Kālap Sūtra—This work lays down various reli-
gious practices to be followed by the Jaina Monks. The work
is also dealing with the ten types of remonstrations. The subject
of remonstrations has already been treated in the Chéda-sūtra
and other works. Jinabhadra Gaṇi seems to have composed this
work with a view to treat the subject in a precise and compre-
hensive manner.

The oldest commentary available on this work at present
is the cārṇi of Siddhaséna in Prākṛit. In his Cārṇi, Siddhaséna
remarks at one place, that there existed some other cārṇi* also,
before he composed his one, but that is not available at present.
On this Cārṇi of Siddhaséna, Śrī Candra Sūri has written expia-
tory notes in Sanskrit.

Besides the cārṇi of Siddhaséna, there is one more cārṇi
available in Prākṛit verses. It is difficult to say whether it is the
same cārṇi that he refers to or it is different from his own.
Nothing is known about the author and the date of composition

* अइवा ितियचुन्निकश-भिप्पाएग चरवारि वि सुत्तण व गइया ।

either from the portion in the beginning or one at the end.*

(v) *Viśeṣaṇavah* :—This book is a miscellaneous work comprised into nearly 400 Prakrit verses and is not published as yet.

In addition to the above-mentioned five works, some people consider *Dhyāna-śataka* which has been incorporated by Ācārya Mahārāja Haribhadra Sūri in his commentary on the *Āvaśyaka Sūtra*, also to be the composition of Jinabhadra Gaṇi Kṣamā-śramaṇa. But there are not sufficient evidences to convince us of his authorship of *Dhyāna-Śataka*.

Date—

There are no definite means that help us to fix the exact date of Jinabhadra Gaṇi Kṣamā-śramaṇa. Still, however, the tradition of various Paṭṭāvalis throws considerable light on the problem. The tradition of the Paṭṭāvalis written after the sixteenth century (V. S.) tells us that Jinabhadra Gaṇi Kṣamāśramaṇa flourished 1115 years after the Nirvāṇa of Śramaṇa Bhagavāna Mahāvīra. This fixes the date somewhere about 645 V. S.

There is another theory which assigns to Jinabhadragāṇi 500 years earlier than his commentator Maladhāri Hēmacandra-cārya who is said to have flourished in 1175 V. S. According to this theory also, Jinabhadragāṇi Kṣamā-śramaṇa must have flourished somewhere about 650-675 V. S.

The author of *Tapāgaccha Paṭṭāvali* places Jinabhadragāṇi kṣamā-śramaṇa as the contemporary of Ācārya Śrīman Haribhadra Sūri who is said to have written a commentary on *Dhyāna Śataka*. According to this view, Jinabhadra Gaṇi had lived a long life of 104 years, and though Ācārya Haribhadra Sūri was senior to him by 60 years, both of them

* At the end of this bhāṣya the only reference is this:—

स. १०२० वर्षे मागेश्वरिणं शुद्धि १ शुक्रवासरे अद्यहे श्रीपत्तजे लि. श्री
मौढ ज्ञातिना कशीदासात्मेजन अंबादत्तेन । शुभं भवतु । शिवमस्तु ।

(*Jita Kalpa Sūtra*, Preface P. 17)

happend to be contemporaries on account of the long life of Jinabhadra Gaṇi.* This view is not sound, because Haribhadra Sūri did not, in fact, flourish in 530 V. S. or 550 V. S. but he flourished between 757 and 875 V. S. as has been suggested. by Muni jnavijayaji Secondly, Śrīmān Haribhadra Sūri has frequently quoted Jinabhadragaṇi's sūtras in his *Āvaśyaka vitti*. It is, therefore, clear that Jinabhadragaṇi did not in any case flourish after Haribhadra Sūri.

According to other *Paṭṭāvalis*, all of Jinabhadra Gaṇi, Haribhadra Sūri, Dévarddhigaṇi Kṣamāsramaṇa, Śīlaṅkācārya and Kālakācārya, happened to be contemporaries. But the history of the development of Jainism shows that this theory is wrongly based. The date of Śrīmān Haribhadra Sūri has been fixed as the latter half of the eighth and the first half of the 9th century V. S. Jinabhadra Gaṇi has been placed in the latter half of the 7th and the first half of the 8th century V. S. Dévarddhigaṇi Kṣamāsramaṇa and Kālakācārya are said to have flourished in the beginning of the 6th century V. S.

Leaving others aside, let us consider if Jinabhadra Gaṇi and Śīlaṅkācārya happened to flourish at the same time. The tradition says that Śīlaṅkācārya was the priest of Tanarāja, the king of Anahillapura Pāṭana. If this is true, the date of Śīlaṅkācārya falls somewhere near 800 V. S. This places Śīlaṅkācārya undoubtedly as the contemporary of Acārya Śree Haribhadra Sūriji. Now some of the *Paṭṭāvalis* refer to Śīlaṅkācārya as the pupil of Jinabhadra Gaṇi Kṣamāsramaṇa. If this Śīlaṅkācārya is the same as the commentator Kōtyācārya, several references about Jinabhadragaṇi found in his commentary on the *Viśeṣāvaśyaka Bhāṣya*, do not in any way lead us to believe that Śīlaṅkācārya was the pupil of Jinabhadragaṇi. Unfortunately, the last and last portions of this commentary are torn out, † but in course of

* Vide *Āri Tapāgachcha Paṭṭāvali*, Vol I. page 98

† Vide *Jitakalpa Sūtra*, Preface, pp. 14-15.

his commentary, the commentator refers to Jinabhadra Gaṇi Kṣamāśramaṇa at several place. e. g.

- (i) जिनभद्रगणिक्षमाश्रमणपूज्यपादैस्तु नोक्तम् ।
- (ii) अत एव पूज्यपादैः स्वटीकायां प्रायोपग्रहणं कृतम् ।
- (iii) क्षमाश्रमणटीका त्वीयम् ।
- (iv) क्षमाश्रमणटीकापीयम् ।
- (v) श्रीमत्क्षमाश्रमणपूज्यपादानामभिप्रायो कक्षणीयः

Although these references show how much respect the commentator had for Jinabhadra Gaṇi Kṣamāśramaṇa, they do not in any way lead us to believe that Jinabhadra Gaṇi was his preceptor. On the contrary, we find a reference which shows a considerable gulf of time between the dates of Jinabhadra Gaṇi and Śīlaṅkācārya.

The reference is this :—

भाष्याननुयायि पाठान्तरमिदं भ्रष्टः,
एवमनेनैव वृद्धिक्रमेणेत्यादेरर्वाक,
न चेदं भूयसीषु मतिषु दृश्यते ॥”

This reference shows that there were various readings of Viśeṣāvaśyaka Bhāṣya in the time of Śīlaṅkācārya, which means that a considerable period of time must have elapsed after the composition of the Viśeṣāvaśyaka Bhāṣya. This, therefore, prevents us from accepting the view that Jinabhadra Gaṇi Kṣamāśramaṇa was the preceptor and hence the contemporary of Śīlaṅkācārya. Thus, there are many difficulties in according Jinabhadra Gaṇi as the contemporary of Śīlaṅkācārya or even that of Haribhadra sūriji and others. It is, therefore, proper to believe that unless and until there is no evidence against the belief of the tradition, there is no objection in accepting the date of Jinabhadra Gaṇi Kṣamā-

śramaṇa as roughly about the second half of the seventh century V. S,

PHILOSOPHY.

Ethics :

According to Jainism, the main purpose of every living being on this earth, viz *nirvāṇa* or final emancipation is attained in the simultaneous observance of these three main doctrines : (1) Right Belief (Faith in the teachings of *Jinas*) (2) Right knowledge (knowledge of his doctrine) that leads to Salvation and (3) Right Conduct (Perfect Conduct). According to the Jain Philosophy, belief in real existence of *tattvas* is Right Faith. Knowledge of real nature without doubt or error is Right Knowledge attitude of neutrality without desire or aversion towards the objects of external world, is Right Conduct

Virtue consists of the five-fold conduct of one who has knowledge and faith :—

1. Innocence-or *a-himsā* which is not mere negative abstention but positive kindness to all creation.
2. Charity and Truth-speaking.
3. Honorable conduct—such as not stealing.
4. Chastity in word, thought, and deed.
- 5 Renunciation of all worldly interests.

Jaina Ethics lay stress on both faith and works. All those actions which lead to peace of mind are *puṇya* *Himsā* or infliction of suffering, is the great sin or *pāpa*.

Untruthfulness, dishonesty, unchastity, covetousness, anger, conceit etc are other sources of sin Sin is no offence against God, but only against man according to *Jaina* ethics.

The ethical system of the *Jainas* is more rigorous than that of the *Buddhists*. It looks upon patience as the highest good, and pleasure of senses as a source of sin.

The chief feature of *Jainism* is *ahimsā* (respect for all and abstention from injuring everything that has life.)

The *Jainas* repudiate the theory of the creation of the world out of nothing or as a series of accidents. According to them, there can neither be destruction of things that do exist nor there be creation of things out of nothing. So, according to this view, there is no God necessary for creation or destruction.

Jainism looks upon God, Nature, and Soul, as aspects of the same. According to *Jaina* ethics there is no God; except the soul in its ideal integrity.

Jaina Philosophy tells us that the life of a good in heaven is one of the forms that a soul might assume by the accumulation of *puṇya* (merit). According to them, gods are only embodied souls like men and animals different from them in degree but not in kind.

The liberated souls are above gods. They are never born again, and they have no connection with the world. Meditation or adoration of the *Jinas* sanctifies the soul.

Theory of Soul : Pluralita os spirits

According to the *Jaina* philosophy, the universe is filled with *jīvas*. *Jīva* means whatever is living and not whatever is mechanical. So, it correspond to the life-element of Bergson. And since it is subjects of experience it also corresponds to the monad of Leibniz.

Jainism does not seem to have made exact distinctions between *jīva* and *Ātman*, a *jīva* and matter. A *jīva* is a particular kind of existent being. The liberated *jīva* freed from matter, is called the *Ātman*. *Ātman* means pure consciousness untinted by matter. It excludes all space and externality. It is the *jīva* purified and raised to the highest spiritual status, which is mere formless consciousness.

On the other hand, *puḍgala* is not pure matter untouched by consciousness. It already bears the impress of spirit. *Ātman* is the spirit of being and matter is the negative principle of non-living. The latter corresponds to the space of Bergson, or the *materia prima* of Leibniz. The bare materiality of *puḍgala* is the direct opposite of spirit. A *jīva* is the combination of the two. It is material-spiritual. A soul loaded with matter is evolved in bondage. All *jīvas* in *samsāra* are associated with this negative element.

Jainism believes that *Ātman* or the pure spirit, or pure matter, and *jīva* which is a combination of the two, are existent, though the first two are imperceptible to us. The *puḍgala skandha* which we see, has also an element of consciousness, and is as much a *jīva* as others, so far as the essence is concerned. The *jīva* and the *a-jīva* of the Jainas are not empirical abstractions of *Ātman*, or consciousness, and Matter or non-consciousness but the products of an interaction between the two. Strictly speaking, *Ātman* and *non-ātman* are the primary elements. *Jīva* possesses more of self, *a-jīva* more of non-self. They represent two orders of arrangement in the whole univers.

Jainim believes in plurality of spirits. The *jīvas* are many, but are alike eternal. Their characteristic essence is never destroyed, however much it is obscured by external causes. They are regarded as possessing size which is varying in different cases. They contract and expand according to the dimensions of the body with which they are incorporated for the time being. Truly speaking, the essence of all *jīvas* is consciousness and it is only superficial to advance the theory of plurality of *jīvas*. It is only a relative conception and cannot be taken as an ultimate truth. Still, however, this distinction of spirits is justified in the sense that it distinguishes good from the bad, *Brāhmaṇas*, *Kṣatriyas*, *Vaiśyas*, and *Sūdras*, from each other, insects, birds, snakes and so on. For, the *Jaina* Canon dictates that if there were but one soul common to all beings, they could not be distinguished from one

another, nor could they experience different lots; there would not be *Brāhmins*, *Kṣātriyas*, *Vaiśyas* and *Śūdras*; insects, birds and snakes. All would be men and gods. We make equal both those who lead a blameable life, and those who, in this world, practise right conduct.*

Thus unlike other systems of philosophy, *Jainism* asserts the doctrine of pluralistic realism.×

Theory of Knowledge—

Like the theory of Soul, that of Knowledge is also distinctive of *Jainism*. The *Jamas* admit five kinds of knowledge viz., *Mati Śruta*, *Avadhi Mananparāya* and *Kevala*.

1. *Mati* is ordinary cognition obtained by normal means of sense-perceptions. We always have sense-perceptions or *darśana* prior to the rise of *mati-jñāna*.

2. *Śruta* or testimony is knowledge derived through signs, symbols, or words. while *mati-jñāna* gives us knowledge by acquaintance, this gives us knowledge by description.

3. *Avadhi* is direct knowledge of things even at a distance of time or space. It is knowledge by clairvoyance.

4. *Mananparāya* is direct knowledge of the thoughts of others as in telepathic knowledge of other minds.

5. *Kevala* or Perfect Knowledge, comprehends all substances and their various modifications. It is omniscience unlimited by time, space, or object. This knowledge, which is independent of the senses, which can only be felt and not described, is possible only for purified souls which are perfectly free from bondage.

* *Vide Sutrakritanga*, ii 7.48 and 51.

× Cf Bosanquet—"It is freely admitted that in cognition, the self is universal. It goes out into a world which is beyond its own given being and what it meets there it holds in common with other selves, and in holding, it ceases to be a self-contained and repellent unit."

(Gifford Lectures, Second Series, Chap. II)

The first three kinds of knowledge, are liable to error, while the last two cannot be wrong.

Knowledge is *pratyakṣa* or direct when it is immediate, and *parokṣa* or indirect when it is mediated by some other kind of knowledge. Of the five kinds of knowledge, *mati* and *śruti* are *parokṣa* and the rest *pratyakṣa*.

Cētanā or consciousness is the essence of *jīva* and the two manifestations of *cētanā* are perception (*darśana*) and intelligence (*jñāna*). In *darśana*, the details are not perceived while in *jñāna* they are. The former is simple apprehension, the latter conceptual knowledge.

The relation between knowledge and its object, is an external one with regard to physical objects, though it is not so with regard to self-consciousness. The consciousness of *jīva* is ever active and this activity reveals its own nature, as well as, that, of the object. *Jñeya* or object of knowledge includes self and non-self. Like light, *jñāna* reveals itself and other objects. The *Nyāya-Vaiśeṣika* theory that knowledge reveals only external relations but not itself, is rejected by the *Jainas*: In knowing any object, the self knows itself simultaneously. Knowledge is always apportioned by the self, according to them, and the question as to how consciousness can reveal the unconscious object, is dismissed by them as absurd, since it is the nature of knowledge that it reveals objects.

With regard to self-consciousness, the relation between *jñāna* and *jñeya* is very intimate. *Jñānin* and *jñāna* are also inseparable, though distinguishable. In self-consciousness, the subject of knowledge, the objects of knowledge, and knowledge itself, become different aspects of a single concrete entity.

There are *jīvas* without *jñāna*, since that would take away the *cētanā* or conscious character of the *jīvas* and reduce them to the level of *a-jīva dravyas* and there can be no *jñāna* without selves; for that would make *jñāna* foundationless

In its perfect condition, the soul is pure. *Jñāna* and *darśana* (knowledge and intuition) arise simultaneously or are together. In the mundane *jīvas*, *jñāna* is preceded by *darśana*.

Perfect knowledge is free from doubt (*saṃśaya*) perversity (*vimoha*) and indefiniteness (*vibhrama*) *Karmas* which obscure the different varieties of *darśana* are *darśanāvaranīyū Karmas* and those which obscure the different kinds of *jñāna* are *jñānāvaranīyā karmas*.

These impediments are passions and emotions All knowledge resides in the soul though it manifests itself when the disturbing media are removed

Theory of Karma :

Karma is another important topic of the *Jaina* Philosophy. *Karma*, according to *Jamas*, is of material nature (*puṅgalika*). The kind of matter fit to manifest *Karma* fills all cosmic space. It has the peculiar property of developing the effect of merit and demerit. The soul by its commerce with the other world, becomes literally penetrated with the particles of subtle matter. These become *Karma* and build up a special body called " *Kārmaṇa Śarīra.* " which does not leave the soul till its Final Emancipation.

Jīvas which are found on this world in infinite number, are of three kinds (1) *Nitya siddha* or the ever perfect (2) *Mukta* or the liberated and (3) the *Baddha* or the bound.

The second variety of *jīvas*, does not become embodied They have achieved their purity and dwell in a state of supermundane perfection unconcerned with worldly affairs. The mundane *jīvas* are a prey to illusion, and are condemned to the yoke of matter through an infinite succession of lines. The freed souls are absolutely pure and free from any tint of matter. They are the *nirupadhī jīvas* leading a life of pure existence and infinite consciousness and possess infinite knowledge, infinite perception, infinite power, and infinite bliss.

Translation—1. (O Indrabhūti of Gautama race !) You have a doubt about (the existence of) *jīva* (the soul) since it is not directly perceived (by senses) as in the case of *ghaṭa* (a water-jar). Whatever is absolutely imperceptible, does not exist in the world, e. g., a flower in the sky. (1549)

Digest of the Commentary—O Long-lived Indrabhūti ! You entertain a doubt about the existence of the soul. For, you come across reasons, some of which -lead you to believe that the soul exists, whereas, others make you surmise that the soul does not exist. The latter are as under :—

The soul does not exist; for, it is, in no way, perceptible by *pratyakṣa pramāṇa* (direct and valid proof) produced by a sense-organ, as is the case with a *ghaṭa*. Whatever is *atyantāpratyakṣa* (absolutely imperceptible) is certainly non-existent in this world, e. g., a flower in the sky. Whatever exists, is certainly perceived—realized by *pratyakṣa pramāṇa*, e. g., a pitcher. This is a *vyatirēka drstānta* (a negative example).

Some one may here argue, that though *anus* (electrons) are not within the range of *pratyakṣa pramāṇa*, they are, so to say, invisible; yet they do exist. So, what about them ? The answer is, that no doubt they are imperceptible . to us as *anus*, but when they are transformed so as to perform the

functions of a pitcher, a cloth, etc., they no longer remain so. Such is not, however, the case with the Soul. It never attains a stage when it can be directly perceived. The adjective *atyanta* is here used on that account.

Trans.—2. It (the soul) is not an object of *anumāna* (inference); for, this (*anumāna*), too, is preceded by *pratyakṣa* and is the outcome of the recollection of the (inseparable) connection previously observed in the case of a *liṅga* (a characteristic or an indicatory mark) and a *liṅgin* (one having such a *liṅga*) . (1550)

D. C.—The existence of the soul, cannot be proved by *anumāna* (inference); for, after all, this *anumāna* is preceded by *pratyaksa pramāṇa* as is suggested by the second hemistich of this verse.

Whatever reveals an object which is imperceptible to the senses, is called a *līṅga* or whatever throws light on a concealed object is a *līṅga*, and one that has a *līṅga* is called a *līṅgin*. For instance, smoke is the *līṅga*, and fire the *līṅgin*. To give another example *kṛtakatva* (performance of an action) is the *līṅga*, and *anityatva* (impermanence) the *līṅgin*.

An inseparable connection between smoke and fire, in the form of effect and cause—the connection which is directly perceived in a kitchen, etc, can be established in two ways, viz, by *anvaya* (positively) and by *vyatirēka* (negatively). Wherever there is smoke, there is fire, is an example of *anvaya*; and wherever there is non-existence of fire, there is non-existence of smoke, is an example of *vyatirēka*.

The recollection of the inseparable connection existing between smoke and fire, helps a man to infer the presence of fire, when he sees clouds of smoke rising to the sky, either in a forest or on the top of a mountain or the like. For, he is then reminded of having seen fire when smoke was found coming out of the kitchen or the like. Thereupon, he works up a syllogism, as under.—

Wherever there was smoke, I previously saw fire there, as in the kitchen and elsewhere. I see smoke here; so, here, there must be fire. Thus, he rightly infers fire in view of his having previously noticed the inseparable connection between

smoke the *līnga*, and fire the *līngin*, and on his recollecting this connection, while drawing the inference.

But in the case of the soul, a *līngin*, no connection of it, whatsoever is directly perceived with any one or more of its *līngas*. Such being the case, there is no room left for the recollection of an inseparable connection between the soul and its *līnga* and hence there is no chance left for establishing the existence of the soul by *anumāna*.

Moreover, if the inseparable connection were to be observed in the case of the soul and its *līnga*, the soul would be directly perceived, and in that case, there would be no necessity to infer its existence.

It is said :

न य जीवलिङ्गसम्बन्धदरिसणमभू जओ पुणो सरओ ।
तल्लिङ्गदरिसणाओ जीवे सम्पच्चओ होज्जा ॥ ३ ॥ (१५५१)

Na ya jīvaliṅgasambandhadarisaṇamabhū jaō puṇo saraō ।

Na ca jīvaliṅgasambandhadarśanamabhūd yataḥ puṇaḥ smarataḥ ।
Talliṅgadarśanājīvē sampratyaayo bhavēt. 3 (1551)]

Trans.—3. There has not been (previously) seen (any) connection between the soul and its *līnga*, the recollection of which, along with the sight of its *līnga*, can lead (us) to a conviction about the (existence of) the soul. (1551).

D. C.—It is no use arguing that the existence of the soul can be established by an *anumāna* which is ordinarily met with, as in the case of the motion of the Sun. To put it explicitly, the Sun is in motion; for, it reaches another region, as is the case with Dēvadatta. As regards the Sun, this inference is valid, since we distinctly see that Dēvadatta, who is here a *dr̥ṣṭānta-dharmin i. e.*, serving as an illustration, goes like the Sun, to another country after he has resorted to motion. But as far as the soul is concerned, no *līṅga* (also known as *hetu*) which is inseparably connected with the soul, is directly perceived in any *dr̥ṣṭānta*, (example) whatsoever. Thus, the *sāmānyatodr̥ṣṭa anumāna* is of no avail here.

The existence of the Soul cannot be proved by *-āgama*. (scriptural authority):

नागमगम्मो वि तओ भिज्जइ जं नागमोऽणुमाणाओ ।
 न य कासइ पच्चक्खो जीवो जस्सागमो वयणं ॥ ४ ॥ (१५५२)

Nāgamgammo vi taö bhijjai jam nāgamo'ṇumāṇāö ।
 Na ya kāsai paccakkho jīvo jassāgamo vayaṇam. 4 (1552)

[नागमगम्योऽपि सको भिद्यते यद् नागमोऽनुमानात् ।

Nāgamagamyo'pi sako bhidyate yad nāgamo'numānāt ।
 Na ca kasyacit pratyakṣo jīvo yasyāgamo vacanam. 4 (1552)]

Trans.—4. It (the soul) is not even within the range of *āgama* (scriptural authority); for, *āgama* is not (quite) distinct from *anumāna*. Moreover, the soul is not *pratyakṣa* (directly perceptible) to any one whose word is *āgama*. (1552)

टीका—न चागमगम्योऽपि सकः—असौ जीवः यत्—यस्मादागमोऽपि नानुमानाद् भिद्यते, परमार्थतस्तस्यानुमानत्वात् ; तथाहि—शाब्दं प्रमाणागम उच्यते, शब्दश्च द्विविधः—दृष्टार्थविषयः अदृष्टार्थविषयश्च । तत्र दृष्टार्थविषया शब्दाद् या प्रतीतिः, सा वस्तुतोऽनुमानसमुत्थैवम्, यतः क्वचित् प्रथमं पृथु-बुध्नोदरोर्ध्वकुण्ड-लोष्टायत-वृत्तग्रीवादिमति घटपदार्थे घटशब्दं प्रयुज्यमानं दृष्ट्वा तदुत्तरकालं कापि 'घटमानय' इत्यादि शब्दं श्रुत्वा पृथुबुध्नोदरादिमदर्थ एव घट उच्यते, तथाभूतपदार्थ एव घटशब्दप्रयोगप्रवृत्तेः, यथा पूर्वं कुम्भ-कारापणादौ, घटशब्दश्चायमिदानीमपि श्रूयते, तस्मात् तथाभूतस्यैव पृथुबुध्नो-दरादिमतः पदार्थस्य मयाऽऽनयनादिक्रिया कर्तव्या इत्यनुमानं विधाय प्रमाता घटानयनादिक्रियां करोति, इत्येवं दृष्टार्थविषयं शाब्दं प्रमाणं वस्तुतो नानु-मानाद् भिद्यते । न चैवमसावात्मशब्दः शरीरादृतेऽन्यत्र प्रयुज्यमानः क्वचिद्-पलब्धः, यत्र खल्वात्मशब्दश्रवणात् आत्मा इति प्रत्ययो भवेदिति । यदपि स्वर्गनरकाद्यदृष्टार्थविषयं शाब्दं प्रमाणं, तदपि तच्चतोऽनुमानं नातिवर्त्तते, तथाहि—“प्रमाणं स्वर्ग-नरकाद्यदृष्टार्थविषयं वचनम्, अविसंवादिवचनासप्रणी-तत्वात्, चन्द्रार्कोपरागादिवचनवत्” इत्येवमनुमानादेव तत्र प्रमाणता । न चैवम्भूतमासं कमपि पश्यामः, यस्यात्मा प्रत्यक्ष इति तद्वचनमागम इति 'प्रतिपद्येमहि' इति शेषः ॥ ४ (१५५२) ॥

D. C.—The existence of the soul cannot be established by *āgama*; for, after all, *āgama* cannot be separated from *anumāna*, as, really speaking, *āgama* is (a kind of) *anumāna*.

Agama is defined as *śabda pramāṇa*, and *śabda* (word) is two-fold, viz., (i) *dr̥ṣṭārtha-viśaya* (pertaining to an object which is seen) and (ii) *a-dr̥ṣṭārtha-viśaya* (pertaining to an object which is not seen).

The conviction which is arrived at, by means of a *śabda* and which is associated with an object that is seen, is really an outcome of *anumāna*. For instance, first of all, one notices that the word *ghaṭa* is used for an object whose belly is round and extensive, whose basin is raised up and hollowed out, whose neck is round, and which is made up of earth.

Thereafter, when he hears "bring a *ghaṭa*" he begins to reflect: None else but an object whose belly is round and extensive, etc., is styled as *ghaṭa*; for, the word *ghaṭa* is reserved for this object only—a fact noticed in the shop of a potter. I hear the word *ghaṭa*; so, I should bring an object of that very kind, viz., one which is round, extensive etc. Having so inferred, he brings a '*ghaṭa*'. Hence, it will be seen that the *śābda pramāṇa* which is associated with an object that is seen, is not separate from *anumāna*.

To think of the soul, the word 'soul' is not used for any other object but the body. Had it been, however, so used, one would have been convinced about the existence of the soul.

The *śābda pramāṇa* associated with unseen objects like heaven, hell etc., is also, really speaking, not separate from *anumāna*. For, the knowledge connected with unseen objects such as heaven, hell, and the like is *pramāṇa*, as it comes from an *āpta*,—a reliable personage whose word is true—a fact noticed when he predicted a lunar eclipse, a solar eclipse, and so on. Thus, here, too, the validity or truth rests upon inference.

There is none to whom the soul is an object of direct perception. Had there been any one of that type, his word would have been looked upon as *āgama*, and on the basis of this *āgama*, the existence of the soul would have been admitted.

Besides,

जं चागमा विरुद्धा परोप्परमओ वि संसओ जुत्तो ।
सव्वप्पमाणविसयाईओ जीवो त्ति तो बुद्धी ॥ ५ ॥ (१५५३)

Jam cāgamā viruddhā paropparamaō vi saṁsaō jutto ।

Trans.—5. Furthermore, the āgamas are mutually contradictory. Consequently, on that account, too, (your) doubt is justifiable. You, (therefore), believe that (the existence of) the soul cannot be established by any of the *pramāṇas*. (1553)

D. C—The fact that the *āgamas* of the various expounders of religion, are opposed to one another, justifies one to doubt the existence of the soul, rather than to admit it. For instance, some of the *āgamas* propound the non-existence of the soul.

To cite an example, the *Nāstikas*—the atheists—hedonists say :—

“ Etāvān òva loko'yam yāvān-indriyagocaraḥ ।
Bhadre ! vrkapadam paśya yad vadanti bahuśrutāh. ”

This means :—This world is only as much as is within the range of the senses. My good lady ! see the foot-prints of the wolf. Highly-learned individuals also say so.

Bhaṭṭa, too, says .—

“ Vijñānaghana òvaitèbhyo bhūtèbhyaḥ samutthāya tanyè-
vānuvinaśyati, na ca prètyasañjnā'sti. ”

This means :—This material body which is nothing else but consciousness, after having been generated from the five elements, is dissolved into them, and there is no clear conception for future life.

Sugata says :—

“ Na rūpam bhikṣavaḥ ! pudgalaḥ ”

This means :—O saints ! *rūpa* (form) is not a soul.

In the *āgamas*, we come across passages which admit the existence of the soul. For instance, in the *Vèda*, we hear —

“ Na hi vai sa-śarīrasya priyapriyayorapahatirasti, a-
śarīram vā vasantam priyāpriyè na sprīśataḥ. ”

This means :—There is no destruction of *priya* (attachment) and *apriya* (aversion) in connection with the embodied soul. Attachment and aversion do not affect a disembodied soul.

Also, “Agnihotram juhūyāt svargakāmaḥ”

This means —An individual desirous of acquiring heaven, should perform *agnihotra* (a sacrifice to the god Agni).

The *āgama* of the *Kāpilas* says :—

“Asti puruṣo akartā nirguṇo bhoktā cidrūpaḥ.”

This means :—There exists a *puruṣa* (a personal animate entity) which is not the doer of actions, which is devoid of qualities, which is the enjoyer (of pleasure and pain), and which is the embodiment of consciousness.

Thus, since the various *āgamas* are mutually antagonistic, the existence of the soul cannot be established even by *upamāna pramāṇa* (the proof of analogy). *Yathā gau--stathā gavayah*, means that a cow resembles a *gavaya* (*bos gavaeus*), a species of ox.

Here, the resemblance helps one to realize a distant object. But, in the entire universe, there is no object whatsoever that resembles the soul. Such being the case, there is no possibility of establishing the existence of the soul, on comparing it with an object resembling it.

It is no use advancing an argument that *kāla* (time), *akāśa* (space), *diś* (direction) etc., resemble the soul; for, there is no uniformity regarding the exposition of their nature, so far as the different systems of philosophy are concerned. And hence the same trouble

Even *arthāpatti* (presumption or implication) does not help us. There does not exist any such object seen or heard whose justification, depending upon the *soul*, can be established.

Thus, when the existence of the soul cannot be proved by any one of these five *pramāṇas*, each of which establishes the existence of an object, it automatically follows that it comes within the range of *abhāva* (non-existence), the sixth *pramāṇa* whose function is to prove non-existence.

Thus, the soul does not exist. This finishes the *pūrvapakṣa* (the view of the opponent).

Now follows the refutation of the argument ---

गोयम ! पच्चक्खु च्चिय जीवो जं संसयाइविज्जाणं ।

पच्चक्खं च न सज्झं जह सुह-दुक्खा सदेहम्मि ॥६॥ (१५५४)

Goyama ! paccakkhu ceiya jīvo jam saṁsayāvivijñāṇam ।

Refutation—

Trans.—6. O Gautama! The soul is indeed *pratyakṣa* to you also; for, (your) knowledge about it which consists of doubts etc., is itself the soul.-What is *pratyakṣa*, should not be proved, e. g., weal and woe in one's body. (1554)

D. C.—O Gautama! the soul is directly cognizable even to you; so what is the use of resorting to other *pramāṇas*? If you ask a question as to how the soul is *pratyakṣa* (directly cognizable) to you, the answer is this:—

This knowledge of yours, of which the existence is proved by your own experience of it, and which you entertain in your heart, is the soul itself; for, this knowledge is identical with the soul.

What could be decided by *pratyakṣa* should not be established by any other *pramāṇa*. No proof is required to prove the existence of happiness, misery etc., which one experiences in the body. It is futile to advance an argument that though the existence of the universe consisting of villages and cities, is self-evident, yet it is to be proved so far as a nihilist is concerned. For the argument such as “Nirālambanā sarvè pratyayāḥ, pratyayatvāt svapnapratyayavat” that is to say, all convictions are devoid of any substratum, since they are convictions, like the conviction of a dream—an argument which can be advanced by a nihilist, and which is a *bādhaka pramāṇa* (prejudicing evidence), has already been refuted. And here, there is no *bādhaka pramāṇa* in the case of *pratyakṣa* which reveals the soul.

The existence of the soul is established by *pratyakṣa pramāṇa* for the following reason:—

कयवं करेमि काहं बाहमहं पच्चया इमाउ य ।

अप्पा स प्पच्चक्खो तिकालकज्जोवएसाओ ॥ ७ ॥ (१५५५)

Trans.—7. Or, this soul is *pratyakṣa* owing to this *aham-pratyaya* (realization as “I” in ‘I did, I do, and I shall do’—the *pratyaya* which is associated with functions pertaining to (all) the three tenses (1555)

टीका—वेत्यथवा ‘कृतवानहम्, करोम्यहम्, करिष्याम्यहम्’; ‘उक्तवानहम्, ब्रवीम्यहम्, वक्ष्याम्यहम्’; ‘ज्ञातवानहम्, जानेऽहम्, ज्ञास्याम्यहम्’, इत्यादि प्रकारेण योऽयं त्रैकालिकः कार्यव्यपदेशः, तद्विषयप्रयुज्यमानतया तत्समुत्थो योऽयमहम्प्रत्ययः, एतस्मादपि “प्रत्यक्ष एवाऽयमात्मा” इति प्रपद्यस्व । अयं ह्यहम्प्रत्ययो नानुमानिकः, अलैङ्गिकत्वात् । नाप्यागमादिप्रमाणसम्भवः तदनभिज्ञानां बाल-गोपालादीनामप्यन्तर्मुखतयाऽऽत्मग्राहकत्वेन स्वसंविदितस्य तस्योत्पादात्, घटादौ चानुत्पादादिति ॥ ७ (१५५५) ॥

D. C.—In the expressions such as “*krtavān aham* (I did), *karomyaham* (I do) and *kariṣyāmyaham* (I shall do) *uktavān aham* (I spoke), *bravīmyaham* (I speak) and *vakṣyāmyaham* (I shall speak), *jñātavān aham* (I know), *janēham* (I know) and *jñāsyāmyaham* (I shall know), etc.—the expressions which are associated with acts governed by all the three tenses, viz., past, present, and future, there is *aham-pratyaya* (the realization as “I”). This *aham-pratyaya*, too, establishes that the soul is *pratyakṣa*. It should be borne in mind that this *aham-pratyaya* is not based on *anumāna*; for, it has no *līnga*. Moreover, it is not even proved by *āgama* etc., for, even children, cowherds, and others have the conviction of this *aham-pratyaya* based on self-experience, though they are not conversant with *pramāṇas* such as *āgama* etc, and that they have no such conviction regarding a *ghaṭa*, a piece of cloth etc.

Trans.—8. When there is no soul, how do you admit *aham* (the realization as 'I') ? How can there be a doubt as to whether it (the soul) is or not ? Or, if there is a doubt, in whose case is this *aham-pratyaya* justifiable ? (1556)

D. C.—Hallo! when the soul is non-existent, how is it that you admit ‘*aham*’ ? For, it is a settled fact that in the absence of a *viṣaya* (an object), there is no scope for a *viṣayin* (one having an object). If your reply is that this *aham-pratyaya* has the body alone, for, *viṣaya* is confined simply to the body, this *aham-pratyaya* should be possible even in the case of the body which has been given up by the soul.

Moreover, if this *aham-pratyaya* associated with the soul arises, how can you have a doubt as to *kim aham asmi* (am I)

or *nāsmi* (am I not)? For, on the contrary, in such a case, you ought to be in a position to decide that 'I am' owing to the *sadbhāva* (presence) of the soul realized by the *aham-pratyaya*. When there is this doubt about the existence of the soul, is there no scope for such a *pratyaya* owing to its being baseless?

If the non-existence of the soul is admitted, there is no possibility of a doubt regarding its existence.

D. C.—If, after all, there is no one like a soul to entertain a doubt, who can have a doubt as to whether I exist or I do not exist? Doubt is a *guṇa*. (an attribute) known as *vijñāna* (knowledge), and the *guṇa* has no separate existence from its *guṇin* (one having an attribute).

The body cannot become the *guṇin* of doubt; for it is *mūrta* (corporeal) and *jaḍa* (inanimate), whereas, knowledge is *amūrta* (in-corporeal) and *bodha-rūpa* (an embodiment of consciousness).

The *guṇa* and its *guṇin* cannot have an unlike nature; otherwise, *ākāśa* (space) will become a *guṇin* of *rūpa* (colour etc).

Furthermore, Gautama! how can he, who is not sure about his own existence,—who has no self-confidence—say anything definitely about the rest, such as *karma-bandha* (bondage and amalgamation of *karman*s and *mokṣa* (liberation), etc, and also about a *ghaṭa* (a pitcher), *paṭa* (a piece of cloth), and the like? The answer is obvious that he cannot. For, the decision regarding all things depends upon the decision arrived at, in the case of the soul.

Moreover, one who ignores the self-evident soul, which can be realized by *aham-pratyaya*, sails in the same boat as the one who says that sound is always inaudible. He is, then, resorting to a *pakṣābhāsa* (a mock-assertion) which is contrary to direct evidence. His stand is further opposed to valid inference, like one, who may say ' *Nityaḥ śabdaḥ,*' (sound is eternal)—the valid inference which will be dealt with hereafter.

Further, one who comes forward to say that " I do not exist " after previously admitting that I am one having a doubt, is contradicting himself like a *Sāṃkhya* (a follower of the *Sāṃkhya* system of philosophy), who may say " *Anityaḥ kartā* " (the doer is impermanent), " *Acētanāḥ ātmā* " (the soul is inanimate) etc.

Moreover, one, who denies the existence of the soul, which is well-known to children, cow-herds, and women, entertains a belief inconsistent with the popular one and can be compared with the one who says " *Acandraḥ śaśī* " (the moon is devoid of the moon). One, who says " whether I am or I am not " is contradicting oneself like one who says: " *Matā mē vandhyā* " (my mother is sterile).

This view being thus opposed to *pratyakṣa* etc., the *hētu* (the cause) is *a-siddha* (not established) owing to its non-existence in the *pakṣa* (subject of inference).

Besides, this *hētu* is also *anaikāntika* (inconclusive), since none of the five *pramāṇas* has any scope so far as the measure of a *pala* of Mount Himavat and the existence of a *piśāca* (an evil spirit), are concerned.

Moreover, since the existence of the soul can be proved by inference—a topic to be just discussed, the *hētu* is *viruddha* (contrary) too, as it is associated with the *vipakṣa* (dissimilar instance).

The existence of the soul by direct cognizance, is proved in another way also :—

Trans.—10. The soul which is *guṇin*, is self-evident owing to its *guṇas* being so (self evident), as is the case with a pitcher. For, on realizing the *guṇas* only, the *guṇin* e. g., the pitcher, too, is realized. (1558)

टीका-प्रत्यक्ष एव गुणी जीवः, स्मृति-जिज्ञासा-चिकीर्षा-जिगमिषा-संशीत्यादिज्ञानविशेषाणां तद्गुणानां स्वसंवेदनप्रत्यक्षसिद्धत्वात्, इह यस्य गुणाः प्रत्यक्षाः स प्रत्यक्षो दृष्टः, यथा घटः, प्रत्यक्षगुणश्च जीवः, तस्मात् प्रत्यक्षः, यथा घटोऽपि गुणी रूपादिगुणप्रत्यक्षत्वादेव प्रत्यक्षः, तद्वद् विज्ञानादिगुणप्रत्यक्षत्वादात्मापीति । आह-अनैकान्तिकोऽयम्, यस्मादाकाशगुणः शब्दः प्रत्यक्षोऽस्ति, न पुनराकाशमिति । तदयुक्तम्, यतो नाकाशगुणः शब्दः, किन्तु पुद्गलगुणः, ऐन्द्रियकत्वात्, रूपादिवदिति ॥ १० (१५५८) ॥

D. C.—The *guṇin*, viz., the soul is certainly *pratyakṣa*, because its *guṇas* such as *smṛti* (remembrance), *jijñāsā* (desire for knowledge), *cikīrṣā* (desire for action), *jigamiṣā* (desire for movements), and doubt, etc., which are different kinds of knowledge are self-evident, as they are experienced by oneself. One whose *guṇas* are *pratyakṣa*, is noticed to be *pratyakṣa*; for instance, a pitcher.

The *guṇas* of the soul are *pratyakṣa*. Therefore, the soul is *pratyakṣa*. Just as, since *rūpa* (colour) etc, the *guṇas* of a pitcher, are *pratyakṣa*, the pitcher, too, is *pratyakṣa*.

Such is the case with the soul, as its *guṇas*, viz. *vijñāna*, (knowledge) etc., are *pratyakṣa*.

Some one may say that this argument is *anaikāntika* (vicious); for, the *śabda* (sound) which is the *guṇa* of *ākāśa* (space) is *pratyakṣa* yet *ākāśa* is not *pratyakṣa*. But this is not correct; for, *śabda* is not the *guṇa* of *ākāśa*, but *śabda* (sound) is rather the *guṇa* of *pudgala* (matter) as it is *aindriyaka* (cognizable by the sense-organs) as is the case with colour, etc.—

When the *guṇas* are *pratyakṣa*, how is it that the *guṇin* is also of this type ?

The answer is :—

अन्नोऽणन्नो व गुणी होज्ज गुणेहिं, जइ नाम सोऽणन्नो ।

Trans.—11–12. The *guṇin* may be either distinct from or identical with *guṇas*. If it is really identical (with the *guṇas*),

the *guṇin*, the soul, is surely directly realized, on the realization of (its) *guṇas* only. If however, it (*guṇin*) is distinct, then the *guṇins* such as a pitcher, etc., are not *pratyakṣa* owing to the realization of mere *guṇas*. (Such being the case), whence is (the scope for) this thought of non-existence as regards the soul ? (1559-1560)

टीका—ननु भवता गुणेभ्यो गुणी किमर्थान्तरभूतोऽभ्युपगम्यते, अनर्थान्तरभूतो वा ? । यदि नाम सोऽनन्यस्तेभ्योऽनर्थान्तरभूतः तर्हि ज्ञानादिगुणग्रहणमात्रादेव गुणी जीवः प्रत्यक्षेण गृह्यत इति सिद्धमेव । प्रयोगः—यो यस्मादनन्तरं स तद्ग्रहणे गृह्यते एव, यथा वाससि रागः । गुणेभ्योऽनर्थान्तरं च गुणी तस्माद् गुणग्राहकप्रत्यक्षेण सोऽपि गृह्यत एवेति । अथ गुणेभ्योऽन्योऽर्थान्तरभूत एव गुणी । तत एवं सति घटादयोऽपि गुणिनो न प्रत्यक्षाः, तदर्थान्तरभूतस्य रूपादिगुणमात्रस्यैव ग्रहणात् । इह यद् यस्मादर्थान्तरभूतं तद्ग्रहणेऽपि नेतरस्य ग्रहणम्, यथा घटे गृहीते पटस्य, अर्थान्तरभूताश्च गुणिनो गुणा इष्यन्ते, अतो गुणग्रहणेऽपि न गुणिग्रहणम् । अतो घटादीनामपि समानेऽग्रहणदोषे कोऽयं नाम भवतः केवल जीवे विचारो नास्ति त्वविवक्षा येनोच्यते—“ पञ्चकखं जं नं घिप्पइ घडो व्व ” इत्यादि ? । अथ द्रव्यविरहिताः केऽपि न सन्त्येव गुणाः, इत्यतस्तद्ग्रहणद्वारेण गृह्यन्त एव घटादयः । नन्वेतदात्मन्यपि समानमेव । किञ्च गुणिनो गुणानामर्थान्तरत्वेऽभ्युपगम्यमाने गुणी भवतु, मा भूद् वा प्रत्यक्षः, तथापि ज्ञानादिगुणेभ्यः पृथगात्मा गुणी त्वदभ्युपगमेनापि सिध्यत्येवेति ॥ (१५५९-१५६०) ॥

D. C.—The *guṇin* may be either separate or non-separate from its *guṇas*. If it is non-separate, *i. e.*, identical, then, on realizing knowledge, etc., which are the *guṇas* of the soul, the *guṇin*, the soul, is directly realized. The underlying argument is as follows :—

That which is not separate from another is realized on that another being realized, *e. g.*, colour in a garment. To be explicit, a garment and its colour are not separate; so, when the colour is realized, the garment, too, is realized.

The *guṇin* is non-separate from the *guṇas*. Consequently when the *guṇas* are directly perceived, the *guṇin*, too, is certainly realized. If the *guṇin* is really distinct from the *guṇas*, then, such being the case, the *guṇins* such as a pitcher and the like, are not *pratyakṣa* when only their *guṇas* like colour, which are separate from the *guṇin*, are realized. That which is distinct from another, is not realized even when another, which is separate from it, is realized. As for example, a pitcher is distinct from a piece of cloth. So, when one is realized, the other is not realized. If it is desired that *guṇas* are to be looked upon as separate from the *guṇin*, then, even when the *guṇas* are realized, the *guṇin* remains unrealized. Hence, when the fault of non-realization is applicable even in the case of pitchers etc., why should the question of non-existence arise only in the case of the soul, to the effect that “*paccakkham jam na ghippai ghaḍo vva*” etc ?

There is really no existence of the *guṇas* apart from the substance of which they are the *guṇas*; so, when the *guṇas* of a pitcher are realized, the pitcher, too, is certainly realized. And the case of the soul is parallel.

Furthermore, even though while assuming that the *guṇas* are separate from the *guṇin*, the *guṇin* becomes or does not become *pratyakṣa* (when the *guṇas* become *pratyakṣa*), yet the *guṇin*, the soul which is distinct from its *guṇas* such as knowledge, has its existence proved even by your own admission. Anticipating the opinion of the disputant, the author says :—

अह मन्नसि अत्थि गुणी न य देहत्यंतरं तओ किंतु ।
देहे नाणाइगुणा सो चिय तेसिं गुणी जुत्तो ॥ १३ ॥ (१५६१)

Aha mannasi atthi guṇī na ya dēhatthantaram taō kintu ।

Dèhè jñānādiguṇāḅ sa èva tèsām guṇī yuktaḅ 13 (1561)]

Trans.—13. You may believe that there is the *guṇin*, but that it is not distinct from a body. The *guṇas* like knowledge etc., are observed in a body; so that (body) alone is fit to be their *guṇin*. (1561)

टीका—अथ मन्यसे अस्त्येव ज्ञानादिगुणानां गुणी, नैव तं प्रत्याचक्ष्महे, एतत् तु नाभ्युपगच्छामो यत्—“देहादर्थान्तरं तकोऽमौ” इति, किन्तु देह एव ज्ञानादयो गुणाः समुपलभ्यन्ते, अतः स एव तेषां गुणी युक्तः, यथा रूपादीनां घटः । प्रयोगः—देहगुणा एव ज्ञानादयः, तत्रैवोपलभ्यमानत्वात्, गौर-कृश-स्थूलतादिवदिति ॥ १३ (१५६१) ॥

D. C—It may be that you admit that there is a *guṇin* for the *guṇas* like knowledge, etc., but you may refuse to believe that this *guṇin* is something else than a body. That is to say, you look upon the body itself as the *guṇin* in question, since the *guṇas* such as knowledge etc., are found in the body only. For example, colour is seen in a pitcher, and hence its *guṇin* is a pitcher. The underlying argument is this:—

Knowledge etc, are the *guṇas* of a body, because they are observed, there and there only, like other attributes of the body, such as its whiteness, emaciation, fatness etc.

The answer is :—

नाणादओ न देहस्स मुत्तिमत्ताइओ घडस्सेव ।

Trans.--14. Knowledge etc., are not the *guṇas* of a body, as it is *mūrta* (corporeal) etc, like a *ghaṭa*. Therefore, that (object) which has knowledge etc., as its *guṇas*, is the soul which is separate from the body. (1562)

टीका—प्रयोगः—देहस्य सम्बन्धिनो गुणादयो गुणा न भवन्त्येव, तस्य-

D. C.—The *guṇas* such as knowledge, cannot belong to the body; for, the body is *mūrta* (corporeal) and *cāksusa* (visible) as is the case with a *ghaṭa*. Moreover, a *guṇa* cannot exist without a substance. Now, knowledge etc., are *amūrta guṇas*. Therefore, their *guṇin*, too, must be *amūrta* etc., and hence it cannot be the body which is *mūrta*. Thus that very *guṇin* is the soul.

It may be argued that we see with our own eyes that knowledge etc., belong to the body. But this is a wrong argument, as it is not consistent with the following inference :—

The knower is distinct from senses; for, even when the senses cease to function, the object realized by means of them is remembered. One who remembers an object realized by means of another, even when that another ceases, is distinct from it, e. g., Dēvadatta who remembers the object realized by means of the five windows. This we shall expound while answering the question of Vāyubhūti.

Desirous of arriving at a conclusion, the author says:—

इय तुह देसेणायं पच्चक्खो सव्वहा महं जीवो ।
अविहयनाणत्तणओ तुह विण्णाणं व पडिवज्जा ॥१५॥ (१५६३)

Iya tuha dēsēṇāyam paccakkho savvahā maham jīvo ।

Iti tava dēsēnāyam pratyakṣaḥ sarvathā mama jīvaḥ ।
Avihatajñānatvatatstava viññanamiva pratipadyasva. 15. (1563)]

Trans.—15. Thus this (soul) is partially *pratyakṣa* to you and entirely to me, as is the case with your knowledge, owing to (my) knowledge being unobstructed (infinite). (So) accept (the existence of the soul). (1563).

टीका—इत्येवम्-उक्तप्रकारेण स्वशरीरे तवापि देशतः प्रत्यक्षोऽयमात्मा, छद्मस्थत्वेन भवतः सर्वस्यापि वस्तुनो देशविषयत्वात्, घटवत्, तथाहि—सर्वमपि स्व-परपर्यायितोऽनन्तपर्यायं वस्तु, छद्मस्थश्च प्रत्यक्षेण साक्षात् तद्देशमिव गृह्णाति । प्रत्यक्षेण च प्रदीपादिप्रकाशेनेव देशतः प्रकाशितां अपि घटादयो व्यवहारतः प्रत्यक्षा उच्यन्त एव । सर्वात्मना च केवलिप्रत्यक्षमेव वस्तु प्रकाशयति । अतो ममाप्रतिहतानन्तज्ञानत्वेन सर्वात्मनाऽपि प्रत्यक्षोऽयं जीवः, यथाऽतीन्द्रियमपि त्वत्संशयविज्ञानमिति प्रतिपद्यस्वेति ॥ १५ (१५६३) ॥

D. C.—In this way, the soul in your body is partially cognizable even to you; for, since you are a *chadmastha* (one under the evil influence of the *mohantiya karman*), every object is known to you only partially. Every object has an infinite number of *paryāyas* (modifications), in case it is examined from the stand-point of its own *paryāyas* and that of the *paryāyas* belonging to the rest. A *chadmastha*, therefore, directly grasps only a portion of it. It is a convention that *ghaṭa* etc., when partially revealed by light, etc., are said to be

pratyakṣa. Only an Omniscient Being has a direct perception of any and every object in toto. I am an Omniscient Being; for, my knowledge is neither limited by time nor by space. So, I directly realize this soul in its entirety, just as I fully realize your knowledge, viz., your doubt about the existence of the soul, consequently, admit that the soul exists.

Then, what about another's body ?—

एवं चिय परदेहेऽणुमाणओ गिण्ह जीवमत्थि ति ।

Trans.—16 Thus, do verily accept, by means of inference, that the soul which is an embodiment of knowledge, exists in another's body (too), owing to (his) indulgence in and cessation from activities, as is the case with one's own soul. (1564)

टीका—यथा स्वदेहे एवं परदेहेऽपि गृहाण जीवमनुमानतः । कथम् ? इत्याह—अस्ति-विद्यत इति । कथंभूतं जीवम् ? इत्याह—विज्ञानमयं-विज्ञानात्मकम् । अनुमानमेव सूचयन्नाह—“ अणुवित्ति-निवित्तीओ सरूवे व्व ति ” इदमुक्तं भवति-परशरीरेऽप्यस्ति जीवः, इष्टाऽनिष्टयोः प्रवृत्ति-निवृत्तिदर्शनात्, यथा स्वरूपे-स्वात्मनि, इह यत्रेष्टा-ऽनिष्टयोः प्रवृत्ति-निवृत्ती दृश्येते, तत्सात्मकं दृष्टम्, यथा स्वशरीरम्, तथा च प्रवृत्ति-निवृत्ती दृश्येते परशरीरे, अतस्तदपि सात्मकम्; आत्माभावे चेष्टा-ऽनिष्टप्रवृत्ति-निवृत्ती न भवतः, यथा घटे, इत्यनुमानात् परशरीरेऽपि जीवसिद्धिः ॥ १६ (१५६४) ॥

D. C.—The soul exists in another's body, too; for, he, too, like your self, performs desirable activities and refrains from

the undesirable ones, and you, who act accordingly, have a soul. To put it explicitly, one in whom are seen indulgence in desirable acts and non-indulgence in undesirable deeds, has a soul, as is the case with one's (your) body.

The body of another is seen as associated with desirable activities and dissociated from undesirable ones. Hence, that body, too, has a soul. If the soul were non-existent, there was no scope for this association and dissociation, as can be seen in the case of a *ghaṭa*. This is followed by inference that there is a soul in another's body, too.

Anticipating doubt in another's mind, the author says:—

Moreover, that you believe that since the *līngin* (viz., the soul) has not been realized formerly (up till now) along with the *līngas*, as is the case with the hare and the horn, so it (the soul) cannot be inferred by means of a *līnga*, is untenable; for, a planet, that is not formerly seen along with its *līngas*, is inferred in a body, on perceiving its *līnga* or *līngas*. D. C.—Just as none has ever seen a horn on the head of a hare, so none has ever seen the *līngin*, viz., the soul as associated with one or more of its *līngas*. Such being the case, one cannot infer the existence of the soul. This belief of yours is not right. For, though a *graha* is not previously seen along with its *līngas*, even children are convinced about its existence in a body, when they see that body associated with perverse acts such as, laughing, singing, weeping, movements of hands, feet, and eye-brows, etc.,—the acts which are the *līngas* of the *graha*.

यथेन्द्रियाणामधिष्ठाता स जीव इति ॥ १९ (१५६७) ॥

D. C.—That there is a creator of the body, is the *pratijñā* (premise); for, it (body) has a beginning and has a definite shape as well; as is the case with a *ghaṭa*. Whatever has no creator whatsoever, has neither a beginning nor a definite shape. The transformation of clouds may be pointed out as a pertinent example. Meru etc, have a fixed form, and even then they have no creator. So, to avoid such a case wherein the *hetu* (cause) becomes *anaikāntika*, the adjective *ādimat*. (having a beginning), though not expressed, is to be taken as understood.

The word *adhīṣṭhātr* is also understood. Since the organs of sense are *karaṇa*, there must be an *adhīṣṭhātr* for them.

A paralld example is furnished by a potter, who is an *adhīṣṭhātr* of a wheel, a piece of cloth, clay, thread, stick, etc., which are *karaṇas*. Whatever has no *adhīṣṭhātr*, has no *karaṇa*, e. g., *ākāśa*. Hence, it follows that the *adhīṣṭhātr* of the organs of sense is the soul.

Trans.-20. Just as, in this world a blacksmith is the *ādātr* (grasper) in the case of a pair of tongs and iron, so, there is certainly an *ādātr* (viz., the soul) in the case of organs of sense and their objects, since they are related as *ādāna* (means of grasping) and *ādēya* (graspables). (1568)

टीका-इह यत्रादानादेयभविस्तत्रावश्यमादाता समस्ति, यथा लोके सन्दंशक-लोहानां कर्मरौऽयस्कारः, विद्यते चेन्द्रियविषयाणामादानादेयभावः, अतस्तेषामप्यस्त्यादाता, स च जीवः, यत्र त्वादाता नास्ति, तत्रादानादेयभावोऽपि न विद्यते, यथाऽऽकाश इति ॥ २० (१५६८) ॥

D. C.—If there is a relation of the type of *ādāna* and *ādēya*, then there needs be an *ādātr*. A blacksmith is found as the *ādātr*; for, we come across a pair of tongs and iron which respectively stand for *ādāna* and *ādēya*. There is a relation of the kind of *ādāna* and *ādēya*, in the case of the organs of sense and sense-objects. Therefore, there must be their

ādātr. He is none else but the soul. It may be added that there is no scope for the relation of the sort of *ādāna* and *ādēya*, in case the *ādātr* is non-existent, e. g., *ākāśa*.

गगनकुसुमम्, सङ्घातादिरूपं च देहादिकम्, तस्माद् विद्यमानस्वामिक-
मिति ॥ २१ (१५६९) ॥

D. C.—Just as we find that there is a person to enjoy food etc., so, there is an enjoyer of body etc. The underlying reasoning is as follows:—

An object of enjoyment for which there is no enjoyer, does not exist, e. g. a horn of an ass. Body etc., exist as objects of enjoyment. So, it follows that there is their enjoyer.

Just as a carpenter and others are *svāmins* of a house, etc., so there is a *svāmin* of body etc. Since this body and the like, are in the form of a collection, have a beginning, are *mūrta*, are objects of sense and are visible etc., a number of similar *hētus* as may be helpful in making this syllogism perfectly logical, may be mentioned :—

One that has no *svāmin*, is not in the form of a collection etc. For instance, a flower in the sky which has no *svāmin* is not in the form of a collection etc. A body etc., are, on the contrary, in the form of a collection etc. So they have a *svāmin* viz, the soul.

Really, by saying that the body has a creator, one proves that there is a creator etc., for the body. But that is not the soul.

Yah kartrādi sa jīvaḥ sādhyaviruddha iti tava matirbhavēt ।

Mūrtādiprasaṅgāt tad na saṁsāriṇo doṣaḥ. 22 (1570)

Trans.—22. You may be thinking that, that soul which is a doer etc., is opposed to what is to be established, owing to its having a chance of being proved *mūrta* etc. But this is not a fault in the case of the mundane soul. (1570).

टीका—यश्चायमनन्तरं देहेन्द्रियादीनां कर्ता, अधिष्ठाता, आदाता, भोक्ता, अर्थी चोक्तः स सर्वोऽपि जीव एव, अन्यम्येश्वरादेर्द्युक्तयक्षमत्वेन कर्तृ-

D. C.—Up till now, it has, no doubt, been proved that it is the soul and the soul alone which is a doer, *adhiṣṭhātr*, *ādātr*, an enjoyer and the *svāmin* of the body, organs of sense, etc. For God or the like cannot be admitted as a doer etc., of the body, since such a statement will be opposed to reason. But it must be admitted that the *hētus* put forward to prove that the soul is a doer etc., are *viruddha* (contrary) as they establish such a type of the soul which is just the contrary to what is desired. To be explicit, a potter who is a doer of a pitcher has a body, and he is in the form of a collection, and is of an impermanent nature. The same must be the case with the soul. But this type of soul is just opposed to what we are aiming at to establish. And hence, these *hētus* lead us to the conclusions we are opposed to. This is not so; for, we are at present establishing the existence of a mundane soul and not that of a liberated one; and that a mundane soul is somehow *mūrta*; for, it is certainly embraced by a collection of eight *karmans*, a kind of matter, and it has a body.

There is another *anumāna* for establishing the existence of the soul.

D. C.—A branch-less trunk of a tree is seen from a distance, as if it were a man. For, certain attributes such as

loftiness etc., which are common to this trunk and a man, are observed, while their distinguishing characteristics, viz., a movement, scratching, dwelling of birds, ascending of creepers etc., are not noticeable. Such being the case, there arises a doubt as to whether this is a trunk of a tree or a person; for, both of these objects exist (though not in the same place). This proves that the doubt can arise only in the case of objects that do exist. You have a doubt as to whether this is a soul or a body, as you realize their common features, but fail to notice their distinguishing characteristics. Such a doubt proves that there is a soul; for, it cannot arise unless there existed two entities viz, a soul and a body. It may be here noted that in order that a doubt may arise, it is not absolutely necessary that the objects about which a doubt arises, must be in one and the same place.

Trans.—24. Such being the case, an ass will indeed have a horn but certainly he has not. It surely exists somewhere else. So is the case even when the perverse view is taken. (1572)

D. C.—If it is that the object which is doubted, must be existing in the very place where the doubt arises, then even an ass will have a horn; for, somebody may doubt its existence so far as the ass is concerned. No, this is not true. What we want to imply is that the doubted object exists either in the very place where the doubt arises, or even somewhere else. That an ass has no horns, means that horns are not associated with the ass; but they are found elsewhere, e. g., on the head of a cow. Similar is the case when one object is definitely mistaken for the other. For instance, a man may take a branch-less trunk to be a man. Such a perverse view proves the existence of the object mistaken. Hence Gautama! you may think that we are in the wrong when we admit the existence of a soul in our body. This is our perverse notion according to you. If so, even then, it establishes the existence of the soul.

The soul exists, for the following reason, viz:—

अत्थि अजीवविक्खो पडिसेहाओ घडोऽघडस्सेव ।

नत्थि घडो त्ति व जीवत्थित्तपरो नत्थिसद्धोऽयं । २५॥ (१५७३)

Trans.—25 Just as there is a *ghaṭa* as opposed to *a-ghaṭa*, so, there is an object, viz., the soul, a *vipakṣa* (the opposite) of an inanimate object, owing to denial. This sentence, viz., 'it does not exist' establishes the existence of the soul, as does the sentence, viz., 'there is no *ghaṭa*' (establish its existence) (1573)

D. C.—The underlying argument is this, that since *ajīva* is a word of which an etymology exists and is furthermore a *śuddha pada* (a pure syllable), it has a *pratipakṣa* (a rival), viz., *jīva*. A *pratipakṣa* exists in the case of the negation of

one which has an etymology or a dissolution, over and above its being a *śuddha pada*. As for example, a *pratipakṣa*, viz., *ghaṭa* exists in the case of *a-ghaṭa* which is a negation of *ghaṭa*; for, there is an etymology of *ghaṭa*, and that it is a *śuddha pada* too. One which has no *pratipakṣa*, has no negation possible as existing, so far as a *śuddha pada* having an etymology is concerned. For instance, *akharaviśāṇa* is wanting in a *pratipakṣa*, viz., *kharaviśāṇa* since *kharaviśāṇa* is not a *śuddha pada* but is a *sāmāsika* one—is a compound, though, no doubt, there is a dissolution of this compound, and as such it has a *vyutpatti*.

We may now examine the case of *adittha*. *Dittha* is its *pratipakṣa*; but, since this *dittha* is wanting in a *vyutpatti*, it is out of consideration here. For, two conditions must be satisfied :—

- (i) It should be a *śuddha pada*.
- (ii) At the same time, it must have a *vyutpatti*.

In the case of *kharaviśāṇa* the first condition is not satisfied, whereas in the case of *dittha*, the second is violated. So, there exists neither *kharaviśāṇa*, a *pratipakṣa* of *akharaviśāṇa* nor practically *dittha*, a *pratipakṣa* of *adittha*.

Now the second hemistich. Just as when one says that 'here there is no *ghaṭa*' establishes the existence of a *ghaṭa* elsewhere, so the statement that there is no soul, proves its existence at least somewhere. The reasoning in this case is as under :—

One of which a negation is being predicated surely exists somewhere, e. g., a *ghaṭa*. You are predicating the negation of a soul etc. So, it does exist somewhere. For, what is absolutely non-existent has no negative predication *Khara-viśāṇa* may be cited as an instance. It is non-existent; so, there is no possibility for affirming the existence of its negation. The very fact that you predicate negation in the case of the soul, establishes its existence.

This *hetu* is *anaikāntika*.

Trans.—26. It is proved that there is no negation in the case of a non-existent object owing to the *pratisdha* of *saṁyoga* (connection) etc. Even the quarter union consisting of *saṁyoga*, etc., is certainly proved (to be existing) elsewhere. (1574)

D. C.—When a negation is predicated in the case of any object, this negation is to be understood regarding *saṁyoga* (conjunction), *samavāya* (inherence), *sāmānya* (generality) or *viśeṣa* (speciality), but, not in one and all the aspects. For instance ‘Dēvadatta is not at home’ means that the *saṁyoga* between a house and Dēvadatta, each of which exists, is not admitted. This does not mean that the existence of either of them is denied in toto. Similarly ‘an ass has no horns’ means the negation of *samavāya* between an existing ass and horns. Similarly, ‘there is no other moon’ implies that there is a negation of commonness. That is to say, we have only one moon, and that there is no parallel to it.

That ‘there are no pearls equal to a *ghaṭa* in bulk’ conveys the idea that the distinguishing feature, viz., a measure equal to that of a *ghaṭa* is denied, and not the non-existence of pearls.

Such being the case, Gautama! you may refuse to admit only the *saṁyoga* of the existing soul with something in some way, by saying something like this, that the soul does not exist in the body, but you cannot refuse to admit its existence from all other stand-points. Some one may come forward to argue as under:—

If there exists that of which negation is predicated, then, in my case there must be the sovereignty of the three worlds as it is not admitted by you in my case. Furthermore, you refuse to believe a fifth *pratiṣeḍha*, over and above the four well-known *pratiṣeḍhas*, viz *saṁyoga* etc. So, there must be a fifth *pratiṣeḍha*. These arguments can be refuted as below:—

We do not admit in your case the sovereignty of the three worlds, i. e., only a particular aspect of sovereignty but not your sovereignty which exists owing to your being a master of several pupils of yours. Thus, you will see that only a particular

type of sovereignty is not admitted but not all types of it. Similarly, when we refuse to admit the fifth *pratisèdha*, it is the number 'five' associated with it that is denied, and not a *pratisèdha* in all its aspects.

Regarding this refutation, it may be argued that this is all moonshine. For, you refuse to admit in me the sovereignty of the three worlds—a thing that does exist in my case. The number 'five' not admitted in the case of *pratisèdha*, is also non-existent. Moreover, *samyoga* in the case of a house and *Dèvadatta*, which is not admitted, is also non-existent. Same is the case with *samavāya*, *sāmānya* and *viśèṣa*. Such being the case, how can you say that what is negated does exist? The answer to this sort of argument may be given as follows:—

That the *samyoga* between the house and *Dèvadatta* is not admitted, does not mean refusal to admit the *samyoga* of *Dèvadatta* with a field, a market, a village, or the like. Moreover, the house has no *samyoga* with *Dèvadatta* only; but it has a *samyoga*, no doubt, with a bed-stead or the like.

Similarly, the *samavāya* in the case of an ass and horns is not admitted; but the *samavāya* in the case of a cow and its horns and the like, is certainly admitted.

Likewise, *sāmānya* is not admitted in the case of the moon but it is surely admitted in the case of *ghaṭas*, cows, etc. that are more than one in number.

Similarly, the measure equal to a *ghaṭa* is refused so far as the pearls are concerned but it no doubt exists as regards a melon etc. The sovereignty of the three worlds is not admitted, Gautama! in your case; but it does exist as far as *Tirthankaras* are concerned.

Similarly, the number five is not admitted regarding the *pratisèdhas*; but it is surely admitted when the question of *anuttaras* is being discussed.

From this, you will see that, what we wish to suggest is this :—

That which is denied, exists ordinarily. By no means we want to convey : 'that about which negation is predicated, exists there and nowhere else'. Thus, there is no *vyābhicāra* (inconsistency) in what we say.

Gautama ! If you wish to retort that you (Gautama) do not admit the existence of the soul in the body only and admit it elsewhere, that is good; for, it establishes what is desired by us. We have been all this while trying simply to establish the existence of the soul. And, if it is thus established, then the *āśraya* (substratum) of the soul will be proved as it is not possible to justify its existence in any other way.

It is not justifiable to admit any other *āśraya* of the soul except the body; for, the *līngas* of the soul are seen there. It may be borne in mind that it will not do to say that the body itself is the soul; for, in that case, we cannot have a *vyavasthā* (fixity) of the types, viz., he lives, he is dead, he has fainted, and the like. Of course, this *vyavasthā* will be expounded hereafter.

For the proof of the existence of the soul, another etymology can be given :—

जीवो त्ति सत्थयमिणं सुद्धत्तणओ घडाभिहाणं व ।

जेण त्थेण सदत्थं सो जीवो अह मई होज्ज ॥ २७ ॥ (१५७५)

Trans —27-28. This word “jīva” is significant owing to its being *śuddha*, as is the word *ghaṭa*. That *artha* (meaning) by means of which it is pregnant with a meaning is *jīva*. If you, however, think that the *artha* is only the body, that is not so, on account of a difference in synonymous words; for, *jīva* is said to have *guṇas* such as knowledge, etc., and not that the body (is so said). (1575-1576).

D. C.—Here the *pratijñā* is: The word *jīva* is significant. For, over and above this, it has a *vyutpatti* and it is a *śuddha pada*. Whatever is a *śuddha pada* and has a *vyutpatti* is here seen to be one having an *artha* (meaning). *Ghaṭa*, etc., may be mentioned as instances; so is the word *jīva*. Therefore, it too, is significant. What is not significant is wanting in *vyutpatti*, and besides, it is not a *śuddha pada*. *Ḍiṭṭha*, *khara- viṣāṇa*, etc., are words of this type; for, the former has no *vyutpatti*, whereas the latter is not a *śuddha pada*. Such is not the case with the word *jīva*. Therefore, it is significant. The condition that it should have a *vyutpatti* is stated here to avoid *ḍiṭṭha*, etc., which are *śuddha padas*, but which are not significant; for, they fail to satisfy both the conditions. Same is the case with *khara- viṣāṇa*; for, though it has a *vyutpatti* it is not a *śuddha pada*. And therefore, it is not significant.

If you believe that simply the body is the *artha* of *jīva*, because we come across the following line, it is not correct, since there is a difference in the synonyms of the body and *jīva* :

“ *Dēha evāyam anuprayujyamāno drṣṭah yathaiṣa jivah, ḍnam na hinasti.* ”

The words of which the synonyms differ, are seen to be non-identical. For instance, *ghaṭa* is not the same as *ākāśa*,

as the synonyms of the former, viz., *ghaṭa*, *kuṭa*, *kumbha*, and *kalāśa* differ from those of the latter, viz., *nabhas*, *ṛoman*, *antarikṣa*, *ākāśa*, and the like. In the pertinent case, the synonyms of *jīva* are *jantu*, *asumat*, *prāṇin*, *sattva*, *bhūta*, etc., and these are by no means the same as *śarīra*, *vapus*, *kāya*, *kalēvara*, etc., the synonyms of *dēha*. If this difference in synonyms is neglected, anything will be identical with anything else, and this is certainly undesirable.

Now "*dēha* *ḍvayam anuprayujyamāno dr̥ṣṭaḥ*". Herein, there is an *upacāra* (metaphorical application) of *jīva* to the body, as it is with the help of the body that the soul walks etc.

Moreover, we do hear. "*gataḥ sa jīvaḥ; dahyatām idam śarīram*", *i e.*, the soul has departed, and let this body be burnt.

Furthermore, the soul has an attribute like knowledge, whereas the body is *jaḍa* and has no knowledge. So, how can we equate the body with the soul?

The reasons why the body is not the same as the soul, have been already mentioned while concluding the commentary on verse 1562.

D. C.—Just as my statement about your doubt is correct so this statement of mine that the soul exists is correct; for, it is my statement. The statement which is not correct, is not mine, *e. g.*, the statement of a false witness. Or, the correctness of this statement can be also established as under :—

The statement that the soul exists is correct, because it is the statement of an Omniscient Being, as is the case with a statement of one whom you look upon as *śarvajña*.

D. C.—Whatever I say, should be taken to be true and flawless, as I am (entirely) free from fear, attachment, aversion, and ignorance. In this world, it is a matter of common experience that whatever is said by one devoid of fear, etc., is true. For instance, the words spoken to one who has lost his way, by one who knows it, who is fearless, and who is devoid of attachment and aversion, are true. My statement belongs to the same category. So, it is true and flawless.

The doubt of Gautama svāmin is being answered.

D. C.—You may be thinking as to how I am omniscient and you may be believing that I am not entirely free from fear, attachment, aversion, and infatuation. In that case, I reply as under.—

I can remove all doubts. Whoever can do so, is certainly omniscient. So I, too, am omniscient. If you were to argue that this *hētu* is *anaikāntika* (inconclusive) owing to want of an illustration, and impossibility of establishing *anvaya*, it is not so; for, in this *viparyaya* the *anutpatti* (inapplicability) itself of state of removing doubts is a proof that goes against it. What is the use of searching for *anvaya*? Or, you may ask me anything that you do not know so that you may become convinced about my omniscience.

That I am free from fear, etc., is proved in my case, owing to their characteristics being not seen in me. To suspect the existence of a *liṅgin* even when there is a total absence of a *liṅga*, is too much.

Concluding, the author says:—

Trans.—32. Thus Gautama! know the soul as one having *upayoga* (attention) as the characteristic mark, as one proved by all the valid proofs and (also) as one having classifications like *samsārīn* (mundane) and *itara* (not mundane) and the mundane having two sub-classifications, *viz.*, *sthāvara* (immobile) and *trasa* (mobile). D. C.—In this way, Gautama! admit that there is a soul which has *upayoga* as its *linga*, of which the existence is proved by all the three *pramāṇas.*, *viz.*, *pratyakṣa*,

anumāna and *āgama*, and which can be variously classified. Some of these classifications are :—*saṃsārin* (mundane) and *mukta* (liberated), *sūkṣma* (subtle) and *bādara* (gross), *paryāpta* (developed) and *a-paryāpta* (non-developed), etc. Furthermore, the mundane beings are sub-divided as *sthāvara* (immobile), and *trasa* (mobile).

Here a Vēdāntin may say that, many varieties of the soul are unwarranted; for, the soul is everywhere the same. This is corroborated by the following verses :—

“ *Eka eva hi bhūtātmā bhūtè bhūtè pratiṣṭhitāḥ ।
Ekadhā bahudhā caiva drsyatè jalacandravat ॥ 1 ॥*

*Yathā viśuddham ākāśam timirōpapluto janāḥ ।

And,

This view of the Vēdāntin is now being refuted.—

D. C.—Some one may ask a question: What harm is there, if, on the basis of the verses, etc, just quoted, the soul is, on the analogy of the sky, looked upon as one *i. e.* having no such classifications, as mundane and non-mundane and the like, so far as all the *piṇḍas*, *viz.*, the bodies of a denizen of hell, *tiryac*, a human being, and a celestial being, are concerned?

The answer is this: As regards the sky, it is alright to say that it is only one; for, the sky, even while permeating all the corporeal *piṇḍas*, is seen to be uniform—free from any distinctions. Such is not, however, the case with the soul in question. It is not observed to be uniform; for, it differs from *piṇḍa to piṇḍa*. Moreover, the difference in characteristics presupposes, the difference in those having these characteristics. Hence, the soul is not one in number.

Here is the illustration :—

Trans. 34. In the world, there are different souls like (different) water-pots, etc., on account of the difference in their characteristics, etc. For, if they were (only) one, there will be non-existence of *sukha* (happiness), *dukka* (misery), *bandha* (bondage) and *moksa* (emancipation) (1582).

भिन्ना एव सर्वेऽपि जीवा इति ॥ ३४ (१५८२) ॥

D. C.—The living beings in this world, differ from one another; for, there is a difference in their characteristics etc. As a parallel example may be mentioned water-pots etc. Whatever is not different from another object, does not differ in characteristics from it. As for example, the sky is everywhere the same (since *ghaṭākāśa* does not differ from *maṭhākāśa*). Moreover, if there were only one soul, then, there will be nothing like happiness, misery, bondage and emancipation. But these do exist. Therefore, all the souls are different, and their number is not one but many.

How do the characteristics differ in each body ?

Trans.—35. That *upayoga* (attention) by means of which the soul has attention as the characteristic mark, is different in every body. The *upayoga* has maximum and minimum scales. Therefore they (souls) are infinite in number. (1583)

टीका—येन ज्ञान-दर्शनोपयोगलक्षणोऽसौ जीवः, स चोपयोगः प्रतिशरीरमुत्कर्षा-ऽपकर्षभेदानन्तभेदः, तेन जीवास्तद्भेदादनन्तभेदा एवेति । तदेवं भावितं “ नाणाजीवा ” इत्यादिपूर्वार्धम् ॥ ३५ (१५८३) ॥

D. C.—This soul has as its characteristic, *upayoga* (attention) consisting of two kinds of knowledge, *viz.*, differentiated and undifferentiated. This *upayoga* has infinite varieties; for, it differs from body to body, some having the maximum *upayoga*, some having the minimum *upayoga*, and some having *upayoga* between these two extremes. Therefore, the souls are of infinite kinds owing to the infinite varieties of *upayoga*. This has been already alluded to, in the first hemistich of verse. 1582.

Now, with regards to happiness, misery, etc., *i. e.*, exposition of the second hemistich of verse 1582, the author says:

एगत्ते सव्वगयत्तओ न मोक्खादओ न भस्सेव ।

कत्ता भोत्ता मंता न य संसारी जहागासं ॥३६॥ (१५८४)

Egattè savvagayattaö na mokkhādaö nabhassèva ।

Ekadvè sarvagatavato na mokṣādayo nabhasa iva ।
Kartā bhoktā mantā na ca saṁsārī yathākāśam. 36 (1584)]

Trans.—36. On oneness (being accepted in the case of souls) there will not be liberation, etc., owing to (the soul) being all-pervading, as is the case with the space. Moreover, like space, the soul will not be a *kartr* (a doer) a *bhoktr* (an enjoyer), a *manṭr* (thinker) and a *saṁsārin* (a mundane being). (1584)

टीका—एकत्वे जीवानां सुख-दुःख-बन्ध-मोक्षादयो नोपपद्यन्ते, सर्वगतत्वात्, नभस इव । यत्र तु सुखादयो न तत् सर्वगतं, यथा देवदत्त इति । किञ्च न कर्ता, न भोक्ता, न मन्ता, न संसारी जीवः, एकत्वात् सर्वजीवानाम्, यच्चैकं न तस्य कर्तृत्वादयः, यथा नभस इति ॥३६ (१५८४)॥

D. C.—If there is only one soul, then there is no scope for happiness and misery, bondage, and liberation and the like, since one soul will be all-pervading. Space may be here cited as a pertinent case.

One wherein there are happiness, misery etc, is not all-pervading, *e. g.*, *Dēvadatta*.

Furthermore, since the number of the souls is only one, - and not more, the soul cannot be an agent, an enjoyer, a thinker, and a mundane being. That which is one in number, is not a doer etc.—a fact which is corroborated by the example of space.

Besides,

सुखाद्यनुपपत्तेनानात्वं जीवानामिति स्थितम् ॥ ३७ (१५८५) ॥

D. C.—There are infinite living beings viz., denizens of hell, *tiryacs*, and others, who are certainly unhappy on account of their suffering from various types of physical and mental diseases, and only an infinitesimal portion of them is happy. Similarly, infinite beings are tied down by the bondages of *karmans*, and only an infinitesimal part of them, is liberated. If all these living beings are not looked upon as different entities, but are considered as only one, then, none can be seen happy owing to a great many diseases, as is the case with *Yajñadatta* who has a disease in all parts of the body except in a finger. Similarly none is liberated, and hence none can enjoy the bliss accruing from liberation, since there is a

great deal of bondages. One who has fetters all along his body except a finger may be mentioned as an illustration.

Thus, owing to oneness there is no possibility for happiness, etc. So, it follows that there are many souls, and not only one.

Refutation of the view-point of the *Naiyāyikas*, who admit (the existence of) many souls, but take them to be all-pervading :—

जीवो तणुमेत्तत्थो जह कुंभो तग्गुणोवलंभाओ ।
अहवाऽणुवलंभाओ भिन्नम्मि घटे पडस्सेव ॥३८॥ (१५८६)

Jīvo taṇumèttattho jaha kumbho taḡguṇovalambhāo ।

अथवाऽनुपलम्भाद् भिन्ने घटे पटस्येव ॥३८॥ (१५८६)

Jīvastanumātrastho yathā kumbhastadguṇopalambhāt ।
Athavā'nupalambhād bhinnè ghaṭṭe paṭasyèva. 38 (1586)]

Trans.—38. The soul permeates the body only, since its attributes are found there, as is the case with a pitcher. Or, because it is not found (elsewhere), as is the case with a piece of cloth (which does not permeate), a pitcher is different from it. (1586)

टीका—तनुमात्रस्थो जीव इति प्रतिज्ञा, तत्रैव तद्गुणोपलब्धेः, यथा घटः, 'स्वात्ममात्रे' इति शेषः । "अहवेत्यादि" अथवा, यो यत्र प्रमाणैर्नोपलभ्यते तस्य तत्राभाव एव, यथा भिन्ने घटे पटस्य, नोपलभ्यते च शरीराद् बहिर्जीवः, तस्मात् तस्य तत्राभाव एवेति ॥ ३८ (१५८६) ॥

D. C.—The measure of the soul is only as much as that of the body it occupies. That is to say, there is no soul outside the body it occupies. For, its attributes are found only in that body. To give an illustration, the attributes of a pitcher exist only in a pitcher, and not outside it.

As an alternative argument it may be said:—That is non-existent there, where it cannot be realized by any of the *pramāṇas*. As for example, a piece of cloth does not permeate a pitcher which is separate from it.

The soul is not seen outside the body. Consequently, it should be taken to be non-existent there.

While concluding, the author says:—

तम्हा कत्ता भोत्ता बंधो मोक्खो सुहं च दुक्खं च ।
संसरणं च बहुत्ता-ऽसव्वगयत्ते सुजुत्ताइं ॥ ३९ ॥ (१५८७)

Tambhā kattā bhottā bandho mōkkho suham ca dukkham ca ।
Saṁsaraṇam ca bahuttā'savvagayattē sujuttāim. 39 (1587)

[तस्मात् कर्ता भोत्ता बन्धो मोक्षः सुखं च दुःखं च ।
संसरणं च बहुत्वा-ऽसर्वगतत्वयोः सुयुक्तानि ॥ ३९ ॥ (१५८७)

Tasmāt kartā bhottā bandho mokṣaḥ sukham ca dukkham ca ।
Saṁsaraṇam ca bahūtvā'sarvagatatvayoḥ suyuktāni. 39 (1587)]

Trans.—39. Therefore, a doer, an enjoyer, bondage, liberation, happiness, misery, mundane existence, and metamorphosis are thoroughly justifiable when the souls are admitted as many and non-all-pervading. (1587)

टीका-तस्माद् बहुत्वा-सर्वगतत्वयोरेव सतोः कर्तृत्वादयो धर्मा जीवस्य
युज्यन्ते, नान्यथा, इत्येवंविधं प्रमाणसिद्धं जीवं प्रतिपद्यस्वेति ॥ ३९ (१५८७) ॥

D. C.—Therefore, it is only when it is admitted that souls are many and that none of them is all-pervading; action etc., which are the attributes of the soul, can have any place. If not, these attributes will be meaningless. So, please admit the soul which is thus established by *pramāṇas*.

Yad bhaṇitam na bhavād bhavāntaram yāti jīva iti. 42 (1590)]

Trans.—40-41-42. Gautama! You do not know the (real) meaning of these sentences of the Vēda. For, you believe that none but the assemblage of (the particles of) knowledge, after having arisen from elements, in the way in which intoxication arises, from the sources of spirituous liquors, is a soul consisting of knowledge only—the soul which has sprung up from the collection of elements. It again perishes after the elements (have perished), and that there is no designation in the previous birth to the effect that it was named as such and such in the former birth (existence), and hence, it is said that the soul does not go from one *bhava*, to another existence. (1588-1589-1590)

D. C.—By these sentences of the Vēda are meant those which Gautama had in his mind.

The assemblage of knowledge consists of the united particles of knowledge arising from elements such as earth etc., combined together.

The restriction, viz., 'none else but', is here mentioned with a view to exclude a soul according to the *Ātmavādins* (believers in universal soul) is distinct from the collection of elements and which is an abode or substratum of attributes like *jñāna* (knowledge) etc.

The sources of spirituous liquors are *dhātakī* etc.

Gautama believes that the soul has not come from any previous birth, but it has been generated by the elements—it has been evolved out of them. So, when these elements perish, the soul, too, perishes; and it is not born once more as the *Ātmavādins* believe. In short, it has neither any incarnation nor any transmigration. Such being the case, it is not possible to say that such and such a one who was previously a denizen of hell, or a celestial being, is now born as a human being. For, on the termination of a stage as that of a denizen of hell or the like, everything was over—nothing was left, not even the soul.

Thus, when the soul altogether arises from—gets evolved out of—a collection of elements and completely perishes as soon as these elements perish, there is none who proceeds from one birth to another.

I understand the meaning of these sentences as follows:—

गोयम ! पयत्थमेवं मद्यंतो नत्थि मन्नसे जीवं ।

बद्धंतरेसु य पुणो भणिओ जीवो जमत्थि त्ति ॥४३॥ (१५९१)

अग्निहवणाइकिरियाफलं च तो संसयं कुणसि जीवे ।
मा कुरु न पयत्थोज्यं इमं पयत्थं निसामेहि ॥४४॥ (१५९२)

Goyama ! payatthamēvam mannantō natthi manñase jīvam ।

Agni-havanādi kriyāphalam ca tataḥ saṁśayam karoṣi jīvè ।
Mā kuru na padārtho'yamimam padārtham niśamaya. (1592)]

Trans.—43-44. Gautama ! While construing the sentences in this way, you believe that there is no soul. And, in other sentences, it is said that there is a soul, and, moreover, there is a fructification of an oblation to fire etc. Consequently, you entertain a doubt about (the existence of) the soul; but do not do it. This is not the meaning of the sentences. But hear : this is the meaning of the sentences. (1591-1592)

टीका—गौतम । अस्य वाक्यस्य दर्शितरूपमेव पदार्थं मन्यमानस्त्वं ' नास्ति ' इत्येवं जीवं मन्यसे । यस्माच्च पुनः “ न ह वै सशरीरस्य प्रिया-ऽप्रिययोरपहतिरस्ति, अशरीरं वा वसन्तं प्रिया-ऽप्रिये न स्पृशतः ” इत्यादिषु वेदवाक्यान्तरेषु “ अस्ति ” इत्येवं जीवो भणितः प्रतिपादितः । तथा “ अग्निहोत्रं जुहुयात् स्वर्गकामः ” इत्यादिवचनादग्निहवनादिक्रियायाः फलं च पारमविक्रं श्रूयते । न चेदं भवान्तरयायिनमात्मानमन्तरेणोपपद्यते । अतः

(१५९१-१५९२) ॥

D. C.—O Gautama! You interpret this sentence in the way just shown. And hence, you conclude that the soul does not exist. At the same time, you notice that the following sentences of the veda establishing the existence of the soul:—

“ *Na ha vai saśarīrasya priyā'priyayorapahatirasti, a-
śarīrasya vā vasantam priyā'priyè na sprśataḥ.* ”

Moreover from the sentences such as,

“ *Agnihotrm juhuyāt svargakāmaḥ* ”

It follows that there accrues a fruit of an offering, oblation to fire, etc.,—a fruit to be enjoyed during the next birth, and this fruit can have no meaning unless it is admitted that the soul goes in, for another existence or birth.

These various statements lead you to doubt the existence of the soul. But, there is no need of entertaining such a doubt as this doubt is due to your misinterpreting the sentence, viz., “ *vijñānaghana eva* ” etc.

The real interpretation of this sentence is as follows: please hear it—

विण्णाणाओऽणण्णो विण्णाणघण्णो त्ति सव्वओवावि ।

Trans.—45-46. The soul (itself) is the assemblage of *vijñānas* owing to its being non-separate from *vijñāna*, or it is so, on account of its pervasive nature all round. It arises from elements in the form of the *vijñāna* of a pitcher, etc. When those very elements perish as *vijñèya-bhāvas* (objects coming within the range of *vijñāna*) on the attention being gradually directed to another object, it (the soul) subsequently perishes.  (१५९४) ॥

D. C.—Here the soul is said to be *viññānaghana*—an assemblage of *viññāna* for either of the two reasons viz, (1) the soul is non-separate from—is identical with *viññāna* which is *upayoga* either of the type of *jñāna* or that of *darśana*, and (2) the soul has each and every *pradēśa* (the minutest portion) of it, formed from a collection of infinite modifications of *viññāna*.

The word *eva* used in connection with *viññānaghana* shows that the belief of the *Naiyāyikas* and others conveyed by the following sentence is untenable :

“ *Svarūpeṇa nirviññānatvaj jaḍo’sau, buddhistu tatra samavētaiya.* ”

This soul is evolved out of the elements which are objects fit to be known—the objects like a pitcher, a piece of cloth etc. That is to say, it gets transformed as the knowledge of a pitcher etc., on realizing that this is a pitcher, this is a piece of cloth, etc.

These very elements such as pitcher etc, which had once served as substratum for knowledge, perish; that is to say, they cease to be objects fit to be known when the attention of the soul is directed towards another object, when these objects are hidden or concealed from sight or when the mind is working in some other channel. Such being the case, the soul ceases

to know them i. e., ceases to exist as knowledge of these objects. This is here looked upon as its destruction. The sum and substance is this:—

When the soul comes to know any object, it is said to have been produced from that object; but, when it ceases to think of it and directs its attention somewhere else, it is said to have perished; for, the object with which it once identified itself, has perished.

Does the soul perish entirely in this way? The answer is in the negative as suggested in the following verse —

पुष्वावरविण्णाणोवओगओ विगम-संभवसहावो ।
विण्णाणसंतईए विण्णाणघणोऽयमविणासी ॥४७॥ (१५९५)

Puvvāvaraviṇṇāṇovaōgaō vigama-sambhavasahāvo ।
Viṇṇāṇasantaīē viṇṇāṇaghāṇo'yamaviṇāsī. 47 (1595)

Pūrvā'para-vijñānopayogato vigama-sambhava svabhāvaḥ ।
Vijñānasantatyā vijñānaghano'yamavināśī. 47 (1595)]

Trans.—47. This *vijñānaghana* (the soul) has the nature of destruction and that of origination, on account of the (corresponding) *upayogas* being associated with the previous *vijñāna* and the subsequent one. It is immortal owing to the continuity of *vijñāna*. (1595)

टीका—एक एवायमात्मा त्रिस्वभावः । कथम् ? इत्युच्यते—अर्थान्त-

D. C.—This very soul, though one, has a three-fold nature. When it is attentive to another object, it has died; for, at that time, its attention to the former object is gone, but it has originated so far as the attention to this new object is concerned. Side by side with its twofold nature pertaining to destruction and origination, it has permanence owing to the continuity of the general *vijñāna* existing from the beginning-less time. Similarly, every object has a three-fold nature consisting of *utpāda* (origination), *vyaya* (destruction) and *dhrauvya* (permanence), and that there is nothing which is created in all respects, and that there is nothing which entirely perishes.

Trans.—48. The designation pertaining to former knowledge does not exist owing to the *upayoga* being directed to (a) present object. This soul is named *vijñānaghana* as said in the sentences of the *Vāda*. (1596)

टीका—न च प्रेत्येति—न चान्यवस्तूपयोगकाले प्राक्तनी ज्ञानसंज्ञास्ति ।

 विज्ञानघनाभिख्यो वेदपदेष्वभिहितोस्यं जीवः । ततो गौतम ! प्रतिपद्यस्वै-

D. C.—When the attention of the soul is diverted from one object to another, *e. g.*, from a pitcher to a piece of cloth, then it ceases to be styled as *ghaṭopayoga* (attention to a pitcher), but acquires a new designation viz., *paṭopayoga* (attention to a piece of cloth). Such being the case, this soul is named as *viññānaghana* in the Vēda. Therefore, Gautama I admit that the soul exists.

Trans.—49-50. You may think that even in this way, knowledge is the *dharma* of elements owing to its existing when they exist, (and that it does not exist when there is their non-existence). This is not proper; for, even

when they are non-existent, knowledge is said to exist as in the following doctrine of the *Vēda* :—

What *jyotis* (light) has this man when the Sun has set, the Moon has set, and when (even) fire and speech are quiet? It is said : that is the light of the soul. (1597-1598)

टीका—“ बुद्धी ” ति स्याद् बुद्धिः प्रेरकस्य—एवमपि—“ स भवद् भूष्हितो ” इत्यादिना युष्मद्द्वयाख्यानप्रकारेणापीत्यर्थः, पृथिव्यादिभूतधर्म एव ज्ञानं—भूतस्वभावात्मकमेव ज्ञानमिति भावः । कुतः ? इत्याह—“ तन्मा-वभावउ च्छि ” “ एतेभ्यो भूतेभ्यः समुत्थाय तान्येवानु विनश्यति ”—इति वचनाद् भूतसद्भावे ज्ञानस्य भावात्, तदभावे चाभावादित्यर्थः, यस्य च भाव एव यद् भवति, अभावे च न भवति तत् तस्यैव धर्मः, यथा चन्द्रमस-श्चन्द्रिका, तथा च ज्ञानमनुविदधाति भूतान्वय-व्यतिरेकौ, तस्मात् तद् भूतधर्म एव । तदयुक्तम्, विशिष्टमेव हि नील-पीतादिभूतग्राहकं ज्ञानं तदन्वय-व्यतिरेकावनुविदधाति न तु सामान्यं ज्ञानमात्रम्, यस्माद् भूता-भावेऽपि वेदलक्षणे समये सिद्धान्ते “ सामान्यज्ञानं भणितमेव ” इति शेषः । केन वाक्येन ? इत्याह—“ अत्थमिष इत्यादि ” अस्तमिते आदित्ये, याज्ञवल्क्यः, चन्द्रमस्यस्तमिते, शान्तेऽग्नौ, शान्तायां वाचि, किंज्योतिरेवायं पुरुषः, आत्मज्योतिः सम्राडिति होवाच, ज्योतिरिति ज्ञानमाह । आदित्यास्तमयादौ किं ज्योतिः ? इत्याह—“ अयं पुरुष इति ”, पुरुष आत्मेत्यर्थः । अयं च कथं-भूतः ? इत्याह—“ अप्पज्जोइ च्छि ” आत्मैव ज्योतिरस्य सोऽयमात्मज्योतिर्ज्ञाना-त्मक इति हृदयम्, निर्दिष्टो वेदविद्भिः कथितः, ततो न ज्ञानं भूतधर्म इति स्थितम् ॥ ४९-५० (१५९७-१५९८) ॥

D. C.—Gautama may think as under :—

Even in this way—the way in which is interpreted the second hemistich of verse 1598 beginning with “ *sa bhavai bhūḥhinto* ”, it gets proved that knowledge is the *dharmā* of elements such as earth etc. For, knowledge exists when the elements exist. This is what follows from “ *ētebhya bhūtebhyaḥ samutthāya tānyevānu vinaśyati.* ” Furthermore, in the absence of the elements, knowledge does not exist.

That which exists only when another exists and which is non-existent when that another is non-existent, is the *dharma* of that another e. g., the moon-light of the moon. Knowledge is associated with elements both by *anvaya* and *vyatirèka*. Consequently it is the *dharma* of elements. This thought is unjustifiable; for, only a particular type of knowledge which has for its object, the elements, blue, yellow etc, is associated with these elements by *anvaya* and *vyatirèka* and not the entire knowledge in general. For, even when the elements are absent, the *Vèda* declares that ordinary knowledge exists. This is what we learn from *Yājñavalkya* who says “*Astamitè ādityè, candramasyastamitè, śāntè'gnau, śāntāyām vāci, kim jyotir èvāyam puruṣa ātmajyotiḥ samraç iti hovāca.*” Herein the soul having a flame in the form of knowledge, is alluded to. Hence, it follows that knowledge is not the *dharma* of elements.

The reason is as under:—

तदभावे भावाओ भावे चाभावओ न तद्धम्मो ।

जह घडभावाभावे विवज्जयाओ पडो भिन्नो ॥ ५१ ॥ (१५९९)

Tadabhāvè bhāvāö bhāvè cābhāvaö na taddhammo ।

Jaha ghaḍabhāvābhāvè vivajjayāö paḍo bhinno. 51 (1599)

[तदभावे भावाद् भावे चाभावतो न तद्धर्मः ।

यथा घटभावाभावे विपर्ययात् पटो भिन्नः ॥५१॥ (१५९९)

Tadabhāvè bhāvād bhāvè cābhāvato na taddharmaḥ ।

Yathā ghaṭabhāvābhāvè viparyayat paṭo bhinnaḥ. 51 (1599)]

Trans.—51. One that exists when another does not exist and does not exist when that another exists, is not its *dharma*.

For instance, a piece of cloth is different (from a pitcher) owing to its *viparyaya* regarding the existence and non-existence of the pitcher. (1599)

टीका—न भूतधर्मो ज्ञानम्, मुक्त्यवस्थायां भूताभावेऽपि भावात्, मृतशरीरादौ तद्भावेऽपि चाभावात्, यथा घटस्य धर्मः पटो न भवति, किन्तु तस्माद् भिन्न एव । कुतः ? इत्याह—घटभावाभावे विपर्ययात्—घटभावेऽप्यभावात् तदभावेऽपि च भावादित्यर्थः ॥ ५१ (१५९९) ॥

D. C.—Just as a piece of cloth is not the *dharma* of a pitcher, but is different from it, for even when a pitcher exists, a piece of cloth does not exist, and that even when that pitcher is non-existent, the piece of cloth exists, so, knowledge is not the *dharma* of elements; for, in the liberated state, it exists, even though the elements are present in a dead body etc.

Having explained the meaning of some of the sentences of the *Veda*, the author while concluding the subject, explains briefly the meaning of the remaining sentences of the *Veda*.

Trans.--52-55. You do not know the (meaning) of these sentences of the *Vēda* or that of all. (Hence you have a doubt.) What is the meaning after all? Is it *śruti*, knowledge,

difference in (*i. e.*, speciality of) an object, a genus, a substance, an action, or an attribute? Your doubt is ill-based; for, it is not proper to draw a sweeping conclusion regarding the *dharma* of an object that it is only this or that it is certainly not this. For, each and every thing (*sarva*) is certainly all things (*sarvamaya*) from the stand-point of its own modifications and those of the rest, and that *sarva* is *a-sarvamaya* too, from the stand-point of separateness. Therefore, it is proper (to believe) that a substance has a generality and speciality, according to the stand-point taken and that its nature is varied from the view-point of its modifications. D. C.—Gautama ! you have not followed my exposition of these *padas* (sentences) of the *Vēda*. Hence, you have a doubt regarding the soul. Or, you do not know the meaning of these, as well as, of the remaining sentences of the *Vēda*.

Consequently, you raise the following queries in connection with all the sentences of the *Vēda* —

1. Just as *śabda* is the meaning of the *śabda* (sound) of a kettle-drum, a tabor, a double drum, etc, so, is the meaning of these sentences *śruti*, *i e.*, *śabda* ?
2. Is it *vijñāna*-the *vijñāna* which arises and which is associated with the object connoted by it when the word like *ghaṭa* is pronounced ?
3. Do the *padas* of the *Vēda* mean *vastu-bhēda* of the type noticed when the word *ghaṭa* is pronounced; the type, *viz.*, that this connotes an object which has a wide bottom, an expansive belly, etc, and not a piece of cloth ?

4. Is their meaning *jāti*—the *jāti* (genus) of the kind one realizes when the word *go* (cow) is uttered ?
5. Just as when the word *daṇḍin* is pronounced we take it to be a *dravya* having a *daṇḍa*, etc., similarly, does the meaning of the sentences of the *Vēda* connote such a *dravya* ?
6. In the words *dhāvati* (runs), etc., we take them to mean the *kriyā* (act) of running, etc., so do these sentences mean any such *kriyā* ?
7. Just as the word *śukla* (white) means the *guṇa* (attribute) of being white, so do these sentences convey a meaning of the type of this *guṇa* ?

These seven queries of yours are out of place—are useless. For, it is not possible to say regarding any *vastu* (substance or material) that this is only this and nothing else. *Śabda*, too, is certainly a kind of *vastu*, so it is not proper to say that it connotes only this meaning and none else. The reasons are:—

Every *vastu* whether in the form of a *vācya* (direct expression) or a *vācaka* (indicatory word) is *sarvamaya* (representing all objects) from the stand-point of *sāmānya* (generality) when all the *paryāyas* (modifications) including its own *paryāyas* and those of the rest are taken into account. Whereas, every *vastu* is *a-sarvamaya* when examined from the stand-point of its own *paryāyas* which lays stress upon *viśeṣa*.

Consequently, all the sentences either convey a general sense or a particular one, according to the stand-point we take. Hence, it is no use saying that they mean only this and nothing else, for, the nature of every *vastu* whether it is a *vācya* or *vācaka* varies according to the stand-points from which they are viewed.

Thus, from the general stand point, the word *gnaṭa* is the *vācaka* of *dravya*, *guṇa*, *kriyā*, etc., since it is then *sarvamaya*.

But, when examined from a special stand-point, it is a *vācaka*, of only the conventional meaning, *viz.*, that it has an expansive bottom, a wide belly, etc., for, this stand-point makes it definite.

Similarly, any other word is a *vācaka* of only that *artha* which is *ruḍha* in that country, etc., when we examine it from the special stand-point.

But from the *general stand-point*, each and every word is a *vācaka* of one and all, and each and every word is a *vācya* of one and all. *This is the line one should sensibly follow. *

Thus, *Śramaṇa Bhagavān Mahāvīra* who knew the nature of all the three worlds, completely removed the doubts of *Indrabhūti* who was about to acquire the most excellent merit by advancing clever arguments capable of fully instructing others as is the case with a sharp hatchet which eradicates a cluster of creepers.

D. C.—My brother *Indrabhūti* cannot be defeated by any one in the three worlds, so, I think he has been deceived by

the rogue *Mahāvira*, who must be an expert in using *chala* (a trick resulting in the destruction of the statement in discussion by use of ambiguities of meaning) *Jāti* (an argument based on the same ground as put forth by the first speaker) and *nigraha sthāna* (fallacy) etc. Or this *Mahāvira* must certainly be a deceitful juggler. That is why he could change his (*Indrabhūti's*) mind. So what more? I was not present there, so who knows as to what discussion took place between my brother and *Mahāvira* there? So let me, first of all, go there and let the world see as to what happens, so far as this saint *Mahāvira* is concerned--*Mahāvira* who has been puffed up with pride owing to his being saluted by a collection of *khccaras* (demi-gods), human beings and celestial beings whose minds have been perplexed by jugglery.

I am famous in the world, so it is but natural that *Mahāvīra* should be knowing my name and lineage. It will be, however, a matter of surprise to me if *Mahāvīra* comes to know about my doubt or removes it.

When he was thinking so, *Śramaṇa Bhagavān Mahāvīra* said,

This doubt of yours is based on your un-realization of the exact significance of the sentences of the *Vēda*. This significance is what will be just expounded.

D. C.—O long-lived *Agnibhūti*! You entertain a doubt about the existence of the *Karman*, which is a multitude of *paramāṇus*, in the form of *jñānāvaraṇa*, etc.; for you think that its existence cannot be established by any one of the *pramāṇas* such as *pratyakṣa*, *anumāna*, etc., the *pramāṇas* which are knowledge. To be explicit, you argue as under:—

Karman is not directly perceived, because it is super-sensuous as is the case with the horn on the head of an ass.

Other arguments that you advance are the same as mentioned by your brother in the case of the soul.

But these lines of arguments are faulty. For, this *Karman* is certainly *pratyakṣa* to me. Moreover, its existence is such as can be realized by you, by means of inference. Hence, it is not justifiable to believe that no *pramāṇa* can establish its existence. The *Karman* is either good or bad. The good *Karman* makes us experience happiness, whereas, the bad *Karman* brings misery.

This leads to an inference as under:—

There is a cause for experiencing happiness and misery since it is a *Kārya* (an act) as is the case with a sprout. It is no use arguing that since the *Karman* is *pratyakṣa* to me (*i. e. Mahāvīra*) it should be so to you. For, there is no such rule that what is *pratyakṣa* to one, should be necessarily so to another. A lion, a *śarabha* (a fabulous eight-legged animal—a match for lions and elephants), a swan, etc., are not *pratyakṣa* to one and all the beings. But, on that account, it is not that they do not exist, for even children know them. Therefore, there does exist the *Karman*, since

it is *pratyakṣa* to me, an omniscient being, just as, your doubt is *pratyakṣa* to me. If you doubt my omniscience, I may repeat what I said to your elder brother, viz.,

“*Kaha savvaṇṇu tti maī jēṇāham savva-samsayacchēti, pucchasu va jam na yāṇasi*” (verse 1579).

Moreover, this *Karman* is *pratyakṣa* to you too, since you realize its *Kārya* (effect), as is the case with *paramāṇus*, which though not directly realizable to you, are *pratyakṣa* to you, since their *Kāryas* like a pitcher, etc., are directly perceived by you.

Trans —64-65 Just as, a sprout has a seed for its *hētu*, (because it is a *kārya*) so, there is a *hētu* for happiness and misery owing to their being a *kārya* (an action).

You may think :—That (*hētu*) is certainly seen. This (thought) is not proper owing to irrelevancy.

O *Gautama*! That difference which exists in the fructification in the case of those who have equal means is not without a *hētu*, since it is a *kārya*, as is the case with a pitcher. That *hētu* is *Karman*. 64-65 (1612-1613)

D. C.—Just as, a sprout which is a *Kārya*, has a seed for its *hētu*, so, happiness and misery, which are well-known to every individual, have a cause, because they are *kāryas*. And this cause is nothing else but *Karman*, and so it exists. It may be that you may here raise a question as under :—

A garland, sandal, a woman, and the like are the *hētus* of happiness, whereas a serpent, a poison, a thorn, etc., are those of misery. All these *hētus* of happiness and misery, as well, are seen—are the objects of the sense of sight. So, why should we believe *Karman* to be their *hētu*—the *Karman* which is not seen? To admit a thing not seen in the place of one that is seen, is not justifiable, as it out-shoots the mark.

This question is out of place owing to the *vyabhicāra* (irrelevancy). It is a matter of common experience that we

find that persons having the same means for enjoying happiness, do not get the same type of happiness.

Same is the case with those who have the same means to suffer misery.

This difference in each case, cannot be without any *hētu* which is not seen.

This very unseen *hētu* is *Karman*.

Trans.—66 Just as, the body in youth is preceded by a body in child-hood, so, is the body in child-hood preceded by another body, since it has organs of sense etc Here-in this very body which is prior to that in child-hood is *Karman*. (1614)

टीकाः—शरीरान्तरपूर्वकमाद्यं बालशरीरम्, इन्द्रियादिमत्त्वात्, युव-शरीरवदिति, आदिशब्दात् सुख-दुःखित्व-प्राणाऽपान-निमेषो-न्मेष-जीवनादिमत्त्वादयोऽपि हेतवो ग्राह्याः । न च जन्मान्तरातीतशरीरपूर्वकमेवेदमिति शक्यते वक्तुम्, तस्यापान्तरालगतावसत्त्वेन तत्पूर्वकत्वानुपपत्तेः । न चाशरीरिणो नियतगर्भ-देश-स्थानप्राप्तिपूर्वकः शरीरग्रहो युज्यते, नियामक-कारणाभावात् । नापि स्वभावो नियामकः, तस्य निराकरिष्यमाणत्वात् । यद्येह बालशरीरस्य पूर्वं शरीरान्तरं तत् “कर्म” इति मन्तव्यम्-कर्मणं शरीरमित्यर्थः, “जो एण कम्मणं आहारेई अणंतरं जीवो” इत्यादि वचनादिति ॥ ६६ (१६१४) ॥

D. C.—The body in childhood must have some body to precede it, since it has organs of sense, happiness, misery, *prāṇa* (sign of vitality), *apāna* (the vital air which goes downwards and out at the *anus*), winking of the eyes, opening of the eyes, life, etc., as is the case with the body in youth. This body which precedes one in child-hood, cannot be the body belonging to the previous birth; for it does not exist in the *apāntarāla gati* (state previous to the interval stage) and so, it has no scope here. Moreover, it is not possible for one having no body, to have a body in a particular womb, country, place, etc., as there is none to so direct it. Even nature cannot so direct it as we shall soon prove. So, the body which precedes one in child-hood is *Kārmaṇa*—one which is known as a *Kārmaṇa* body, as suggested by “*jo òṇa kammaṇam āhāreṭi aṇantaram jivo.*”

Trans.—67-68 Just as, there is a fruit of agriculture, so, there is a fruit of charity, etc, owing to the fructification of an act. If you think that, the fruit of charity, etc., is serenity of mind, etc., then (we say that) that which is its fruit, is looked upon as *Karman* owing to the commonness of *kriyā*—the *Karman* from which arises, again and again, the fructification in the form of happiness and misery which are the results of *Karman*. D. C.—In this world, we find that each and every act performed by a living being, yields a fruit, as is seen in the case of tilling of ground, etc. The acts of charity are undertaken by a living being, so, they too, must bear a fruit, and that fruit is nothing else but *Karman*. That act which is fruitless, is not commenced by a living being, *e g.*, the act of electrons etc; but the acts of charity, etc., are commenced by living beings; so, they are fruitful.

It may here be argued that this *hētu* is *anaikāntika*; for, the act, like tilling the ground, commenced by living beings, is at times seen to yield no fruit. But, this argument is not justifiable since such an act is commenced with the hope that it will be fruitful. Moreover, the failure which occurs sometimes

is due to something wanting in materials—a defect arising from want of real knowledge.

We may add that we are glad to admit that the act as that of charity, if done without the serenity of mind, is fruitless; for, it is an *iṣṭāpatti* (a desirable acquisition) to us.

Some one may here argue as under :—

The act, like tilling the ground, is seen to yield a visible fruit, *viz.*, acquisition of crop. So, the act, like charity, must yield a visible fruit like the serenity of mind. Such being the case, why should we think of a fruit like *Karman* which is invisible? Hence, this *hētu* is *viruddha* (inconsistent); for, it establishes jst the contrary to what is desired.

This argument may be refuted as below :—

Even the serenity of mind is certainly a *kriyā*. So, just as acts like charity yield a fruit, so this serenity of mind, too, must yield a fruit. And that fruit is *Karman*, and nothing else. So, there is no *vyabhicāra* (irrelevancy).

It may be here noted that, that *Karman* whence living beings experience happiness and misery which are its *pariṇāti* (consequences), is certainly the fruit of the act, *viz.*, serenity of mind.

It may be argued that in the preceding verse (v. 1615) while saying that “ *dānādikriyāphalam Karma* ” only the act like charity was mentioned as the cause of *Karman* and here the act like serenity of mind is stated as the cause of *Karman*. So, are not these statements contradictory? Yes, they are. But, it should be borne in mind that since the act like the serenity of mind is the intermediate cause of *Karman* and that the act like charity is the cause of the act like the serenity of mind, there arises no flaw, because, here, we have an *upacāra* (compliment) of *Kāraṇa* in *Kāraṇa*.

kāraṇa, that is to say, the cause of the cause is here taken to be cause.

Bhavèd manovriter-dānādikriyaiva yadi phalam buddhiḥ ।

Tad na nimittatvāt piṇḍa iva ghaṭasya vijñēyaḥ 69 (1617)]

Trans.—69. If you think that only the acts like charity, etc., are the fruits of the mental inclination, it is not (so) owing to there being a *nimitta* (instrumental cause). For instance, a lump (of clay) should be realized as a (a *nimitta*) of a pitcher. (1617)

टीका—अत्र परस्य यद्येवंभूता बुद्धिः स्यात् । कथंभूता ? इत्याह—ननु मनोवृत्तेर्मनःप्रसत्त्यादिक्रियाया दृष्टरूपा दानादिक्रियैव फलम्, न त्वदृष्टं कर्मेति भावः । अयमभिप्रायः—दानादिक्रियातो मनःप्रसादादयो जायन्ते, तेभ्यश्च प्रवर्धमानप्रसत्त्यादिपरिणामः पुनरपि दानादिक्रियां करोति, एवं पुनः पुनरपि दानक्रियाप्रवृत्तेः सैव मनः प्रसादादेः फलमस्तु, न तु कर्मेति भावः, दृष्टफलमात्रेणैव चरितार्थत्वात् किमदृष्टफलकल्पनेन ? इति हृदयम् । तदेतद् न । कुतः ? निमित्तत्वाद्—मनःप्रसादादिक्रियां प्रति दानादिक्रियाया निमित्त-कारणत्वादित्यर्थः, यथा मृत्पिण्डो घटस्य निमित्तं विज्ञेयस्तथा दानादिक्रियापि मनः प्रसत्तेः । दृश्यन्ते हि पात्रदानादिभ्यश्चित्ताह्लादादयो जायमानाः । न च यद् यस्य निमित्तं तत् तस्यैव फलं वक्तुमुचितम्, दुरविरुद्धत्वादिति ॥ ६९ ॥ (१६१७)

D. C.—Serenity of mind arises from the act of charity and this serenity gives an impetus to give donations and in virtue of this inclination, one goes in for charity.

Thus, the fruit of the serenity of mind, is nothing else but the act of charity and not a *Karman*, which is invisible.

But such a belief is untenable; for, just as, a lump of clay is the *nimitta* (instrumental cause) of a pitcher, so, the act of charity is the *nimitta* of the serenity of mind.

We see that one gets pleased when a donation is given to a deserving individual.

Such being the case, it won't do to look upon that which is a *nimitta* of something, as its fruit, as it is highly objectionable.

Besides, asserting that all actions are attended by fruits which are seen, as is the case with the tilling of ground, the debator says :—

एवं पि दिदृफलया किरिया न कम्मफला पसत्ता ते ।

सा तम्मेट्तफल चिय जह मंसफलो पसुविणासो ॥७०॥ (१६१८)

Evam pi diṭṭhaphalayā kiriyā, na kammaphalā pasattā tē ।

Evamapi dṛṣṭaphalā kriyā na karmaphalā prasaktā tē ।

Sa tanmātraphalaiva yathā mānsaphalaḥ paśuvinaśaḥ. 70 (1618)]

Trans.—70 In this way, too, an act is proved to have a fruit which is seen, and not a *Karman* by way of its fruit. That (act) certainly has a fruit only to that extent, as is the case with (the act of) killing of a beast—the killing which has flesh as its fruit. (1618)

टीका—नन्वेमपि घुष्मदुपन्यस्तकृष्यादिक्रियानिदर्शनेनापीत्यर्थः, सर्वा दानादिकापि क्रिया दृष्टफलदैव प्रसक्ता न कर्मफला । इदमुक्तं भवति—यथा कृष्यादिक्रिया दृष्टफलमात्रेणैवावसितप्रयोजना भवति, तथा दानादिक्रियाया अपि श्लाघादिकं किञ्चित् दृष्टफलमस्तु, किमदृष्टफलकल्पनेन ? किं बहुना ? सा क्रिया सर्वापि तन्मात्रफलैव युज्यते, नादृष्टफला, यथा दृष्टमांसमात्रफला पशुविनाशक्रिया; न हि पशुविनाशनक्रियामदृष्टाधर्मफलार्थं, कोऽप्यारभते, किन्तु मांसमक्षणार्थम् ; अतस्तन्मात्रफलैव सा, तावतैवावसितप्रयोजनत्वात् । एवं दानादिक्रियाया अपि दृष्टमात्रमेव श्लाघादिकं किञ्चित् फलम्, नान्यदिति ॥ ७० ॥ (१६१८)

D, C.—Just as, the act of tilling the ground has no other fruit than what is seen, so, the act of charity may have a fruit like some sort of praise which can be seen.

What more ? All these acts are such as have only visible fruits, and not any invisible one, as is seen in the act of killing a beast. For, the act of killing a beast has no other purpose underlying it except the acquisition of flesh. None kills a beast for some other motive, such as committing a sin which is invisible.

Similarly, the fruit of the act of charity, must be nothing else but some sort of praise which is seen.

Here, another argument is advanced as follows:—

पायं व जीवलोगो वद्वद्दिदृफलासु किरियासु ।

अदिदृफलासु पुण वद्वद्दिदृ नासंखभागो वि ॥ ७१ ॥ (१६१९)

Adṛiṣṭaphalāsu puna-r-vartatè nāsaṁkhyabhāgo'pi. 71 (1619)]

Trans.—71 Moreover, the people indulge mostly in such acts of which the fruits are seen; and not even an infinitesimal part of them, in acts of which the fruits are not visible. (1619)

टीका-लोकोऽपि च प्रायेण दृष्टमात्रफलास्वेव कृषि-वाणिज्यादि-क्रियासु प्रवर्तते, अदृष्टफलासु पुनर्दानादिक्रियासु तदसंख्येयभागोऽपि न वर्तते—कतिपयमात्र एव लोकस्तासु प्रवर्तते, न बहुरित्यर्थः । ततश्च हिंसादीनामशुभक्रियाणामदृष्टफलाभावाच्छुभक्रियाणामपि दानादीनामदृष्टफलाभावो भविष्यति । इति पराभिप्राय इति ॥७१ ॥ (१६१९)

D. C.—People mostly do such acts as agriculture, business, etc, of which the fruits are certainly seen. And only a very negligible number of them, indulges in acts like charity of which the fruits are not seen.

Consequently, just as evil acts such as killing have not got such fruits as are not seen, so, must be the case with good acts like charity. That is to say, they too, cannot have such fruits as are not seen.

This is what may be advanced as an argument by *Agnibhūti*.

Śramaṇa Bhagavān Mahāvītra refutes it as under:—

D. C.—O gentle one! Thus *Agnibhūti* is addressed. By the very fact that creatures generally become active in (doing)

evil deeds only, viz., cultivation of land, trading, doing injury to life, etc., the fruits of which are visible; but only a few become active in (doing) good deeds, giving a gift, etc., the fruits of which are invisible—by that same fact, *i. e.*, by that very reason, admit that also those very activities—cultivation of land, injury to living beings, etc., are also activities, the fruits of which are invisible. The substance of what is said is this:— Though the people who do the deeds, cultivation of land, injury to living beings, etc., only for the sake of the reward which is visible (*i. e.*, attained in this very birth) and not for the sin (involved in their performance), yet they do get an invisible fruit of the nature of religious demerit (*adharmā*), viz.,—the sin (*pāpa*)—because, if it were otherwise, there will be no explanation (*upapatti*) of there being in this world innumerable transmigrating souls. Because, they having earned (*baddhvā*, lit.—having bound) an invisible fruit of the nature of sin (*pāpa*) though not sought by them, accrues to them, due to the activities, viz., cultivation of land, injury to life, etc., exist in this world in an indefinite number (*anantāḥ tiṣṭhanti*) revolving in the endless cycle of births (*saṃsāra*). But those persons, few in number, who perform the deeds of giving a gift (*dāna*), etc., attain an invisible reward of the nature of religious merit (*dharma*), and then they are liberated. Such is the sense.

An opponent may argue: Let those (persons) who do the deeds of giving a gift (*dāna*), etc., have that invisible reward of the nature of religious merit (*dharma*) which they expect. But how do those people who do the deeds of cultivation of land, injury to living beings, etc., get that invisible fruit of the nature of sin (*adharmā*) which they never wish to get?

To this doubt, the reply is as follows:—That (argument) is improper. For, a cause complete in itself (*avikala*) does not stand in need of a wish or expectation on the part of

anybody (including even the doer of a deed) when it is (in the process of) producing its effect; it rather, never, fails to produce (*janayanti èva*) its effect, because it is a self-complete cause. For, even though not known to the sower, the seed of *codrava*, etc., fallen in some tract of land and reaching the state of a self-complete cause by the presence of the materials, viz., the water, etc., does produce its effect even in the absence of a desire (for that effect) on the part of the sower. And deeds like cultivation of land, injury to living beings, etc., are of the nature (*bhūta*) of self-complete causes in so far as the production of sin (*a-dharma*) is concerned. Hence in such causes, where does the desire (if) present in the performer of those deeds, become useful? On the other hand the wise (*i. e.*, those who do their duties disinterestedly—*vivèkinah*) have no desire for the fruits even in doing such deeds as giving a gift, etc., instead of this, such deeds being of the nature of “ self-complete causes ” produce the fruit in the form of religious merit (*dharma*), which is only of a superior quality.

Therefore, it must be admitted that there is always an invisible fruit good* or bad of any action whatsoever, whether it be good or bad; because, otherwise, there will be no propriety (*anupapatti*) of the existence of innumerable transmigrating souls.

To demonstrate the same, the author says :—

And the performance (*arambha*) of (the good deeds like a gift to a worthy recipient *dāna*, etc., which give the) unseen (good rewards) will be itself (*èva*) the cause of much trouble (lit. that in which there is much trouble). D. C.—Otherwise—If no unseen (evil) reward of evil deeds like cultivation of land, injury to living beings etc., be assumed (to accrue to the agent along with their visible reward in the shape of corn) 'They'—those who do those unseen evil deeds, would be, all of them, freed without any

effort of their own, immediately after death, there being no invisible evil fruit (of their evil deeds like cultivation of land), *i. e.*, they will attain Liberation, because there would be no reason for their transmigration. And, then, the author means, the world of transmigration would be mostly empty.

[Now, the latter half of the verse] *Aḍṛṣṭārambha* the performance of meritorious deeds like 'dāna' 'a gift to a worthy recipient, etc., the fruits of which are invisible (or the unseen principle). This performance itself would be *klēśabahulaḥ i. e.*, its result will be bad as it will be the cause of wandering in the mundane world. To explain the same—Those who perform the deeds of 'dāna' 'a gift to a worthy recipient' etc., would by performing them, aim at (*anubandham vidadhyuḥ*) the invisible fruit; then, in a succeeding birth while experiencing the maturity of that fruit (*i. e.*, the object of enjoyment resulting from it), they being propelled by it would be once again active in doing the same deeds of *dāna*, etc., then again by earning their fruit, the experience of its maturity (will result), and once again, the performance of the deeds of *dāna* etc. In this way, they will have transmigratory existence consisting of an endless series.*

* Here we beg to differ from the commentator, who seems to us, to have missed the force of *klēśa* in the original verse. The author seems to mean that if we do not assume the evil unseen fruit of the evil deeds of *krṣi* etc., then we have one out of two possibilities viz., all souls will be liberated immediately after their death, and (2) if we do not assume the conclusion, then, we shall have to take performance of the good deeds of *dāna* etc., as partly giving their good rewards and also partly but unfailingly giving the bad rewards leading to misery in a succeeding birth in this world. In this latter case, the performance of good deeds alone (*ḍva* in the verse) will be cause of much misery (*klēśa*). We have to explain the great deal of misery in this world.* We take it as an

To the above view of the *Siddhāntin*, an opponent may raise an objection as follows:—Let the case may be as you suggest, *i. e.*, let the good deeds alone be assumed to give an unending series of births and deaths. What inconsistency (*bādhā*) will there be in our system (if the good deeds alone be the cause of transmigration) ?

To this objection, we reply—the following will be the greatest inconsistency for you:—All souls will attain Liberation there being no collection of (bad) invisible fruit by those who perform the bad deeds viz., cultivation of the land, injury to living beings, etc., and in that case, not a single person performing those (bad) deeds (of cultivation of land etc.) will be found anywhere in the world, and not a single person experiencing the maturity of their rewards which are evil will be seen anywhere; and only persons who perform the good deeds of *dāna* etc., and experience the maturity of their rewards which are good, will be found every where. And such is not the world which we see.†

invisible result of either bad deeds like *kr̥ṣi* or of good deeds like *dāna* alone. If we do not make either of these two assumptions, then, we should have no misery in the world and every soul should be freed from the world immediately on departure from this world. Thus, the latter half of the verse is meant to lead to the contingency of assuming the good deeds *alone* as the cause of the misery of the soul, and thus the cause of the *saṃsāra* of the soul. The commentator, however, does not seem to us to emphasise the contingency of this assumption, that he takes the good deeds as cause of the worldly existence which may be in the form of repeated enjoyment in a series of successive births of only the good rewards of good deeds, there being no bad rewards of good deeds—*Translator*.

† In our opinion, this objection and its reply show the weakness of the commentary. The opponent, will receive

D. C.—"Since.....objects" means "because in this world innumerable beings are found to be only unhappy due (*janita*) to the maturity of evil actions;" it also means "Only few are those who enjoy happiness which depends upon (*nibandhana*) the maturity of good actions." *Tēna*-because of that reason, O gentle student! know that (i. e. conclude that) each and every action good or bad, is *adrṣṭaikāntika phala i. e.*, such as gives a reward which is invariably of the form of a (new) action which is unseen and both good and bad. Thus, "*aniṣṭabhogābhājo bahutarakāḥ*" is to be connected with "*tēna.....sarva*" the first half of the succeeding verse (v/1623). The sense of the sentence is as follows:—Because in this world we find a great majority of beings to be suffering and only a few to be enjoying, we should infer that in the case of the suffering, the fruit of the unseen principle (*adrṣṭa*) in the form of "evil *karma*"† based upon (*nibandhana*) activities like cultivation of land, trade, injury to living beings etc., has ripened, but in the case of the rest (the enjoying) the fruit of the unseen principle (*adrṣṭa*) in the form of good *karma* produced by (*hetuka*) the activities of giving a gift to a worthy recipient has ripened. An opponent may ask "Why not the reverse of what you say? The reply is as follows:—Just because in the world only those who do evil activities are in a majority and only those who perform good deeds are in a minority.

Here the opponent argues:—If even those who do evil deeds, get a fruit in the form of an *adrṣṭa* (in addition to the *drṣṭa* or visible fruit *e. g.*, the crops by means of cultivation of the land), then, why is it that, just like one who does

† The word "*karma*" is here used in the sense of *saṁcita karma* which is also called *adrṣṭa*—Tr.

the deed of *dāna*, that man also who does the evil deed is never found to hold an expectation for that *adrṣṭa* ?

To this the reply is — ‘And since etc.’ And because none in this world does intentionally *i. e.*, with a previous expectation (*āśaṃśa buddhi pūrvikām*) such deed as would give a fruit unseen and evil. It is due to this reason that no body is found to hold an expectation for the evil unseen (*adrṣṭa*) [while he does the deeds of *kṛsi* etc.] Therefore, conclude that all actions (good like *dāna* and bad like *kṛsi*) whatever invariably give a result which is *adrṣṭa* (unseen).

What other qualifications do actions possess? To this the reply is:—“*ditṭhāṇḍganta phala tti*” (beginning of the latter half of v. 1623). All actions—cultivation of land, trade, etc., bear a visible fruit *viz.*, the acquisition of corn, money etc., which is not absolute *i. e.*, which is not invariably accruing (*anavaśyambhāvi*). It means that every action *invariably* produces an invisible fruit; but the visible fruit which is to be produced is not absolute or invariably happening *i. e.*, some action produces it and some action does not produce it. And this uncertainty of the visible fruit must be accepted as the effect of the power of an *adrṣṭa* (a destiny of the man who does the deed of *kṛti* etc.,) because when one out of two or many persons who do the same action (*e. g.*, cultivation of land) with the same means, suffers the loss of his visible fruit (crops) while another does not, it never happens without a cause in the form of *adrṣṭa*, the evil unseen. Moreover, this has been already explained in this very book †

† When the crops of a cultivator fails, the failure is due to his *adrṣṭa* and not to his action of cultivation which is a *drṣṭa* or visible deed.

† The commentator is anxious to explain ‘*savva kiriya*’ as all actions good (like *dāna*) and bad (like *kṛsi*); but it is very difficult to explain how the good actions (like *dāna*)

Or, of what avail is this trouble ? ' *Karma* ' is a foregone conclusion. By what argument ? He replies :—

अहवा फलाउ कम्मं कज्जात्तणओ पसाहियं पुव्वं ।

परमाणवो घडस्स व किरियाण तयं फल भिन्नं ॥ ७६ ॥ (१६२४)

Ahavā phalāu kammam kajjattaṇao pasāhiyam puṅgam ।

Paramāṇavo ghaḍassa va kiriyāṇa tayam phalam bhinnam. 76 (1624)

can bear a visible fruit (*diṭṭhāṇeganta phala*), so, even the commentator has somehow to explain it as referring only to the bad actions like *kr̥ṣi* etc.

We hold that by *savva kiriyā* we should take *only the bad actions* like cultivation of land, trade, etc. The purpose of the verse is to explain how all bad actions bear invariably a bad fruit which is invisible (*adiṭṭha*) and how even the visible fruits which these bad actions bear and which the agent intentionally aims at, are *uncertain* and therefore the result of the man's *adr̥ṣṭa*, the invisible *karma*. The visible action which a man does *e. g.*, *kr̥ṣi* bears two kinds of fruits *invisible* and *visible*, both of which are dependent upon the man's *adr̥ṣṭa* (*adiṭṭhānubhāvəṇa*). Since we find most people suffering and since we find that none does any bad action even *e. g.* *kr̥ṣi* with the intention that the result be bad and invisible *i. e.* that he may be unhappy in his next life as a result of *kr̥ṣi*, we must conclude that all bad actions like *kr̥ṣi* give invariably an invisible bad result.

Thus, in our opinion the proper conclusion (*paḍivajja*) from the whole of v. 1622 is the first half of v. 1623. The latter half of v. 1623 is only an additional remark. The commentator connects the first half of v. 1623 with first half of v. 1622 and the latter half of the former, with the latter half of the latter. As the latter half of v. 1622 refers only to *adr̥ṣṭa anis̥ṭa*, it cannot be connected with the latter half of v. 1623 which refers only to the *dr̥ṣṭa phala* and traces it to *adr̥ṣṭa karmas*—Tr.

D. C.—Or, there is a difference as to the fruit achieved, though those who try to achieve it, use the same and equal means. That difference cannot take place without a cause. O Gautama ! like the pot, that cause is “karma” on account of the fact that, that (difference) is an effect.

While explaining this verse we have already proved

"*karma*." Whence? He replies—"From the fruit *i. e.*, from that difference in the fruit (achieved by different people with equal means)." How is '*karma*' proved on the strength of that difference of fruit? He replies:—

"From its being an effect," *i. e.*, because that difference of fruit is an effect. There is invariably a cause corresponding to what is an effect, just as atoms of earth are the cause of a pot." and in this case the cause is an action. "The effect of actions is different from those actions" and it can be proved here that, that very '*karman*' is the unseen fruit of all actions. What kind of action is it? It is different from those actions. Since this '*karman*' is an effect and since actions are the cause, and since an effect and a cause must be mutually different, the '*karman*' is different from those actions. 1624

D. C.—The opponent asks “ If on the ground that we can see (physically) the body, etc., which are the effects, the *karman* is proved to be their cause, then, on the ground that the effect has a physical form, the *karman* also will have to be admitted as something having a physical form.”

The *Ācārya* replies :—“ *Karman* has indeed a physical form... ” What we intend to prove with great effort, you also have already proved with an intention to lead us to an unacceptable position, because your intelligence is like that of a child (or a fool), who does not know the doctrine of others. To explain the same—We also say “ A *karman* is nothing but possessed of a physical form, because its effect, the body, etc., has a physical form. In this world, the causes of the various effects having a physical form are also possessed of a physical-form *e. g.*, the atoms which are the cause of a pot. And if an effect is without a physical form, its cause is not possessed of a physical form *e. g.*, *Atman* which is the cause of knowledge (*jñāna*). And in this discussion, the essential cause (*samavāyi*

kāraṇa) is the topic of consideration, and not the objects which are only the instrumental causes, such as the form (*rūpa*), the light (*āloka*) etc.

The opponent will argue—“ The pleasure, the pain, etc., are also of the nature of effects (like the body, etc.). Hence, since they have no physical form, we would argue that the *karman* is also devoid of a physical form, because the rise of something devoid of a physical form, is not possible as taking place from something which has a physical form. Nor is it possible that one and the same thing be both *mūrta* (possessed of a physical form) and *a-mūrta* (devoid of a physical form) since that would be self-contradictory. ”

To this objection, we reply :—Indeed, for this very reason, the intimate or essential cause only is taken as the topic of our consideration and we have excluded the discussion of the instrumental cause. As the pleasure, the pain, etc., are the properties of the soul (*Ātman*), the soul alone is their essential cause, while *karman* is only the instrumental cause of the pleasure, the pain, etc., just as are the food, the drink, the poison of a snake, etc. Thus there is no flaw in our doctrine.
1625.

The *Acārya* mentions also other arguments proving the physical nature (*mūriatva*) of an action (*karman*) :—

'Trans.—78-79 Also, the fact that the *karman* has a physical form should be admitted, because in the association (with the *karman*) the consciousness of pleasure, etc., (becomes possible) and because of the rise of experience of heat (*vèdanā*) when one is in association (with the *karman*) § because it is possible to add to the strength of the '*karman*' by external means and because of the fact that *karman* undergoes change.

The following four illustrations are conclusive for the fact that *karman* has a physical form (and are to be taken respectively with each of the four arguments stated in the above verse—(1) Like food, (2) like fire, (3) like the addition of strength made by means of oil, etc., to a pot of earth, (and) (4) like the (change of) milk. (1626-1627)

D. C.—The four illustrations stated in the second verse, should be respectively taken as those of the four arguments presented in the first verse viz.:—The *karman* has a physical form (*mūrtam*), because of the experience of pleasure etc. when one is united with that *karman*; in this world that in association with which the pleasure etc. are experienced, is found to be something having a physical form, just as the food one eats etc; and there is no experience of pleasure etc. in association with that which is without a physical shape, just as in connection with the ether.

But in association with that *i. e.*, *karman* we do experience pleasure etc., therefore, the *karman* has a physical form. Similarly, that in association with which, a burning sensation arises is found to be something having a physical form, just as in association with the fire, and the rise of a burning sensation, pain occurs when one is in association with the *karman*; therefore, it has a form. Here the author states an objection and its reply :—

अह मयमसिद्धमेयं परिणामाउ त्ति सो वि कज्जाओ ।

सिद्धो परिणामो से दहिपरिणामादिष पयस्स ॥ ८० ॥ (१६२८)

Aha mayamasiddhamèyam pariṇāmāu tti so vi kajjāō ।

Atha matamasiddhametat pariṇāmāditi so'pi kāryāt ।

Siddhaḥ pariṇāmastasya dadhipariṇāmādiva payasaḥ. 80 (1628)]

Trans.—80. Again, (the opponent will say) 'this (*i. e.* *Karmarūpatva*) could not be accomplished by (virtue of) the *hetu* that it undergoes change. (But) even that is due to *Kārya*. Just as the mutability of milk is established by the mutability of curds, its mutability could (also) be established (by that of *Kārya*). (1628)

टीका—अथ 'परिणामित्वात्' इत्यसिद्धोऽयं हेतुरिति मतं भवतः । एतदप्ययुक्तम्, यतः सोऽपि परिणामः सिद्धः कर्मणः, 'कञ्जाउं ति.' कर्मकार्यस्य शरीरादेः परिणामित्वदर्शनादित्यर्थः । इह यस्य कार्यं परिणाम्युपलभ्यते तस्यात्मनोऽपि परिणामित्वं निश्चीयते, यथा दध्नस्तक्रादिभावेन परिणामात् पयसोऽपि परिणामित्वं विज्ञायत एवेति ॥ ८० ॥ (१६२८) .

D. C.—Again, you would believe that *Karman* is *asiddha* by reason of its *pariṇāma*. But that is not proper. The *pariṇāmitva* of *Karman* is apprehended from the *pariṇāmitva* of its *Kāryas* like *Śarīra* etc. For, when the effect is mutable, mutability of the action is automatically recognized, just as the mutability of milk is recognized from the *pariṇāma* of its *Kārya viz.,* curds, in the form of butter-milk.

Agnibhūti asks:—

Trans—81 Just as, a variety of visible changes in the clouds etc. is apprehended even without (the help of) *Karman* in the same way, what harm is there if it is so in the case of *mundane* souls also? (1629)

टीका—आह—ननु यथाऽभ्रादिविकाराणामन्तरेणापि कर्मवैचित्र्यं दृश्यते, तथा तेनेव प्रकारेण संसारिजीवस्कन्धानामपि सुख-दुःखादिभावेन वैचित्र्यं यदि कर्मविनापि स्यात्, ततः को नाम दोषो भवेत्?—न कोऽपीत्यर्थः ॥ ८१ ॥ (१६२९)

D. C.—A variety of visible changes in the clouds is apprehended even in the absence of *Karman*. In the same way, in the case of *mundane* souls also, there would be no harm if we believe that a variety of *vikāras* like *sukha*, *dubkha* etc. exists without the help of *Karman*.

The *Acārya* replies :—

D. C.—O Saumya ! If forms such as a house, a temple, a wall, black, green, red etc. are believed as the variety of visible changes like a gandharva city or a rain-bow in the sky, what harm is there if the same kind of variety is accepted in the case of Karman also? Variegation of objects having external forms is admissible to you. Now, the internal Karma-skandhas consist of the same substance as the bāhya skandhas; and on the top of that, they are alive. Moreover, as they produce sukha, duḥkha etc. as their vikāras there is all the more reason to admit vaicitrya of the Karma-pudgalas. Thus when various transformations in the case of lifeless bāhya pudgalas are admitted, they are all the more acceptable in the case of Karma-pudgalas which are surrounded by the cētana jīvas.

Trans.—83 If variety (in the case) of external (objects) is established, variety (in the case) of *Karman* which is surrounded by soul should (all the more) be accepted (as positive) like the variety of forms laid down in a piece of art. (1631)

टीका—यदि हि जीवापरिगृहीतानामपि बाह्यानामभ्रादिपुद्गलानां नानाकारपरिणतिरूपा चित्रता त्वया प्रतिपन्ना, तर्हि जीवानुगतानां कर्म-पुद्गलानां विशेषत एवास्माकं भवतश्च सा सम्मता भविष्यति, भक्तयो विच्छित्तयस्तासामिव चित्रादिषु शिल्पिन्यस्तानाम् । अयमभिप्रायः—चित्रकरादिशिल्पिजीवपरिगृहीतानां चित्रं—लेप्य—काष्ठकर्मानुगतपुद्गलानां या परिणामचित्रता सा विस्रसापरिणतेन्द्रधनुरादिपुद्गलपरिणामचित्रतायाः सकाशाद् विशिष्टैवेति प्रत्यक्षतः एव दृश्यते । अतो जीवपरिगृहीतत्वेन कर्म-पुद्गलानामपि सुखदुःखादिवैचित्र्यजननरूपा विशिष्टतरा परिणामचित्रता कथं न स्यात्? इति ॥ ८३ ॥ (१६३१)

D. C.—Now that you have accepted *citratā* in the form of manifold transformations in the case of *bāhya-pudgalas* like *abhra* etc. which are not surrounded by *jīva*, you shall have to accept the same in the case of *Karma-pudgala* also as they have already been surrounded by *jīvas*.

Again, the *citratā* of forms drawn by an artist in painting, sculpturing, carpentry etc. is peculiarly distinct from the *citratā* of the manifold *vikāras* of *bāhya-pudgalas* like rain-bow etc, while in the case of *Karma-pudgalas* also, the *pariṇāmacitratā* is peculiarly distinct from the other two varieties, firstly, because it gives rise to alterations like *sukha*, *duḥkha* etc., and secondly, because it is aided by *jīva*.

Again, the opponent asks:—

तो जइ तणुमेत्तं चिय हवेज्ज का कम्मकप्पणा नाम ? ।

कम्मं पि नणु, तणु चिय सण्हयरब्भंतरा नवरं ॥८४॥ (१६३२)

Tato yadi tanumātramēva bhavēt kā karma-kalpanā nāma ? ।
Karmāpi nanu tanurēva sūksmatarābhyantarā navaram 84 (1632)]

Trans.—84 Now, if *Karman* is itself the body, why should *Karman* be assumed at all? That is not proper. In fact *Karman* is also a body though subtle and interior to a great extent. (1632)

टीका—एवं मन्यते परः—यद्यभ्रादिविकारणामिव कर्मपुद्गलानां विचित्र-परिणतिरभ्युपगम्यते । ततो बाह्यं सकलजनप्रत्यक्षं तनुमात्रमेवेदं सुरूप-कुरूप-सुख-दुःखादिभावैः स्वयावत् एवाभ्रादिविकारवद् विचित्ररूपतया परिणमति, इत्येतदेवास्तु, का नाम पुनस्तद्वैचित्र्यहेतुभूतस्यान्तर्गडुकल्पस्य कर्मणः परिकल्पना, स्वभावादेव सर्वस्यापि पुद्गलपरिणामवैचित्र्यस्य सिद्धत्वात् ? इति । भगवानाह—“कम्मं पीत्यादि” । अयमभिप्रायः—यद्यभ्रादिविकारणामिव तनोर्वैचित्र्यमभ्युपगम्यते, तर्हि ननु कर्मापि तनुरेव, कर्मण-शरीरमेवेत्यर्थः, केवलं श्लक्ष्णतरा, अतिन्द्रियत्वात् ; अभ्यन्तरा च, जीवेन सहातिसंश्लिष्टत्वात् । ततश्च यथाऽभ्रादिविकारवद् बाह्यस्थूरतनोर्वैचित्र्यमभ्युपगम्यते, तथा कर्मतनोरपि तर्हि नाभ्युपगम्यते ? इति भावः ॥८४॥ (१६३२)

D. C.—The opponent—Now that *Karma-pudgalas* have been accepted as having variegated transformations like various visible changes in clouds etc, this body also, which is *pratyakṣa* to all, can undergo a number of alterations by virtue of its *svabhāva* in the form of *surūpa*, *kurūpa*, *sukha*, *duḥka* etc. And hence, it is not at all necessary to assume an intervening agent like *Karman* for the production of *śarīra* etc. For, a variety of visible changes in the case of all *pudgalas* is accomplished by its very *svabhāva*.

The *Acārya*—Because we take the *vaicitrya* of *tanu* as being similar to that of various *vikāras* in *abhra* etc., the *Karman* should also be taken as *tanu*. This *Kārmaṇa* body

is very subtle as it is beyond the cognizance of senses and it is of an interior nature, because it is so closely connected with *jīva*. So, *vicitratā* in the case of a *Kārmaṇa śarīra* should be recognized, just as variegation of an external gross object is apprehended as that of *vikāras* of the clouds etc.

Again, the author states an objection and its reply :—

को तीए विणा दोसो थूलाए सब्बहा विप्पमुक्कस्स ।

Dēhagrahaṇābhāvastataśca saṁsāravavyavacchittiḥ. 85 (1633)]

Trans.—85 (The opponent will say —) What harm is there in (believing) its absence? (The reply is—) It is impossible for (the soul) liberated from a gross body to enter a (new) body in that case; and ultimately a (complete) break-off of the *mundane* world (will follow). (1633)

D. C.—The opponent—We recognize the variety of *sthūla-śarīra* by virtue of its being *pratyakṣa*. But we cannot apprehend the variety of a *sūkṣma śarīra* as it is absolutely *a-pratyakṣa* (imperceptible). Hence, if we do not accept the *sūkṣma-śarīra* at all, will you kindly tell me what difficulty would arise ?

Acārya—If the *sūkṣma Kārmaṇa śarīra* is not accepted, in its absence, the soul when liberated from the *sthūla-śarīra* after death, will not be able to enter the new body at the next birth. For, this *Kārmaṇa śarīra* is the only agency through which a new body could be attained in the next birth. So, in case this *sūkṣma kārmaṇa śarīra* is not accepted, *jīva* will not enter a new body after death, and ultimately the whole of the *mundane* world will become disjuncted in absence of effort on the part of *jīvas*.

And even if it were so, what would happen ?

Sarvavimokṣāpattir-niṣkāraṇako vā sarvasaṃsārah ।

Bhavamuktānām vā puṇaḥ saṃsaraṇamato'nāśvāsaḥ. 86 (1634)]

Trans.—86 (In that case) all will attain *Mokṣa*; the whole of *mundane* world would become useless; those who are exempted from existence, will have birth, and re-birth; and there will be no consolation for *Mokṣa* even. (1634)

टीका—ततः संसारव्यवच्छेदानन्तरं सर्वस्यापि जीवराशेर्मोक्षापत्तिर्भवेत् ।
अथाशरीराणामपि संसारपर्यटनम्, तर्हि निष्कारण एव सर्वस्यापि संसारः

संसारपातः स्यात् । तथैव च तत्र संसरणम् । ततश्च मोक्षेऽप्यनाश्वास इति
॥८६॥ (१६३४)

D. C.—In that case there is disjunction of the entire *mundane* world; all the living beings will attain *mokṣa*. Again those that are bodiless will also wander in the world along with others that have bodies; the *mundane* world will become *niskāraṇa* or good-for-nothing. Moreover, *Siddhas* that are exempted from existence will also have to fall back into *samsāra* and hence into the cycle of birth and re-birth. Ultimately there will be no consolation even in *mokṣa*. Thus, along with disjunction of the entire *mundane* world, all the above-stated difficulties will arise, if *Karman* is not admitted as the cause of variety.

Again the opponent asks :—

Trans.—87 “ How can the corporeal (*Karman*) be related to the incorporeal *Jiva* ? ” (The *Acārya* replies :—) *O Saumya !* (Their relation is) like the relation of *ghaṭa* with sky or like that of substance (*dravya*) with action (*kriyā*). (1635)

टीका-ननु मूर्तं कर्मेति प्राग् भवद्भिः समर्थितम् । तस्य च मूर्तस्य

*D. C.—Agnibhūti—*You have already asserted that *Karman* is *mūrta*. Now, how could this *mūrta Karman* be connected with the *amūrta jīva* either by means of the *samavāya* relation or even by *Samyoga* ? This is one more difficulty in the way of the accomplishment of *Karman*.

The *Acārya*—O blessed one ! just as, a *mūrta ghaṭa* is connected with the *amūrta ākāśa* by means of *samyoga*, and an object like finger is connected with *kriyā* like contraction by means of the *samavāya* relation, so, here also, *Karman* is connected with *jīva*.

The relation of *jīva* with *Karman* is proved in another way :—

अहवा पच्चक्खं चिय जीवोवनिबन्धणं जह् सरीरं ।

चिट्ठह कम्मयमेवं भवन्तरे जीवसंजुत्तं ॥ ८८ ॥ (१६३६)

Ahavā paccakkham ciya jīvovanibandhaṇam jaha sarīram ।

Athavā pratyakśamēva jīvopanibandhanam yathā śarīram ।

Tiṣṭhati kārmanamēvam bhavāntarè jīvasamyuktam. 88 (1636)]

Trans.—88 Or, just as the (coarse) body, being perceptible (to the senses), is connected with the soul (in this world), the *Kārmaṇa* body is connected with the soul in the next world. (1636).

टीका-अथवा, यथेदं बाह्यं स्थूलशरीरं जीवोपनिबन्धनं जीवेन सह संबद्धं प्रत्यक्षोपलभ्यमानमेव तिष्ठति सर्वत्र चेष्टते, एवं भवान्तरं गच्छता जीवेन सह संयुक्तं कर्मणशरीरं प्रतिपद्यस्व । अथ ब्रूषे-धर्माऽधर्मनिमित्तं जीवसंबद्धं बाह्यं शरीरं प्रवर्तते, तर्हि पृच्छामो भवन्तम्-तावपि धर्मा-ऽधर्मौ भूतौ वा भवेताम्, अमूर्तौ वा ? । यदि मूर्तौ, तर्हि तयोरप्यमूर्तेनात्मना सह कथं संबन्धः ? । अथ तयोस्तेन सहासौ कथमपि भवति, तर्हि कर्मणोऽपि तेन सार्धमयं कस्माद् न स्यात् ? । अथामूर्तौ धर्माऽधर्मौ, तर्हि बाह्यमूर्तस्थूल-शरीरेण सह तयोः संबन्धः कथं स्यात्, मूर्ताऽमूर्तयोर्भवदभिप्रायेण संबन्धा-योगात् ? । न चासंबद्धयोस्तयोर्बाह्यशरीरचेष्टानिमित्तत्वमुपपद्यते, अतिप्रसङ्गात् । अथ मूर्तयोरपि तयोर्बाह्यशरीरेण मूर्तेण सहेष्यते संबन्धः, तर्हि जीव-कर्मणो-स्तत्सद्भावे कः प्रद्वेषः ? इति ॥ ८८ ॥ (१६३६)

D. C.—This *sthūla śarīra*, as it is *pratyakṣa* and connected with *jīva*, moves its limbs here and there, in this world, while the *Kārmaṇa śarīra* is connected with *jīva* in the next world.

Here again, if you think that it is the *sthūla śarīra*—with *dharma* and *adharma* as its *nimittas*—that exhibits all movements when conneced with *jīva*, I would ask you to consider whether *dharma* and *adhurma* are *mūrta* or *amūrta*.

In the first case, if you take *dharma* and *adharma* to be *mūrta*, how could they be related to *ātman* which is *amūrta*? But, if their relation to *ātman* is, anyhow, approved by you, why should you not approve of their relation to *Karman* also? Secondly, if you believe that *dharma* and *adharma* are *amūrta* they could not have any relation with the *bāhya* and *sthūla* body which is *mūrta*. For, according to you, connection between *mūrta* and *amūrta* is improper. Thus, if *dharma* and *adharma* become the *nimitta kāraṇas* of all the gestures of body even though there is no mutual relation between them, the fault of *atiprasāṅga* would arise. Moreover, if these *amūrta dharma* and *adharma* have been believed as being connected with the external *mūrta śarīra*, what objection would there be to assume a similar relation between *jīva* and *Karman*?

Here, there is an objection and its refutation—

Trans.—89 “ How could the *amūrta* (soul) be supported or damaged by the *mūrta* (*Karman*) ? ” (The answer is—) In the way as *vijñāna* etc. are (damaged or supported) by a drink of wine, medicine etc. (1637)

D. C.—*Agnibhūti*—In fact, the *amūrta ātman* cannot feel joy or sorrow as an *anugraha* (favour) or *upaghāta* (offense) by virtue of a *mūrta Karman*, just as the *amūrta ākāśa* is neither supported nor damaged by the *mūrta* sandalwood or fire-flame.

Ācārya—Desire for discussion of *vijñāna*, moral courage, remembrance etc., are the *amūrta* qualities of soul. These qualities are weakened by taking wine, poison, ants, white thornapple etc.† and, are nourished by taking the *mūrta* drugs which contain

† Popularly known as *dhaturā* in Western India.

milk, ghee, sugar-candy etc. So, the *amūrta jīva* is also nourished or weakened by the *mūrta Karman*.

Athavā nāikānto'yam saṁsārī sarvathā'mūrta iti ।

Yadanādikarmasantaipariṇāmāpanna-rūpaḥ saḥ. 90 (1638)]

Trans.—90 Or, this *mundane* soul is not entirely *amūrta* in the extreme. For, it has attained an alteration in the continuous range of *Karman*, which has no beginning. (1638)

टीका-अथवा, नायमेकान्तो यदुत-संसारी जीवः सर्वथाऽमूर्त इति । कुतः ? । यद् यस्मादनादिकर्मसन्ततिपरिणामापन्नं वह्नयः पिण्डन्यायेनानादिकर्मसंतानपरिणतिस्वरूपतां प्राप्तं रूपं यस्य स तथा । ततश्च मूर्तकर्मणः कथञ्चिदनन्यत्वाद् मूर्तोऽपि कथञ्चिज्जीवः । इति मूर्तेन कर्मणा भवत एव तस्यानुग्रहो-पघातो, नभसस्त्वमूर्तत्वात्, अचेतनत्वाच्च तौ न भवत एवेति ॥ ९० ॥ (१६३८)

D. C.—Or, this *saṁsāri jīva* is also not wholly *amūrta* because it is assumed as an alteration distinct from the expense of *Karman*. *Ātman* is attached to *Karman* as *agni* is attached to an iron-rod. Now, since *Karman* is *mūrta* and *ātman* is similar to *Karman* to a certain extent, the *ātman* is also *mūrta* to a certain extent even though it is *amūrta* by its nature. Consequently, the *amūrta* and lustrous *jīva* feels *anugraha* or *upaghāta* by virtue of a *mūrta Karman* while *ākāśa* being *amūrta* and *acētana* feels neither *anugraha* nor *upaghāta*.

Then, how is the *Karma-santāna* born? The reply is:—

सन्तानोऽणाई उ परोप्परं हेउहेउभावाओ ।

देहस्स य कम्मस्स य गोयम ! बीयं-कुराणं व ॥९१॥ (१६३९)

Santāno'nāi u paropparam hēuhēubhāvāō ।

Santāno'nādīstu parasparam hētuhētubhāvāt ।

Dēhasya ca karmaṇaśca Gautama ! bījāṅkurayoriva. 91 (1639)]

Trans.—91. And, *O Gautama* ! as *Karman* and body are mutually related as the causes of each other like the seed and sprout, the continuous range of *Karman* will have no beginning. (1639)

टीका—अनादिः कर्मणः सन्तान इति प्रतिज्ञा । देहकर्मणोः परस्परं हेतुहेतुमद्भावादिति हेतुः । बीजा-ऽङ्कुरयोरिवेति दृष्टान्तः । यथा बीजेनाङ्कुरो जन्यते, अङ्कुरादपि क्रमेण बीजमुपजायते, एवं देहेन कर्म जन्यते, कर्मणा तु देह इत्येवं पुनः पुनरपि परस्परमनादिकालीनहेतुहेतुमद्भावादित्यर्थः । इह ययोरन्योऽन्यं हेतुहेतुमद्भावस्तयोरनादिः सन्तानः, यथा बीजा-ङ्कुर-पितृपुत्रादीनाम्, तथा च देह-कर्मणोः, ततोऽनादिः कर्मसन्तान इति ॥ ९१ ॥ (१६३९)

D. C.—The expanse of *Karman* has no beginning, as *dēha* and *Karman* are related to each other as *hētu* and *hētumat*. Just as, a sprout is born of seed, and the seed, in turn, is produced from the sprout; in the same way, *Karman* is also produced from *dēha*, and *dēha*, in turn, is born of *Karman*. Thus *dēha* and *Karman*, are related as the causes of each other like *bīja* and *aṅkura*. So, just as the continuous range of *bīja* and *aṅkura* or *pitā* and *putra* is *anādi*, that of *dēha* and *Karman*, should also be *anādi*.

Karman can be established by means of *Vèda-vacana* also—

कम्मे चासइ गोयम ! जमग्गिहोत्ताइ सग्गकामस्स ।
वेयविहियं विहण्णइ दाणाइफलं च लोयम्मि ॥९२॥ (१६४०)

Karmaṇi cāsati Gautama ! yadagnihotrādi svargakāmasya ।
Vèda-vihitam vihanyatè dānādi-phalam ca lokè. 92 (1640)]

Trans.—92 If, *O Gautama* ' the existence of *Karman* is denied, rites like the performance of Sacred-fire for a person aspiring for Salvation, and the reward of munificence etc. in this world prescribed by the *Vèda*, would, be refuted. (1640).

टीका—कर्मणि चासति गौतम ! अग्निहोत्रादिना स्वर्गकामस्य वेदविहितं यत् किमपि स्वर्गादिफलं तद् विहन्यते, स्वर्गादेः शुभकर्महेतुत्वात्, तस्य च भवताऽनभ्युपगमात् । लोके च यद् दानादिक्रियाणां फलं स्वर्गादिकं प्रसिद्धं तदपि विहन्येत । अयुक्तं चेदम्, “ किरियाफलभावाओ दाणाईणं फलं किसीए व्व ” इत्यादिना प्रतिविहितत्वादिति ॥ ९२ ॥ (१६४०)

D. C.—If, *O Gautama* ' the existence of *Karman* is denied, the commandment of *Vèdas* that a person desiring to attain Salvation can do so by performing *agnihotra* etc. would be null and void. Again, the wellknown *phalas* like *svarga* etc. prescribed for actions like *dāna* etc. would also be refuted, if you don't believe in *Karman*. But that is not proper, as it is opposed by “ *Kiriyāphala bhāvāo dānāṇam phalam kisiè vva†* ” etc. Hence you shall have to accept *Karman* with its *anādi santāna*.

† Vide v. 1615.

On the non-apprehension of *Karman*, if *Īsvara* etc. were taken to be the creators of the manifold variations in the world, a number of difficulties would arise,

Trans.—93-94 Or, denying (the existence of) *Karman*, you might presume *jīva* itself-pure and simple-or *Īsvara* etc.; to be the creator of (the objects like) *dēha* etc. But that is not so, since *jīva* is void of means (*upakaraṇa*), motion (*cēṣṭā*), and form (*mūrtatā*). Even (in the case of) *dēha* etc. being accomplished by *Īsvara* etc, either the same difficulties would arise or there would be disorder. (1641-1642)

D. C.—O Agnibhūti Gautama ! Leaving the Karman aside, it is absolutely improper to accept any one of jīva, Śvara, kāla (Time), avyakta (Viṣṇu), niyati (Destiny), or yadricchā (self-will) to be the kartā of deha etc.

It is not possible for *jīva* and *Śvara* etc., to accomplish *Kārvas* such as *śarīra* etc., without the help of *Karman*. *jīva*

cannot accomplish objects like *śarīra* on account of the following reasons :—

(1) If *jīva* is presumed to be the *Ḳartā* of *śarīra* etc., it must have some means to produce them. Just as a potter cannot produce a *ghaṭa* without the help of an *upakaraṇa* like *daṇḍa*, so also, *jīva* cannot accomplish *Ḳāryas* like *śarīra* in absence of an *upakaraṇa*. Now, *jīva* is not supposed to have any other *upakaraṇa* except *Ḳarman* in producing *śarīra* etc. For, no other *upakaraṇa* except *Ḳarman* can exist in the state of embryo etc.

(2) In the process of accomplishment of *Ḳāryas* like *śarīra*, *jīva* would not be able to suck up semen, blood etc., without the help of *Ḳarman*.

(3) *Jīva* cannot accomplish *śarīra* etc., on account of its inactive, incorporeal, and all-pervading nature like *ākāśa*.

Again, it is useless to believe that *śarīravān* *Īśvara* produces each and every object such as *dēha* etc. Because the above-mentioned difficulties are bound to arise in that case also. In absence of an *upakaraṇa*, *Īśvara* like a potter without a *daṇḍa*, is not supposed to create his own body. Now here, if it is assumed that a second *Īśvara* creates the body of this *Īśvara*, consider whether that *Īśvara* has a body or not. If he has no body it is clear from what has already been discussed that he cannot create *śarīra* in absence of an *upakaraṇa*. But if it is said that a third *Īśvara* having a body creates the body of this *Īśvara*, a fourth *Īśvara* shall have to be supposed to create the body of the third one, and a fifth *Īśvara* to create that of the fourth one, and so on, until ultimately it results in an *anavasthā* which is not at all desirable.

Thus it is clear that *Īśvara* is not the creator of *śarīra* etc. But in spite of that if it is believed that *Īśvara* creates *śarīra* etc., consider whether he does so with or without any

purpose. If *Īsvara* creates body without any purpose he would be taken as frantic, and if he does so with some intention he would lose his *Īsvaratva*. For a *siddha* and *anādi ātman* is not expected to cherish desire for creating *dēha* etc., as desire is one of the forms of illusion and so on. A number of such arguments could be advanced in this connection, but for fear of *grantha-vistāra* (extension of the work) they are not stated here. But in line of the arguments stated above, it can also be proved that neither *Brahmā* nor *Viṣṇu* nor any one else, can be taken as the *Kartā* of *śarīra* etc.

Īsvara therefore is not acceptable as the creator of *śarīra* etc, from any point of view, but *jīva* accompanied by the *upakaraṇa Karman*, should alone be accepted as the *kartā* of *śarīra* etc.

D. C.—You, too, O Agnibhūti ! like others presume svabhāva and svabhāva only to be the kartā of dēha etc. on hearing the Vēdapadas such as “ Vijñānaghana ēvaitēbhyo bhūtēbhyah ” etc. It is therefore said by some people that—

Sarvahētunirāsamsam bhāvānām janma varṇyatè ।
Svabhāvavādibhistè hi nāhuḥ svamapi kāraṇam ॥ 1 ॥

Rājīvakantakādinām vaicityam kaḥ karoti hi ? ।
Mayūracandrikādirvā vicitraḥ kēna nirmītaḥ ॥ 2 ॥

Kādācitkam yadatrāsti niḥśēṣaḥ tadahētukam ।
Yathā kaṅtakataikśnyādi tathā caitè sukhādayaḥ ॥ 3 ॥

So, *Gautama !* If you also hold the same view., viz., that *svabhāva* is the *kartā* of *dēha* etc., a number of *doṣas* will crop up. In the first instance, consider whether *svabhāva* is (1) a *vastuviśēsa* (an object in particular) or (2) *a-kāraṇatā* (causelessness) itself or (3) *vastudharma* (quality of an object).

(1) *Svabhāva* can never be recognized as a *vastuviśēsa* as there exists no *pramāṇa* (ground of assurance) to prove

that it is a *vastu*. Now here, if you are prepared to accept an *a-pramāṇaka* (unauthorized) *vastu* as the *vastu* itself, you should also accept *Karman* as a *vastu*; for according to you, *Karman* is also *a-pramāṇaka*. Secondly, if that *svabhāva* is *vastuviśeṣa*, is it *mūrta* or *amūrta*? If it is *mūrta*, it is nothing but *Karman* with a synonym of *svabhāva*. If it is *amūrta* it is not supposed to have any sort of *upakaraṇa* and hence like *ākāśa* it can never be a *kartā* of any object. Moreover, it is improper to accept an *amūrta svabhāva* to be the *kāraṇa* of a *mūrta kārya* such as *dēha* etc. So, it is clear that *svabhāva* is not a *vastuviśeṣa* in any case.

2. If *svabhāva* were supposed to be *a-kāraṇatā*; all objects will have to be taken as being produced without cause, and *Kāraṇa* will be absent uniformly at all places; consequently, all objects will have to be supposed to have been produced accidentally all at a time. But it would be absurd to believe like that. For, one that is produced spontaneously without any reason, does never possess, like the *vikāras* of *abhra* etc., a beginning or a definite form. Objects like *śarīra* should never be believed to have been born without cause, because they are produced by means of *Karman*, they are *ādimān* and they possess a definite form as that of a *ghaṭa*. This shows that such objects are produced by a *kartā* by means of an *upakaraṇa*, and *Karman* is the only possible *upakaraṇa* in the state of embryo. So, *Karman* ought to be accepted as its real *hētu* and not the *svabhāva*.

3. Now, consider if *svabhāva* can be taken as a *vastu-dharma*. If *svabhāva* is supposed to be the quality of a *vastu* like *ātman* it would be *amūrta* like *ākāśa* and hence it would not become the cause of *śarīra* etc. But there would be no objection if *svabhāva* were taken to be the quality of a *mūrta* object. For, in that case, *Karman* will become a *pariyāya* of the *svabhāva* of a *mūrta* object. So, we have no objection in accepting *svabhāva* as a *dharma* of the *mūrta* object.

Moreover, *O Agnibhūti!* you entertain doubt as regards *Karman* by hearing sentences such as “*purusa evēdam sarvam*” of the *Vēdas*. According to you, the interpretation of those sentences is as follows:—

“ Everything that is animate and inanimate, past and future, movable and immovable, distant and near, interior and exterior everything that is nourished by food, and one who is the lord of *mokṣa*—all this is *pūruṣa* and *puruṣa* alone. No other object as *Karman* exists as distinct from this *purusa*.

Similarly, according to you, sentences such as “*viññāna-ghana*” also establish the non-existence of *Karman*. Because, in both the above-mentioned *padas* you interpret “*ēva*” as referring to the non-existence of *Karman*

Your interpretation of the *Vēda-padas* is not correct. Sentences like “*purusa evēdam*” etc. are meant to praise the *ātman* and to establish the *advaita-bhāva* in order to avoid the arrogance of *jāti* etc. but they are not meant to establish the non-existence of *Karman*.

Sentences are generally divided into three kinds:—(1) *Vidhivādapara i. e.*, sentences that are laid down as rules. (2) *Arthavādapara i. e.*, sentences that are laid down as the explanatory remarks and (3) *Anuvādapara i. e.*, sentences that are laid down as explanatory repetitions—“*Agnihotram juhuyāt svargakāmaḥ*” is an example of *vidhivāda*. *Arthavāda* is of two kinds:—(1) *Stuti-arthavāda* and (2) *Nindā arthavāda*. Sentences such as “*puruṣa evēdam sarvam*” etc., as well as those “*Sa sarvavid yasyaisa mahimā bhuvī vivyē brahmapurē hyēṣā vyomni ātmāsu pratiṣṭhitamakṣarṇm vēdyatē yastu sa śarvajña sarvavit sarvamēvavivēṣa*” and “*ēkayā pūrṇayashūtyā sarvān kāmānavāpnoti*” etc., are also the examples of *stuti-arthavāda*.

Again you may raise a question as to why the sentences like “*ēkayā pūrṇayā*” etc. be not taken as the illustrations

of *Vidhivāda*. But if it illustrates *Vidhivāda*, the rest of the *anuṣṭhānas* like *agnihotra* would be of no avail.

In the sentence “*ḍṣa vaha prathamo yajño yo'gniṣṭomaḥ, yo'nēnāniṣṭavānyēna yujatē sa gartamabhyapatat*” the sacrifice of animals is censured and hence it illustrates the *nindārthavāda*. Lastly *Vēda-vākyas* such as “*dvādāśamāsāḥ samvat sarah*” “*agnirusṇah*” “*agni rhimasya bhēśajam*” etc, are *anuvāda pradhāna* as they state mere explanatory repetitions of well-known facts.

It is, therefore, clear that *Vēdapadas* like “*puruṣa dvēdam sarvam*” are meant to illustrate the *stuti-arthavāda*.

“*Vijñāna ghana dvaitēbhah*” etc., can be interpreted in this way—*Atman*, as an assemblage of *knowledge* is distinct from *bhūtas* and it itself is the *kartā* of the *kāryas* such as *śarīra* etc. Now that, it has become the *kartā* it must have a *karmaṇa* (instrument) to accomplish the *Kāryas*. For, wherever there are *kartā* and *kārya*, there ought to be a *karana* also. Like a forceps in the case of a blacksmith and iron-rod, *Karman* is used as an instrument in the accomplishment of *Kāryas* like *śarīra* by *Atman*. So, you shall have to accept the existence of *Karman*.

Moreover, *Karman* can be established by the help of *Vēda-vacanas* like “*puṇyah puṇyēna karmaṇā, pāpah pāpēna karmaṇā*” also. Thus *Karman* is proved by means of *āgama* also. Hence, leave all the doubts aside and know it for certain that *Karman* does exist and *Karman* is the only instrument to accomplish *Kāryas* like *śarīra* etc.

D. C.—Although thus respectfully and directly addressed by the Lord and seeing the beauty and splendour of his eminence extending over the three worlds, and being unable to disclose the doubt remaining in his mind, out of agitation *Vāyubhūti* remained silent with amazement. But he was again addressed thus:—

Trans.— 102–103. Your presumption is that consciousness (*cētaṇa*) is produced from the collection (*samudaya*) of *bhūtas* like *prithivī* etc., because like intoxication (*mada*) though not found in each separate constituent, it is apprehended in the collection (of those constituents). Just as intoxication, though not present in each separate constituent of wine (*madya*), is produced in the collection of these constituents, and disappears after a particular period of time, similarly consciousness (*caitanya*) is also produced in the collection of *bhūtas* and perishes as time passes. (1650–1651)

D. C.—According to your presumption *cētanā* is produced from the *samudāya* of *bhūtas* such as *prīthvī*, *ap*, *tējas*, *vāyu* etc. Just as *mada* cannot be seen in each separate constituent *e. g.*, *dhātaki* flower, jaggery etc., of the wine, but it can be produced only when all those constituents are combined together. In the same way, *cētanā* is recognized in the *samudāya* of *bhūtas* only and not in a separate constituent like *prīthvī*. So, *cētanā* becomes the quality of the *samudāya* of *bhūtas*. Again, this *cētanā*, after being produced in the *samudāya* of *bhūtas* perishes after having stayed for some time, just as the quality of *mada* after being produced in the combination of the constituents of wine, vanishes as time passes. Thus, it is proved by means of *anvaya* as well as *vyatirēka* in the above two cases that *caitanya* is a *dharma* of the *samudāya* of *bhūtas*.

Again, that which is not present in a constitution of *samudāya* but in the *samudāya* itself becomes the quality of *samudāya* only, and not of a constituent. So, *caitanya* being found only in *samudāya* and not in each of its individual constituents becomes a *dharma* of the *samudāya* of *bhūtas*, as *mada* becomes a *dharma* of the *samudāya* of *madyāṅgas*. Now, there can be no distinction between *dharma* and *dharmin*. For, if they were distinct, they could not be related as *dharma* and *dharmin*. *Śarīra* is nothing but the *samudāya* of *bhūtas* and *jīva* is formed of *cētanā*. Hence, *jīva* and *śarīra* are nothing but *dharma* and *dharmin* and as such they should be considered as one and the same.

Now, on the other hand, there are several *Vāda-padas* which establish *jīva* to be distinct from *śarīra* *e. g.* “ *Na hi*

vai sa-śarīśya priyāpriyayo-r-apahatirastī, a-śarīram vā vasantam priyāpriyè na sprśataḥ." And that is the reason why you have raised this doubt.

The doubt is refuted as follows :—

Trans.—104–105 Consciousness (*cētanā*) can never exist in a collection if it is absent in case of (its) individual constituents, just as oil cannot be found in a collection of sands if it is not present in each individual particle of the sand. Again, intoxication (*mada*) is not absolutely absent even in an individual constituent of wine. (For), every constituent (of wine) possesses some capacity or other like that of inducing

insanity, producing satiety and quenching thirst etc. in its individual state. If consciousness were present in (each of the) *bhūtas* (separately), it could be (found) in the collection (also) (1652-1653).

D. C.—Since *cetanā* is not present in the individual state of a *bhūta*, even to a limited extent, it can never be found in

the combination of the *bhūtas* also, just as oil cannot be found in a *samudāya* of sands when it is not present in each individual particle of sand. From this, a rule can be deduced that whatever is absent in an individual state should be absent in the collective state also, and whatever is present in collection should be present in the individual also, e. g., oil when present its *prīthak avasthā* of *sesamum* is found in its collective state also.

In the present case, *cetanā* is not found in the *prīthak avasthā* of *bhūtas*, and hence, it is improper to accept that *cetanā* is produced in the *samudāya* of *bhūtas*. Really speaking, it is produced by some other cause totally different from *bhūta-samudāya*. That cause is nothing else but *jīva* which is *amūrta* on account of the *amūrta cetanā*.

Here again, the opponent may argue that the above-mentioned rule is wrong: For, *mada* is not found in the individual state of a constituent like *dhātakī puṣpa* of the *madya*; and yet the quality of intoxication does exist in its *samudāya*. But it is not proper to say that *mada-bhāva* is altogether absent from *dhātakī puṣpa* etc. For, *mada* does exist in the individual state to a certain extent. A *dhātakī puṣpa* can induce insanity in its individual capacity; the juice of jaggery, vine, sugar-cane etc can produce contentment and water can quench the thirst. By the word "ādi" other constituents of wine should also be included, as they too, possess some capacity or the other as far as possible. Now, if *caitanya-śakti* were present in the individual *bhūtas* like *prīthak* etc. even to a limited extent, *caitanya* would certainly have been manifested in their combination also. But when *cetanā* is absent in the very *prīthak* state, it can never be produced in the combined state.

Now, what would happen if the constituents of wine had no power of intoxication at all?

Yadi vā sarvābhāvo viśvak tataḥ kim tadaṅganiyamō'yam ।

Tassamudayanīyamo vānyēṣvapi tato bhavēt. 106 (1654)]

Trans.—106 Or, if the power of intoxication were altogether absent from all (the constituents of wine) individually, how could they be called its divisions at all ? and why should there be any rule regarding its collection also ? (For), in that case, it must be produced by means of (the collection of) other objects also. (1654)

टीका—यदि च मद्याङ्गेषु पृथगवस्थायां सर्वथैव मदशक्त्यभावः, तर्हि कोऽयं तदङ्गनियमः—कोऽयं घातकीकुसुमादीनां मद्याङ्गतानियमः, तस्समुदायनियमो वा—किमिति मद्यार्थी घातकीकुसुमादीन्येवान्वेषयति, तस्समुदायं किमपि नियमेन मीलयति ? इत्यर्थः, नन्वन्येष्वपि च भस्मा-ऽश्म-गोमयादिषु समुदितेषु मद्यं भवेदिति ॥ १०६ ॥ (१६५४)

D. C.—If the power of intoxication is denied to exist in the *prithak avasthā* of the constituents like *dhātakī puspā* etc., they cannot be called the constituents of wine at all. Again, if *dhātakī puspā* etc., has no power of intoxication at all, why should people desirous of wine, collect all the constituents like *dhātakī puspā* in order to prepare wine ? and why do they not prepare wine by combining other objects like ashes, stones, cowdung, etc. ? This clearly indicates that the power of intoxication does exist in the individual state of constituents like *dhātakī puspā* etc., and as a result of that, it appears in wine which is the combined state of all such constituents.

At this point, an opponent may advance the following argument :—

भूयाणं पत्तेयं पि चेषणा समुदए दरिसणाओ ।

जह मज्जंगेसु मओ मह त्ति हेऊ न सिद्धोऽयं ॥१०७॥ (१६५५)

Trans.—107 Since consciousness is found in the collection of *bhūtas*, if an argument is advanced that consciousness is present in each individual *bhūta* also, as intoxication is present in various constituents of wine, it can never be approved of. (1655).

D. C.—An opponent may advance the following line of argument:—

As *mada* is present in each separate constituent of wine, it is found in the *samudāya* of those *bhūtas* also. In the same way, it can be said that since *cetanā* is completely manifested in the collection of *bhūtas* it should be present in each independent *bhūta* at least to a certain extent. Just as *mada* is not clearly perceptible in its individual state, but distinct in the *samudāya*, so also, *cetanā* is not clearly perceptible in the individual state on account of its minute form, but it is more distinct in the collective state.

But it is not in the fitness of things to state that, because *cetanā* is found in the *bhūta-samudāya* it should be present in each individual *bhūta* also, as *cetanā* is the quality of Soul and the Soul is contained within (*antargata*) the *bhūta-samudāya*. So, if *ātman* is absent from the *bhūta-samudāya*, *cetanā* cannot exist in the *samudāya*. Thus, your argument that *cetanā* is found in the collection of *bhūtas* is not valid. For, if *cetanā* were taken to be a quality of mere *bhūta-samudāya* it ought to be found in a dead body also. Here again, it is improper to advance an excuse that *cetanā* is absent in a dead body on account of the absence of *vāyu*. For, *cetanā* could never be found in a dead body, even if *vāyu* were made to enter the body by means of a pipe etc. Similarly, if it is argued that *cetanā* does not exist in a dead body due to the absence of *tējas*, *tējas* also could be made to enter the dead body by the same sort of means and proved that *cetanā* is absent in that case also. Lastly, if it is said that on account of the non-existence of a peculiar type of *vāyu* and *tējas*, *cetanā* is absent from a dead body, the peculiarity in the case would be due to nothing else but the excellence of *ātman* which would automatically mean that you admit the existence of *ātman*.

D. C.—Vāyubhūti—That *cetanā* though perceived in a collection of *bhūtas*, does not belong to the *bhūta-samudāya* seems to be incongruent. For, just as it is improper to assert

that qualities like *rūpa* etc., seen in a *ghata*, do not belong to the *ghata*, so here also, it is not proper to state that *cetanā* though apprehended in a collection of *bhūtas*, does not belong to the *bhūta-samudāya*.

Ācārya—The argument advanced by you, *O Gautama* ! is absolutely invalid. Just as vegetables etc., found in a collection of earth and water can never be considered to have been produced from the collection of earth and water, since they are produced from their seeds; in the same way, *cetanā* also, should never be taken to have been produced from the collection of *bhūtas* though it is found in a body made of *bhūtas* such as *prithvi* etc. For, that *cetanā* is produced from *ātman* which is altogether distinct from the *bhūta-samudāya*. Thus, there is no contradiction in my argument. But the contradiction lies in your assertion that *cetanā* is produced in each and every individual *bhūta*.

D. C.—The point is that *cetanā* who remembers an object perceived by its sense-organs in the form of *bhūtas*, becomes the quality of something which is different from those *bhūteन्द्रियas*, just as *Dēvadattā* who remembers an object perceived through five windows by means of five *indriyas*, is distinct from those windows. So, that which is not *bhinna* from the *samudāya* of *bhūteन्द्रियas*, can never remember an object apprehended by more than one means. For, after having perceived an object through a number of means, if *cetana*s were *abhinna* from those means, then, *Dēvadatta* who recognizes an object through a number of windows, would become the window itself.

Again, in recognizing an object, it is improper to say that mere *indriyas* apprehend the object and nothing else. For, even when the *indriyas* have ceased working, the object perceived by them is recalled; and sometimes, in spite of their working, the object is not apprehended.

D. C.—Cognition (*mati*) which constitutes the knowledge of *ghaṭa* etc, belongs to something which is distinct from sense-organs. For, even if the senses are benumbed as in the state of deafness, blindness etc, the object perceived by the *indriyas* is remembered, while on the other side, even if the senses are working, the object is not recognized.

Now, if the sense-organ itself were to apprehend an object, how is it that an absent-minded man is not able to apprehend an object even with open eyes, and efficient ears, substances of *rūpa* and *śabda* placed at proper places? It follows, therefore, that some one, who like a person looking at an object like a woman from five windows, is different from the sense-organs, is able to apprehend it. A rule can be deduced from this, that one who remembers an object even after its *indriyas* have ceased working, is distinct from those *indriyas*. When *Dēvadatta* recalls an object seen through a number of windows even after the windows are closed, it is *ātman*, who remembers the object perceived by sense-organs even when the sense-organs have ceased working as in the state of blindness, deafness etc. This proves that *ātman* is different from *indriyas*. Again, that which does not recognize an object even while the *indriyas* are working, is different from the sense-organs like an absent-minded *Dēvadatta* looking through the open windows.

D. C.—Jiva who apprehends an object by means of one *indriya* and exhibits *vikāras* by means of another, is *bhinna* from both the *indriyas*. Just as *Dēvadatta* who looks at a woman from an eastward window and exhibits his perversion of the sight of *stanaśparśa* etc., by her hands at the other is really speaking different from both the windows; in the same way, the Soul who observes a person eating tamarind by means of eyes and exhibits *vikāras* in the form of distilling *saliva* etc., by means of tongue, is decidedly different from both. Or, *ātman* is different from *indriyas* because having seen an object by means of eyes, *ātman* holds it by means of hands.

Trans.—112 Just as, from five different persons having five different *vijñānas*, a sixth person possessing all the five *vijñānas* is different, so also, the soul who remembers an object cognized by all the sense-organs, should be inferred as being distinct from them. (1660)

D. C.—Since *jīva* remembers an object perceived by all the sense-organs, *jīva* should be distinguished from *indriyas*. From five different persons possessing five different *viññānas* such as *sparsa*, *rasa* etc., according to their will, a sixth *puruṣa* having all the five *viññānas* together, is distinguished. In the same way, the Soul that possesses the cognizance of all the five sense-organs, should be distinguished from each of the five sense-organs. In short, one who is the only *anusmartā* of the objects cognized, is distinguished from those by means of which the objects are perceived.

An objection may be raised at this point, that like five different *puruṣas* having five different *viññānas* such as *śabda*, *rasa*, etc., the five *indriyas* should also possess the power of cognizance. For, if they have no cognizance, the argument stated above would be *a-siddha*. But the contention is not *valid*. For, there would be no difficulty in this case by reason of the adjective "*icchāvasāt.*" *Indriyas* are not supposed to have any sort of desire. Or, by way of the co-operative cause the reason of perception lies in *indriyas*, and hence, there is no harm, if *indriyas* were metaphorically believed to be *jñāna* itself. Or, say, this illustration is nothing but a means to an end. Consequently, for the recognition of objects which are *atīndriya* (beyond perception), *āgama* and *yukti* are the only resorts. For, it is said,

Agamaśco'papattisca sampūrṇam dṛṣṭikāraṇam;
Atīndriyāṇāmarthānām sadbhāvapratipattayè.

A few more inferences are laid down in support of the distinction of Soul,

विष्णाणंतरपुढ्वं बालणाणमिह नाणभावाओ ।

Yathā bālaññānapūrvam yuvajñānam tacca dèhadhikam. 113 (1661)]

Trans.—113 Just as, cognizance in youth is similar to cognizance in childhood, the latter is similar to other cognizances because of its being cognizance. And that (cognizance) is distinguished from *dèha* (1661)

टीका--अन्यविज्ञानपूर्वकमिदं बालविज्ञानम्, विज्ञानत्वात्, इह यद् विज्ञानं तदन्यविज्ञानपूर्वकम् दृष्टम्, यथा बालविज्ञानपूर्वकं युवविज्ञानम्, यद्विज्ञानपूर्वकं चेदं बालविज्ञानं, तच्छरीरादन्यदेव, पूर्वशरीरत्यागेऽपीहत्य-विज्ञानकारणत्वात्, तस्य च विज्ञानस्य गुणत्वेन गुणिनमात्मानमन्तरेणा-संभवात्, तच्छरीरव्यतिरिक्तमात्मानं व्यवस्यामः, न तु शरीरमेवात्मेति । विज्ञानत्वादिति प्रतिज्ञार्थैकदेशत्वादसिद्धो हेतुरिति चेत् । न, विशेषस्य पक्षी-कृतत्वात् । भवति च विशेषे पक्षीकृते सामान्यं हेतुः, यथाऽनित्यो वर्णात्मकः शब्दः, शब्दत्वात्, मेषशब्दवत् । एवमिहापि बालविज्ञानमन्यविज्ञानपूर्वक-मिति विशेषः पक्षीकृतः, न तु सामान्यविज्ञानमन्यविज्ञानपूर्वकमिति पक्षीकृतं, येन विज्ञानत्वादिति प्रतिज्ञार्थैकदेशः स्यात्, यथाऽनित्यः शब्दः, शब्द-त्वादिति ॥ ११३ ॥ (१६६१)

D. C.—Here the *bālaññāna* is similar to other *vijñānas* on account of its *vijñānatva*. Just as, *yuvajñāna* resembles *bālaññāna*, the *vijñāna* to which the *bālaññāna* resembles is distinguished from *dèha* because it continues to be the cause of *vijñāna* even after it has left the former body. Now, since *vijñāna* is a quality, it cannot remain without a *guṇin viz., ātman*; consequently, we recognize *ātman* to be distinct from body, and not the body itself.

“ *Vayubhūti*—The *hētn vijñānatvāt*” stated by you, becomes nothing but a portion of the proposition to be proved in that case.

Acārya—It is not so. The particular is pointed out in this case; and when particular is emphasized, the *hētu* stated there—in, is common *e. g.*, the *varṇatmaka śabda* is *anitya* because of its *śabdatva* as in the case of a *mèghaśabda*. Similarly, in the proposition that *bālavijñāna* is similar to other *vijñānas*, only a particular case of *vijñāna* is emphasized and *vijñāna* in general is not emphasized, consequently this does not form a part of the proposition as, it forms in the case of “ *anityaḥ śabdaḥ śabdatvāt.*”

D. C.—The first desire of the child to suck the breasts of the mother, is just similar to the other *abhilāṣas* on account of its being an *abhilāṣa*. Now, the desire to which the child's *stanābhilāṣa* resembles is distinct from body, because it continues to be the cause of this *abhilāṣa* even after it has left the body. *Abhilāṣa* is the quality of knowledge which cannot exist without a support, which is nothing but the soul, independent of *dēha*.

Vāyubhūti:—The *hētu* stated in the above-named *anumāna*, involves the fault of uncertainty as all *abhilāṣas* are not the same. *e. g.*, an *abhilāṣa* for *mokṣa* does not resemble another *abhilāṣa* for *mokṣa*. So, why not to believe the same in the case of this *abhilāṣa* also ?

The *Ācārya*.—You have not understood the point, *O Gautama* ! The point is that we have compared the desire for breasts only with other desires in general. We have not stated in particular that the desire for breasts is just similar to other desires for breasts. Similarly, in the case of *mokṣābhilāṣa* also, the *mokṣābhilāṣa* should not be compared with other *mokṣābhilāṣas* but only with other *abhilāṣas* in general. (1662)

Another inference,

Trans.—115 As the body in youth resembles the body in infancy, the body in infancy is just similar to other bodies because it possesses the sense-organs. One to whom that body belongs, is the owner of body (and not the body itself). (1663).

टीका—बालशरीरं शरीरान्तरपूर्वकम्, इन्द्रियादिमत्त्वात्, इह यदिन्द्रियादिमत्, तदन्यदेहपूर्वकं दृष्टम्, यथा युवशरीरं बालदेहपूर्वकम्, यत्पूर्वकं चेदं बालशरीरं तदस्मात् शरीरादर्थान्तरम्, तदत्ययेऽपीहत्यशरीरोपादानात्, यस्य च तच्छरीरं स भवान्तरयायीशरीरादर्थान्तरभूतो देहवानस्त्यात्मा, न पुनः शरीरमेवात्मेति सिद्धमिति ॥ ११५ ॥ (१६६३)

D. C.—Just as a body in youth resembles a body in infancy, the body in infancy is just similar to other bodies because of its possessing the *indriyas*. Now, the body to which this *bālaśarīra* resembles, is distinct from the latter, for this body rises up even if the former body has perished. Again, that to whom this body belongs, is nothing but Soul, who travels from life to life, and who, being not the body itself, is distinct from this body.

Trans.—116 Happiness in the state of childhood like the present-day happiness resembles happiness, misery etc., in other states. And the Soul is possessed of the faculty of perception, because of its being capable of perceptivity. (1664).

टीका—अन्यसुखपूर्वकमिदमाद्यं बालसुखम्, अनुभवात्मकत्वात्, सांप्रतसुखवत्, यत्सुखपूर्वकं चेदमाद्यं सुखम्, तच्छरीरादन्यदेव, तदत्ययेऽपीह-त्यसुखकारणत्वात् । गुणश्चायम्, स च गुणिनमन्तरेण न संभवति, अतो यस्तस्याश्रयभूतो गुणी स देहादर्थान्तरम्, इति सुखानुभूतिमयो जीव इति सिद्धम् । एवं दुःख-राग-द्वेष-भय-शोकादयोऽप्यायोजनीया इति ॥११६॥ (-१६६४) ॥

D. C.—Happiness in the state of childhood resembles the present-day happiness, because of its *anubhūtimayatva*. Now, the happiness to which this *bālasukha* resembles, is distinct from body, because it continues to be the cause of happiness even if a former body has perished. Moreover, *sukha* is a *guṇa* which cannot exist without the support of *guṇin* which, too, is distinct from body. This proves that the Soul is possessed of *anubhūti* of happiness. According to the same argument, we can prove that *ātman* possesses the *anubhūti* of *duḥkha*, *rāga*, *dvēṣa*, *bhaya*, *śoka*, etc. Now, the *anumānas* that have already been laid down to establish the existence of *jīva* and *karman* are re-stated here in order to refresh the memory.

Since all objects are *kṣaṇika* according to *Buddhistic* theory, an opponent may argue here that *jīva* vanishes with body and hence it is no use trying to prove that Soul is different from body. The *Acārya* refutes this argument as follows :—

जाइस्सरो न विगओ सरणाओ बालजाइसरणो व्व ।

जह वा सदेसवत्तं नरो सरंतो विदेसम्मि ॥ १२३ ॥ (१६७१)

Jāissaro na vigaō saraṇāō bāljāisaraṇo vva ।

Jātismaro na vigataḥ saraṇād bāla-jāti-smaraṇa iva ।

Yathā vā svadēśavritam naraḥ smaran vidēśē. 123 (1671)]

Trans.—123 Like a person recollecting (his) childhood in old age) or recollecting in a foreign country the incident, (that happened) in his own country, the Soul who recollects the former existence, does not perish by virtue of (its power of) recollection. (1671)

टीका—इह यो जातस्सरो जीवः स प्राग्भविकशरीरविगमेऽपि सति न विगत इति प्रतिज्ञा । ‘सर्णाउ त्ति’ सर्णादिति हेतुः । यथा बालजातौ बालजन्मनि वृत्तं स्मरतीति बालजातिसरणो वृद्ध इति दृष्टान्तः । यथा वा, स्वदेशे मालवकमध्यदेशादौ वृत्तं विदेशेऽपि गतो नरः स्मरन् न विगतः । इदमुक्तं भवति—योऽन्यदेश—कालाद्यनुभूतमर्थं स्मरति सोऽविनष्टो दृष्टः, यथा बालकालानुभूतानामर्थानामनुस्मर्ता वृद्धाद्यवस्थायां देवदत्तः । यस्तु विनष्टो नासौ किञ्चिदनुस्मरति, यथा जन्मानन्तरमेवोपरतः । न च पूर्वपूर्वक्षणानुभूत-माहितसंस्कारा उत्तरोत्तरक्षणाः स्मरन्तीति वक्तव्यम्, पूर्व-पूर्वक्षणानां सर्व-निरन्वयविनाशेन सर्वथा विनष्टत्वात्, उत्तरोत्तरक्षणानां सर्वथाऽन्यत्वात् । न चान्यानुभूतमन्योऽनुस्मरति, देवदत्तानुभूतस्य यज्ञदत्तानुस्मरणप्रसङ्गादिति ॥ १२३ ॥ (१६७१)

D. C.—Here, the proposition is that the Soul that remembers former existence, cannot vanish even after the disappearance of the former body, by virtue of its *smaraṇaśakti*. Just as an old person who remembers his state of childhood does not himself perish even if childhood has vanished, or just as a person who recollects in a foreign country the incidents that happened in his own country, does not himself perish even if the incidents are no more existing, so, also, the Soul that remembers former existence does not vanish even if the body of former existence has already vanished. In short, one who recollects incidents that happened in former time and place, is *vidyamāna* (existing) like *Dēvadatta* who is able to recollect his experiences of childhood in old age. But, if he be only the *anusmartā* nothing can be recollected in the next life, as he himself is not alive in that existence.

Again, it is not correct to say that all experiences of former moments are recollected in the later moments, as former moments are absolutely separate from the later moments and they disappear as soon as their relations with the later ones disappear.

Lastly, one can never remember the experience of another. If it were so *Yajñadatta* would be able to remember the experience of *Dèvadatta*.

Tathāpi śarirādanyaḥ siddho vijñānasantānaḥ. 124 (1672)]

Trans.—124 Again, if you believe that (the soul) though transitory, remembers (the former existence) by virtue of its having a continuous range of knowledge, the continuous range of knowledge in that case also, has been proved to be distinct from body. (1672)

टीका—अथैवं मन्यसे त्वम्—क्षणिकोऽपि क्षणभङ्गुरोऽपि जीवः पूर्ववृत्तान्तं स्मरत्येव । कुतः ? इत्याह—विज्ञानानां विज्ञानक्षणानां संततिः संतानस्तस्या गुणस्तत्सामर्थ्यरूपस्तस्मादिति, क्षणसंतानस्यावस्थितत्वात् क्षणनश्वरोऽपि स्मरतीत्यर्थः । अत्रोत्तरमाह—ननु तथाप्येवमपि सति ज्ञानलक्षणसन्तानस्या-ग्नेतनशरीरसंक्रान्तेर्भवान्तरसद्भावः सिध्यति, सर्वशरीरेभ्यश्च विज्ञानसंतानस्ये-त्थमर्थान्तरता साधिता भवति, अविच्छिन्नविज्ञानसन्तानात्मकश्चैवं शरीरा-दर्थान्तरभूत आत्मा सिद्धो भवतीति । तदेवं परभवमङ्गीकृत्याविनष्टस्मरण-भावेदितम् ॥ १२४ ॥ (१६७२)

D. C.—*Vāyubhūti*.—Even though the Soul is *kṣaṇika*, it is able to remember the incidents of former life, because of the continuous range of the moments of *vijñāna*.

The *Acārya*:—Even in that case, the continuous range of

knowledge extends to the former life and hence its existence is also established in the former life. Thus, *viññānasantāna* is proved to be distinct from all bodies. Consequently, the Soul that contains this *viññānasantāna* would also be distinguished from body.

In this way, indestructibility of Soul, is apprehended to the expectation of another life. And the same could be established in connection with this life also.

Na ca sarvathaiva kṣaṇikam jñānam pūrvopalabdhasmaraṇāt ।

Kṣaṇiko na smarati bhūtam yathā janmānantaravinasthaḥ. (1673)]

Trans.—125 Or (*ca*), knowledge is not absolutely indurable (*kṣaṇika*) by (virtue of the power of) recollecting an object apprehended in the past. (For), one that is *kṣaṇika* is, like an object, perished after its very birth, not able to remember the past. (1673)

टीका—न च सर्वथैव क्षणिकं ज्ञानं वक्तुं युज्यते । कथञ्चित्तु क्षणिकतां भगवानपीच्छत्येव, इति “सर्वथैव” इत्युक्तम् । कस्मात् पुनर्ज्ञानं न क्षणिकम् ? इत्याह—पूर्वोपलब्धस्य बालकालाद्यनुभूतस्यार्थस्य वृद्धत्वाद्यवस्थायामपि स्मरणदर्शनात् । न चैतदेकान्तक्षणिकत्वे सत्युपपद्यते । कुतः ? इत्याह—“खणिओइ त्यादि” यः क्षणिको नायं भूतमतीतं स्मरति, यथा जन्मानन्तरविनष्टः, एकान्तक्षणिकं चेष्यते ज्ञानम्, अतः स्मरणाभावप्रसङ्ग इति ॥ १२५ ॥ (१६७३)

D. C.—*Jñāna* should never be said to be entirely *kṣaṇika*. It may be *kṣaṇika* to a certain extent. For, if knowledge were taken to be absolutely transient, there would be no recognition in old age of objects perceived in childhood, as in the case of one who is perished after its birth. Ultimately *smaraṇa* will not exist at all even if *jñāna* were taken to be *kṣaṇika* in every way.

Trans.—126. It is never reasonable to accept *vijñāna* (of an object) as *vijñāna* having all-pervading *kṣaṇikatā*, as it is one independant *vijñāna* exclusively connected with one moment (1674).

D. C.—According to the theory that there is one and only one continuous range of *vijñāna* to all living beings, the *Bauddhas* believe that *vijñāna* is *eka* (one) and *asahāya* (independent), and hence, it can never recognize all objects, as all objects would become *kṣaṇika* according to that theory. *Saugatas* (*Bauddhas*), however, try to establish *sarvakṣaṇikatā-vijñāna* by the help of statements such as “all that exists is *kṣaṇika*” and “all *saṃskāras*, are *kṣaṇika*” etc. Now, *jñāna* having all-pervading *kṣaṇiktā* is not possible at all. For, if one were able to produce such *jñāna* in presence of all objects in the universe, then only it could be apprehended that all these objects are *kṣaṇika*. But *jñāna* could never be produced by means of all those objects in that manner. For, how could *kṣaṇikatā* extended to all objects, be recognized when *jñāna* resorts to one and only one *ālambana*? In such cases, if all *jñānas* of all objects were taken to have been produced at the same time, and if *ātman* were accepted as the *anusmartā* of

all such *jñānas*, then and then only it would be possible to recognize the transitoriness of all objects. But simultaneous production of *jñāna* as regards all objects, is never possible, and hence, the apprehension of *sarvaksanīktāvijñāna* is also impossible.

Again, if *vijñāna* of an object were not to vanish soon after its birth, one might get an opportunity to apprehend *sarvaksanīkats*. For, in that case, *vijñāna* being contained within indestructibility, one could naturally remark at the destruction of all other objects that "every thing except us and those of our class, is *kṣanika*." But that is not possible. For, according to *Buddhistic* theory, knowledge being exclusively *kṣanika*, cannot last for a long time, and hence it is not possible to apprehend *ksanīktā* in case of all objects. Authentic knowledge should therefore be considered as *a-kṣanika*. This being a *guṇa*, it can never exist without a suitable resort *viz.*, *ātman*, which leads automatically to prove that soul is distinct from body.

Trans.—127 How could that (knowledge) which is restricted to its own self and scope, and which vanishes soon after its birth, understand qualities such as indurability etc., pertaining to the scope of *vijñāna* ? (1675).

D. C.—Pramātri jñāna (authentic knowledge) is restricted to its own self and scope. It is destroyed immediately after its own production. So, it could never understand a number of attributes e. g., transitoriness, subjectivity, and sense of happiness, misery etc., related to the subject of vijñāna.

Trans.—128 Again, it is not even proper to believe that *vijñāna* apprehends indurability of all (objects) by means of inference from its own self and scope. Because, *anumāna* is proper only with regard to the establishment of existence etc. (1676).

D. C.—An opponent may advance the following objection in this case—

Pramātrivijñāna though *kṣaṇika* and resorting to only one *ālambana*, is able to recognize *kṣaṇikatā* of its own self as well as sphere. For, just as the knowledge that we are *kṣaṇika* as our *viṣaya* is *kṣaṇika*, is common in other cases also, all other objects and their spheres should also be considered as *kṣaṇika*.

The argument stated above is not correct. *Svaviśayānumāna* can be applied only in case of establishing the the existence etc. of other *viññānas* and *viśayas*, and not otherwise. Just as in case of *śabda* etc., which are not accepted as existent, one could not establish properties like *anityatā* by reason of their mere constructive utility; so, in this case also, properties like *kṣaṇikatā*, could not be proved to exist in objects which are not known at all.

Moreover, *viññāna* which is said to be *kṣaṇika* and *ḍkālambana*, is not able to understand whether there are other *jñānas* and *viśayas*, and whether those *jñānas* and *viśayas* possess the property of producing *jñāna* of its own self and sphere. So, if such *jñāna* could not be produced and if the objects in which *kṣaṇikatā* is to be established, are not known, how could *kṣaṇiktā* be proved to exist at all ?

At this point, the opponent may argue that existence etc. of other *viññānas* could be established by the help of *svaviśayānumāna*. One would say in this case that "Just as I exist and my *viśaya* exists, other *jñānas* and their *viśayas* also exist, and just as I and my *viśaya* are *kṣaṇika*, other *jñānas* and their *viśayas* are also *kṣaṇika*." Thus, existence, as well as, *kṣaṇikatā* of all the objects could easily be established.

The above objection is entirely fallacious. *Jñāna* which apprehends *sarvakṣaṇikatā* is not able to recognize even its own self after its production on account of its being *kṣaṇika*—as good as dead. Thus, when it is not able to recognise its own self, how can it perceive that there are other *jñānas* and their *viśayas* also ? Such indurable *jñāna* does not recognize *kṣaṇikatā* of its own *viśaya*, because, according to them, that *jñāna* and *viśaya* vanish within equally short time. If that *jñāna* ascertains the *kṣaṇikatā* of its own *viśaya* from its disappearance within a short time before the *jñāna* itself dies away, then and then only would the *kṣaṇikatā* of its

viṣaya be recognized by it. But this argument is not accepted by *Bauddhas*. They believe that *jñāna* and its *viṣaya* disappear at the same time after being produced for a moment.

Moreover, according to *Saugatas*, *kṣaṇikatā* is recognized neither by means of self-perception, nor by the help of perception by sense-organs, but by means of *anumāna* only.

Jāniyāt vāsanā tu sāpi khalu vāsi-vāsanīyayoh ।
Yuktā samētya dvayorna tu janmānāntarahatsya. 129 (1677)]

Trans.—129 Again, (the opponent might argue that) desire could understand *sarvakṣaṇikatā*; but that also is in fact proper (only) because it is related to both—one that desires and the desired (object), and not in case of that which vanishes soon after (its birth). (1677).

टीका—स्यादेतत् पूर्वपूर्वविज्ञानक्षणैरुत्तरोविज्ञानक्षणानामेषभूता वासना जन्यते, यथाऽन्यविज्ञान-तद्विषयाणां सत्त्व-क्षणिकतादीन् धर्मानेकमेकालम्बनं क्षणिकमपि च विज्ञानं जानाति, अतः सर्वक्षणिकताज्ञानं सौगतानां न विक्रियते । तदप्ययुक्तम्, यतः सापि वासना वासक-वासनीययोर्द्वयोरपि समेत्य संयुज्य विद्यमानयोरेव युक्ता, न तु जन्मानन्तरमेव इतस्य विनष्टस्य । वास्य-वासकयोश्च संयोगेनावस्थाने क्षणिकताहानिप्रसङ्गः । किञ्च, सापि वासना क्षणिका, अक्षणिका वा ? । क्षणिकत्वे कथं तद्वशात् सर्वक्षणिकतापरिज्ञानम् ? । अक्षणिकत्वे तु प्रतिज्ञाहानिरिति ॥ १२९ ॥ (१६७७)

D. C.—Here again, the opponents may argue that the

earlier moments of apprehension create such a desire during the later moments of apprehension, that by means of that desire, even a *kṣaṇika vijñāna* having only one support is able to apprehend other *jñānas* and their *viśayas* having existence, transitoriness etc. as their qualities. Consequently, there is no harm in believing that all objects are *kṣaṇika*.

But even that is not correct. For *vāsanā* in the above case, could be applied only when it is related to *vāsaka* and *vāsantiya*; and hence, it could not be applied to the knowledge that vanishes immediately after its birth. Again, in accepting the *avasthāna* (retention) of *vāsyā* and *vāsaka* connected together, *kṣaṇikatā* itself would not exist. And, is that *vāsanā* *kṣaṇika* or *a-kṣaṇika*? If it were *kṣaṇika*, it would not be able to apprehend *sarvakṣaṇikatā*; and if it were *a-kṣaṇika*, the very proposition that everything is *kṣaṇika* would be violated.

So, the theory of *Bauddhas* that everything is *kṣaṇika* does not fit in, in any way.

Thus, having refuted the opponent's view, the *Acārya* now illustrates his own.

This would not happen only in case of *jīva*, having *vijñāna* which is *sthita* (settled), *sambhūta* (born), and *cyuta* (dropped), being accepted. D. C.—If *jñāna* were taken to be *kṣaṇika* as stated before, a number of *doṣas* would get in, in the following manner :—

1. In order that all the objects that pervade the three worlds should be recognized, a *kṣaṇikatā-vādin* ought to admit that all sorts of *jñānas* are produced at the same time, and the Soul that remembers the objects in which those *jñānas* are produced should be taken to stay on permanently. Otherwise, statements such as “Whatever exists is all *kṣaṇika*” “All *bhavas* are *kṣaṇika*” etc., that established *sarvakṣaṇikatā* would be futile.

Moreover, when more than one *jñāna* are accepted, the original theory of *ekavijñāna santati* has also been violated.

2. Again, if *kṣaṇa vijñāna* were accepted, another fault would also crop up. In this case, one and the same *vijñāna* would be able to recognize all the objects that exist in all the three worlds. But this could never happen, nor be believed.

3. In order to recognize a number of objects, *vijñāna* must be taken to last for a long time. As a result of this, *vijñāna* would be able to recognize the *kṣaṇikatā* of all, as they are *kṣaṇika* also. But by believing so, the Soul which is known as nothing but *vijñāna* would have to be accepted, and it would go against the original proposition.

4. Again, if the production of many *vijñānas* were not accepted, there would be violation of *pratītyavṛtti*. When *kāraṇa* is not anyhow apprehended in the state of *kārya*, *Bauddhas* call it the violation of *pratītyavṛtti*. As the production of a *kārya* depends upon a *kāraṇa*, this would give rise to *doṣa*. If *Bauddhas* were to accept this, processes such as that of

remembering the past incident-etc., would be abolished. Again, if the soul which is the abode of knowledge such as a number of past allusions etc, were believed to have been related to the *pariṇāma* in the form of *viñāna*, then also, the law of *pratityavritti* would be violated. For, by believing so, the Soul is taken as related to the *pariṇāma*.

Thus, in case *viñāna* is accepted as *kṣaṇika*, all the above mentioned faults would arise. But if the Soul possessing *viñāna* which is produced anyhow in the form of substance or in any other new equivalent form, and which has already ceased to exist as *viñāna*, the faults enumerated above would never arise. This proves that *ātman* that has utility, stability, and productivity for the sake of all *vyavahāra* is undoubtedly distinct from body. For, such an *ātman* possesses various *matijñāna-bhēdas* produced from various types of diminutions and relaxations of the *matijñāna* itself. These *bhēdas* are *kṣaṇika* on account of their wavering nature, and they are everlasting on account of their substantiality.

Again, by means of implication, the soul manifests various types of *jñāna* e. g. *śruta* (ascertained by intellect), *avadhi* (applied by intellect), and *manahparyāya* (mental perception) etc., are respectively produced from the knowledge ascertained, applied, and perceived by mind. 130-131-132 (1678-1679-1680)

The *Kēvala jñāna* or Absolute Knowledge is attained only when all its interruptions are warded off.

D. C.—The *aviśeṣitajñāna* or *sāmānyajñāna* of an object is the only everlasting offspring of its various expedients like cognizance of memory etc. But the Absolute cognizance which is said to be *ananta* and *avikalpa* by revered preceptors is attained only when it is free from all *āvaraṇas*. Thus *Kèvalajñāna* is *avikalpa* (*i. e.* positive and illusionless) because it lasts for ever and concerns the infinite object (*anan-tārtha*), 1681.

Here again *Vāyubhūti* raises a doubt, and the *Tīrthānkura* removes it.—

But again, *O. Gautama!* non-perception (*anupalabdhi*) is of two types :—1. Non-perception of a non-existent object like a *kharaśṅga* and 2. Non-perception of an existent object by reason of its distance etc. Non-perception of the Soul which is *karmānugata* is due to its exquisite formlessness (*sūkṣmā'mūrtatva*) (1682-1683).

D. C.—Vāyubhūti—If this soul is different from body, how is it that it is not seen entering or issuing forth from the body like a *caṭaka* (sparrow) from a *ghata* (vessel) ?

Bhagavan—Because of the two-fold *anupalabdhi*, O Gautama! the Soul is not perceived. These two types are —(1) *Anupalabdhi* of a non-existent object e. g. a *kharaśrṅga* (horn of an ass) and (2) *Anupalabdhi* of an existent object.

Now, for the non-perception of an existent object, there are *twenty-one* reasons.

i. *Atidūratva* (Extreme remoteness)—Places like *svarga*,

do exist. But as they are extremely remote, they are not perceivable.

- ii. *Atisannikarṣa* (Close vicinity)—Certain objects like eye-lashes and secretion of eyes, though existent, cannot be seen on account of their close vicinity.
- iii. *Atisaukṣmya* (Exquisite fineness)—*Paramāṇus* are imperceptible, because they are exquisitely fine. These *paramāṇus* are so minute in form, that they are not perceptible even to the naked eye, even though they are considered to be existent.
- iv. *Maṇḍnavasthāna* (Instability of mind)—Sometimes even a *mūrta* object is not apprehended by reason of *mano'navasthāna* or the instability of mind, as in the case of an insane man.
- v. *Indriyāpāṭatva* (Dullness of senses)—Non-perception arises also when a sense or senses are benumbed e. g. a deaf man.
- vi. *Matimāndya* (Dullness of intellect)—Certain subtleties of the *śāstras* are always *anupalabhya* to a dull-witted man, due to his *matimāndya*.
- vii. *Aśakyatva* (Impossibility)—One can never see his own ear, head, or back, as it is utterly impossible to do so.
- viii. *Āvaraṇa* (Obstruction)—When eyes are covered with hands or when hands are obscured by means of a mat or a wall, it is *āvaraṇa* that causes non-perception.
- ix. *Abhibhava* (Predominance)—Predominance of Sun in the sky, makes the stars *anupalabhya* on a sun-bright day.
- x. *Sāmānya*—(Commonness) When beans are mixed with beans of the same quality, there is non-aprehension of beans owing to the *sāmānyatva* present in both.

- xi. *Anupayoga* (Lack of Attention)—When an object is touched by a particular *indriya*, say, *Rūpa* (the sense of eye), it is not perceived by the rest of senses because of their *anupayoga* to the object.
- xii. *Anupāya* (Want of Means)—If a person wants to take an estimate of milk (contained) in a cow or a buffalo by means of *śrīṅga* etc., he can never do so, because there is no such means available.
- xiii. *Vismṛti*—(Forgetfulness)—An object perceived before, becomes *anupalabhya* afterwards by reason of *vismṛti*.
- xiv. *Durāgama*—(Wrong Instruction)—When an object like gold is presented in the style of a forged edict, it is not recognized in its true form, because there is *durupadēsa* or wrong instruction as regards its form.
- xv. *Moha* (Delusion)—Objects like *jīva* do exist, but they are not perceived due to *moha* (on the part of those who try to perceive them).
- xvi. *Vidarśana* (Absence of Sight)—is the absolute cause of *anupalabdhi* in the case of blind persons.
- xvii. *Vikāra* (Loss of Health)—Mostly, it so happens that things that are once perceived are not apprehended in later life on account of *vikāras* like *vārdhakya* (old age) etc.
- xviii. *Akriyā* (Want of Action)—There is non-perception of roots of trees because of the scarcity of actions like *bhūkhanana* etc.
- xix. *Anadhigama* (Non-acquisition)—Owing to the *anadhigama* of *śāstraśravaṇa*, the meaning of *Śāstras* becomes incomprehensible.
- xx. *Kāla viprakarṣa* (Remoteness of Time)—*Rṣabhadēva* and other *Tīrthankaras* of the past, and *Padma Nabha* of future cannot be recognized due to the remoteness of time.

xxi. *Svabhāvaviprakarṣa* (Natural Remoteness)—Things like *nabhas* and *piśa*† are non-cognizable by reason of their *svabhāvaviprakarṣa*.

In this way, *anupalabdhi* of an existent object takes place in twenty-one different ways.

So, *Jiva* is imperceptible like *nabhas* due to its *amūrtatā*; and *śarīra* being an assemblage of the *Kārman paramāṇus* is *anupalabhya* because of *śaukṣmya* of a *paramāṇu*. Thus, non-perception of the Soul and body, is positively the non-perception of an existent object and not of a non-existent one.

An argument may here be advanced that “If you take *Atman* to be existent, how do you apprehend its existence?” The reply is :—

The existence of *Ātman* is established by means of *anumāna*. And hence, its *anupalabdhi* is not the *anupalabdhi* of a non-existent object like a *kharasṛiṅga*, but it is the *anupalabdhi* of an existent object like *nabhas* and *paramāṇu*. Then, the distinction of Soul from body is established by the help of *Vēdavaçana*.

† The word *Piśa=ruru*, a kind of deer according to *Sāyaṇā-cārya*. The deer is called *Piśa* probably because it is *Piśa* (reddish) in colour. The *anupalabdhi* of the *Piśa* deer may be taken to be due to its nature of being always far away from human habitations. The word, however, seems rather improper when placed with *nabhas*. If we read *piśāca* instead of *Piśa*, it would suit our purpose better.—*Tr.*

Trans.—136 Or, if *jīva* is (believed to be) identical with *dēha* (the body), then, (obstruction of the) rites like *agnihotra* (the worship of sacred-fire) for a person aspiring for Salvation and the reward of munificence etc. (*dānādiphala*) in the world prescribed by the *Vēdas*, would be refuted. (1684).

भावे कस्यासौ स्वर्गो भवेत् ? इति भावः । दानादिफलं चानुभवितुरभावात्
कस्य भवेत् ? इति ॥१३६॥ (१६८४)

D. C.—O *Gautama* ! If each and every *śarīra* is believed to be identical with *jīva*, the commandment of the *Vēdas* that a person who desires to attain Salvation, should perform the rites of *Agnihotra*, would be null and void. Because, when body is reduced to ashes by fire in this world, the *jīva* being taken to be identical with body is also supposed to have vanished with the body. And then, who would attain Salvation when *jīva* itself does not exist ?

Similarly, who would be there to enjoy the fruits of good deeds like *dāna* when there would be none to receive them at all ?

Vāyubhūti entertains doubt as regards the distinction of Soul from body by hearing the various *Vēda-padas* bearing contradictory arguments. *Bhagavān Mahāvīra* interprets these *Vēda-padas* correctly and clears his doubt.

D. C.—That the Soul itself is “*vijñānaghana*” and that it is distinct from other *bhūtas* has already been discussed. It has already been said that.—

Sarīratayā pariṅato bhūtasamghāto'yam vidyamānakartrikaḥ ।
Adimatpratiniyatākāratvāt ghaṭavat, yaśca tatkartā sa tadatirikto

Moreover, sentences of the *Vēdas* that prove *Atman* to be *atirikta* from *bhūtas*, have not been beyond your comprehension. *e. g.*

† The real interpretation of sentences like “*vijñānaghana*” etc., has already been stated and discussed in the First *Vāda*. *vide* Vs. 1588-1595.

“ Satyèna labhyastapasā hyèṣa brahmacaryèṇa nityam jyotirmayo viśuddho'yam paśyanti dhīrā yatayaḥ saṃyatātmanāḥ ॥ ”

In the same way, all *Vèda-padas* have proved that *Jiva* is *atirikta* from *bhūtas*. Hence, you too, shall have to admit that, the Soul is distinct from *bhūtas*.

D. C.—This is your query—"Do the *pancabhūtas* viz. *Prithvi* (earth) *ap* (water), *tējas* (fire), *vāyu* (air) and *ākāśa* (ether) exist or not? This query is based upon your misapprehension of certain sentences of the *Vēdas*, that are mutually contradictory. The sentences are—

- (1) "Svapnopamam vai sakalamityeṣa brahmavidhiranjasā vijñeyaḥ" etc.
- (2) "Dyāvā-prithivī" etc. and
- (3) "Prithivī-dēvatā, āpo dēvatāḥ" etc.

Your interpretation of these sentences runs thus:—

All this world is nothing but a dream or illusion. So, one should honestly endeavour to know the *Brahma*, which is the the only *paramārthaparakāśa* worth attaining.

Such sentences refute the existence of the five elements while others like *Dyāvā prithivī* and "*Prithivī dēvatā, āpo dēvatāḥ*" establish the existence of those very elements. These contradicting sentences of the *Vēdas* have given rise to your doubt.

Really speaking, you have not understood the real purport of the above sentences. Here I give their correct interpretation. Listen to it.

And when you question the (existence of) elements (themselves), what to talk of objects like *jīva* etc.? You, being dubious about the existence of everything, believe the whole world to be (as unreal as) *māyā*. (1690-1691).

D. C.—Long-lived *Vyakta* ! You question the existence of *Bhūtas*. Just as, in a dream, a poor man sees before his own house multitudes of elephants, and horses, or treasures of jewellery and gold, but actually he does not possess them, and just as, under the illusion of the *Indrajāla*, precious things, *e. g.*, dishes (made) of gold, silver, jewels etc., or beautiful objects *e. g.*, parks, flowers, fruits etc., are perceived, but really speaking, they are not existing; in the same way, according your belief, *bhūtas* like *prithivī* are perceived by us; but as a matter of fact, they are unreal and illusory like objects seen in a dream or an *Indrajāla*. But this belief of yours, is absolutely unfounded.

Again, as you have a doubt in the existence of elements, the doubt is bound to arise in the case of *jīva*, *pāpa* and *punya* also. Because, these objects are contained in the various *vikāras* of the *bhūtas* themselves. It follows, therefore, that, according to you, all *bhūtas* like *Prthivī* and all *padārthas* (objects) like *jīva* are *a-vidyamāna* (non-existent). This indicates that you are *sarvaśūnyatāśaṅki* and according to you, the whole Universe is just like *svapna*, *māyā* or *Indrajāla*.

Now, *Śramaṇa Bhagavān Mahāvra* gives a number of arguments for doubts which *Vyakta* entertained in his mind:—

जह किर न सओ परओ नोभयओ नावि अन्नओ सिद्धी ।

भावाणमवेक्खाओ वियत्त ! जह दीह-हस्साणं ॥१४४॥ (१६९२)

D. C.—*Vyakta* ! Your argument is this —Complete attainment of (the existence of) objects is not possible either *svataḥ* or *parataḥ* or *ubhayataḥ* or *anyataḥ* as in the case of (the accomplishment of the existence of) the *hrasva* and *dirgha*, on account of there being *apèksikatva* (expectation) of the *Kārya Kāraṇādibhāvas* (*i. e.* relations like that of cause and effect) of the *padārthas*. Hence, each and every object is expected to be either *kārya* or *kāraṇa*. As every *kārya* is done by *kāraṇa*, its *kāryatva* is subjugated by *kāraṇatva*. But the *kāryatva* of a *kārya* is not *svabhāva-siddha* (self-accomplished).

Similarly, *kāraṇa* accomplishes *kārya*. So that, *kāraṇatva* of *kāraṇas* is subjugated by the *kāryatva* of *kārya*. But *kāraṇatva* also is not *svataḥ siddha*.

Now, one which is not *Svatahsiddha* by virtue of its own self cannot be accomplished by means of another also, as in the case of the horn of an ass. So, *kāryādibhāva* is accomplished neither by itself nor by another.

Again, it is improper to consider the possibility of *kāryādibhāvas* even by *sva* and *para* taken together. Because, since *siddhi* is not found in either of them separately, how could it be attained in the *samudāya* of the two? Take the example of oil and sand. When oil is not present in every single particle of sand, it is not found in the collection of sand also. Thus, the accomplishment of an object by means of *ubhaya* (both), is also impossible.

In case of accomplishment by means of *ubhaya*, there is another difficulty also. During the process of *siddhi*, so long as *kārya* is not accomplished, there is *kāraṇasiddhi* and so long as *kāraṇa* is not accomplished, there is *kāryasiddhi*. Consequently, *kārya* and *kāraṇa* depend upon each other, and hence, there is *itarètarāśrayadoṣa*, or the fault of affecting each other. Thus, it is clear that the *siddhi* of *kāryādibhāva* is not possible even if *sva* and *para* are taken together.

Nor even by any other means—*anubhayataḥ*—the *siddhi* is possible. For, there is no *vastu* (object) available except *sva*, *para* and *ubhaya* in this world. So, even if we presume the accomplishment of *bhāvas anyataḥ* or *anubhayataḥ* (i. e., by means of any object excepting *sva*, *para* and *ubhaya*), the *siddhi* would be *nir-hētika* (void of cause). To take an example, the *pradēsini* finger (next to thumb) looks *dīrgha* when compared with the thumb and *hrasva* when compared with the middle finger. But the finger by itself, is neither short nor long.

Since it is not *hrasva* or *dīrgha* by virtue of itself, it is not so by means of another object, nor by both taken together, nor by any extra means whatsoever. So it is said—

“ Na dīrghē'steeha dīrghatvam na hrasvē nāpi ca dvayē ।
Tasmādasiddham śūnyatvāt sadityākhyāyatē kva hi ? ॥

“ Hrasvam pratītya siddham dīrgham, dīrgham pratītya
hrasvamapi ।
Na kincidasti siddham, vyavahāravasād vadantyēvam ॥ ” (1692)

In support of the *prima faci* assertion that there is *sarva-śūnyatā*, a number of examples are given.

अत्थित्त-घट्टेगाणेगया व सर्वेगयाइदोसाओ ।
सव्वेणभिलप्पा वा सुण्णा वा सव्वहा भावा ॥ १४५ ॥ (१६९३)

Astitva-ghaṭṭaikānēkatā vā sarvaikatādidoṣāt ।
Sarvè'nabhilāpyā vā śūnyā vā sarvathā bhāvāḥ. 145 (1693)]

Trans.—145 Unity or distinction of *astitva* and *ghaṭṭa* would either give rise to faults like *sarvaikatā* (i. e. universal

oneness) or all the objects would become inexpressible (by word or speech) or non-existent in all respects. (1693).

टीका—नन्वस्तित्व—घटयोरेकत्वम्, अनेकत्वं वा ? । यद्येकत्वम्, तर्हि सर्वैकता प्राप्नोति—यो योऽस्ति स स घट इत्यस्तित्वे घटस्य प्रवेशात् सर्वस्य घटत्वप्रसङ्गः स्यात्, न पटादि पदार्थान्तरम् । घटो वा सर्वसत्त्वाव्यतिरेकात् सर्वात्मकः स्यात्; अथवा, यो घटः स एवास्तीति घटमात्रेऽस्तित्वं प्रविष्टम्, ततोऽन्यत्र सत्त्वाभावादघटस्य सर्वस्याप्यभावप्रसङ्गतो घट एवैकः स्यात् । सोऽपि वा न भवेत्, अघटव्यावृत्तो हि घटो भवति, यदा च तत्प्रतिपक्षभूतोऽघट एव नास्ति, तदा किमपेक्षोऽसौ घटः स्यात् ? । इति सर्वशून्यत्वमिति । अथ घट—सत्त्वयोरन्यत्वमिति द्वितीयो विकल्पः । तर्हि सत्त्वरहितत्वादसन् घटः, खरविषाणवदिति । अपिच, सतो भावः सत्त्वमुच्यते, तस्य च स्वाधारभूतेभ्यो घटादिभ्यः सद्भ्योऽन्यत्वेऽसत्त्वमेव स्यात्, आधारादन्यत्वे आधेयस्याप्यनुपपत्तेः । तदेवमस्तित्वेन सह घटादीनामेकत्वाऽन्यत्वविकल्पाभ्यामुक्तन्यायेन सर्वैकतादिदोषप्रसङ्गात् सर्वेऽपि भावा अनभिलप्या वा मवेयुः, सर्वथा शून्या वा स्युः, सर्वथैव तेषामभावो वा भवेदित्यर्थः । अपिच, यद् नोत्पद्यते तत्तावद् निर्विवादं खरविषाणवदसदेव, इति निवृत्ता तत्कथा । यदप्युत्पत्तिमल्लोकेऽभ्युपगम्यते, तस्यापि जाता-ऽजातादिविकल्पयुक्तिभिरुत्पादो न घटते, इति शून्यतैव युक्तेति ॥ १४५ ॥ (१६९३)

D. C.—(1) If *ghaṭa* and *astitva* are taken to be one, all objects will have to be taken as one. For, when *ghaṭa* is said to be *abhinna* from *astitva*, all objects that have existence will be called *ghaṭa*, and there will be no distinction of objects like *paṭa* etc. Thus, there will arise the difficulty of *sarvaikatā* or Universal one-ness. Moreover, *ghaṭa* will become a *sarva-*tmaka** or all-pervading object, since it is taken as inseparable from the *astitva* of all objects. Again, if *ghaṭa* is believed to be *astitva* itself, existence will be restricted to *ghaṭa* only. All other objects that are not *ghaṭa* will, in that case, have no existence. Consequently *ghaṭa* alone will exist.

Or, say, *ghaṭa*, too, will not exist according to this argument. Whatever is different from *a-ghaṭa* is called *ghaṭa*. Now, since *ghaṭa* and *astitva* go together, *a-ghaṭa* which is opposite to *ghaṭa* will also have no existence. Thus, *a-ghaṭa* does not exist. So, also, *ghaṭa* will not exist. For, in comparison with what, will the object be *ghaṭa* if *a-ghaṭa* is absent ?

Hence it is better to resort to *sarvaśūnyata*.

(2) Now, the second alternative that—*ghaṭa* is distinct from *astitva*—may be considered. If *ghaṭa* is *bhinna* from *astitva*, it is devoid of *astitva* also. For, *astitva* being the quality of existence, is the *ādhyā*, and *ghaṭa* which contains the quality is *ādhyāra*. *Adhyā* is not supposed to exist, when *ādhyāra* is away from it. So, *ghaṭa* is devoid of existence, and hence it is said to be *a-vidyamāna* like the horn of an ass.

Thus, the above discussion of unity or distinction of *astitva* and *ghaṭa* leads either to the difficulty of *sarvaikatā* or to the *anabhilāpyatva* and *śūnyatva* as regards each and every object.

Again, that which is not produced is undoubtedly *a-vidyamāna*, like the horn of an ass, and it has already been discussed before. With regard to objects that have been produced in this world, it can also be proved that their production is not in the fitness of things, if properly thought of.

Trans.—146 (An object) which has (already) been produced, or which is in both the conditions, or which is (in the state of) being produced, can never be produced on account of faults like disorder, non-entity or both So, it is non-existent.

टीका—इह तावद् न जातं जायते, जातत्वादेव, निष्पन्नघटवत् । अथ जातमपि जायते, तर्ह्यनवस्था, जातत्वाविशेषेण पुनः पुनर्जन्मप्रसङ्गात् । अथाजातं जायते । तत्रोत्तरमाह—“अभाव ति” सूचकत्वात् सूत्रस्य, तर्ह्यभावोऽपि स्वरविषाणलक्षणो जायताम्, अजातत्वाविशेषात् । अथ जाताजातरूपं जायते । तदप्ययुक्तम् । कुतः ? इत्याह—उभयदोषात् प्रत्येकोभयपक्षोक्तदोषापत्तेरित्यर्थः । किञ्च, एतज्जाताजातलक्षणमुभयमस्ति वा, न वा ? । यद्यस्ति, तर्हि जातमेव तत्, न पुनरुभयम्, तत्र चोक्तो दोषः । अथ नास्ति तथापि नोभयं तत्, किन्त्वजातमेव, तत्रापि चाभिहितमेव दूषणम् । नापि जायमानं जायते, पूर्वोक्तविकल्पद्वयानतिवृत्तेः, तथाहि—तदपि जायमानमस्ति न वा ? । यद्यस्ति, तर्हि जातमेव तत् । नास्ति चेत्, तर्ह्यजातमेव । पक्षद्वयेऽपि चास्मिन्नभिहित एव दोषः । उक्तं च—

इत्यादि । यस्मादेवम्, तस्मादनवस्थादिदोषप्रसङ्गेन वस्तूनामुत्पादायोगाज्जगतः शून्यतैव युक्तेति ॥ १४६ ॥ (१६९४)

D. C.—(1) An object which is once produced has not to undergo the process of production again, just as a *ghaṭa* which has already been *jāta* has not to be produced again. Even then if it is said that objects that have once been produced can be produced again and again, there would be *anavasthā*. Hence production of an already *jāta* object, is absolutely impossible.

(2) Again, if an *a-jāta* object is believed to be capable of being produced, objects like *kharaviṣāṇa*—that have never

been produced so far—should also be taken as capable of being produced. Because, *ajātatva* is present in *kharaviṣāṇa* also. But this is absurd. So, production of an *ajāta* object, is never possible.

(3) In the case of an object which is both *jāta* and *a-jāta*, the *utpatti* is not possible. Because *doṣas* that are found in each one of the above two cases separately, are certainly found in the combination of the two also.

Moreover, if an object which is *ubhayarūpa* is taken to be *vidyamāna* it becomes *jāta* and loses its *jātājāta ubhayarūpa*. Similarly, if it is *a-vidyamāna*, it cannot be called *ubhayarūpa*, but *anutpanna* only. Now, when it is *utpanna* or *anutpanna*, *doṣas* like *anavasthā* and *abhava* do arise.

(4) In the case of a *jāyamāna* object also, the above argument may be applied, and the *doṣas* like *anavasthā* and *abhava* arise in that case also, according as it becomes *jāta* or *a-jāta* due to its being *vidyamāna* or *a-vidyamāna*. So, production in this case is also impossible.

So, it is said,

“ Gatam na gamyatè tāvadagatam naiva gamyatè ।
Gatāgatavinirmuktam gamyamānam na gamyotè ॥ ”

Thus, in all the above-mentioned four *avasthās* of an object, it has been clearly pointed out that its *utpatti* is impossible. Hence, it is proper to believe in the Universal non-entity.

D. C.—An object is said to have been accomplished only when all *upsādana* and *nimitta* causes, are assembled together. But when each one of these causes operates separately, the *kārya* could never be accomplished. In other words, there is *abhāva* of the *kārya*, and ultimately there will be *sarvābhāva*. Again, in the midst of *sarvābhāva*, *sāmagrī* cannot exist. Consequently, there will be *sarvaśūnyatā*.

Moreover, just as oil cannot be found in the collection of sands when it is not present in each individual particle, so also *kārya* cannot be found in the combination of many *kāraṇas*, when it is absent in each individual *kāraṇa* separately.

Thus, when the existence and production of all *kāryas* are denied, the existence and production of *sāmagrī* are also denied. So here also, *sarvaśūnyatā* is the only resort of belief. Again, it is said that,

“Hētu-pratyayasāmagrī prthag bhāvèṣvadarśanāt ।
Tēna tē nābhilapyā hi bhāvāḥ sarvè svabhāvataḥ ॥”

“Lokè yavat sāmjñā samagryāmèva driśyatè yasmāt ।

D. C.—It has already been discussed that objects like *kharaviṣāṇa* do not exist, because they are non-perceptible. In case of perceptible objects like pillar, jar, wall etc., the rear and middle portions are not perceived; because they are screened by the front portion coming in their way. So, they are said to be *a-vidyamāna*.

Again, the front portion consists of a number of divisions. Out of all these divisions, every one is screened by the other coming in its immediate front, which again is screened by a third one in its immediate vicinity, and so on. Ultimately, the front-most particle is left unscreened. But it is extremely small in size, and hence becomes non-cognizable. Now, since the rear and front-most parts are non-perceptible, it can be said that objects—and ultimately all the objects in the Universe—are non-cognizable or *śūnya*. Moreover, it is said that,

“ Yāvad dṛiśyam parastāvad bhāgaḥ sa ca na dṛiśyatè ।
Tāna tè nābhilapyā hi bhāvāḥ sarvè svabhāvataḥ ॥ ”

So, you have a doubt in the existence of *Bhūta* etc., and according to your belief, they are non-existent. This finishes the *pūrvapakṣa* (the argument of the opponent).

Now follows the refutation of the argument—

मा कुरु वियत्त ! संसयमसइ न संसयसमुद्भवो जुत्तो ।
खकुसुम-खरसिंगेसु व, जुत्तो सो थाणु-पुरिसेसु ॥१४९॥ (१६९७)

Mā kuru Vyakta ! saṁśayamasati na saṁśayasamudbhavo yuktaḥ ।
Khakusuma-kharaśṛṅgayoriva yuktaḥ sa sthāṇu puruṣayoḥ. 149]

Trans.—149 *O Vyakta !* Do not entertain doubt. The doubt about non-existent (objects) is improper as in the case of *kha-kusuma* (flower of the sky) and *kharaśṛṅga* (horn of an ass). It is proper (only) with regard to (existent objects like) *sthāṇu* and *puruṣa*. (1697)

टीका—आयुष्मन् व्यक्त ! मा कृथाः संशयं—मा भूताभावं बुध्यस्व,

युक्तः । यदि पुनरसत्यपि वस्तुनि संदेहः स्यात् तदाऽविशेषेण खरविषाणा-
दिष्वपि स्यादिति भावः ॥ १४९ ॥ (१६९७)

D. C.—*O long-lived Vyakta !* Don't be dubious about the existence of *bhūtas*. Because the doubt about non-existent objects is totally unjustifiable as in the case of *kha-kusuma* and *kharaśṛṅga*, where *abhāva* is already fixed up. It can be

justified only in the case of existent objects like *sthāṇu* and *puruṣa*. But if you raise any doubt as regards a non-existent object, the doubt will be raised in the case of *kharaviṣāṇa* also, which, too is non-existent in general.

Śāṅkā na khapuṣpādiṣu viparyayo vā katham na bhavēt ? 150]

Trans.—150 Or, what special reason can there be in (entertaining) doubt about *sthāṇu* and *puruṣa* and not about *kha-puṣpa* (flower of the sky) etc., even in (the midst of) all-pervading non-entity? Or, why should not the reverse take place? (1698)

टीका—को वाऽत्र विशेषहेतुरुच्यतां यत्—सर्वाभावे सर्वशून्यतायाम-

D. C.—Even when there was all-pervading negation, on what special ground could you entertain doubt about existent objects like *sthāṇu* etc., and not about non-existent objects like *kha-puṣpa* etc.? If there is no *viṣeṣahētu* on which your belief is based, the *saṃśaya*, in general, may rise at all places. Or, in absence of clear explanation, reverse may be the case *i. e.* The doubt may arise about non-existent objects like *kha-puṣpa* etc., and not about existent objects like *sthāṇu* etc.

Trans.—151 The accomplishment of objects is (attained) either by (means of) visible evidence (*pratyakṣa*), or by inference (*anumāna*), or by documentary evidence (*āgama*). (But) in absence of all (such) evidences and topics, how could the doubt be justified? (1699)

टीका—यदा हि प्रमाणैरर्थानां प्रसिद्धिर्जाता भवेत् तदा कथञ्चित् कचिद् वस्तुनि संशयो युज्यते । यदा च सर्वेषां प्रमाणानां सर्वेषां च तद्विषयाणाम्- भावस्तदा कथं संशयोऽस्तु, संशयस्य ज्ञातृ-ज्ञेयाद्यर्थसामग्रीजन्यत्वात् ? । सर्वशून्यत्वे च तदभावाद् न संशयोद्भूतिः, निर्मूलत्वादिति भावः ॥ १५१ ॥ (१६९९)

D. C.—When the object is accomplished by means of *pramāṇas* (evidences), a doubt may arise in several objects to a certain extent. But when all such *pramāṇas* and *viśayas* are absent, how can the doubt exist? The doubt springs up from materials like *jñātā* and *jñeya*. But when everything is believed as *śūnya*, materials like *jñātā* and *jñeya* are not supposed to exist, and hence, the *saṃśaya* has also no reason to rise.

Yat saṃśayādayo jñānaparyayāstacca jñēyasambādham ।
Sarvajñēyābhāvē na saṃśayastēna tē yuktaḥ 152 (1700)]

Trans.—152 Since doubt etc. are the synonyms of *jñāna*, they are related to the *jñēya* (cognizable object) also. So, in absence of all *jñēyas*, your doubt has also no place (to exist). (1700)

टीका—यस्मात् संशय—विपर्यया—ऽनध्यवसाय—निर्णया विज्ञानपर्ययाः,

युक्तः । सति च संशयेऽनुमानसिद्धा एव भावाः ॥ १५२ ॥ (१७००)

D. C.—Since doubt, inversion (*viparyaya*), non-apprehension (*anadhyavasāya*), and affirmation (*nirṇaya*) are the (various) synonyms of knowledge, they are automatically connected with the cognizable also. Now, since everything is *śūnya*, nothing can be apprehended when there is nothing *jñēya*, there can be no *jñāna* and no *saṃśaya* also, as *saṃśaya* is nothing but a *paryāya* of the knowledge.

Still, however, if you insist upon entertaining doubt, *siddhi* of objects will have to be apprehended only by means of *anumāna* and not by virtue of perception, as there can be no perception on account of the absolute *abhāva* of everything.

Atha dr̥ṣṭāntamasiddham manyasē nanu saṃśayābhāvaḥ. 153(1701)]

Trans.—153 *O Saumya!* Because of (your) doubt (about them), those objects do exist as *sthāṇu* and *puruṣa*. But, again, if you believe the example (of *sthāṇu* and *puruṣa*) to be unaccomplished, existence of the doubt will be denied. (1701)

टीका-सौम्य ! सन्ति भवतोऽपि भावाः, संशयसमुत्थानात्, इह यत् संशय्यते तदस्ति, यथा स्थाणु-पुरुषौ; यच्चासद् न तत् संशय्यते, यथा खपुष्प-खरविषाणे । अथ स्थाणु-पुरुषलक्षणं दृष्टान्तमसिद्धं मन्यसे त्वम्, सर्वेषामपि स्थाणु-पुरुषादिभावानामविशेषेणैवासत्त्वाभ्युपगमात् । तदयुक्तम्, यतो ननु सर्वभावासत्त्वे संशयाभाव एव स्यात्, इत्युक्तमेवेति ॥१५३॥ (१७०१)

D. C.—O Saumya! The very doubt that you have raised against the objects, proves that the objects are *vidyamāna* as *sthāṇu* and *puruṣa*. For, there cannot exist any doubt about non-existent objects like *ākāśapuspa* and *kharaviṣāna*.

Again, if you think that the above example of (the existent objects like) *sthāṇu* and *puruṣa* is wrong, you are not justified. For, in that case, all objects whether *vidyamāna* as *sthāṇu* etc, or *a-vidyamāna* as *khapuspa* etc, will have to be considered as *a-vidyamāna* according to your belief. So, when the existence of each and every object will be denied, naturally the existence of doubt will also be denied.

Sarvābhāvè'pi mataiḥ saṃśayaḥ svapnaka iva, no tacca ।

Yat smaraṇādinimittāḥ svapno na tu sarvathā'bhāvaḥ. 154 (1702)]

Trans.—154 It is improper to believe that inspite of all-pervading negation, doubt does spring up in a dream. For, a dream consists of (a number of) *nimittas* like remembrance etc., and it is not absolutely non-existent. (1702)

टीका—स्यान्मतिः परस्य—सर्वाभावेऽपि स्वप्ने दृष्टः संशयः, यथा किल कश्चित् पामरो निजगृहाङ्गणे “ किमयं द्विपेन्दो महीध्रो वा ? इति संशेते, न च तत् तत्र किञ्चिदप्यस्ति, एवमन्यत्र सर्वभावाभावेऽपि संशयो भविष्यति । तच्च न, यद् यस्मात् स्वप्नेऽपि पूर्वदृष्टानुभूतस्मरणादिनिमित्तः संदेहः, न तु सर्वथा भावाभावेऽसौ कापि प्रवर्तते । अन्यथा हि यत् षष्ठभूतादिकं क्वचिदपि नास्ति तत्रापि संशयः स्यात्, विशेषाभावादिति । ननु किं स्वप्नोऽपि निमित्तमन्तरेण न प्रवर्तते ? । एवमेतत् ॥ (१७०२)

D. C.—In support of the belief that doubt springs up even in *Sarvābhāva*, an opponent may advance an argument as follows : Just as in a dream, a poor pauper raises a doubt and questions whether there is an elephant or a mountain before his house, though, in fact, nothing exists like that; so, also, at other places, doubt can be raised in spite of the absolute *abhāva* of things. Thus, we can say that even though there is *sarvābhāva*, *saṃśaya* does exist in a dream.

But the above argument is totally groundless. In a dream, doubt arises on account of various reasons. Say, for instance, when an object is seen or experienced, the remembrance of that experience etc., gives rise to the doubt. So, for the rise of doubt in the dream, there is some sort of reason which brings the dream—and hence the doubt—into existence. Thus, doubt arises from an existent object and not from the absolute *abhāva* of it.

But, suppose, even then, if you believe that the *saṃśaya* springs up from the absolute *abhāva* also, the doubt should

also have to arise from objects like sixth element which have never been existent so far. Because, *abhāva* is present in them also.

Trans.—155 (Previous) experience, observation, attentive consideration, and hearing (of an object), ill-health (*prakṛti-vikāra*), a deity, watery place, meritorious act, and sin—these are the prominent causes (*nimittas*) of dream. So it is not non-existent. (1703)

टीका-स्नान-भोजन-विलेपनादिकमन्यदाऽनुभूतं स्वप्ने दृश्यते, इत्यनुभूतोऽर्थः स्वप्नस्य निमित्तम् । अथवा, करि-तुरगादिकोऽन्यदादृष्टोऽर्थ-स्तन्निमित्तम् । विचिन्तितश्च प्रियतमालाभादिः । श्रुतश्च स्वर्ग-नरकादिः । तथा, वात-पितादिजनितः प्रकृतिविकारः स्वप्नस्य निमित्तम् । तथा, अनु-कूला प्रतिकूला वा देवता तन्निमित्तम् । तथा, अनूपः सजलप्रदेशः । तथा पुण्यमिष्टस्वप्नस्य निमित्तम् । पापं चानिष्टस्य तस्य निमित्तम्, न पुनर्वस्त्व-भावः । किञ्च, स्वप्नोऽपि तावद्-भाव एव । ततस्तस्यापि सत्त्वे कथं “ शून्यं जगत् ” इति भवता प्रतिज्ञायते ? ॥१५५॥ (१७०३)

D. C.—The *nimittas* that bring dream into existence are treated as follows:—

1. *Previous experience*—Certain acts like *snāna*, *bhōjana*,

vilepana etc. that have once been experienced are perceived again in dream due to this reason.

2. *Observation*—When objects like elephants, horses etc., are perceived in dream, the dream is said to have been caused by the *dr̥ṣṭārtha* reason.

3. *Attentive Consideration*—A dream representing acquisition of a beloved etc., is called the dream of *cintitārtha*.

4. *Hearing*—When places like *svarga*, and *naraka*,—which are only heard of, and not seen—are perceived in dream, the *nimitta* is *śr̥tārtha*.

5. *Distrubance of Health*—Ill health caused by diseases like *vāta* and *pitta*, is also one of the *nimittas* of dream.

6. *A deity*—When one beholds a deity—adverse or favourable—in dream, the dream can be called *dēva-nimitta*.

7. *Watery place*—This is also one of the *nimittas* when one dreams in the midst of watery region.

8.-9. *Punya* and *pāpa*—A dream is said to 'be good or bad according as there is *punya* or *pāpa* as its *nimitta*.

Thus, it is clear that a *svapna* is brought about by one of the above-mentioned *nimittas*. And hence, *svapna* is nothing but an object which can be brought into existence by means of one or more *nimittas*. In this way, when the dream itself is existent, how can you call the world to be non-existent like *svapna* ?

Athavā vihitanimitto ghaṭa iva naimittikatvat. 156 (1704)]

Trans.—156 The existence of dream is (apprehended) either because dream is *vijñānamaya* (*i. e.* full of knowledge) like the knowledge of *ghaṭa*, or because it is *naimittika* (*i. e.* caused by *nimitta*) like *ghaṭa* as mentioned before. (1704)

D. C.—Existence of dream can be proved in either of these two ways:—

1. Dream is full of cognizance as *ghaṭa* is. So, like *ghaṭa*, dream can also be perceived on account of its being existent.

2. As *ghaṭa* is caused by various *nimittas*, dream is also caused by *nimittas*, like *anubhava*, *smaraṇa*, *cintana* etc., that are mentioned before. So, it is clear that dream is a *mūrta kārya*, and hence existent like *ghaṭa*.

D. C.—If the idea of all-pervading negation were taken as true, there would not exist any distinction between dream and reality; truth and falsehood; between an imaginary *Gandharvapura* and a real *Pātaliputra*; between a natural four-legged lion and an artificial man-lion *Māṇavaka*; between *kāryas* like *ghaṭa*, etc., and *kāraṇas* like lump of earth etc., Again, there would be no distinction between *sādhya* (say, e. g. *anityatva*) *sādhana* (say, e. g. the artificial instrument-by means of which *anityatva* is brought about) and *kartā* (e. g. a potter) who is the doer of the *sādhya*. There would be no distinction between a speaker, his speech (composed of three or five parts), and a number of words that are to be uttered, and there would be no distinction between *svapakṣa* and *paranākṣa* also.

Moreover, properties such as stability of earth, fluidity of water, activeness of wind, formlessness of sky etc., as well as, the rule that *śabda*, *rūpa*, *gandha* etc., are *grāhya* and ears, eyes, nose etc., are *grāhaka*, could not be established in the midst of *sarvaśūnyatā*.

Again, in the midst of all-pervading negation, there being no possibility of distinction between *satya* and *asatya* either (1) there would be uniform apprehension of *svapna* as well as *asvapna*, or (2) there would be inverse apprehension of *svapna* as *asvapna* and *asvapna* as *svapna*, or (3) there would be absolute non-apprehension of *svapna*, *asvapna* and many other things. Here, *O Vyakta* ! It is absolutely incorrect to assert that the apprehension of *svapna*, *asvapna* etc., is due to *bhrānti* (delusion). For, cognizance that apprehends an object is produced only by means of definite ascertainment of time, place, and properties.

And is that *bhrānti*, which, according to you, apprehends *svapna*, *asvapna*, etc., *vidyamāna* or *a-vidyamāna*? If it is *vidyamāna*, then naturally *sarvaśūnyatā* does not exist. If it is *a-vidyamāna*, the *jñāna* that apprehends an object being devoid of *bhrānti*, all objects would automatically be taken as *vidyamāna* and there would be nothing like *sarvaśūnyatā* at all.

And, how is it *O Vyaktā* ! that the apprehension of existent objects as *śūnya*, is according to you, a right apprehension and that which apprehends them as *vidyamāna* is worthless? Will you tell me what particular purpose do you hold in believing this *sarvaśūnyatā*?

According to the rule that objects could never be accomplished merely by themselves, you apprehend objects that are short, long, or either, distinctly as short, long, or either. Thus on one side, you are utilizing your power of discrimination in the apprehension of objects; while on the other side, you are trying to assert the mutual non-accomplishment of those very

objects. This involves self-contradiction in your own argument, which, *O Vyakta!* is not at all worthy of you.

The point is that in case of establishing the existence of objects, mere *apèkṣā* would not do. Quality of undertaking an action in an object which produces *jñāna* about its own self, is also an active cause. And that is the reason why *hrasva*, *dīrgha*, and *ubhaya*—each one of which would be producing *jñāna* about its own self—should be taken as existing.

Again, *O Vyakta!* you believe that compared to the middle finger, the *pradèsint* finger is considered as *hrasva* even if it does not exist. But your argument is absolutely unfounded. For, in comparison with the middle finger, if *pradèsint* were taken as *hrasva* even though it is *a-vidyamāna* by its very nature, the horns of an ass that are also *a-vidyamāna* should be taken as *hrasva* and a very long substance like *indrādhvaja* should also be taken as *hrasva*, as the quality of *a-vidyamānatā* is common in all the three cases. But that is not so. Really speaking, *pradèsint* finger being *vidyamāna* by nature and being possessed of a number of properties by virtue of various co-operative causes, manifests manifold variations along with the corresponding types of cognizance also. So, it is not correct to assert that the cognizance of *hrasva*, *dīrgha* etc., is produced in the absolutely non-existent *āṅgulī* only by means of *apèkṣā*. You might argue at this point that in such cases also, *dīrgha*, *hrasva*, *ubhaya* etc., are apprehended, and the intellects as regards *sva*, *para*, and *ubhaya* are discriminated only in comparison with another's opinion, and further that according to you, *hrasva*, *dīrgha* etc., that are *svataḥsiddha* and that produce *jñāna* with regard to their own selves, are nothing at all. Even if you believe like that, *O Vyakta!* how would you distinguish between your opinion and another's opinion in the midst of all-pervading negation? Naturally, there would be no distinction between *sva* and *para* at all. On the other hand, if you accept this distinction, there would be nothing like *sūnyatā* at all. (1705-1709)

D. C.—Consider whether *jñāna* in case of objects that are *hrasva* and *dīrgha* is produced at the same time or in regular course. If both the *jñānas* are produced simultaneously, there would be no scope for *apēkṣā*, both being recognized in their own form at the same time. On the other hand, if *jñānas* of the two, were produced one after another, the *hrasva* object would be apprehended by virtue of its own *jñāna*; but later on, to whose *apēkṣā* would the *dīrgha* object be apprehended? This leads us to conclude that, in spite of the existence of mediums like eyes etc., in absence of *apēkṣā*, all objects are apprehended in various forms only by virtue of their individual *jñānas*. This proves that the existence of all objects, is very natural.

Again, to whose *apēkṣā* is the *jñāna* attained by a child immediately after its birth, produced? And, what mutual *apēkṣā* could there exist in reflecting a similar cognizance in two similar objects which are neither *hrasva* nor *dīrgha* but exactly identical to each other? This shows that various forms of objects like fingers etc., are not apprehended by

virtue of their *apèkṣā* to others but by means of their corresponding cognizances which are independent of *apèkṣā*. Later on, in the curiosity of observing the forms in details, the objects are recognized as *hrasva*, *dīrgha* etc., on account of certain co-operative causes such as recalling the opposite faction etc. Each and every object would, therefore, be taken as existent by virtue of no other factor but its own *svabhāva*.

D. C.—If everything is *sūnya*, according to the theory of *sarva-sūnyatā*, how is it that the cognizance of *dirgha* is acquired only from its *apèkṣā* to *hrasva*, as seen in the case of *pradèśinī* and *madhyamā* fingers, and not from its *apèkṣā* to the *dirgha* itself? Similarly, why is the practice of apprehending *dirghatva* from *dirgha*, and *hrasvatva* from *hrasva* not followed? Moreover, the practice of acquiring knowledge of *khapuspa*, as well as, the knowledge of *hrasvatva* and *dirghatva* in *khapuspa* from the *khapuspa* itself, is not followed even though *sūnyatā* is common to all of them. This shows that there is nothing like *sarvasūnyatā* in this world.

Trans.—165 Or, of what avail is the *apèkṣā* at all? (The opponent may argue here that) “Apprehension by means of *apèkṣā* is natural.” (But) the existence of one's own self means *svabhāva*; (and) that does not apply to the son of a barren woman. (1713)

(१७१३)

D. C.—If there is absolute negation in the world, what is the use of *apèkṣā* in apprehending *hrasva* etc., to the *apèkṣā* of *dīrgha* etc.? For, the very conception of *apèkṣā*, is contrary to the absolute negation.

Vyakta:—Apprehending *hrasva*, *dīrgha* etc., by means of *apèkṣā*, is very natural.

Acārya —That is not so, *O Vyakta!* *Svabhāva* is the root-cause in cases like “fire burns” “the sky does not burn” etc. But, that is not applicable to the above-named example of the apprehension of *hrasva*, *dīrgha* etc. Hence, *svabhāva* should not be blamed in such cases. It is absurd to assume *svabhāva* in the apprehension of non-existent objects like *vandhyāputra*.

Svabhāva means existence of one's own self. The rest can be distinguished as *parabhāva*—the existence of everything else. Apart from your belief in *apèkṣā*, the principle of *sarva-śūnyatā* would be violated even from this point of view.

D. C.—By virtue of its *apèkṣā* to another object, a self-
accomplished object would again be either *vijñāna* or the acknow-
ledgment of its own self as *hrasva* or *dirgha* and nothing more.
Neither existence nor qualities such as *rūpa*, *rasa*, *sparsa* etc.,
that are distinct from *hrasvatva*, *dirghatva* etc., could be
established by the help of *apèkṣā*. Now, *jñānas* that enable
us to apprehend existence along with those qualities, are
produced spontaneously. So, how could existence etc., of a
self-accomplished object be refuted by means of *apèkṣā*? And
when the existence etc., of an object, are not denied, how
could the principle of all-pervading negation be accepted
at all ?

Trans.—167 Otherwise, in the absence of *hrasva*, there should have been an absolute negation of *dīrgha* also. But that is not so. Hence, the existence etc., of *ghaṭa* etc., are (established as) independant of (their) *apèkṣā* (to other objects). (1715)

टीका—इतरथा—यदि घटादीनां सत्तादयोऽप्यन्यापेक्षया भवेयुः, तदा ह्रस्वाभावे ह्रस्वस्य सर्वविनाशो दीर्घस्यापि वस्तुनः सर्वविनाशः स्यात्, ह्रस्वसत्तापेक्षित्वाद् दीर्घसत्तादीनाम् । न चैवमसौ दीर्घस्य सर्वविनाशो दृश्यते । तस्मात् निश्चीयते—सन्त्यन्यानपेक्षा एव घटादीनां सत्ता—रूपादयो धर्माः, तत्सत्त्वे चापास्ता शून्यतेति ॥ १६७ ॥ (१७१५)

D. C.—If the qualities like existence etc., of the objects such as *ghaṭa* etc, were dependant upon their comparison with other objects, destruction of a *hrasva* object would have effected the destruction of a *dīrgha* object also. But really speaking, existence etc, of a *dīrgha* object, are not denied when a *hrasva* object turns into an absolute negation. This leads us to the conclusion that objects like *ghaṭa* etc., have their properties such as existence, *rūpa*, etc., totally independant of their *apèkṣā* to other objects, and hence, the idea of all-pervading negation is automatically refuted.

Trans.—168-169-170 Even *apèksā*-being identical to (the nature of) action (*apèkṣaṇam*), agent (*apèkṣaka*), and object (*apèkṣaṇiyam*)—could not be accepted. When all are existing, there could not be *śūnyatā* at all. some are spontaneous *e. g.*, a cloud; some (are produced) by means of others as in the case of *ghaṭa*; and Some (are produced) in both the ways. *e. g.* a man; while some are produced even for ever. Again, it is certain that each one (of them), becomes existent by its own self, only by resorting to the external

causes. (But) that which is non-existent is not produced even in the presence of external causes. (1716-1717-1718)

D. C.—Consideration of *dirgha* etc., in comparison with *hrasva* etc., is itself nothing but *kartā*, *karma*, and *kriyā*. Now, when all objects are accomplished as existent by virtue of their being either *kartā*, *karma* or *kriyā*, where could the *sūnyatā* exist at all ?

The existence of all objects is either *svataḥ*, *parataḥ*, or *ubhayataḥ*. There are several objects such as cloud etc, which come into being only by coming into contact with some substance as their *kāraṇa*; some, like *ghaṭa* are produced by the help of *kārtā*, some, like *puruṣa* are produced by both (as *puruṣa* comes into existence on account of his parents as well as, his deeds in the past life). Some objects like *ākāśa* are ever-accomplished. Thus, it is seen that various objects come into existence in various ways, according to their usage. But, really speaking, all objects are existing by their very *svabhāva* merely by resorting to their external causes. In case of objects that are non-existent, existence could not be brought

about even if the external causes were present, because non-existence is innate in them by their very *svabhāva*.

In reply to the question whether *astitva* and *ghaṭa* are one or different, the *Ācārya* argues thus —

अत्थित्त-घडेगाणेगया य पज्जायमेत्तच्चित्तेयं ।

अत्थि घडे पडिवन्ने, इहरा सा किं न खरसिंगे ? ॥१७१॥ (१७१९)

Astitva-ghaṭaikaṅkatā vā paryāyamātracintèyam ।

Asti ghaṭè pratipannè, itarathā sā kim na kharaśrīṅgè. 171]

Trans.—171 (The question) whether *ghaṭa* and *astitva* are one or different, is (nothing but the question) of synonym when *ghaṭa* is existent. (For,) otherwise, why should it not arise in case of *kharaśrīṅga* (also) ? (1719)

टीका—इह “अस्ति घटो न तु नास्ति” इत्येव प्रतिपन्ने सति तदनन्तरमेवास्तित्व-घटयोः “किमेकता, अनेकता वा ?” इत्यादिना घटास्तित्वयोरेकत्वा-ऽनेकत्वलक्षणपर्यायमात्रचिन्तैव भवता कृता भवति, न तु तयोरभावः सिध्यति । अन्यथा ह्यभावरूपाविज्ञेषाद् यथा घटा-ऽस्तित्वयोः, एवं खरविषाण-वन्ध्यापुत्रयोरप्येकत्वा-ऽनेकत्वचिन्ता भवतः किं न प्रवर्तते ? इति ॥ १७१ ॥ (१७१९)

D. C.—After having asserted that “*ghaṭa* exists” the question whether *ghaṭa* and *astitva* are identical or not, is reduced to the consideration of both as being mere synonyms of each other. Moreover, this question should arise only in case of the existent *ghaṭa*. For, if it were not so, the question of *ekata-anekata* would arise in case of non-existent objects like *kharaśrīṅga* and *vandhyāputra* also.

Following the example of *ghaṭa* and *astitva*, there would be a probability of *ekatā-anekatā* between *ghaṭa* and *sūnyatā* also—

Trans.—172 Even in case of *ghaṭa* and *sūnyatā* being different (from each other), what *sūnyatā*, exceeding *ghaṭa* could be (found), O *Saumya*? In case of similarity also, it is the *ghaṭa* itself (which exists) *Sūnyatā* does never become the property of *ghaṭa*. (1720)

टीका—ननु घट-शून्यतयोरप्यन्यता, अनन्यता वा ? । यद्यन्यता, तर्हि “ सुन्नया का घडाहिया सोम्म ! ति ” सौम्य व्यक्त ! शून्यता का घटाधिका नाम ?—ननु घटमात्रमेव पश्यामः, न पुनः क्वचित् शून्यता घटादधिका समीक्ष्यते । अथानन्यता, तथापि सति घटशून्यत्वयोरेकत्वे घट एवासौ युज्यते, प्रत्यक्षत एवोपलभ्यमानत्वात्, न तु शून्यत्वं नाम कश्चित् तद्धर्मः, सर्वप्रमाणैरनुपलब्धेरिति ॥१७१२॥ (१७२०)

D. C.—If *ghaṭa* and *sūnyatā* are *bhinna* from each other, exceeding *ghaṭa*, what more *sūnyatā* ! is required, O *saumya* ! In case of both being similar to each other, *sūnyatā* would be nothing but *ghaṭa* on account of its being perceived by *pratyakṣa pramāṇa*. But *sūnyatā* would never become a property of *ghaṭa* as it could never be accomplished by any possible means whatsoever.

Trans.—173 (If) knowledge and speech are identical, then, its existence is proved. (But) in case of difference, how could there be a disputant having no knowledge or speech ? (1721).

टीका—“ शून्यं सर्वमेव विश्वत्रयम् ” इत्येवंभूतं यद् विज्ञानं वचनं च, तेन-सह शून्यवादिनो भवत एकत्वम्, अनेकत्वं वा ? यद्येकत्वम्, ततस्तदस्तिता वस्त्वस्तिता सिद्धेति कुतः शून्यता, वृक्षत्व-शिशपात्वयोरिवैकत्वस्य वस्तुत्वाद् ? । अन्यत्वे तु विज्ञान-वचनयोरज्ञानी निर्वचनश्च वादी कथं शून्यतां साधयेत्, शिलासंघातवत् ? इति ॥१७३॥ (१७२१)

D. C.—When the knowledge, as well as, the statement that all the three worlds are *sūnya*, are identical to each other, the existence—and not the *sūnyatā*—of an object is established. For, their identity is similar to the identity of *vriksatva* and *śinsapātva*. But when *vijñāna* and *vacana* are dissimilar, the disputant will either become ignorant or speechless like a rock, and hence will be totally unfit to expound the theory of *sūnyatā*.

Trans.—174 Existence of *ghaṭa* is a property of *ghaṭa*. So, (it is) non-separable (from *ghaṭa*), (and) distinct from *paṭa* etc. By saying, therefore, that “It exists”, how could you frame a rule that there exists *ghaṭa* alone ? (1722)

टीका—घटास्तित्वलक्षणा घटसत्ता घटस्य धर्मः, स च ततो घटादनन्योऽभिन्नः, पटादिभ्यस्तु सर्वेभ्योऽपि भिन्नः । तेन ततो “घटोऽस्ति” इति भणिते ‘घट एव’ इति “घट एवास्ति” इति कोऽयं नियमः ?—निजनिजसत्तायाः पटादिष्वपि भावात् तेऽपि सन्त्येवेति भावः ॥१७४॥ (१७२२)

D. C.—*Astitva* is the property of *ghaṭa*, and hence, it is non-separable from *ghaṭa* but distinct from objects like *paṭa* etc. So, when it is said that “*ghaṭa* exists”, you cannot assert that *ghaṭa* alone exists. For, the property of *astitva* is present in objects like *paṭa* also, and hence they too are existing.

Trans.—175 Or, by saying that whatever exists is *ghaṭa*, how would the occasion of all being *ghaṭa* arise ? Or, by

asserting that *ghaṭa* exists, how would the existence of all be obstructed ? (1723).

टीका—“ यद् वा प्रोक्तम्—यद् यदस्ति तत्तत् सर्वं घटः ” इति, तत्र कौशल्यं सर्वघटताप्रसङ्गः ? । तथा, “ यो घटः स एवास्ति ” इत्यप्युक्ते कथं सर्वास्तित्वावरोधः—कथं घटस्य सर्वात्मकत्वम् ? इत्यर्थः । यदा हि घटसत्ता घट एवास्ति नान्यत्र, तदा “ यत्र यत्र घटास्तित्वं तत्र तत्र घटः ” इति न कश्चित् सर्वेषां घटताप्रसङ्गः, तथा, “ घटसत्त्वेन घट एवास्ति ” इत्येतस्मिन् अप्युक्ते न किञ्चिद् घटस्य सर्वात्मकत्वं प्रतीयत इति भावः ॥ १७५ ॥ (१७२३)

D. C.—Since the *astitva* of *ghaṭa* is restricted to *ghaṭa* alone, and since *ghaṭa* exists only when *ghaṭast'itva* is present, there would be no fear of all objects being considered as *ghaṭa* when we say that “ *yad yad asti, tat tat sarvam ghaṭaḥ* ” Again, *astitva* of other objects would not be injured by the assertion that *ghaṭa* exists. For, the all-pervading nature of *ghaṭa* is not apprehended when we say “ *ghaṭasattvèna ghaṭa èva asti.* ” 175 (1723).

After refuting the opponent's view in this way, the *Ācārya* is now asserting his own—

अत्थि त्ति तेण भणिए घडोऽघडो वा घडो उ अत्थेव ।

चूओऽचूओ व दुमो चूओ उ जहा दुमो नियमा ॥१७६॥ (१७२४)

Cūto'cūto vā drumaścūtastu yathā drumo niyamāt. 176 (1724)]

Trans—176 Just as from the assertion of “tree” (we understand) a mango tree or any other tree, but from “mango tree” (nothing else but) “tree” is understood, in the same way, by saying that “it exists”, *ghaṭa* or (objects) other than *ghaṭa* (are apprehended), but from ‘*ghaṭa*,’ *astitva* alone is understood. (1724)

टीका—येन कारणेन घटसत्ता घटधर्मत्वात् घट एवास्ति पटादिभ्यस्तु भिन्ना, तेन तस्मात् “अस्ति” इत्युक्ते घटः, अघटो वा—पटादिर्गम्यते, निजनिजसत्त्वस्य सर्वेषु पटादिष्वपि भावात् । “घटो उ अत्येव ति” घट इति तु प्रोक्तेऽस्त्येवेति गम्यते, निजसत्त्वस्य नियमेन घटे सद्भावात् । अत्र यथासंख्यमुदाहरणद्वयम् । यथा “द्रुमः” इत्युक्ते चूतः, अचूतो वा निम्बादिर्गम्यते, द्रुमत्वस्य सर्वत्र भावात् । “चूतः” इति तु निगदिते द्रुम एव गम्यते, अद्रुमस्य चूतत्वायोगादिति ॥ १७६ ॥ (१७२४)

D. C.—As the quality of *vriksatva* is present in all the trees, when we say “tree” all the trees—whether a mango tree or any other tree—are understood. But when the word “mango tree” is spoken, *vriksatva* alone is understood. For, the mango tree cannot exist without being a *vriksa*. Similarly, here also, existence of *ghaṭa* being the quality of *ghaṭa*, is present in *ghaṭa* only and nowhere else, while the common property of *astitva* is present in all objects. So, when we say ‘*asti*’, all objects whether *ghaṭa* or *paṭa*—are recognized, as each one of them has its own property of existence. But when we say “*ghaṭa*” *astitva* alone is apprehended, because *ghaṭa* has its own *sattā*.

Now, the *Acārya* replies to the argument that what has already been produced, could not be produced, and so on—

D. C.—Tell me *O Vyakta* ! what object, according to you, could be proved as *jāta* when it has already been denied production as *jāta*, *a-jāta* or both ? If anything that has been produced, is accepted by you, *sūnyatā* would be denied on account of its very existence, and hence alternative questions whether *jāta*, *a-jāta*, or *jātājāta* could be produced or not, would become useless.

Again, if a *jāta* object which gives rise to a number of alternatives like *jāta*, *a-jāta* etc, is not admissible to you as

jāta and if you take it as *a-jāta*, there would be self-contradiction in your argument. Moreover, when existence of a *jāta* object is denied, alternatives like *jāta*, *a-jāta* etc., would become useless in absence of their *āśrayas*.

Now, if you admit the above-mentioned alternatives in case of non-existent objects also, you shall have to apply those alternatives to the *kha-puṣpa*, which is also non-existent. Here, it could not be said that all those alternatives were applied by accepting things which were believed as *jāta* by others. Because, it would bring in a distinction between *sva* and *para* which violates the principle of *śūnyatā*.

D. C.—If according to your *sūnyatā-vāda*, objects like *ghaṭa* are not altogether produced, how is it that *ghaṭa* which is not apprehended in the state of a lump of earth, is apprehended when produced by *nimittas* like potter etc.? And why is the *ghaṭa* not apprehended before its production or after its being broken by the hit of a stick etc.? If objects like *ghaṭa* were altogether *a-jāta*, like *khapuṣpa*, they would never be apprehended at all. And, the quality of being apprehensible at one time and non-apprehensible at the other, is possible only in case of a *jāta* object. 178 (1726)

D. C.—Just as the statement as well as knowledge that everything is *śūnya* are accepted as having been produced in any way whatsoever, in the same way, other objects such as *ghaṭa*, *paṭa* etc., should also be taken as *jāta*. And, if you accept *vijñāna* and *vacana* about *śūnyatā* to be *a-jāta*, how would you be able to express *śūnyatā* without the help of *vijñāna* or *vacana*, about it? Hence, *śūnyatā* is not acceptable in any way. 1.9 (1727).

Trans.—180-183 *Jāta*, *a-jāta*, *jātājāta*, as well as the *jāyamāna* objects are produced in this world on account of various causes, (but) nothing is produced in perfection. The *jāta* (*kumbha*) is produced, since it has form; the *a-jāta kumbha* is produced because of shape; the *jātājāta* (is produced) even by both, and the *jāyamāna* (is also produced) because the process of production takes place in the present tense. But a *kumbha* which has been produced before, could never be produced on account of *ghaṭatā* or (by means of) the characteristics of other (objects) or by means of both; and the *jāyamāna kumbha* could also never be produced on

account of *paṭatā*. Again sky etc., could also never be produced on account of their *nītyatā*. Hence, *O Saumya!* nothing could be produced as a substance (but) everything should be taken according to the surrounding characteristics. (1728-1731)

D. C—Several objects like *ghaṭa* which have once been *jāta* in this world, could be produced by reason of their *rūpatva*. Before the *rūpa* of *ghaṭa* is produced, the *rūpa* of earth is already there, and hence the *ghaṭa* which is *jāta* to the *apèkṣā* of *rūpitva* is produced in this way. Thereafter, *ghaṭa* is *a-jāta* as far as shape is considered. When it takes the shape in course of production, the *a-jāta ghaṭa* comes into existence. The *jāta-jāta ghaṭa* is produced in both the ways—*rūpitva* as well as *ākāra*. Moreover, *ghaṭa* which is *jāyamāna* is produced only during the present tense. The past having already vanished and future having not yet come, the process of being produced, takes place only during the present tense.

There are several objects of peculiar types which do not go under any of the above-mentioned categories *e. g.* A *ghaṭa* which has already been produced in the past, could never be produced as a *ghaṭa* again in any of the above-stated ways. Secondly, *ghaṭa* could not be produced on account of the characteristics of other objects like *paṭa* etc. As *ghaṭa* has its own process of production and characteristics, it could not be produced like an existent *paṭa* or a non-existent *kharaśrīṅga*. Thirdly, *ghaṭa* which is being produced during the present time, could never be produced as *paṭa* etc. For, *kārya* which is being produced as *ghaṭa* etc., could never be produced as an absolutely different object like *paṭa*. So, all objects *e. g.*, *ghaṭa*, *paṭa*, *ākāśa* etc., could not be produced in the form of substance, as they are primarily made in that state. But, as far as *paryāya* is concerned, all are said to have been produced.

In reply to the question *viz.*, “Since everything is made up of some sort of materials, how could those materials exist in the midst of all-pervading negation?” the *Ācārya* states—

दीसइ सामग्गिमयं सब्बमिह त्थि न य सा, नणु विरुद्धं ।

D. C.—*Vyakta* :—All objects are composed of some sort of *sāmagrī* in this world. But in the midst of *sarvasūnyatā*,

samagrī, too, does not exist, because everything becomes *sūnya* at the end.

Bhagavān :—This belief of yours, *O Vyakta* ! is totally wrong. For, constituents like *kaṇṭha*, *oṣṭha*, *tālu* etc., which form *sāmagrī* as well as *vacana* are directly perceptible. Hence, how could the existence of *sāmagrī* be denied ?

Vyakta :—One could perceive even an *a-vidyamāna* object, on account of *kāma*, *svapna*, *bhaya*, *unmāda*, or *a-vidyā*, but in fact that does not exist.

Bhagavān :—If it is so, *O Vyakta* ! why is the *sāmagrī* that produces the hair of a tortoise, not produced ? *A-vidya-manatā* is common in both the cases. So, either this *sāmagrī* should be apprehended like the *sāmagrī* that produces *vacana*, or both should not be apprehended. Or, why should not the fault of *viparyāya* (contrariety) take place when the *sāmagrī* that produces the hair of a tortoise is apprehended and the one that produces *vacana* is not ?

But,

D. C.—Are the speaker—possessed of a group of consti-
tuents like heart, head, throat, lips, palate, tongue etc., and
the speech, existing or not? If they are, *śūnyatā* will no more
be existing on account of the very fact that they exist. If they
are not, in absence of the speaker and speech, there will be none
to announce that the world is *śūnya*. Moreover, in the midst
of all being non-existent, neither the object to be proved will
exist nor will there be anyone to hear that *śūnya vacana*.

“ Just as a speaker or speech does not exist, the objects

this (world) is also non-existent ” Is this statement true or
false ? If it is true, there will be no negation, and if it is
false, that will no longer be a ground of assurance.

Or, if you believed that *śūnyatā* is anyhow arrived at, it
is not proper (to do so) in (the midst of all-pervading)
negation. (1734-1735)

D. C.—Vyakta—Now that *vaktā* and *vacana* have been
established as *śūnya*, the *vacanīya bhāvas* will also be *śūnya*
on account of the same reason So, ultimately, the whole world
is non-existent in all respects.

Bhagavān :—If it is so, *O Vyakta* ! I ask you a question :
Is that statement which proves the non-existence of *vaktā*,

vacana, and the *vacanīya bhāvas* true or false ? If it is true, the *abhāva* of the above—mentioned objects, could not be attained on account of its own existence. And if it is false, the statement will cease to be a *pramāṇa* to establish *sūnyatā*. Thus, it is not possible to establish *sūnyatā* in either of the two ways.

Vyakta :—But the statement which establishes *sūnyatā* has anyhow been accepted by us. Our *vacana* is, therefore, authentic, and *sūnyatā* has undoubtedly been established.

Bhagavān :—That is not true, *O Vyakta* ! For, in accepting the above—mentioned statement, the same fault will arise when you ask the question as to whether that *vacana* is true or false and so on. Moreover, you cannot accept the *vacana*, unless the person who accepts the *vacana* to be accepted and the acceptance itself are existent.

The theory of *sarvasūnyatā* seems unfounded from this point of view also.

Moreover,

Trans.—188 Why is the oil not (manufactured) from the materials like sands and why from sesamum seeds only ? Or, why not everything be attained from the materials of *khapuspas* (only) ? (1736).

टीका—सर्वभावानामसत्त्वे सर्वोऽपि प्रतिनियतो लोकव्यवहारः समुच्छिद्यते, तथाहि—भावाभावस्य सर्वत्राविशिष्टत्वात् किमिति सिकताकणसामग्री-तस्तैलं न भवति, तिलादिसामग्र्यां वा तत् किमस्ति ? । किं वा खण्डुष्पसामग्रीतः सर्वमपि कार्यजातं न सिध्यति ? । न चैवम्, तस्मात् प्रतिनियतकार्यकारण-भावदर्शनाद् नाभावसामग्रीतः किमप्युत्पद्यते, किन्तु यथा स्वभावसामग्रीतः, तथा च सति न शून्यं जगदिति ॥१८८॥ (१७३६)

D. C.—In case of all objects being taken as non-existent, the entire course of *loka-vyavahāra* will be violated. If all the objects are of the same type—*viz.*, that of absolute negation—how is it that oil is manufactured only from the *sāmagrī* of sesamum seeds and not from the materials like sand-particles etc. ? Or, if there is all-pervading negation, why not all the objects be attained from the *sāmagrī* of *khapuspas* alone ? The fact that it never happens like this in the world, leads us to believe that the world is not *śūnya*.

And,

Trans.—189 That everything should be produced from a group of materials, is not the one inevitable (rule) because atom does not occupy space. But (if even that occupies space according to you), wherever it resides, there is a molecule. (1737)

टीका—सर्वं सामग्रीमयं सामग्रीजन्यं वस्त्वित्ययमपि नैकान्तिकः, यतो द्व्यणुकादयः स्कन्धाः सप्रदेशत्वाद् द्व्यादिपरमाणुजन्यत्वाद् भवन्तु सामग्रीजन्याः, परमाणुः पुनरप्रदेश इति न केनचिज्जन्यते इति कथमसौ सामग्रीजन्यः स्यात् ? । अस्ति चासौ, कार्यलिङ्गगम्यत्वात् ; उक्तं च

D. C.—There cannot be a general rule that each and every object should be produced from *sāmagrī*. For, objects composed of two or more atoms could be produced from the *sāmagrī* of those atoms, but a *paramāṇu* by itself, does never occupy space, and hence could never be produced from any *sāmagrī*. This *paramāṇu* is produced only from *kārya-līṅga*, as it is said—

Mūrtair-aṇurapradēśaḥ kāraṇamantyaṃ bhavèṭ tathā nityaḥ ।

Ekarasa-varṇa-gandho-dvisparśaḥ kāryaliṅgaśca ॥

But if you believe this *paramāṇu* to occupy space, wherever you apprehend *paramāṇu*, there would be *aṇu* till ultimately it would be absolutely vacant, where nothing but *paramāṇu* not produced from any *sāmagrī* would be found.

Trans.—190 It is really contradictory (to believe) that what is produced by materials is seen and that atoms do not exist. Or, is it that, in absence of atoms, (all) this is produced by means of (mere) *khapuṣpa* ? (1738)

टीका—“सामग्रीमयं सर्वं दृश्यते” इति भवतैव प्रागुक्तम्, “अणवश्च न सन्ति” इत्यधुना ब्रूषे, ननु विरुद्धमिदम्, यथा ‘सर्वमप्यनृतं वचनम्’ इति ब्रुवतः स्ववचनविरोधः, तथाऽत्रापीत्यर्थः । यदेव हि सामग्रीमयं किमपि दृश्यते भवता, तदेवाणुसंघातात्मकम्, अतः स्ववचनेनैव प्रतिपादितत्वात् कथमणवो न सन्ति ? इति भावः । किञ्च, अणूनामभाव इदं सर्वमपि घटादि-कार्यजातं किं खपुष्पैर्निष्पन्नम्, परमाण्वभावे तज्जनकमृत्पिण्डादिसामग्र्य-भावात् ? इति भावः । तस्माद् यस्मात् सामग्रीमयं दृश्यत इति प्रतिपद्यते भवता, तद्देव परमाणव इति ॥१९०॥ (१७३८)

D. C—If you are to state that those that are not *sāmagrījanya* are not *paramāṇus* at all, your own statement will be contradicting itself. It has already been said that everything which is *sāmagrīmaya* is apprehensible. Again, all that you have accepted as *sāmagrīmaya* or *sāmagrījanya* in this world, is nothing but a collection of atoms. Thus, when you establish the existence of atoms by your own words, you cannot call them non-existent, in any case. And, if you call those atoms non-existent, should the objects like *ghaṭa*, *paṭa* etc, be taken to have been produced from the non-existent objects like *khapuṣpa* etc. ? Because if *paramāṇu* is absent, a *sāmagrī* like *mṛtipiṇḍa* would also be absent. So, when you assert that *sāmagrīmaya* is apprehended, the *paramāṇus* that form this *sāmagrī*, are automatically established as existent.

Now, in reply to the argument *prima facie* that since

rear portion is not perceptible and since front portion is very minute, everything is *śūnya*,† the author indicates—

देसस्साराभागो चेप्पइ न य सो त्ति नणु विरुद्धमिणं ।

Trans.—191 To say that the foremost portion of a visible object is perceptible but it does not exist, is really contradictory. (For) even in the midst of all-pervading negation, why is the front part of the horn of an ass not perceived ? (1739)

टीका—यदुक्तम्—“दृश्यस्यापि वस्तुनः परभागस्तावद् न दृश्यते, आराद्भागस्तु गृह्यते, परं सोऽप्यन्यान्यपरभागकल्पनया प्रागुक्तयुक्तितो नास्ति ” इति । ननु विरुद्धमिदम्—“ गृह्यतेऽसौ, न च समस्ति ” इति । सर्वाभावाद् भ्रान्त्याऽसौ गृह्यत इति चेत् । तदयुक्तम्, यतः सर्वाभावे तुल्येऽपि किमिति खरविषाणस्य संबन्धी आराद्भागो न गृह्यते ? । समता विपर्ययो वा कथं न भवति ? इति ॥ १९१ ॥ (१७३९)

D. C.—It has been said before that only a front part of a visible object is perceived and not the rear part. This front part, is, in comparison with other parts in the rear, is very *sūksma* and hence that too becomes non-existent. This statement is self-contradicting. For, to say that it is perceptible but it does not exist, is absurd.

Here, if it is said, that in the midst of *sarvābhāva*, it is

† vide verse 1696.

perceptible because of *bhrānti*, that is also not proper. For since *abhāva* is common everywhere, why is the front part of non-existent objects like the horn of an ass etc., not apprehended? Or, how does it not happen that the front part of objects like *kharaviṣāṇa* etc. be apprehended and that of objects like *ghaṭa*, *paṭa* etc. not apprehended?

Moreover,

D. C.—What *anumāna* do you hold when you assert that front part is also unapprehensible because of the rear part being so ? For, how could you deny the existence of front part which is *pratyakṣa* to you like the heat of fire ?

It is proper to believe that front portion could exist only if the rear portion be existing and not otherwise. Since the front portion is existent to the *apekṣā* of the rear one, *jñāna* about the rear portion will have to be derived from the front portion by means of *anumāna*. But from this, it is absolutely inconsistent to conclude that front portion is not perceived because the rear one is not seen.

Even the commentator asserts in this connection that when the front portion is seen we can infer the rear one *e. g.* A visible object has its rear portion apprehended because its front portion which is connected with the rear one is apprehended. It follows from this, that an object which has one portion perceptible contains another portion also. Objects like *ghaṭa*, *paṭā* etc, must contain rear portions since their front ones are easily apprehended.

Again, the idea of the foremost part from the successive front portions will not fit your *anumāna*. As the rear part is *a-vidyamāna*, the inference of foremost part being so, is absolutely improper. Really speaking, the front part is perceptible in this case, and the inference of rear portion being *vidyamāna*, is correct.

middle portions exist? And, if it is said so in the opinion of others, whence is the distinction between one's own opinion and another's opinion? If the front, rear, and the middle portions are accepted as existing, there would be no *śūnyatā* at all. And, if they are not proved (to be existing), why alternatives about (non-existent objects like) *kharaviṣāṇa*? Or, in the midst of the negation of all objects, why is the front portion apprehended and why not the rear one? Or, why not absolute non-apprehension of both? Or, why not the reverse (apprehension) also? (1741-1743).

D. C.—Non-existence of each and every object could not be proved by virtue of the non-apprehension of rear parts. The rear portions of transparent objects like crystal and mica are apprehended. Existence of those objects has therefore undoubtedly been established. Consequently, non-apprehension of all objects can never be proved by means of the *hetu* that rear portions are not seen.

Here, again, if you contend that *sphaṭika* etc. also do not exist, your argument that rear portion is not seen, will fail and hence be invalid, as the rear portions of those objects are clearly apprehended. In spite of this faulty argument, if you attempt to establish *śūnyatā* by means of a widely applicable statement that “Nothing could be proved to exist as nothing is perceived” then also, the previous *hetu* that rear part could not be seen, would be violated. Secondly, since village, town, river, sea, *ghaṭa*, *paṭa* etc. are directly apprehensible, the *hetu* will be evidently invalid in that way also.

The opponent may contend again, that a reason which is not applicable to all the instances on the same side, can be called a logical reason if it is absolutely inapplicable to the opposite side. *e. g.*, *śabda* is *a-nitya*, because it is not produced without effort. But this does not mean that all *a-nitya* objects like lightning, cloud etc. though produced without effort, are *a-nitya*. Similarly, here also, rear parts of all the objects are not non-apprehensible, but as the rear parts of several objects are not apprehensible, this *hetu* leads us to prove *śūnyatā* in them, and that is why it is called a correct or logical reason !

But, that is not proper. *O Vyakta* ! In the *hetu* mentioned above, perversion of difference is found. Take, for example, the

proposition that “ That which is *a-nitya*, is like *ākās'a*, produced without effort.” If *vyatirèkavyāpti* is applied in this case, nothing else but *vidyamānatā* of an object is inferred when *śūnyatā* is not found at all. Moreover, rear part is also apprehended in this case. So, *O sarvaśūnyatāvādin !* you shall never be able to obtain the *vyatirèkavyāpti*. Your *hètu* will, therefore, not remain as a *hètu* at all.

*D.C.—Vyakta:—*The rear as well as the middle portions of an object do not exist, because they are imperceptible like *kharaviṣāṇa*. The front parts will also not exist in that case, because their existence depends upon the existence of the rear ones. This will ultimately lead to the idea of *sarvaś ūnyatā*.

*Bhagavāna:—*The argument is not valid. *Pratyakṣa* means existing at each of the sense-organs. So, when the *hetu* of *a-pratyakṣatva* is advanced, there would be apprehension of sense-organs, as well as, the objects to be apprehended, and in their apprehension, *śūnyatā* would never be accepted. For, if *śūnyatā* is taken along with the *hetu* of *a-pratyakṣatva*, the *hetu* itself will prove invalid. Or, say in absence of *indriya* and *artha*, the practical usage or *pratyakṣa* and *a-pratyakṣa* would never be possible.

D. C.—Just as, your apprehension of doubt etc. exists, even though it is not perceptible to others, in the same way, there are some objects which exist, in spite of their imperceptibility. Middle and rear portions of such objects do exist, in spite of their *a-pratyakṣatva*. Your *hetu* will, therefore involve the fault of *anaikāntikatva*, since it has been applicable to more than one object.

Again, if your apprehension of doubt etc., does not exist, where would be *śūnyatā* then? To whom does that *śūnyatā* belong? And, who has apprehended that *śūnyatā*? The doubt therefore, must exist. Otherwise, who else will raise the doubt about the existence of *vidyamāna* objects like village, town, etc.?

After refuting the idea of *śūnyatā*, the *Bhagavāna* now tries to establish the existence of elements like *prithvī* etc in the following way:—

पचक्खेसु न जुत्तो तुह भूमि—जला—ऽनलेसु संदेहो ।

Trans.—200 Your doubt about the objects like earth water, and fire, is not proper, because they are (directly) per-

ceptible (to the senses). That (doubt) is out of place in the case of wind as well as sky also, by virtue of *anumāna*. (1748)

टीका-तस्माद् भूमि-जल-वह्निषु प्रत्यक्षेषु तव सौम्य ! संशयो न युक्तः यथा स्वस्वरूपे । तथा, अनिलोऽपि प्रत्यक्ष एव, गुणप्रत्यक्षत्वात्, घटवत्, ततस्तत्रापि न संशयो युक्तः । भवतु वा, अनिल-ऽऽकाशयोरप्रत्यक्षत्वेन संशयः, तथाऽप्यसौ न युक्तः. अनुमानसिद्धत्वात् तयोरिति ॥२००॥ (१७४८) ॥

D. C.—Just as, in the case of your own body, you cannot raise doubt, so in the case of *pratyakṣa* objects such as *bhūmi* (earth), *jala* (water), and *anala* (fire) also, you should not raise doubt. Moreover, you cannot entertain doubt about *vāyu* (wind) and *ākāśa* space), also because, they are established by means *anumāna*.

Here is the *anumāna* about wind,

Trans.—201. Just as *ghata* is the object possessing the property of *rūpa*, wind is said to be (an element) consisting of properties, like a sense of touch, etc. produced by some invisible (force.) (1749)

टीका-य एतेऽदृश्येन केनाप्यापादिता जनिताः स्पर्शादयस्ते विद्यमानगुणिनः, गुणत्वात्, आदि शब्दाच्छब्द-स्वास्थ्य-कम्पा गृह्यन्ते, एतेऽपि

D. C.—Properties like *sparsā*, *śabda*, *svāsthya*, and *kampā* are produced by means of some invisible force. Now, since these properties appear as existing in *vāyu* (wind), *vāyu* is said to possess those properties, just as *ghaṭa* possesses the property of *rūpa*.

The *anumāna* to establish *ākāś* is this:—

अत्थि वसुहाहभाणं तोयस्त घडो व्व मुत्तिमत्ताओ ।
जं भूयाणं भाणं तं वोमं वत्त ! सुव्वत्तं ॥ २०२ ॥ (१७५०)

Asti vasudhādibhājanam toyasya ghaṭa iva mūrtimattvāt
Yad bhūtānām bhājanam tad vyoma Vyakta ! suvyaktam ॥202॥

Trans —202 Just as *ghaṭa* becomes the receptacle of water, so there is a receptacle for earth etc. also. The receptacle of (those) elements is nothing but *ākāśa*. (1750)

टीका-अस्ति वसुधा-जला-ऽनल-वायनां भाजनमाधारः, मूर्तिमत्त्वात्, तोयस्य घटवत्, यच्च तेषां भाजनं, तदायुष्मन् व्यक्त ! सुव्यक्तं व्योमेति । यदि च साध्यैकदेशतां दृष्टान्तस्य कश्चित् प्रेरयति, तदेत्थं प्रयोगः-विद्यमानमाजना पृथिवी, मूर्तत्वात्, तोयवत्; तथा, आपः, तेजोवत्; तेजश्च वायुवत्, वायुश्च पृथिवीवदिति ॥२०२॥ (१७५०)

D. C.—Earth, water, fire, and wind have their *ādihāras* of the type of the *ghaṭa* full of water on account of their being corporeal. This *ādihāra*, *O Vyakta!* is well known as *ākāśa*. Since *prithvi*

has its *bhājana vidyamōna* on account of its *mūrtatva* like water, water has also the *bhājana* same as that of fire, and the fire in turn, has the one similar to that of wind, which ultimately will have the same one as *prthvī*.

Having established the existence of all the five elements the *Ācārya* now concludes:—

एवं पञ्चस्वाह्यपमाणसिद्धाईं सोम्य ! पडिवज्ज ।
जीव-सरीराहारोवओगधम्माईं भूयाईं ॥ २०३ ॥ (१७५१)

Now, the *bhūtās* are established as animate in this way:—

*D. C. Vyākṛta:—*How are the *bhūtas sajīva* as they exist along with *jīva* ?

The *Ācārya*.—*Prithvī jalā, agnī* and *vāyu* are *sajīva* because they possess the characteristics of *jīva*. But the sky is not *sajīva* since it is *a-mūrta* and hence it acts merely as an *ādhāra*.

The living characteristic of *prithvī* can be laid down as follows :—

जन्म—जरा—जीवन—मरण—रोहणा—हार—दोहला—मयओ ।
रोग—तिगिच्छाईहि य नारि व्व सचेयणा तरवो ॥ २०५ ॥ (१७५३)

D. C.—Trees are *sa-cétana* like woman. Because, like woman, they possess the living characteristics such as *janma-jarā jivana-marāṇa* etc. Some one might argue that this rule could be applied to the lifeless objects also. Because, several characteristics like life, death, etc. are very well applied to the lifeless objects as well, when it is said that “curds is produced” or “(effect of) that poison is still alive” or (intoxication of) safflower† is dead” and so on, even though the objects mentioned there in, are lifeless.

The argument mentioned above is not justified, since all the characteristics of *cétana* are residing in the animate objects as their innate qualities. But in the case of lifeless objects, those characteristics are rarely applied, and that too, in a particular sense, and not as a rule.

D. C.—Plants like *sprast'apararodikā* contract themselves like worm at a slight touch, and hence they are *sa-cetana*.

So are the creepers spreading over a wall, tree or fence, for self-protection. *Śami* etc. are also *sa-cétana*, since they have the tendency to sleep, wake, or feel shy like *Dēvadatta*. Trees like *bakula*, *aśoka*, *kurabaka*, *viharaka*, *campaka*, *tilaka* etc., are respectively able to feel the sensations of *śabda*, *rūpa*, *rasa*, *gandha* *sparsa* etc. Plants like *kuṣmāṇḍī* and *bijapuraka* feel the longing of a pregnant woman. It is clear, therefore, that *vanaspati* is *sa-cétana*.

D. C.—Trees, corals, salts, and stones etc. are *sa-cétana* at their own places of production. Because, the sprouts of these objects spring up, again and again, like the sprout of flesh springing up in the case of disease of piles etc.

Vyakta :—Really speaking, you had started to establish *sa-cétanatva* in the elements like *prithvî* etc. Then, what is the idea in proving *sa-cétanatva* first in the case of *vanaspati* and then in the case of *prithvî* ?

Bhagavāna :—*Vanaspati* is nothing but a form of *prithvî*. Hence, out of the five *bhūtas*, *vanaspati* resides only in *prithvî*. Moreover, the spirit of life is not so clearly manifested in stones etc. as it has been in case of *vanaspati*. For this reason, *O Vyakta* ! *Caitanya* is established first in *vanaspati* and then in *prithvî*.

Now, the *sa-cétanatva* of water is established—

D. C.— Water springing from earth when dug out of it, is *sa-cétana* like a frog; or, that which falls from the sky as natural rains, is also called *sa-cétana*, since it comes from *vikāras* like clouds etc.

Fire, as well as wind, can also be taken as *sa-cétana* in this way :—

Bhūtas like *prithvī* etc. can be proved as living in another way also :—

Tésām bhavavicchittiḥ prāpnotinéṣṭā ca sā yatastena ।
Siddhamanantā jivā bhūtādhārāśca tévaśyam ॥ 213 ॥ (1761)]

Trans.—212-213 Many a *jīva*, O *Saumya*! attains *mokṣa* and there is no possibility of new *jīvas* (to be born). The world is limited. So, those according to whom, plants, *etc.* do not exist, will have the whole mundane world destroyed. But (*ca*) that is not desirable. Hence, it is definitely proved that they (*i.e.* plants *etc.*) are the endless *jīvas* with *bhūtas* as their supports (1760-1761)

टीका-सिध्यन्ति मुक्तिं यान्ति तावदजसं बहुशो जीवा, न च नवसत्त्वोत्पादः केनापीष्यते, परिमितदेशश्च लोकः, ततस्तदाधाराः स्थूलाः स्तोका एव जीवा घटन्ते । एवं च सति येषां मतेन वनस्पत्यादय एकेन्द्रिया जीवा न सन्ति, तेषां भवस्य संसारस्य व्यवच्छित्तिः प्राप्नोति । न चासौ कस्यापि तीर्थान्तरीयस्येष्टा यतः, तेन तस्मात् कारणात् सिद्धं सत्त्वानां मानन्त्यम् । ते च संसारित्वादवश्यं भूताधाराः शरीरिण एवेत्यर्थः । न च वनस्पत्यादीनन्तरेणान्यत् तेषां शरीरमुपपद्यते । निवेद्यन्तां वा यच्छरीरास्ते, अभ्युपगम्यतां वा वनस्पत्यादीनां सात्मकत्वमिति भावः ॥ २१२--२१३ ॥ (१७६०--१७६१) ॥

D. C.—Since many *jīvas* attain *mokṣa* there is no possibility

of new *sattvas* to be born. Moreover, this world is limited in space. It is natural, therefore, that there will be a small number of *jivas* depending upon it. Under these circumstances, if one believes that plants etc. are not *sa-cétana*, the whole of the mundane world will have to cease existing in no time. But that is not desirable in any way. Hence, in order to account for the continuity of the mundane world, the continuity of the living beings is accepted. Now, since all these *jivas* are the mundane *jivas*, they must have *bhūtas* as their *śāstras* (weapons) and since plants etc. are based on *bhūtas* they should also be undoubtedly taken as *sa-jīva*.

Now, the opponent's objection and its refutation—

Trans.—214 (The opponent may ask that) There is no possibility of *ahimsa* in that case on account of the statement that “(the world) is compact with *jivas*.” (The reply is—) That is not so. It has already been said that, one is rendered lifeless (only) when beaten by weapons. So, *himsā* could never be derived merely from the statement that “(the world) is compact with *jivas*.” (1762)

टीका—नन्वेवं सति लोकस्यातीवपृथिव्यादिजीवघनत्वादहिंसाऽभावः, संयतैरप्यहिंसात्रतमित्यं निर्वाहयितुमशक्यमिति भावः । तदेतद् न, यतोऽन्तरमेवाभिहितमस्माभिः—“ शस्त्रोपहतं पृथिव्यादिकमजीवं ” भवति ।

“जीवघनो लोकः” इत्येतावन्मात्रेणैव हिंसा संभवतीति ॥२१४॥ (१७६२) ॥

D. C.—Vyakta :—If the world is packed with *Jīvas* such as *prithvī* etc. even an ascetic will not be able to follow the vow of *ahiṃsā*, etc. as they will least require food etc. which they would not obtain without *hiṃsā*.

Bhagavāna :—For this, it has already been said *O Vyakta* ! that *prithvī* etc. become lifeless when beaten by weapons. Thus, when they become *a-jīva* there is no objection for *yatis* to get their food from them. So, it is not proper to deduce *hiṃsā* merely from the statement that the world is full of *jīvas*.

Trans.—215-216 One who is destructive, is not (necessarily) murderous, and one who is not destructive, is not certainly non-violent Nor is one having little *jīva a-hiṃsaka* and one that is packed with *jīvas* accepted as *hiṃsaka*. For, one is murderous, like a hunter, on account of his wicked motive even without killing; while another afflicting others with a good purpose, like a physician, is not murderous. (1J63-1764 .

D. C.—A person conversant with all the five *samitis* and restraining himself in three ways—*manasā* (by mind) *vācasā* (by speech) and *karamaṇā* (by bodily actions)—is the *jñātā* of actual *jīvasvarūpa* and its protection. Such a person should be taken as *a-hiṃsaka* even if he commits *hiṃsā*. But one who is opposed to the nature of the above-mentioned *jñāni puruṣa*, is *hiṃsaka* as he brings about an *a-s'ubha parināma*. Fulfilment of *hiṃsā* may or may not be attained by him due to *jīvoparodha* or the (natural) obstruction to *jīvas*, but his *hiṃsakatva* is undoubtedly established on account of his bad intention and its inauspicious consequence as laid down below :—

अशुभो जो परिणामो सा हिंसा सो उ बाहिरनिमित्तं ।

को वि अवेक्खेज्ज न वा जम्हाऽण्णैगंतियं बज्झं ॥ २१८ ॥ (१७६६)

Asubho jo parināmo sā hiṃsā so u bāhiranimittam ।

† Five *Jaina* rules of life.

[अशुभो यः परिणामः सा हिंसा स तु बाह्यनिमित्तम् ।

Asubho yaḥ pariṇāmah sā himsā sā tu bāhyanimittam ।

Ko'pyapékṣéta na vā yasmādanaikāntikam bāhyam ॥218॥ (1766)

Trans.—218 What is (known as) inauspicious consequence is (itself) *himsā*. But that is an external cause. Some may or may not require (this cause), because the external (cause) is variable. (1766)

टीका-यस्मादिह निश्चयनयतो योऽशुभपरिणामः स एव “ हिंसा ” इत्याख्यायते । स च बाह्यसत्त्वातिपातक्रियालक्षणं निमित्तं कोऽप्यपेक्षते, कोऽपि पुनस्तस्मिन्पेक्षोऽपि भवेत्. यथा तन्दुलमत्स्यादीनाम्; तस्मादनैकान्तिकमेव बाह्यनिमित्तम्, तत्सद्भावेऽप्यहिंसकत्वात्, तदभावेऽपि च हिंसकत्वादिति ॥ २१८ ॥ (१७६६) ॥

D. C.—An action having inauspicious consequence, is called *himsā*. This sort of *himsā* results from the *nimitta* of *jīvahimsā* while sometimes *himsā* results without the *apékṣā* of those *nimittas* as in the case of *tandulamatsya*. As the *bāhya nimitta* is *anaikāntika*, an action is *himsaka* sometimes even in absence of *bāhya nimitta* and *a-himsaka* sometimes even in its own absence.

D. C.—One who inflicts pain upon *jīvas* with an evil purpose is said to commit *hiṃsā*; but one who, has no such purpose, does not commit *hiṃsā* even if he inflicts pain upon *jīvas*.

Trans.—220 Just as *śabda* etc do not become the objects of pleasure to a dispassionate saint on account of the purity of (his) mind, affliction of *jīvas* too does not become the cause of *hiṃsā* to a person having pure intention (1768)

टीका—यथेह वीतराग-द्वेष-मोहस्य भगवत इष्टाः शब्द-रूपादयो भावविशुद्धितो न कदाचिद् रतिफला रतिजनकाः संपद्यन्ते, यथा वेदशुद्धात्मनो रूपवत्यामपि मातरि न विषयाभिलाषः संजायते, तथा शुद्धपरिणामस्य यत्नवतः साधोः सत्त्वोपघातोऽपि न हिंसायै संपद्यते । ततोऽ-

D. C.—To a dispassionate saint, *s'abda, rūpa, rasa* etc. do not become the attractive objects of pleasure, because his mind is pure. A pure-minded man does never cherish desire for sensuous pleasure from a beautiful mother. In the same way, a self-restrained and persevering *muni* does never commit *hiṃsā* even if he inflicts pain upon *jīvas* on account of his *s'uddha bhāvas*. It is clear, therefore, that *bāhya nimitta* is *anaikāntika* so far as *hiṃsā* is concerned, and what is required is the intention pure and simple.

Hence *O Bhadra!* accept the existence of the five *bhūtas* and know it for certain that the first four of them *viz, pṛithvī, jala, agni,* and *vāyu* are *sa-cétana*. Moreover, you have not understood the real meaning of the *Vēda-bādas* like “*Swapno pamān vai sakalam*” etc. The main object of those sentences, is to assert the fragility of wealth, wife, progeny etc. before the high-minded people who have been distressed by the *bhavaabhaya*, so that they might abandon their attachment to the worldly *viśayas* and strive for the attainment of *mokṣa*. Leave, therefore, all your doubts aside, *O Saumya!* and admit the existence of *bhūtas*.

Trans.—224 Is it your belief that human life even in the next world is the same as it is in this world? But (ca) you do not know the (real) meaning of the sentences of *Vēdas*. Here is their (real) interpretation (1772)

टीका—त्वमेवं मन्यसे—यो मनुष्यादिर्यादृश इह भवे स तादृशः परभवेऽपि । नन्वयमनुचितस्ते संशयः, यतोऽसौ विरुद्धवेदपदश्रुतिनिगिबन्धनो वर्तते । तानि चामूनि वेदपदानि—“ पुरुषो वै पुरुषत्वमश्नुते, पशवः पशुत्वम् ” इत्यादि, तथा, “ श्रृगालो वै एष जायते यः सपुरीषो दह्यते ” इत्यादि । एषां च वेदपदानाममुमर्थं मन्यसे त्वम्—“ पुरुषो मृतः सन् परभवे पुरुषत्वमेवेत्यादि, अमूनि किल भवान्तरगतजन्तुसादृश्यप्रतिपादकानि; तथा, “ श्रृगालो वै ” इत्यादीनि तु वैसादृश्यरूपापकानि ” इति । अतस्तव संशयः । अत्रं चायुक्त एव, यतोऽमीषां वेदपदानां नायमर्थः, किन्तु वक्ष्यमाणलक्षण इति ॥ २२४ ॥ (१७७२) ॥

D. C.— O *Sudharaman* ! Do you entertain the belief that

human life in the next world is the same as it is here ? Sentences of *Vēdas* having contradictory interpretations have given rise to this illusion of yours. The sentences are as follows :—

- (1) "*Puruṣo vai puruṣatvamas'nuté, paś'avah paśatvam*" etc. and
- (2) "*Śruṅālo vai eṣa jāyate yah sa-purīṣo dahyaté*" etc

According to you, interpretations of these two sentences are respectively as follows :—

(1) A man obtains nothing but manhood even after death in the next world; and animals such as a cow etc. become animals after death. Thus, sentences like this suggest that the next life is the same as this.

(2) But the sentences like "*Śruṅālo vai* etc." mean to assert that the next life is totally different from the present one.

Such contradicting interpretations have given rise to the misguided belief of yours. Here is their real interpretation. Listen carefully.

D. C. - Since *kāraṇa* is the same as *kārya* according to you, the past life, being the *kāraṇa* of the present life, becomes the same as the present life. This is why you are led to believe that everything in this life is similar to everything in the next one. But this apprehension of yours is not correct.

Trans. -226-227 The *śara* plant is produced from horn; earth-grass¹ is produced by the anointing of mustard² and *dūrvā*³ is produced by the combination of *goloma*⁴ and *aviloma* plants. Similarly, in the treatise⁵ on (planting and cultivation of) trees, production is brought about by the combination of (a number of) dissimilar objects. The rule is therefore, not exclusive, *O Sudharaman !* (1774-1775)

टीका-ततः “ कारणानुरूपं कार्यम् ” इति सुधर्मन् ! नायमेकान्तः, यतः शृङ्गादपि शरो जायते, तस्मादेव च सर्षपानुलिप्ताद् भूतृणकः शव्यसंघातो जायते; तथा, गोलोमा-ऽविलोमाभ्यां दूर्वा प्रभवति, इत्येवं वृक्षायुर्वेदे विलक्षणानेकद्रव्यसंयोगजन्मानो वनस्पतयो दृश्यन्ते । तथा, योनिविधाने च । योनिप्राभृते विसदृशानेकद्रव्यसंयोगयोनयः सर्प-सिंहादिप्राणिनो मणयो हेमादयश्च पदार्था नानारूपाः समुपलभ्यन्ते । अतः केयं कार्यस्य कारणानुरूपता ? इति ॥ २२६-२२७ ॥ (१७७४-१७७५) ॥

D. C.—The rule that *kārya* is similar to *kāraṇa* is not *ékāntika*. Because, the *s'ara* is produced even by means of *s'ringa*, by the unction of mustard-seeds, the earth-grass is produced and by the combination of *goloma* and *aviloma* grasses, the *dūrvā* grass is produced.

Moreover, in the treatise on the planting and cultivation of trees, production of objects such as jewels, gold, etc is shown

1. *Bhūtrīṇaka* (earth-grass)=A kind of fragrant grass, the plant *Androhogon Schoenanthus*.
2. *Sarṣapa*=Mustard-seed; popularly known as *sarasava* in Western India; *Sinapis Dichotoma*.
3. *Dūrvā*=Name of a bent grass; panic grass, *Panicum Dactylon* ;
4. *Goloma, Aviloma*=Two different kinds of bent grass.
5. *Vṛikṣayana*=Name of a short treatise by *Sūrpāna* on the planting and cultivation of trees.

as being brought about by the combination of various dissimilar objects. The rule of similarity between *kārya* and *karana*, is therefore, inapplicable in this case.

Or, say, the life of creatures in the next world is distinguished from their life in this world, on account of similarity between *kārya* and *karana* in this way:—

अहवा जउ चिय बीयाणुरवजम्मं मयं तओ चेव ।

Trans.—228-229-230 Or, because the production (of *kārya*) is similar to the root-cause, according to you, take *jīva* in the next life to be a *pariṇāma* distinct from this mundane world. For, *karman* (which is) the seed of the sprout of life is itself distinct. And, if the effect is established to be distinct because the cause is distinct, know it for certain *O Saumya!* that the Mundane Soul has also its *phala* distinct from it. (1776-1777-1778)

टीका-व्याख्या-अथवा, यत एव बीजानुरूपं कारणानुगुणं कार्याणां जन्म मतम्, तत एवेह भवाद् भवान्तरे जीवं गृहाण प्रतिपद्यस्व । कथंभूतम्? जाति-कुल-बलै-श्वर्य-रूपादिविचित्रपरिणामम् । यदि नाम बीजानुरूपं जन्म, तथापि कथं भवान्तरे विचित्रता जीवानाम्? इत्याह-“जेण भवं-कुरेत्यादि” येन यस्माद् नारक-तिर्यगादिरूपेण भवनं भव स एवाङ्कुर इवाङ्कुरस्तस्य बीजमिह कर्मैवावसेयम्, तच्च मिथ्यात्वा-ऽविरत्यादिहेतुवैचित्र्याद् विचित्रं यस्माद् मयाऽभिहितम्, तस्मात् तज्जन्यस्य भवाङ्कुरस्यापि प्रात्यादिभेदेन विचित्रता । ततो यदि त्वया कर्म प्रतिपन्नम्, हेतुवैचित्र्याच्च यदि तद्वैचित्र्यमभ्युपगतम्, ततः संसारिणो जीवस्य तत्फलमपि नारक-तिर्यङ्-मनुष्या-ऽपररूपेण भवनरूपं सौम्य ! विचित्ररूपं प्रतिपद्यस्वेति ॥ २२८-२२९-२३० (१७७६-१७७७-१७७८) ॥

D. C.—The production of various *kāryas* is similar to the corresponding *kāraṇas* according to you. But the *jīva* in the next life, is distinguished from this world on account of *jāti*, *kula*, *rūpa*, *bala*, *aiś'varya* etc. Now if *Kārya* is taken to be similar to the *kāraṇa*, how will the *jīvas* be different in the next life? The *vicitratā* of *jīva* in the next life, is to be accounted for by means of *karman*. For *karman* being the *hetu* of *saṃsāra*, renders the whole *saṃsāra*, *vicitra* by reason of its

own self being *vicitra*. So, just as *karman* is *vicitra* by reason of its wrong belief and vowlessness etc, its *Kārya* viz, *bhava* should also be taken as *vicitra* by reason of *jāti, kula, rūpa, bala* etc. So, if you admit *Karman* and if you believe that *Kārya* is distinguished from *kāraṇa*, then *O Saumya!* know it for certain that the Mundane Soul has its *phala* in the form of *vicitrata* as hellish beings, lower animals, human beings, or celestial beings.

Trans.—231 Like the variable result of variable actions (accomplished) in this world, worldliness is variable on account of the *hetu* that (it is also) the result of variable actions. (1779)

टीका-चित्रं संसारिजीवानां नारकादिरूपेण संसारित्वमिति प्रतिज्ञा । विचित्रस्य कर्मणः फलरूपत्वादिति हेतुः । इह यद् विचित्रहेतुकं तद् विचित्रमुपलभ्यते, यथेह कृषि-वाणिज्यादिकर्मणां फलं लोक इति । तदेवं कर्म वैचित्र्याद् भववैचित्र्ये प्रमाणमुक्तम् ॥ २३१ ॥ (१७७९) ॥

D. C.—Just as, the results of various actions like ploughing trading etc. are variable, the *samsāritva* of the mundane animals is also varied as seen in their hellish experience etc. on account of the fact that *samsāritva* is nothing but the result of their *vicitra* actions in the past.

Now, in support of the variable nature of *Karman*, the author states:—

D. C.—Effect of *Karman* is varied in this world. Only that which is *pudgalaparīṇāmatmaka* is known as *vicitra* (as in the case of various transformations of cloud, earth etc.). While that which is not the result of earthly *pudgalas*, is not recognized as a *vicitraparīṇatī* (as in the case of *ākāśa*). In case of *Karman* itself being variable, in addition to this *pudgalaparīṇāmatva*, *viciratā* is due to the variable nature of its motives like vanity, hostility, and wickedness etc. by means of which those actions are actually inspired. 232 (1780).

Trans.—233-234 Or, if the other life is also taken as the same as this life, (you should) accept the *karma phala* in the other life to be the same as (that in) this life. Has it been said that there exist people in this world doing (various) deeds according to their various tendencies? If they exist, there exist (people) in the next (world) to enjoy their fruits also. Sameness (of both) is, therefore, justified. (1781-1782)

D. C.—If, according to you, next life is the prototype of this one, the *karmaphala* in the next life, will depend upon (one's) various good or bad actions in this life. Now, since various people do various deeds as a result of their various tendencies in this life, it should be noted that they enjoy fruits of their actions in the next life. So, inclination of one in the present life, depends upon his inclination in the past life also.

Then, anticipating doubts in the opponent's mind, the author states :—

Trans.—235–236 If (the opponent says that) *Karman* is successful here (only), (and) not in the next life, then, there will be nothing like sameness at all. The unaccomplished object will crop up, and the accomplished one will come to an end. Or, there will be (complete) negation of *Karman* itself. In absence of *Karman*, how will the next life come into existence? And in its absence, whence (will) the *sadṛśatā* (exist)? And if the (next) life is (taken to have been) produced without any cause, then (its) end will also be so. (1783–1784)

D. C.—Sudharman:—Actions (like ploughing etc.) which are connected with this life are alone fruitful, and those (like munificence etc.) that are connected with the other life, are not fruitful. This is the reason why there is no distinction between the lives of creatures in the two *bhavas*.

Bhagavāna:—But *sādṛīśatā* can never exist without cause as *sādṛīśatā* itself is produced from *Ḳarman*. Now, when you take *Ḳarman* (like *dāna* etc.) connected with the other life, to be fruitless, there is no scope for *sādṛīśatā* to exist.

Sudharman—Sādṛīśatā of *jīvas* could be brought about even in absence of *Ḳarman* as in the case of *ghaṭa* produced from earth.

Bhagavāna:—If *sādṛīś'ya* exists even in absence of *Ḳarman* there will be *akritāgama* (*i. e.*, springing up of the un-accomplished object), as well as *kritanās'a* (*i. e.* destruction of the accomplished object). Thus, the existence of *Ḳarman* itself is denied. When there is no *Ḳarman*, how can the *parabhava* exist? And when the existence of *parabhava* is denied, the existence of *sādṛīśya* between two *bhavas* will automatically be denied.

Sudharman:—The existence of *bhavāntara* could be brought about even in absence of *Ḳarman* as in the case of lifeless objects when *Ḳārya* and *kāraṇa* are the same.

Bhagavāna:—In that case, *O Sudharman!* the production, as well as, the destruction of *bhavāntara* will also be *niṣkāraṇa*. Consequently, the practice of austerities, munificence, and vows etc. would be good-for-nothing, as *bhavāntara* will not depend upon those actions, and all people—whether doing good or bad deeds—will have the same prototype life. Moreover, you should also take the *vaiśadṛīś'ya* or dissimilarity of various *jīvas* from each other to be *niṣkāraṇaka* like *bhavāntara*. For, like *bhavāntara*, there is *kāraṇūbhava* in case of *vaiśadṛīś'ya* also.

Trans. 237 Again, the opponent might believe that (the *kārya* could be brought about even in absence of *Karma*. What objection would arise if it were its very nature as in the case of *kāryas* like *ghaṭa* etc., which bear natural resemblance with their *kāraṇas* ? (1785)

*D. C.—Sudharman:—*Just as, it is by virtue of their *svabhāva* that objects like *ghaṭa* etc. are produced as a natural result of their respective *kāraṇas* but without the help of *karman*, the *bhavāntara* is also produced by virtue of its own *svabhāva* even in absence of *Karman*.

Bhagavāna—Kāryas like *ghaṭa*, *O Sudharman* ! could never be produced merely by virtue of their *svabhāva*, but they have to depend upon *kartā* and *kāraṇa* also. So, in the production of *Śarīra* also, *kartā* and *kāraṇa* are of primary importance. This leads us to believe that in the production of *bhavāntara*, *ātman* which is different from body, is the *kartā*, and *Karman*, the *kāraṇa*, just as potter is the *kartā*, and *chakra* etc. act as *kāraṇas*, when *ghaṭa* is produced.

*Sudharman:—*Since *kāryas* like *ghaṭa* are directly apprehensible, potter and *chakra* etc. may respectively be taken as their *kartā* and *kāraṇas*. But *kāryas* like *śarīra* in *bhavāntara* are produced naturally like the multi-coloured changes in clouds etc. It is not therefore, possible to seek *Karman* as a *kāraṇa*, in the production of *bhavāntara*.

*Bhagavāna:—*Your argument is totally unfounded. *Kāryas* like *śarīra* etc. are not *svābhāvika* because they have a beginning, as well as, a definite *ākāra* like *ghaṭa*. You have taken the other life to be the same as this, because, according to you, *Kārya* is exactly similar to *kāraṇa*. But this principle of *sadṛśis'atā* is not applicable in case of *abhrādivikāras*, as they are peculiarly different from the objects having definite *ākāra*.

The *hētu* that (works) in its existence, (works) in case of *Karman* also. (Or), what objection (would arise), if *svabhāva* becomes a synonym of *Karman*, and what is the *hētu* (in believing) that *svabhāva* is always the same? (1786-1787-1788)

D. C.—The point is that since you have taken *svabhāva* to be the same for ever, as the same life is repeated in various *bhavas* you should state the reason for its *nityasadriṣatā*. You might say that there is no *hētu* as such, as *nityasadriṣa* by virtue of its own self. For, the same argument could be advanced in case of *vaisadriṣya* of the *bhavās* as well.

And, if it is *a-mūrta*, O *Sudharman* ! even that *a-mūrta svabhāva* does not become the cause of body in absence of instruments, as well as, on account of the corporeal nature of *Kārya* (indicated) by the perception of happiness etc. (1789-1790)

टीका—व्याख्या—स स्वभावो मूर्तः, अमूर्तो वा ? । यदि मूर्तः, तर्हि कर्मणा सह तस्य को विशेषः ? संज्ञान्तरमात्रविशिष्टकर्मैवेत्यमुक्तं स्यादिति । न चासौ सर्वदैव सहशो युज्यते, परिणामित्वात्. दुग्धादिवत् । अथवा, मूर्तत्वादेवाभ्रादिविकाहवदिति । अथामूर्तोऽसौ स्वभावः, तर्हि नैष देहादीनामारम्भकः, अनुपकरणत्वात्, दण्डादिविकलकुलालवत्, अमूर्तत्वादेव वा, आकाशवत् । “ न य हवइ सुहम्म ! सो अमुत्तो वि त्ति ” किञ्च, सुधर्मन् ! इतोऽपि स स्वभावोऽमूर्तो न युक्तः, शरीरादेस्तत्कार्यस्य मूर्तिमत्त्वात् । न ह्यमूर्तस्य नभस इव मूर्तं कार्यमुपजायते । तथा, सुख-संविच्यादेश्च नायममूर्तः । इदमुक्तं भवति—कर्म तावद् भवता नेष्यते, स्वभाववादित्वात् । ततश्च शरीरादीनि, सुख-दुःखसंविच्यादीनि च स्वभावस्यैव कार्याण्येष्टव्यानि, तस्य चामूर्तत्वे नैतान्युपपद्यन्ते । ततो यथा द्वितीयगणधरवादे कार्यस्य मूर्तत्वात्, सुखसंविच्यादेश्च कर्मणो मूर्तत्वं साधितम्. तथेह स्वभावस्यापि तत् साधनीयम् । तथा च प्रागुक्तम्—

इति ॥ २४१-२४२ ॥ (१७८९-१७९०) ॥

D. C.—Consider whether *svabhāva* is *mūrta* or *a-mūrta*. If it is *mūrta*, *svabhāva* will be nothing but a synonym of *Karman*. Moreover, the property of *sadrīśatā* will never be applied if *svabhāva*, is *mūrta*, because like milk, or like the *mūrta* clouds having a number of forms, *svabhāva* will also possess a number of *pariṇamas*.

If *svabhāva* is *a-mūrta* then also, like *kaśa* it does not become the *hetu* of *saśira* because of the absence of *upkārṇas*. Secondly, an incorporeal *kāraṇa* can never produce a corporeal *kārya*. So, *svabhāva*—should not be called *a-mūrta* when the *kāryas* of *svabhāva* such as the perception of *sukha*, *duḥkha* etc. are *mūrta*.)

Now the second alternative *viz.* that *svabhāva* is *niṣkāraṇatā* is discussed—

अहवाऽकारणतु च्चिय सभावओ तोवि सरिसया कत्तो ।
किमकारणओ न भवे विसरिसया किं व विच्छत्ती ॥ २४३ ॥ १७९१)

Ahava'kāraṇau cciya sabhāvaō tovi sarisayā katto ।

[अथवाऽकारणत एव स्वभावतस्ततोऽपि सदृशता कुतः ।

Athava'kāraṇata eva svabāvatastato'pi sadrīśatā kutah ।
Kimakāraṇato na bhaved visadrīśatā kim vā vicchittiḥ ? ॥243॥]

Trans.—243 Or, if (*bhāvāntara* is produced) by virtue of *svabhāva* (and) without any reason, whence is *sadrīśatā*

† Vide verses 1625, 1626.

(to be found ? (And) why (should) not dissimilarity take place without reason ? and why not destruction also ? (1791)

टीका—अथ स्वभावत एव भवोत्पत्तिरित्यत्र “अकारणत एव” इत्ययमर्थोऽभिप्रेतः, “तो वि त्ति” तथापि हन्त ! परभवे सदृशता कुतः ? । कोऽभिप्रायः ? । इत्याह—यथाऽकारणतः सदृशता भवति, तथा किमित्य-कारणतः एव विसदृशता न स्यात् ? । अकस्माच्चाकारणतो भवविच्छित्तिः कस्माद् न स्यात् ? अकस्माच्च भवन् स्वरविषाणादिरपि भवेत् । शरीरादीनां चाकारणतो भवतामभ्रादीनामिव प्रतिनियताकारत्वादिरूपता न स्यात् । तस्माद् नाकारणता स्वभाव इति ॥ २४३ ॥ (१७९१) ॥

D. C — Sadṛis'atā of bhavāntara cannot be established even if you believe that it is produced without reason. For, just as sadṛis'atā is taken to have been produced without reason, vi-sadṛis'atā will also take place without reason. Similarly, destruction of bhava will also take place without any reason, and following the same procedure, a non-existent object like kharaviṣāna will also come into existence without any reason. Moreover, objects like s'arīra etc. will lose their definite shape and such other characteristics on account of their resemblance with abhra-vikāra, inasmuch as they are produced without reason. Hence, it is not possible to believe svabhāva as niṣkāraṇatā itself.

Taking the third alternative viz. that svabhāva is vastudharma, the author states :—

अहव सहावो धम्मो वत्थुस्स, न सो वि सरिसओ निच्चं ।

उप्पाय-ट्ठिह-भंगा चित्ता जं वत्थुपज्जाया ॥ २४४ ॥ (१७९२)

Ahava sahāvo dhammo vatthussa, na so vi sarisao niccama ।

Uppāya-ṭṭhih-bhāṅgā cittā jama vatthupajjāyā ॥ 244 ॥ (1792)

[अथवा स्वभावो धर्मो वस्तुनः, न सोऽपि सदृशको नित्यम् ।

उत्पाद-स्थिति-भङ्गाश्चित्रा यद् वस्तुपर्यायाः ॥ २४४ ॥ (१७९२)

Athavā svabhāvo c'harṃo vastunaḥ na so'pi sadṛśako nityam ।
Utpāda-sṭhiti-bhaṅgāscitrā yad vastuparyāyāḥ ॥ 244 ॥ (1792)]

Trans.—244 Or, if *svabhāva* is a property of an object that also will not be always the same. Because, the *paryāyas* of production, retention and destruction of an object are distinct (from each other). (1792)

टीका—अथ वस्तुनो धर्मः स्वभावः, सोऽपि सर्वदैव सदृशो न घटते, इति कथं सर्वदैव शरीरादीनां सदृशतां जनयेत् । कथं पुनरस्य सदैव सदृशता न घटते ? इत्याह—“उत्पायेत्यादि” यद् यस्मादुत्पाद-स्थिति-भङ्गादयश्चित्रा वस्तुपर्यायाः, न च ते सदैवाऽवस्थितसादृश्याः, नीलादीनां वस्तुधर्माणां प्रत्यक्षत एवान्यान्यरूपतया परिणतिदर्शनात् । किञ्च, वस्तुधर्मोऽसौ भव-स्वभाव आत्मधर्मो वा स्यात्, पुद्गलधर्मो वा ? । यद्यात्मधर्मः, तर्हि नासौ शरीरादीनां कारणम्, अमूर्तत्वात्, आकाशादिवत् । अथ पुद्गलधर्मः, तर्हि कर्मैवासौ, कर्मणोऽपि हि पुद्गलास्तिकायधर्मत्वेनास्माभिरभ्युपगतत्वा दिति ॥ २४४ ॥ (१७९२) ॥

D. C.—*Svabhāva* will not be the same throughout even if you believe that it is a *vastudharma*. Hence, it is not possible to maintain for ever the *sādṛśya* of *śarīra* etc. also. For, the three stages of production, existence and destruction are not always the same in case in case of a single object. Distinction of properties in case of black objects is easily perceived

Secondly, is this *vastudharma*, a *dharma* of the *ātman* or a *dharma* of the *puḍgala*? If it is the property of *ātman* it can never become the cause of *śarīra* etc. For it will be *a-mūrta* like *ākāśa* in that case. On the other hand, if this *vastudharma* is the property of a *puḍgala*, then it will become the *Karman* itself, as *Karman* is nothing but a *puḍgala-dharma* itself.

Trans—245 O Sudharman ! That (*svabhāva*), being the *parināma* of *Karman* composed of a definite body, (becomes) its *dharma* also. (And), what is wrong if *svabhāva* is taken as the varitable cause of the (entire mundane) world ? (1793)

टोका—सुधर्मन् ! असौ वस्तुधर्मो भवत्स्वभावो धर्मो भवतु, को दोषः ?—न कश्चित्, युक्तियुक्तत्वात् । किं विशिष्टो धर्मः ? इत्याह— परिणामः । कस्य ? । कर्मणः । कथंभूतस्य ? । पुद्गलमयस्य । कथंभूतो यः कर्मपरिणामः ? । इत्याह—हेतुः । कस्य ? । जगतः—जगद्वैचित्र्यस्य । कदेवं कर्मलक्षणस्य वस्तुनः कर्मपरिणामरूपो धर्मो भवति स्वभावः, नात्र काचिद् दोषापत्तिः । अस्माकमपि संमतोज्यमर्थः, केवलं सर्वदा सदृशोऽसौ न भवति, किन्तु चित्रो मिथ्यात्वादिहेतुवैचित्र्याद् विचित्रो विविध-स्वभावः । अतो न तस्मात् परभवे सादृश्यमेव, किन्तु विचित्ररूपतेति ॥ २४५ ॥ (१७९३) ॥

D. C.—O Sudharman ! Since *svabhāva* has been taken as a *vastu-dharma*, it may be taken as a *dharma* of the *pudgalamaya Karman* also. So, there is no objection in admitting *svabhāva* as the *parināma* of *vicitra karman*, and hence as the *hētu* of universal *vicitratā* also.

In other words, it is due to the nature of the *vicitra Karman* that this world is full of varieties. The only point to remember in this case, is that it is not always the same, but it is full of varieties on account of various *hétus* such as vanity, hostility etc.

Trans.—246–247. *O Sudharman!* at every single moment, each and every object (of the Universe) is being produced, destroyed, or retained by (virtue of) some property or the other. So, none (of them) has its former properties similar to the latter ones. On the other hand, by virtue of (certain) common properties, all the three worlds are similar. (1794–1795)

टीका—व्याख्या—अथवा, सुधर्मन् ! किमेक एव परमवः ?, सर्वमेव हि घट-पटादिकं भुवनान्तर्गतं वस्तु कैश्चित् पूर्वपर्यायैः समाना-ऽसमानपर्यायैः प्रतिक्षणमुत्पद्यते, कैश्चित् पुनरुत्तरपर्यायैः समाना-ऽसमानपर्यायैर्व्येति व्युपरमति, कैश्चित्तु तदवस्थमेवास्ते । ततश्चैवं सति तदस्त्वात्मनोऽपि पूर्वपूर्वधर्मै-

D. C.—Not only the *bhavāntara*, *O Sudharman* ! but each and every object (like *ghaṭa* and *paṭa*) in this Universe, is being produced, destroyed, or retained in its present state at every moment by virtue of a number of similar and dissimilar *paryāyas*. But, on the other hand, all the three worlds resemble each other also on account of certain common properties. Consequently, a past life may also resemble the present life on account of some common properties contained in both.

Trans.—248 What (object) is (taken as) completely similar or dissimilar either in this life or in the next life ? Everything is similar as well as dissimilar having permanent as well as transitory forms. (1796)

टीका-को ह्यर्थोऽर्थान्तरैरात्मना वा सहेहभवेऽपि सर्वथा सदृशोऽदृशो वा, किं पुनः परभवे ? । तस्मात् सर्वमपि वस्तु सर्वेणापि सह समाना-

(१७९६) ॥

D. C.—It is not possible to find an object which is similar or dissimilar to other objects or even to itself even in this life, and much less in the other.

All objects are found to be similar, as well as, dissimilar to other objects even in this life. So, it is no use holding the view that they are the same in the other life also. Similarly, all objects have permanent, as well as, transitory forms.

This idea is illustrated by an example stated below—

जह निघएहिं वि सरिसो न जुवा भुवि बाल-वृद्धधम्मंहि ।
जगओ वि समो सत्ताहएहिं तह परभवे जीवो ॥ २४९ ॥ (१७९७)

Jaha niyaēhim vi sariso na juvā bhuvī bāla-vāddhadhammēhim ।

Yathā nijakairapi sadrišo na yuvā bhuvī bāla-vridhdhadharmrih ।
Jagato'pi samah sattādikatstathā parabhave jivah ॥249॥ (1797,]

Trans.—249 Just as a young man does not resemble his own past and future forms of childhood and old age respectively on (this) earth, but at the same time resembles the whole of earth on account of the property of existing etc, in the same way, *jīva*, too, becomes similar, as well as, dissimilar in the other life. (1797)

टीका—यथेह युवा निजैरप्यतीता-ऽनागतैर्बाल-वृद्धादिपर्यायै-रात्म-

D. C.—Just as a young man does not resemble his own forms of childhood and old age, but at the same time resembles

all other objects in this world on account of certain common properties like the quality of existing etc., in the same way. *Jīvas* in the other life, are not merely similar but dissimilar to other objects also.

Moreover,

Trans.—250 A divine man resembles the whole of mundane world on account of (properties like) existence etc. and is distinguished (from it) as well by means of (his) state of being a deity etc. In the same way, (he) is permanent and at the same time transitory also. (1798)

टीका-मनुष्यो मृत्वा देवत्वमापन्नो जगत्त्रयस्यापि सत्तादिभिः पर्यायैः सदृशः, देवत्वादिभिस्तु विसदृशः, इति नैकान्तेक कापि सदृशता । तथा, द्रव्यतयाऽसौ नित्यः, पर्यायतया त्वनित्य इत्याद्यपि वक्तव्यम् । अत्राह- नन्वस्माभिरपि नैकान्तेन परभवे सादृश्यमभ्युपगम्यते, किन्तु समानजात्यन्वयमात्रमेवेष्ट्यते, पुरुषादिर्मृतः पुरुषादिरेव भवतीति । एतदप्ययुक्तम्, कर्मजनितो हि परभव इति साधितम् । तच्च मिथ्वाल्लादिविचित्रहेतुजन्यत्वाद् विचित्रमेवेति, अतस्तज्जन्यः परभवो विचित्र एव युज्यते, न तु समानजात्यन्वयः सिध्यतीति ॥ २५० ॥ (१७९८) ॥

D C—A person who becomes *déva* after death, resembles all the three worlds, on account of the common characteristics

like existence etc but at the same time, he is distinguished from the three worlds on account of his *dévatva* etc. This shows that absolute *sadṛis'atā* is not acceptable but *visadṛis'atā* has also equal scope with it. Similarly, all objects are *nitya* on account of their *dravyatva*, and, at the same time, *a-nitya* because of their varied transformations

Sudharman :—I accept *sadṛis'atā* of objects on account of nothing but their relation to the same gender. That is, according to me, *puruṣa* turns out to be a *puruṣa* and animals remain as animals in the *bhavāntara*.

Bhagavāna :—Your argument, *O Sudharman* ! is fallacious. The next life is attained by virtue of actions accomplished in this life. These actions come into existence on account of various *hetus* such as *mithyātva* etc. Hence, *bhavāntara* which is produced by these actions should also be taken as *vicitratā* on account of the *vicitratā* of actions, but *sadṛis'atā* can never fit in by means of their relation to the *sadṛis'a* gender etc.

For,

उक्करिसा-ऽवक्करिसा न समाणाए वि जेण जाईए ।

सरिसग्गाहे जम्हा दाणाइफलं विहा तम्हा ॥ २५१ ॥ (१७९९)

Ukkarisā-'vakkarisā na samānāe vi jēṇa jāīe ।

Utkarṣā-'pakarṣau na samānāyāmpi yena jātau ।

Sadṛisāgrahe yasmād dānādiphalam vṛithā tasmāt ॥251॥ (1799)]

Trans.—251 In (case of) (absolute) sameness, there will be no (scope for) elevation or degradation even in the

same genesis, (and) the fruits of munificence etc. will become futile. (1799)

टीका—सदृशग्रहे समानजातीयताग्रहे सति समानायामपि जातो येन यस्मादीश्वर-दरिद्र-कुलीना-ऽकुलीनादिरूपेणोत्कर्षा-ऽपकर्षो न घटां प्राञ्चतः । यो हि यादृश इहभवे, स यदि परभवेऽपि तादृश एव, तर्हि य इहभवे ईश्वरः स परभवेऽपि तादृश एव, एवं दरिद्रादिष्वपि वाच्यम् । ततश्चेहमवात् परभवे सर्वप्रकारैरप्युत्कर्षा-ऽपकर्षो न स्याताम्. किन्त्वेकान्तसदृशतैव भवेत् । “तमह ति” तस्माद् मोक्तव्योऽयं सादृश्यग्रह इति प्रक्रमाद् द्रष्टव्यम् । अथेत्यमाचक्षीयाः—मा भूतामुत्कर्षा-ऽपकर्षो, का नो हानिः ? इत्याह— “जम्हा दाणाऽफलं विह ति” चकारस्य गम्यमानत्वाद् यस्माच्चन्त्यं परत्रोत्कर्षा-ऽपकर्षयोरभावे दानादिफलं वृथा संपद्यते । लोको हि परत्र देवादिसमृद्धि-प्राप्त्याऽऽत्मन उत्कर्षार्थं दानादिप्रवृत्तिं विदधाति । यदि चोक्तयुक्तयोत्कर्षाघ-भावाद् दरिद्रो दान-तप-तीर्थावगाहनाद्यपि कृत्वाऽमुत्र दरिद्र एव स्यात्, तर्हि क तद्दानादिफलम् ? इत्यपार्थिका दानादौ प्रवृत्तिः, तस्माद् न विधेयः सादृश्यग्रह इति ॥ २५१ ॥ (१७९९) ॥

D. C.—If you believe in absolute sameness, there will be no scope either for elevation or for degradation even in the same genesis. One, who is rich in this life will remain rich in the next life also in spite of his sinful actions, and a poor man will remain poor in the next life, even if he performs benevolent duties such as *dāna*, *tapas*, *īrtha-snāna* etc. according to your belief of absolute *sadṛśis'atā*. Thus, there will be no reward of either good or evil actions, but the same type of life will go on throughout all the *bhavas*. So, if there is no *utkarṣa* or *apakarṣa* in the next life, there will be no utility for various benevolent actions such as munificence, austerities, ablations in holy waters etc., to be followed by people for the attainment of *Vevatva* etc. To believe in absolute *sadṛśis'atā* is, therefore, 'not' proper. 251. (1799).

And the *Vēdapadas* will also be wrong if absolute *sā ṛśis'ya* is accepted—

जं च सिगालो वह् एस जायए वेयविहियमिच्चाइं ।

सग्गीयं जं च फलं तमसंबद्धं सरिसयाए ॥ २५२ ॥ (१८००)

Jam ca sigālo vai ésa jāyae Vēyavihiyamiccāim ।

[यच्च शृगालो वै एष जायते वेदविहितमित्यादि ।

Yacca śrigālo vai esa jāyate Vedavihitamityādī ।

Svargīyam yacca phalam tadasambaddham sadriśatāyām ॥ 252 ॥

Trans.—252 Statements of *Vedas* such as “*Srigālo vai esa jāyate*” etc., as well as, the reward of heaven laid down by *Vēdas*, will prove inconsistent in (case of) *sadriśatā* (being admitted). (1800)

टीका—यच्च “शृगालो वै एष जायते यः सपुरीषो दह्यते” इत्यादि वेदविहितं तदपि परमत्रसदृशताग्रहेऽसंबद्धमेव स्यात्, पुरुषादेरमुत्र शृगालतयानुपपत्तेः । तथा, यदपि “अग्निहोत्रं जुहुयात्, स्वर्गकामः” तथा, “अग्निष्टोमेन यमराज्यमभिजयति” इत्यादिकं स्वर्गीयफलमुचकत्वात् स्वर्गीयं फलं तदप्यसंबद्धं भवेत्, मनुष्यस्य त्वदभिप्रायेण देवत्वानुपपत्तेरिति । “पुरुषो वै पुरुषत्वमश्नुते, पशवः पशुत्वम्” इत्यादीनां च वेदपदानामयमर्थः—कोऽपि पुरुषः खल्विह जन्मनि प्रकृत्या भद्रको विनीतः सानुक्रोशोऽमत्सरश्च मनुष्यनाम-गोत्रे कर्मणी बद्धा मृतः सन् पुरुषत्वमश्नुते, न तु नियमेन सर्व एव, अन्यस्यान्यकर्मवशगस्यान्यथाप्युत्पत्तेः । एवं पशवोऽपि केचिद् मायादिदोषवशात् पशुनामकगोत्रे कर्मणी बद्ध्वा परमवे पशवो जायन्ते, न तु सर्वेऽपि, नियमेन कर्मापेक्षित्वाज्जीवगतेरिति । तदेवं तस्यापि च्छिन्नः संशयः ॥ २५२ ॥ (१८००) ॥

D. C.—If it is admitted, O blessed *Suduarman* ! that the next life is exactly similar to this life, the sentences of *Vēdas* such as “*Srigālo vai esa jāyate yah sa-purīṣo dahyatē*” etc; which tell us that one who is burnt along with foeces becomes fox

in the next life, will turn to be inconsistent. For, according to you, a man should become a man* only in the next life. Secondly, sentences like “*agnihotram juhuyāt svārgakāmaḥ*” and “*agniṣṭomēna yamarājamabhijayati*” which lay down the conditions for the attainment of *svarga*, will also become inconsistent, because a man does never become deity according to your theory of *sadṛiṣṭā*.

The real interpretation of *puruṣo vai puruṣatvamaṣnutē pas'avaḥ pas'utvam*” etc. is this :—A person who is pious, cultured, and self-less, attains the genesis of man when he dies away after having attached his actions to the human name and lineage. But that does not mean that all *puruṣas* attain *puruṣatva* as a rule. By virtue of different types of actions, people are liable to be born in an absolutely different genesis also. The same is the case with animals. On account of certain faults like illusion etc. certain animals remain as animals when they pass away in the next life, having attached their actions to the name and lineage of animals. But all *paśus* do not attain *paśutva* as a rule because their movement from one *bhava* to another depends upon their actions.

Thus,

छिन्नमि संसयमि जिणेण जरा-मरणविप्पमुक्केण ।

सो समणो पव्वइओ पंचहिं सह खंडियसएहिं ॥ २५३ ॥ (१८०१)

D. C.—O Maṇḍika ! You doubt the existence of bandha and mokṣa, because you have heard various Vedapadas having contradictory meanings.

“Sa ēṣa viguṇo vibhu r-na badhyatē saṃsarati vā na mucyate mocayati vā na vā ēṣa bāhyamabhyantaram vā veda” etc. as well as, like,

“Na ha vaṣ sa-śarīrasya priyā-priyayorapahatir asti, as'arīram vā vasantam priyā-priye na spṛś'ataḥ etc.

You have not grasped the real meaning of these sentences. According to you, the interpretation of the first sentence, is this:—The all-pervading Soul, which being free from attributes like *sattva*, *rajas*, and *tamas*, is never bound by the clutches of *pāpa* and *puṇya*, nor does it proceed further. Since there is absolute *bandhābhāva*, this (Soul) can neither be detached from *karma*, nor can it relieve the other from the *bandhas*.

It knows neither the external attributes like pride etc. nor does it recognize its own internal self, on account of *jīva* being the property of *prakṛti* which is *acetana* here. So, the statements such as stated above, assert the absolute *abhāva* of *bandha* and *mokṣa* between *jīva* and *Ḳarma*.

On the other hand, sentences, such as, “*na ha vai*” etc., would mean quite the reverse (according to you). They assert that there is no *abhāva* of *priya*, and *a-priya*, to one having *sarīra*, while the *a-sarīri* *ātman* is never touched by them. Since the external, as well as, internal *anādi sarīras* are *santānayukta*, the *samsārī jīvas* are not deprived of the experiences of *sukha* and *duḥkha*, while the *a-sarīri* *ātman* is never touched by *sukha* and *duḥkha* on account of the absolute *abhāva* of its *kaṛaṇa Ḳarman*. Thus, these *Vedapadas* are inclined to assert the existence of *bandha* and *mokṣa*.

Such sentences have given rise to your doubt, which is not at all proper. Your interpretation of the sentences is not correct. I, therefore, give you their real interpretation. Please listen carefully—

तं मनसि जइ बंधो जोगो जीवस्स कम्मणा समयं ।

पुत्र्वं पच्छा जीवो कम्मं व समं व ते होज्जा ? ॥ २५७ ॥ (१८०५)

Tam mannsi jai bandho jogo jivassa kammunā samayam ।

Puvvam pacchā jivo kammam va samam va te hojjā ? ॥257॥ (1805)

[त्वं मन्यसे यदि बन्धो योगो जीवस्य कर्मणा समकम् ।

Tvam manyase yadi bandho yogo jivasya karmaṇā samakam ।

Pūrvam paścājjīvaḥ karma vā samam vā te bhavetām ? ॥257॥

Trans.—257 If you believe that *bandha* is the union of *jīva* with *Ḳarma*, will the *jīva* be produced first and then *Ḳarma*, or *Ḳarma* be produced first, and then *jīva*, or both together ? (1805)

टीका—‘वेयपयाण य’ इत्यत्र चशब्दाद् युक्ति च त्वं न जानासि ।
 कुतः ? यस्मादायुष्मन् मण्डिक ! त्वमेवं मन्यसे—जीवस्य बन्धो यदि कर्मणा
 समकं सार्धं योगः संयोगोऽभिप्रेतः स खल्वादिमान् आदिरहितो वा ? ।
 यथादिमान्, ततः किं पूर्वं जीवः प्रसूयेत पश्चात् कर्म, पूर्वं वा कर्म पश्चाज्जीवः
 प्रसूयेत, समं वा युगपद् वा तौ द्वावपि प्रसूयेयाताम् ? इति पक्षत्रयमिति ॥
 २५७ ॥ (१८०५) ॥

D. C.—If, O long-lived *Maṇḍika*, you believe that *bandha* means the contact of *jīva* with *Karma*, consider whether that contact is *ādimān* or *ādirahita*. If it is *ādimān* there will be three alternatives: (1) *Jīva* will be produced first and then *Karma* or (2) *Karma* will be produced first and then *jīva* or (3) both of them will be produced simultaneously.

Refuting the first alternative, the author states :—

न हि पुव्वमहेऊओ खरसंगं वायसंभवो जुत्तो ।

निष्कारणजायस्स य निष्कारणउ च्चिय विणासो ॥ २५८ ॥ (१८०६)

Na hi puvvamaheūo kharasaṅgam vāyasambhavo jutto ।

Nikkāraṇajāyassa ya nikkāraṇau cciya viṇāso ॥258॥ (1806)

[न हि पूर्वमहेतोः खरशृङ्गनिवात्मसंभवो युक्तः ।

निष्कारणजातस्य च निष्कारणक एव विनाशः ॥ २५८ ॥ (१८०६)

Na hi pūrvamahetoḥ kharasṛiṅgaimvātmasambhavo yuktaḥ ।
 Niṣkāraṇajātasya ca niṣkāraṇaka eva vināśaḥ ॥ 258 ॥ (1806)]

Trans.—258 Like *kharasṛiṅga*, the production of Soul is not justified on account of the absence of *hetu*. And that which is born without any cause, has its end (also) without any cause. (1806)

टीका—“पूर्वं जीवः पश्चात्कर्म” इत्येतदयुक्तम्, यतो न कर्मणः पूर्वं
 “खरसंगं वायसंभवो जुत्तो” खरशृङ्गस्येवात्मनः संभवो युक्तः, अहेतुकत्वात्,

इह यदहेतुकं तद् न जायते, यथा खरशृङ्गम्, यच्च जायते तद् निर्हेतुकमपि न भवति, यथा घटः, निष्कारणस्य च जातस्य निष्कारण एव विनाशः स्यादिति ॥ २५८ ॥ (१८०६) ॥

D. C.—According to the first alternative stated above, *jīva* is born first and then *Karma*. Now since *Karma* is the *hētu* of *jīvas*, the production of *jīva* is totally unjustified like the production of *khara-sṛiṅga* on account of its *a-hétukta*. For, that which has no *hētu*, is never produced like *khara-sṛiṅga*, and that which has already been produced is never *nir-hétuka*, as in case of *ghaṭa*. Moreover, that which is born without any cause, has even to meet its end without any end.

Proceeding further the author argues—

अहवाऽणाह च्चिय सो निक्कारणओ न कम्मजोगो से ।

अह निक्कारणओ सो, मुक्कस्स वि होहिइ स भुज्जो ॥२५९॥ (१८०७)

Ahavāṇāi cciya so nikkāraṇaṇo na kammajogo sé ।

Aha nikkāraṇaṇo so, mukkassa vi hohiī sa bhujjo ॥ 259 ॥ (1807)

[अथवाऽनादिरेव स निष्कारणको न कर्मयोगस्तस्य ।

अथ निष्कारणः सः, मुक्तस्यापि भविष्यति स भूयः ॥२५९॥ (१८०७)

Athavā'nādirēva sa niṣkāraṇako na karmayogastasya ।

Atha niṣkāraṇaḥ saḥ muktasyāpi bhaviṣyati sa bhūyah ॥259॥ (1807)]

Trans.—259 Or, that (soul) being *anādi*, may be beyond any cause, and (hence) have no connection with *Karma*. If it were beyond any cause, it might have belonged to a *mukta* being also (1807)

टीका—अथ चेत् कर्मणः पूर्वमात्माऽनादिकालसिद्ध एव, इति किं तस्य सहेतुक-निर्हेतुकचिन्तया ? इति । अत्रोच्यते—‘ निक्कारणओ इत्यादि ’ यद्येवम्, ततः ‘से’ तस्य जीवस्य कर्मयोगः कर्मबन्धो न प्राप्तोऽकारणत्वान्, नभस इव । अथ निष्कारणोऽप्यसौ भवति, तर्हि मुक्तस्व

भूयः स मविष्यति, निष्कारणत्वाविशेषात्, ततश्च मुक्तावप्यनाश्वास इति
॥ २५९ ॥ (१८०७) ॥

*D. C.—Maṇḍika:—*Existence of soul has already been established from times immemorial, before *Karma* was produced. It is, therefore, useless to consider whether its production is *sa-hetuka* or *nir-hetuka*.

*Bhagavāna:—*In that case, *O Maṇḍika* ! on account of its causelessness, *ātman* will have no bondage with *Karma* as it has no bondage with *ākāśa*.

*Maṇḍika:—*No, in spite of its causelessness, the soul is in contact with *Karma*.

*Bhagavāna:—*Then, it will be attached to a *mukta* (liberated) being also. Thus, one that has already been liberated from the worldly bondages, will again come into those bondages on account of the common property, *viz:—niškāraṇatā* belonging to both of them. 259 (1807).

होज्ज स निच्चमुक्को बंधाभावम्मि को व से मोक्खा ? ।

न हि मुक्कववएसो बंधाभावे मओ नभसो ॥ २६० ॥ (१८०८)

Hojja sa niccamukko bandhābhāvammi ko va sé mokkho ? ।

Na hi mukkavvavaésö bandhābhāvé maö nabhasö ॥260॥ (1808)

[भवेत् स नित्यमुक्तो बन्धाभावे को वा तस्य मोक्षः ? ।

न हि मुक्तव्यपदेशो बन्धाभावे मतो नभसः ॥ २६० ॥ (१८०८)

Bhavet sa nityamukto bandhābhāve ko vā tasya mokṣah ? ।

Na hi muktavyapadeśo bandhābhāvé mato nabhasah ॥260॥ (1808)]

*Trans.—*260 If it is ever liberated in absence of bondage, how will its *mokṣa* exist? For, in absence of bondage, attribute of liberation could never be accepted as in the case of *ākāśa*. (1808)

टीका—अथवा, कर्मयोगाभावाद् नित्यमुक्त एवासौ भवेत् । यदि वा,

बन्धाभावे कः किल तस्य मोक्षव्यपदेशः ? । न ह्यबद्धस्य नमसः कस्यापि
 व्युक्तव्यपदेशो मतः, बन्धपूर्वकत्वाद् मोक्षस्य । तस्माद् न “ पूर्व जीवः पश्चात्
 कर्म ” इति प्रथमविकल्प इति ॥ २६० ॥ (१८०८) ॥

*D. C.—Maṇḍika:—*On account of the *abhāva* of *Karmayoga*,
 this *ātman* is also *nitya-mukta*.

*Bhagavān:—*If it is so, O *Maṇḍika*, how will *mokṣa* be
 attributed to it? For, one that is not susceptible to *bandha*,
 is never susceptible to *mokṣa* also, as in the case of *ākāśa*.
Mokṣa can be attributed only to those that undergo *bandhas*.
 The first alternative that *jīva* is produced first and then *Karma*,
 is, therefore, not acceptable. 260 (1808).

Now, the other two alternatives—*viz.*, that *Karma* is produced
 first and *jīva* afterwards or that both of them, are produced
 simultaneously—are refuted as follows:—

न य कम्मस्स वि पुव्वं कत्तुरभावे समुब्भवो जुत्तो ।

निक्कारणओ सो वि य तह जुगवुप्पत्तिभावे य ॥ २६१ ॥ (१८०९)

न हि कत्ता कज्जं ति य जुगवुप्पत्तीए जीव-कम्माणं ।

जुत्तो ववाएंसोऽयं जह लोए गोविसाणणं ॥ २६२ ॥ (१८१०)

Na ya kammaṣṣa vi puvaṃ katturabhāve samubbhavo jutto ।

Nikkāraṇāṅṅo so vi ya taha jugavuppattibhāve ya ॥ 261 ॥ (1809)

Na hi kattā kajjaṃ ti ya jugavuppattié jīva-kammāṇaṃ ।

Jutto vavaéso'yam jaha lōé govisaṇṇaṇaṃ ॥ 262 ॥ (1810)

[न च कर्मणोऽपि पूर्वं कर्तुरभावे समुद्भवो युक्तः ।

निष्कारणकः सोऽपि च तथा युगपदुत्पत्तिभावे च ॥ २६१ ॥ (१८०९)

न हि कर्ता कार्यमिति च युगपदुत्पत्तौ जीव-कर्मणोः ।

युक्तो व्यपदेशोऽयं यथा क्लोके गोविषाणयोः ॥ २६२ ॥ (१८१०)

Na ca karmaṇo'pi pūrvam kartṛrabhāve samudbhavo yuktaḥ ।
 Niṣkāraṇakaḥ so'pi ca tathā yugapadūtpattibhāvé ca ॥ 261 ॥ (1809)
 Na bi kartā kāryamiti ca yugapadutpattau jīva-karmaṇoh ।
 Yukto vyapade'so' yam yathā loké govisāṅghayoh ॥ 262 ॥ (1810)]

Trans.—261-262 It is not appropriate (to believe) the production of *Karma* to be first in absence of *Kartā*, nor is it so even if it is *niṣkāraṇaka*. In case of both being produced simultaneously, the same (difficulties) will arise. Moreover, in (case of) simultaneous production of *jīva* and *Karma*, designation of *kartā* and *kārya* will not properly fit in as found in the popular example of the two horns of a cow. (1809-1810)

टीका-न च जीवात् प्राक् कर्मणोऽपि समुद्भवो युक्तः, कर्तुर्जीवस्य तदानीमभावात्, अक्रियमाणस्य च कर्मत्वायोगात्, निष्कारणश्चेत्यमसौ कर्मसमुद्भवः स्यात्, ततोऽकारणजातस्याकारणत एव विनाशोऽपि स्यादिति । तथा, युगपदुत्पत्तिभावे च “ प्रत्येकपक्षोक्ता दोषाः वाच्याः ” इति शेषः— निर्हेतुकत्वात् प्रत्येकबहुभयस्यापि समुदितस्यानुत्पत्तिरित्यादि । न च युगपदुत्पन्नयोर्जीव-कर्मणोः कर्तृ-कर्मभावो युज्यत इत्येतदेवाह—‘ न हीत्यादि ’ न हि युगपदुत्पन्नयोर्जीव-कर्मणोः “ अयं जीवः कर्ता ” “ इदं वा ज्ञानावरणादिपुद्गलनिकुरम्बं कर्म ” इति व्यपदेशो युज्यते, यथा लोके सव्ये-सरगोत्रिषाणयोरिति ॥ २६१--२६२ ॥ (१८०९--१८१०) ॥

D. C.—It is not appropriate to accept that *Karma* is produced first and *jīva* afterwards. For, the production of *Karma* is not possible without *jīva*, which is the *Karma* at the same time. And if that production of *Karmā* is *niṣkāraṇaka*, its end will also be *niṣkāraṇaka*.

It is also not proper to say that *jīva* and *Karma* are produced simultaneously. Because, in that case also, both being *nir-
 hēnka*, the same difficulties will arise.

Moreover, if *jīva* and *Karma* are produced together, they will no longer be taken as *kartā* and *kārya* but like the two

horns of a cow, they will be taken as twins produced together. 261-262 (1809-1810).

Now, coming to the second alternative at the root, the author proceeds:—

होज्जाण।इओ वा संबंधो तह वि न घडए मोक्खो ।
जोऽणाई सोऽणंतो जीव-नहाणं व संबंधो ॥ २६३ ॥ (१८११)

Hejjāṇāio vā sambandho that vi na ghadae mokkho ।
Jo'ṅāi so'ṅanto jīva-nahāṇam va saṃbandho ॥ 263 ॥ (1811)

[भवेदनादिको वा संबन्धस्तथापि न घटते मोक्षः ।
योऽनादिः सोऽनन्तो जीव-नभसोरिव संबन्धः ॥ २६३ ॥ (१८११)

Bhavedanādiko vā saṃbandhastathāpi na ghaṭate mokṣaḥ ।
Yo'nādiḥ so'ṅanto jīva-nabhsoriva saṃbandhaḥ ॥ 263 ॥ (1811)]

Trans.—263 Or, if the contact (of *jīva* with *Karma*) is (taken as) *anādika* (without any beginning), there will be nothing like *mokṣa*. That which is *anādi* like the contact of *jīva* and *ākāśa*, is *ananta* (endless) also. (1811)

टीका- स्यादेतत्, अनादिरेव जीव-कर्मणोः संबन्धः संयोगः । ननु तथापि मोक्षो न घटते, यस्माद् योऽनादिः संयोगः सोऽनन्तो दृष्टः, यथा जीव-नभसोः । न ह्याकाशेन सह जीवस्य कदाचिदपि संयोगो निवर्तते । एवं कर्मणापि सहासौ न निवर्तेत, तथा च सति मुक्त्यभावप्रसङ्ग इति ॥ २६३ ॥ (१८११) ॥

D. C.—If the contact of *jīva* with *Karma* is *anādika*, it should be even *ananta* like the contact of *jīva* with sky, and in that case, there will be no scope for *mokṣa* at all.

इय जुत्तीए न घटइ सुव्वइ य सुईसु बंध-मोक्खा स्ति ।
तेण तुह संसओऽयं न य कज्जोऽयं जहा सुणसु ॥ २६४ ॥ (१८१२)

lyā juttie na ghaṭai suvvai ya suisu bandha-mokkhā tti ।

Téna tuha saṃsao'yam na ya kajjo'yam jahā suṇasu ॥264॥ (1812)

[इति युक्त्या न घटते श्रूयते च श्रुतिषु बन्धमोक्षावीति ।

Iti yuktyā na ghaṭate śrūyate ca śrutiṣu bandha-modṣāviti ।

Téna tava saṃsāyo'yam na ca kāryo'yam yathā śṛiṇu ॥264॥ (1812)]

Trans -- 264 Thus, by means of the above-mentioned argument, *bandha* and *mokṣa* do not fit in. Still however, it is heard in the *Védas* (that they exist). This doubt of yours -which is (absolutely) improper-is due to that So, listen to me (now). (1812)

टीका--इत्येवं युक्तयुक्त्या बन्धो मोक्षश्च न घटते, श्रूयते च श्रुतिषु वेदवाक्येष्वसौ । ततस्तव संशयोऽयम् । यथा चायं न कार्यस्तथा श्रुणु सौम्य ! इति । उक्तः पूर्वपक्षः ॥ २६४ ॥ (१८१२) ॥

D. C.—The arguments advanced by you do not lead one to prove the existence of *bandha* and *mokṣa* as seen above. But since it has already been found in *Védas* that they exist, your doubt has come into existence, which is totally unworthy of you. Now, listen to me. 264 (1812).

Santāno'nādikah parasparam hetu-hetubhāvāt ।

Déhasya ca karmaṇaśca Maṇḍika ! bījā'nikurayoriva ॥265॥ (1813)]

Trans.—265 Since body and *Karma* are mutually related

like seed and sprout as *hetu* and *hetumat*, their expansion, *O Maṇḍika*, is *anādika*. (1813)

टीका-शरीर-कर्मणोरनादिः संतान इति प्रतिज्ञा, परस्परं हेतु-हेतुम-

प्लवत् एव, अनादित्वात् तत्संतानस्येति ॥ २६५ ॥ (१८१३) ॥

D. C.—The *santāna* of *s'arīra* and *Karma* is *anādi*, because both of them are related to each other as *hetu* and *hetumat* like seed and sprout. On account of this *anāditya* of *santāna*, the argument that *jīva* is born first and *Karma* afterwards, will automatically be null and void. 265 (1813).

Trans.—266 The body is such that it becomes the cause of (one) *Karma*, and effect of another, while *Karma* is also the cause of (one) body, and the effect of another. (1814)

टीका-अस्ति स कश्चिद् देहो योऽग्नेतनस्य कर्मणः कारणम्, यश्चान्य

D C—Some *dēha* is such that it serves as the cause of some future actions, while itself has already been the effect of some past actions. The *Karma*, in turn also serves as the cause of some body to come, while it has itself been the effect of some other body in the past. Thus, in this *anādi samsāra* the *santāna* of *dēha* and *Karma* is also *anādi* as it never stops to rest.

Maṇḍika:—But it is quite irrelevant to establish the *anāditva* of *Karma-santāna*. For, the point is to establish the existence of *bandha* and *mokṣa*.

Bhagdvān:—It is not so, *O Maṇḍika* ! “*Kriyate iti Karma*” that which is accomplished, is action. So, an unaccomplished action is never possible. In the accomplishment of *Karma*, its *kāraṇa* is nothing but *bandha*, and hence the significance of establishing the *anāditva* of *Karma-santāna*.

Maṇḍika:—If that which has been accomplished is *Karma*, who is the *kratā* of this *dēha* ? 266 (1814).

The *Bhagdvān* replies—

कस्ता जीवो कम्मस्स करणओ जह घडस्स घडकारो ।
एवं चिय देहस्स वि कम्मकरणसंभवाउ त्ति ॥ २६७ ॥ (१८१५)

*Kattā jīvo kammaṣṣa karaṇao jaha ghaḍassa ghaḍakāro ।
Evam ciya dehassa vi kammakaraṇasambhavāu tti ॥267॥ (1815)*

[कर्ता जीवः कर्मणः करणतो यथा घटस्य घटकारः ।

*Kartā jīvaḥ karmaṇaḥ karaṇato yathā ghaṭasya ghaṭakārah ।
Evamēva dehasyāpi karmakaraṇasambhavāditi ॥267॥ (1815)]*

Trans.—267 Just as *jīva* happens to be the *kartā* of *karma* as potter (is) of *ghaṭa* by virtue of its instrumentality, so also, (it becomes the *kartā*) of *dēha* by virtue of *karma* as (its) instrument. (1815)

टीका—कर्ता चात्र कर्मणो जीवः, करणसमेतत्वात् दण्डादिकरणयुक्त-
कुलालवद् घटस्य, कर्मणं चेह जीवस्य कर्म निर्वर्तयतः शरीरमवगन्तव्यम् ।
एवं देहस्याप्यात्मैव कर्ता, कर्मरूपं करणं कर्मकरणं तत्संभवात्—तद्युक्त-
त्वात्, दण्डादिकरणसमेतकुलालवदिति ॥ २६७ ॥ (१८१५) ॥

D. C.—Just as potter is called the *kartā* of *ghaṭa*, because he is accompanied by various *karana* such as *danda* etc., the Soul will also be called the *kartā* of *dēha* by reason of its being accompanied by *Karma* as the *karana*. 267 (1815).

Here, again, the opponent's view is stated and refuted—

कम्मं करणमसिद्धं व ते मई कज्जओ तयं सिद्धं ।
किरियाफलओ य पुणो पडिवज्ज तमग्गिभूइ व्व ॥ २६८ ॥ (१८१६)

*Kammam karanamasiddham va té mai kajjaö tayam siddham ।
Kiriyaṭhalao ya puno paḍivajja tamaggībhūi vva ॥268॥ (1816)*

[कर्म करणमसिद्धं वा तव मतिः कार्यतस्तत् सिद्धम् ।

*Karma karanamasiddham vā tava matih kāryatastat siddham ।
Kriyāphalataśca punah pratipadyasva tadagnībhūtiriva ॥268॥ (1816)]*

Trans.—268 Or, (it may be) your belief that *Karma* cannot be proved as *karana* ; but it has been proved by (the help of) *kārya*. Moreover, like *Agnībhūti* (you should) accept it, by reason of *kriyāphala* also. (1816)

टीका—स्यादेतत्, अतीन्द्रियत्वेनासिद्धत्वात् कर्मणः करणत्वमसिद्धम् ।

D. C. Maṅḡika :— Since *karma* is *atīndriya* (beyond the perception of sense-organs) it can never be taken as *kaṛaṇa*.

Bhagavān :—It is not so. Since *s'arīra* is susceptible to production like *ghaṭa*, it must have some *kaṛaṇa* to bring its existence. This *kaṛaṇa* is *Ḳarma* itself. Or say, there must be some *kaṛaṇa* between *Ḳartā* like *ātman* and *Ḳārya* like *s'arīra* as in the case of *ghaṭakāra* and *ghaṭa*. And, this can be nothing else but *Ḳarma*. This shows that *Ḳarma* can be brought about even by the help of *Ḳāryas* like *s'arīra*. Moreover, *Ḳāryas* like *dāna* etc. which are inspired by fruit, are also fruitful like *Ḳriyās* such as *kṛṣi* etc. So, like *Agnibhūti*, you, too, *O Maṅḡika* ! shall have to admit the existence of *Ḳarma*. ॥268॥ (1816)

In reply to the assertion that a *bandha* which is *anādi* is *ananta* also, the author states—

जं संताणोऽणार्हं तेणाणंतोऽपि नायमेगंता ।

D. C.—There can never be an exclusive rule that the *anādi santāna* of *jīva* and *Karma* combined together, is *ananta* also. For, in some cases, the *santāna* does come to an end inspite of its *anāditya* e. g. the *santāna* of seed and sprout.

Trans.—270–271. When either a seed and sprout is destroyed without having accomplished the (desired) effect, its *santāna* is also destroyed. The same is the case with a hen and its eggs also. Or, just as the contact of gold with stone though continued in succession through times immemorial, is cut off, in the same way, the contact of *jīva* with *Karma* (is also cut off). (1818–1819).

D. C.—If either of *bija* and *aṅkura* vanishes without accomplishing the desired effect, the same will be true in case of hen and its eggs as well as father and son also. Or, just as the contact between gold and stone could be removed by means of the heat of fire inspite of its *anāditya*, the contact between *jīva* and *Karma* could also be brought to an end by means of *tapas*, *saṁyama* etc., until ultimately the *mokṣa* is attained. ॥ 270–271 ॥ (1818–1819) ॥

Anticipating the opponent's objection at this juncture, the author proceeds—

Or, is it similar to that between gold and stone ? ” “Union in both the ways will not be contrary. D. C.—*Maṇḍika* :— Should the *anādi* contact of *jīva* with

Karma be taken as *ananta*, like that between *jīva* and *nabhas* or as *sānta* like that between gold and stone ?

Bhagavāna:—It is possible in both ways It is found as *anādi* and *ananta* in case of inauspicious objects, but in cases of auspicious objects like gold and stone, it is found as *anādi* and *sānta*.

Maṇḍika:—How could you distinguish between auspicious and inauspicious when the state of existence is the same everywhere ?

Moreover, it cannot be argued that just as the experiences of hen and animal life are different from each other, even if the state of existence is the same in both, so, also, the distinction between *bhavya* and *a-bhavya* is possible, because, the *nāraka* experiences etc. are produced on account of *Karma*, and are not *svābhāvika*.

Trans.—274 If the distinction is caused by *karma* as in the case of hellish experience etc., there is no objection. But when you say that they are auspicious and inauspicious by their (very) nature, the doubt does arise. (1822)

टीका-भवतु वा यदि कर्मकृतोऽयं भव्याऽ-भव्यत्वविशेषो जीवाना-

*D. C.—Maṇḍika :—*If you accept that the distinction between *bhavya* and *a-bhavya* is also *karma-janita* (like that between hen and animal life) I have nothing to say but when you take their distinction to be *svabhāvika*, I raise the doubt. ॥274॥ (1822)

Explaining the real cause between *bhavya* and *a-bhavya* the author replies:—

दव्वाइत्से तुल्ले जीव-नहाणं सभावओ भेओ ।
जीवा-ऽजीवाइगओ जह, तह भव्वे-यरविसेसो ॥ २७५ ॥ (१८२३)

*Davvāittē tulle jīva-nahāṇam sabhāvaō bhéō ।

Trans.—275 Just as in (case of) *jīva* and *nabhas* the natural distinction of living and lifeless does exist even in (the midst of) the common element of (their being) *dravya* etc, in the same way, the distinction of auspicious and inauspicious is also natural. (1823)

टीका-यथा जीव-नभसोर्द्रव्यत्व-सत्त्व-प्रमेयत्व-ज्ञेयत्वादी तुल्येऽपि जीवा-ऽजीवत्व-चेतना-चेतनत्वादिस्वभावतो भेदः, तथा जीवानामपि जीवत्वसाम्येऽपि यदि भव्या-ऽभव्यकृतो विशेषः स्यात्, तर्हि को दोषः ? इति ॥ २७५ ॥ (१८२३)

*D. C.—*Although *jīva* and *ākāś'a* possess the common properties like *dravyatva*, *sattva* (existence), *prameyatva*

(destructibility) *jñeyatva* (cognizibility) etc., distinction such as that of *jīva* and *a-jīva* etc., does exist by its very nature. Similarly, in case of *jīvas* also, even though *jīvatva* is common, the distinction of *bhavya* and *abhavya* remains there as a natural consequence. ॥275 (1823)॥

The pupil objects to this view thus—

एवं पि भव्यभावो जीवत्तं पिव स्वभावजाईओ ।

पावइ निच्चो तम्मि य तदवत्थे नत्थि निव्वणं ॥ २७६ ॥ (१८२४)

Evam pi bhavyabhāvo jīvatam piva sabhāvajāīo ।

Trans.—276 Even in that case, the quality of (being) auspicious being natural like *jīvatva*, will become everlasting; and if it is so, there will be no (scope for) final liberation (at all). (1824)

टीका -नन्वेमपि भव्यभावो नित्योऽविनाशी प्राप्नोति, स्वभावजातीयत्वात् -स्वभावविकत्वात् जीवत्ववत् । भवत्वेवमिति चेत् । तदयुक्तम्, यतस्तस्मिन् भव्यभावे तदवस्थे नित्योवस्थायिनि नास्ति निर्वाणम्, सिद्धो न भव्यो नाप्य भव्यः” इति वचनादिति ॥ २७६ ॥ (१८२४)

D. C.—If the quality of *bhavyatva* is *svābhāvika* as *jīvatva*, as said above, it will become everlasting like *jīvata* also. Consequently, in the midst of everlasting *bhavyabhāva*, there will be no scope for *mokṣā* at all ॥276 (1824) ॥

The author refutes this argument as follows:—

जह घडपुव्वाभावोऽणाइसहावो वि सनिहणो एवम् ।

D. C.—The previous non-existence of *ghaṭa* comes to an end, when *ghaṭa* is actually produced. Similarly, there is no harm if we assume that the *abhāva* of *bhavyatva* comes to an end, when the *bhavyatva* is actually brought into existence by the process of perception ॥277 (1825) ॥

D. C.—Maṇḍika:—Life *kharasṛiṅga*, previous non-existence cannot be taken as a right illustration, because like *kharasṛiṅga*, it is non-existent on account of its *abhāvarūpatā*.

Bhagavāna:—It is not so. The previous *abhāva* of *ghaṭa* is itself *bhāva*. The only difference found in it, is thāt, at this stage the production of *ghaṭa* has not yet been brought about from the mass of earth, which has served as its *kaṛaṇa* from times imemorial ॥ 277 (1826) ॥

D. C.—Maṇḍika—If the *ucchēda* of *bhavya jīvas* is accepted, this world will gradually be deprived of them. Ultimately, there will be no *bhavya jīva* existing in the world. For, just as a granary of corn, is being exhausted day by day by the gradual decrease of corn, this world will also be losing one *bhavya jīva* at least at the end of say, six months, when he will be attaining *mokṣa*, until ultimately the world will be void of *bhavya jīvas*.

Bhagavāna:—Your argument is fallacious, O *Maṇḍika*. The number of *bhavya jīvas* is as endless as the time to come or sky, and hence its absolute *vicchēda* should never be feared.

Maṇḍika:—But how is it proved that the *bhavyas* are *ananta* and their *anantabhāga* attains *mokṣa* at all times ?

Bhagavāna:—They are *ananta* like *kāla* and *ākāśa*. Even if infinite number of *bhavyas* passes away to to *mokṣa*, they remain endless for ever, like *kāla* and *ākāśa*. Rely upon my word, O *Maṇḍika*, and accept it ॥ 280-282 (1828-1830) ॥

D. C.—*Bhagavāna*:—Take everything that I speak to be authentic, because I am *sarvajña* and *vitaraṅga*.

Maṇḍika, then, puts the question as follows:—

D. C. Bhavya means worthy of attaining *mokṣa* and not exactly one who attains *mokṣa*. Worthiness for *mokṣa* does not mean the attainment itself. Even though substances like gold, jewels, stones, sandal wood etc are capable of producing an image the image is not produced out of all but only out of certain suitable, substances. There is no such rule that the image is produced by means of certain suitable substances but only when suitable substances unite to produce an image

Similarly, in case of *bhavyas* also, there is no rigid rule that one who is *bhavya* must necessarily attain *mokṣa* nor will *bhavya* be called a-*bhavya* if he does not attain *mokṣa* Sooner or later, *bhavya* alone attains *mokṣa* by virtue of its necessary characteristics, but a-*bhavya* will never be able to attain *mokṣa* ॥286 (1834)॥

Trans —287-288 Just as the contact between stone and gold, though susceptible to separation, is not separated, only those that have reached attainment are separated. Similarly, *mokṣa* which is laid down as a rule belongs only to *bhavyas* and not to others. (1835-1836)

टीका-यथा वा स एव पूर्वोक्तः सुवर्णपाषाण-कनकयोर्योगो वियोग-योग्यतान्वितोऽपि सर्वो न वियुज्यते, किन्तु स एव वियुज्यते, यस्य वियोगसामग्रीसंप्राप्तिरिति । किं पुनः ? एतद् भुजमुत्क्षिप्य ब्रूमः-या वियोगसामग्रीसंप्राप्तिः सा वियोगयोग्यस्यैव सुवर्णोपलस्य भवति, न तु तदयोग्यस्य, तथा तेनैव प्रकारेण वः सर्वकर्मक्षयदक्षणो मोक्षः स नियमाद्

D. C.—Although the contact between gold and stone is susceptible to separation, it can never be applied to all as a general rule. Because, only that which secures necessary conditions for separation, is separable.

Moreover, these necessary conditions which cause the separation, act only upon those that are worthy of separation and not upon others. The same is the case with *mouṣa*. The attainment of *mouṣa* is possible for *bhavyas* only, and not for *a-bhavyas* even if they possess necessary conditions. This is the distinctive feature between *bhavya* and *a-bhavya* ॥287-288 ॥ (1835-1836)

D. C.—*Maṅḍika*—*Mokṣa* is not *nitya* but it is *a-nitya* like *ghaṭa* as it is artificial and *ādimān* in character like *ghaṭa*.

Bhagavāna .—It is not so The *hētu* advanced by you applies to the *vipakṣa* as well, and hence it is *anaikāntika*. The *pradhvaṃsābhāva*, in case of *ghaṭa*, for example, is *nitya*, inspite of its being *kṛitaka*. For, if it were *a-nitya*, objects like *ghaṭa* should have been born in the same form.

Maṅḍika :—But since *pradhvaṃsābhāva* is negative in character, you will not be able to cite an example based on it.

Bhagavāna :—It is not negative, O *Maṅḍika* ! but positive in character. The definite forms of *pudgalas* found at the

destruction of *ghaṭa* is nothing but *prādhvaṃsābhāva*. The example cited is, therefore, quite proper to the occasion. The same is the case with *mokṣa* also. *Mokṣa* will never be called *a—nitya* even if it is believed to possess the properties like *kṛitakatva*.
॥ 289-290 (1837-1838)

Or, say, *Mokṣa* is not *kṛitaka* at all on account of the following reason :—

*D. C.—Bhagavāna :—*Since *Mokṣa* is nothing but the separation of Soul from *Karma-pudgāvas*, it cannot be artificial at all. When *Karma* is being separated from *jīva*, how is *Ātmā* to be affected to render the *Mokṣa a-nitya* ?

*Maṇḍika :—*The separation of soul from *Karma* is *kṛitaka* owing to its *kriyamānatvā*. The *mokṣa* is, therefore, *kṛitaka* and *a-nityā* too.

*Bhagavāna :—*When *ghṛta* is destroyed by means of hammer etc. the sky is not at all affected. In the same way, when *Karma* is destroyed, *jīva* will also remain unaffected. It is not, therefore, proper to believe that *Mokṣa* is *kṛitaka* and *a nitya*.

*Maṇḍika :—**Karma* being destructible like *ghṛta*, like *ghṛta* it is *kṛitaka* also. Now, since *Mokṣa* is nothing but the destruction of all *Karmas*, it is also *kṛitaka* and hence *a-nitya* also.

*Bhagavāna :—*Your argument is absolutely false. *O Maṇḍika* ! Existence of sky persists even if *ghṛta* is destroyed. The destruction of *ghṛta* is not *bhinna* from *ākāśa*, but at the same time *ākāśa* is not affected by it also, since it is everlasting. Similarly in case of *Karma* also, although the destruction of *Karmas* is not different from the existence of Soul, the Soul is not affected by it, on account of its being *nitya* like *ākāśa*. The *Mokṣa* is, therefore, never *kṛitaka*, *O Maṇḍika*, and never *a-nitya* also, even if it is *a-nitya* to the extent that all objects are *a-nitya* as far as their *dravyatva* and *paryāyas* are concerned.

Maṇḍika:—Since *Karma-pudgalas* abandoned by *jīva* in a worn-out condition, stay on in this world (even in that state) why should the Soul separated from *Karma*, be believed to unite with the worn-out *Karma*, so that, it may be bound by a fresh bondage again ?

Bhagovāna:—*Mokṣa* being *nitya*, *O Maṇḍika*, will again be bound by a fresh bondage. ॥291 (1839) ॥

The everlasting nature of *mokṣa* is apprehended as follows:—

सोऽणवराहो इव पुणो न बज्ज्जणं बंधकारणाभावा ।

Trans.—292 Like an innocent person, it (i. e. Soul) can never be bound (by *bandhas*) as there is no cause for bondage. On account of its formlessness, it has no cause for bondages. (1840)

श्लोका—स मुक्तो जीवः पुनरपि न बध्यते, बन्धकारणाभावात्, अनपराधपुरुषवत्, मनो-वाक्-काययोगादयश्च बन्धहेतवोऽभिधीयन्ते, न च ते मुक्तस्य सन्ति, शरीराद्यभावात् । न च कर्मवर्गणागतपुद्गलमात्रसंयोगमात्ररूपोऽत्र बन्धोऽधिक्रियते, अतिप्रसङ्गादिदोषाघ्रातत्वात्, किन्तु मिथ्यात्वादितद्धेतुनिबन्धन इति ॥ २९२ ॥ (१८४०) ॥

D. C.—In absence of (any) cause for (its) *bandha*, like an innocent person, the Soul is free from *bandha*. Unions of mind, speech, and body etc. are nothing but the causes for

(its) *bandha*. But due to the *abhāva* of *śarīra* etc., a free Soul is not able to contain them. So, *bandha* does not take place in absence of *saṃyoga* of the multiplication of *karmas* but it depends upon the *hetus* such as *mithyātva* etc.

Maṇḍika - Like *bandhas*, you doubt as to whether that free Soul appears in the next life or not. ॥ 292 (1840) ॥

Trans.—295 Or, what (of) assuming *nityatā* ? Everything is susceptible to the state of production, destruction, and existence. Only by the imposition of various methods, attributes like transitoriness etc., are designated (1843)

D. C.—It is useless to insist that a free soul is exclusively *nitya*. Attributes like *a-nityatā* could be indicated by means of various methods. Before *ghaṭa* comes into existence, as a particular shape of earth it vanishes and comes into existence as a particular shape of earth named *ghaṭa*, and continues to exist in that state after its production also.

The same is the case with *muktātmā*. The *muktātmā* also vanishes as a mundane, comes into existence as *mukta* and continues to be in that state by virtue of its life and utility. So, it vanishes at the first time as it is established, comes into existence by virtue of its being established at the second time

and continues to be in that state on account of its *dravyatva*, *jīvatva* etc

In this way, by means of different *paryāyas*, the attributes like *a-nīyatā*, are imposed.

*D. C.--Maṇḍika:—*The *a-mūrta* (objects like) *ākāśa* and *rāla* are wellknown as *niṣkriya*. Then, how did you apprehend a formless object like *muktātmā* to *sa-kriya* ? Since it is a *mūrta* like *ākāśa*, it should also be *niṣkriya* like *ākāśa*.

*Bhagavāna:—*What *a-mūrta* object have you seen to be *śacetana* in this world, in order to accept *muktātmā* as *śacetanā* ? Just as *ākāśa* is *śacetana* on account of its *amūrtatva*, the *muktātmā* should also be *śacetana* as a rule. But it is not so. For, although *ātmā* resembles *ākāśa* in respect of *a mūrta* *tva*, it possesses a distinct characteristic of *śetanā*, within which *kriyā* is also included. So, *sa-kriyatva* or activeness becomes a distinct peculiarity of *muktātmā*. There is no doubt about it ॥297॥(1845)

Or, leaving that distinction of *mukta* and *a-mukta* aside, it could also be argued that—

D. C.—*Maṇḍika*: The *hétu* for movements of a body is the

effort (on the part) of Soul and not the *kriyā*. It is therefore, not proper to take *ātmā* to be *sakriya*

Bhagavāna:—If the *ātmā* is *niṣkriya*, the effort cannot exit into it, and hence it is undoubtedly *sakriya*. What other *hētu* is to be understood in accepting the *a-mūrta* effort as a *hētu* for bodily movements ? If it is said that without the *apēkṣā* of another *hētu*, this effort itself becomes the *hētu* in the *dēha-spanda* the Soul will also be called the *hētu* of these bodily movements. What is the use of intervening *prayaṇa* in such a case ?

Maṇḍika:—There is some invisible *hētu* in the movements of *dēha*, but *ātmā* being *niṣkriya* cannot act as *hētu* in those movements.

Bhagavāna:—Is that invisible (*hētu*) *mūrta* or *a-mūrta* ? If *a-mūrta*, why not take *ātmā* as *hētu* in the *dēha parispanḍa* since it is also *a-mūrta* ? And if that *a-driṣṭa* is *mūrta*, it is nothing but *kārmaṇa sarīra*. How, if that *kārmaṇa sarīra* is used as the *hētu* of *bāhya sarīra* there must be some other *hētu* for the *parispanḍana* of the above-mentioned *kārmaṇa sarīra*. This in turn, will have a third *hētu* for its *parispanḍa* and that a fourth one and so on, until ultimately there is complete disorder. Again, if it is argued at this stage that the movement of an *adrīṣṭa kārmaṇa sarīra* is caused by no other *hētu* than its own *svabhāva* so that there may not be any sort of *anvāstā*, then *parispanḍa* of *bāhya sarīras* will also be caused by *svabhāva*, so that there may not be any sense in assuming the *adrīṣṭa kārmaṇa sarīra*.

Maṇḍika:—I don't mind if the *parispanḍa* is taken to have been caused by *svabhāva*.

Bhagavāna:— But it is not reasonable to believe like that. The definite type of the *parispanḍa* like this is never possible in case of *acētana* objects, because that which is independent of any other *hētu* is either everlasting or absolutely transitory.

The only alternative to accept, therefore, is that *ātmā* which is distinguished by *karma* is the *hētu* of *dehāparispanda* and hence *sakriyā* also. ॥299-300॥ (1847-1848)]

D. C.—Maṇḍika:—If muktātmā were sakriya by virtue of its movement, why should it not move beyond Siddhālaya also ?

Bhagavāna:—It cannot move beyond Siddhālaya, because dharmāstikāya or the predicament of motion, does not exist in the a-loka.

Maṇḍika:—What of that ? Even if dharmāstikāya does not exist in the a-loka, muktātmā can acced to it without dharmāstikāya.

Bhagavāna:—That is not possible. O Maṇḍika. It is the predicament of motion that impels muktātmā to move. Hence, if dharmāstikāya does not exist in the a-loka, muktātmā is unable to move towards it ॥302 (1850)

D. C.—From the point of view of etymology, just as *ghaṭa* has its opposite (word) *a-ghaṭa*, *loka* must also have its opposite word *a-loka*. It is not justifiable to assume that *a-loka* is also the opposite of *ghaṭa*, *paṭa* etc. By means of *niṣēdhā* something of its own kind is understood. Just as by the word *a-panḍita* a living person having no scholarship is meant but not the inanimate objects like *ghaṭa* and *paṭa*, so here also, by the *niṣēdhā* of *loka*, nothing but *a-loka* should be understood. And it has also been said that.

Otherwise, *ākāśā* being common everywhere, *loka* and *a-loka* will not be distinguished from each other. Thus; wherever the predicaments of *dharma* and *a-dharma* exist, there is *loka*, and the rest is called *a-loka*. If there were no distinction between *loka* and *a-loka* by means of *dharma* and *a-dharma*, *pratighāta* of various *jīvas* and *puḍgalas* in the this world, will not be possible. Consequently, there will be no scope for *gati* and *avasthāna* to lead them to *a-loka*. *Jīvas* and *puḍgalas* will then become *ananta*; there will be nothing like mutual relation between them, and the attributes of *bandha* and *mokṣa* will also be no longer existing between them. ॥304-305॥ (1852-1853)]

Trans.—307 Just as *jñāna* measures the *jñēya*, similarly, in the midst of (the existence of) *a-loka*, it (i. e., *dharmāstikāya*) also, acts undoubtedly as the measuring unit of *loka* on account of its finiteness. (1855)

D. C — Since *loka* is susceptible to measure, it must have some sort of measuring unit like *jñāna*, which is the measuring unit of the *jñeya*. The measuring unit of *loka* is *dharmāstikāya* or the predicament of motion, which exists only if *loka* exists, and not otherwise. So, on the top of *loka*, the *avasthāna* of *Siddha* or *mūrtimā* must necessarily be accepted ॥307॥ (1855)

D C.—*Maṇḍika*:—*Sthāna* means place of location. So, when the place of location of a *siddha* being is accepted as existing, the characteristic of falling from that place, should also be attributed to it as in the case of *Dēvadatta* or a fruit falling from the summit of a mountain or tree, as the case may be. Everything is bound to fall from the place of its location and *siddha* is no exception to it.

Bhagavāna:—It is not so. The phrase ‘*Siddhasya sthānam*’ shows that the word ‘*Siddha*’ is in the Genitive case used in the Nominative sense, ‘*Siddhasya sthānam*’ means, therefore, the place where *Siddha* resides, but it is not different from *Siddha* ॥ 308 ॥ (1856) ॥

D. C—Even if *sthāna* were taken to be distinct from *siddha* it is not proper to believe that *siddha* falls from the *sthāna*, which itself is destructible. Since *sthāna* is *nitya* like *ākāśa*, it would never meet destruction. In the process of falling, *Karma* is the essential factor, Now since *muktātmā* is free from *Karma*, the process of falling cannot come into existence for want of *Karma*. Moreover, impellation by ones' own efforts, attraction, repulsion and weightiness etc. are also important causes of—the *patana kriyā*, but since all of them are absent in *muktātmā*, the *patana* of *muktātina* from its *sthāna* is not possible from that view point also. D. C.—The statement that everything has to fall from its *sthāna* is self-contradicting. For the action of falling takes place from the *avasthāna* or the abode, and not from the *sthāna*. If falling from *sthāna* were believed, the *nitya* objects like *ākāśa* will also have to meet *patana*, from their *nitya sthānas*.

Trans—313-314 Really speaking, you have not understood the real meaning of the sentences of the *Vēdas* such as “*Naha vai sa-śarīrasya priyā-priya yorapahati*” etc, and hence your doubt as regards *bandha* and *mokṣa* (has arisen). That doubt should no longer be entertained. For, *bandha* and *mokṣa* are nothing but the qualities of having a form and formlessness (respectively). (1861-1862).

टीका-व्याख्या-“ न हि वै सशरीस्य प्रिया-ऽप्रिययोरपहतिरस्ति, अशरीरं वा वसन्तं वा प्रिया-ऽप्रिये न स्पृशतः ” इत्यादीनां च वेदपदानां सदर्थं त्वं न मुणसि । ततो बन्धे मोक्षे च तव सौम्य ! शङ्का, सा च न कार्या, यतो ननु यः सशरीरे-तरभावः स्फुट एव बन्धो मोक्षश्चेति कथं शङ्का युज्यते ? । एतदुक्तं भवति-“ स शरीरस्य ” इत्यनेन बाह्या-ऽऽध्यात्मिकानादिजरीरसंतानस्वरूपो बन्धः प्रोक्तः, तथा, “ अशरीरं वा वसन्तम् ” इत्यनेन त्वशेषशरीरापगमस्वभावो मोक्षः प्रतिपादितः । तथा “ स एव विगुणो विभुर्न बध्यते ” इत्यादीन्यपि पदानि संसारिजीवस्य बन्धमोक्षाभावप्रतिपादकानि त्वं मन्यसे । तच्चायुक्तम्, मुक्तजीवविषयत्वात् तेषाम् । युक्तस्य च बन्धाद्यभावेऽविप्रतिपत्तिरेवेति । तदेवं भगवता छिन्नस्तस्य संशयः ॥ ३१३-३१४ ॥ (१८६१-१८६२) ॥

D C.—You have not grasped the real meaning of the *Vēdapadas* such as :—“*Na ha vai sa-śarīrasya priya-priya yorapahati,*” “*Aśarīram vā vasantam priyā priyē na spris'atah.*” And that is why, *O Saumya!* you have raised the doubt as regards *bandha* and *mokṣa*. But, this sort of doubt should not be entertained by you. For, it is clear that *bandha* and *mokṣa* are nothing but the qualities of *sa-śarīratva* and *a-s'arīratva* respectively.

By the words *saśarīrasya* etc. *bandha* which is nothing but the *santāna* of the external, as well as, internal *anādi*

s'arīra, is meant; while by means of " *a-śarīram vā* " etc. *mokṣa* characterized by the removal of entire *śarīra* is laid down.

Finally, you have apprehended sentences such as *sa eṣa viguṇo vibhurna bhūdyate* etc. to support the *abhāva* of *bandha-mokṣa* to the *mundane* soul. But that is not correct. Those sentences are referring to the free soul. *Attributes* such as ' *It is never bound* " etc. are directed to nothing but the *muktātmā*.

Thus, the doubts are removed from the mind of *Māṇḍika*,

D. C — O long-lived Maurya ! your doubt about the existence of gods is due to your hearing various sentences of Védas.

The sentences are such as —

- (1) “ Sa éṣa yajñāyudhī yajamāno'nījasā svargalokam gacchati ” etc.
- (2) “ Apāma somam amṛitā abhūma agaman jyotiravidāma dévān kim nūnamāsmāt triṇavadarātīh kimu murti-mamrīramartyasya ” etc.

As well as,

- (3) “ Ko jānāti māyopamān gīrvāṇā-nindra-Yama-Varuṇa Kuberādīm ? ” etc.

According to you, interpretations of these sentences would be as follows:—

- (1) This host armed with the weapon of sacrifice reaches the region of heaven immediately. (This leads to prove the existence of gods)
- (2) By drinking *soma*, they became gods, went to heaven, and attained the divine status. These divinities will banish maladies and mortality by virtue of their *amṛitatava*. (These sentences are also used in support of the existence of divinities.)

(3) who knows the illusive gods like *Indra*, *Yama*, *Varuṇa* and *Kubera* etc ? (Sentences like this would deny the existence of gods on the other side)

So, your doubt has sprung up from the sentences such as mentioned above. But that is not justifiable, as you have not understood their real meaning. Here I explain the real interpretation ॥ 318 ॥ (1866)]

Now the author explains the whole proposition in details.

Trans.—319-320 You think that the denizens of hell (being) subservient and miserable, are not able to come into this world (So), they are to be trusted (as existing) even

D. C.—O Maurya ! According to you, the inability of the *Nāraka*-beings to come to this world, is due to their being subservient to their own sins, as well as, due to their miserable condition. So, they might be trusted upon as existing merely by hearing (some thing about) them.

But, the case with gods is different. For, even though they possess free movements and celestial splendour, they would never like to come within the range of our sight

So, because they are heard of in the *Vēdas* and *Smṛitis* etc. you have raised this doubt ॥319-320॥ (1867-1868)

D. C.—Even before they appear at the *Samavasāraṇa*, your doubt about their existence is not justified. For, luminaries like Sun, Moon etc are self-perceptible to you, as well as, to the whole world. So, it is not appropriate to doubt their existence.

Moreover, *anugraha* and *upaghāta* caused by gods to this world, are also evident to all. Several gods confer their favours upon some people by granting their objects of pleasure etc. while others inflict injuries, like a king, by means of weapons etc. This shows, for certain, that gods do exist ॥322॥ (1870)

D. C. -Maurya:—Luminaries like Sun and Moon mentioned by you, are only the abodes, and not the gods themselves. It could not be said, therefore, that the luminary deities are directly perceptible, just as in case of an empty town, the houses are mere places of residence for people, but people do not actually reside into them, so also luminaries like Moon etc. should be taken as absolutely empty bodies and nothing like gods is expected to reside into them.

Bhagavāna:—It is not so. *O Maurya!* Existence of the place of residence proves the existence of its residents also. So, these luminaries are not mere *ālayas*, but they have their inhabitants also. For, that which is called an *ālaya* or a house is always occupied by its residents. Like houses in a town

occupied by persons like *Dēvadatta*, these luminaries are also undoubtedly occupied by dévinities.

Mauṛya.-- Like *Dēvadatta* etc residing in the houses of a city, the gods who are the residents of the luminary bodies should also be perceptible.

Bhṛgavāna.-- It is not proper to advance such an argument. Because, the places of residence are absolutely different from the houses in a city. So, their residents *viz* gods are also characteristically different from *Dēvadatta* etc. Although they are not apprehended by the *indriyas*, their existence is admitted without doubt.

Mauṛya :-- You cannot assert exclusively that every place of residence, is always occupied by a resident. For, nobody would reside in a barren house. (It is forbidden to reside in such a house). From the existence of abode, therefore, you cannot infer the existence of the occupant.

Bhṛgavāna :-- A residing place is never *śūnya*. It must have been occupied by some person or the other, either in the past or in future or at present. In case of luminary places of resort, gods like Moon etc. must have occupied the places at some time in the past, present, or future ॥323॥ (1871)

D. C. —Maurya :—Or who knows what these luminaries like Sun and Moon, mentioned by you are like ? One that appears as Sun may be a ball of fire, and that which appears as Moon may be a transparent ball of water. Or, it may be that these luminaries be some such bright balls. So, it is not appropriate to believe that they are the abodes of luminary gods.

Bhagavāna :—Since they are decked with jewels, and they are moving in the sky, there is no doubt that they are actual *vimānas* like *puspaka* etc. attained by *vidyādhara*s by means of austerities etc. So, take it for certain, that these *vimānas* are also the residing places of the various luminary gods. ॥ 324 ॥ (1872) ॥

D C.—You might argue that *vimāna*, like *candra* etc are not actual *ālayas*, but they are mere illusions created by some magician. But the illusionariness of such *vimānas* cannot be admitted by means of mere words. Still, however, if they are assumed as *māyika*, their creators are not magicians or human beings, but the gods themselves. This is said only on the assumption that they are *māyika vikāras*. But really speaking, they are not *māyika* as they are ever obtained like towns etc. So, these *vimānas* are nothing but the abodes of luminary gods. ॥325॥ (1873)

*D. C — Bhagavāna :—*When you believe that *Nārakas* are the sufferers of the rewards of great sins, you should also believe that gods are the enjoyers of the fruits of exalted good deeds, and thus they are existing.

Maurya :—Tiryancas, who are excessively miserable, are the sufferers of the reward of great sins, and excessively happy human beings are enjoyers of the fruits of exalted good deeds. So, it is not necessary to assume the existence of *Dēvas* and *Nārakas* at all.

Bhagavāna:—Existence of *Dévas* and *Nāraḱas* cannot be denied by saying so. Enjoyers of the rewards of great *puṇyas* and *pāpas* are exclusively happy or exclusively miserable, as the case may be. The *manuṣyas* and *tiryancas* cannot be called exclusively happy and exclusively miserable respectively. For, even the happiest human beings are susceptible to the affliction of diseases, old age, etc. while even extremely miserable *tiryancas*, experience the happy touch of cold breeze etc. So, *manuṣyas* and *tiryancas*, can never be taken as exclusively happy or exclusively miserable beings, while *Nāraḱas* who suffer the consequences of *pāpas*, and *Dévas* who enjoy the fruit of *puṇyas*, can be easily admitted respectively as the exclusively miserable and exclusively happy beings ॥326॥ (1874)

Now, in reply to the question that “ Why gods do not visit this world if at all they are existing ?” the author states:—

D. C. Divinities do not come to this world, because they are invested with celestial love and attached to the various objects of pleasure like a person attached to a beautiful woman possessing high qualities of extreme beauty etc. Secondly, like a great man entrusted with manifold work, these gods have also to perform manifold duties and hence their duties are never over. Thirdly, all their deeds are independent of human beings. So, just as a dispassionate ascetic, never comes to an unholy house, these gods also usually abstain themselves from coming to the inauspicious human world as they would not stand even the smell of it ॥ 327 ॥ (1875)

But this does not mean that they always keep themselves away from this world

D. C.—Various deities visit this world on various purposes. Some have to attend the occasions of *janma dikṣā*, *kevala-jñāna prāpti* and *nirvāṇa* of a saint. Some like *Indra* are drawn to this world by means of devotion, some to remove their doubts. Several others descend upon this world on account of their previous attachment to relatives like son, friend etc. or by following the previous conventions or by virtue of previous austerities also, some gods come to the human world for the purpose of

afflicting human beings in order to take revenge upon them, while others would be attracted to this world out of passion or in order to test the saints of this world also

Thus, there are various causes for their visit to this world, while others stated before, are the causes of their staying away from this world also ॥ 328-329 ॥ (1876-1877)

Trans.—330-331 By the statement of some (who are) reminded of (the former) existence by means of direct apprehension, by (virtue of) reciting the chantings, of (various) lore by the movement of planets, due to the existence of the fruition of the accumulation of highly meritorious deeds, by (virtue of) (their) names, and by (the help of) all āgamas, it should be trusted that gods are existing. (1878-1879)

D. C.—Existence of gods could be established in various ways .—

- (1) On the recollection of former existence, a person would relate the story of the great family of gods witnessed and believed by him as certain.
- (2) Some persons attain directly the *dars'ana* of gods by virtue of their qualities like austerity etc.
- (3) Some people attain the accomplishment of their objects by soliciting the favour of gods by means of prayers, and chantings of prescribed *mantras*.
- (4) A person in charge of planets is absolutely different from the *jīvas*, because of the *kṛiyās* that are found as a result of changes in the planets which are never to be found in human beings.
- (5) Just as we have accepted the existence of *Nārakas* due to the fruition of great sins, the existence of gods should

also be admitted on account of the *phala* of the accumulation of highly meritorious deeds like *tapas*, *dāna* etc.

(6) The existence of gods is established by their very name viz “*dēvāh*” (This will be explained in the following verse)

(7) All the *āgamas* admit the existence of gods. ॥ 330-331 ॥ (1878-1879)

The epithet “*dēvāh*” is then explained as follows:--

देव त्ति सत्थयमिदं सुद्धत्तणओ घटाभिहाणं व ।

अह व मई मणुउ चिय देवो गुण-रिद्धिसंपणणणे ॥ ३३२ ॥ (१८८०)

तं न जउ नच्चत्थे सिद्धे उवयारओ मया सिद्धी ।

जच्चत्थसीह सिद्धे माणवसीहोवयारो व्व ॥ ३३३ ॥ (१८८१)

Deva tti satthayamidam suddhattaṇṇo ghaṭābhīhāṇam va ।

Aha va maī maṇuu cciya dévo guṇa riddhi saṃpaṇṇo ॥332॥ (1880)

Tam na jaU tacca siddhe uvayāro mayā siddhī ।

Taccatthasīha siddhé māṇavasīhovayāro vva ॥333॥ (1881)

[देवा इति सार्थकमिदं शुद्धत्वतो घटाभिधानमिव ।

अथवा मतिर्मनुज एव देवो गुण-र्द्धिसंपन्नः ॥ ३३२ ॥ (१८८०)

तद् न यतस्तथ्यार्थे सिद्ध उपचारतो मता सिद्धिः ।

तथ्यार्थसिंहे सिद्धे माणवसिंहोपचार इव ॥ ३३३ ॥ (१८८१)

Dēvā iti sārthakamidam śuddhatvato ghaṭābhīdhānamiva ।

Athavā matirmanuja eva devo guṇar-ddhisampannaḥ ॥332॥ (1880)

Tad na yatastathyārthe siddha upacārato matā siddhiḥ ।

Tathyārthasimhe siddhe māṇavasīṃhopacāra iva ॥333॥

Trans — 332-333 Since the epithet “*dēva*” is clear like ‘*ghatā*’, it is significant. Or, it might be believed that man

himself (when) accompanied by the prosperity of merits, is god. (But) that is not (correct). (Because) the accomplishment (of the secondary meaning) by means of usage, could be brought about (only) when the primary meaning is established, just as the epithet "simha" or lion could be attributed to *Māṇavika* by means of usage only, if the primary sense of the word "simha" is accepted (1880-1881)

टीका—“देवाः” इत्येतत् पदं सार्थकं व्युत्पत्तिमच्छुद्धपदत्वात्, घटादिवत् । तत्र दीव्यन्तीति देवा इति व्युत्पत्तिमत्रम्, समासतद्धितरहितत्वेन च शुद्धत्वम् । भावना चात्र प्रागुक्तैव । अथ परस्य मतिर्भवेत्—ननु मनुष्य एवेह दृश्यमानो देवो भविष्यति, किमदृष्टदेवकल्पनया ? । किं सर्वोऽपि मनुष्यो देवः ? इति । न, इत्याह—गुणसंपन्नो गणधरादिः, ऋद्धि संपन्नश्चक्रवर्त्यादिः । अत्रोच्यते—तदेतद् न, यस्मात् तथ्ये मुख्ये वस्तुनि क्वचित् सिद्धे सत्यन्यत्रोपचारतस्तत्सिद्धिर्मता, यथा मुख्ये यथार्थे सिद्धेऽन्यत्र सिद्धे ततो माणवके सिंहोपचारः सिध्यति एवमिहापि यदि मुख्ये देवाः क्वचित् सिद्धा भवेयुः तदा राजादेर्देवोपचारो युज्यते, नान्यथेति ॥ ३३२-३३३ ॥ (१८८०-१८८१)

D. C.—Since the word “*dēvāḥ*” is void of compound and prefixes, and is explained as *tatra divyanīti dēvāḥ* (those that shine there are deities). It is philologically *siddhi*, like other padas such as *ghaṭa* etc.

Maurya:—The man himself seen before our very eyes is a god. Why to imagine an invisible from that ? All men are not gods. But those accompanied by high merits and religious prosperity could easily be taken as gods

Bhagavāna:—That is not correct. Unless and until, the principal meaning of a word is not accomplished, it could never be attributed to any other object by means of *upacāra*. The epithet of lion could easily be attributed to *māṇavika* only if the primary sense of the word *simha* is accomplished.

Similarly, here also, the epithet “*dēvāḥ*” could be attributed

to king etc. only if the existence of gods is accepted, and not otherwise ॥ 332-333 (1880-1881) ॥

Now, in case of existence of gods being denied, the uselessness of the rites like *agnihotra* etc. is shown:—

देवाभावे विफलं जमग्निहोत्ताइयाण किरियाणं ।

सग्गीयं जज्ञाण य दाणाइफलं च तदजुत्तं ॥ ३३४ ॥ (१८८२)

Dévābhāvé viphalam jamagghihottāiyāṇa kiriyāṇam ।

Sagghiyam jannāṇa ya dāṇāiphalam ca tadajuttam ॥334॥ (1882)

[देवाभावे विफलं यदग्निहोत्रादिकानां क्रियाणाम् ।

स्वर्गीयं यज्ञानां च दानादिफलं च तदयुक्तम् ॥ ३३४ ॥ (१८८२)

Dévābhāvé viphalam yadagnihotrādikānām kriyāṇām ।

Svargīyam yajñānām ca dānādiphalam ca tadayuktam ॥334॥ (1882)]

Trans.—334 In (case of) non-existence of gods, (award of) heaven laid down (as a result) of (the accomplishment of) the rites like *agnihotra* etc. as well as, the fruition of munificence etc. would be null and void. (1882)

टीका—‘ वा ’ इत्यथवा, इदं दूषणम्—देवाभावेऽभ्युपगम्यमाने यदग्निहोत्रादिक्रियाणाम् “ अग्निहोत्रं जुहुयात् स्वर्गकामः ” इत्यादिना स्वर्गीयं फलमुक्तम्, तथा, यज्ञानां च यत् फलमभिहितं, दानादिफलं च यत् समस्तलोके प्रसिद्धम्, तत् सर्वमयुक्तं प्राप्नोति । स्वर्गो ह्येतेषां फलमुक्तम्, स्वर्गिणां चाभावे कुतः स्वर्गः ? इति । “ स एष यज्ञायुधो ” इत्यादीनि च वेदवाक्यानि देवास्तित्वप्रतिपादनपराणि वर्तन्ते । अतः किं तान् न प्रतिपद्यसे ? । यद्यपि “ को जानाति मायोपमान् गीर्वाणानिन्द्र-यम-वरुण-कुबेरादीन् ” इत्यादि वाक्यम्, तदपि न देवनास्तित्वाभिधायकम्, किन्तु सुराणामपि मायोपमत्वाभिधानेन शेषर्दिसमुदायानां सुतरामनित्यत्वप्रतिपादकं बोद्धव्यम्; अन्यथा हि देवास्तित्वप्रतिपादकवाक्यानि, श्रुतिमन्त्रपदैरिन्द्रादीनामाह्वानं चानर्थकं स्यात् ॥ ३३४ ॥ (१८८२)

D. C.—There will be one more difficulty in case of denying the existence of gods. Because in that case, the award of

heaven laid down as a result of the rites like *agnihotra* etc. in the sentences such as " *Agnihotram juhuyāt svargakāmaḥ* " etc. as well as, the fruition of sacrifices and meritorious deeds like *dāna* etc prescribed in deeds like *dāna* etc. prescribed in this world, would become absolutely futile. Thus, in absence of *svargin*—the inhabitant of *svarga*—how is *svarga* to exist ?

Hence *O Maurya* ! take it for certain that sentences such as " *Sa eṣa yajñāyudhī* " etc. are laid down to establish the existence of gods, while the sentence " *Ko jānāti māyopamān gîrvāṇānindra-Yama-Varuṇa-Kubērādīn* " etc. does not lead to deny the existence of gods, but it only means to assert the *a-nityatā* of the prosperity of gods and the rest. Otherwise, the sentences which establish the existence of gods, as well as, the invocation of gods like *Indra* by means of reciting the prescribed *mantras*, would be of no avail. || 334 || (1882),

Moreover,

जम-साम-सूर-सुरगुरु-सारज्जाईणि जयइ जण्णेहिं ।
मंतावाहणमेव य इंद्राईणं विहा सव्वं ॥ ३३५ ॥ (१८८३)

Yama-Soma-Sūra-Suraguru-svārājyādīni jayati yajñaiḥ ।
Mantrāhvānaméva céndrādīnām vṛithā sarvam ॥ 335 ॥ (1883)]

Trans.—335 (The statement that) one conquers the regions of (the gods of) Death, Moon, Sun, and *Brihaspati* etc., and the invocation of *Indra* etc by reciting the prescribed *mantras*, would be absolutely null and void. (1883)

टीका—“ जमित्यादि ” पूर्वार्धस्यायमर्थः—उक्त्यषोडशिमृत्तिकृतुमि-

D. C.—It has been laid down in the *Sāstras* that—

‘ *Uktha śodāsi prabhṛiti kratubhir yathāśruti Yama-Soma-Sūrya-Suragūru-svārājyāni jayati* ’ etc. Sentences like this, lead to prove the existence of gods. But they would prove themselves good-for-nothing, if the existence of gods is denied.

Similarly, the invocation of gods such as *Indra* etc. by means of *mantras*, which indicate the existence of gods, would also become futile if there were *dēvābhāva*. The sentences of the *Vēdas* establish the existence of gods in one way or the other. p 335 ॥ (1883).

The doubt of *Mauryaputra* is thus removed by the preceptor.

D. C.—What are you thinking about? Your doubt about the existence of *Nārakas* is based upon your hearing the

various *Vēda-padas* having contradictory senses. The *Vēda-padas* are as follows :—

(1) “*Nārako vai eṣa jāyaté yaḥ sūdrānmas'nāté*” etc

(2) “*Na ha vai prētya Nārakāḥ santi*” etc.

According to you, the interpretation of these sentences is this—

(1) “A *brāhmaṇa* who eats the food of *s'udras* becomes a *nāraka*” (This proves the existence of helish denizens.)

(2) “In fact, there is nothing like *nārakas* in the next world ”

This proves the existence of *nārakas*. But you have not grasped the real import of those *Vēda-padas*. ॥339॥ (1887)

*D. C.—Bhagavāna :—*O long-lived *Akampitā!* your objection that *Nārakas* do not exist, because they have not been apprehended by you, is unfounded. I have perceived those *Nārakas* personally. Accept them, therefore, as existing on account of their being *pratyakṣa* to me, like all other objects, animate and inanimate.

Secondly, it is not appropriate to hold the obstinate view that nothing can be said to be *pratyakṣa* in this world, unless and until it has not been witnessed by you. Usually, that which has been witnessed by a trustworthy or respectable person, is accepted as existing in this world. Existence of lion, bear, and swan etc is universally accepted by all, even though those animals have not been *pratyakṣa* to each and every person in the world. You have not witnessed all countries, rivers, towns, oceans and times, still however, you do not doubt their existence, because they have already been *pratyakṣa* to other respectable persons

Similarly, you shall have to accept the existence of *Nārakas* when they have already been *pratyakṣa* to me. ॥342-343. (1890-1891).

D. C —Since, that which is perceived, is beyond the perception of senses, you do not admit it, as according to you only, that which is *indriya pratyakṣa* is *pratyakṣa* This is a great folly. *Indriya-pratyakṣa* is recognized as *pratyakṣa* by means of *upacāra*, similar to the case of *anumāna*, when objects like fire etc are apprehended by means of external indications of smoke etc. But the *pratyakṣa* in my case, is different from this. By means of mere *upacāra* it is called *pratyakṣa*, but really speaking, it is *parokṣa* as the *ākṣa* (*i-e jīva*) does not apprehend the object directly as in the case of *anumāna*.

The *atīdriya* or that which is beyond perception by ('means of) sense-organs, should alone be accepted as *pratyakṣa* as in that case, *jīva* directly perceives the object.

Akampita:—Although in case of *indriya-pratyakṣa*, *jīva* does not apprehend an object directly, *indriyas* are undoubtedly able to recognize the object directly In such a case, why should we not consider *indriya-pratyakṣa* to be the *pratyakṣa* itself ? ॥ 344 (1892) ॥

C.—Just as *anumāna* capable of attaining the accomplishment of a desired object by means of another object, cannot be called *pratyakṣa jñāna*, so also, apprehension by means of *indriyas*, could not be called *pratyakṣa*. Like an inference establishing the *a-nityatā* of *ghaṭa* by means of its *kṛitakatva*, cognizance attained by *indriyas* is not *pratyakṣa*. *Indriya pratyakṣa-jñāna* is limited to the apprehension of only *rūpa* etc. by means of eye etc. ॥ 348 (1896) ॥

D. C.—Like the perception of fire from smoke, the percep-
tion due to sense-organs, is also produced from the recollec-
tion of the connections of the past. So, it is not *pratyakṣa*. Take
the example of *ghaṭa*. The name *ghaṭa* was given to it in the
past. We recognize it as *ghaṭa* on the basis of its *pūrvakāṇa*
saṅkēta. Hence, the knowledge about *ghaṭa* is apprehended by
means of *indriyas* from the recollection of its past relations.
If it were not so, a person coming from a distant island, who
has neither heard nor seen anything about *ghaṭa*, would at once
be able to recognize it as *ghaṭa*. This sort of *indriya-jñāna* is
produced very quickly from reflection etc. due to constant prac-
tice and cleverness, and hence, it is not marked everywhere.

Moreover, just as one apprehends *agni* from *dhūma* which
is absolutely different from himself, the apprehension in this
case, is also attained by Soul from the *indriyas*, which are
absolutely different from the Soul, showing thereby that the
knowledge thus obtained is not *pratyakṣa* but *parokṣa*.

Pratyakṣa jñāna is acceptable to Soul directly like the
¹ *Avadhī*, ² *Manah-paryāya* and *Kevala-jñāna*s and it is never

1. The first stage of perception when the attention is concentrated.
2. The state of mental perception which precedes the attainment
of perfect knowledge.
3. Absolute Perception.

obtained by the Soul from any external *nimitta*. All sorts of *jñāna* except the above-mentioned three, are mere *anumānas* as they apprehend objects indirectly. In case of *jñānas* like *Avadhi* etc, since the Soul apprehends the object directly, the knowledge is called *pratyakṣa*.

Trans.—350 Since everything pertaining to that which is void of *Kevala*, *Maṇaḥ-paryāyā* and *Avadhi* (sorts of *jñāna*) is mere inference, it is (present) in case of (establishing) the existence of hellish denizens. By (virtue of) that (*anumānā*), the *Nārakas* are existing. (1898)

D. C.—Every sort of knowlege excepting *Avadi-Manaḥ paryāyā* and *Kevala* is mere *anumāna* on account of its being based on the indirect perception of an object. *Jñānas* like *Kevala* etc apprehend the object directly and hence they are called *pratyakṣa*. Since the *anumāna* pertaining to *Nārakas*,

is *pratyakṣa*, the existence of *Nāraḥas* is established without doubt
The *pratyakṣa jñāna*, in this case, is my own *Kēvalajñāna* ॥350॥

*Akampaṭa:—*Since the excessively miserable *tiryancas*, and *manuṣyas* have to undergo the consequences of great sins, why not to take them as *Nārakas* ?

*Bhagavāna:—*It is not so. Sufferers of the consequences of great sins ought to be miserable in all respects.

Tiryancas, and *manuṣyas* cannot be said to be miserable in all respects as required in case of *Nārakas*. They are

entitled to various means of pleasure like light, shades of a tree cool-breeze, river, and stream etc. On the other hand, various horrors of hell such as those of being killed, pierced, cooked, burnt, pressed, and dashed against stone-slabs are not experienced by *tiryaukas* or *manusyas*. Only *Nārakas* are doomed to undergo such afflictions.

Moreover, in the sentences such as “*Na ha vai prṭeya nārakāḥ santi*” etc you have suspected the existence of *Nārakas*. But it is not so. The import of those sentences is that there are no *Nārakas* everlasting like *Méru* etc. in the other world, but those who commit great sins in this world, would, become *Nārakas* in the next world. The sentences, therefore, mean to assert that no body should commit such sins lest they might become the denizens of hell after death.

The *Bhagavāna* thus removed his doubts ॥ 355 (1903) ॥

D. C.—Your doubt about the existence of *puṇya* and *pāpa* is not justified. It is based on your hearing the sentence of *Védas* bearing contradictory senses. The sentences are such as “*Puruṣa évētam gñim sarvam*” etc. which have already been mentioned in the *Second Gandharavāda*. You have not grasped the real interpretation of those sentences. D. C.---There are five different theories about the existence of *puṇya* and *pāpa* as stated below:—

- (1) There exists *puṇya* alone, and the there is nothing like *pāpa*.
- (1) There exist *pāpa* alone, and there is; nothing like *puṇya*.
- (3) *Puṇya* and *pāpa* which happen to be the causes of *sukha* and *duhkha* respectively, exist in a combined state like a dark-blue jewel.

- (4) *Punya* and *pāpa* are absolutely independent of each other.
- (5) There is nothing like *Karma* at all. The expansion of this mundane world is not due to *Karma*, but it is natural.

Now, since you have listened to all the above-mentioned five views, you are wavering between the five and raising the doubt about *punya* and *pāpa*. ॥ 360 ॥ (1908)

Each of the above-mentioned views is explained as follows:—

पुण्युक्करिस्से सुभया तरतमजोगावगरिसओ हाणी ।
तस्सेव खण मोक्खो पथ्याहारोवमाणाओ ॥ ३६१ ॥ (१९०९)

Puṇṇukkarissé subhayā taratamajogāvagarisaō hāṇī ।
Tasséva khaé mōkkho patthārovamāṇāō ॥ 361 ॥ (1909)

[पुण्योत्कर्षे शुभता तरतमयोगापकर्षतो हानिः ।

Puṇyotkarṣe śubhatā taratamayogapakarṣato hāniḥ ।
Tasyaiva kṣaye mokṣaḥ pathyāhāropamānāt ॥ 361 ॥ (1909)]

Trans.—361 With the (gradual) rise in *punyas*, welfare (is obtained). With the gradual diminution, there is destruction. Being similar to the wholesome diet, when it is absolutely destroyed, there is (complete) liberation. (1909)

टीका—पुनातीति पुण्यं तस्योत्कर्षलेशतो लेशतश्च वृद्धौ शुभता भवति, सुखस्यापि क्रमशो वृद्धिर्भवति तावत्, यावदुत्कृष्टं स्वर्गसुखमित्यर्थः । तस्यैव पुण्यस्य तर-तमयोगापकर्षतो हानिः सुखस्य-दुःखं भवति । इदं मुक्तं भवति—यथा यथा पुण्यमपवीयते तथा तथा जीवानां क्रमेण दुःख-मृत्पद्यते, यावत् सर्वप्रकर्षभासं नरकदुःखम् । तस्यैव च पुण्यस्य सर्वथा क्षये मोक्ष इति । एतच्च सर्वं पथ्याहारोपमानाद् भावनीयम्; तथाहि—यथा

पथ्याहारस्य क्रमेण वृद्धावारोग्यवृद्धिस्तथा पुण्यवृद्धौ सुखवृद्धिः, यथा च पथ्याहारस्य क्रमेण परिहारे सरोगता मरति, एवं पुण्यापचये दुःखोत्पत्तिः। सर्वथा पथ्याहारपरिहारे च मरणवत् पुण्यक्षये मोक्ष इति ॥३६१॥ (१९०९)

D. C.—The first case—*viz.*, that *puṇya* alone exists and there is nothing like *pāpa*—is discussed as follows:—

That which purifies is called *puṇya*. With the gradual increase in *puṇya*, there is a gradual rise in happiness also, leading ultimately to Salvation which is the highest happiness. On the other hand, when there is a gradual decrease in *puṇya*, happiness also decreases and gradually begins to turn into misery, leading ultimately to the agony of hell. Finally, when there is entire diminution of *puṇya*, *Jīva* attains complete liberation, *i. e.* it dies. This resembles the case of wholesome diet.

Just as, by the gradual increase in wholesome diet, one becomes more and more healthy, so also, by the gradual eminence of *puṇyas*, there is a gradual rise in happiness also. On the other hand, just as, when the wholesome diet is abandoned, the disease re-enters the body, and one becomes ill, so also when there is gradual diminution of *puṇya*, there is gradual diminution in happiness and re-generation of misery. Ultimately, by abandoning the wholesome diet entirely, one dies away. In the same way, by the entire destruction of *puṇya*, *jīva* attains complete liberation from this world. ॥ 361 ॥ (1909)

Taking the second theory of *pāpa*, the author explains:—

पावुक्करिसेऽहमया तरतमजोगावगरिसओ सुभया ।

तस्सेव खए मोक्खो अपत्थभत्तोवमाणाओ ॥ ३६२ ॥ (१९१०)

Pāvukkarise'hamayā tratamajogāvagarisaō subhayā ।

Tasséva' khaé mokkho apatthabhattovamāṇāō ॥ 362 ॥ (1910)

[पापोत्कर्षधमता तरतमयोगापकर्षतः शुभता ।

तस्यैव क्षये मोक्षोऽपथ्यभक्तोपमानात् ॥ ३६२ ॥ (१९१०)

Pāpotkarṣe'dhamatā taratāmayogāpakarṣataḥ śubhātā ।

Tasyaiva kṣaye mokṣo'pathyabhaktopamānāt । 362 ॥ (1910) ।

Trans.—362 In (case of) the increase in *pāpa*, there is vileness; with gradual diminution (of it); (there is) welfare; and as in the case of the unwholesome diet, there is (complete) liberation (of the *jīva*) when it is absolutely destroyed. (1910)

टीका—इहापथ्याहारोपमानाद् वैपरीत्येन भावना कार्या । तथाहि—
यथा क्रमेणापथ्यवृद्धौ रोगवृद्धिः, तथा पांशयत्यात्मानं मलिनयतीति पापं,
तस्य वृद्धौ सुखवृद्धिरूपाऽधमता मन्तव्या—क्रमेण दुःखं वर्धते, यावदुत्कृष्टं
नारकदुःखम् । यथा चापथ्यत्यागात् क्रमेणारोग्यवृद्धिः, तथा क्रमेण पापस्या-
पकर्षात् सुखस्य वृद्धिः, यावदुत्कृष्टं सुरसौख्यम् । यथा चापथ्याहारस्य सर्वथा
परित्यागात् परमारोग्यमुपजायते, एवं सर्वपापक्षये मोक्ष इति ॥३६२॥ (१९१०)

D. C.—Those, who believe that there exists *pāpa* alone, and nothing like *puṇya*, put forward the same argument, but in a reverse manner. According to them, just as disease develops with the increase in unwholesome diet, vileness in the form of miseries etc., also increases with the eminence of sins, leading ultimately to the agony of hell. On the other hand, when the unwholesome food is being gradually given up, there is a gradual recovery of health.

Similarly, by the gradual diminution of sins, there is a gradual re-generation of happiness leading ultimately to Salvation. Lastly, just as complete health is regained at the complete abandonment of the unwholesome food, there is complete attainment of *mokṣa*, when the sins are completely removed. ॥ 362 ॥ (1910).

Now, a third belief that *puṇya* and *pāpa* exist as *sādhāraṇa*, is explained:—

साहारणवण्णादि व अह साहारणमहेगमत्ताए ।

उक्करिसा-वगरिसओ तस्सेव य पुण्णपावक्खा ॥ ३६३ ॥ (१९११)

Sāhāraṇavaṇṇādi va aha sāhāraṇamahégamattāé ।

Ukkarisā -vagarisao tas:èva ya puṇṇapāvakkhā ॥ 363 ॥ (1911)

[साधारणवर्णादीवाथ साधारणमथैकमात्रया ।

Sādhāraṇavarṇādivāthā sādharmaṇamathaikamātrayā ।

Utkarṣa-’pakarsatastasyaiva ca puṇyapāpākhyā ॥ 363 ॥ (1911) ।

Trans.—363 Like joint-syllables etc, (*puṇya* and *pāpa*) are combined with each other as one. And, by reason of eminence or diminution of it, it is known as *puṇya* or *pāpa* (respectively) (1911)

टीका—“ अह साहारणमिति ” अथ साधारणं संकीर्णपुण्यपापाख्यं वस्तु भाव्यत इत्यर्थः । कथंभूतं पुनरिदमवगन्तव्यम् ? इत्याह—“ साहारणवण्णादि व त्ति ” यथा साधारणं तुल्यं हरितालगुलिकादीनामन्यतरन्मीलितं वर्णकद्वयम्; आदिशब्दाद् यथा मेचकमणिः, नरसिहादिर्वा, तयेदमपि पुण्यपापाख्यं संकीर्णमेकं वस्त्वित्यर्थः । ननु यद्येकं वस्त्वित्यर्थम्, तर्हि पुण्यं पापं चेति परस्परविरोधिवस्तुविषयमाख्याद्वयं कथं लभते ? इत्याह—“ अहेगमत्ताए इत्यादि ” अथ तस्यैवैकस्य संकीर्णपुण्यपापाख्यस्य वस्तुन एकया पुण्यमात्रया—एकेन पुण्यांशेनेत्यर्थः, उत्कर्षतो वृद्धो सत्यां पुण्याख्या प्रवर्तते; एकया तु पापमात्रया—एकेन पापांशेनेत्यर्थः, उत्कर्षतो वृद्धौ सत्या पापाख्या प्रवर्तते । अपकर्षेऽपि पुण्यांशस्य पापाख्या प्रवर्तते, पापांशस्य त्वपकर्षे पुण्याख्या प्रवर्तत इति ॥ ३६३ ॥ (१९११)

D. C.—The theory is that *pāpa* and *puṇya* are not separate entities, but they are infused with each other as one like the two syllables joined together as one. Like a base metal of *haritala* or *indigo*, wherein there is always one object mixed with two colours or like, the *Mūcaka* jewel or *Narasimha* etc,

puṇya pāpa is also a mixed entity. Here, if some one rises the doubt that if it is one single entity, why is it known by two names—*pāpa* and *puṇya*? The answer laid down by them is this — On account of the increase in the constituent *puṇya* of the *puṇya-pāpa* entity, the name *puṇya* is given, while with the diminution of the constituent *puṇya*, the entity is called *pāpa*.

Similarly, when there is predominance of the element of *pāpa* it is called *pāpa* and vice versa. So, *puṇya pāpa* is one and only one entity and does not exist separately ॥ 363 ॥ (1911)

Now, with regard to the remaining two theories, it has been laid down as follows:—

एवं चिय दो भिन्नाइं होज्ज, होज्ज व सभावओ चैव ।
भवसंभूई, भण्णइ न सभावाओ जओऽभिमओ ॥ ३६४ ॥ (१९१२)

जइ वत्थुं णत्थि तओऽणुवलद्धीओ खपुप्फं व ॥ ३६५ ॥ (१९१३)

Evam ciya do bhinnāim hojja, hojja va sabhāvaō ceva ।

Bhavasambhūi, bhaṇṇai na sabhāvāō jao'bhimao ॥ 364 ॥ (1912)

Hojja sahāvo vatthum nikkāraṇayā va vatthudhammo vā ? ।

Jai vatthum ṇatthi tao'ṇuvaladdhio khapuppham va ॥ 365 ॥ (1913)

[एवमेव द्वे भिन्ने भवेतां, भवेद् वा स्वभावत एव ।

Bhabet svabhāvo vastu niškāraṇatā vā vastudharmo vā ? ।

Yadi vastu nāsti sako'nupalabdheḥ khapuṣpamiva ॥ 365 ॥ (1913)]

Trans.—364–365 Similarly, (some would believe that) both are different (from each other), or that the production of the mundane world would be due to (nothing else but its) *svabhāva* only. In reply to that, it is said that the production of the mundane world) by virtue of (its, *svabhāva*, is not believable. And, Is that *svabhāva* a (definite) object? or causelessness (itself)? or the property of an object? If (it is taken as) an object, it is not (an object, because it is non-apprehensible like a *kha-puṣpa* (1912-1913).

टीका - एवमेव केषाञ्चिद् मतेन द्वे अपि भिन्ने स्वतन्त्रे स्यातां पुण्य-पापे, तत्कार्यभूतयोः सुख-दुःखयोर्यौगपद्येनानुभवाभावात् । अतोऽनेनैवभिन्न-कार्यदर्शनेन तत्कारणभूतयोः पुण्य-पापयोर्भिन्नताऽनुमीयत इति । “ होज्ज वेत्यादि ” अथवा स्वभावत एव विनापि पुण्य-पापाभ्यां भवसंभूतिः-भव-वैचित्र्यस्य संभवः कैश्चिदिष्यते । तदेवं दर्शिताः पञ्चापि पुण्य-पापविषया विकल्पाः । एतैश्च भ्रमितमनोभिः संशयो न कर्तव्यः, एकस्यैव चतुर्थविकल्प-स्यादेयत्वात्, शेषाणां चानादेयत्वात् । अत एव प्रत्यासत्तिन्यायमङ्गीकृत्य पञ्चमविकल्पं तावद् दूषयितुमाह -“ भण्णईत्यादि ” भण्यतेऽत्रोत्तरम्--न स्वभावतो भवसंभूतिः, यतः स्वभावो वस्तुरूपो वाभिमतो भवेदिति द्वितीय-गाथायां संबन्धः, निष्कारणता वा, वस्तुधर्मो वा स्वभावोऽभिमतो भवेत् ? इति त्रयो विकल्पाः । तत्र यदि वस्तुरूपोऽयमिति प्रथमो विकल्पः तर्हि तकोऽसौ स्वभावो नास्ति, अनुपलम्भात्, स्वपुष्पवदिति ॥ ३६४--३६५ ॥ (१९१२--१९१३)

D. C.—According to some, *puṇya* and *pāpa* are independent of each other, because *sukha* and *duḥkha* which are their respective *kāryas* or consequences are not experienced at one and the same time. So, when *kāryas* are found to be independent of each other, their respective causes should also be independent of each other by *anumāna*.

Finally, there is one more theory that the expansion of this mundane world is not due to *Karmas* known as *pāpa* and

puṇya, but on account of its own *svabhāva*. According to this theory, there is nothing like *Karma*.

Your doubt has sprung up from five different opinions stated above. But that is not justifiable. For, out of those five theories, none except the fourth one is acceptable. The expansion of *bhava* by means of its *svbhāva* as laid down in the fifth theory, is also not acceptable. Because, in that case, *svabhāva* should either be a definite object (*vastu*) or causelessness (*niṣkāraṇatā*), or the property of a definite object (*vastu-dharma*). Since *svabhāva* is absolutely imperceptible like a *kha-puspa*, it can never exist as a definite object. ॥ 364-365 ॥ (1912-1913)

Tadeva dehādīnām kriyāṇāmapi ca śubhā'-śubhatvat ।

Pratipadyasva puṇya-pāpe svabhāvato bhinnajātiye ॥372॥ (1920,]

Trans.—366-372 If it is extremely non-perceptible, why is it called *svabhāva* and not *Karma* ? The *hétu* that works in the existence of *svabhāva*, works in case of *Karma* also. Or, what harm is there in taking *svabhāva* as the synonym of *karma* ? And since it has a definite shape like *ghaṭa*, it cannot be a doer, just as sky is not (the doer of) bodies. (For), the corporeal nature is justified on account of (its) being *kārya* etc. Now, if that (*svabhāva*) were causelessness (itself), non-existent (objects like) *kharaśringa* etc, would come into existence. If it is (taken as) the property of a (definite) object, then it would turn out to be the effect of *Karma* and *jīva* and would be inferred as *puṇya* and *pāpa* by

means of *kārya* and *kāraṇa*. So, like *Agnibhūti*, you, too, (shall have to) accept (the existence of) *Karma* on account of action, as well as *Kāryas* (in the form of *dēha* etc, and since *Karma* itself is the cause of good or bad (in case of *dēha* etc.), as well as other performances, admit *puṇya* and *pāpa* as belonging to different species by their very *svabhāva* (1914-1920)

D. C.—These verses have already been explained in details in the Second *Gaṇadhara-vāda*.† The only point to remember in this connection, is that *puṇya* and *pāpa*, the *pariṇāma* of *Jīva* and *Karma*, could be inferred from *kāraṇa* and *kārya*.

These two inferences are explained as follows:—

(1) *Kāraṇānumāna*:—Just as in case of working of agriculture, rice, barley, and wheat etc. are reaped as crops (*Kāryas*) at the end, *puṇya* and *pāpa* are also reaped as the *pariṇāmas* of *Jīva* and *Karma* with actions like munificence etc. or violence etc. as their respective causes.

It is, therefore, said that—

“Samāsu tulyam viṣamāsu tulyam satīṣvasaccāpyasatīṣu sacca ।
Phalam kriyāsvityatha yannimittam tad déhinām so'stinuko'pi
dharmah ॥”

(2) *Kāryānumāna*:—Just as, a potter accompanied by the materials such as earth, stick, wheel etc. happens to be the *Kāraṇa* of *ghaṭa*, so also in case of *Kāryas* like *śarīra* etc. there is some cause or the other. The cause, in this case, is nothing but *puṇya* and *pāpa* in the form of good and bad deeds. In the production of *kāryas* like *śarīra* etc, parents are no doubt visible causes, but along with them, there are invisible causes in the form of good or bad deeds also. Otherwise, ugliness or fairness in various forms—in spite of their *dr̥ṣṭa hetu*, viz, parents being the same—would never be accounted for. The *karma* therefore has two types:—*Puṇya* and *pāpa*. Good forms are the results of *puṇya* and ugly ones are the results of *pāpa*. Hence it is said:—

‘Iha dr̥ṣṭahétvasambhaviḥkāryaviśeṣāt kulālayatna iva ।
Hétvantaramanumeyam tat Karma śubhā'-śubham kartuḥ ॥”

So, like *Agnibhūti*, you, too, shall have to accept the existence of *Karma* putting faith into the words of me—the

omniscient. You shall also have to take it for certain that *Karma* is divided as *puṇya* and *pāpa*, causing a variety of forms in *déha* etc. ॥ 366-372 ॥ (1914-1920)

The existence of *puṇya* and *pāpa* could be established in a different way:—

सुह-दुक्खाणं कारणमणुरुवं कज्जभावओऽवस्सं ।

परमाणवो घडस्स व कारणमिह पुण्ण-पावाहं ॥ ३७३ ॥ (१९२१)

Suha-dukkāṇam kāraṇamaṇurūvam kajjabhāvaō'vassam ।

Paramāṇavo ghaḍassa va kāraṇamiha puṇṇa-pāvāim ॥ 373 ॥ (1921)

[सुख-दुःखयोः कारणमनुरूपं कार्यभावतोऽवश्यम् ।

परमाणवो घटस्येव कारणमिह पुण्यपापे ॥ ३७३ ॥ (१९२१)

Sukha-duḥkhayoḥ kāraṇamanurūpam kāryabhāvato'vaśyam ।

Paramāṇavo ghaṭasyéva kāraṇamiha puṇya-pāpe ॥ 373 ॥ (1921)]

Trans—373 Just as molecules (which act as) the cause of *ghaṭa* resemble *ghaṭa* in the same way, happiness and misery, the *Kāryas* have also their *Kāraṇa viz. puṇya and pāpa* similar, to them. (1921)

टीका—अस्त्यवश्यं सुख-दुःखयोरनुरूपं कारणम्, कार्यत्वात् तयोः, यच्चेह कार्यं तस्यानुरूपं कारणं भवत्येव, यथा घटस्य परमाणवः, तच्च तयोरिहानुरूपं कारणं, सुखस्य पुण्यं, दुःखस्य तु पापमिति ॥ ३७३ ॥ (१९२१)

D. C.—Since *kāraṇa* is similar to *Kārya*, the small particles of earth which make *ghaṭa*, resembles *ghaṭa*, and *puṇya* and *pāpa* which are the *kāraṇa* of *sukha* and *duḥkha* would resemble *sukha* and *duḥkha*. ॥ 373 ॥ (1921)

The opponent may now, raise the objection as follows:—

सुह-दुक्खकारणं जइ कम्म कज्जस्स तदणुरुवं च ।

पत्तमरुवं तं पि ह्नु अह रुवि नाणुरुवं तो ॥ ३७४ ॥ (१९२२)

**Sukha-duḥkhakāraṇam yadi karma kāryasya tadanurūpam ca ।
Prāptamrūrūpam tadapi khalvatha rūpi nānurūpam tatah ॥ 374 ॥]**

Trans.—374 If *karma* (were known as) the cause of happiness and misery, and if *Kārya* (were taken as) similar to it, then, that (i e *karma*) also would certainly become formless, and if corporeal, it would not resemble (the *Kārya*). (1922)

टीका-ननु यदि सुख-दुःखयोः पुण्य-पापात्मकं कर्म कारणम्, तच्च यदि कार्यस्य सुख-दुःखरूपस्यानुरूपं सदृशमिष्यते, तर्हि सुख-दुःखयोरान्यपरिणामत्वेनारूपत्वात् तदपि पुण्य-पापात्मकं कर्म तदनुरूपतयाऽरूपं प्राप्नोति । अथ रूपवत्, तर्हि नानुरूपं तत्, मूर्तत्वेन विलक्षणत्वादिति ॥ ३७४ ॥ (१९२२)

D. C.—If *Karma* composed of *punya* and *papa* is accepted as the *Kāraṇa* of *sukha* and *duḥkha*, and if *sukha* and *duḥkha* are taken as similar to the *Karma*, *Kārya*, which in fact is corporeal, would become formless like *sukha* and *duḥkha*.

On the other hand, if it is taken as corporeal, it will not resemble its *kārya*, viz, *sukha* and *duḥkha* which are incorporeal. ॥ 374 ॥ (1922)

Then, the *Truḥaṅkara Bhagavān* replies:—

न हि सव्वहाणुरूवं भिन्नं वा कारणं, अहं मयं ते ।

किं कज्ज-कारणत्तणमहवा वत्थुत्तणं तस्स ? ॥ ३७५ ॥ (१९२३)

Na hi sarvathānurūpam bhinnam vā kāraṇam atha matam te
Kim kārya-kāraṇatvamathavā vastutvam tasya ? ॥ 375 ॥ (1923)]

Trans.—375 The *kāraṇa* is neither similar nor dissimilar (to the *kārya*) in all respects. Then, you might' contend that ' How is its being a *kārya*, *kāraṇa* or a (definite) object (justified) ? (1923)

टीका-न हि सर्वथा कार्यानुरूपं कारणमिष्यते, येन सुख-दुःखकृद् कर्मणोऽप्यरूपत्वं प्रेर्यते । नाप्येकान्तेन सर्वधर्मैः कारणं कार्याद्भिन्नमेष्टव्यम् । “ अहं मयं ते त्ति ” अथ ते तत्रैव मतम्-एकान्तेन सर्वैरपि धर्मैः कारणं कार्यानुरूपमेव, भिन्नं वाऽनुरूपमेवेति; तर्हि सर्वथाऽनुरूपत्वं एकस्य कारण-त्वेऽपरस्यापि कारणत्वात्, एकस्य च कार्यत्वेऽन्यस्यापि कार्यत्वात् किं तयोः कार्य-कारणत्वम् ? न किञ्चित्, द्वयोरपिकारणत्वात्, कार्यत्वाद् वेति । अथैकान्तभेदेऽभ्युपगम्यमाने कार्यस्य वस्तुत्वे किं नाम तस्य कारणस्य वस्तुत्वम् ? न किञ्चित्, द्वयोरपि वस्तुत्वे सर्वथा भेदहानिमसङ्गादिति । तस्माद् नैकान्तेनानुरूपता, अनुरूपता वा कार्य-कारणयोः ॥ ३७५ ॥ (१९२३)

D. C.—*Kāraṇa* is neither absolutely similar nor absolutely dissimilar to the *Kāryas*. So, *Karma*, cannot be called formless like its *Kārya viz, sukha and duḥkha*.

Your doubt is based on your assumption that *kāraṇa* is exclusively similar or dissimilar to the *kārya*. But you are not justified in your assumption. For, if *Kāraṇa* were absolutely similar to *Kārya*, it would turn out to be the *kāraṇa*, of some other *Kārya* also.

Similarly, a *kārya* taken as similar to a *kāraṇa* in all respects, would also become the *Kārya* of another *kāraṇa*. Consequently, there will be no distinction between *Kārya* and *kāraṇa*, and both would either become *kāraṇa* or *kārya*.

Since there is no difference between *kārya* being a definite

objec. and a *kāraṇa* being a definite object, the exclusive difference between the two would also, be out of place. Hence, *Kārya* and *kāraṇa* are nither absolutely similar nor absolutely dissimilar to each other, but comparatively equal or unequal to each other. ॥ 375 ॥ (1923)

The author states an objection to this and to its reply:—

सर्वं तुल्लातुल्लं जइ तो कज्जाणुरूवया केयं ? ।

जं सोम्म ! सपज्जाओ कज्जं परपज्जओ सेंसो ॥ ३७६ ॥ (१९२४)

(१९३४)

D. C.—Bhagavāna :—Not only *kārya* and *kāraṇa*, but all objects of the Universe, are relatively equal and unequal, and no objects is absolutely equal or absolutely unequal.

Acalabhrātā:—If it is so, then, why do you try to establish particularly the similarity between *kāraṇa* and *kārya* by saying that “ *sukha* and *duḥkha* are similar to *kāraṇa* etc. ? Still, however, if some object is absolutely similar to another, it may be justified to say so. But when nothing is similar or dissimilar in all respects, and everything is relatively equal or unequal according to you, then, how could it be said that *Kāraṇa* was semilar to *Kārya*.

Bhagavāna:—In spite of all objects being relatively equal or unequal, *kārya* resembles *kāraṇa*, because it is the synonym of *kāraṇa*, while other objects which are the autonoms of *kār-
aṇa* are dissimilar to it.

Hence in the present case, *sukha* and *duḥkha* are the synonyms of *Karma* the *kāraṇa*. The combination of *jīva* and *puṇya* is the cause of *sukha*, and that of *jīva* and *pāpa* is the cause of *duḥkha*, just as *śiva*, *kalyāṇa*, *śubha* etc. are the synonyms for *sukha*, the same are the synonyms for *puṇya-
karmas* also.

Similarly, *duḥkha* and its cause, the *pāpa-karmas*, have the same synonyms *viz*, *a-śiva*, *a-kalyāṇa* and *a-śubha* etc.

It is in this way, *O Saumya!* that *puṇya* and *pāpa* are known as the *kāraṇas* resembling their *kāryas* viz *sukha* and *duḥkha*.
॥ 376 ॥ (1924)

The opponent may here ask as follows:—

किं जह मुत्तममुत्तस्स कारणं तह सुहाईणं कम्मं ।

दिट्ठं सुहाइकारणमन्नाइ जहेह तह कम्मं ? ॥ ३७७ ॥ (१९२६)

Trans.—377 Is *Karma* the cause of *sukha* etc, as *mūrta* is the cause of *amūrta*? (And) is *Karma* apprehended (as the cause) in the same way as food etc, are apprehended as the cause of happiness etc? (1925)

टीका—किं यथा मूर्त नीलादिकममूर्तस्य स्वप्रतिभासिज्ञानस्य कारणं हेतुस्यासुख-दुःखयोः पुण्य-पापात्मकं कर्मापि मूर्तमेव सत् कारणम्, यथा प्रत्यक्षत एव द्रष्टव्यनादिकम् : आदिशब्दात् स्रक्-चंदना-ऽङ्गना-ऽद्वि-विष-कण्टकादिकयिह सुख-दुःखयोर्मूर्त तत् कारणं यद्वत् कर्मापि तयोरिति भावार्थः ? ॥ ३७७ ॥ (१९२६)

D. C.—Just as gem, garland, sandal-paste, woman serpent, or a poisonous sting becomes the *mūrta* cause of the *amūrta* *sukha* and *duḥkha*, should we accept *Karma* also whether good or bad—to be the *mūrta* and *pratyakṣa* cause like food etc. ? ॥ 377 ॥ (1925)

The answer is—

D. C.—Acalabhrātā:—Since food etc are directly apprehended, they could be taken as the causes of *sukha*, *dukkha*, but what is the purpose of assuming *Karma*, which is absolutely imperceptible to be the cause ?

Bhagavāna —Persons having the same *sādhanas* like *anna* etc are found to enjoy different *phalas* like *sukha* and *dukkha*. In spite of their taking the same food, some people look glad

while others appear gloomy. This sort of *phala bhēda* is significant and is due to good or bad *karma*. ॥ 378 ॥ (1926)

The *mūrtatā* of *Karma* is now explained as follows:—

एतो चिय तं मुत्तं मुत्तबलाहाणओ जहा कुंभो ।
देहाइकज्जमत्ताइओ व्व भणिए पुणो भणइ ॥ ३७९ ॥ (१९२८)

Etto cciya tam muttam muttabalahāṇao jahā kumbho ।

D, C.—The *mūrtatva* of *Karmas* is —explained in various ways

1. Since the difference in *phalas* in case of those having the same *sādhana*s is due to *Karma*, the *karma*, should be taken as *mūrta*.

2. *Karma* is *mūrta*, because like *ghaṭa*, it strengthens the *kāryas* like body etc.
3. Just as *ghaṭa* is *mūrta*, because it is strengthened by the *mūrta* object like oil etc. *Karma* is also *mūrta*, because it is also nourished by objects like flower-garlands and sandal-paste etc.
4. Just as the *pariṇāmas* of *ghaṭa* are *mūrta*, because *ghaṭa* is *mūrta*, the *karma* is also *mūrta*, because its *kāryas* like *śarīra* etc. are *mūrta*. ॥ 379 ॥ (1927)

When thus answered by the *Tīrthaṅkara*, the opponent argues again—

तो किं देहाईणं मुत्तत्तणओ तयं हवंह मुत्तं ।

Trans.—380 Then, does it become *mūrta* because of the corporeal nature, *déha* etc. ? Or, is it incorporeal because of *sukha-duḥkha* etc. (being incorporeal) ? (1928)

टीका-ततः किं देहादीनां कर्मकार्याणां मूर्तानां दर्शनात् तत् कर्म मूर्तं भवतु, आहोस्वित् सुख-दुःख-क्रोध-मानादीनां जीवपरिणामभूतानां तत्कार्याणाममूर्तानां दर्शनात् तत् कारणभावेनामूर्तमस्तु कर्म ? इत्येवं मूर्तत्वा-ऽमूर्तत्वाभ्यामुभयथापि तत्कार्यदर्शनात् किं मूर्तम्, अमूर्तं वा कर्म भवतु ? इति निवेद्यतामिति ॥ ३८० ॥ (१९२८)

D. C.—By accepting your argument, *Karma* will become

mūrta, as well as, *a-mūrta*. It will be *mūrta* because its *kāryas* like *dēha* etc are *mūrta*. At the same time, it will be called *a-mūrta* also, because its *kāryas* and the *jīva-pariṇāmas* such as *sukha*, *duḥkha*, *krodha*, *mōna* etc are *a-mūrta*. In such a case, should we take *Karma* as *mūrta* or *a-mūrta*? ||380|| (1928)

Bhagavāna replies:—

Trans.—381 *Karma* is not the only cause of happiness etc, but *jīva* is also their intimate cause. *Karma* is the opposite one. What difficulty will arise (in such a case)? (1929)

टीका—सुखादीनां कर्मैव केवलं कारणं न भवति, किन्तु जीवोऽपि तेषां समवायिकारणं भवति, कर्म पुनरितरदसमवायिकारणं भवतीति को दोषः ? । इदमुक्तं भवति—सुखादेरमूर्तत्वेन समवायिकारणस्य जीवस्यामूर्तत्वमस्त्येव, असमवायिकारणस्य तु कर्मणः सुखाद्यमूर्तत्वेनामूर्तत्वं न भवतीत्यपीति न दोष इति ॥ ३८१ ॥ (१९२९)

D. C.—*Karma* is not the only cause of *sukha*, *duḥkha* etc. Really speaking, *Jīva* is the intimate cause of *sukha* etc, and *Karma* is merely an accidental cause. Hence, on account of the *a-mūrta* of the *kāryas*, viz *sukh*, *duḥkha* etc, their intimate cause viz *jīva* does become *a-mūrta* but *Karma* being merely an accidental cause, does not become *a-mūrta*. So, there will be no difficulty as regards *karma* being accepted as *mūrta*. ||381|| (1929)

Now, refuting the first assertion that the abundance of miseries is due to the diminution of *puṇya*, the author states—

Trans.—382 When *Karma* is proved to be *mūrta* and (at the same time) established as the cause of *sukha-duḥkha* (the theory that) the abundance of miseries is due to the diminution of virtuous actions, will fail. (1930)

D. C.—Now that the theory of *svabhāva* has been refuted and the existence of a *mūrta karma* as the cause of *sukha* and *duḥkha*, has been established we can easily refute the theory that the abundance of miseries is caused by the diminution of *puṇyas* ॥ 382 ॥ (1930)

D. C.—Abundance of miseries to the various beings in this world, is not merely caused by the diminution of *puṇya-karmas* but by the abundant force of various external elements like forbidden food also. If it were not so, it would have been caused only by the diminution of prescribed food etc. (to be attained by *puṇya-karmas*) and would never have depended upon the abundant force of the external but opposite elements like forbidden food etc (to be attained by *pāpa-karmas*)

The main purport of the above argument is this:—If *dēhatva* were to be generated by means of the diminution of *puṇya-karmas* only, it would have been produced only on account of the lack of external materials like *iṣṭāhāra* etc. But it is not so, as it is produced by the increasing force of the external but opposite materials like *aniṣṭāhāra* as well.

Trans.—385 Since body is corporeal, like the abundant *puṇya karmas*, it is not produced by (means of) diminution (of *puṇya karmas*). Or, if it is so, it should be small. (For) how is a huge and (at the same time) splendid (body available) ? (1933)

D. C.—Since the bodies of *anuttara* gods including the Supreme Ruler of the World are *mūrta*, they are not produced by the diminution of *puṇya karmas* In the same way, bodies like that of a miserable elephant, etc are also not produced by the diminution of *puṇya karmas* only as they are *mūrta*. For, that which has been produced by the diminution can never be *mūrta*.

Still however, if a body is ever produced by diminution of *puṇyas*, it must be exquisitely feeble and auspicious. Because a body which is huge and at the same time auspicious, is produced by the accumulation of *puṇyas*, while that which is huge but in-auspicious is produced by the accumulation of *pāpas*. Hence, a body produced even by a small quantity of *puṇyas* must necessarily be happy and never unhappy. Just

as, from a small lump of gold, a small but golden pot is made but not an earthen or a copper one, similarly, a body produced even from a small accumulation of *puṇyas* is always happy though small in form. ॥ 385 ॥ (1933)

Refuting the second and third theories, the author states—

एवं चिय विवरीयं जोएज्जा सब्बपावपक्खे वि ।

न य साहारणरूपं कम्मं तत्कारणाभावा ॥ ३८६ ॥ (१९३४)

Evam ciya vivariyam jōéjjā savvapāvapakkhé vi ।

Na ca sādharmaṇarūpam karma, tatkāraṇābhāvāt ॥ 386 ॥ (1934)

Trans.—386 The same (argument) should also be applied to the theory of exclusive *pāpas*, (but) in a reverse manner. And, (there is nothing like a common *karma* (containing *puṇya* and *pāpa* together) because of the absence of its cause. (1934)

टीका—“सर्वं पापमेवास्ति, न तु पुण्यम्, पापापचयमात्रजन्यत्वात् सुखस्य” इत्येतस्मिन्नपि पक्षे एवमेव-केवलपुण्यवादोक्तदूषणाद् विपरीत-गत्या सर्वं योजयेत्; यद्यथा-पापपकर्षमात्रजनितं सुखं न भवति, पापांशस्या-ल्पीयसोऽपि दुःखजनकत्वात्; न ह्यणीयानपि विषलवः स्वास्थ्यहेतुर्भवति । तस्मात् पुण्यजनितमेवालपमपि सुखमित्यादि स्वबुद्ध्याऽभ्यूह्य वाच्यम् । इति पृथग् दुःखयोःकातणभूते स्वतन्त्रे पुण्य-पापे एष्टाव्ये । अत एव साधारणे अपि संकीर्णे पुण्य-पापे नैष्टाव्ये । कुतः ? इत्याह—‘ न येत्यादि ’ न च साधारणरूपं संकीर्णस्वभावं पुण्य-पापत्मकमेकं कर्मास्ति, तस्यैवंभूतस्य कर्मणः कालाभावात् । अत्र प्रयोगः-नास्ति संकीर्णाभयरूपं कर्म, असंमा-व्यगानैवंविधकारणत्वात्, बन्ध्यापुत्रवदिति ॥ ३८६ ॥ (१९३४)

D. C.—In case of the theory that everything is *pāpa* and there is nothing like *puṇya* and that *sukha* is also produced by the diminution of *pāpa*, the same argument stated above should be applied but in a reverse manner in this way:— Since even a small portion of *pāpa* produced *duḥkha* like a small particle of poison, it could never be said that *sukha* is produced by the diminution of *pāpa*. Even a fraction of happiness is produced by *puṇya* and never by *pāpa*, and so on. These arguments clearly indicate that *puṇya*, and *pāpa* are absolutely separate entities producing *sukha* and *duḥkha* respectively.

So, both could never be taken as one combined entity as laid down in the third theory. Such a combined *Karma* has no *hetu* whatsoever. And hence, like a son to a barren woman it is entirely impossible. || 386 || (1934)

In support of the argument, the author continues—

कर्मं जोगनिमित्तं शुभो-ऽशुभो वा स एगसमयमि ।

Trans.—387 *Karma* is caused by contact which is either auspicious or inauspicious at one time, but never in both the forms. So, *Karma* is also similar to it. (1935)

टीका—मिध्यात्वा-ऽविरति-प्रमाद-कषाय-योगा बन्धहेतव इति पर्य-

(१९३५)

D. C —Perversion (*mithyātva*) incontinence (*a-virati*)
stupidity (*kṛśāya*) idleness (*pramāda*) and contact (*yoga*)
are the various causes of *Karma-bandha*. Out of those, *yoga*
or contact with the other world is the principal cause This
contact is divided as 1. Bodily, contact, 2 Mental contact and
3 the Contact of Actions. It is either *śubha* or *a-śubha* at one
time, but never in a combined state of *śubhāśubha* at the
same time

Now, since this *yoga* is the *kāraṇa* and *karma*, the *kārya*,
the latter should be similar to the former. Hence, there cannot
exist a *karma* containing *puṇya* and *pāya* combined together.
When there pervades *a-śubha yoga* the *śubha Karma*—in the
form of virtuous deeds—is produced and when there is *a-śubha*
yoga, the *a-śubha karma* of sinful deeds, is produced.

But *Karma* could never exist in a combined state of *śubhā-
śubha* as *yoga* never exists in a combined state. ॥ 387 ॥ (1935)

D. C.—*Acalabhrātā*:—The combined state of *śubha* and *a-śubha* contact of mind, takes place when one thinks of offering munificence etc. but not according to the prescribed

rules. That belonging to speech takes place when the observances of deeds like munificence etc. are advised but against the proper rules.

The *miśrabhāva* of the bodily contact is apprehended when a person actually performs the ceremony of worship and bowing down etc. to the *Tīrthāṅkara*, without following the prescribed customs.

In this way, it is quite easy to apprehend the three types of *yogas* in a mixed state of *śubha* and *a-śubha* at the same time.

Bhagavāna: - Your assumption is wrongly based. *Yoga* comes into existence in two ways--(1) By virtue of the contact with a concrete substance and (2) By means of contact with abstract (objects) The concrete substances that come into contact with mind, speech, and body and the process of arousing mind, speech and body, form the *dravya yoga*; while the mental effort which acts as the cause of contact on the part of both--i. e. substance as well as the process--is known as the *bhāva-yoga*.

The composite state of *śubha* and *a-śubha* taken together is possible in case of *dravya-yoga* of all the three varieties belonging respectively to mind, speech, and body--from the practical point of view. But it is never possible in case of *bhāva-yoga*. It is important to note, therefore, that from the practical point of view, the *miśrabhāva* of *śubha* and *a-śubha* combined together may be admitted in case of *dravya yoga* but it is never possible in case of *dravya-yoga* of definite assertion

In case of *bhāva yoga*, the *miśrabhāva* is neither possible from the practical point of view nor with regard to definite assertion

Moreover in *āgamas* also, there is no mention of the composite state of *śubhāśubha yoga*, as a third variety coming after *śubha* and *a-śubha* varieties of mental effort. Hence, in case of *bhāva-yoga*, there cannot exist a mixed entity of

śubhāśubha-yoga but either a *śubha-yoga* or a-*śubha-yoga* is possible. On account of the same reasons, *Karma* is also formed of *śubha* or a-*śubha* deeds separately, but never of *śubha* and a-*śubha* combined together. ॥ 388 ॥ (1939)

And,

Trans.—389 Meditation is either auspicious or in-auspicious but never composite (of both). For, even at the end of meditation, the conflict is either *śubha* or a *śubha*. Hence *karma* is also either (of) virtuous (type) or (of) evil (type). (1937)

टीका—ध्यानं यस्मादागमे एकदा धर्म-शुक्लधकानात्मकं शुभम् आर्त रौद्रात्मकमशुभं वा किर्दिष्टम्, न तु शुभाशुभरूपम्, यस्माच्च ध्यानेपरमेऽपि लेस्या तैजसीप्रमृत्तिका शुभा, कापोतीप्रसुखा वाऽशुभकदा प्रोक्ता न तु शुभाशुभरूपाः : ध्यानलेस्यात्मकाश्च भावयोगाः, ततस्तेप्येकदा शुभा अशुभा वा भवन्ति न तु मिश्राः । ततो भावयोगनिमित्तं कर्मध्येकदा पुण्यात्मकं शुभं बध्यते, पापात्मकमशुभं वा बध्यते, ने तु मिश्रमिति ॥३८९॥ (१९३७)

D. C.—It has been laid down in the *āgamas* that *dhyāna* is either *śubha* i. e. inspired by a religious or guileless motive or a-*śubha* i. e. inspired by vile or dreadful motive at one time, but it could never be inspired by both the motives at the

same time. Even at the end of *dhyāna*, the conflict at work is spoken of either as *śubha* (*i. e.* dominated by lustrous and such other characteristics) or as *a-śubha* (*i. e.* dominated by ill-ominous elements) but it could never be known as *śubhā'-śubha*.

The *bhāva-yogas* are composed of meditations, as well as, the conflicts. So *bhāva-yogas* are also either *śubha* or *a-śubha* separately, but never *miśra*. Consequently, *Karma* should also be taken either as *śubha* or *a-śubha* taken separately and never as *śubhā'śubha* taken together. ॥ 389 ॥ (1937)

D. C.—The composite state of *Karma* could be explained in this way also:—A *Karma* which is apprehended previously may attain *śubha*, *a-śubha* or *miśra* condition or it may also turn itself better or worse. The later pure *pariṇāmas* would purify the previous evil *pudgalas* and turn them right, while on other hand, impure *pariṇāmas* would spoil the previous virtuous *pudgalas* by means of excessive heights of sentiments etc and turn them guile. Thirdly, the *pariṇāmas* which are half-way between purity and impurity, would turn the *Karma* into a composite state of virtue and vice

In this way, with regard to *Karma* of former existence, three states—*viz śubha*, *a-śubha* and *śubhāśubha*—are possible. But, at the time of new apprehension of *Karma*, the *pariṇāma* is not able to form a composite *Karma* of *puṇya* and *pāpa* combined together, and hence there are only two states
॥ 390 ॥ (1838)

Now, the process of changing virtue into vice, and vice versa referred to above, is explained as follows:—

मोक्षण आउयं खलु दंसणमोहं चरित्तमोहं च ।
सेसाणं पगईणं उत्तरविहिसंकमो भज्जो ॥ ३९१ ॥ (१९३९)

D. C.—The process of *prakṛiti saṁkrama* (mutual transformation of various characteristics) is explained as follows:—

† *Ayuh karma*.

- (1) *Prakṛiti-saṃkrama* is not possible in case of original *prakṛitis* like *jñānāvaraṇa* etc. But in case of characteristics which are acquired later on, mutual transition does take place, even though they are not different from their respective original characteristics.
- (2) Four varieties of the characteristics of *āyuh*, and the infatuations of *darśana* and *cāritra* (right conduct) are *exceptions* to the above rule. In spite of these *prakṛitis* being *a-bhinna* from their respective original *prakṛitis*, they do not undergo mutual transition.
- (3) There are 47 *uttara-prakṛitis* which undergo mutual transition. They are enumerated as follows:—5 types of *jñānāvaraṇas*, 9 types of *darśanāvaraṇas*, 16 types of dullness; perversion, fear, contempt, the characteristic of lustre, the *kārmaṇa* characteristic; 4 characteristics of colour etc; one that is neither too long nor too short; characteristics of destruction and construction; and 5 types of obstruction (*antarāya*).

All these 47 *uttara-prakṛitis* of definite *bandha*, always undergo mutual transition *e. g.*, out of five types of *jñānāvaraṇas* noted above, the *śruti-jñānāvaraṇa* could be transformed into *mati-jñānāvaraṇa* and vice versa.

In case of other *prakṛitis* that have not been actually bound up, one that has no proper *bandha* may be transformed into one having proper *bandha*, but the process does not work vice versa, *i. e.* a *prakṛiti* of proper *bandha*, does not change into a *prakṛiti* without *bandha*.

This is the process of *prakṛiti-saṃkrama*. The process of transition in case of other *pradeśas* etc is understood from the sentence:—

“*Mūla prakṛityabhiinnāsū vedyamānāsū saṃkramah bhavati*”
etc. implying that when they are known to be similar to the original *prakṛitis*, they undergo transformation ॥ 391 ॥ (1939)

The separate characteristics of *puṇya* and *pāpa* are now explained—

सोहणवण्णाइगुणं सुभाणुभावं च जं तयं पुण्णं ।

विवरीयमओ पावं न बायरं नाइसुहुमं च ॥ ३९२ ॥ (१९४०)

D. C.—A *Karma* having splendid colours, odours, taste, and touch, is known as *puṇya*. *Pāpa* is opposite to *puṇya*. So, its colour etc. are dull and has no good fruition. Both of them are neither too huge like *Mēru* etc. nor too minute like *paramānu*, because they are produced by the multiplication of various *karmas* ॥ 392 ॥ (1940)

Trans.—393 Just as a person besmeared with oil, catches dust from the region, the Soul also catches (a substance) which is worthy of that (*Karma*), and situated in the same region, by means of all (its) region. (1941)

D. C.—The Soul catches only that substance which suits multitudes of *pāpa-karmas* and *puṇya-karmas*. So, it does not apprehend those like *paramāṅus* and *audārika* etc which are absolutely unfit. Secondly, the Soul accepts those substances only, if they are situated in the region as that of the Soul and none else. So, just as a person besmeared with oil etc. catches dust, the Soul also being affected by *rāga-dvēṣa* etc, catches purposely a proper substance by the help of all its regions.

It has, therefore, been said that--

“ Egadaésogāḍham sarvaapaéséhim kammuṇo joggam ।

[Ekapradeśavagāḍham sarvaparadeśaiḥ karmaṇo योग्यम् ।

At this stage, opponent raises an objection—

D. C.—This world is entirely filled with multitudes of common *puḍgalas* scattered in all etherial regions without any distinction of *śubha* and *a-śubha*. When *jīva* apprehends these *puḍgalas* it is able to recognize them as neither too *sthūla*, nor too *sūkṣam*, as *jīva* is not able to recognize *sthūla* and *sūkṣam puḍgalas*.

In such a case, it is possible that *jīva* is able to understand the distinction of *sthūla* and *sūkṣam*. But how is the distinction of *śubha* and *a-śubha* justified when *jīva* tries to apprehend the *karma-puḍgalas* ? ॥ 394 ॥ (1942)

The reply is—

Trans.—395 It is common no doubt. (But) at the time of apprehension, the Soul turns it into *śubha* or *a-śubha* immediately, by virtue of its nature of resort and fruition as in case of food. (1943)

D. C.—Although these multitudes of *Karmas* are not distinguished as *śubha* or *a-śubha* originally at the time of apprehension, *jīva* immediately turns them *śubha* or *a-śubha* on account of *pariṇāma* as well as *āśraya*. *Jīva* is the *āśraya* of *Karma* which again is the *āśraya* of *śubhatva* and *a-śubhatva*. By the help of this *āśraya svabhāva* as well as the *pariṇāma*, *jīva* apprehends *Karma*. So, at the time of apprehension, *śubhatva* or *a-śubhatva* of *Karmas* depends upon *śubha* or *a-śubha pariṇāma* produced by *jīva*.

Jīva apprehends *karma* as *śubha* or *a-śubha* by virtue of its *āśrayasvabhāva*. So, when *Karma* is apprehended by *jīva* accompanied by *śubha* or *a-śubha pariṇāma*, it is recognized either as *śubha* or *a-śubha karma*. As in the case of *ākāra*,

the *karma-pudgalas* also immediately undergo changes in their original nature in the present condition and the future consequences. In the same way, small or big portions of various regions of *Karma-pudgalas* also undergo immediate changes

It has, therefore, been laid down that:

“Gahaṇasamayammi jīva uppāēi guṇe sa-paccayo ।

The example of *āhāra* stated above, is explained in details as follows:—

Trans.—396 By virtue of fruition and (the object of) resort, just as the food of cow and serpent although same

D. C.—Although the food of cow and serpent is the same that of cow result as milk while the same result as poison in case of serpent, on account of the distinction of *pariṇāma* and *āśraya*. So, in spite of *āhāras* being the same, the result is not the same in both cases, because their *āśrayas*—Cow and serpent—are different. Like *śubhā-śubha āśraya*, it also depends upon *śubha-śubha pariṇāma* ॥ 396 ॥ (1944)

Or, it can be explained in this way also:—

Trans.—397 Just as the same food results in a substantial or perverted form even in the same body, the distinction of *Karma* as *śubha* and *a-śubhā* would also take place. (1945)

D. C.—Even in case of one and the same body and the same food, the food results either in substantial forms like bile chyle, blood and flesh etc. or in worthless forms like urine, foeces, etc. immediately after it has been consumed.

In the same way, *śubha* and *a-śubka* divisions in case of *Karma*, should also be recognized by reason of distinction of *pariṇāma* and *āśraya*: ॥ 397 ॥ (1945)

The author now, illustrates the distinction of *puṇya* and *pāpa*, and establishes their existence by means of *āgams*—

D. C —(1) There are 46 characteristics which are *subha* and are hence known as *punya-prakṛitis*, They are enumerated as follows :—

Bestowing of gift; propriety of conduct etc purged of ail impurities; mirth; masculine form; affection, the three types of *āyus* (union or connection with body *viz*-divine, human, and *tiryanka*,) thirty-seven *prakṛitis* of *Nāma Karma* (including birth as a *Tirthaṅkara*) and the noble lineage.

(2) According to others, there are 42 *prakṛitis* under the category of *punya*. They insist that *samyaktva*, *puruṣaveda*, *hāsya* and *ratn* are *pāpa-prakṛitis* when they are contrary to the nature of *jīva*. Excepting these four *prakṛitis*, the remaining 42 *prakṛitis* are laid down by them as under—

Sāyam uccāgoyam nara-tiri-dévāuyāim taha nāmé ।
 Dévadugam maṇuyadugam paṇinda-jāi ya taṇupaṇagam ॥ 1 ॥
 Aṅgoṅgāṇa tigam paḍhamam sanghayaṇaméya santhāṇam ।
 Subhavaṇṇāicaukkamagurulahū taha ya praghāyam ॥ 2 ॥

Ūsāsam ayāvam ujjoya vihagagaî vi ya pasatthā ।

Tasa-bāyara-pajjattam patteya thiram subham subhagam ॥ 3 ॥

Susvaramadsyam yaśo nirmāṇam tairthakaramevaitāh ।

Dvicatvāriṃśat prakritayah puṇyamiti Jinairbhaṇitāh ॥ 4 ॥]

The remaining 82 *prakṛitis* are recognized by them as *pāpa-prakṛitis*.

If someone raises a question at this point that how would *samyaktva* be called *pāpa-prakṛiti*? The answer would be this— [The virtuous *samyaktva* whose natural inclination is undoubtedly *śubha*, is not referred to in this case. The *puḍgalas* that are classed under *samyaktva*, though purged out of all perversions, are *a-s'ubha* because of the evil elements like doubt etc. being present in them. So, they come under the category of *pāpa*.

The purified *puḍgalas* do not very much obstruct the nature of *samyaktva*. But they are classed under *samyaktva* merely by means of *upacāra*, and really speaking they belong to the category of *mithyātva*.

(3) Both-*puṇya* and *pāpa*—should either have fruition or no fruition. Hence, some *Karmas* are recognized in their original form on account of their *vipakas*, while others have either scanty juice (*rasa*) or no juice at all, and hence have very little *vipāka*. So, *pāpa* and *puṇya* are recognized by virtue of their various regions of *pariṇāma*, and are distinguished from each other, on account of their mutually opposite qualities.

(4) The view that *puṇya* and *pāpa* exist in a combined state, is absolutely unfounded. Secondly, if *Karma* which acts as the cause of happiness and misery, was taken to exist in a composite state, all the living beings would undergo happiness as well as misery at the same time. But it does not happen so in reality. For, gods have almost everything of happiness and *nārakas* are always buried in absolute misery. It is clear, therefore, that the reasons of abundant happiness and abundant misery are different from each other. Thirdly, if there is one composite entity of *puṇya* and *pāpa*, the theory that increase of *puṇya* cause abundance of happiness or that abundance of happiness is produced by the absolute removal of *pāpa*, would become null and void. Because, that which does not increase with the increase in another, is different from another. *Yajñadatta* who does not grow fat with the growth of *Dēvadatta* is different from *Dēvadatta*. The uniform oneness of *puṇya* and *pāpa* is, therefore, not at all proper. If their oneness is believed on the assumption of *Karma* being common in both, there would be no difficulty.

But so far as an individual is concerned, know it for certain that *puṇya* and *pāpa* are separate from each other, as proved above, and hence *O Bhadra!* it is not worthy of you to raise any doubt about it. ॥ 398 ॥ (1946)

Referring to the commandments of *Vēdas*, the auothor states—

असइ बहि पुन्न-पावे जमग्गिहोत्ताइं सग्गकामस्स ।

तदसंबद्धं सर्वं दाणाहफलं च लोअग्मि ॥ ३९९ ॥ (१९४७)

Asai bahi punna-pāvē jamagghihottāim saggakāmassa ।

Tadasambaddham savvam dāṇāḥphalam ca lōammi ॥ 399 ॥ (1947)

[असतोर्बहिः पुण्य-पापयोरग्निहोत्रादि स्वर्गकामस्त ।

तदसंबद्धं सर्वं दानादिफलं च लोके ॥ ३९९ ॥ (१९४७)

Astorbahih puṇya-pāpayoragnihotrādi svargakāmasya ।

Tadasambaddham sarvam dānādiphalam ca loké ॥ 399 ॥ (1947)]

Trans.—399 In (case of) *puṇya* and *pāpa* being absent, the commandment of the performance of the sacrifice etc. (prescribed) for one who aspires for Salvation, would become useless. Moreover, all sorts of fruition (of the good turn) like munificence etc, (welknown) in the world would also become null and void. (1947)

टीका—पुण्य-पापयोरसत्त्वे यदेतद् बहिरग्निहोत्राद्यनुष्ठानं स्वर्गकामस्य, यच्च दान-हिंसादिफलं पुण्य-पापात्मकं लोके प्रसिद्धं, तत् सर्वमसंबद्धं स्यात्. स्वर्गस्यापि पुण्यफलत्वात्, पुण्य-पापयोश्च भवदभिप्रायेणासत्त्वात्. तस्माद्-भ्युपगन्तव्ये एव पुण्य-पापे । तदेवं वेदवचनप्रामाण्यात्, युक्तितश्च छिन्नस्तस्य संशय इति ॥ ३९९ ॥ (१९४७)

D. C.—If there were no *puṇya*-*vāpa* in this world, the commandment of the *Vēdas* that one who aspires for Salvation should perform *agnihotra* etc, would be of no value. Moreover, the results of actions like *dāna* and *himsā* in the forms of *puṇya* and *pāpa* respectively, which are welknown in this world, would all be futile. Hence, take it for granted that *puṇya* and *pāpa* are existing, and leave off your doubts. ॥399॥ (1947)

The *Tīrthaṅkara*, then, said—

Trans.—403 What are you thinking about ? You entertain the doubt as to whether the next world exists or not. But (*ca*) you have not understood the real meaning of the sentences of the *Vēdas*. Here is their (real) intérpretation! (1951)

टीका—आयुष्मन् मेतार्य ! त्वमेवं मन्यसे—किं भवान्तरगमनलक्षणः परलोकोऽस्ति, नास्ति वा ? इति । अयं च संशयस्तव विरुद्धवेदपदश्रुति-निबन्धनो वर्तते । तानि च “ विज्ञानघन एवैतेभ्यो भूतेभ्यः ” इत्यादीनि प्रथमगणधरोक्तानि द्रष्टव्यानि । “ तेषां चार्थं न जानासि ” इत्यादि तथैवेति ॥ ४०३ ॥ (१९५१)

D. C.—O long-lived *Mētārya* ! your doubt about the existence of *para-loka* has arisen from your hearing various *Vēda-padas* bearing contradictory senses.

These *Vede-padas* are “ *Vijñānaghana evaitēbhyo bhūtēbhyo* ”

etc. which have already been discussed in the First *Gaṇadhara-vāda* ॥ 403 ॥ (1951)

The author now states the arguments advanced by the student as follows—

मन्सि जह् चेषणं मज्जंगमउ व्व भूयधम्मो त्ति ।

तो नत्थि परलोगो तन्नासे जेण तन्नासो ॥ ४०४ ॥ (१९५२)

Tato nāsti paralokastannāśé yēna tannāśah ॥ 404 ॥ (1952)]

Trans.—404 If you believe consciousness to be the property of *bhūtas*, just as intoxication is that of the constituents of wine, the destruction of consciousness being consequent at the destruction of the *bhūtas*, the other world will not exist. (1952)

टीका—सौम्य ! त्वमेवं मन्यसे—यदि तावच्चैतन्यं पृथिव्यादिभूतधर्मः—
भूतेभ्योऽनर्थान्तरभूतमित्यर्थः, यथा गुड-धातक्यादिमद्याङ्गेभ्योऽनर्थान्तरं
मदधर्मः, तर्हि नास्त्यवान्तरगमनलक्षणः परलोकः, येन तन्नाशे भूतनाशे
तस्यापि चैतन्यस्य नाशो ध्वंसो जायते । यो हि यदनर्थान्तरभूतो धर्मः स
तद्विनाशे नश्यत्येव यथा पटादिधर्मः शुक्लत्वादिः । ततो भूतैरेव सह प्रागेव
नष्टस्य चैतन्यस्य कुतो भवान्तरगमनम् ? इति ॥ ४०४ ॥ (१९५२)

D. C.—When you take *caitanya* as the property of a *bhūtas* like *prithvāi*, it will not be separate from *bhūtas*, just as the constituents of wine such as jaggery and *dhātaki puṣpa* etc are not different from their property of intoxication. Consequently, when *bhūtas* meet destruction, their property *viz caitanya* will also meet destruction, just as whiteness of cloth

disappears with the cloth So, when *caitanya* vanishes with the *bhūtas*, how is it to go to the other world ? ॥404॥ (1952)

Even by taking *caitanya* as different from *bhūtas*, the existence of *para-loka* will not be established—

अहं वि तदत्थंतरया न यं निच्चत्तणमओ वि तदवत्थं ।

अनलस्स वाऽरणीओ भिन्नस्स विणासधम्मस्स ॥ ४०५ ॥ (१९५३)

Athāpi tadarthāntaratā na ca nityatvamato'pi tadavastham ।

Analasyēvā'raṇito bhinnasya viṇāśadharmaṇah ॥ 405 ॥ (1953)]

Trans.—405 And even if it is different, its perpetuality is (not (established). Hence, like fire, which is transitory and which is different from *araṇi*, it is transitory (1953)

टीका—अथापि तदर्थान्तरता भूतेभ्योऽर्थान्तरता चैतन्यस्याभ्युपगम्यते, नन्वतोऽपि तदवस्थं भवान्तरगामित्याभावलक्षणं दूषणम्; च शब्दो यस्मादर्थे, यतोऽर्थान्तरभूतस्यापि चैतन्यस्य न नित्यत्वम् । कथंभूतस्योत्पत्तिमत्त्वेन विनाशधर्मकस्य । कस्य यथाऽनित्यत्वम् ? इत्याह—अनलस्य । कथंभूतस्य ? भिन्नस्य । कस्य ? । अरणीतोऽरणैः । इदमुक्तं भवति—भूतेभ्योऽर्थान्तरत्वेऽप्यनित्यं चैतन्यम्, उत्पत्तिधर्मकत्वात्, अरणिकाष्टोत्पन्नतद्भिन्नानलवदिति, यच्चानित्यं तत् किमपि कालं स्थित्वाऽनलवदत्रापि ध्वंसते, इति न तस्य भवान्तरयायित्वम्, अत इत्थमपि न परलोकसिद्धिरिति ।

अथ प्रतिपिण्डं भिन्नानि भूतधर्मरूपाणि बहूनि चैतन्यानि नेष्यन्ते, किन्त्वेक एव समस्तचैतन्याश्रयः सर्वत्रिभुवनगतो निष्क्रियश्चात्माऽभ्युपगम्यते; यत उक्तम्—

“ एक एव हि भूतात्मा भूते भूते व्यवस्थितः ।
 एकधा बहुधा चैव दृश्यते जलचन्द्रवत् ॥ १ ॥ ”

॥ ४०५ ॥ (१९५३)

D. C.—Even if *caitanya* were taken to be different from *bhūtās* it would not be able to go the other world For, like fire, which is different from *araṇi*, *caitanya* is *a-nitya*, as it dies away after living for sometime.

The existence of *para-loka* is not established from this point of view also.

Some might not admit the existence of plenty of *caitanayas* related to each and every *bhūta*, and might admit the existence of one all-pervading *uṣkriya* soul as said below—

Ekā éva hi bhūtātmā bhūté bhūte vyavasthithā ।
 Ekadhā bahudhā caiva drīśyaté jalacandravat ॥

[There exists only one soul pervading each and every *bhūta*. Like moon (reflected in) water, it appears as one and at the same time, in many forms.] ॥ 405 ॥ (1953)

But even in such a case, there is no scope for *parā-loka*,

अह एगो सब्बगओ निक्किरिओ तहवि नत्थि परलोओ ।
 संसरणाभावाओ वोमस्स व सब्बपिण्डेसु ॥ ४०६ ॥ (१९५४)

Aha ego savvagao nikkirio tahavi natthi paraloo ।
 Samsaraṇābhāvād vyomna iva sarvapinḍésu ॥406॥ (1954)

[अथैकः सर्वगतो निष्क्रियस्तथापि नास्ति परलोकः ।

संसरणाभावाद् व्योम्न इव सर्वपिण्डेषु ॥ ४०६ ॥ (१९५४)

Trans.—406 If there exists one, all-pervading, inactive (soul), then also, there would be nothing like *pāra-loka* because

of the lack of movement (on its part) to all beings (in spite of its being all-pervading) like *ākāśa*. (1954)

टीका-अथैकः सर्वगतो निष्क्रियश्चात्माऽभ्युपगम्यते, ननु तथापि न परलोकगमनसिद्धिः, तस्यात्मनः सर्वेषु गो-मनुष्यादिपिण्डेषु सर्वगतत्वेन निष्क्रियत्वेन च संसर्गाभावात्, व्योमवदिति ॥ ४०६ ॥ (१९५४)

D. C.—Even when the existence of one, all-pervading, inactive soul is accepted, the existence of *para-loka* will not be established. For, like *ākāśa*, it is *niṣkriya* in spite of its being spread over all living beings. ॥ 406 ॥ (1954)

The existence of *para-loka* can be doubted in this manner also—

इहलोगाओ व परो सुराइलोगो न सो वि पच्चक्खो ।
एवं पि न परलोगो सुच्चइ य सुईसु तो संका ॥ ४०७ ॥ (१९५५)

Ihalogao va paro surāilogo na so vi pacckkho ।
Evam pi na paralogo suvvai ya suisu to saṅkā ॥ 407 ॥ (1955)

[इहलोकाद् वा परः सुरादिलोको न सोऽपि प्रत्यक्षः ।
एवमपि न परलोकः श्रूयते च श्रुतिषु ततः शङ्का ॥ ४०७ ॥ (१९५५)

Ihalokād vā parah surādiloko na so'pi pratyakṣah ।
Evamapi na paralokh śrūyatè ca śrutiṣu tatah śaṅkā ॥407॥(1955)]

Trans.—407 Or, if there is a world like that of gods etc. other than this world, that is also not directly perceived. So, *para-loka* does not exist even in that way. On the other hand, it has been heard (about *para-loka* in the *śāstras*. Consequently, the doubt (about *para-loka*) has arisen. (1955)

टीका-अथवा, इहलोकापेक्षया सुर-नारकादिभवः परलोक उच्यते. स च न प्रत्यक्षो दृश्यते, अत एवमपि न परलोकः सिध्यति, श्रूयते चासौ श्रुतिषु शास्त्रेषु, ततस्तच्छङ्का किमस्ति नास्ति वा ? । इति दर्शितः पूर्वपक्षः ॥ ४०७ ॥ (१९५५)

D. C.—If the existence of some world like that of divine beings or hellish beings, is accepted, since they, too, are not *pratyakṣa*, their existence is also not acceptable

On the other hand, the *Śāstras* refer to them and tell a lot of things about them. Your doubt about the existence of *para-loka* is based upon such mutually contradictory facts.
॥ 407 ॥ (1955)

Here ends the *pūrva pakṣa*. The author, now, refutes the arguments of *pūrva pakṣa* one after another--

भूइंदियाइरित्सस्स चेयणा सो य दव्वओ निच्चो ।

टीका—इह भूतेन्द्रियातिरिक्तस्य पूर्वाभिहितानुमानादिप्रमाणसिद्धस्यात्मन एव संबन्धिनी चेतना मन्तव्या, न भूतधर्मः । स चात्मा जातिस्मरणादिहेतुर्द्रव्यतो नित्य इति वायुभूतिरिव प्रतिपद्यस्व । अतो नैकान्तानित्यत्वपक्षोक्तो दोषः, पर्यायत एवाऽस्यानित्यत्वादिति भावः ॥४०८॥ (१९५६)

indriyas, and the existence of which has already been established been means of *anumānas* and other evidences. This soul has already been accepted by *Vāyubhūti*† as more *nitya* than *dravya* on account of its power of remembering its (previous) existence etc. You too, shall have to accept its *nityatva*, so that the fault of exclusive *nityatva* alleged by you, does not arise. ॥ 408 ॥ (1956)

Thirdly, because it is the enjoyer like *Dēvadatta*, it is not *niṣkriya*. Thus, like *Indrabhūti*, † you, too, shall have to admit ॥409॥ (1957)

In reply to the argument that the existence of *para-loka* is denied because of the divine and hellish beings being *a-pratyakṣa*, the author states—

*D. C—Métārya:—*You believe *jīva* to be *vijñānamaya*. Now, since *vijñāna* is *a-nitya*, *jīva* will also be *a-nitya*. Consequently, there will be no possibility of going to the other world and there will be no *para-loka* also. On the other hand, if you take *jīva* to be different from *vijñāna*, *jīva* will not be *a-nitya*, but being different from *vijñāna*, it will be ignorant, or dull like sky or wood. Consequently, the soul will neither be *kartā* (doer), nor *bhoktā* (enjoyer). In absence of *kartṛitva*, existence of *para loka* will be denied. For, if *para-loka* is taken as existing even in absence of *kartṛitva* the *Siddha* beings that have already attained absolute Liberation will attain *para-loka*. In absence of *bhokṛitva* also, there will be no *para-loka*, because the soul which is *nitya* but not *bhoktā*, will not be able to attain *para-loka* in absence of *Karma*, which acts as the cause of passing to the other world. This *jīva*, therefore, being distinguished from *jīvana* does not belong to the mundane world, as it has no passage to the other world on account of its ignorance like that of wood, and *a-mūrtatva* like that of *ākāśa*, ॥ 411 412 ॥ (1959-1960)

D. C.—Since *cattanya* is susceptible to production, and exists in various forms due to various specific characteristics, you have accepted it to be *a-nitya*. That which exists in various forms due to various *paryāyas*, is *a-nitya* like *paryāyas* as in the case of old and new *paryāyas* of pillar etc Thus, the Soul which is *a-bhinna* from the *a-nitya cattanya*, is taken as *a-nitya* by you, who have denied the existence of *paṭa-loka*. But that is not correct. *Cattanya-vijñāna* is not exclusively *a-nitya*, but any how, it is *nitya* to a certain extent also.

Every object is susceptible to three conditions—production, destruction and perpetuality. So just as *a-nityatā* is established by you on account of *utpatti*, *nityatā* could also be established by means of the condition of perpetuality. It could easily be stated, therefore, that *vijñāna* is *nitya* like *ghaṭa*, and on

account of the *nityatva* of *jīva*, there is no *a bhāva* of *para-loka*.

D. C.—Properties like the shape and capacity of the lump of earth vanish and at the same time, *ghaṭa*-having its peculiar shape and its capacity of holding water—is produced. The lump of earth is neither produced nor destroyed in the form of *rūpa-rasa-gandha-spars'a* or *dravya*. It continues to exist perpetually in these forms. Thus, the lump of earth vanishes in the form of the shape and capacity of *ghaṭa*, and exists for ever in the form of *rūpa, rasa, gandha, spars'a* and *dravya*. Similarly, *ghaṭa* also vanishes in the form of its former *pariyāyas*, and comes into existence with new *pariyāyas* of *ghaṭākāra*, and lasts for ever in the form of *pariyāyas* of *rūpa* etc. as well as *dravya*. Consequently, it has also the *svabhāva* of *utpatti, vyaya, and dhrauvya*. Such is not the case with *ghaṭa* only, but it is the nature of each and every object of the Universe. So, like destructibility, in-destructibility of *ghaṭa* is also due to the *hētus* like *utpattimattva* etc. Consequently in case of *caitanya* and *ātmā* also, the *nityatā* should be admitted ॥ 416-417 ॥ (1964-1965)

Trans.—418-419 Destruction of the cognizance of *ghaṭa* production of the cognizance of *paṭa*, and retention of their continuous range, are (apprehended all at a time. The same is the case with this world, the other world, and the *jīva*. Vanishing of this human world, and coming into existence of the world like that of divine beings, are simultaneous. Retention in (the state of) *jīva* is neither this world nor the other world. (1966-1967)

(१९६६-१९६७)

1). C.—Cognizance about *ghaṭa* is called *ghaṭa cétanā*, and that about *paṭa* is called *paṭa-cétanā*. When *jīva* acquires the cognizance of *paṭa* after that of *ghaṭa*, vanishing of *ghaṭa*, production in the form of *paṭa*, and retention in the form of eternal *jīva*, are simultaneous

Utpāda, *vyaya* and *dhrauvya* are therefore, the three generic characteristics of *jīva*, as well as, of those who have passed to the other world.

When a person is born in *dēsa-loka* after death, he undergoes the state of destruction as regards this world, production as regards *dēva-loka*, and permanent *avasthāna* as regards *jīva*. When a person is said to exist in the state of *jīvatva*, it is neither said to exist in this world nor in the other world like that of gods etc. *Jīva* is called mere *dravya* without any sort of *paryāya*. Thus, since *jīva* has the tendency of undergoing *utpāda*, *vyaya* and *dhrauvya*, there is no *abhāvā* of the other world. ॥ 418-419 ॥ (1966-1967)

In reply to the question whether all objects possess all the three characteristics, the author states—

For fear of obstruction to the mutual usage, exclusive destruction (of everything) is not acceptable. (1968-3969)

D. C.—An object which is absolutely *a-vidyamāna* can never undergo production. For, if the production of an *a-vidyamāna* object is admitted, non-existent objects like *khara-viṣāpa* will also come into existence, which is utterly impossible. It is only a *vidyamāna* object that undergoes production. Secondly, there is no exclusive destruction of a *vidyamāna* object. If there were absolute destruction of everything, even *nārakî* and *tiryāna* beings would be absolutely destroyed. *Jīva* etc. which are always *avasthita*, undergo *vinās'a* by means of characteristics such as that of *manuṣyatva* etc. On the other hand, they undergo production by means of characteristics like that of divine beings etc. But exclusive destruction of all, is never possible for fear of the violation of usual *vyavahāra*. Take an example to understand it more clearly :—Having broked a golden jar belonging to a princess, a ball was made of gold for a prince. On account of that, sorrow on the part of the princess, joy on the part of the prince, and gold being retained in the same quantity in the form of ball as well as jar, indifference on the part of king who is the owner of gold, constitute *loka-vyavahāra*, If we do not accept *utpāda*, *vyaya* and *dhrāvya* in case of all objects, violation of this *loka-vyavahāra* will undoubtedly take place In case of *jīva* being *avasthita* there is no *para-lokābhāva*. ॥ 420-421 ॥ (1968-1969)

D. C.—O long-lived *Prabhāsa*! Your doubt about the existence of *mokṣa* is based upon your hearing various *Vēda-padas* of contradictory senses. These *Vēda-padas* are as follows—

(1) “*Jarā-maryam vaitat sarvam yadagnihotram.*”

(2) “*Saiṣā guhā duravagāhā*”

(3) “*Dvē Brahmaṇi paramaṣaram ca, tatra param satyam jñānamantaram brahma*” etc.

These *Vēda-padas* are interpreted by you as follows:—

(1) *Agnihotra* should be practised as long as life persists.

The performance of *agnihotara* constitutes the sacrifice of animals which would turn it *Śubha* or *a-śubha*. But that would award the attainment of *svarga* alone, and not *mokṣa*. Since by this commandment, performance of *agnihotra* is advised to be practised throughout life, there would be no other period of time during which some other performance for the attainment of *mokṣa* could be advised. In absence of *sādhana*, therefore, the *sādhyā* (*viz mokṣa*) does not exist. In this way, this sentence proves the *abhāva* of *mokṣa*

The other two *padas* try to establish the existence of *mokṣa* in this way—

(2) The cave of *mokṣa* is difficult to be entered by the *samsāris*.

(3) There are two types of *Brahama*:—

1 The *Parama Brahma* or principal *Brahma* is *moṣka* and *a-parama* or subordinate *Brahama* is *jñāna*.

Your doubt has sprung up from these *Vēda padas* which bear contradictory senses. But you have not grasped their real interpretation. Here, I give their correct interpretation Please listen carefully. ॥ 426 ॥ (1974)

Bhagavāna now states the opponent's view and refutes it,

मन्नसि किं दीवस्स व नासो निव्वाणमस्स जीवस्स ? ।

Trans.—427 Do you think the *nirvāṇa* (extinction of life) to be similar to the extinction of lamp ? Or, would the positive existence of soul in the form of diminution of miseries etc. be its extinction ?

टीका—आयुप्पान् ! प्रमास ! त्वमेकं मन्यसे—किं दीपस्येवास्य जीवस्य नाशो ध्वंस एव निर्वाणम् ? यथाऽऽहुः सौगतविशेषाः केचित्, तद्यथा—

इति । ४२७ ॥ (१९७५)

D. C.— Like the *Buddhists*, do you believe *mokṣa* to be nothing but the extinction of *jīva*, like that of a lamp ? For the *Buddhists*, assert that:—

“Dīpo yathā nirvṛitimabhyupéto naivāvanim gacchati nāntarissam ।
Diśam na kāncid vidiśam na kāncit snéhakṣayāt kevalaméti śāntim ॥ 1 ॥

Jīvastathā nirvṛitimabhyupéto naivāvanim gacchati nāntarīkṣam ।
Diśam na kāncid vidiśim na kāncit klésakṣayāt kevalaméti śāntim ॥2॥

Or, do you accept *mokṣa*, like *Jainas* who believe the state of *nirvāṇa* (final emancipation) as a peculiar state of the existent *jīva* constituting the removal of *rāga*, *dvēṣa*, *mada*, *moha*, *janma*, *jarā*, *roga*, and *duḥkha* etc ?

It has been laid down by them, that—

‘Kévalasaṃvid-darśanarūpāḥ sarvārtiduhkha-parimuktāḥ ।
Modanté muktigatā jīvāḥ kṣīṇāntarāriganāḥ ’ ॥1॥ 427 (1975)]

Athavā'nāditvataḥ khasyēva kim karma-jīvayogasya ।

Aviyogād na bhavēt saṃsārābhāva évétī ? ॥ 428 ॥ (1976)]

Trans.—428 Or, is it because *Karma* and *jīva* (which are) united together eternally, do not undergo separation like *ākāśa*, that there is absence of mundane world ? (1976)

टीका—अथवा, त्वमेवं नन्यसे-नूनं संसाराभाव एव न भवेत् ।
कुतः ? । अवियोगात्-वियोगायोगात् कस्य ? । कर्म-जीवयोः संयोगस्य ।
कुतः ? । अनादित्वात्ः स्वस्येव । इह ययोरनादिःसंयोगस्तयोर्वियोगो

वियोगानुपपत्तिः, ततश्च न संसाराभाव ; तथा च सति कुतो मोक्षः ? इति
॥ ४२८ ॥ (१९७६)

D, C.—There is another ground also, upon which your doubt is based. Objects that are united with each other from time immemorial, could never undergo separation. Just as *jīva* and *ākāśa* are never separable from each other on account of their *anādi samyoga*, *jīva* and *karma* will also never undergo separation on account of their *anādi samyoga*. When *Karma* is not separated, *saṃsāra* will also never be separable. On account of the absence of separation from *saṃsāra*, the absence of *mokṣa* will also be established. ॥ 428 ॥ (1976)

But,

Tvamanāderapi kāncana-dhātvoriva jñāna-kriyābhām ॥429॥ (1977)]

Trans.—429 In this case, you (shall have to) admit the separation of *Karma* and *jīva*, in spite of their eternal union on account of cognizance and action, as in the case of gold and metal. (1977)

टीका—“ अणाइणो वि त्ति ” अनादेरपि जीव-कर्मसंयोगस्य ‘ तं ’ इति त्वं प्रतिपद्यस्व वियोगम्. बन्ध-मोक्षवादे मण्डिकवत् । कयोरिव यो वियोगः ? । काञ्चन-धातुपाषाणयोरिव । किं निर्हेतुक एव जीव-कर्मणो-वियोगः ? । न, इत्याह-ज्ञान-क्रियाभ्याम् । इदमुक्तं भवति-नायमेकान्तो यदनादिसंयोगो न भिद्यते, यतः काञ्चन धातुपाषाणयोरनादिरपि संयोगोऽन्यादिसंपर्केण विघटत एव, तद्वज्जीव-कर्मसंयोगस्यापि सम्यग्ज्ञान-क्रियाभ्यां वियोगं मण्डिकवत् त्वमपीह प्रतिपद्यस्विति ॥ ४२९ ॥ (१९७७)

D. C.—Even the strongest affinity between gold and metal is broken by the help of heating etc. The same is the case with that between *Karma* and *jīva* also. Separation of *Karma* and *jīva* is accomplished by means of *jñāna* and *kriyā* in spite of their eternal union. It is not true, therefore, to say that the separation of objects joined together by *anādi samyoga*, is not possible. Like *Maṇḍika* you, too, shall have to admit that *Karma* and *jīva* are separable from each other in spite of their eternal union. ॥ 429 ॥ (1977)

(१९७८)

D. C.—Since *saṃsāra* consists of *nāraka*, *tiryanka*, human and divine beings, *jīva* cannot exist as different from any one of them. So, when *saṃsāra* of *nārakas* and others, vanishes, *jīva* will also vanish as it is contained in *saṃsāra*. Thus, when *jīva* vanishes, who would attain *mokṣa*? ॥430॥ (1978)

This belief is refuted in this way—

Trans.— 431-432 Like gold, at the destruction of a ring, the substance of *jīva* is not believed to vanish entirely at the destruction of *nārakas* and other. *Saṃsāra* is based on *Karma*. Hence, its destruction with *Karma* is justified. (But) *jīvatva* is not based on *Karma*. Hence, how could it vanish with *Karma* ? (1979-1980)

टीका—नारक—तिर्यगादिरूपेण यो भावः स जीवस्य पर्याय एव । न च पर्यायमात्रनाशे पर्यायिणो जीवद्रव्यस्यापि सर्वथा नाशो मतः, कथञ्चित्तु भवत्यपि । न हि मुद्रापर्यायमात्रनाशे हेमनः सुवर्णस्य सर्वथा नाशो दृष्टः । ततो नारकादिसंसारपर्यायनिवृत्तौ मुक्तिपर्यायान्तरोत्पत्तिर्जीवस्य मुद्रापर्याय-निवृत्तौ कर्णपूरपर्यायान्तरोत्पत्तिरिव सुवर्णस्य, न किञ्चिद् विरुद्ध्यत इति । ननु यथा कर्मणो नाशे संसारो नश्यति तथा तन्नाशे जीवत्वस्यापि नाशाद् मोक्षाभावो भविष्यति । एतदप्यसारम् । कुतः ? इत्याह—“कम्मकओ इत्यादि” कर्मकृतः कर्मजनितः संसारः, ततस्तन्नाशे कर्मनाशे तस्य संसारस्य नाशो युज्यत एव; कारणाभावे कार्याभावस्य सुप्रतीतत्वात् । जीवत्वं पुनरनादि कालप्रवृत्तत्वात् कर्मकृतं न भवति, अतस्तन्नाशे कर्मनाशे तस्य जीवस्य को नाशः ?—न कश्चित्; कारण—व्यापकयोरेव कार्य—व्याप्यनिवर्तकत्वात्; कर्म तु जीवस्य न कारणं नापि व्यापकमिति भावः ॥ ४३१-४३२ ॥ (१९७९-१९८०)

D. C.—Existence of *jīva* as *nārakas* or *tiryancas* is merely one of the forms of *jīva* So, when these *parjāyas* of *jīva* vanish, the substance of *jīvā* or *jīvatva* does not vanish entirely but only partially, just as gold as a *dravya*, does not

entirely vanish when ring etc. are destroyed. When the *nāraka paryāyas* of *saṃsāra* are destroyed, *jīva* vanishes as a *saṃsārī* and comes into existence as the *paryāya* of *mokṣa* e. g. in case of gold, when one *paryāya*, say a ring, is destroyed, another *paryāya*, say an ear-ring, is produced.

Prabhāsa: But like *saṃsāra*, *jīva* will also have to vanish with *Karma*, and hence, there will be nothing like *mokṣa*.

Bhagavāna:—It is not so, *saṃsāra* is generated by means of *Karma*, and hence it would vanish with *Karma*. But, *jīvatva* being at work from times immemorial, cannot be called *Karma-janya*. So, *jīva* will not vanish with *Karma*, since *Karma* is neither the cause of *jīvatva*, nor is it invariably concomitant with *jīvatva*. ॥ 431-432 ॥ (1979-1980)

D. C.—Like *ākāśa dravya*, *jīva dravya* of a free soul is also *nitya*, because it is *a-mūrta* as a *dravya*.

Prabhāsa :—As you proved *nityatva* (in case) of *muktātmā* by the help of the example of sky, the example will lead to prove other characteristics of sky, in *muktātmā*, say for example like sky, *muktātmā* is all pervading due to its *a-mūrta*tva. Similarly, it can also be said that *jīva dravya* has neither *bandha* nor *mokṣa* just as *ākāśa dravya* has none due to *a-mūrta*tva.

Bhagavāna:—It is not proper to establish other characteristics such as *vibhutā* etc in *muktātmā* by the help of the example of sky. Because, there is another inference opposite

to it, which contradicts the existence of those characteristics. Say, for example, *jīva* is pervading only upto the skin of body like the sense of touch, because the *jīvatva* is found only in body.

This *anumāna* refutes the all-pervading nature of *jīva*. Similarly, the *anumānas* that *jīvas* are formed by means of *puṇya* and *pāpa*, and that the combination of *jīva* and *Karma* could, any how, be brought about like the combination of gold and stone, refute the assertion that *jīva* has neither *bandha* nor *mokṣa* due to the *a-mūrtatva* of its *dravya* like *ākāśa*.

Bhagavāna:—The *vikāra* of the light extinguished *via* darkness—is not directly perceptible, because its *pariṇāma* is very subtle in form. Changes in a black cloud at the time of dissolution of a cloud, are not perceived because of their very

subtle *pariṇāma*, and the pollen of a collyrium also blown away by wind, is not directly perceived, because it is very minute. But in no way, it means that it does not exist. So, the *vikāra* of darkness in case of light is also non apprehensible, not because it is non-existent but because its *pariṇāma* is *sūkṣma*. ॥ 440 ॥ (1988)

D. C.—The manifold nature of *pudgala-pariṇāmas* is explained by means of the following example. Substances such as a sheet of gold, salt, ginger, *haritaki* (yellow myrobalans), *citrakavala*, jaggery etc—are first apprehended by sense-organs like eye etc, and then they undergo apprehension by means of other sense-organs such as that of touch, taste etc, when accompanied by different substances, surrounding and times etc. A sheet of gold is first apprehended by eyes, but when passed through fire and mixed with ashes for purification, it is apprehended by the sense of touch as well. Afterwards when it is separated from it, again it becomes apprehensible by eyes. The same is the case with objects like salt, ginger, green vegetables, jaggery etc. They are also *caṅsurgrāhya* at the first instance, but when mixed with ashes or or other groups of medicines or when turned into liquid, powder or paste, they are perceived by the sense of touch. *Pudgalas* like camphor and musk although perceptible by eyes at first. undergo perception by the sense of smell, when carried by wind to a long distance.

On the other hand, some *pudgalas* when carried to a distance longer than nine yojans† do not undergo perception by means of any sense-organ on account of their subtle change. In all these cases, variegated nature of the changes of *pudgalas*, is the main cause. ॥ 441 ॥ (1989)

D. C.—*Muktātmā* enjoys a perfect but natural happiness. When there is no *āvaraṇa*, it attains high cognizance and when there is absolute *abhāva* of *Karma*, which is nothing but a cause of un-happiness, it is free from all sorts of miseries. So, like a sage, *muktātmū* enjoys the delight of high cognizance. It enjoys perfect happiness as it is free from the miseries of birth, old age, disease, death, separation from the beloved, absence of love, sorrow, hunger, thirst, cold, heat, desire, anger, pride, passion, hatred, anguish, wickedness, and eagerness etc. Like the Sun, the free soul shines by its own lustre

It has, therefore, been said that—

Sthitah śitāṅśuvajjivah prakṛityā bhāvaśuddhaya ।

D. C.—Prabhāsa:—When a *muktātmā* is free from sense-
 organs, it will be called ignorant like *ākāśa*.

Bhagavāna:—It is not so. The argument advanced by you,
 proves even a contrary *parayāya* of soul. It will prove *muktātmā*
 to be lifeless in absense of *indriyas*.

Prabhāsa:—Well, what is wrong if *muktātmā* is taken as
 lifeless ? ॥ 445 ॥ (1993)

Bhagavāna replies—

Trans.—446 By virtue of its natural genesis like *dravyatva* and *a-mūrtatva* it is far the most fallacious. Like life to sky its transgression to other genesis, is not proper. (1994)

D. C. Bhagavāna:—Your statement is absolutely fallacious. Just as *dravyatva* and *a-mūrtatva* are the innate characteristics of a soul, and just as that genesis of *jīva* never exists in any condition in a genesis having contrary characteristics like *a-dravyatva* and *a-mūrtatva*, *jīvatva* is also the innate and natural characteristic of *jīva*, and that genesis of *jīva* never exists in a genesis having opposite characteristics. Consequently, in the state of *muktātmā*, *jīva* does never become *a-jīva*

Just as a free soul never attains the condition of *a-dravyatva* and *mūrtatva*, it never reaches a life-less state leaving aside its own innate living characteristics. For, if it leaves its own *svabhāva*, the sky and molecules will also leave their innate characteristics and accept the unnatural tendency.

Prabhāsa:—If it is so, how do you explain your statement that *muktātmā* is *a-jīva* like *ākāśa*, on account of the *abhāva* of sense-organs.

Bhagavāna:—The statement was made by me only to refute the opponent's view. In doing so, the reason has already been explained, but this argument does not lead to prove *muktātmā* to be lifeless, as there is no *pratibandha* for it. For, if *jīvatva* is established by the existence of *indriyas*, it goes without saying that in absence of sense-organs, *jīva* will also be absent, as in the cases of fire and smoke, and *Aśoka* and *vṛkṣatva*. But it does not happen actually. The sense-organs

are connected with body by the relation of part and whole, but they are not connected with *jīva* because of its *a-mūrtatva*. It is not correct, therefore, to say that with the *abhāva* of *indriyas*, there is *abhāva* of *jīvatva* in *muktātmā*.

Prabhāsa:--But, even in that case, how will you answer my contention that *muktātmā* is ignorant like sky in absence of sense-organs.

The reply is—

Trans.---447-448 On account of their (qualities like) *mūrtatva* etc like *ghaṭa*, sense-organs do not attain apprehension, but they are mere mediums of apprehension. Their

(real) agent of apprehension is *jīva*. Because of (its power of recollection) even when they cease to work and for want of apprehension even when they are working, the soul is distinguished from sense-organs like an observer from the five windows. (1995-1996)

टीका-अनयोर्व्याख्या पूर्ववत् । केवलं प्रस्तुते भावार्थ उच्यते- यदीन्द्रियाण्युपलब्धिमन्ति भवेयुस्तदा तन्निवृत्तावप्युपलब्धिनिवृत्तिर्भवेत्, न चैतदस्ति, अन्वय-व्यतिरेकाभ्यां जीवस्योपलब्धिमत्त्वनिश्चयादिति ॥ ४४७-४४८ ॥ (१९९५-१९९६) ॥

D. C.—If the *indriyas* were the real agents of apprehension, there would have been no perception when they ceased to work. But it does not happen so. On the other hand, when they worked, perception should positively take place, but due to the absent-mindedness of the observer it does not happen so. The power of *jīva* is thus established from the positive, as well as, negative point of view. ॥447-448॥ (1995-1996)

Indicating that *jñāna* would not vanish with *indriyas*, but it is the very innate nature of *jīva*, the author states--

नाणरहिओ न जीवो सरूवओऽणु व्व मुत्तिभावेणं ।

जं तेण विरुद्धमिदं अत्थि य सो नाणरहिओ य ॥ ४४९ ॥ (१९९७)

Trms.--449 Like an atom, *jīva* as such is not void of cognizance, because of its corporeal nature. Hence, the statement that it is void of cognizance is incorrect. (1997)

टीका—यद् यस्माज्ज्ञानरहितो जीव कदाचिदपि न भवति. ज्ञानस्य तत्स्वरूपत्वात्. यथा मूर्तिमात्रेण रहितोऽणुर्न भवति, तेन तस्माद् कारणाद् विरुद्धमेतत्—“अस्ति चासौ भुक्तो जीवः, अथ च स ज्ञानरहितः” इति । न हि स्वरूपस्याभावे स्वरूपवतोऽवस्थानं युज्यते, तद्व्यतिरिक्तस्य तस्यासत्त्वात्. तथा चानन्तरमेवोक्तम्—“न हि जत्रंतरगमणं जुत्तं मसो व्व जीवत्तं” इति ॥ ४४९ ॥ (१९९७) ॥

D. C.—Just as an atom cannot exist without a finite form, *jīva* could also never exist without cognizance, as cognizance is the very nature of *jīva*. Since a corporeal body cannot exist without a finite form, your statement that *muklātāmā* is void of *jñāna*, is absolutely incorrect. ॥ 449 ॥ (1997)

*D. C.—Prabhāsa:—*With what authority can you say that
jīva is *jñānasvarūpa* ?

Bhagavāna:— That *jīva* exists as cognizance in its own
body is seen by means of direct apprehension. Even when
sense-organs cease to work, the object perceived by sense-
organs, is recollected, while sometimes the object is not
apprehended even when the sense-organs are working, because
of absent-mindedness—sometimes perception crops up in the
mind due to the relaxation of their destruction at the time of
explantion.

In case of another's body also, *jīva* is known to be
jñānasvarūpa on account of its inclination (to the desirable
objects) and aversion (from the undesirable ones). ॥450॥(1998)]

D. C.—Muktātma possesses the power of complete cognizance, A soul having sense-organs is cognizant, but to more or less extent on account of its *āvaraṇas* being removed partially. Since all the *āvaraṇas* are removed in case of a *muktātma*, it is completely cognizant.

Just as Sun becomes completely resplendent with lustre when all the *āvaraṇas*, like clouds etc are removed the *muktātma* is also completely resplendent with the lustre of cognizance when all *āvaraṇas* of *māriyās* have been removed. ॥ 451 ॥ (1999)

Trans.—452-453 The soul is, thus lustrous. It shines only a little, like a lamp (shining) under a porous obstruction on account of its shining through holes. (But) like a person relieved from home or like a lamp shining without obstruction, the *muktātma* perceives completely, when all its interruptions have been removed. (2000-2001)

टीका--तदेवं सति सर्वदा प्रकाशमयः प्रकाशस्वभाव एव जावः, केवलं संसार्यवस्थायां छद्मस्थः किञ्चिन्मात्रमवभासयति क्षीणाऽक्षीणावरण-च्चिद्रैरिन्द्रियच्छिद्रैश्चावभासनात्, सच्छिद्रकुट-कुड्याद्यन्तरितप्रदीपवदिसि । मुक्तस्तु मुक्तावथायां प्राप्तो जीवः सबहुतरं विजानाति-यदस्ति तत् सर्व प्रकाशयतीत्यर्थः, सर्वपिधानविगमात्-सर्वावरणक्षयादित्यर्थः, अपनीतसम-स्तगृहः पुरुष इव, विगतसमस्तकुट-कुड्याद्यावरणप्रदीप इव वेति । यो हि सच्छिद्रावरणान्तरितः स्तोकं प्रकाशयति स निःशेषावरणापगमे सुबहुतं प्रकाशयति । न तु यस्य सर्वथा प्रकाशाभाव इति भावः । तस्मात् मुक्तस्य परं सोक्ख णाणा-ऽणावाहआ” इत्यादि स्थितम् ॥ ४५२-४५३ ॥ (२०००-२००१)

D. C.—*Jiva* is thus shown as lustrous with complete perception. In the mundane life, *jiva* is obstructed by various *āvaraṇas*, and hence it will be able to perceive through the holes of indriyas to a certain extent like a lamp shining through a porous wall.

But in the *mukta* state, the free soul illumines everything perfectly with its power of cognizance like a lamp shining

without any obstruction or like a man relieved of all household worries.

This proves, therefore, the assertion that a free soul enjoys perfect happiness by means of perfect perception, when all its obstructions have been removed. ॥ 452-453 ॥ (2000-2001)

Then doubting the existence of happiness to a free soul, the opponent argues--

D. C.—Bhagavāna:—Pleasure afforded by objects like garlands, sandal-wood, and woman etc. is in reality, nothing but misery in this world. This *sukha* has been distinguished from *duḥkha* (in the form) of passions generated from the eagerness to enjoy sexual pleasures with woman etc. Only ignorant people call it happiness.

But really speaking, such sorts of happiness are only temporarily pleasant like the scratching of herpes.

While, putting to the gallows, aching in the stomach, headache, and the fetters of imprisonment etc, are known as miseries.

Prabhāsa:—It is evidently contradictory to say that, *sukha* of the enjoyment with woman etc. and of the attainment of the sovereignty etc. are *duḥkha*.

Bhagavāna:—It is not contradictory to say so. It is perceived as *sukha* only to those who are disillusioned by ignorance. There will be establishment of *sukha* similar to the scratching of herpes or enjoying the forbidden food even in misery as they act as resistance against the distress of passions produced by eagerness to attain pleasure

So, it has been said--

D. C.—Since *viṣaya sukha* is, after all, a resistance against *duḥkha*, it is nothing but *duḥkha*. For the removal of diseases like leprosy, boil, or piles, Just as a dose of decoction and

cutting off or burning some rotten part, are considered as pleasant in spite of their causing pain, the *viṣaya sukhās* are also considered as *duḥkhamaya* in spite of their affording pleasure.

The *viṣaya sukha* is known as *sukha* by means of *upacāra* only. This *upacāra* is not reality but its existence is based on real objects. Without the existence of a real lion, the attribute of lion could never be given to *māṇavaka*. ॥ 458 ॥ (2006)

D. C.—The soul is full of infinite knowledge of which *Mati-jñāna* etc. are the obstructions, and sense-organs are the supporting agents like the holes in a cluster of clouds covering the sun-shine. When all the obstructions are removed, there is absolute apprehension of pure cognizance.

Similarly, the soul possesses infinite happiness of which *pāpa* is the obstructive element, and *puṇya* the helping element. When all sorts of *pāpa* and *puṇyā* are removed, the *muktātma* attains perfect happiness which has neither obstructions nor *upacāras*. ॥ 460-461 ॥ (2008-2009)

D. C.—Just as a *muktātmā* attains *siddhatva* etc when it is free from the bondages of *Karma*, it attains celestial happiness also due to the same reason. So, your arguments that since *muktātmā* is free from *pāpa-punya*, it has no *sukha-duḥkha* also, like sky, proves itself absolutely unfounded. ॥ 462 ॥ (2010)

Now, in *reply* to the argument that “*déha* is the only agent of perceiving *sukha-duḥkha*, the author states—

Muktātma being free from such *duḥkhas*, enjoys perfect and infinite happiness showing there-by that *duḥkha* exists only where *déha* and *indriyas* exist; and real *sukha* is always found in a *siddha* being who is free from *déha* and *indriyas*. ॥463॥ (2011)

D. C.—According to one who is disillusioned by the infatuation of this mundane world and its sensuous pleasures, the happiness of *déha* and *indriyas* would be the only happiness and there would be nothing like *mokṣa-sukha* in his view-point. He would, therefore, find fault with our belief by saying that *muktātmā* can never experience *sukha* as it has no *déha* and *indriyas*.

But those like us, who recognize the existence of *muktātmā* and its uncomparable infinite happiness, understand that *mokṣa sukha* being *samsārāṅgita*, has absolutely different characteristics and hence, there is no *doṣa*. ॥ 464 ॥ (2012)

D. C.—Prabhāsa:—Jñāna and sukha of a siddha being, are a-nitya firstly because they are produced by means of the painful observance of penances etc, and secondly, because they are susceptible to production, like ghaṭa.

Bhagavāna:—Your argument is absolutely unfounded. (1) Prabhāsa ! Jñāna and sukha of a muktātmā would be a nitya only if they vanished. By means of jñānāvaraṇas, jñāna would be obscurad and hence destroyed and with the rise of sinful deeds, sukha would vanish. Both these obstructions jñānāvaraṇas and pāpa-karmas are bound by the hētus of mūlhyātva etc, muktātmā being free from such hētus, it is free from jñānāvaraṇas and pāpa-karmas also. Consequently, its jñāna and sukha do not meet destruction, and hence they are never called a-nitya.

Secondly, all the qualities of cētana are not a-nitya Dravyatva and a-mūrtatva are nitya. Therefore, the argument that jñāna and sukha are a-nitya because they happen to be cētana-dharmas, is anékāntika Similarly, the hētu of kṛitakatva etc is also anékāntika. Indestructibility of ghaṭa is a-siadhā inspite of its being kṛitaka. This hētu is a siddha also, because jñāna and sukha of a siddha being, are natural. Since there is no reason for the existence of āvaraṇas and bādhas, that which is in obscurity, becomes manifest Thus, they are not factitious

like *ghaṭa* etc. nor are they produced like lightning etc. The moon-light and sun-shine obscured by clouds are not said to have been produced, when the obstruction of the clouds has been removed. They are only said to have been manifested in a particular way.

Still however, *jñāna* and *sukha* of a *muktatma* could easily be considered as *a-nitya* by virtue of their being *kṛitaka*. Because, at every time, when *jñeya* vanishes, *jñāna* is also vanishing and *sukha* also comes into existence in various forms at various times. So, there is no difficulty in taking both of them to be *a-nitya* to a certain extent, as all objects like soul, sky, *ghaṭa*, and *papa* etc are susceptible to *upada*, *vyaya* and *dhranvya* after all. ॥ 466 ॥ (2014)

Establishing the existence of *mokṣa* and *mokṣa-sukha* by the help of *Vēda-vacanas*, the author proceeds—

न ह वै सशरीरस्य प्रिय-ऽप्रियावहतिरेवमादि व जं ।

D. C.—The sentences of *Vēdas* such as “*Na ha vai sa-sarīrasya priyā'-priyayo-rapahatīrasti*” and “*Aśarīram vā vasantam priyā'priyē na spṛśatah*” etc would prove themselves futile if the existence of *mokṣa*, *jīva*, and *mokṣa-sukha* were denied. Because, the existence of *mokṣa* -separating *jīva* and *Karma* from each other-existence of pure soul in the *mukta* state and the attainment of perfect and infinite happiness by a *mukta* being, have already been established by the *Vēda-pādas*. ॥ 467 ॥ (2015)

The opponent then asks—

Consequently, there would be no harm in accepting the absolute destruction of a soul which has attained *mokṣa*. ॥ 463 ॥ (2016)

In reply to this, *Bhagavan* explains the real interpretation of the *Vēda-padas* such as “ *Na ha va* ” etc and proceeds

*Trans.—*469–470 You do not properly understand the (real) meaning of those sentences of *Vēdas*. It is this. Hear please. Like ‘ *a-dhana*, ’ the word *a-śarīra* is meant to denote the negation of an existent object. By (means of) negation, due to ‘ *na*, ’ (its) existence would be found in another of the same type. In understanding the word ‘ *a-śarīra*, ’ it is better, therefore, to accept (the existence of) *jīva* and not (its non-existence like) *kharaśṛṅga* (2017–2018)

४६९—४७० ॥ (२०१७—२०१८)

D. C.—Bhagavāna:—O Prabhāsa ! Really you do not understand the proper meaning of the sentences such as “Na

ha vai" etc. In this sentence, the particle 'na' denotes negation, and the particles 'ha' and 'vai' are used in the ablative sense. "*Sa-śarīrasya*" means to a soul having a body, and "*priyā-priyayorapahatirasti*" denotes the destruction of happiness and misery. The whole sentence will be interpreted as follows:—

Jīva being possessed of a body, has *abhāva* of *sukha-duḥkha*. In the same way, *Jīva* existing in a bodiless state of *mokṣa*, never undergoes *sukha-duḥkha* i. e. As long as soul is encompassed in a body, it has to undergo *sukha-duḥkha*, but as the bodiless *muktātmā* is free from *Karma*-good or bad-it is never affected by *sukha-duḥkha*.

In the word "*a-śarīra*" here, there is a negation of the body and not of the soul. In the expression "*Adhano Devadattaḥ*" the riches are denied to the *vidyamāna Devadatta* and not to an *a-vidyamāna kharasṛṅga*. Similarly, here also, the existence of soul is not denied, but only that of body is denied. That which is denied must belong to an existent source, and not to a non-existent source.

Prabhāsa:—How could it be believed that which is denied at one place must be found at another ?

Bhagavāna:—Just as by the word "*na-brāhmaṇa*" a non-brahmin like a *kṣatriya* or a *vaiśya* is understood, but the absolute *abhāva* of *brāhmaṇa* as a whole, is not meant. So also, the expression "*a-śarīra*" signifies a bodiless *mukta jīva* of the type of *mukta jīva* having body, but that does not absolutely deny the existence of soul. There is resemblance in both owing to the common property of *upacara*

Moreover, "*śarīra*" does not come in the way of resemblance. As body is mixed with soul like milk and water, it is one and the same, as soul. Thus, by the denial of the particle 'na', the same soul is apprehended at another place, but the existence of soul is never denied thereby. So, the word '*a-śarīra*' denotes nothing but *jīva* which is *vidyamāna* like *Devadatta*, and not *a-vidyamāna* like *kharasṛṅga*.

The expression "*Vā vasantam*" is now explained'—

जं व वसंतं संतं तमाह वासद्दओ सदेहं पि ।

Trans. - 472 Or, "*vāva*" is a particle meaning "Or", and

'*santam*' means a soul existing (in the *mukta* state). Or, take '*ava*' as a particle and '*santam*' meaning (a soul) characterised by (the qualities of, knowledge, etc. (2020)

टीका—' वा ' इत्यथवा, ' वाव ' इत्ययं शब्दो निपातः, स च वाशब्दार्थः । ततश्चाशरोरं सन्तं भवन्तं मुक्तौ विद्यमानं जीवं प्रीया-ऽप्रिये न स्पृशतः, वाशब्दात् सशरीरमपि वीतरागं न ते स्पृशतः । यद्विवा, ' वसन्तम् ' इत्यन्यथा व्याख्यायते—“ बुज्जाऽव त्ति वेत्यादि ” “ वा ” इत्यथवाऽयमर्थः । “ वाव संतं ति ” रक्षण-गति-प्रीत्यादिष्वेकोनविंशता-वर्थेष्ववधातुः पठ्यते । गत्यर्थाश्च धातवो ज्ञानार्था अपि भवन्ति । ततश्चाह-विनेय ! त्वमेवं बुध्यस्व । किं तत् ? इत्याह-अशरीरं मुक्त्यवस्थार्यां विद्यमानं जीवम्; अथवा, ज्ञानादिभिर्गुणैर्विशिष्टं सन्तमित्याह ब्रूते, प्रिया-ऽप्रिये न स्पृशतः; वाशब्दात् सशरीरमपि वीतरागमिति तथैवेति ॥ ४७२ ॥ (२०२०)

17. C.—The expression “ *vā vasantam* could be dissolved as *vāva santam* the particle *vāva* meaning “or” and *santam* meaning a bodiless *jīva* existing in the *mokṣa* state. The word *vāva* here, will signify that *sukha-duḥkha* do not touch not only a bodiless *jīva* existing in a *mokṣa* state, but also the dispassionate ascetics having bodies.

Or, the expression could be dissolved as *vā ava santam* also. The prefix *ava* has nineteen different meanings such as to protect, to go, to love etc. Since a root signifying motion signifies knowledge also, a bodiless soul existing in the *mukta* state, and characterized by the qualities of cognizance etc, is not affected by *sukha-duḥkha*. Here also, the word '*vā*' brings in the dispassionate *sa-déhi* ascetic. ॥ 472 ॥ (2020)

D. C.—Prabhāsa:—If you can dissolve the expression as done above, I can also dissolve the expression at my will, and pull the meaning in my favour. This, in no way, leads to establish the existence of *mokṣa*. For, by dissolving “ *a-s'arīram va vasantam* ’ as ‘ *śa-arīram vā a-vasantam* ’ I can interpret it as a bodiless (soul) not existing at any place, and thus prove *jīva* to be absent from *muktāvasthū*, proving thereby, the the negation of *mokṣa* as well as *jīva*,

Bhagavāna.—Your interpretation does not fit in properly. By interpreting 'a-śarīra' as one having no body, *vidyamānate* of *jīva* in the *muktāvasthā* is clearly understood. It is not proper, therefore, to interpret it in another way by prefixing "a".

Secondly, in the sentence "*Sukha-duḥkhe na spṛśataḥ*" *spṛśanā* becomes the adjective of 'a-śarīra'. If 'a-śarīra' were meant to denote the negation of soul, the adjective would have lost its sense as found in the case of assertion like "*Sukha-duḥkha* do not affect the *vandhyāputra*." The adjective, therefore, is befitting 'a-śarīra' only if it means "*mukta-jīva*". Your interpreting the expression by dissolving it as '*vā a-vasantam*' is thus useless, while our interpretation is perfectly proper. This proves the existence of *mokṣa*, which separates *jīva* and *kārmanā śarīra*, and that of *mukta jīva* also. If the existence of *jīva* were denied, *Vēda-vācanas* would prove worthless as shown above. ॥ 473 ॥ (2021)

Trans.—474-475. Such being a *mukta* soul, it will have no happiness and misery. (But) it is not (so), as likes and dislikes, are produced from sinful or virtuous deeds. Moreover, likes and dislikes cannot affect a dispassionate (person) owing to his (high) knowledge and irresistibility. He enjoys natural and perfect happiness. So, what is the sense in asserting the negation of happiness ? (2022-2023)

(२०२२—२०२३)

*D. C.—Prabhāsa:—*I grant the extent of *muktātṃā*, *mokṣa*. and soul as such. But according to the *Vēda-vacanās* that *siddha* beings are free from happiness and misery, likes and dislike will not affect the bodiless soul; consequently, a *muktātṃā* will have no experience of happiness.

*Bhagavāna.—**Priya* and *a-priya* and hence *sukha* and *duḥkha* are produced by *puṇya-pāpas* from which *muktātṃā* is free. But this in no way, means that *muktātṃā* has no scope for the experience of happiness. Since *muktātṃā* is highly cognizant and perfectly irresistible, owing to its being free from *rāga-dvēṣa*, it enjoys the highest and most natural happiness which never vanishes.

Or, it is no use discussing about the negation of happiness to a *mukta* being, by saying that likes and dislikes do not affect the bodiless. *Muktātṃā* will thus have no experience of the mundane *sukha-duḥkha*, because it is always free from likes and dislikes. Thus, the sentences of *Vēdas* such as *Na ha vai sa-s'arīrasya* etc establish, O blessed *Prabhāsa* ! the existence of *mokṣa*, *jīva*, and the immutable happiness of *muktātṃā* at the removal of *puṇya-pāpa*

Lastly, the sentence that “*Jarāmaryam vaitat sarvam yadagni-hotram*” means that one should practise *agni-hotra* etc, till the end of life.

Your suspiciyn about the existence of *mokṣa* generated from

this sentence (as the time of beginning the performance has not been mentioned in it) is out of place. The sentence really means as follows :—

One should perform sacrifice throughout the life at all times. The word 'vā' here signifies that he who aspires for *mokṣa* should also perform the sacrifice, which acts as the *hetu* of their *mokṣa*. Thus, the *Tīrthāṅkara* removes the doubt of *Prabhāsa*. ॥ 474-475 ॥ (2022-2023)

*Trans:—*467 When the doubt was removed by the *Tīrthāṅkara*, who was entirely free from old age and death, that saint accepted the *Dikṣā* along with his three hundred pupils. (2024)
