## VOLUME XI.

### No. 1.—AN INSCRIPTION AT DEVAGERI.

By J. F. Fleet, I.C.S. (Retd.), Ph.D., C.I.E.

This inscription has been mentioned by me in vol. 5 above, p. 172: and I have given a brief statement of the purport of it under No. 29 in my List of Spurious Records in the *Ind. Ant.*, vol. 30 (1901), p. 217. I publish it now for the first time, and give a facsimile of it from an ink-impression made for me by Mr. Kalyan Sitaram Chitre in 1890, when (if my memory is correct) he was Māmlatdār of the Sampgaum tāluka of the Belgaum District.

The inscription is on a stone which was found in a field, Survey No. 85, at **Dēvagēri**, a village about six miles west-by-south from Karajgi, the head-quarters of the Karajgi tāluka, Dhārwār District. The Indian Atlas sheet No. 42 (1827) shews the place as 'Dewgeeree'. The Map of the Dhārwār Collectorate (1874) shews it as 'Deogeree'. The Postal Directory of the Bombay Circle (1879) presents its name as 'Deogiri'. And the Dhārwār volume (1884) of the Bombay Gazetteer treats it as 'Devgiri' (p. 665). In connexion with some early Kadamba copperplate records which were obtained at this village, I originally gave its name as 'Dēvagiri',[1] in accordance with those spellings. Subsequently I was given to understand that the cultivators call it 'Dēvagere', and that this should be taken as its real name: and I have sometimes used this form.[2] Since then, however, I have ascertained that a record of A.D. 1075 in the temple of **Basavaṇṇa** at the village itself distinctly gives its name as **Dēvaṁgēri**, as also does a record of the period A.D. 1210-47 at the temple of **Mārtaṇḍadēva** at a neighbouring village, Kōḷūr: also, that the impression of a record of A.D. 1121 in the temple of Basavaṇṇa, while leaving it doubtful whether the original does or does not present the *anusvāra*, again distinctly gives the second component of the name as *gēri*, and thus yields either **Dēvaṁgēri** or **Dēvagēri**. Further, Mr. K. S. Chitre, while writing the name on the impressions sent by him to me as 'Dēvagiri' in English characters, according to the official spelling, wrote it as 'Dēvagēri', in the same place, in the Mōḍī or current Marāṭhī characters. I therefore entertain no doubt that what the cultivators really call the village is, not 'Dēvagere' (as reported to me), but **Dēvagēri**, and that this

[1] *Ind. Ant.*, vol. 7, p. 33: and I have used the form 'Dēogiri' in vol. 5 above, p. 172.

[2] For instance, in my *Dynasties of the Kanarese Districts*, in the Gazetteer of the Bombay Presidency vol. 1, part 2, p. 285 ff.

is the form of the name that should be used.[1] At the same time, in justification to a certain extent of the official form of the name, I may state that a record of A.D. 1674 on a pillar in the same temple of Basavaṇṇa does distinctly present the name as **Dēvagiri**, and thus carries back the corrupt form for an appreciable time. The inscription now published does not mention the name Dēvaṁgēri in any form, but speaks only of a village called **Palarūr**. This name seems to be another form, by transposition,[2] of the name which we have as **Paralūr** (*Ind. Ant.*, vol. 11, p. 70) in the inscription of the time of Kirtivarman II (A.D. 746-47 and 757) at Āḍūr, about eight miles south-west-by-west from Dēvagēri, and as **Bṛihat-Paralūr** (*id.*, vol. 7, p. 35, line 9) in the still earlier copperplate grant, of the third year of Mṛigēśavarman, which was discovered at Dēvagēri itself. In any case, the purport of our record distinctly implies that the stone which bears it, and which was found in a field in the lands of Dēvagēri, was set up in the village Palarūr, and thus marks **Palarūr** as being then the name of the place. It may be added that the inscription of A.D. 1075, mentioned above, registers an assignment of tolls, for certain purposes of the god Kaṅkāḷēśvara of Dēvaṁgēri, at Dēvaṁgēri and **Palavūr** and in the *taḷa*, 'site or tract', composed of Eleya-Tammuge and two unnamed villages: here we may possibly have still another form of the name Paralūr, Palarūr: but it is difficult to account for the *v* in the place of the *r*; and Palavūr may be another village which does not now exist. Any such name as Paralūr, Palarūr, and Palavūr, is not now found in maps, etc. And the position seems to be that Dēvagēri was originally a *dēvaṁgēri* or *dēvapurī*, a 'god's ward', of Palarūr; that the lands of Palarūr and some other villages have been absorbed into the lands of Dēvagēri, which is a somewhat large village; and that consequently the latter name only has survived. The inscription now published places Palarūr, tacitly but plainly, in the **Banavāsi twelve-thousand province**. So, also, the record of A.D. 1075 in the same way places Dēvaṁgēri, with the other villages mentioned in it, in that same province, and, further, in a division of it known as the **Bāsavura one-hundred-and-forty**.

At the top of the stone there are **sculptures**, showing a bull, recumbent to the right (proper left) and apparently intended for the usual Nandi, and below it, plainly not as a family or dynastic emblem but in connexion with the topic of the record, an elephant, standing to the right (proper left), with a man standing behind it with uplifted arms. The **writing** covers an area about 1′ 8″ broad in lines 9 to 14 by 3′ 0″ high. The stone on which it is engraved seems to have been even originally of an irregular shape; and it is only at the end of lines 1 to 8, 17, 20, and 21, and at the beginning of lines 18 to 22, that any portions of it have been broken away.

The **characters** are Kanarese, boldly formed and, generally, well executed. In lines 1 to 15 the size of them ranges from about $\frac{1}{2}$″, as in the *ya* of *baḷiyan*, line 9, to $\frac{3}{4}$″, as in the *ba* of *bare*, line 15; in lines 16 ff. it increases up to (for single letters) $1\frac{1}{4}$″ in the *ba* of *sāsirbar*, line 19, and it almost seems that this part of the record may have been written by another hand: the *ynā* of *ay-nūra*, line 2, is $1\frac{3}{4}$″ high: the *lni* of *maseyal=niran*, line 11, is 2″ high: and the *chchi* of *mechchi-dem*, line 16, is $2\frac{1}{2}$″ high. They are of the general standard of the tenth century A.D. and closely thereabouts. They include both the types of the initial short *i*, on which detail see p. 7 ff. below: the earlier type of this vowel occurs in *irppatt-*, line 2; the later type is found in *idaṁ*, line 20; also in *idan=* at the beginning of line 18, where, however, it is mostly broken away. The *kh*, *j*, *b*, and *l* are all of the later types; the guttural nasal *ṅ* does not occur. No distinction seems to be made between *d* and *ḍ*. In *chhatra*, for *chchhattra*, line 6, we have the rare full

[1] Regarding the confusion which has arisen in the official spelling of various place-names in consequence of mistakes that have been made between *kere*, *kere*, 'a tank', and *kēri*, 'a street', see my note on the name Aṇṇigere in vol. 6 above, p. 100, note 3.

[2] Compare the metathesis in *maral* and *malar*, *aral* and *alar*, and *eral* and *elar*: see Śabdamaṇidarpaṇa, verse 29.

form of *chh*, which necessarily can seldom occur except when, as here, it is used instead of *chchh*.

The **language** is Kanarese, of the archaic type, in prose. The record was neatly put together by the use of the *satisaptamī* or locative infinitives *ene*, lines 10, 11, 14, *ire*, line 14, *bare*, line 15, and *nīle*, line 15, coupled with the subjunctive or conditional *endoḍe*, lines 12, 13, 16. And not unworthy of note, in respect of the nicety of the composition, is the point that, whereas the remainder of the record, appropriately cast in pure Kanarese, naturally presents the words *pul*, *pullu*, for 'grass' (lines 11, 14, 15), and *āne* for 'elephant' (line 15), into the ruling prince's mouth there are put (in accordance with the theory of the Hindū drama, that kings and such people should speak Sanskṛit) Sanskṛit words, woven however into a Kanarese sentence, which include *tṛiṇa* and *hastin*.[1] Line 7 gives us *nēvarade*, the instrumental singular of a word *nēvara* which seems to be a longer form of *nēra*, = *nēr* (3), 'straightness, propriety, pleasantness'. In line 10-11 we have *kuḍugaḷ* as a variant of *kuḍugōl*, *kuḍagōl*, *kuḍigōl*, *kuḍugalu*, 'a kind of sickle', for which forms see Kittel's Kannaḍa-English Dictionary under *kuḍu* (3).[2] In the first component of the term *būdagūḷ*, 'an offering of boiled rice to ghosts', lines 12, 17, we have *būda*, instead of the more usual *būta*, as a *tadbhava*-corruption of the Sanskṛit *bhūta*. In *arasara* and *ada*, line 12, *pulla*, line 14, and *koyvara*, line 15, we have either a careless omission of the final *ṁ* (*n*), or, with equal probability, instances of the accusative in *a* instead of *aṁ* (*an*)[3]. Line 8 presents the word *baḷi* (3), 'a man who calls or invites' or we may say 'a summoner', in connexion with which the following remarks may be made. In the form *baḷi* (with *ḷ* instead of *l*) we have this same word in an unpublished inscription of A.D. 1052 at Nīralgi in the Hāngal tāluka, Dhārwār, in a passage which runs:—śrīman-mahāmaṇḍaḷēśvaraṁ Harikēsaridēvar . . . . śrīmad-agrahāraṁ Nīriliya mahājanaṁ mūnūrvvarige baḷiyan=aṭṭi barisi; "the illustrious *Mahāmaṇḍaḷēśvara* Harikēsaridēva . . . . having sent a summoner to the three-hundred *Mahājanas* of the holy *agrahāra* Nīrili, and having caused them to come," etc.: and similar passages occur in records of A.D. 1074 and 1075 at the same place. And we can now recognize that we have the word *baḷi* itself in line 20 of the Āḍūr inscription (*Ind. Ant.*, vol. 11, p. 70), where, modifying my original rendering, I would translate:—"The *Gurāva* Prabhāchandra, the summoner of the Jain temple of Paralūr, obtained this grant." It would seem that, in addition to meaning generally 'any man who calls or invites', the word denoted also a recognized official of some kind, both religious and secular.

In respect of **orthography** we may note (1) the use of *b* for *v* in *saṁbatsara* twice in lines 1 to 3; (2) the use of *s* for *ś* throughout; (3) the mistakes of *kh* for *k* in *sakha*, line 1, of *d* for *dh* in *samadigata*, line 4, and of *ri* for *ṛi* in *triṇa*, line 9.[4]

The **inscription** can only be treated as a **spurious record**, as which it has been entered under No. 29 in my List of Spurious Records in the *Ind. Ant.*, vol. 30 (1901), p. 217; because it

[1] This is the record which I mentioned, from this point of view, in the discussion on "Sanskṛit as a spoken language"; see *Jour. R. As. Soc.*, 1904, 486.

[2] Reeve and Sanderson's Dictionary adds the form *kuḍuguḷa*. The most familiar term is *kuḍugōl*, in its later form *kuḍugōlu*.

[3] According, indeed, to Kēśirāja's Śabdamaṇidarpaṇa, verse 134, and Bhaṭṭākalaṅka's Karṇāṭakaśabdānuśāsana, sūtra 231, we might regard some of these as genitives used in the sense of accusatives. But *ada* at any rate is not a genitive. And there can be little doubt that Dr. Kittel's opinion is correct; namely, that the supposition of a use of the genitive for the accusative is unnecessary, and that the accusative in *a*, frequent enough in the mediæval and modern dialects, existed in also the more ancient colloquial dialect, though it had not been generally accepted by classical writers: see his *Kannada Grammar*, §§ 117, 122, 352. Many instances of the accusative in *a* can be found in my Kanarese ballads: thus, *māta* for *mātannu*, *Ind. Ant.*, vol. 14, p. 300, line 3 from the bottom; *śiṣṭa* for *śiṣṭannu* = *siṭṭannu*, p. 301, line 1; *karava* for *karavannu*, line 8; *yēna* for *yēnannu*, line 11. It would, in fact, be pedantic to use the accusative termination in ordinary speech; except perhaps with pronouns.

[4] Except, of course, for Sanskṛit words being aimed at here, there would be no objection to *triṇa*.

purports to have been framed on a date which is utterly incompatible with the period to which its characters refer it. As, however, it states (apart from the date) nothing that is in any way unnatural, suspicious, or irreconcilable with the local history for its true period, we may accept the information given in it as true. It deals with a thing which it calls **būdagūḷ**. This term is composed of *būdu*, a *tadbhava*-form of the Sanskṛit *bhūta*, 'a spirit, goblin, ghost', and the Kanarese *kūḷ*, *kūḷu*, 'boiled rice'; and it denotes **'an offering of boiled rice to the ghosts'**. Other names of the offering are *bhūtabali* and *bhūtayajña*; also the word *bali* by itself, which is explained in Kittel's Kannaḍa-English Dictionary as meaning, amongst other things, 'an offering to demons (especially also Durgā or Kālī), etc., performed by putting heaps of boiled rice, or by killing sheep, buffaloes, etc., and also men.' As a regular sacrifice, the offering ranked as one of the *pañchamahāyajña* or 'five great sacrifices': see, for instance, the Mānavadharmaśāstra, 3. 70. I have been told, however, that in a more special way the *bhūtabali* is offered in connexion with the *garbhādāna* or ceremony performed to ensure conception. I further learnt from the late Sir James Campbell that the *bhūtabali* is offered in cases of barrenness, from the point of view that that misfortune is due to the influence of malicious spirits. And we thus obtain a clear explanation as to why the record represents the village-maidens as interested in the matter of the *būdagūḷ*. The inscription mentions a certain *Mahāsāmantādhipati* or great feudal prince named **Śāntivarman**, who was governing the **Banavāsi twelve-thousand province**. It describes him as belonging to the **Māṭūra race**, and as having the hereditary title of **"supreme lord of the town Trikundapura"**, with reference to the place of origin of his family, and as possessing the **Nandanavana umbrella, the horse crest, and the mirror banner.**[1] It recites that Śāntivarman came, in the course of a tour, to **Palarūr**, and demanded a supply of grass for his horses and elephants. For some reason not stated, the right to make the offering of boiled rice to the ghosts was in abeyance; apparently under a sentence of excommunication. Incited by the village-maidens (*koḍagūsugaḷ*, line 11), who said that, if he could get the restriction removed, he might marry as many of them as he might wish, a man named **Allagunda** cut a supply of grass so much to the satisfaction of Śāntivarman that the latter offered to grant him a boon. Whereupon Allagunda asked for, and obtained, **the restoration of the right to make the offering to the ghosts.** As to whether the village-maidens kept their promise to him, the record is silent.

The inscription is **dated** on a Monday coupled with the second *tithi* of the bright fortnight of Mārgaśira of the Kālayukta *saṁvatsara*, Śaka-saṁvat 522. **This date,** however, is obviously **not authentic**: and all else that need be said about it is as follows. By the mean-sign system, which is the one that applies for that time, Kālayukta began on 29 October, A.D. 600, in Śaka-saṁvat 522 expired, and ended on 25 October, A.D. 601. In that period, the given *tithi* ended closely about 22 hours 55 minutes after mean sunrise (for Ujjain) on Sunday, 13 November, A.D. 600, and cannot be connected with the Monday. And from this we see that the case is not one in which the writer of the record obtained a correct date by calculation.

As one means towards determining the real date of the record, we may cite **some other notices of the Māṭūra family,** to which the record refers the *Mahāsāmantādhipati* Śāntivarman. We have one mention of it in the Śravaṇa-Belgoḷa epitaph of the great Gaṅga prince Noḷambāntaka-Mārasiṁha (A.D. 963-64 to 974), which describes him as seizing the possessions of the lord of the Vanavāsi country, and causing him or those who belong to the Māṭūra race to do obeisance to him (*ante*, vol. 5, p. 179). No personal name, however, is mentioned there. Some other notices of the family, of a specific nature, from other records in Mysore, are as follows:—

(1) An inscription a Hechche in the Sorab tāluka, Shimoga District: *Epi. Carn.*, vol. 8,

[1] The Udayēndiram plate of Pallavamalla-Nandivarman allot a "mirror banner made of (? put together with) a peacock's tail" to the Śabara king Udayana: *South-Ind. Inscrs.*, vol. 2, p. 372.

Sb. 476. This record refers itself to the reign of the Rāshṭrakūṭa king Krishṇa III, and is dated in the Vikārin *saṁvatsara*, Śaka-saṁvat 861 (expired), with details falling in December, **A.D. 939.** It tells us that the *Mahāsāmantādhipati* **Māchiga, Māchidēva,**—whom it describes as "lord of Trikundapura the best of towns"; born in the **Māṭūra race**; and having the **Nandavana** umbrella, the horse crest, and the mirror banner,—was then ruling at Heṛdese :[1] the sphere of his government is not stated.

(2) An inscription at Ōṭūru in the same tāluka: *ibid.*, Sb. 70. This record is not dated: but it refers itself to the same reign, and is therefore to be placed **between A.D. 939 and 959.** It tells us that the *Mahāsāmantādhipati* **Māchiyarasa** was then lord of the Banavāsi twelve-thousand. It describes him just as Māchiga, Māchidēva, is described in No. 1 above; and he is plainly the same person.

(3) An inscription at Kakkarasi in the same tāluka: *ibid.*, Sb. 474. This record refers itself to the same reign, and is dated in the Ānanda *saṁvatsara*, Śaka-saṁvat 876 (expired), with details falling in October, **A.D. 954.** It tells us that the *Mahāsāmantādhipati* **Māchiyarasa**—described in the same terms as in Nos. 1 and 2 above— was then ruling over "the twelve thousand."[2]

(4) Another inscription at Hechche: *ibid.*, Sb. 479. This record refers itself to the reign of the Rāshṭrakūṭa king Kakka II, and consequently, though not dated, may be referred to **closely about A.D. 972.** It tells us that the *Mahāsāmanta* Śāntivarman— whom it describes as "lord of Trikundapura the best of towns"; born in the Māṭūra race; and having the Nandanavana umbrella, the horse crest, and the mirror banner—was then ruling at Heṛdese.

(5) Another inscription at Hechche: *ibid.*, Sb. 477. This record refers itself to the reign of the Western Chālukya king Āhavamalla-Taila II, and is dated (without full details) in the Khara *saṁvatsara*, Śaka-saṁvat 913 (expired), = **A.D. 991-92.** It tells us that the *Mahāsāmantādhipati* **Śāntivarman**— described otherwise in just the same terms as in No. 4 above— was then ruling the Belgube 70, the Eḍenāḍ 70, the Tandavūra 12, the Gedeya 12, the Mugunda 12, the Pulivaṭṭi 12, the Kalvatti 7, and the Sāntaḷige 1000.

These other notices of the Māṭūra family agree with the palæographic evidence in placing **the real date of the record in the tenth century A.D.** And as a means towards determining **its exact date** we take the given *saṁvatsara*, Kālayukta. In the tenth century, this *saṁvatsara* came only once. By the southern lunisolar system, which is applicable for this time to the locality to which the record belongs, it coincided with Śaka-saṁvat 880 expired. And in this year the given details are correct for **Monday, 15 November, A.D. 958,** on which day the specified *tithi* ended at about 17 hours 30 minutes after mean sunrise (for Ujjain). This result satisfies the requirements of the case, both palæographic and historical. And we entertain no doubt that this is the real date on which the record was framed, and that the Śāntivarman mentioned in it is the Śāntivarman of the Hechche inscriptions Nos. 4 and 5 above. As to **why the writer of the record antedated** it by practically six of the sixty-years cycles, we can only conjecture that the ban laid upon the village had existed for some long time; that it had been disregarded; and that antedating (made in fact to a preposterous extent) was necessary to legalize acts which had been performed in spite of it.

---

[1] This name, much damaged here, is completed from No. 4 below.

[2] An inscription at Keḷagina-Kirugunise in the same tāluka, *ibid.*, Sb. 501 which refers itself to the same reign, and is dated (without full details) in the Kālayukta *saṁvatsara*, Śaka-saṁvat 881 (current) = A.D. 958-959, tells us that a certain Māchiga was then governing the Eḍenāḍ seventy. He may have been some junior member of the family, perhaps holding office under Śāntivarman. But there is nothing in the record to mark him as such.

## TRANSLATION.

Hail! On the second tithi, and on Monday, of the bright fortnight of Mārgaśira of the Kāḷayukta saṁvatsara which was the five hundred and twenty-second (year of) the centuries of years elapsed of the era of the Śaka kings :—

(Line 4.) Hail! The *Mahāsāmantādhipati* Śāntivarman,—who has attained the *pañcha-mahāśabda*, who is a supreme lord of the town Trikundapura, who has been born in the Brahmakshatriya Māṭūra race,[5] who is decorated with the Nandanavana umbrella and the horse crest and the mirror banner,—while governing the Banavāsi twelve thousand with rectitude and according to established customs, came in due course to Palarūr, and sent a summoner to the seventy (*Mahājanas*) to say :—"A supply of grass is wanted for Our troop of horses and elephants!"

(L. 10.) Thereupon (*the cutters*) said :—"Right well will we cut!", and were going out. Then Allagunda said :—"Pour ye out water to whet (*my*) sickle!" Thereupon the young maidens said :—"This is the man who will cut grass, and please the king, and cause the offering of boiled rice for the ghosts to be set free." Thereupon he said :—"If I cause that to be set

[1] From the ink-impressions. Ordinary brackets are used for such corrections and doubtful points as can be conveniently noted in this manner. Square brackets are used to mark syllables, or parts of them, which in the original are illegible or broken away and lost. An asterisk, attached to letters or marks of punctuation in square brackets, indicates that those letters or marks of punctuation do not stand in the original text.

[2] There are various marks before this word. But they seem to be due only to injuries to the stone, and not to include any symbol for the word *ōm*.

[3] Read *saka*, for *śaka*.

[4] The first syllable of this name is greatly damaged, and cannot be recognized distinctly even on the back of the impressions. There can be no doubt, however, that it was *śā*, for *śā*.

[5] That is, "in the Māṭūra race which is of mixed Brāhman and Kshatriya origin." On the term Brahma-kshatriya see some remarks by Mr. D. R. Bhandarkar in *Ind. Ant.*, 1911, p. 25 ff.

Inscription at Devageri.

J. F. FLEET. SCALE ·25 W. GRIGGS, COLLOTYPE.

FROM AN INK-IMPRESSION BY MR. KALYAN SITARAM CHITRE.

free, what will ye do for me?" To which they said:—"Marry just as many of us as thou mayest like!"[1]

(L. 14.) Thereupon he went out. And when, while he was cutting grass, the king, mounted on an elephant, came looking on at the cutters, Allagunda stood up on the very bundle of grass which was for the elephant. Then, behold!, the king said:—"We are pleased: ask a boon!" Thereupon he said:—"Set ye free the offering of boiled rice for the ghosts:" and thus he caused it to be set free.

(L. 18.) He who destroys this shall incur the guilt of destroying Vāraṇāsi and a thousand brown cows and a thousand Brāhmaṇs! He who protects this is a protector of just so much!

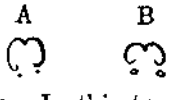

(L. 21.) The worthy Rāmasiṅga set this up. [May it be auspicious (?)]

### Note on the Kanarese and Telugu initial short i.

The alphabet exhibited in this Dēvagēri inscription is a specimen, belonging to the tenth century A.D., of that which Professor Bühler in his *Indische Palaeographie*, § 29, termed the **Kanarese and Telugu alphabet.**[2] An interesting detail in this particular record is that it presents the two types of the initial short i of this alphabet: we have the earlier type in *irppatt-*, line 2, and the later type in *idaṁ*, line 20: the latter is found also in *idan=*, at the beginning of line 18, but is much damaged there. And we have to consider the circumstances in which this mixture of the two types could occur. I had hoped to give a sketch, with plates, of the full history of the vowel in question, and of the [illegible] of the initial long *ī*: because, in addition to the interest that attaches to the study itself, the types and forms of these two letters may at any time be found particularly instructive in respect of the proper placing of undated genuine records, and of fixing limits for the fabrication of some of the spurious records. For the present, however, it has been found impracticable to prepare the requisite plates; chiefly in consequence of a want of published facsimiles for the crucial period when the earlier types were being supplanted by the later ones. I must, therefore, confine my treatment of the matter to the history of the initial short i in the Kanarese and Telugu countries during the transitional period, and limit my remarks to such details as can be made clear without more than half a dozen illustrations.

The earlier type of the Kanarese and Telugu initial short *i* has been illustrated by Professor Bühler in his plate VII, line 3, cols. XII, XIII, XV to XVIII, and plate VIII, line 3, cols. II to V. I give two other illustrations in the margin: **A.** is drawn from the *i* of *iḷnūr-vvoruṁ*, line 20, letter No. 13, in the Sirūr inscription of A.D. 866 from the Dhārwār District, Bombay, *ante*, vol. 7, p. 206, plate: **B.** is from the *i* of *irugaṅge*, line 5, No. 22, in the Bēgūr inscription of the period A.D. 908-38 from the Bangalore District, Mysore, *ante*, vol. 6, p. 48, plate. In this type the character consisted, when fully made, of two parts, with various forms according to certain differences in the details of the two parts. The lower part consisted of two components, which were placed sometimes on the lower line of the writing, sometimes below it. These components, when made with uniformity, were sometimes two small circles, as in B., or two round marks which were not completely closed in as circles, and sometimes two dots, as in A., which might be either round or of irregular shape. But sometimes, whether owing to caprice or carelessness of the writers, or to indifferent work by the engravers, or to the material breaking away (especially in the case of records on stone) in the hands of the engravers, these details are met with interchanged, and we have a circle accompanied by a dot. And occasionally the components of

A B

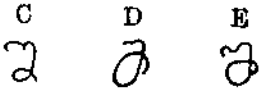

[1] Literally, "amongst us who are so many as these, marry all whom thou art pleased with!"

[2] German original in the Grundriss der Indo-Arischen Philologie und Altertumskunde, vol. I, part II (1896): English version in *Ind. Ant.*, vol. 33 (1904), appendix.

the lower part were omitted, and the ends of the upper part were then usually brought down to the lower line of the writing: for a published instance of this, from the eastern parts of Southern India, see *iti*, line 43, No. 17, *iṛṛula*, line 66, No. 5, and *iḍiyūri*, the same line, No. 14, in the Kaluchumbarru grant of the period A.D. 945-70, *ante*, vol. 7, p. 186, plate. In a quite exceptional instance of A.D. 982 from Mysore (see p. 13 below) the lower part consists of three circles, instead of two: this can only be regarded as a freak. The upper part sometimes took the form of a plain smooth arch, as in *ittodu*, line 2, No. 5, and *ittodān=*, line 3, No. 11, in the inscription of the period A.D. 597-608 outside the Vaishṇava cave No. 3 at Bādāmi in the Bijāpūr District, Bombay, *Archæol. Surv. West. India*, vol. 1, p. 24, plate; *Ind. Ant.*, vol. 10, p. 59, plate. But usually there was a more or less marked notch or bend down, pointed or curved, in the centre of the top: we have this in its pointed form in the illustrations A. and B. given herewith; and more markedly in *iti*, line 21, No. 12, in one of the early Kadamba copperplate records, *Ind. Ant.*, vol. 6, p. 96, plate: in its curved form, which had the effect of giving a waving shape to the top stroke, we have it in *iti*, the last line, No. 9, in the Haidarābād plates of A.D. 612, *ibid.*, p. 74, plate. And sometimes this notched form was made so flatly that it resembles rather closely the outspread wings of a hovering bird: see, for instance (though these cases do not come from the particular territories with which we are concerned), Professor Bühler's plate VII, 3, IV, VI, VII, IX, and plate VIII, 3, I. The upper part is usually found single, formed by one continuous sweeping movement: but in some cases it has a disjointed appearance, with a break in the middle, as if it was made by two separate strokes, as in *idam=*, line 9, No. 17, in the Nerūr plates of the period A.D. 609-42 from the Sāwantwāḍī State, Bombay, *Ind. Ant.*, vol. 8, p. 44, plate, and in *ivu*, line 42, No. 9, from the end, *idaṁ*, line 56, No. 9 from the end, and *iḍiyūr=*, line 82, No. 10 from the end, in the Kaḍaba plates from the Tumkūr District, Mysore, which bear a date in A.D. 812 or 813, *Ind. Ant.*, vol. 12, p. 14, plate: *Epi. Carn.*, vol. 12, Gb. 61, plate: as, however, this feature is only noticed in records on copper, it is evidently to be attributed to the process of engraving, not to the writers. The sides of the upper part were not always of equal length. And sometimes the left side is curled in much more than the right side; as, for instance, in the cases mentioned above from the Haidarābād and Kaḍaba plates, and, in fact, in the Dēvagēri inscription itself. Sometimes both the sides were well curled in, as in the illustrations A. and B. above, and more markedly in *iṛidu*, line 4, No. 1, and *ivu*, line 5, No. 1, in the Hatti-Mattūr inscription of about A.D. 765, *ante*, vol. 6, p. 162, plate: so also in an instance from the eastern parts of Southern India, in *iti*, line 85, No. 7 from the end, in the Ranastipūṇḍi grant of A.D. 1019, *ante*, vol. 6, p. 357, plate. Occasionally, the right side was continued downwards in a slanting direction to, or towards, between the two components of the lower part: one instance of this is found in *idam=* (for *imam=*), line 13, No. 40, in the Mahākūṭa pillar inscription of A.D. 602, *Ind. Ant.*, vol. 19, p. 18, plate: another is Professor Bühler's plate VII, 3, XVIII, which is from the *ity=* in line 13, No. 11, of the Eastern Chalukya record of A.D. 668, *Ind. Ant.*, vol. 7, p. 186, with plate in vol. 8, p. 320. And sometimes the right side was continued down into the right component of the lower part: this was a transitional form, which will be noticed below.

The later type of the Kanarese and Telugu initial short *i* has been illustrated by Professor Bühler in his plate VIII, line 3, cols. VI, VIII, IX. I give three other illustrations in the margin: C. from *itthaṁ=*, line 22, No. 2 from the end, in the (?) Masulipatam plates or Âkulamannaṇḍu grant of the period A.D. 934-45 (see p. 15 below): D. is drawn from the *i* of *int=initu*, in line 46 of the inscription of A.D. 980 at Saundatti in the Belgaum District, Bombay, *Jour. Bo. Br. R. As. Soc.*, vol. 10, p. 207 (no plate), and it is practically the modern form now used, both in Kanarese and in Telugu: E. is from the *i* of *ivu*, line 25, No. 4, in the inscription of A.D. 1064 on the Jaṭṭiṅga-Rāmēśvara hill in the Chitaldroog District, Mysore, *ante*, vol. 4, p. 212, plate. In this type the character, when properly and

C D E

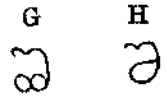

customarily formed, did not consist of separate parts, but was made in one unbroken whole by a continuous sweeping movement of the reed or *stilus*. But, as with the earlier type, the top is occasionally found in a disjointed shape, as a result of the process of engraving : for instance, in *itaḥ*, line 79, No. 4, in the Chellūr plates of A.D. 1143, *Ind. Ant.*, vol. 14, p. 59, plate. And the top part in the instance figured as C. above was evidently made by the writer by two strokes instead of one continuous movement. The top of the letter in this type is the upper part of the earlier type, in its notched form : but a very exceptional form is occasionally found in records from the eastern side of Southern India, in which the character begins with a curl down towards the left, instead of the curl up to the right: see, for instance, *iti*, line 102, the last *akshara* but one, in the Ṭēki plates of A.D. 1086-87, *ante*, vol. 6, p. 343, plate. The remainder of it was made by continuing the right side of the top downwards, and then in a loop upwards to the left and turning to the right to meet the down-stroke ; and it was finished off by a projection taken to the right and turned down into a sort of tail : in some cases, however, this projection to the right is very rudimentary, as, indeed, in the illustration E. ; and in others, of the transitional class (see below), it does not appear at all.

The method of the transition from the earlier to the later type can be easily recognized though an intervening link or two may be wanting. The first step was a continuation of the right side of the upper part of the earlier type down to touch the right component of the lower part: I give an instance of this, in the illustration F. in the margin, from an Eastern Chalukya record, the Ṭraṇḍapaṛu grant, of the period A.D. 844—88 (see p. 15 below). The next step was to form the right component of the lower part, not by an entirely separate movement after raising the reed or *stilus*, but by an unbroken continuation of the down-stroke : we have an instance of this, with the right lower component formed by a continuation of that movement to the left, in Professor Bühler's plate VIII, 3, II, which is from the *i* of *int-app-āt* in line 13, No. 4 from the end, in the Kanarese record of Gōvinda III of A.D. 804, *Ind. Ant.*, vol. 11, p. 137, plate.[1] It must, however, have become customary, in this continuous formation of the right lower component, to make the movement to the right, instead of the left. The next step probably was to make the entire letter by one continuous stroke, without any lifting of the reed or *stilus*, in the manner suggested in illustration G. given in the margin, with the two circles of the lower part running into each other. In the cursive movement thus set up, a subsequent step certainly was to make one large loop serve the purpose of the two circles, as in illustration H. : we have instances of this in *iy=ūra* (for *ty=ūra*), line 12, No. 7, and *i* (for *ṭ*) *dammavan=*, line 16, the last *akshara*, in the inscription of A.D. 1047-48 at Miṇḍigal in the Kōlār District, Mysore, *ante*, vol. 5, p. 207, plate. It seems to have been then recognized that a confusion was liable to arise between the initial short *i* and the initial *ai* of the same alphabet :[2] and it must have been in order to avoid such

F

G H

[1] In this record the vowel is found in also *iidaṁ* (for *idaṁ*), line 12-13 : but it does not present the same peculiarity there.

[2] The Kanarese and Telugu initial *ai* is of somewhat rare occurrence, and has not been illustrated by Professor Bühler, who, in fact, gave only one southern *ai*, plate VII, 6, VII, from *aiśvaryya*, line 61, No. 7, in the Aliṇā Valabhī plates of A.D. 766, my *Gupta Inscriptions*, Corpus Inscriptionum Indicarum, vol. 3, p. 179, plate. Other instances from that part of Southern India may be seen in *aihik-*, line 23, No. 37, of plate ii, in the Valabhī record of A.D. 760, *Ind. Ant.*, vol. 6, p. 21, plate, and in the same word, line 21, No. 11, in the Rāshṭrakūṭa record of A.D. 813 from Tōrkhēḍē, *ante*, vol. 3, p. 55, plate: these two forms are more like those which we have from the Kanarese country.

A Kanarese initial *ai* of the eleventh century may be seen in *ai-goḷagaṁ*, line 14, No. 4 from the end, in the Miṇḍigal Chōḷa inscription of A.D. 1047-48 from Mysore, *ante*, vol. 5, p. 207, plate. An earlier form may be seen in *ai-guḷa*, line 13, the last *akshara* but one, in a Gāṅga inscription, also from Mysore, *Ind. Ant.*, vol. 10, p. 39, plate ; *Epi. Carn.* vol. 10 (Kōlār), Sp. 6, with plate (a better one) at translations, p. 272.

A Telugu initial *ai* of about A.D. 900 may be seen in *airiviya*, line 32, No. 9, in the Eastern Chalukya grant of the period A.D. 888-918, *ante*, vol. 5, p. 129, plate.

confusion that there was added the projecting tail to the right, which produced the form illustrated in **C.**, **D.**, and **E.** above.

**Professor Bühler's latest instances of the earlier type are as follows.** As noted in the preceding paragraph, his plate VIII, 3, II, is an *i* of **A.D. 804**, and is really a transitional form. His plate VIII, 3, III, is from the record on the Kaḍaba plates from Mysore, bearing a date in **A.D. 812 or 813**: the vowel is found fourteen times in this record: the instance figured seems to be from *iva*, line 15, No. 23 (side ii *a*, line 1), *Ind. Ant.*, vol. 12, p. 14, plate; *Epi. Carn.*, vol. 12 (Tumkūr), Gb. 61, plate. His remaining two illustrations are from the eastern parts of Southern India. The later of them, plate VIII, 3, V, is entered as if it was taken from the copper-plate record which gives the date of the coronation of Amma II in A.D. 945, *Ind. Ant.*, vol. 7, p. 15, plates: but that record does not include any initial *i*; and the illustration seems to have been supplied from *ih=aijatē*, line 40, No. 7 (side iii *b*, last line), in the 'Pāganavaram' plates or Diggubaṛṛu grant of the period **A.D. 934-45**, *Ind. Ant.*, vol. 13, p. 214, plate. On the other side, **his earliest instance of the later type** is plate VIII, 3, VI: it is from the eastern part of Southern India, from the copperplate record which gives the date of the anointment of Rājarāja I in **A.D. 1022**, and may be of any date from that year **up to about A.D. 1063**; and it appears to be the *i* of *iti*, line 11, No. 5, *Ind. Ant.*, vol. 14, p. 50, plate. **There is thus a gap in the history of the Kanarese and Telugu initial short i**, of roughly **a century**, from A.D. 934-45 to 1022-63, to be extended, in fact, as regards the Kanarese country, to even two centuries, in respect of which we have, so far, no information. We have now to see **how this gap can be bridged over.** It was chiefly due, as far as Professor Bühler was concerned, to a lack of materials in the shape of published facsimiles. The same want still exists to almost the same extent. But we can now cite various facsimiles which have been published since his time: and I can supplement them by ink-impressions which necessarily were not available to him.

We will consider first such materials as are available from **the Kanarese districts of the Bombay Presidency**; taking the matter up from the earliest instance, known to me, after Professor Bühler's latest instance of the earlier type. Here I use only records which are specifically dated; and, when I cannot refer to a published plate, I cite my details from ink-impressions which were prepared under my direction when I was in the districts in question.[1]

From these parts, we still have **the earlier type of the initial short i** running through the records of the time of the Rāshṭrakūṭa king Amōghavarsha I. We have it in the Nilgund inscription, dated in **A.D. 866**, from the Gadag tāluka, Dhārwār; *ante*, vol. 6, p. 102, plate; in *iti*, line 6, No. 17: it occurs also in *idan=* towards the end of line 28, to which part of the record, however, the plate does not extend. We have it again in the Sirūr inscription of the **same date**, from the Nawalgund tāluka, Dhārwār; *ante*, vol. 7, p. 206, plate; in *iti*, line 4, No. 6, and *iḷnūrvvoruṁ*, line 20, No. 13: the illustration **A.** on p. 7 above is from the latter instance. Again in an unpublished inscription, dated in **A.D. 872 or 874**, at Chiñchli in the Gadag tāluka; in *indapayyaṁ* and *int=ī*, line 4. Again in an unpublished inscription, dated in **A.D. 874**, at Rōṇ, the head-quarters of the Rōṇ tāluka in the same district; in *idan=*, line 10: also in the same word in line 4 of a second record, not dated, below that one. And again in the **Niḍagundi** inscription of **A.D. 874-75**, or within a year on either side, from the Baṅkāpūr tāluka, Dhārwār; *ante*, vol. 7, p. 213, plate; in *idam*, line 16, No. 13, in *idan=*, line 17, No. 12, and in *i* (for *ī*) *kallaṁ*, line 19, No. 8: also in *i* (for *ī*) *ṭānamaṁ* in line 25 in the supplementary record at the top of the stone, not shown in the plate. And for the next reign, that of Kṛishṇa II, we

[1] I have abstained from quoting a few records which are of doubtful authenticity: and it has of course been useless to quote records which refer themselves to (for instance) the reign of a Kannaradēva or Kannaravallabha, without anything to indicate which king Kṛishṇa is intended. But I have not found in any of them anything that conflicts in any way whatsoever with the facts and results which I bring forward.

have it in an unpublished inscription, dated in **A.D. 897-98**, at the village Chiñchli mentioned above; in *iti*, line 7, and *idaṁ*, lines 14 and 17.

On the other hand, we have the **later type** in an unpublished fragmentary inscription of the same reign, of Kṛishṇa II, dated in **A.D. 901-2**, at Yeli-Śirūr in the Gadag tāluka, Dhārwār; in *irppatta*, line 1: here the precise form is a lop-sided one, very much like that which we have in *ity=*, line 41, No. 12, in the Ṭēki plates of A.D. 1086-87 from the eastern side of Southern India, *ante*, vol. 6, p. 339, plate. And the later type is found again in the Nandwāḍige inscription of the same reign, dated in **A.D. 903**, from the Hungund tāluka, Bijāpūr; *Ind. Ant.*, vol. 12, p. 221, with plate in vol. 11, p. 127; in *irppatt-*, line 2, No. 1. These two cases are the **earliest instances of the later type** that I can cite from either the western or the eastern parts of Southern India: but they are run close by an instance of A.D. 909-10 from the Kōlār District, Mysore (see p. 12 below).

The next record takes us back to the **earlier type**: it is the Hattī-Mattūr inscription of the time of Indra III, dated in **A.D. 916-17**, from the Karajgi tāluka, Dhārwār; *Ind. Ant.*, vol. 12, p. 224 (no plate): here we have the earlier type, in a thoroughly archaic form, in *idaṁ*, line 10, and *i* (for *i*) *stitiyan=*, line 11. Regarding the second inscription on the same stone, see lower down on this page.

The next records take us on again to the **later type**. One is the unpublished Kalas inscription of the time of Gōvinda IV, dated in **A.D. 930**, from the Baṅkāpūr tāluka, Dhārwār, noticed *ante*, vol. 6, p. 177: here we have the vowel in the later type in *idan=*, line 73. The others are records of the time of Kṛishṇa III. Here we have the later type in the unpublished inscription, dated in **A.D. 942**, at Rōṇ, Dhārwār District, noticed in *Ind. Ant.*, vol. 30, p. 262; in *i*[*du*], or some such word, in the last line but one. Again in an unpublished inscription, dated in **A.D. 946**, at Tuppada-Kurahaṭṭi in the Nawalgund tāluka, Dhārwār; in *idarke*, line 16, in *int=ī keygaṁ* and *idaṁ*, line 20, and in *idan=*, line 23. And again in the Soraṭūr inscription of **A.D. 951**, from the Gadag tāluka, Dhārwār; *Ind. Ant.*, vol. 12, p. 257 (no plate); in *idan=*, line 20.

On the other hand, the **earlier type** is presented again in the unpublished Chiñchli inscription of the same reign, dated in **A.D. 953**, from the Gadag tāluka, Dhārwār, noticed *ante*, vol. 6, p. 83; in *idarke* or *ivarke*, line 29.

We next have the **later type** again in the unpublished inscription of **A.D. 967, 970, or 971**, of the time of Khoṭṭiga, at Hirē-Handigōḷ in the Gadag tāluka, Dhārwār, noticed *ante*, vol. 6, p. 180; in *int=appavaṁ*, line 20.

But the **earlier type** appears again in an unpublished inscription of the same reign, dated in **A.D. 969**, at Nāgāvi in the same tāluka, noticed *ante*, vol. 6, p. 180, and *Dyn. Kan. Distrs.*, p. 422, note 3; in *ivarke* or *idarke* in the last line but five.

For the time of the last Rāshṭrakūṭa king, Kakka II, I cannot cite any instance of the use of this initial vowel. The next available record is one in which we find **the two types mixed**, just as in the Dēvagēri inscription. It is the inscription of **A.D. 975** from Hebbāḷ, in the Lakshmēshwar subdivision of the Miraj State within the limits of the Dhārwār District; *ante*, vol. 4, p. 351 (no plate): here we have the later type in *irppattu*, line 35; but in *int=iy=ayvar=*, line 38, we have the earlier type, with the sides of the top brought down to the lower line of the writing, and with omission of the two circles or dots of the lower part of the letter.[1] And we may note that we have **the same mixture of types** in the undated inscription which lies below the Hattī-Mattūr record of A.D. 916-17 (mentioned above) from the Karajgi tāluka, Dhārwār; *Ind. Ant.*, vol. 12, p. 224 (no plate): here we have the later type in *int=ivar=*, line 15, and in

[1] For similar instances from the eastern parts of Southern India, see pp. 15, 16, below.

*idaṁ*, line 17; but in *idan=*, line 19, we have the earlier type, and again with prolongation of the sides of the top down to the lower line of the writing, together with omission of the two circles or dots of the lower part. It thus now seems that, in spite of a somewhat marked difference in the general appearance of the characters, this second record at Hatti-Mattūr cannot be placed as late as I thought when I edited it, but must be referred to not long after A.D. 975.

The two cases mentioned in the preceding paragraph are the latest instances, that I can cite, of the use of the earlier type of the initial *i* in the Kanarese districts of Bombay. The next available records all show the fully developed later type. The first is the unpublished inscription of the time of the Western Chālukya king Taila II, dated in **A.D. 980**, at Sogal in the Parasgaḍ tāluka, Belgaum, mentioned in *Dyn. Kan. Distrs.*, p. 428: here we have the vowel in *i* (for *ī*) *dharmmaman=*, line 2 from the end. The next is the inscription of the same reign, dated six months later in the same year, at Saundatti, the head-quarters of the Parasgaḍ tāluka; *Jour. Bo. Br. R. As. Soc.*, vol. 10, p. 204 (no plate): here we have the vowel in *int=initu*, line 46, illustrated as D. on p. 8 above. The next is the unpublished inscription of the time of Iṛivabeḍaṅga-Satyāśraya, dated in **A.D. 1002**, at Gadag, the head-quarters of the Gadag tāluka, Dhārwār, mentioned in *Ind. Ant.*, vol. 2, p. 297, No. 3 (where the date has been wrongly shown as Śaka-saṁvat 984, instead of 924): here we have the vowel in *int=ivaṛiṁ*, line 6 from the end. It seems unnecessary to pursue the matter beyond this point: in every other instance from the Bombay districts, known to me, only the later type is found.

We now take the matter up for **Mysore and Coorg**; starting, again, with the earliest instance, known to me, after Professor Bühler's latest instance of the earlier type, and using chiefly records which are specifically dated, but also a few which can be distinctly referred to well-ascertained periods. Here, when I cannot point to published plates, I cite my details from ink-impressions for which I am indebted to Professor Hultzsch and Mr. H. Krishna Sastri.

From these parts, we have the **earlier type of the initial short i** in an inscription dated in **A.D. 878-79** at Baragūr in the Tumkūr District; *Epi. Carn.*, vol. 12, Si. 38 (no plate); in *int=ā*, east face, line 1. Again in the Biḷiūr inscription, dated in **A.D. 888**, from Coorg; *Ind. Ant.*, vol. 6, p. 102, No. 2, plate; *Epi. Carn.*, vol. 1, p. 5 (no plate); in *idarkke*, line 10, No. 14, and line 11, No. 13, and in *idan=*, line 11, No. 18. Again in an inscription of about **A.D. 891-92** (see *ante*, vol. 6, p. 68) at Kyātanahaḷḷi in the Mysore District; *Epi. Carn.*, vol. 3, Sr. 147, plate; in *idan=*, line 15, No. 1. Again in an inscription dated in **A.D. 904** at Bētamaṅgala in the Kōlār District; *Epi. Carn.*, vol. 10, Bp. 1 (no plate); in *ippatt-*, line 3, in *ivage* (?), line 14, and in *idan=*, line 15: here, in the second instance, the right side of the upper part of the letter is continued down to the right component of the lower part, giving a transitional form mentioned on p. 9 above. Again in an inscription dated in **A.D. 907** at Tāyalūr in the Mysore District; *Epi. Carn.*, vol. 3, Md. 14, with plate; in *idan=*, line 12, the last *akshara* but one, in *idarkke*, line 14, No. 18, and in *inibara*, line 15, No. 17: in these three cases the two circles or dots forming the lower part of the letter are absent; but that is probably due to the person who prepared the lithograph (which is not a facsimile), rather than to the writer or the engraver. And again in the Bēgūr inscription of the Gaṅga prince Ereyappa, of the period about **A.D. 908 to 938**, from the Bangalore District; *ante*, vol. 6, p. 48, plate; *Epi. Carn.*, vol. 9, frontispiece; in *irugaṅge*, line 5, No. 22, in *iggalūru*, line 8, No. 4, and in *inituma*[*ṁ*], line 15, No. 4: the first of these instances is given as illustration B. on p. 7 above.

In Mysore and Coorg, I find the **later type** first in an inscription, dated in **A.D. 909-10**, at Maṇigaṭṭu-Gollahaḷḷi in the Kōlār District; *Epi. Carn.*, vol. 10, Mb. 229 (no plate): here we have the vowel in *ire*, line 4, and *inpara*, line 7, in a form resembling illustration D. on p. 8 above, but not shaped in so slanting a fashion, and made with the looped part smaller in proportion; it resembles more closely, in fact, the instance of A.D. 961-62 mentioned farther on.

This is the earliest instance but two, known to me, of the occurrence of the later type: the earlier instances are those of A.D. 901-2 and 903 from the Dhārwār and Bījāpūr Districts, Bombay, mentioned on p. 11 above. If this instance came from the north of Mysore, it would be quite intelligible. But it comes from a part where we do not trace the later type again till A.D. 1029-30, and where we find indications of a transitional position even after that time (see p. 14 below). It is therefore peculiar. And we can only regard it as intrusive, and conjecture that the writer of this record was not a local man, but came from some territory where the later type of the vowel was well established. The explanation is perhaps to be found in the fact that the record, which comes from the Bairakūr hōbḷi in the north-east quarter of the Mulbāgal tālnka, near the boundary of the North Arcot District, Madras, is a Bāṇa record: we know that the territory of the Bāṇa princes of this period extended at least well into North Arcot.

We are taken back to the earlier type by the next available record, an inscription of the time of the Rāshṭrakūṭa king Gōvinda IV, dated in A.D. 930-31, at Nandiguḍi in the Chitaldroog District; *Epi. Carn.*, vol. 11, Dg. 119, plate; here we have the vowel in *idan=*, line 8, No. 9. We have it again in an inscription dated in A.D. 942 at Hēmāvatī in the Anantapur District; *Epi. Carn.*, vol. 12, Si. 28;[1] in *iṟiva*, line 29, and *int=ivar*, line 53. And again in an inscription dated in A.D. 944-45 at Bētamaṅgala in the Kōlār District; *Epi. Carn.*, vol. 10, Bp. 2 (no plate); in *idan=*, line 12: here the components of the lower part of the letter were perhaps omitted.

The next record comes from the northern part of Mysore, and gives us a second instance of the later type; namely, an inscription dated in A.D. 961-62 on the Jaṭṭiṅga-Rāmēśvara hill in the Chitaldroog District; *Epi. Carn.*, vol. 11, Mk. 27, with plate at texts, p. 142: here we have the vowel in *idaṟa*, line 5, No. 1.

In the south, however, we have the earlier type again in the epitaph of the Gaṅga prince Noḷambântaka-Mārasiṁha, framed in A.D. 975, at Śravaṇa-Belgoḷa in the Hassan District; *ante*, vol. 5, p. 178, plate; in *ity=*, line 50, No. 1, and *intu*, line 100, No. 1: here, in both cases, both the sides of the upper part of the letter were continued down to the components of the lower part. We have it again in the Peggu-ūr inscription dated in A.D. 978, from Coorg; *Ind. Ant.*, vol. 6, p. 102, No. 1, plate; *Epi. Carn.*, vol. 1, p. 7, plate; in *idan=*, line 18, No. 1. And again in the Śravaṇa-Belgoḷa epitaph of the Rāshṭrakūṭa prince Indra IV, dated in A.D. 982, from the Hassan District; *Epi. Carn.*, vol. 2, p. 53 (no plate); in *iṟiyalk=*, north face, line 15, and *irade*, south face, line 31: here in the first case, the lower component consists quite exceptionally, of three (instead of two) circles.[2]

I cannot cite any use of the earlier type in Mysore after that date. From about half-way down the western side of the province, we have the fully developed later type in the Chikmagaḷūr inscription, which belongs to the period A.D. 989—1005, from the Kaḍūr District; *ante*, vol. 8, p. 58 (no plate); *Epi. Carn.*, vol. 6, Cm. 3 (no plate: I cite the form from the photograph from which I edited the record); in *iṇṇūṟu* (for *innūṟu*), line 9, in *int=ivar=* and *i* (for *ī*) *koḍaṅgeyaṁ*, line 12, and in *indavūrada*, line 16. And the next two citable records from the northern parts (beyond which we need not pursue the matter for that locality) present the same type. One is an inscription of the time of the Western Chālukya king Jayasiṁha II, dated in A.D. 1035, at Beḷagāmi in the Shimoga District; *Epi. Carn.*, vol. 7, Śk. 126, plate; see, more clearly, the photograph in *Pāli, Sanskrit*, and *Old-Canarese Inscriptions*, No. 155: here we have the vowel in *iṁt=ī*, line 23, No. 5, and in *int=ī*, line 32, No. 4. The other is the inscription

[1] A plate is given *op. cit.*, translations, p. 92; but it shows only the first seventeen lines of the record. In line 14 we have, not *indrō* as given in the published text in Roman characters, but *indrō*, with the long *ī* by mistake for the short vowel, as given in the text in Kanarese characters.

[2] In line 25 of the north face, at the beginning of verse 6, the original seems distinctly to have *dhiṟu*, as given in the text in Kanarese characters. At any rate, the word is not *iṟu*, as given in the romanized text.

of the time of the Western Chālukya prince Vishṇuvardhana-Vijayāditya, dated in **A.D. 1064**, on the Jaṭṭiṅga-Rāmēśvara hill in the Chitaldroog District; *ante*, vol. 4, p. 213, plate; *Epi. Carn.*, vol. 11, Mk. 29, with plate at texts, p. 130: here we have the vowel in *ivu*, line 25, No. 4, and in *i* (for *i*) *dharmmaman=*, line 26, No. 3, from the end: the illustration E. on p. 8 above is from the first of these two instances.

The northern parts of Mysore, however, the Shimoga and Chitaldroog Districts, were subjected to progressive influences, first under the Rāshṭrakūṭa kings and then under the Western Chālukyas, which did not penetrate much beyond them. In the south, I trace the later type again, for the first time after A.D. 909-10 (p. 12 above), in the Chōḷa inscription, dated in **A.D. 1029-30**, at Sōladēvanahaḷḷi in the Bangalore District; *Epi. Carn.*, vol. 9, Nl. 1, with plate at translations, p. 28; in *idarkke*, line 14, No. 11: here the letter is formed in a very exceptional manner; the end of it is curled over inside the down-stroke on the right, instead of being carried on to that stroke or across it into the usual tail. We perhaps have the later type, fully formed, in the Chōḷa inscription, dated in **A.D. 1032** (see *ante*, vol. 4, p. 69), at Suttūru in the Mysore District; *Epi. Carn.*, vol. 3, Nj. 164 (no plate): here, in the last line, we seem to have either *desey=akkhaṇḍuga*, corrected into *dese ikkhaṇḍuga*, or else *dese ikkhaṇḍuga*, corrected into *desey=akkhaṇḍuga* for *desey=ikkhaṇḍuga*. And we certainly have a form of the later type in the Chōḷa inscription, dated in **A.D. 1047-48**, at Miṇḍigal in the Kōlār District; *ante*, vol. 5, p. 207, plate; *Epi. Carn.*, vol. 10, Ct. 30 (no plate); in *iy=ūra* (for *iy=ūra*), line 12, No. 7, and in *i* (for *i*) *dammavan*, line 16, the last *akshara*: here, in both cases, the form is practically identical with that which I have given as a transitional form in the illustration H. on p. 9 above; the loop of the lower part stops short at the down-stroke on the right, instead of being carried across that stroke and on to form the usual tail. These two instances of A.D. 1029-30 and 1047-48 are suggestive that for an appreciable time after A.D. 982 the letter was still in a transitional stage in the southern and south-eastern parts, and that, when more materials are available, we may find the earlier type still in use there up to about A.D. 1000. Good specimens of the later type in its full form, from the southern part of the province, may be seen in two records, dated in **A.D. 1117**, from Bēlūr in the Hassan District; *Epi. Carn.*, vol. 5, Bl. 58, plate; in *ity=atō*, line 2, No. 7 from the end, and in *inan=*, line 13, No. 57: and *ibid.*, Bl. 71, plate; in *ity=atō*, line 10, No. 6. But it was, of course, well established everywhere long before that time.

Coming now to sum up the inquiry, we find the position to be as follows. In the Kanarese districts of Bombay, we have the earlier type of the initial short *i* still in use up to at least A.D. 975. But the later type figures freely along with it from A.D. 901-2. For this part of the country, then, we may consider that the tenth century was a transitional period of usage, when the later type, though well established, had not yet superseded the earlier one, but both of them were accepted on equal terms. And in these circumstances we feel no surprise at finding the two types occasionally used together in one and the same record: in the Dēvagēri inscription, which we refer to A.D. 958; in the Hebbāḷ inscription, which is dated in A.D. 975; and in the undated inscription at Hatti-Mattūr. As regards Mysore, with Coorg, we must separate the northern parts from the southern. In the north, the case was probably much the same as in the Bombay districts, though we have not, so far, actually traced the later type there before A.D. 961-62. And, as we find the later type half-way down the western side of the province between A.D. 989 and 1005, we may expect to meet with it anywhere from about A.D. 1000. In the south, however, the change was plainly slower. We have not, indeed, actually traced the use of the earlier type there after A.D. 982. But the later type is found there only once before that time; in an instance of A.D. 939-10 which we can only regard as intrusive. And the records of A.D. 1029-30 and 1047-48 suggest that the commencement of the period of transitional usage in the south can hardly be placed

much, if at all, before A.D. 975, and that we may yet meet with instances of the earlier type there running well into the eleventh century.

We turn now to the eastern parts of Southern India, taking the matter up from the records of the Eastern Chalukya kings, in which series, again, we now have available various inscriptions, presenting the vowel in question and covering the period in which we are interested, which were not known to Professor Bühler.[1] There are two records of this series which I have not been able to examine: namely, the Eḍeru plates or Goṇṭūru grant of Amma I, of the period A.D. 918-25, *South-Ind. Inscrs.*, vol. 1, p. 39 (no plate), where we have the vowel twice, in lines 38, 54; and the Nandamapūṇḍi grant of Rājarāja I, dated in his thirty-second year, A.D. 1053-54, *ante*, vol. 4, p. 303 (no plate): here the vowel occurs twelve times, in lines 10, 55, 72, 75, 80—87. Setting them aside, from an examination, either in the published plates or in ink-impressions, of all the other records of the whole series down to A.D. 1143, I find the position to be as follows:—

The record on the (?) Masulipatam plates, the Ṭraṇḍaparu grant, of Vijayāditya III, of the period A.D. 844-88, *Epi. Ind.*, vol. 5, p. 123, with plate showing lines 1 to 15 and 26 to 30, contains the vowel twice, in *itthaṁ=*, line 18, and *iva*, line 35, and presents it in both cases in the earlier type, but in the transitional form with the right side of the upper part continued down to touch the right component of the lower part. The published facsimile does not include these two passages. I have given this form, from *iva*, line 35, as illustration F. on p. 9 above.

The earliest instance of the later type from this part of Southern India[2] is found in the record on the (?) Masulipatam plates, the Ākulamannaṇḍu grant, of Chālukya-Bhīma II, of the period A.D. 934-45, *ante*, vol. 5, p. 135, with a plate showing lines 1 to 8 and 17 to 25: in this record the vowel occurs only once, in *itthaṁ=*, line 22, the last *akshara* but one, given as illustration C. on p. 8 above: the upper part of it was plainly formed by two separate strokes instead of one continuous movement. The other records of the same period show the earlier type: the Diggubaṛṛu grant on the 'Pāganavaram' plates, *Ind. Ant.*, vol. 13, p. 213, with plates, has it three times, in lines 15 and 40 (see note 1 on this page); the Koḍhatalli grant on the Kolavennu plates, *South-Ind. Inscrs.*, vol. 1, p. 44 (no plates), also gives it three times, in *indur=*, line 19, *itham=* (for *itthaṁ=*), line 22, and *iti*, line 23; and in the instance in line 23 the components of the lower part of the letter were omitted, and the ends of the upper part were brought down to the bottom line of the writing.[3]

The records of the next period, the reign of Vijayāditya-Amma II, A.D. 945-70, shew only the earlier type, as follows:[4]—The Masulipatam plates or Pāmbaṛṛu grant, *ante*, vol. 5, p. 140, with a plate showing lines 1 to 8, and 17 to 24: once, in *indaṁś-*, line 25, the last *akshara* but two.[5] The Elavaṛṛu grant, *Ind. Ant.*, vol. 12, p. 91, with plates; five times, in lines

[1] His limiting instances of the two types were taken from this same series of records. His latest instance of the earlier type is that given in his plate VIII, line 3, col. V; and it seems to be the *i* of *ih=aijatē*, line 40, No. 7 (side iii *b*, last line), in the 'Pāganavaram' plates or Diggubaṛṛu grant of Chālukya-Bhīma II, of the period A.D. 934-45, *Ind. Ant.*, vol. 13, p. 213, with plates: this record presents the vowel again in *iva*, line 15, No. 14, and *iv=ātipūtam*, line 40, the last *akshara* but four. His earliest instance of the later type is that given in his plate VIII, line 3, col. VI, from the Korumelli grant, *Ind. Ant.*, vol. 14, p. 50, with plates, which gives the date of the anointment of Rājarāja I in A.D. 1022, and may be of any date from that time up to about A.D. 1063: this record presents the vowel six times, in lines 11, 47, 50, 56, 63, 103: Professor Bühler's illustration seems to be from *it i*, line 11, No. 5.

[2] For the slightly earlier instances from Bombay and Mysore, see pp. 11, 12, above.

[3] Compare similar instances in the Kaluchumbaṛṛu grant: see p. 16 below.

[4] Two of them do not present the vowel at all: the Paḍaṁkalūru grant, on plates now in the British Museum, *Ind. Ant.*, vol. 7, p. 15; and the Tāṇḍeru grant on the Vandram plates, *ante*, vol. 9, p. 138.

[5] Professor Kielhorn was in doubt as to the type of the letter here: see *loc. cit.*, p. 139, note 4. But I am able to say, from clearer impressions than those which he had, that it is certainly of the earlier type, with damage of the right component of the lower part.

39, 48, 51, 54, 55. The Guṇḍugolanu grant, on plates now in the British Museum, *Ind. Ant.*, vol. 13, p. 249, with plates: twice, in lines 20, 22. The Masulipatam plates, *South-Ind. Inscrs.*, vol. 1, p. 47 (no plate): once, in line 34. The Kaluchumbarru grant, *ante*, vol. 7, p. 185, with a plate showing lines 1 to 8, 33 to 50, and 60 to 69: three times, in *iti*, line 43, No. 17, *irrula*, line 66, No. 5, and *iḍiyāri*, the same line, No. 14; and here, in each case, the components of the lower part of the letter were omitted, and the ends of the upper part were brought down to the bottom line of the writing.[1] And the Maliyapūṇḍi grant, *ante*, vol. 9, p. 50, with plates: once, in *iva*, line 23, No. 6.

The next known record is the Ranastipūṇḍi grant of Vimalāditya, *ante*, vol. 6, p. 351, with plates. This record, which gives the date of the king's anointment in A.D. 1011, and is itself dated in his eighth year, in A.D. 1018, presents the vowel seven times, in lines 55, 66 (twice), 70, 85, 87, 97, and in the earlier type throughout.

This is the latest instance of the use of the earlier type that I can cite from either the eastern or the western parts of Southern India. In the Eastern Chalukya series, the next records are two of the time of Rājarāja I; and the order of them perhaps remains to be determined according to what we may learn from one of them about the use of this vowel. One is the Korumelli grant, *Ind. Ant.*, vol. 14, p. 50, with plates, which gives the date of the king's anointment, in A.D. 1022, and may possibly date from that year itself: it presents the later type of the vowel, six times, in lines 11, 47, 50, 56, 63, 103. The other is the Nandamapūṇḍi grant, *ante*, vol. 4, p. 303 (no plate), which also mentions the date of the anointment, but is itself dated in the thirty-second year of the reign, A.D. 1053-54; it has the vowel twelve times, in lines 10, 55, 72, 75, 86-87; and, as mentioned on p. 15 above, it remains to be examined in respect of the type which it presents.

---

## No. 2.—PALITANA PLATES OF SIMHADITYA; THE YEAR 255.

BY PROFESSOR E. HULTZSCH, PH.D.; HALLE (SAALE).

The existence of these plates was made public by the late Mr. A. M. T. Jackson, I.C.S., in the *Indian Antiquary*, Vol. XXXIX. p. 129, No. I. They belong to the State of Palitānā in Kāṭhiāvār and are reported to have been unearthed in the city of Palitānā some forty years ago. When first discovered, they were fastened together with six Maitraka grants by a single Valabhī seal and suspended by it from the roof of a small underground chamber adjoining a tank underneath a large stone. I edit the inscription on them from two sets of ink-impressions, prepared by Dr. Vogel's clerk and placed at my disposal by Rai Bahadur Venkayya, to whom Mr. W. C. Tudor Owen, I.C.S., Administrator of Palitānā, had kindly lent the originals.

These are two copper-plates, measuring, according to Mr. Venkayya, about 9¾ inches in breadth and varying between 7¼ and 7⅛ inches in height. Each of the two plates bears on its inner side 14 lines of well-preserved writing. The letters show through on the back of the plates, especially of the second one. There are two ring-holes at the bottom of the first and at the top of the second plate, but no ring or seal is forthcoming.

The alphabet is of an early Southern type and includes the signs of *jihvāmūlīya* (ll. 2, 17) and of *upadhmānīya* (ll. 9, 19, 23, 27) and final forms of *t* (l. 25) and of *n* (l. 4). The date (l. 27) is expressed in numerical symbols.

---

[1] Compare a similar instance in the Kodhatalli grant on the Kolavennu plates: see p. 15 above. For instances from the west, see pp. 11, 12, 13, above.

The rules of *sandhi* are very carefully observed, with two exceptions (ll. 3 f. and 20). The *anusvāra* is represented by *ṅ* before *ś* (l. 3) and *h* (l. 17), and the vowel *ṛi* is replaced by the syllable *ri* in *krita* (ll. 13, 26) and *krishṇa* (l. 21),[1] while the correct forms *kṛita* (l. 2) *etc.* are used in all other cases. The final *s* of *vakshas* is elided before *sthala* (l. 17) in accordance with the *Vārttika* on Pāṇini, viii, 3, 36, and consonants following *r* are doubled, with the exception of *t* in *kīrti* (l. 2) and of *bh* in *āvirbhūta* (l. 3).

The language of the inscription is Sanskṛit prose; two verses of Vyāsa are quoted near the end (ll. 24-27).

The inscription records a grant of land, made by the *Sāmanta-Mahārāja* **Siṁhāditya** (l. 17) of the **Gārulaka** family (l. 2) This order was issued from a place named **Phaṅkaprasravaṇa** (l. 1). The donee was a Brāhmaṇa of the Maitrāyaṇika school who lived at **Ēlāpadra** (l. 20 f). The object of the grant was a field with a pond in the village **Darbhachāra** (l. 21 f). I am unable to identify Phaṅkaprasravaṇa and Darbhachāra. Ēlāpadra, as Dr. Fleet suggests to me, may be 'Velwad' in the Gōdhrā tāluka, Pañch Mahāls.

The date of the grant was the 13th *tithi* of the bright fortnight of the month Āśvayuja in the year 255 (l. 27) of an era which is not specified, but which, as suggested by Mr. Jackson, is probably the Gupta-Valabhī era of A.D. 319. The specified month, then, places the record in **A.D 574.**

As stated by Mr. Jackson, the Gārulaka family is a hitherto unknown dynasty of feudatory chiefs who may be assumed to have been tributaries (*sāmanta*) of the Maitraka kings. The Gārulaka Siṁhāditya was a contemporary of Dharasēna II. of Valabhī. The name *Gārulaka* seems to stand for *Gāruḍaka* or *Gāruḍaka* and suggests that this family claimed descent from Vishṇu's bird Garuḍa. The inscription contains the following pedigree of the donor :—

*Sēnāpati* **Varāhadāsa (I.).**

*Sāmanta-Mahārāja* **Bhaṭṭiśūra.** *Sāmanta-Mahārāja* **Varāhadāsa (II.).**

*Sāmanta-Mahārāja* **Siṁhāditya** (A.D. 574).

Each of these four chiefs is praised in purely conventional terms. The only item of information which may be based on a historical fact, is the statement (l. 11 f.) that Varāhadāsa II. defeated a ruler of **Dvārakā** (on the west coast of Kāṭhiāvār), whose individual name is not recorded.

Palitana plates of the Garulaka Simhaditya. — The year 255.

E. Hultzsch.

Scale 8·5

Gebr. Pfeffner, Halle a. S.

## TRANSLATION.

(Line 1.) *Ōṁ.* Hail! From **Phaṅkaprasravaṇa.**[1] In the succession of the family of the **Gārulakas,** who subdued all enemies by (*their*) prosperity which was produced by the performance of eminent deeds; who gained decisive victories in encounters (*with their enemies*) in many hundreds of battles; (*and*) who sprang from a race adorned with the ornaments of high glory and fame,[2] —there appeared the glorious *Sēnāpati* **Varāhadāsa (I.),** whose great wealth was being lived upon by the distressed, the helpless, refugees, the sick, suppliants, and kinsmen; who invariably benefited others by granting unceasing rewards and shelter, as a tree by affording unceasing fruits and shade; who had noble aims and auspicious marks; who possessed forbearance; who destroyed his enemies; (*who was*) a receptacle of unceasing prosperity; (*and who was*) an unparalleled bridge of justice, as (*king*) Yudhishṭhira.

(L. 6.) His virtuous son (*was*) the *Sāmanta-Mahārāja* **Bhaṭṭiśūra,** whose conduct resembled that of kings like Daśaratha; who was endowed with prudence, modesty, self-restraint, compassion, liberality, cleverness, politeness, and energy; whose mind was purified by bathing in the water of the contents of the codes of law composed by Manu and others; who was brave (*or wise*); who, having subdued the multitude of enemies by his own hand (*as if he were*) dispelling the mass of darkness by his rays, (*became*) the spotless full-moon on the firmament of his family; (*and*) who was adorned with spotless virtues.

(L. 9.) His younger brother (*was*) the *Sāmanta-Mahārāja* **Varāhadāsa (II.),** who dispelled the heat of the Kali (*age*) by the stream of libations at (*his*) manifold charities which were accumulating every day; who was constantly expert in means for the acquisition of merit, wealth, and pleasure not conflicting with each other; who overcame the lord of **Dvārakā** by unchecked valour, as Śārṅgapāṇi (Kṛishṇa) possessed unchecked valour and was the lord of Dvārakā; who caused to be built many temples of the gods, halls, drinking-fountains,[3] gardens, rest-houses,[4] and (*Buddhist*) monasteries (*vihāra*); who, even in the Kali (*age*), held fast to the virtues of the Kṛita-yuga; who was excessively devoted to (*his*) elders; who assiduously afforded protection to pious men; (*and*) who knew what is remote and proximate.

(L. 14.) His son, the *Sāmanta-Mahārāja* **Siṁhāditya,** who has acquired much[5] fame, which is being sung in (*all*) the quarters of the horizon, by encountering (*his enemies*) in fierce great battles; whose epithets 'sweet, charming, noble, firm, deep, handsome, and modest' are well-known; (*and*) to whose dark, high, and broad chest the goddess of fortune is firmly and excessively attached,—being in good health, (*thus*) commands all (*people*), (*viz.*) princes (*rāja-putra*), palace-officers (*rājasthānīya*),[6] ministers, city-officers (*drāṅgika*),[7] headmen (*mahattara*), irregular soldiers,[8] spies, regular soldiers, riders on elephants or horses, *etc.* :—

(L. 19.) "Be it known to you that, in order to increase the spiritual merit of (*My*) mother and father, and in order to attain Myself welfare and happiness in both worlds, I have granted to the Brāhmaṇa Bappasvāmin residing at **Ēlāpadra,** who is a student of the Maitrāyaṇika school (*and*) belongs to the Kṛishṇātrēya *gōtra*, (*the field of*) Bhōṇḍaka-Badhira-Kuṭumbin[9] in the village **Darbhachāra,** together with a pond, according to the maxim of *bhūmichchhidra*, under the

## No. 3.—SAHETH-MAHETH PLATE OF GOVINDACHANDRA; [VIKRAMA-] SAMVAT 1156.

BY PANDIT DAYA RAM SAHNI, M.A.

Dr. Vogel has already announced the discovery of this copper-plate inscription in two articles. One of these appeared in the *Pioneer* of the 11th May, 1908, under the title of "Śrāvastī and its remains" and contains all the salient points in the history of this ancient city, derivable from the Pāli texts and the writings of modern explorers. It winds up with the statement that the present inscription conclusively settles the identification of **Sahēṭh** and **Mahēṭh** on the borders of the Gonda and Bahraich districts with the Jētavana and **Śrāvastī**, respectively, of Buddhist literature. The connection of the copper-plate with Jētavana and Śrāvastī is expressed in the most unmistakable language in the inscription engraved on it, and since the plate has been found carefully deposited in a cell of a large monastery at Sahēṭh, it was obviously intended for it. Mr. V. A. Smith, however, while referring to the plate in a footnote on page 792 of the *Journal of the Royal Asiatic Society* for July 1908, has expressed the opinion that the plate may have been brought to Sahēṭh from the real Śrāvastī which he locates somewhere near Bālāpur in Nepal Tarai, not far from the place where the Rapti leaves the hills.

The evidence in favour of the identification of Sahēṭh-Mahēṭh with Śrāvastī is set forth by Mr. Marshall in the *Journal of the Royal Asiatic Society*,[1] and here it is enough to enumerate the main facts. Foremost of these is the remarkable agreement which exists between the topography of the remains at Sahēṭh-Mahēṭh and the descriptions of Śrāvastī recorded by the Chinese pilgrims. We next come to the well-known colossal *bōdhisattva* discovered by General Cunningham on this site, which according to the Kushaṇa inscription on its pedestal was set up at Śrāvastī. A fragment of its umbrella post (*daṇḍa*) with the same inscription as that on the *bōdhisattva* has recently been brought to light by Dr. Vogel. It is now in the Lucknow Museum, but is believed originally to have been unearthed at Sahēṭh by Dr. Hoey. Then there is the inscribed copper-plate which forms the subject of this paper. And last of all we have the lower half of a life-size statue of a *bōdhisattva* which was discovered by Mr. Marshall at Sahēṭh-Mahēṭh in the year 1908-09. The pedestal of this statue bears an early Kushaṇa inscription which states that it was presented by certain Kshatriya brothers at the Jētavana of Śrāvastī. In the face of all this evidence it would be strange, indeed, if the identification of Sahēṭh-Mahēṭh remained doubtful, merely because the statements of the Chinese pilgrims about the location of Śrāvastī are somewhat incorrect.

The plate was discovered by me in a monastery (No. 21, map of Sahēṭh, Dr. Hoey's Report[2]) on the site of Sahēṭh in the spring of 1908 when I was assisting Dr. Vogel in his excavations

[1] For 1909, pp. 1066 seq.

[2] *Vide J. A. S. B.* for 1892, Part I, extra number.

there. This building was partially excavated by Dr. Hoey, and it was here that, on breaking through the paved courtyard, he found the inscribed slab published in the *Ind. Ant.* Vol. XVII, p. 61 ff.[1] Dr. Hoey also opened out seven out of the twenty-four cells which surround the courtyard in the centre and it was in one of these, namely, the one adjoining the entrance chamber on the south, that the copper-plate under reference was found. It was carefully packed in an earthen box, 2 feet square and 3 inches high externally, closed with a lid of the same material, the space between the plate and the receptacle being filled with clay. The box was built against the foundation of the northern wall of the cell referred to, just below the floor, well secured to the wall by means of brickwork on all sides.

The plate measures 18″ by 14″ and is $\frac{1}{4}$″ thick. In the centre of the upper part there is a ring-hole $\frac{5}{8}$″ in diameter. The ring was not found, nor the seal which must have surmounted it.[2] The plate is inscribed on one side only and contains 27 lines of writing in a perfect state of preservation. The characters are **Nāgarī** and the language **Sanskṛit** throughout. In respect of **orthography**, the following points may be noted. The letter *b* is denoted by the sign for *v* throughout. The doubling of consonants before and after *r* occurs in lines 4 (twice), 5, 16 (twice), 17, 18 (twice), 19 (twice), 22 (twice), 23, 24 (thrice), and 27. The horizontal top stroke (*mātrā*) which elsewhere distinguishes the letters *v* and *l* from *dh* and *n*, respectively, is, in a few cases, also found in the latter. Omissions of letters are supplied by the insertion of the corresponding signs immediately above or below their original places: *cf. ra* in *Turashka* in line 21 and *bha* in *bhadrāsanaṁ* in line 23. A rough figure of Garuḍa is engraved once at the end of the 11th line and again in the last line before the words *maṁgalaṁ mahā-śrīḥ*.

The inscription begins, like all the other epigraphs of the **Gāhaḍavāla** king **Govindachandra** that have so far come to light, with nine verses in different metres containing his genealogy, and ends with seven benedictive and imprecatory verses and an eighth which supplies the name of the engraver. The formal portion is contained in the rest of the epigraph and is, as usual, in prose. I have given the full text of the inscription, but omitted from the translation the first nine verses, because they are paraphrased in the prose passage following them, and the next seven which contain the usual admonitions to future kings. The **taxes** specified (line 21) as due to the donees are the *bhāgabhōgakara*, the *pravaṇikara*, and the *Turushkadaṇḍa*.[3] The last named tax figures only in the records of three other kings of the Gāhaḍavāla dynasty, namely, the Chandrāvati plate of Govindachandra's grandfather, Chandradēva;[4] the inscription issued by Govindachandra himself on behalf of his father Madanapāla;[5] and a plate of Vijayachandra and the *Yuvarāja* Jayachchandra.[6]

In respect of the localities mentioned in the record, it is gratifying to note that some of them can be identified beyond all possibility of doubt. The other places have, in all probability, gone out of existence. One of these latter is **Vihāra**, the first of the six villages granted. It is said to have been situated in the district of what appears to be **Vāḍā-chaturaśīti**.[7] There is a comparatively large village called **Bāja Jōt** or the Holy Bāja, about 2 miles west of Sahēṭh. I am inclined to think that Vāḍā may possibly be a mistake for Bāja. The next village **Paṭṭaṇā** is situated about 3 miles south-west of Sahēṭh or about 2 miles south of

[1] [It is worthy of note that the slab was found "in a stratum which indicated that it had been placed in a restored building;" see also the following note.—Ed.]

[2] [The absence of the ring and seal would show that the plate must have had a history of its own before it came to be deposited at the spot where it has now been discovered.—Ed.]

[3] For an explanation of *turushkadaṇḍa*, see above, Vol. IX, p. 321.

[4] Above, Vol. IX, p. 305, text line 15.

[5] *Ind. Ant.* Vol. XVIII, p. 17, text line 21. [6] Above, Vol. IV, p. 120, text lines 22-23.

[7] [It is not unlikely that all the six villages granted by the king were situated in the district of Vāḍā-chaturaśīti.—Ed.]

Kaṭṛā on the road leading to Khargupur Bāzār and is now called Paṭnā. There is a mass of ancient remains near the village and the peasants have discovered a few old wells which they use for the irrigation of their fields. The village of **Upalaüṇḍā** I cannot identify. The fourth village is called **Vavvahalī** in the plate. This is presumably now represented by Bēlahā situated near the village of Paṭnā. The villagers say that it is ancient. The next place is "**Ghōsāḍī** attached to **Mēyī**." Ghōsāḍī does not exist; but Mēyī is still an important village near Subhāgpur on the Gonda-Intiathok road. The last village is "**Payāsi** belonging to **Pōṭhīvāra**." This I identify with a village of the name of Bayāsi which formerly stood 2 *kōs* to north-east of Sahēṭh-Mahēṭh, but was washed away by the Rapti some years ago. Its site is still known by the name of Bayāsi.

[In line 19 f. the Buddhist ascetic **Śākyarakshita** is said to have been a native of **Utkala**, *i.e.* **Orissa**, and his disciple **Vāgīśvararakshita** belonged to the **Chōḍa** country. The date of the inscription, *viz.* Vikrama-Saṁvat 1186, corresponds to A.D. 1128-9, which falls into the reign of the Chōḷa king **Vikrama-Chōḷa**. The Gāhaḍavāla kings of Kanauj appear to have been on friendly terms with the Chōḷas of Tanjore[1] whose dominions extended into the Northern Circars during the reigns of **Kulōttuṅga I.** and **Vikrama-Chōḷa**. It is not certain if Vāgīśvararakshita came from the Tamil country or from the vicinity of **Amarāvatī** which was included in the dominions of the Chōḷa king at the time. We know very little of the history of Buddhism in the Tamil country. But there is no doubt that there were adherents of that creed down to the 13th century A.D. in the country round Amarāvatī in the Guntur District. Besides, **Kumaradēvī**, the Buddhist queen of Gōvindachandra, was the daughter of a chief of **Pīṭhī**. And Dr. Konow says it is possible to identify Pīṭhī with **Piṭhāpuram** in the modern Godavari District of the Madras Presidency.[2] If this be the case, it is no matter for surprise that the two Buddhist ascetics who pleased Gōvindachandra were natives of Orissa and the Chōḍa country. Probably they were introduced to the king by his queen Kumaradēvī, who probably brought about, either directly or indirectly, the gift recorded in the subjoined inscription. The sentence *punar api śāsanīkṛitya grāmā imē shaḍ api dattā* "these six villages were given again by a charter" implies that these villages had originally been granted to the Buddhist *vihāra* at Jētavana, but, for some reason or other, resumed subsequently. At **Sārnāth**, queen Kumaradēvī restored the "lord of the turning of the wheel" and erected a *vihāra* for his accommodation. It is not impossible that the same queen also infused fresh life into the Buddhist establishment at Jētavana by sending for the two Buddhist ascetics and inducing the king to restore the six villages which once belonged to the *vihāra*.—Ed.]

## TRANSLATION.

(Lines 9 to 22.)

That victorious and glorious king, the *Paramabhaṭṭāraka Mahārājādhirāja Paramēśvara Paramamāhēśvara* **Gōvindachandradēva**,—whose feet are honoured by the entire circle of kings; who is (*another*) Vāchaspati in investigating the various sciences; who is the lord of the three kings, *viz.* the *aśvapati* (lord of horses), the *gajapati* (lord of elephants) and the *narapati* (lord of men); who meditates on the feet of the illustrious *P. M. P. P.* **Madanapāladēva**, who (in his turn) meditated on the feet of the illustrious *P. M. P. P.* **Chandradēva**, who acquired the sovereignty over **Kanyakubja** by (the strength of) his own arms,— orders, informs and commands all the people assembled, residing in the villages of **Vihāra** in the district (?) of **Vāḍā-chaturaśīti**, of **Paṭṭaṇā**, **Upalaüṇḍā**, **Vavvahalī**, **Ghōsāḍī** attached to **Mēyī** and of **Payāsi** attached to **Pōṭhivāra**, as well as the kings, queens, heirs-apparent, ministers, priests, door-keepers, generals, treasurers, record-keepers, physicians, astrologers, chamberlains, messengers, and officers charged with the care of elephants, horses, towns, mines (?) *sthānas* and *gōkulas* in the following manner :—

"Be it known to you, that, having been gratified by the *Saugata-parivrājaka*, the *mahāpaṇḍita* **Śākyarakshita**, (a resident) of the **Utkala** country, and his disciple, the *Saugata-parivrājaka*, the *mahāpaṇḍita* **Vāgīśvararakshita**, (a resident) of the **Chōḍa** country, I have to-day,—on a **Monday, the pūrṇimā tithi of the month of Āshāḍha**, (the moon being) in the **Pūrvāshāḍhā** *nakshatra* in the **year comprising eleven hundred increased by eighty-six**, also in **figures Saṁvat 1186, Āshāḍha sudi 15, Monday**,— after bathing in the **Ganges**, at the holy **Vārāṇasī**; propitiating the sacred texts, divinities,[3] sages, men, beings and the group of deceased ancestors; adoring the sun, whose lustre can dispel heaps of darkness; worshipping the moon-crested (Śiva); worshipping Vāsudēva, the protector of the three worlds; and after offering to (the god of) fire an oblation rich in milk-rice, bestowed again[4] by a charter for the enhancement of the merit and fame of my parents and of myself, by (pouring) from the palm of my hand water sanctified by the *gōkarṇa* and the *kuśa*

[1] [The sign of *avagraha* is inserted in the original between the aksharas *yā* and *li*.—Ed.]

[2] [Each of these vertical strokes is preceded by a symbol which looks like the letter ध found in this inscription. —Ed.]

[3] See *Ind. Ant.* Vol. XV. p. 10, note 55.

[4] I do not understand the force of the word "again" (*punarapi*) here. This would seem to signify that the king was only renewing an older grant of his.

*grass*,[1] with a great satisfaction of the heart, for enjoyment in the manner of other convents for (as long as) the moon and the sun (endure), the six villages named above, together with water and dry land, mines of iron and salt, repositories (*i.e.* ponds) of fish, *pallīkaras*, pits and deserts up to and including gardens of *madhūka* and mango (trees), parks, bushes, grass and pasture lands up to their proper limits clearly defined by their four boundaries, with the elevations and depressions, upon the most respectable community (*saṁgha*) of Buddhist friars (*Śākyabhikshu*) of whom **Buddhabhaṭṭāraka** is the chief, residing in the great convent of the Holy Jētavana. Bearing (this) in mind, and being ready to listen to (our) commands you should (*continue to*) give (to the donees) the *bhāgabhōgakara*, the *pravaṇikara*, the *Turushkadaṇḍa* and all the other sources of income that are due."

[Lines 22—26 contain seven imprecatory and benedictory verses.]

(L. 27.) Under the orders of the glorious king Gōvindachandra, this grant was written by the Kāyastha **Surāditya**, who is proficient in all *śāstras*. Good luck (and) great prosperity!

---

## No. 4.—THE CHAHAMANAS OF MARWAR.

BY D. R. BHANDARKAR, M.A.; POONA.

In his paper on "The Chāhamānas of Naddūla" the late Professor Kielhorn has edited the Sūndhā hill inscription of Chāchigadēva[2] which helps to determine the order of succession and the relationship of the various princes, whose inscriptions had been published, but whose connection with one another had long remained unknown. We are now aware that they were all of the **Chāhamāna** dynasty. But there were several families of the Chāhamānas that reigned in Rājputānā. It was, therefore, necessary to distinguish the line that ruled over Mārwār from other branches ruling elsewhere. And Professor Kielhorn chose to group them together under the title "the Chāhamānas of Naddūla." But some of these Chāhamānas reigned at **Naddūla (Nāḍol)**, and some at **Jābālipura (Jālor)**. Strictly speaking, they should, therefore, have been called "the Chāhamānas of Naddūla and Jābālipura." The descendants of the former are called **Nāḍōliās**, and of the latter **Sōnagarās**. Again, at **Sānchōr**, inscriptions are found of a Chāhamāna prince who seems to be neither a Nāḍōliā nor a Sōnagarā, but rather a Sānchōrā, another subdivision of the Chōhāns. Under such circumstances, it is best to designate these Chōhāns as "the Chāhamānas of Mārwār."

The subjoined inscriptions were discovered during the two tours undertaken by me in 1907-08 and 1908-09 in the southern and south-eastern parts of Mārwār, and this paper is really a supplement to that of Professor Kielhorn, without which it would not have been possible to make my article interesting.

### I AND II.—SĀDAḌĪ AND NĀḌŌL INSCRIPTIONS OF JŌJALADĒVA; [VIKRAMA-] SAṀVAT 1147.[3]

The first of these inscriptions was found at **Sādaḍī**, and the second at **Nāḍōl**, both in the Dēsūrī District, Gōḍvāḍ Division, Jodhpur State. The former is engraved on a pillar in the temple of **Jāgēśvara**, but as all the materials of this temple are said to have been brought from ruins elsewhere, it is clear that the inscription did not originally belong to Sādaḍī. It contains

[1] See *Ind. Ant.* Vol. XV. p. 10, note 57.

[2] Above, Vol. IX. p. 70.

[3] [For short notices of these two records see above, Vol. IX. p. 158 f.—Ed.]

11 lines of writing, which cover a space of $8\frac{1}{4}$" broad by $6\frac{3}{4}$" high. The second inscription is incised on a pillar in the temple of Sōmēśvara, and bears 13 lines of writing which cover a space of $8\frac{1}{4}$" broad by $9\frac{1}{4}$" high. The letters of the first are deeply cut, and, excepting two or three *aksharas* at the beginning of lines 8-10, the record is well preserved. The second is weather-worn and has not yielded satisfactory impressions. The whole of it, however, is intact. The characters are Nāgarī. The language is Sanskṛit, and both the inscriptions are in prose. In respect of orthography, it is sufficient to state that the letters *b* and *v* are both denoted by the sign for *v*. Of words unknown or rarely employed, we may note the following: (1) *yātrā*, (2) *satka*, (3) *vaḍaharaka*, (4) *śūlapīla*, and (5) *pramadākula*. *Yātrā* is a festival which is held on different days for different gods.[1] The word is frequently met with in the Bhinmāl inscriptions. *Satka* of course means "belonging to," and, though foreign to classical Sanskṛit literature, is found in later inscriptions and in Jaina literature. *Vaḍaharaka*, I think, is the Sanskṛitised form of the Mārwārī word *baḍerō*, meaning "an old man." The word *śūlapāla*, which occurs only in No. II, is given in Monier-Williams' Dictionary to mean "the keeper of a brothel or frequenter of brothels," but the sense intended here seems to be that of "associates of courtezans, who accompany them on musical instruments while singing or dancing." *Pramadākula* means obviously a host of courtezans, and is used in this sense also in the Bhinmāl inscriptions.

The contents of both the inscriptions are almost identical. They are dated on Wednesday, the second of the bright half of Vaiśākha in the [Vikrama-] year 1147 and refer themselves to the reign of Jōjaladēva, who, in No. I, is styled *Mahārāja* and, in No. II, *Mahārājādhirāja*. They lay down the order of the king with regard to the management of festivals in connection with all the gods, such as Lakshmaṇasvāmin and others. The order is that when the festival of any particular god commences, the courtezans attached to the temples of the other gods must also put on their ornaments and best garments and attend with their *śūlapālas* to celebrate it by instrumental music, dancing, singing, and so forth. Jōjaladēva goes even to the extent of conjuring his descendants and other princes to keep the festivals of all the gods going in this manner, and warns them by adding that he, who, at the time of a festival, attempts to abolish this practice, be he an ascetic, an old person, or a learned man, should be prevented from doing so by the reigning ruler. The inscription ends with a curse on those princes who will not maintain this practice.

In the temple of Jāgēśvara at Sādaḍī, where No. I was engraved on a pillar, other inscriptions also are found, but incised on another pillar of exactly the same style. From them it is clear that the temple of Lakshmaṇasvāmin was at Naḍūla, *i.e.* Nāḍōl. Again, in order that the festival of one god may be celebrated by courtezans attached to other temples, all the temples must be in one and the same town, *i.e.* in Nāḍōl. The name of the god Lakshmaṇasvāmin suggests that he was so called after Lakshmaṇa, the founder of the Mārwār branch of the Chōhāns.

## III.—SĒVĀḌĪ STONE INSCRIPTION OF AŚVARĀJA; [VIKRAMA-]SAṂVAT 1167.

This inscription is incised on the lintel of the door of a subsidiary shrine in the front corridor of the temple of Mahāvīra at Sōvāḍī, a village about 5 miles to the south-east of Bālī, the principal town of the district of the same name, Gōḍvāḍ Division. It contains 3 lines, and the writing covers a space of 3′ 6″ broad by 2¼″ high. The inscription is, on the whole,

[1] Restore वडहरको. [2] Supply राज्ञा.
[3] The *akshara* न is entered below the line and is different from the other *n*'s in the inscription.
[4] From the original stone. [5] Expressed by a symbol. [6] Read सुव°.
[7] There is a break in the middle of the vertical line which denotes the ā of *trā*.
[8] Read निग्रहः

well preserved. The characters are **Nāgarī**. The sign for *ḍ* is worthy of note (*e.g.* in Padrāḍā, Chhēchhaḍiyā, and so forth), and occurs in the Nāḍōl copper-plate inscription of Kīrtipāla. Some of the letters are partially engraved. To take an instance, the left upper stroke of *ma* in *Padrāḍā-grāmē* in l. 2 is missing, and the letter looks like *na*. The language is **Sanskṛit**, and the whole record is in prose except the concluding benedictory verse. In respect of **orthography**, it is sufficient to note that the sign for *v* denotes both *v* and *b*. As regards **lexicography**, the following words may be noticed: *jagatī* and *mahā-sāhaṇiya* in l. 1, and *java* and *hāraka* in l. 2. *Jagatī* is found in many inscriptions in the sense of "the grounds." It corresponds, in my opinion, to the Hindī word *jagah* or *jagyā* and the Marāṭhī word *jāgā*.[1] *Sāhaṇiya* most probably corresponds to the *dēśī* word *sāhaṇī*, meaning "master of stables." The same word occurs as a title of two Paramāra Rājputs in an inscription incised on a jamb of the hall door of the Nīlakaṇṭha-Mahādēva temple at Nāṇā. *Java* and *hāraka* are also found in another inscription in the same temple at Sēvāḍī. They occur as *hāraka* and *java* in No. XV below. Both are used in connection with an *arahaṭa* (*araghaṭṭa*), *i.e.* a well with a wheel attached thereto for drawing water. From this it appears that *java* or *javā* must be taken in the sense of *yava*, barley-corn. *Hāraka* seems to be the same as the Marāṭhī word *hārā*, a large basket of a particular form and of loose texture, often used in measuring corn. This receives confirmation from No. XV.

The inscription is dated on the first of the bright half of Chaitra of the [Vikrama] year 1167, when **Aśvarāja** was the *Mahārājādhirāja* and **Kaṭukarāja** the *yuvarāja* or heir-apparent. It then records a grant by **Uppalarāka**, son of **Uttimarāja** and grandson of **Pūavi**, the Great Master of Stables (*mahā-sāhaṇiya*), together with his family, the names of some of whose members are specified. The gift was made for the daily worship of **Śrī-Dharmanāthadēva** in the temple of **Samīpāṭī**, and what was granted was barley-corn equal to one *hāraka* from everyone of the wells (*arahaṭa*) belonging to the villages of **Padrāḍā, Medramchā, Chhēchhaḍiyā and Maddaḍī**.

Of the localities mentioned, **Samīpāṭī** is doubtless **Sēvāḍī**, which is also pronounced as **Semvāḍī**. And Dharmanāthadēva must be unquestionably the divinity installed in the cell, above the door of which the inscription is engraved. **Chhēchhaḍiyā** again must be **Chhēchhlī**, about 4 miles to the north of Sēvāḍī. The rest are unidentifiable.

## IV.—SĒVĀḌĪ STONE INSCRIPTION OF KAṬUKARĀJA; [VIKRAMA-] SAṀVAT 1172.

The inscription is incised on the lintel of the door of another cell in the front corridor of the temple of **Mahāvīra** at **Sēvāḍī**. It is highly weather-worn and cannot consequently be easily deciphered. It was again bedaubed with redlead, when I was there, I do not know for what purpose. An estampage taken of it with my own hands has, however, enabled me to read almost the whole of it with certainty. It consists of 8 lines, and covers a space of 2′ $1\frac{1}{4}$″ broad by $4\frac{1}{2}$″ high. The characters are **Nāgarī**. The sign for *b* occurs in the inscription, *e.g.* in *vibudha-pati*° in l. 1, *bal-ādhipaḥ* in l. 4, and so forth. The language is **Sanskṛit**, and, excepting the opening *Ōṁ* and the date at the end, the whole of the inscription is in verse. The verses are numbered and are 15 in all. One solecism occurs in *śriy-ādhārō* in l. 2. In respect of **orthography**, the only points that call for notice are (1) the occasional use of the letter *v* both for *v* and *b*, and (2) the substitution of *n* for *ṇ* in conjunct consonants, *e.g.* in *punya-vismitaḥ*, l. 3, *vitīrnnaṁ*, l. 6, and so forth. As regards **lexicography**, attention may be drawn to the word *khattaka* occurring in l. 7. I came across the same word in an inscription in a shrine of the Jaina temple at Pālī, the principal town of the district of the same name, Jōdhpur State. This word occurs also in the Ābū inscriptions, *e.g.* it is used in l. 40 of Inscription No. I. (above, Vol. VIII. p. 213), where the meaning of 'niche' appears to be all but certain.[5] This sense fits here exactly. In line 3 again, is the word *bhukti*, which does not here simply denote a territorial division as elsewhere, but rather a province or a group of villages enjoyed as *jāgīr*. Lastly, the curious expression *Māghē Tryaṁva(ba)ka-saṁprāptau* in l. 6 also deserves to be noticed in this connection. It literally means "in Māgha on the arrival of Tryambaka (Śiva)," and I am all but certain that it denotes what is popularly known as the Śiva-rātri, the 14th of the dark half of Māgha.

The inscription opens with an invocation of **Śāntinātha**, the sixteenth Tīrthaṁkara. Verse 2 gives the name of **Aṇahila**, and his son named **Jiṁda** is mentioned in the verse following as proficient in polity and as belonging to the **Chāhamāna** dynasty. His son was **Aśvarāja**, and the son of the latter was **Kaṭukarāja** (vv. 4-5). In verse 6 we are told that in his *bhukti*, *i.e.* the province enjoyed by him, was the town named Śamīpāṭī (Sēvāḍī), and at this place there was a temple of **Vīranātha** (Mahāvīra), bearing comparison with paradise. From verse 7 onwards we are introduced to a different line of descent. In this verse we are informed that there was one **Yaśōdēva**, leader of the army (*bal-ādhipa*), of pure soul, and foremost in the

[1] Read कुटुंब°.
[2] Supply here some such word as लंपयेत्.
[3] Read °ब्राह्मण°.
[4] Read बहु°; the lines are here reversed.
[5] [See also above, Vol. VIII. p. 200, and the note on p. 200 in the 'Additions and corrections' to that volume.

assemblies of kings and *mahājanas* (banias). The next verse says that he, of equable mind, was never flagging in conferring favours on the relatives, friends, and virtuous people of the **Shaṇḍēraka** *gachchha*. His son was **Bāhaḍa**, who was well known amongst the learned like Viśvakarmā (verse 9), and the son of Bāhaḍa was **Thallaka**, who was devoted to the Jaina religion and was an object of the king's favour (verse 10). To Thallaka an annual benefaction of eight *drammas* was made by Kaṭukarāja on the Śiva-rātri day in the month of Māgha (vv. 11-12). Verse 13 expresses a wish for the continuance of the gift so long as the sun and the moon last, made for the worship of Śāntinātha in the *khattaka* of Yaśōdēva. In the next verse we are told that the image of Śāntinātha in the temple of Jina in Śamīpāṭī was caused to be made by his grandfather. The last is an imprecatory verse, threatening with punishment those who would resume the grant. The inscription ends with the mere date Saṁvat 1172, corresponding to A.D. 1115.

It will be seen from the above account that the grantor was Kaṭukarāja, son of Aśvarāja. But he does not appear to have been a ruler at the time. For in none of the verses is he spoken of as king, and in verse 6 we are informed, as we have seen, that Śamīpāṭī (Sēvāḍī) was in his *bhukti*. Here neither the word *rājya* which would have suited the metre, nor any other term synonymous with it is used. This shows that even in A.D. 1115, the date of the inscription, he was a *yuvarāja* enjoying some villages as *jāgīr*.

Shaṁḍēraka-sad-gachchha is no doubt the same as the Saṁḍēraka *gachchha* of the Nāḍōl plates of Āhaṇadēva dated V.E. 1218, and the Saṇḍēra or Shaṇḍēraka *gachchha* of the Mount Ábū inscriptions. Saṇḍēra or Shaṇḍēraka is to be identified with the present Sāṇḍērāv, 10 miles north-west of Bālī, the principal town of the district of the same name, Gōḍvāḍ Division. The name occurs also in an inscription in the temple of Mahâvira at that place (below No. XVI). It is one of the many instances in which the Jaina *gachchhas* are called after the names of places in Mārwār.

## V.—BĀLĪ STONE INSCRIPTION OF ĀŚVĀKA; [VIKRAMA-] SAṂVAT 1200.

This inscription was found at **Bālī**. It is engraved on one of the lintels resting on the pillars of the *sabhā-maṇḍapa* of the temple of **Bōlā** *alias* **Bahuguṇa-mātā**. It contains 6 lines of writing, which cover a space of 7″ broad by 2′ 2½″ high. Excepting the greater portion of line 1 and a few letters in line 5, it is well preserved. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the record is in prose, excepting one verse in ll. 4-5. nI respect of **orthography**, the only point that deserves to be noted is the doubling of a consonant in conjunction with a preceding *r*. As regards **lexicography**, attention may be drawn to the word *grāsa* in l. 2, which corresponds to the modern *girās*, signifying the landed possessions of a member of one of the ruling tribes. In lines 3 and 4 occur some abbreviations such as *bho°*, *pu°*, *va°*, and so forth. I do not know what their full forms are.

The inscription opens with the date, of which all the details are lost, except the **[Vikrama-] year 1200**. It refers itself to the victorious and blessed reign of the *Mahārājā-dhirāja* **Śrī-Jayasiṁhadēva**, of course, of the **Chaulukya dynasty** and speaks of the *Mahārāja* **Śrī-Āśvāka** as "subsisting on his lotus-like feet," *i.e.* as his feudatory. At that time the village of Vālahī was being enjoyed as *girās* by the queen **Śrī-Tihuṇaka**. It then records a grant of four *drammas* by Bōpaṇava-sthabhana, son of Pālhā, in connection with the festival of the goddess Bahughṛiṇa. Further details of the grant are given but are not quite clear, but it appears to have been laid down that at the time of the horse-fair (lit. selling of horses) one *dramma* was to be given to the goddess, two *drammas* to the *saṁgha-pati* **Galapalyādiyā**, son of **Chōhaḍi**, and resident at the village of **Thāṁbhila**, one *dramma* to **Vālhaṇa** and **Gāravāṭa**, sons of **Mōhaṇa**, one *dramma* each to the machine-wells, such as

[1] Read थक्कुरस्यक्की. [2] Read °दाक्षिण्य°.
[3] [On the impressions the reading is तस्यादानं°.—Ed.] [4] Read श्र्यंबक°.
[5] Read वितीर्ण्यौ. [6] [The *akshara* in brackets looks like च्च.—Ed.]
[7] Read ब्रह्म° and °सहस्रेण.

those named Sitka, Bhariyā, Bōhaḍā, Mahiyā, and so forth, one *dramma* to the *bhaṁḍārī* Būṭā, and so on. The record was written by one **Kulachaṁdra**.

The feudatory chieftain Āśvāka referred to herein is doubtless identical with the **Aśvarāja** of the two previous inscriptions. Vālahi must be the modern Bālī, and the goddess Bahughriṇa the same as Bahuguṇa or Bōlā-mātā, in whose temple the inscription is engraved.

## VI.—SĒVĀḌĪ STONE INSCRIPTION OF KAṬUDĒVA; [SIṀHA-]SAMVAT 31.

This inscription also was found at Sēvāḍī, near a house in front of the Jaina temple of **Mahāvīra**. It is what is called there a *surabhi* stone, *i.e.* a stone which is surmounted with

[1] From the original stone. [2] Read °सोढदेव°.

[3] [On the estampage which Mr. Bhandarkar has sent me, the reading संधि instead of राज is also possible.—Ed.]

[4] [The *akshara* ज्ञ of तिडुणक is not on the line. There is a letter or symbol above the line which Mr. Bhandarkar takes for ज्ञ, and this is how he gets तिडुणक.—Ed.]

Read वालहीं प्रति; as the text was never intended to be grammatically correct, such inaccuracies will not be corrected unless it is absolutely necessary to do so.

[6] Read भूमिस्तस्य. [7] Read एतल्लोप°.

[8] Read ब्रह्म; the metre of these lines is violated.

[9] [On the estampage the reading seems to be ॥ क ॥ कुल°.—Ed.]

the sculpture of a cow and her calf and with the sun and the moon on each side. The inscription is mutilated in several places, and the letters have become very much worn out. The inscription is of no importance except for what is contained in the first three lines, about the reading of which there remains no doubt. They give the date Sam 31 **Bhāde[va]dā [su]di** 11, and state that **Kaṭudēva** was at that time *Mahārājādhirāja* and reigning at **Naḍūla** (Nāḍōl) and that **Samīpāṭī** was being enjoyed by (his son) **Jayatasiha**, the *Yuvarāja*, or heir-apparent. This Kaṭudēva is the same as the Kaṭukarāja of Nos. III. and IV., above, and, as we know that he was the *Yuvarāja* from V.E. 1167 to 1172, the only era, to which we can refer the year 31, the date of this inscription, is that started by the **Chaulukya** sovereign **Siddharāja-Jayasiṁha**, commonly known as **Siṁha-Saṁvat**. It then becomes equivalent to V.E. 1200 or A.D. 1143. That the province of Gōḍvāḍ was included in the dominions of Siddharāja-Jayasiṁha is proved by the preceding inscription. It is, therefore, not at all improbable that the year 31 of our record belongs to the Siṁha era.

## VII.—NĀḌLĀI STONE INSCRIPTION OF RĀYAPĀLA; [VIKRAMA-] SAṀVAT 1189.

This inscription was found in a **Jaina temple at Nāḍlāi**, 8 miles to the north-west of Dēsūrī, the principal town of the district of the same name, Gōḍvāḍ Division. The temple is now dedicated to Ādinātha, but there can be no doubt, as will be seen from other inscriptions, that it was originally dedicated to Mahāvīra. The inscription in question is engraved on a lintel standing on two pillars in the *sabhā-maṇḍapa*. The lines of the inscription run parallel to one another but not to the edges of the lintel, and the tops of some of the concluding letters in the first line have been cut off, necessarily being outside the upper edge of the lintel. This points to the conclusion that the *sabhā-maṇḍapa* was rebuilt some time after the date of

[1] From the original stone. [2] Read भाद्रपद. [3] Read महा°.
[4] Restore तत्सुत.° [5] Read °पाट्या.
[6] Read परिपंथयन्; further grammatical inaccuracies are better left uncorrected.

the inscription, and that the lintel on which it is incised is no longer preserved in its original form.

The record contains 6 lines of writing which cover a space of 1′ 5½″ broad by 4½″ high. The surface of the stone does not appear to have been dressed before engraving the inscription, and the letters also do not seem to have been carefully incised. The characters are Nāgarī. Of these *y* is written as if it were *p*, as is often seen in Sanskṛit manuscripts. Next, the form of the letter *ḍ* in *Naḍūlaḍāgikā*, l. 2, is worthy of note and is exactly like that noted in No. III. The language is **Sanskṛit**, and the whole of the inscription is in prose, excepting a verse at the end, which, however, offends against the metre. In respect of **orthography**, it deserves to be noticed first that there is but one *b* in the inscription and it is denoted by the sign for *v*, in *vrahama(hma)*°, l. 5, and secondly, that the final consonant is represented by the addition of the suffix *u* as, *e.g. yad* by *yadu* in l. 5. The same orthographic peculiarity I have noticed in the later copper-plate inscriptions of the Guhilot princes, which are found in Gōḍvāḍ. As regards **lexicography**, the words *pala* and *palikā* employed in l. 3 doubtless denote some kind of liquid measure. Details of it have been set forth in Berūni, *Indica*, Vol. I. p. 164. Attention may also be drawn to the abbreviated forms herein employed, *bhaṁ*°, l. 3, and *rā*° and *vi*°, l. 4. *Bhaṁ*°, of course, stands for *bhaṁḍārī*, the name of a well-known subdivision of the Ōsvāls, and *rā*° for *rāuta*, which is supposed to be a corruption of *rājaputra*, and is the same as the modern *rāvat*, one of the designations borne by Rājput jāgīrdārs. I do not know the full form of *vi*.° In l. 3 is used the word *ghāṇaka*, which corresponds to *ghāṇī* and signifies an oil-mill. It is frequently met with in inscriptions.

The inscription is dated the 5th of the bright half of Māgha in the [Vikrama] year 1189, and speaks of a grant made by **Rudrapāla** and **Amṛitapāla**, sons of the *Mahārājāḍhirāja* **Rāyapāla** of the **Chāhamāna** dynasty, in conjunction with their queen-mother **Mānaladēvī**. The gift was of two *palikās* out of those due to the royal family from each oil-machine (*ghāṇaka*) and was made for the (Jaina) saints in and outside **Naḍūlaḍāgikā** (Nāḍlāi). The witnesses to this religious benefaction were the villagers (*grāmiṇaka*) **Ttimaṭā**, a *rāuta*, **Siriyā** a *vi*°, **Pōsari** a *bania*, and **Lakshmaṇa**, headed by **Nāgasiva**, a *bhaṇḍāri*. They apparently formed the *paṁcha* of the village.

## VIII.—NĀḌLĀĪ STONE INSCRIPTION OF RĀYAPĀLA; [VIKRAMA-] SAṂVAT 1195.

This inscription also was found at **Nāḍlāī**, but in the temple of **Nēminātha**, locally known as **Jādvājī**, situated on a small hill to the south-east of the village. It is engraved on a pillar, and is, on the whole, well preserved. It consists of 26 lines of writing, and covers a space of $9\frac{1}{4}''$ broad by $1'\ 11\frac{1}{4}''$ high. The characters are **Nāgarī**. The language is **Sanskṛit**. As regards **orthography**, the only point that calls for notice is the use of *matu* for *mat(d)* in *matudattaṁ*, l. 22. Of unknown or rare words *bhōktāri*, l. 9, *śēka*, l. 11, and *ābhāvya*, l. 12, may be noticed. For the first I can suggest no meaning. *Śēka* is perhaps the same as the Sanskṛit *śikya* meaning "a kind of loop or swing made of rope and suspended from either end of a pole or yoke to receive a load (also applied to the load so carried)." The word *ābhāvya* has, in my opinion, the sense of "income, proceeds," and occurs in no less than three different compounds in a Māngrol inscription of V.E. 1202.[5] It is also employed as a component of another compound in Bhinmāl inscriptions Nos. XII and XV.[6] Perhaps another word may also be noticed, *viz. rāuta*, which occurs in ll. 8 and 21. It is evidently a corruption of *Rājaputra* and is the same as Rājput, but is here used to denote apparently a *jāgirdār*.

The inscription opens with obeisance to the Omniscient, who is here **Nēminātha**. It then gives the date, *viz.* **Tuesday, the 15th of the dark half of Āśvina in the [Vikrama] year 1195**, and refers to the rule of the *Mahārājādhirāja* **Rāyapāladēva** over **Naḍūlaḍāgikā** (Nāḍlāī). It then states that for lamp, incense, offering, flowers, worship and so forth of Śrī-Nēminātha, the *ṭhakkura* **Rājadēva**, son of the *rāuta* **Ūdharaṇa of the Gūhila family**, granted for his spiritual merit one-twentieth part of the income (*ābhāvya*) derived from the loads on bullocks going on their way or coming to Nāḍlāī. Then a request is made to future rulers for the preservation of the grant; and **Pāṁsila** is given as the name of the individual who wrote the record. Then comes the sign-manual of **Rājadēva**, who is here called a *rāuta*, which is followed by the name of the witness **Gūgi**, son of the astrologer **Dūdūpā**. The last three lines are not intelligible to me.

## IX.—NADŌL STONE INSCRIPTION OF RĀYAPĀLA; [VIKRAMA-] SAṂVAT 1198.

This inscription was discovered at Nāḍōl, about 10 miles north-west of Dēsūrī, and is incised on a pillar in the temple of Sōmēśvara. A transcript of the first 3 lines has been given by the late Professor Kielhorn, above Vol. IX. p. 159. The record contains 39 lines of writing, which cover a space of 9″ broad by 2′ 3″ high. The letters are so weather-worn that even a satisfactory estampage is not possible, but with a little care and patience the whole of the

[1] Read विजयि. [2] Read °दूर्ज्जिततीर्थे°. [3] Read °न्वय°.
[4] The *sandhi* has here been disregarded. Such omissions will not be further noticed.
[5] Read गच्छतामागतानां. [6] The letter षु is engraved between lines 10 and 11.
[7] Read विंशतितमो°. [8] Read चन्द्रार्कौ. [9] Read अस्मद्दत्तं.
[10] Read °यिष्यति. [11] The word इदं is superfluous and not needed for the metre.
[12] Read मया दत्तः [13] Probably अचार्यं was intended. [14] Read गूगिना.

inscription can be read with certainty on the original stone. The characters are **Nāgarī.** The language is **Sanskṛit,** and the whole of the inscription is in prose. Some of the solecisms that occur in the record are *nirgamatē*, l. 20, *nirgamaṁtānāṁ*, l. 15, and *nirgamāpayaṁtānāṁ*, l. 19. In respect of **orthography,** it is sufficient to note (1) that *t* is (correctly) doubled in conjunction with a preceding *r* in *pravarttamāne*, l. 3, (2) that the dental *s* is frequently substituted for the palatal *ś*, (3) that the sign for *v* is used also for *b*, and (4) that there is a curious tendency exhibited here of ending proper names with *u* or *ū*. The *dēśī* words employed are (1) *vāḍā* or *vāḍaü*, *vāsu* and *pāḍi* (ll. 4-8) which still in Mārwār have the sense of wards or localities in a town; (2) *pēṭa*, a belly, (3) *avasara*, l. 24, *i.e. ōsrā* or *ōsrī*, ante-chamber or porch (above, Vol. I. p. 165), and (4) *chaukaḍikā*, l. 13, of uncertain meaning, but apparently signifying a *pañchāyat*. The unusual words used in the inscription are (1) *kārpaṭika*, l. 12, a pilgrim or caravan of pilgrims, (2) *dauvārika*, doorkeepers of kings, known as *ḍūḍidārs* in Rājputānā, and (3) *kāyavrata*, l. 21, which doubtless has the same sense as that of the word *trāgā* or *chāndī*, *i.e.* a kind of privation and self-immolation so commonly practised once in Rājputānā and Gujarāt by Brāhmaṇas and Bhāṭs to force the kings to relent and grant their wishes. Two curious expressions occurring in the record also deserve to be noticed. The first is *pēṭaṁ pṛishṭiṁ vā darśayati*, ll. 20-21, and the second *vā(bā)lē-pi graṁthir-n-āsti*, l. 23, both of which are *dēśī* idioms unknown to Sanskṛit literature. The former consists of two separate expressions: (1) *pēṭaṁ darśayati* — lit. "shows his belly" but really "asks for means of livelihood," and (2) *pṛishṭiṁ darśayati* — lit. "shows his back," *i.e.* "flies away and thus shirks his responsibility." The second exactly corresponds to the Hindī phrase even now in use, in Rājputānā at any rate, *viz. bāl par bhī gāṁṭh nahī*, which is employed for absolving a man from all blame.

The inscription opens with the date, *viz.* **Sunday, the 8th of the dark half of Śrāvaṇa in the [Vikrama] year 1198,** and refers itself to the blessed and victorious reign of the *Mahārāja-dhirāja* **Śrī-Rāyapāladēva.** It then makes mention of sixteen Brāhmaṇas of the town of Dhālōpa, residing in eight different wards. Vīrigu and Prabhākara belonged to Mērīvāḍā, Āsadīu and Mahaḍū to Ḍīpāvāḍā, Dāu and Ghāhaḍi to Duṁḍaṇavāsu, Muhaṁkaru and Divākaru to Bhāṁgūravāḍaü, Dēvāīchu and Dhāraü to Pīpalavāḍā, Nārāyaṇa and Mahāicha to Aṁbilavāḍā, Āsigu and Āsapālu to Khaīkhannalāvāḍā, and Dēvaṁgu and Āṁvigu to Bhuṁḍavāḍā. Headed by all these Brāhmaṇas, two from each of the eight wards of Dhālōpa and with Dēvāicha as the mediator, the whole people of the town tendered a document written (*i.e.* signed) with their own hands. It contains a solemn promise on their part to find out, in accordance with the custom of the country, by means of the *chaukaḍikā* or *pañchāyat* system, whatever is lost by, or snatched away from, the *bhāṭa*, *bhaṭṭaputra*, *dauvārika*, *kārpaṭika*, *Vaṇijjāraka*, and others on their way. If it was, however, lost at their own place, *i.e.* at any particular ward in Dhālōpa, the responsible individuals thereof already named were to find it out in person. Money, weapons, watchmen, and so forth were supplied by the *Mahārāja* Śrī-Rāyapāla to them for tracing things lost, and so there was no need of assigning the duties of a watchman to any one amongst them. A declaration was also made to the effect that, if any Brāhmaṇa amongst them, when being asked by chiefs (*rāṇaka*), to find out some lost property, refused to do so, asked for means of subsistence or fled away, or, if apprehended, had recourse to *kāyavrata* or self-immolation, he would die like a cur, donkey, or *chaṇḍāla*, and the chiefs (*rāṇaka*), such as Rāyapāla and others, would in no wise be open to blame. Then is given a list of the names of the individuals who bore witness to the document. They are as follow: (1) Kaṭuka and the Brāhmaṇa Sājaṇu come from, *i.e.*, representing the *bhaṭṭāraka* Īlā (residing) in the *avasara* (*ōsrī*) of the temple belonging to **Śrī-Jayasiṁhadēva,** (2) the *bhaṭṭāraka* Varuṇasiü of (the temple of) **Aṇahilēśvara,** (3) the *bhaṭṭāraka* Mahēśvarasiū of (the temple of) **Jēndrarājēśvara,** (4) the *bhaṭṭāraka* Jñānasiü of (the temple of) **Aṇupam-**

vēśvara, (5) the *bhaṭṭāraka* Īśānū attached (*pratibaddha*) to the *bhaṭṭāraka* Bhōpā of (the temple of) Pṛithvīpālēśvara, (6) the *bhaṭṭāraka* Muktidēū of (the temple of) Jōjalēśvara (7) the *bhaṭṭāraka* Vināyaka and Sāṁtisiū of (the temple of) Tripurusha, (8) the *bhaṭṭāraka* Mūladēū of (the temple of) Āsalēśvara, (9) the *bhaṭṭāraka* Tatpurusha of (the temple of) Padmalēśvara, (10) the *bhaṭṭāraka* Kēdāru of (the temple of) [Tripālā]kēśvara, (11) the *bhaṭṭāraka* Brahmarāśi of (the temple of) Āsapālēśvara, (12) the *abōṭī* Sāgāhāri belonging to Dvāravatī and of (the temple of) Pṛithvīpālēśvara, (13) the *abōṭī* Jagadharu belonging to Dvāravatī and of (the temple of) Āsalēśvara, (14) the *abōṭī* Śrī-Vachhū belonging to Dvāravatī and of (the temple of) Tripurusha, (15) the whole class of bankers (*mahājana*), such as Dēvadhara and others, belonging to Aṇahillapura, and (16) the whole class of bankers such as Seṭh Jasadhavala Kaṭakavāla, and so forth. Then in ll. 37-39 we are informed that the record was written, *i.e.* drawn up, I think, by the *ṭhakura* Pēthaḍa, son of Vādiga, a Gauḍa Kāyastha, with the consent of the people of Dhālōpa. At the end is a line, stating that the record is approved by all the people of Dhālōpa.

Of the places mentioned, Dhālōpa is obviously the village of that name, about 4 miles to the south-south-west of Nāḍōl. Aṇahillapura is, of course, Aṇhilvāḍā near the modern Pāṭṇā, in the Kaḍī Division, Baroda State. Dvāravatī is doubtless Dvārkā on the western coast of Kaṭhiāvāḍ. Of the caste names mentioned, *bhāṭa* is the same as bhāṭ or bards. *Bhaṭṭa-putra* is most likely intended for Bārhōṭ, the higher class of professional panegyrists. *Dauvārika* is probably not a caste-name, and signifies here what are known as *ḍūḍīdārs* in Rājputānā. *Vaṇijjāraka* is Vanjārīs, whose hereditary calling is that of carrying grains on pack-bullocks. The name occurs under the form of *vaṇajāraka* in No. XI. below and *vaṇijyāraka* in a copper-plate grant of Tribhuvanapāladēva.[1] *Abōṭis* are an inferior class of Brāhmaṇas, who are generally temple servants, and are still chiefly found in Dvārkā. Of the names of the *bhaṭṭārakas* of temples, many end in *śiū* (Śiva), two in *dēū* (*dēva*), and only one in *rāśi*. I have elsewhere said that of the four well-known sects of the followers of Śiva, those whose names ended in Śiva were Śaivas, and those whose names ended in *rāśi* were Lakulīśa Pāśupatas. But to what sect the ascetics who bore the honorific suffix *dēū* (*dēva*) belonged, is not clear. Again, the gods, to whose temples the *bhaṭṭārakas* were attached, were, it will be seen, named after the kings. The god Jayasiṁhadēva was doubtless called after the Chaulukya sovereign Jayasiṁha; Aṇahilēśvara after Aṇahilla, great-grandson of Lakshmaṇa, the founder of the Chāhamāna family of Mārwār; Jēndrarājēśvara after Jēndrarāja or Jindurāja, son of Aṇahilla; Pṛithvīpālēśvara and Jōjalēśvara, after the first and second sons of Jēndrarāja; and Āsalēśvara, who is the same as Āsapālēśvara of l. 32, after Aśvapāla, elder brother of Aṇahilla. Aṇupamvēśvara, Padmalēśvara and [Tripālā]kēśvara must similarly have been named, but princes of these names have not yet been traced in inscriptions.

## X.—NĀḌLAĪ STONE INSCRIPTION OF RĀYAPĀLA; [VIKRAMA-]SAMVAT 1200.

This inscription was found in the temple of **Ādinātha** at **Nāḍlāī**, and is engraved on a lintel just opposite to that on which No. VII is incised. It contains 5 lines[7] of writing which cover a space of 1′ 9″ broad by 4½″ high. The letters were filled with plaster when I first saw the inscription. The plaster had afterwards to be scraped off for enabling us to read the inscription. The characters are **Nāgarī**. The language is **Sanskṛit**, and the record is in prose excepting the verse at the end, the last *pāda* of which sets the metre at naught. As regards **orthography**, the only points that call for notice are (1) the use of *jatu* for *yad* and (2) the use of the dental for the palatal sibilant. In line 3 occur the curious words *vala* and *plī*, of which the first appears to be incorrectly used for *pala* and the second apparently an abbreviated form of *palikā*. In line 2 the word *pāilā* is used, which seems to signify a certain kind of weight. The same word occurs in the same sense in No. XI. In the Sūnak grant of the Chaulukya king Karṇadēva, we have the following: *pāilāṁ* 12 *vahaṁti(tī) hala 4 iti hala-chatushṭaya-bhūmi*. Here also the word has apparently the same meaning. Local inquiries in Gōḍvāḍ have given me the following table:—

| | |
|---|---|
| 4 *pāilā*=1 *pāyali*. | 4 *māṇā*=1 *sēi*. |
| 5 *pāyali*=1 *māṇā*. | 2 *sēi*=1 *maṇ*. |

Another word that may be noted is *viṁśōpaka*, which not infrequently occurs in other inscriptions also. It is doubtless a coin, which is equivalent in value to $\frac{1}{20}$th of the rupee that was then current.

The inscription opens with the date, *viz.* **Thursday, the 5th of the bright half of Jēshṭa (Jyaishṭha) in the [Vikrama] year 1200,** when the *Mahārājādhirāja* **Śrī-Rāyapāladēva** was reigning. It then records that the *rāuta* **Rājadēva,** who had come on the occasion of the *rathayātrā*, *i.e.* the car festival, made, for the sake of his mother, in the presence of the bankers (*mahājanas*), villagers and the people of the province, a religious benefaction consisting of one *viṁśōpaka* coin from the value of the *pāilās* accruing to him and two *palikās* from the *palas* of oil due to him from every *ghāṇaka* or oil mill.

## XI.—NĀḌLĀÎ STONE INSCRIPTION OF RĀYAPĀLADĒVA; [VIKRAMA-]SAMVAT 1202.

The inscription is engraved on the same lintel as No. X. It contains 5 lines of writing, covering a space of 1′ 8½″ broad by 4½″ high. The characters are **Nāgarī**. The language is **Sanskṛit**, and, excepting the usual imprecatory verse at the end, the whole of the record is in prose. As regards **orthography**, the only points that call for notice are that a consonant following *r* is doubled, and that in l. 5 *jatu* is used instead of *yat*. Of rare and unusual words herein employed and not previously noticed, *dēśī* occurs in l. 3, and *kirāḍaüā* and *gāḍa* in l. 4. The last is used in the sense of "cart." and *kirāḍaüā* is, I am told, the same as *kirāḍavā* or *kirāṇā*, employed to denote substances, such as gum, dry ginger, black pepper, coriander, and so forth. The meaning of the word *dēśī* is not quite certain. It seems tempting to take it in the sense of a guild, in which it occurs in the Pēhēvā inscription of the imperial Pratihāra Bhōjadēva I. (*above*, Vol. I. p. 187, l. 8) and the Harsha inscription of the Chāhamāna Vigrahārāja (*above*, Vol. II. p. 124, l. 38). And this meaning suits here excellently. The same word occurs in another inscription found in the same temple as this, and apparently in the same sense. Another expression that requires to be noted is *la(lā)ga-māna*, the meaning of which seems to be "the measure or proportion (*māna*) of cess (*lāga*)."

The inscription opens with the date, *viz.* **Friday, the 5th of the dark half of Āsōja (Āśvina) in the [Vikrama] year 1202,** when **Rāyapāladēva** was the *Mahārājādhirāja* and the *rāuta* **Rājadēva** was the *ṭhakura* of **Naḍūlaḍāgikā** (Nāḍlāi). The object of the inscription is to record that the **Vaṇajārakas** (Vanjāris) of **Abhinavapurī, Badārī** and **Nāḍlāi** having assembled together into a guild (*dēśī*), Rājadēva granted, for the sake of the pious and the ascetics in the temple of **Mahāvīra**, rupees two for each twenty *pāilās* loaded on bullocks and rupee one for each cart filled with commodities, coming under the class of *kirāṇās*.

Badārī is probably Bōrlī, 8 miles north of Nāḍlāi. Abhinavapurī is unknown to me.

---

[1] Read समयै. [2] I am not quite certain of this reading. [3] Read °विंशोपको°. [4] Read °तैलपल°. [5] Read मात्र°. [6] Read °ग्रामीण°. [7] Read °समक्षं. [8] Read धर्म्मस्य. [9] Read विंशोपकः. [The space between °को and पलिका° is too big for the numeral १ alone.—Ed.] [10] Read °हत्यासहस्रेण च. [11] Read °स्तेन. [12] Probably °हत्याश्च was intended. [13] Read यत्पापं. [14] The letters पापेन and सः are not needed for the metre. [15] [There are two more *akshara*s in this line and another line below the 5th which may be transcribed as follows:

(l. 5 अन्ति-

## XII.—KIRĀḌŪ STONE INSCRIPTION OF ĀLHAṆADĒVA; [VIKRAMA-]SAṂVAT 1209.

This inscription was found in a **Śaiva temple** standing amidst the ruins of **Kirāḍū** near Hāthmā, about 16 miles north-north-west of Bāḍmēr, the principal town of the Mallāṇī District, Jodhpur State. A transcript and translation of it have already been published in the *Bhāvnagar Prakrit and Sanskrit Inscriptions*, p. 172 ff. But this, like almost all the inscriptions in this book, is edited in a slovenly manner, and I, therefore, make no excuse for re-editing it here.

The inscription consists of 21 lines, covering a space of 1′ 5½″ broad by 1′ 2″ high. The middle portion of the stone as far as line 17 has peeled off. Nothing of importance, however, seems to have been destroyed, and the purport of the inscription is clear enough. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the record is in prose. As regards **orthography**, it is sufficient to note (1) that a consonant following *r* is doubled and (2) that the sign for *v* is employed also for *b*, except once in *labdha* in l. 2. In l. 13 occurs the word *amāri-rāḍhi*, which, though known to Jaina scriptures, is foreign to Sanskṛit literature. It means "the edict of the non-slaughter (of animals)."

The record opens with the date, *viz.* **Saturday, the 14th of the dark half of Māgha in the [Vikrama] year 1209,** when **Kuma(mā)rapāla** was the paramount sovereign and **Mahādēva** was doing all the business of the seal, relating to the drawing up of documents, etc. Lines 4-6 speak of his feudatory, the *Mahārāja* **Śrī-Āḷaṇadēva,** who obtained **Kirāṭakūpa, Lāṭarhada** and **Śivā**—through his (*i.e.* Kumārapāla's) favour. Then we are told that Āḷaṇadēva, on the aforesaid date, which was the *Śivarātri* day, thinking the granting of security to animals to be the highest gift, issued injunctions, for the increase of his spiritual merit and fame, to the *mahājanas, tāmbūlikas*, and other subjects, forbidding the slaughter of living beings on the

[1] From the original stone. [2] Expressed by a symbol.
[3] From here onwards many grammatical inaccuracies occur, which need not all be corrected.

[9] Read °जारवैर्धं°. [10] Read यत्. [11] Read ब्रह्म° and °मतेन.
[12] The verse obviously violates the metre.

8th, 11th and 14th days of both the fortnights of every month in the three towns named above and threatening with capital punishment those who killed or caused others to kill living beings. The Brāhmaṇa priests, ministers and others were also ordered to respect this edict of non-slaughter. And amongst these, he who commits the sin of taking life, should, it is stated, be fined five *drammas*, but if the sinner be one attached to the king, he should be fined one *dramma* only. Then comes the sign-manual of the personage who issued the edict, who is here called *Mahārāja* Śrī-Ālhaṇadēva, followed by the approval of the great princes (*mahā-rājaputra*) **Kēlhuṇa** and **Gajasiṁha**. The edict was written by the *ṭhakkura* **Khēlāditya**, minister for peace and war. Then we are informed, in a postscript, that this gift of safety to animals was caused to be proclaimed, with the permission of the king, by **Pūtiga** and **Śāliga**, sons of **Śubhaṁkara**, of the **Pōrvāḍ caste** and residents of **Nadūlapura** (Nāḍōl). The inscription ends with the information that it was engraved by the *sūtradhāra* **Bhāila**. Pūtiga and Śāliga are no doubt the same individuals that had a similar edict promulgated through **Girijādēvī**, queen of **Pūnapākshadēva**, a feudatory of Rāyapāla and ruling over the province of **Ratnapura**, the southernmost district of Mārwār.[1]

It is worthy of note that the edict in question is to be made applicable to two distinct classes with varying degrees of rigour. The class to which it is to be applied with the greatest rigour is, of course, that of the merchants (*mahājanas*) and betel-sellers (*tāṁbūlikas*), who doubtless must have, then as now, been Jainas and consequently supposed to be the greatest respecters of animal life. The class, with reference to which the rigour is relaxed, is that of the ministers and priests. Of the first of these we cannot be certain whether they were recruited from the Brāhmaṇa caste. But the priests unquestionably can be no other than Brāhmaṇas, and when they are asked to respect animal life, it is plain that some Brāhmaṇas of Mārwār at any rate were then in the habit of eating flesh, which is now looked upon with abhorrence by them—due no doubt to the influence of Jainism which has been predominant in Rājpūtānā for the last six centuries, if not longer.

Next, the edict was to be in force at the three places, *viz.* Kirāṭakūpa, Lāṭarhada, and Śivā, the towns which Ālhaṇadēva secured through the favour of Kumārapāla. Kirāṭakūpa is undoubtedly **Kirāḍū**, where the present inscription was found. It is mentioned twice in another inscription, in the same temple, dated V.E. 1235, and pertaining to the reign of the Chaulukya sovereign, Bhīmadēva. Lāṭarhada must doubtless be the same as **Lāṭahrada**, occurring in Bhinmāl Inscriptions Nos. XI and XII, and Rāṭahrada in the Sūndhā hill inscription of Chāchigadēva. Professor Kielhorn, when he edited the last inscription, was unable to identify it. But, as suggested to me by Munshi Devi Prasad of Jodhpur, it must be identified with **Rāḍḍhaḍā**, which was the original name of the district round about Nagar-Guḍhā in the Mallāṇī province, Mārwār. The third place is Śivā.—The full form of the name is unfortunately not preserved, but I have no doubt that it must have been some name corresponding to the modern Sheo, a town of antiquity and even now of some importance, and the head-quarters of a district of the same name.

## XIII.—SĀṆḌĒRĀV STONE INSCRIPTION OF KĒLHAṆADĒVA; [VIKRAMA-]SAṂVAT 1221.

This inscription was found at **Sāṇḍērāv**, about 10 miles north-west of Bālī. It is engraved on a lintel in the *sabhā-maṇḍapa* of the temple of **Mahāvīra**.

The record contains 4 lines of writing, which covers a space of 3′ 11″ broad by 3½″ high. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the inscription is in prose. As regards **lexicography**, *kalyāṇika* or *kalyāṇaka* occurs in ll. 1 and 3, and *yugaṁdharī* and *hāēla* in ll. 2 and 4, and *talārābhāvya* in l. 2. *Kalyāṇika* is a term peculiar to Jaina theology. *Kalyāṇikas* are the auspicious days, five in number, on which took place (1) the *chyavana* (conception), (2) *janma* (birth), (3) *dīkshā* (initiation), (4) *kēvalajñāna* (enlightenment), and (5) *nirvāṇa* (final beatitude) of each of the Tīrthaṁkaras. The expression occurs in No. II of the Mount Ābū inscriptions edited by Dr. Lüders;[9] and on the door jambs of the subsidiary cells in the temple of Tējapāla at Dēlvāḍā, the *pañcha-kalyāṇikas* are specified of all the Tīrthaṁkaras, to whom they are dedicated. The meaning of *yugaṁdharī* and of *hāēla* is unknown to me. But I surmise that *hāēla* here stands for *hala* and that *yugaṁdharī* is the name of a specific kind of corn known as *jvār*. The sense of the remaining word, *viz.* *talārābhāvya*, is also not certain. The expression no doubt occurs in a Māngrōl inscription published in the *Bhāvnagar Prakrit and Sanskrit Inscriptions*, p. 158, where it is translated by "the revenue of Talārā" which hardly helps us. The same inscription is published in *Bhāvnagar Prāchīna-Śōdhasaṁgraha, Bhāga* I. p. 5 ff. It is translated in Gujarāti on p. 9 by *khuśakī jakātanī-upaja, i.e.* the income or revenue from tolls. In the English rendering of it in the same volume, it is stated that *talārā* is the same as the modern *talōdarā*. The same

[1] Read °द्रम्मैदंड्य°.
[2] This is followed by the mark of a spear.
[3] Read °प्राग्वाट°.
[4] Read चितितसै.
[5] Read °श्रासनं°.
[6] Read विज्ञाप्य.
[7] Read कारित°.
[8] [There are some symbols engraved between the two double strokes; but they are not quite clear.—Ed.]
[9] Above, Vol. VIII. p. 206.

word occurs as *talāra* or *talāraksha* in the Chīrwā inscription edited by M. Geiger in the *Vienna Or. Jour.*, 1907, pp. 143 ff. The authority of Hēmachandra and Trivikrama is quoted there to show that it is equivalent in meaning to *purādhyakshaḥ* or *nagararakshakaḥ*. This would correspond to the office of a *kotwāl* or city magistrate. But *tala* is often used in inscriptions to mean the "suburbs of a town." A *talāra* would thus be to the suburbs what a *kotwāl* is to a city.

The inscription is dated on **Friday, the 2nd of the dark half of Māgha in the [Vikrama] year 1221**, and refers itself to the reign of **Śrī-Kēlhaṇadēva**. It states that **Ānaladēvī**, queen-mother of Kēlhaṇadēva granted one *hāēla* (*i.e.* as much land as could be tilled by a single plough in one day) of *yugaṁdharī* or *jvār* corn from the king's personal property (*bhōga*), to the god **Mahāvīra**, *mūlanāyaka*, the primeval leader, of the **Shaṁḍēraka**-*gachchha*, to celebrate the *kalyāṇika* corresponding to the 13th of the dark half of Chaitra. One *dramma* was also given from the revenue of *talārā* by the Rāshṭrakūṭas **Pātū** and **Kēlhaṇa** and their brother's sons Ūttamasīha, Sūdraga, Kālhaṇa, Āhaḍa, Āsala, Aṇatiga and others with reference to the same *kalyāṇaka*. Similarly one *hāēla* of *yugaṁdharī* was also granted by the *rathakāras* or cart-builders, Dhanapāla, Sūrapāla, Jōpāla, Sigaḍā, Amiyapāla, Jisahaḍa, Dēlhaṇa, and so forth, all residing at Shaṁḍēraka, in connection with the *kalyāṇaka* falling on the 13th of the bright half of Chaitra.

Ānaladēvī, mentioned in this inscription as the queen-mother of Kēlhaṇadēva must undoubtedly be the same as Annalladēvī spoken of in the Nāḍōl plates as the consort of Ālhaṇa, father of Kēlhaṇa.[1] In this last inscription, she is represented to have been the daughter of **Sahula of the Rāshṭrauḍa family**. Rāshṭrauḍa is obviously the same as Rāshṭrakūṭa, and the Rāshṭrakūṭas, Pātū, Kēlhaṇa, and so forth, referred to in our inscription, must, therefore, be taken to be her relatives on her father's side.

## XIV.—NĀḌLĀĪ STONE INSCRIPTION OF KĒLHAṆA; [VIKRAMA-]SAMVAT 1228.

The subjoined inscription was found near the temple of **Mahādēva**, about one mile south-west of **Nāḍlāī**. The shrine of it is really a natural cave, and this is the reason why it is also

[1] Above, Vol. IX. p 68 ff. and *Ind. Ant.* Vol. XL. p. 144.
[2] From the original stone.
[3] Expressed by a symbol.
[4] The letter *la* of "*Āsala*" is engraved above the line.
[5] Supply °दत्त:

called *bhaṁyar-kā-mandar*, *i.e.* a subterranean temple. It originally had a *sabhā-maṇḍapa*, which is now well-nigh destroyed. And the stone, on which the inscription is engraved, appears to have been a lintel somewhere in the *sabhā-maṇḍapa*.

As I received news of this inscription just as I was on the point of leaving Nāḍlāī, I was not able to take any impressions of it nor to take its measurements. It contains 3 lines of writing. The characters are **Nāgarī**. The record is in prose. The language is partly **Sanskṛit** and partly vernacular. One curious thing in this connection is that *svasti* is twice used like *śrī*, as an honorific prefix to the names of places. Thus the forms Svasti-Sōnāṇā° and Svasti-Nāḍūlā are employed instead of Śrī-Sōnāṇā° and Śrī-Nāḍūlā. As regards **orthography**, it may be noted that (1) *Kuṁvara*° is used for *Kumāra*° in l. 1, (2) *iṭakā* for *ishṭakā*, and (3) the date 1228 in l. 1 is written half in ciphers and half in letters. With reference to rare or unusual words, the following may be noticed: (1) *akshasāma*, (2) *lāpanīya*, (3) *ḍamā*, and (4) *chahūṭā-pana*, the meaning of none of which is known to me.

The inscription opens with the date *viz.* **Monday the 13th of Mārgaśīrsha in the [Vikrama] year 1228**, during the victorious reign of the **Chaulukya** sovereign **Kumārapāla**, when **Kēlhaṇa** was ruler of **Nāḍūlya**, and **Rāṇā Lakhamaṇa** of **Vōripadyaka**, and **Aṇasīha** was the *ṭhākur* of **Sōnāṇā**. It then states that the *maṇḍapa*, *akshasāma*, and *ḍamā* of the temple of **Bhivaḍēśvara** were constructed by **Pāhiṇi**, son of the *sūtradhāra* **Mahaḍūa** and his wife **Jasadēvi**. They consisted of stones and bricks, and their construction cost 330 *drammas*. He was helped in this religious work by the *sūtradhāra* **Mahidarā** and **Iṁdarāka**.

Of the localities herein mentioned, Nāḍūlya and Sōnāṇā are, of course, **Nāḍōl** and **Sōnāṇā**. Vōripaḍyaka is probably to be identified with **Bōrlī**, about 8 miles north of Nāḍlāī.[1]

[2] From the original stone. [3] Expressed by a symbol.

[4] As the inscription does not aim at giving a grammatically correct Sanskṛit text, it is not desirable to correct all inaccuracies.

[5] Read °केल्हणराज्ये. [6] Read °राज्ये. [7] Read कारपीय:

[8] Probably अत was intended.

## XV.—LĀLRĀĪ STONE INSCRIPTION OF KĒLHAṆADĒVA; [VIKRAMA-] SAṀVAT 1233.

This inscription was found amidst the scattered ruins of a **Jaina temple at Lālrāī**, 5 miles south-east of Bālī. It contains 18 lines of writing, covering a space of $10\frac{1}{4}''$ broad by $1'\ 2\frac{1}{2}''$ high. Up to line 8, the inscription is intact, and of the two lines following only a letter or two are gone. But of ll. 11-18, the whole of the proper right half is destroyed. The characters are **Nāgarī**. The letter *ḍ* is here throughout denoted by the curious sign which has been noted above, and which contains a loop on the left side. The whole of the record up to line 16 appears to have been in prose, and the last two lines, occupied by a well-known imprecatory verse. The language is **Sanskṛit**. As regards **orthography**, it is worthy of note that a consonant following *r* is doubled, and that the sign for *v* is used both for *v* and *b*. As regards **lexicography**, the word *urahāri* and the expression *Gūjara*[*tṛi*]-*hāra*[*ka*] occurring in l. 8, and *javā*, in l. 9, may be noticed. Urahāri appears to me to be the name of an *araghaṭa* or a well with a wheel to raise water up. In fact, in Gōḍvāḍ I found many such wells given strange names. Gūjara[tṛi], I think, is the same as Gurjaratrā. *Hāraka*, as suggested above in No. III, denotes a certain kind of measure, and *java*, of course, stands for *yava* or barley corn.

The record is dated **Thursday, the 13th of the dark half of Jyaishṭha in the [Vikrama] year 1233**, and refers itself to the reign of the *Mahārājādhirāja* **Śri-Kēlhaṇadēva**, ruling at **Naḍūla**. It then tells us that the *rājaputra* **Lākhaṇapālha** and the *rājaputra* **Abhayapāla**, proprietors (*bhōktṛi*) of **Sināṇava**, and sons of **Kirtipāla**, doubtless younger brother of Kēlhaṇa and donor of the Nāḍōl plates (above, Vol. IX. p. 68 ff.) made a grant conjointly with the queen **Mahibaladēvī** in the presence of the village *pañcha* (*pañcha-kula*) for celebrating the festival of the god **Śāṁtināṭha**. The grant consisted of barley corn measuring one *hāraka* as used in (the country of) Gūjaratṛi, from the *araghaṭa* or machine-well called Urahāri[1] and belonging to the village of **Bhaḍiyāuva**. The names of those who were witnesses to this benefaction are lost.

As regards the localities mentioned in this record, Sināṇava, which is also called Saṁnāṇaka in No. XVI, is doubtless **Sōnāṇā**, mentioned in the last epigraph. Bhaḍiyāuva also occurs in No. XVI, and is to be identified with **Bāḍvā (Barwa)**, 5 miles south-west of Lālrāī. **Samīpāṭī**, which occurs in l. 13, has been shown to be **Sēvāḍī**. **Gūjaratṛi** is mentioned also in No. XVI, and is the same as **Gurjaratrā** of the Daulatpurā charter of the imperial Pratīhāra Bhōjadēva I., which comprised the modern districts of Parbatsar, Mārōṭ and Ḍiḍwāṇā. **Naḍūla** is, of course, **Nāḍōl**.

## XVI.—LĀLRĀĪ STONE INSCRIPTION OF LĀKHAṆAPĀLA AND ABHAYAPĀLA; [VIKRAMA-] SAṀVAT 1233.

This inscription was, like No. XV, found amidst the ruins of a Jaina temple at **Lālrāī**. It consists of 13 lines of writing, covering a space of $8\frac{7}{8}''$ broad by $11\frac{1}{2}''$ high. The characters are **Nāgarī**. From the word *tathā* in l. 10 onwards, all the lines appear to have been afterwards added and are engraved in smaller characters. The peculiar form of the letter *ḍ* noticed above also occurs here. The language is **Sanskṛit**, and the whole of the inscription is in prose. As regards **orthography**, it may be noted that *sha* is used for *kha* three times (ll. 1, 2 and 6). In respect of **lexicography**, the following words deserve to be noticed: (1) *sīra* in ll. 5-6 and 12, which seems to have been used in the sense of, not 'a plough,' but 'a ploughman or cultivator' and (2) *sē*° in l. 7 which stands for *sēī*, a kind of weight mentioned in my remarks on No. X.

The record is dated on the **3rd of the bright half of Vaiśākha in the [Vikrama] year 1233**, and speaks of the princes (*rājaputra*) **Lākhaṇapāla** and **Abhayapāla** as the proprietors (*bhōktṛ*) of **Saṁnāṇaka** (*cf.* No. XV). It then states that Bhīvaḍā, Āsadbara, and other cultivators granted for their spiritual merit, four *sēīs* of barley-corn from (the field called) *Khāḍisīra* to the god **Śāṁtināṭha** in connection with the festival of the **Gūjaras**. The postscript (ll. 10-13) records that Āsadhara, Sīrōiya and other cultivators granted for the spiritual merit of Vilha, one *harōthu* (*hāraka* ?) of barley-corn from the machine-well of **Bhaḍiyāua (Bāḍvā)**.

## XVII.—SĀṆḌĒRĀV STONE INSCRIPTION OF KĒLHAṆADĒVA; [VIKRAMA-] SAMVAT 1236.

This inscription, like No. XIII, was found at **Sāṇḍērāv**, and is incised on a pillar in the *sabhāmaṇḍapa* of the temple of **Mahāvīra**. The record contains 10 lines of writing, which covers a space of 1′ 3½″ broad by 8″ high. The first 4 lines are well preserved and can be easily read, the remainder being too weather-worn to be deciphered with perfect confidence. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the inscription is in prose. As regards **orthography**, the only point that requires notice is the doubling of a consonant following an *r*. As regards **lexicography**, attention may be drawn to the words *drāēlā*, l. 8, and *sārā*, l. 9. The latter occurs also in the Mount Ābū inscription No. II (above, Vol. VIII. p. 220, l. 9), where the sense of 'care, supervision' has been assigned to it by Prof. Lüders.[13]

The first line of the inscription is an independent record in itself, and speaks of a column having been presented by **Rālhā** and **Pālhā**, sons of **Thāṁthā**, in memory of their mother. The second line contains the date, **Wednesday, the 2nd of the dark half of Kārttika in the [Vikrama] year 1236**, and the inscription refers itself to the reign of the *Mahārājādhirāja* **Śrī-Kēlhaṇadēva of Naḍūla**. Then we are told that his own house was placed by **Rālhāka**, son of Thāṁthā, together with his brother Pālhā and his sons **Sōḍhā**, **Śubhaṁkara** and others at the disposal of **Śrī-Pārśvanātha**, the god of **Shaṁḍēraka (Sāṇḍērāv)** in the *bhukti* or personal property of the queen **Jālhaṇadēvī**. Four *drāēlas* were to be given to the god annually by people residing in Rālhā's house. Lines 9-10 are apparently connected with line 1 and inform us that the pillar was restored for the spiritual benefit of **Dhāramati on Saturday, the 12th of the bright half of Jyaiṣṭha in the [Vikrama] year 1286**. Dhāramati is called *mātṛi* and was probably the mother of Rālhā and Pālhā.

## XVIII.—JĀLŌR STONE INSCRIPTION OF SAMARASIṀHADĒVA; [VIKRAMA-] SAṀVAT 1239.

This inscription was found at Jālōr, the principal town of the district of the same name, Jōdhpur State. It is incised on two lintels, one above the other and standing upon pillars near the north end of the principal cloister of an old mosque, now used as a *tōpkhānā*. The mosque is evidently constructed of materials supplied by demolishing old temples, and these two lintels appear to have been brought from an old Jaina shrine, as will be seen from the contents. Portions of these lintels have been cut off on their proper right in order to suit their new surroundings. The inscription on the upper lintel consists of 3 lines, and covers a space of 8′ 2½″ broad by 4″ high, while the lower one is composed of 4 lines, and extends over a space of 8′ 5″ broad by 5″ high. But though the inscriptions are thus engraved on two different stones, they really form one record. The portion extant is in a perfect state of preservation. The letters are here and there filled with mortar, but that does not prevent any one deciphering the record. The characters are Nāgarī. The letter *sh* is incised at least twice instead of *kh*, as in later Rājputānā inscriptions. The sign for *b* occurs, and differs from *v* only by a minute dot in the loop of the latter. The language is Sanskṛit, and the record is partly in prose and partly in verse. The verses are numbered, and are seven in all. In respect of orthography, the only point that calls for notice is the doubling of *t* in conjunction with a preceding *r*. As regards

[1] From the original stone.
[2] Read स्तंभक:.
[3] Read प्रदत्त:.
[4] Read °भुकौ. The akshara की may also be read कें°. Between the *aksharas* भु and की there is a small circle.
[5] [The reading may also be षंडेकि.—Ed.]
[6] These six letters are doubtful. [Perhaps परायणार्थं is meant.—Ed.]
[7] Read प्रदत्तं.
[8] Read सरकमानुवै:.
[9] Read प्रदेया:.
[10] Read गोष्ठिके:
[11] Read उथैड°.
[12] [The reading here may be सोढामातृ.—Ed.]
[13] Some such word as श्रेयोर्थं has probably to be supplied after °धारमति°.
[14] Read स्तंभक उद्धृत:.

lexicography, attention may be drawn to the word (1) *krama*, l. 1, which is used in the rather rare sense of "a foot," and (2) *taskara*, l. 2, which seems to have been employed in the sense of "banditti" or "unsettled tribes."

The record opens with an invocation (v. 1) to **Nābhēya**, *i.e.* **Ṛishabhanātha**, the first Tīrthaṁkara. It then refers itself in prose to the reign of the *Mahārāja* **Samarasiṁhadēva**, son of the *Mahārāja* **Kīrtipāladēva**. The latter, we are told, was a son of the *Mahārāja* **Āḷhaṇa**, who belonged to the lineage of the *Mahārāja* **Aṇahila**, "the moon in the sky (*i.e.* the family) of **Chāhumāna**." It further speaks of the Rājpūt (*rājaputra*) **Jōjala** as *rājya-chiṁtaka*, *i.e.* apparently a person looking after the administration of the kingdom. By the way we are informed that he held in scorn the multitude of the unsettled tribes (*taskara*) of the whole district of **Pīlvāhikā**. Then follow two verses, the first of which bestows conventional praise on Samarasiṁha and the second states that Jōjala was his maternal uncle. Pīlvāhikā is probably **Pīlvā** in the Parbatsar District of the Jōdhpur State on the frontiers of the Kishangaḍh State, and the *taskaras* are perhaps the **Bāvrīs**, who still abound there. Then follows a prose passage (ll. 4-5) which says that 'this *maṇḍapa*,' referring, of course, to the *maṇḍapa* where the inscription was originally engraved and which had been dedicated to the first Tīrthaṁkara, as appears from the invocatory and also the last verse, was caused to be made by the devout *Śrāvaka* **Seṭh Yaśōvīra**, son of Seṭh Yaśōdēva, of the **Śrīmāla family**. He had been joined in this work by all the members of the *gōshṭhi* and apparently also by his brothers Yaśōrāja and Jagadhara. Yaśōvīra is spoken of as waiting upon **Pūrṇabhadrasūri**, pupil of **Chaṁdrasūri**, the foremost of the **Chaṁdragachchha**. The date of the erection of the *maṇḍapa* was **Thursday, the 5th of the bright half of Vaiśākha of the [Vikrama] year 1239**. Three verses (4-6) are afterwards incised in praise of the *maṇḍapa*, and verse 7 expresses a wish for its permanence. Then we are told that the inscription was a composition of Pūrṇabhadrasūri, and the record closes with a benediction in favour of the *saṁgha* or **Jaina community**.

## XIX.—JĀLŌR STONE INSCRIPTION OF SAMARASIṂHADĒVA; [VIKRAMA-] SAṂVAT 1242.

The inscription is incised on a lintel in the second storey over the *mihrab* of the mosque referred to in No. XVIII. It consists of 6 lines of writing, and covers a space of 2′ 8⅝″ broad by 5½″ high. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the inscription is in prose. In respect of **orthography**, it is sufficient to notice (1) that the sign for *v* is used both for *v* and *b*, and (2) that *n* is doubled in conjunction with a preceding *r*.

The record contains four different statements, but all pertaining to one and the same temple. The first part speaks of a certain temple as having been built and consigned in the **[Vikrama] year 1221** to the care of **Dēvāchārya** for the dissemination of the true **Jaina law** (*sad-vidhi*). The temple was known as **Kuvara-vihāra** and contained the principal image (*mūla-biṁba*) of **Pārśvanātha**. The temple, we are told, had been constructed by the *Mahārājādhirāja* **Chaullakya Kumārapāla**, the devout worshipper of the Arhats (*param-ārhata*), the lord of the **Gūrjara country**, after being enlightened by *prabhu* **Hēmasūri**, upon the fort of **Kāṁchanagiri** belonging to **Jābālipura**, *i.e.* **Jālōr**. It will thus be seen that it was called Kuvara-vihāra after the **Sōlaṅkī** king **Kumārapāla** who built it. The second part says that it was rebuilt in **V.E. 1242** by the *bhaṁḍārī* **Yaśōvīra**, son of the *bhaṁḍārī* **Pāsū**, in accordance with the orders of the *Mahārāja* **Samarasiṁhadēva**, the ornament of the **Chāhamāna family** and lord of "this

[1] Some such word as दोर्दंड° might be supplied here.
[2] Restore °भातृ°.
[3] Read श्रेष्ठि°.
[4] Restore विस्तारेण.

country," *i.e.* apparently southern Mārwār. The third part informs us that on the 11th of the bright half of Jyaiṣṭha in the [Vikrama] year 1256, the work of installation was done, according to the behests of the royal family, by Pūrṇadēvāchārya, pupil of Dēvāchārya, in the case of the *tōraṇa*, etc. of (the image of) the god Pārśvanātha and also of the hoisting of the flag on the golden flag-staff on the original spire. The fourth or last part states that in V.E. 1268, on the day of the lamps festival (*dīp-ōtsava*), the ceremony of placing a golden cupola on the newly made central hall, intended for dramatic performances was carried out by Rāmachandrāchārya, pupil of Pūrṇadēvasūri.

## XX.—BHINMĀL STONE INSCRIPTION OF UDAYASIMHADĒVA; [VIKRAMA-] SAMVAT 1306.

This inscription was found in the walled enclosure of the temple of Nīlakaṇṭha-Mahādēva, about a mile from the city of Bhinmāl, in the Jaswantpurā District of the Jōdhpur State. It seems to have escaped the notice of the late Sir James Campbell when he visited the place, and has not, so far as I know, yet been published. It contains 25 lines of writing, which covers a space of 1′ $4\frac{1}{2}$″ broad by 1′ $9\frac{1}{4}$″ high. The inscription is somewhat weather-worn, and its proper right side is a little mutilated. Nothing of importance, however, seems to have been lost, and, with the help of the other Bhinmāl inscriptions which have been published, nearly the whole of the record can be read with certainty. The characters are Nāgarī. It is worthy of note that in lines 12 and 19 occurs the fraction $\frac{1}{2}$, and in l. 18 the fraction $\frac{1}{4}$, which are both denoted, according to the *rēkhā* system, the first by two and the second by one vertical stroke. Of these, the fraction $\frac{1}{4}$ occurs along with an integer, whereas the fraction $\frac{1}{2}$ stands by itself, and hence the two strokes denoting $\frac{1}{2}$ are preceded by a zero, represented by a small circle. Excepting the

[1] From the original stone. [2] Expressed by a symbol.

verse in lines 1-3, the record is in prose. The language is Sanskṛit, interspersed with solecisms and provincialisms. With regard to orthography, it is sufficient to say that a consonant is but occasionally doubled in conjunction with a preceding *r* and that in l. 17 *dimvasa* is used instead of *divasa*. As regards lexicography, the following words may be noticed: (1) *gōdhūma pakva*, l. 11, which seems, I think, to mean a crop of wheat ready for being reaped; (2) *muga* in ll. 11 and 19, obviously the well-known *mūṅg* pulse; (3) *chōshā*, i.e. *chōkhā*, ll. 11 and 19, a *dēśī* word meaning 'rice'; (4) *vyāsa*, ll. 12 and 22, a Brāhmaṇa, who recites the Purāṇas in public; (5) *nirvāpa*, ll. 12 and 19, a dole; and (6) *aṁga-bhōga*, unguents to be applied to the body immediately after bathing. Again, abbreviated forms of some words are used. Thus, *dra* stands for *dramma*, *ka* for *kalaśa*, *mā* for *māṇā*, *pā* for *pāyalā* or *pāyalī*, and *sē* for *sēī*. For the table of weights still observed in Gōḍvāḍ, see my remarks on No. X. *Kalaśa* is of course a measure of capacity.

The inscription opens with obeisance to Sūrya, and then follows a verse in praise of the same deity. The date is afterwards given, which is the 14th of the dark half of Āśvina in the [Vikrama] year 1306. The *Mahārājādhirāja* Śrī-Udayasiṁhadēva was the king and the *pañcha* consisting of the *mahaṁta* Gajasiṁha and others appointed by him was exercising local authority at Śrīmāla (Bhinmāl). The object of the inscription is to record two benefactions. One was made by two brothers, the name of the first of whom is gone but that of the second is Mahaṇasīha. They were both sons of the *ṭhakura* Udayasīha, and were Māthura Kāyasthas by caste. Forty *dramma* coins were deposited in the treasury of the god Jagatsvāmin, which was the name of the Sūrya divinity of Bhinmāl, as is proved by other inscriptions and the *Śrīmālapurāṇa*. Out of it were to be defrayed the expenses of the *divasa-bali* and so forth on the 14th of the dark half during the *yātrā* festival of Āśvina. As regards the fixed allowance of provisions for the *bali*, there was to be wheat 2 *sēī*, and boiled ghee 8 *kalaśas*. For *naivēdya* or offering to the god, *mūṅg* pulse 1 *māṇā*, rice (*chōkhā*) 2 *pāyalīs*, and ghee ½ *kalaśa* were to be taken. The *vyāsa* and the *abōṭī* were to be given each a dole of 1 *dramma*. For the *aṁgabhōga* or application of unguents, aloe-wood, camphor and saffron were to be used each worth 2 *drammas*. Flowers were to be bought worth 2 *drammas*, and betel-leaves and betel-nut each worth 1 *dramma*. As regards the bevy of courtezans, each was to be paid 1 *dramma*. All this arrangement was to be carried out every year.

The second benefaction was made on the same day for his spiritual merit by one Tathāka, who deposited 15 *drammas* in the treasury of the god Jagatsvāmin. Out of it, the expenses of the *bali* on the 5th of the dark half of Māgha were to be borne. The allowance fixed for the *bali* was: wheat 1¼ *sēī* and boiled ghee (?) *kalaśa*. The *naivēdya* was to consist of *mūṅg* pulse 3 *pāyalī*, rice 2 *pāyalī*, and ghee ½ *kalaśa*. The dole for the *abōṭṭī* was 1 *dramma*. As to the *aṁgabhōga* or unguents, the ingredients were to be each worth 1 *dramma*. The *vyāsas*, *aboṭṭīs*, *seṭhs*, and members of the *gōshṭhī* are then conjured to look after this arrangement. The *praśasti* was written by Dhruva Nāgula, son of Bāhaḍa. This Nāgula is no doubt the same as Nāgvala, father of Dēdāka, who wrote some of the other published Bhinmāl inscriptions.

## XXI.—SĀNCHŌR STONE INSCRIPTION OF SĀMANTASIṂHA; [VIKRAMA-] SAṂVAT 1345.

The stone on which the subjoined inscription is engraved was found at Sānchōr, the principal town of the district of the same name in the Jōdhpur State. It was lying loose in the prison-room attached to the local *kachērī*.

The inscription contains 16 lines of writing, which cover a space of $10\frac{1}{2}$″ broad by 1′, $2\frac{1}{4}$″ high. Though a few letters are weather-worn, and some are here and there mutilated,

[1] Read आश्विने. [2] Read पुष्प°. [3] Read कारणीयं.
[4] Read आत्मनः. [5] Read श्रेयोर्थं. [6] Read क्षेपिताः
[7] Read द्रम्माः
[8] [What is preserved of the first letter of this line looks like य. — Ed.]
[9] Read दिवसबलिः. [I think the reading is दिवस°.—Ed.] [10] Read कारणीयः.
[11] Read नैवेद्ये. [12] Read कारणीयं. [13] Read °श्रेष्ठिगोष्ठिक°.
[14] Read वर्त्तनीयं. [The reading may also be च द्रापनीयं.—Ed.] [15] Supply ध्रुव.
[16] Read प्रमाण°.

nearly the whole of the inscription can be read with certainty. The characters are **Nāgari**. The language is **Sanskrit**, and the record is in prose. As regards **orthography**, the only points that call for notice are (1) the doubling of a consonant following an *r*, and (2) the use of the form *sāmvata*° for *sāmanta*°. As to **lexicography**, the following words may be noticed: (1) *sthitaka* in ll. 5, 7, 8 and 11, and (2) *sēlahāthā* or *sēlahasta* together with their abbreviated forms in ll. 10, 12, 13 and 15. The first word seems to have been used in the sense of "a grant in perpetuity," and occurs in other inscriptions also, *e.g.* the Cintra *praśasti* of Sāraṅgadēva,[1] verses 53, 60, 61 and 66. The meaning of *sēlahasta* is not certain. And I know of only two records, *viz.* the Bhinmāl inscriptions Nos. XII and XV[2] where the word occurs. In the first of these, line 12 has *Śrīkaraṇīya-pañchakula-sēlahatha-Ḍābhīnarapālaṁ cha*. Here it is worthy of note that *sēlahatha* occupies a position between *pañchakula*, *i.e.* the modern *pañcha* and Ḍābhī-*narapāla*, *i.e.* a king of the Ḍābhi race. And it seems tempting, therefore, to suppose that *sēlahasta* was an officer of high rank, higher at any rate than the village *śrīkaraṇa*, which was held by one of the *pañchakula*. Again, the expression *sēlahath-ābhāvya* occurs in both the Bhinmāl inscriptions just referred to. It must be taken to mean "the income collected by a *sēlahatha*." Probably he was connected with the revenue department. Some of the abbreviations are worth noticing. Thus in l. 8 we have *Vīsa*° *dra*, which, I think, stands for *Vīsalaprīya-dramma*, a kind of coin, mentioned in Bhinmāl Inscription No. XVI, ll. 23-24. Again, in l. 12 *ka* is used in connection with *muga*, *i.e.* Phaseolus mungo. Here *ka* cannot be taken to denote *karsha*, as 1½ *karshas* of *muga* would be a ridiculously small quantity, but *kalaśa* which had till lately been employed for measuring corn.

The inscription commences by specifying the date, *viz.* **Monday, the 14th of the bright half of Kārttika in the [Vikrama] year 1345.** The *Mahārājakula* **Sāmvatasiṁhadēva** was the king, and at the holy place (*mahāsthāna*) of **Satyapura (Sānchōr)**, the *pañcha*, consisting of the *mahaṁta* **Hīrā** and others appointed by him, was exercising local authority. The epigraph then records a grant in perpetuity of 8 *Vīsalaprīya drammas* by the **Mēharas**[3] **Prabhā, Padama and Āsapāla.** All the Mēharas are requested to see to the continuance of this grant. According to this endowment, 1½ *kalaśas* of *mūga* were to be given annually, and the *sēlahasta* was requested to look after this matter. The *sēlahasta* is also desired to supervise personally the *yātrā* festival of the god Vāēśvara. Then follow, in token of approval, the sign-manuals of at least four Mēharas, of whom three were the donors named above and the fourth was the *sēlahasta* Pātala.

## XXII.—JUNĀ STONE INSCRIPTION OF SĀMANTASIMHADĒVA; [VIKRAMA-] SAṀVAT 1352.

This inscription was found at **Junā** or **Junā Bāḍmēr**, as the full name goes, in the Mallāṇī District, Jōdhpur State, about 12 miles south-west of Bāḍmēr, the principal town. It is engraved on a pillar in the porch of a dilapidated **Jaina temple** and contains 10 lines of writing which cover a space of $11\frac{1}{4}''$ broad by $7\frac{3}{4}''$ high. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the inscription is in prose, excepting the benedictory verse at the end. In respect of **orthography**, the only points that call for notice are (1) the employment of the sign of *v* for both *v* and *b*, and (2) the use of the number 2 after *Śrī* in l. 3 to mark the repetition. As regards rare or unusual words, those that deserve to be noted are *pāilā* and *Bhīmapriya vi(ṁ)śōpaka* in l. 7. *Pāila* and *viṁśōpaka* have been already explained. *Bhīmapriya* appears to have been the name of a kind of *viṁśōpaka* coin. Attention may also be drawn to the word *lāga* in l. 8, which means a cess, as previously explained (No. XI above.)

The record opens with the date, **the 4th of the bright half of Vaiśākha in the [Vikrama] year 1352.** On the aforesaid day, during the victorious reign of the *Mahārājakula* **Śrī-Sāmantasiṁhadēva**, the *mahaṁta* **Chīrāsēla, Vēlāula**, the *bhaṁḍārī* **Migala**, and others appointed by the king to draw up documents, made a religious grant at **Bāhaḍamēru** to the gods **Vighnamardana-Kshētrapāla** and **Chaumḍarāja**, in the temple of **Ādinātha**. The grant consisted of a *pāilā* from every incoming or outgoing caravan exceeding ten camels and twenty bullocks In default of this payment in kind, ten *Bhīmapriya viṁśōpakas* were to be charged. The grant was to be distributed equally between the two gods. In l. 8 is recorded the approval of this cess (*lāga*) by the *mahājanas* or local bankers.

Bāhaḍamēru is, of course, **Bāḍmēr**, not the place now known by that name which is comparatively a modern city, but **Junā Bāḍmēr**, the old Bāḍmēr where the inscription was found.

## XXIII.—JĀLŌR STONE INSCRIPTION OF SĀMANTASIṀHADĒVA; [VIKRAMA-] SAṀVAT 1353.

The inscription is engraved on a pillar in the *tōpkhānā* at Jālōr in the main or western cloister near the south end. It consists of 27 lines of writing, and covers a space of $4\frac{3}{4}$″ broad by 1′ 8″ high. The characters are **Nāgarī**. The sign for *sh* is used to denote *kh*. The language is **Sanskṛit**, and the whole of the inscription is in prose. As regards **orthography**, the only points that call for notice are (1) the occasional use of *v* for *b* and (2) the doubling of *ṇ* in conjunction with a preceding *r* in *Suvarṇṇa-girau*, l. 3. In respect of **lexicography**, attention may be drawn to the expression *niśrā-nikshēpa-haṭṭa*, in ll. 22-23, the meaning of which is uncertain, and to the word *bhāṭaka*, in l. 24, which seems to have been used in the sense of *bhāḍā* or rent. The following sense of the phrase *niśrā-nikshēpa-haṭṭa* may, however, be suggested as probable. *Haṭṭa* is, of course, a bazar. *Niśrā* is probably the same as *nisār*, which, in Mārwār at any rate, seems to mean an export in contradistinction with *pasār* which signifies an import. The expression might, therefore, mean a place in, or a portion of, the bazar for storing goods to be exported.

The record opens with the date, *viz.* **Monday, the 5th of the dark half of Vaiśākha of the [Vikrama] year 1353.** It then speaks of the *Mahārājakula* **Sāma(n)tasiṁha** as reigning at **Suvarṇagiri** and **Kānhaḍadēva** as "subsisting on his lotus-like feet and bearing the burden of administration (*rājya-dhurā*)."[10] Suvarṇagiri is the same as Kāñchanagiri of No. XIX., and is the name of the hill on which the fort of Jālōr stands. Kānhaḍadēva, as we shall see further on, was a son of Sāmantasiṁha. The object of the inscription is to state that a certain **Narapati** made, for the spiritual welfare of his wife **Nāyakadēvi**, the grant of a bazar building or warehouse for storing goods to be exported. Out of the rent accruing therefrom was to be offered the *paṁchamī-bali* every year in the temple of the god **Pārśvanātha** by the members of the *gōshṭhi*. Narapati, in making this donation, had been joined by the members of his family and

[1] Read प्रयच्छन्ति. [2] Read °मार्गीय°. [3] Read ऊर्द्ध.
[4] Read अर्द्धार्द्धेन. [5] [On the impression the reading seems to be चौसो.—Ed.]
[6] Read मानितः. [7] Read बहु°. [8] Read भुक्ता.
[9] Read भूमिस्तस्य.

[10] This shows that Kānhaḍadēva was the *yuvarāja* or heir-apparent and had been given an actual share in the administration of the kingdom. This is quite clear from a short inscription found at Chōhṭan, 30 miles south-west of Bāḍmēr, the transcript of which is as follows :—

1 ओं सं १३५५ वर्षे फागुण
2 [व]दि ११ [अ]द्येह महाराज-
3 कुल[श्री]सामंतसिंघदेव-
4 राजश्रीकान्हडदेवराज्ये

by a certain Guṇadhara, who is called a *saṁghapati* and was a resident of Suvarṇagiri itself A list of the members of his family is also given, as well as a genealogy of them. The father of Narapati was the *sōnī* Mahaṇasiha, who was a son of the *ṭhakura* Jasa, who again was a son of the *ṭhakura* Âṁbada. Mahaṇasiha had two wives, named Mālhaṇi and Tihuṇā. From the first he had the sons Ratanasiha, Ṇākhī, Mālhaṇa and Gajasiha, who are called *sōnīs* and from the second, Narapati, Jayatā and Vijayapāla, who are also called *sōnīs*. Narapati had two wives named Nāyakadēvī and Jālhaṇadēvī. His sons from the former only are mentioned, *viz.* Lakhamīdhara, Bhuvaṇapāla, and Suhaḍapāla. This and the mention of the spiritual benefit (*śrēyas*) of Nāyakadēvī as the object of the record perhaps show that, at the time of the donation, the latter was dead and the second wife had but recently been married and that he had no children from her. Of the members of his family, Narapati thus appears to have been joined, in making the gift, by his second wife and his sons from the first wife.

It is worthy of note that Narapati himself, his brothers and his father are called *sōnīs*. *Sōnī* cannot possibly mean a goldsmith here, as both the grandfather and the great-grandfather of Narapati are styled *ṭhakura*. Now, Sōnī is a well-known clan amongst the three Bania classes of Mārwār, *viz.* Ōsvāl, Sarāvgī, and Mahēsarī. The last may be left out of account, because they are not Jainas. Sarāvgīs, though they are Jainas, are, however, not found in the southern parts of Mārwār. Narapati and others were consequently, in all likelihood, Ōsvāl Sōnīs. Of the Mahēsarī Sōnīs it is stated that their *nakh* or original tribe was Sōnigarā. What is true of the Mahēsarī Sōnīs is, in all probability, true of other Sōnīs also. It is a well-known fact that many Rājpūt tribes, for avoiding Muḥammadan oppression and so forth, became Jainas, and merged themselves into the Bania classes. Sōnigarā appears to be the name of one of such tribes. It is the name of a celebrated clan of the Chōhāns, and is commonly but correctly derived from Sōngar, *i.e.* Suvarṇagiri, the hill of the Jālōr fort itself. Narapati's inscription was doubtless engraved in some temple on this fort, though the pillar, on which it is incised, seems to have been taken away to serve as material for the construction of the mosque, now called *tōpkhānā*, in the city of Jālōr. When Narapati, his father, and brothers are called Sōnīs, what is meant is that they were Ōsvāl Sōnīs, but that they were perhaps originally Sōnigarās, and that amongst them Mahaṇasiha first became a Jaina, as he is called a Sōni and his father and grandfather, *ṭhakuras*.

## XXIV.—KOṬ-SOLAṄKIYĀ INSCRIPTION OF VAṆAVĪRA; [VIKRAMA-] SAṀVAT 1394.

This inscription was found at **Kōṭ-Sōlaṅkiyā**, about 15 miles north-east of Dēsūrī. It is engraved on a pillar of a Jaina temple now in ruins. I edit the inscription from two excellent estampages, kindly supplied to me by Munshi Devi Prasad, Munsiff of Jōdhpur.

The record contains 8 lines of writing, which cover a space of 11″ broad by $5\frac{7}{8}$″ high. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the record is in prose except one verse in ll. 7-8 at the end. In respect of **orthography**, the only point that deserves to be noted is the doubling of a consonant in conjunction with a preceding *r*, in *ā-chaṁdrārkkaṁ*, l. 6.

The inscription is dated **Friday, the 13th of the bright half of Chaitra in the [Vikrama] year 1394 elapsed**, and refers itself to the reign of the *Mahārājādhirāja* **Śrī-Vaṇavīradēva**. It then states that at **Āsalapura**, the *rāuta* **Mūlarāja**, of the family of the *rāuta* **Mālhaṇa**, grandson of the *rāuta* **Sōma** and son of the *rāuta* **Bāṁbī** and his wife **Jākhaladevi**, granted, for the spiritual merit of his parents, **Ḍhikuyaū** together with a *vāḍī* or orchard, on the occasion of hoisting the flag of the temple of **Pārśvanāthadēva**, in the presence of the *rāuta* **Bālā**, **Lumbhā** and **Nīmvā**.

[1] Read °देवी°. [2] Read °कुटुंब°. [3] Read °देवी°.
[4] Read °निमित्तं. [5] Read दत्तं. [6] Read तद्भाटकेन.
[7] Read °गोष्ठिकै: and °वर्षं. [8] Read श्राचन्द्रार्कं. [9] Read °बलि:.
[10] Read कार्यं:.

Dhikuyaü seems to be the name of a machine-well. Āsalapura occurs also in another inscription at Kōṭ-Sōlaṅkiyā, and appears to have been the old name of that place.

## XXV.—NĀḌLĀĪ STONE INSCRIPTION OF RAṆAVĪRADĒVA; [VIKRAMA-] SAṂVAT 1443.

This inscription was found at **Nāḍlāī**, and is, like No. VIII., engraved on a pillar in the temple of **Nēminātha** called **Jādvājī**, situated on a hillock to the south-east of the village. It contains 16 lines of writing, which cover a space of 8″ broad by 1′ 2″ high. The characters are **Nāgarī**. The language is **Sanskṛit**, and the whole of the inscription is in prose. It is worthy of note that each line begins with two vertical strokes. In respect of **orthography**, it is sufficient to note that consonants following *r* are, as a rule, doubled, and that the final *d* is twice represented as if it were *da*, *Śrīmada*°, l. 7, for *Śrīmad*° and °*jagada*°, l. 15, for °*jagad*°.[9]

The record commences by specifying the date, which is **Friday, the 14th of the dark half of Kārttika in the [Vikrama] year 1443 elapsed.** It speaks of the Rāja **Raṇavīradēva**, son of the *Mahārājādhirāja* **Vaṇavīra of the Chāhamāna** lineage as then reigning. It then records the rebuilding of the structure (*prāsāda*) of **Śrī-Nēmīśvara**, the ornament of the Yadu race, by **Vinayachandrasūri**, the occupant of the *paṭṭa* or pontifical seat (*i.e.* the successor) of **Dharmachandrasūri**. The latter, we are told, belonged to the line of **Mānatuṅgasūri**, the sun in the sky of the Bṛihadgachchha.

## XXVI. AND XXVII.—SĀNCHŌR STONE INSCRIPTIONS OF PRATĀPASIṂHA; [VIKRAMA-] SAṂVAT 1444.

These inscriptions are engraved on two pillars, which now form part of the stables attached to the *kachēri* at **Sānchōr**. Doubtless they originally belonged, as will be seen in the sequel, to an ancient temple, not a trace of which now remains. The first record contains 30 lines of writing which cover a space of $10\frac{1}{2}''$ broad by $1'\ 9\frac{1}{4}''$ high, and the second 17 lines of writing which cover a space of $10''$ broad by $1'\ \frac{3}{4}''$ high. The latter is in good preservation, but the former has about the middle of it a few letters here and there mutilated. The two together really form one record. This is evident from the fact that the last verse which occurs at the end of the first part is numbered 3, and the verse with which the second part opens is marked 4, instead of 1 as it would have been if the latter had really been intended to be a separate record. We shall, therefore, speak of the whole as one inscription. The characters are **Nāgarī**. The language is **Sanskṛit**. Excepting the initial words *Ōṁ namaḥ Śivāya*, the inscription is in verse up to l. 32, and the rest in prose. As regards **orthography**, it is sufficient to note that a consonant is but twice doubled in conjunction with a preceding *r*, and that *y* is substituted for *j* once in Yēshṭa(ṭha)°, l. 33. In respect of **lexicography**, the following words may be noticed: (1) *grāsa*, l. 10, and (2) *pāilā*, l. 11. *Grāsa* here seems to be used in the sense of "gift," and not in its usual sense noted above in my remarks on No. V. *Pāilā* has already been explained (above No. X).

The inscription opens with obeisance to the god Śiva, and then, curiously enough, is cited a verse which forms the well-known benedictory stanza of Kālidāsa's *Śākuntala*. This is followed by a verse (2) which invokes the protection of Nīlakaṇṭha for the then reigning **Chāhamāna** prince **Pratāpasiṁha**, and of Pārvatī for his queen **Kāmalladēvī**, daughter of **Subhaṭa**. In the

[1] Read चवस्थ° and °श्रीमद्वृह°.
[2] Read °श्रीमत्तुंग°. [The necessity for this correction is not apparent.—Ed.]
[3] Read °श्चरणोत्पलाय°. [4] Read °रत्नस्य°. [5] Read °जगद्विषादः.
[6] Read प्रासादः. [7] Read समुद्रधे. [8] Read नंदतात्.
[9] [There seem to be two more indistinct *akshara*s at the end of the line.—Ed.]

**Nāṭyōṭaka** belonging to[1] the **[Bamvū]vānaka** district (*sthalī*),[2] and in the west of the field of **Dāraka** in the village **Ēkalika**, and in the north of the field of Âditya; 120 *pādāvartas*, and the **Nimba** pond (*vāpī*) containing[3] 32 *pādāvartas*, in the east of the road on the north-western boundary (*of Nāṭyōṭaka*); 130 *pādāvartas*, held by[4] Gōksha, on both banks of the (*river*) **Vatsa-vahaka**[5] and within the upper part of the Khaṇḍabhēdaka tank (*taṭāka*) on the south-western boundary of **Dē[va]rakshitapāṭaka** belonging to the **Nimbakūpa** district (*sthalī*); 100 *pādāvartas*, held by Dhārmika, on the northern boundary of the village **Chitrakasthalya** belonging to the **Kadambapadra** district (*sthalī*); and the Avatara pond (*vāpī*), held by Kōdhaka, on the eastern boundary of the ground[6] of **Kadambapadra**;—

(L. 29.) "this (*land*), with the *udraṅga*, with the *uparikara*, with the *vāta-bhūta-dhānya-hiraṇyādēya*, with (*the right to*) eventual forced labour, not to be meddled with by any royal officers, according to the maxim of *bhūmichchhidra*, to the two Brāhmaṇas Rōgha and Śyēna of the Vājasanēya-Mādhyandina (*school*) and of the Kauśika *gōtra*, for the performance of the rites of the five great sacrifices, (*viz.*) *bali*, *charu*, *vaiśvadēva*, *agnihōtra*, and *atithi*, to last as long as the moon, the sun, the ocean, the rivers, and the earth shall exist, to be enjoyed by (*his*) sons, grandsons, and (*further*) descendants, with libations of water, as a *brahmadēya*."

Then there follow the usual admonitions, and two verses of Vyāsa. The last line runs:—

"(*This is*) the signature of Myself, the *Mahārāja Śrī*-**Dharasēna**. (*This edict was*) written by the *sandhivigrahādhikrita* **Skandabhaṭa**. The *dū*[*taka*] (*was*) **Chirbira**. **The year 252, the 15th (tithi) of the dark (fortnight) of Vaiśākha.**"

The date has to be referred to the Gupta-Valabhī era of A.D. 319, and the specified month places the record in A.D. 571. The *dūtaka*, Chirbira, is mentioned in five other grants of Dharasēna II.[7] The writer, Skandabhaṭa, served both **Dharasēna II.**[8] and his father and predecessor **Guhasēna.**[9] I am unable to identify the geographical names mentioned in the grant.

[21] This is an abbreviation of दूतक:. Compare *Gupta Inscr.* p. 167, note 8; *Ind. Ant.* Vol. VII, p. 70, text line 18, and Vol. VIII, p. 303, note 12; *Bhavnagar Inscr.* p. 87, text l. 18.

## POSTSCRIPT.

I avail myself of this opportunity for correcting certain mistakes which I have committed in two former articles on Valabhī grants.

1. In Vol. III. p. 323, l. 11, read: "**Hariyānaka**, which belongs to **Akshasaraka**, (*a subdivision*) of the **Hastavaprāharaṇi**." On *prāpīya* (for *prāpya*) see now above, p. 81, note 1.

2. When reading with me the Nōgāwā plates (Vol. VIII. No. 20), Mr. T. K. Laddu justly observed that *uchyamāna* cannot mean 'said,' but means 'being said, about to be mentioned.' Consequently, the expressions *uchyamāna-bhuktau* and *uchyamāna-vishayē* (Vol. VIII. p. 189) are intended for *Navagrāmaka-bhuktau* and *Chandraputraka-vishayē*. Likewise, on p. 193, text lines 38 f. and 40, *uchyamāna-chāturvvidya-sāmānya* stands for *Navagrāmaka-chāturvvidya-sāmānya*; and on p. 198, text line 43, the same term represents *Chandraputraka-chāturvvidya-sāmānya*. In the Index to Vol. VIII. the two districts **Navagrāmaka-bhukti** and **Chandraputraka-vishaya** have to be entered accordingly.

---

## No. 6.—JANKHAT INSCRIPTION OF THE TIME OF VIRASENA.

By F. E. Pargiter, M.A., I.C.S. (Retd.)

This inscription was found by Mr. R. Burn in the village of **Jānkhaṭ** in the Tirwa tahsil of the Farukhabad District, United Provinces, and he gave a brief notice of it in the *Jour. R. As. Soc.*, 1900, p. 553. It is engraved on the back of a carved stone, which was among the collection of carved stones called the *Gawān dēvi* or "village gods." Mr. Marshall sent Dr. Fleet an ink-impression and an estampage of it, together with a photograph of the collection of village gods, which shows the stone amid a quantity of carved stones and fragments of all kinds; and at Dr. Fleet's request I have edited the record.[1] The front of the stone appears to present in bold relief the head and open mouth of some animal.

Above the inscription are three emblems occupying a triangular space $2\frac{1}{4}''$ high and $3''$ wide. The middle and highest emblem represents a tree, and on each side is that of a "chaitya."—The inscription occupies a space $7\frac{1}{4}''$ high and $4\frac{1}{4}''$ wide, and is arranged in seven lines: there seem to be some traces of an eighth line, but the tops of the letters do not always maintain a level. The letters are in good preservation except at the beginning of the lines. The first letter is partially obliterated in each of the first four lines. The last three lines have suffered most, for the first letter in each has disappeared, the final letter is blurred, and most unfortunately the middle letters have gone entirely. From the appearance of this middle portion of the lower half of the inscription Mr. Burn inferred that it had been used to sharpen chisels on. This defacement extends also into the fourth line where one or two letters have been obliterated. The only lines therefore that are fairly complete are the first three.—The characters are Brāhmī, well made and clearly cut, most of which are about $\frac{1}{8}''$ high. I will consider their form when discussing the age of the inscription: here I need only say that they include the numeral symbols for 3, 4 and 10, and that the short superscript *i* is made to do duty for the long vowel.—The language may be either mixed dialect or Prākṛit; perhaps rather the latter. We have the genitive singular in *sa* twice, and the genitive plural in *naṁ*. The genitive plural *gishmānaṁ* is peculiar; we should expect the genitive singular. The same genitive plural, however, is found in the form *gimhāṇa* in inscriptions at Nāsik, above, Vol. VIII, p. 60, line 1, and p. 73, line 12; and we have also *hēma(ṁ)tāṇa*, p. 94, line 1, where, again, we should expect the genitive singular. These genitives were perhaps devised on the analogy of the quite correct *vasāna* = *varshāṇāṁ*, ibid., p. 73, line 12.

[1] I have to thank him for various corrections and emendations.

The inscription has suffered so much damage that we can form no opinion as to what its purport was after the opening part of it. Its interest lies in the point that it is a lithic record of a king, the Svāmin Vīrasēna, who may be identified with practical certainty with a king Vīrasēna of whom we have coins. Professor Rapson has described and figured one of the coins in the *Jour. R. As. Soc.*, 1900, p. 115, and notes there certain symbols on it which have some general resemblance (but nothing specific except the tree) with the symbols on this stone. And Mr. V. Smith has described fourteen of them, and figured two, in his Catalogue of Coins in the Indian Museum, Calcutta, p. 197, and conjectures there (p. 191 f.) from the provenance of them that Vīrasēna was a king in the Gangetic Doab about A.D. 300.

The record is dated in the thirteenth regnal year of Vīrasēna,[1] and on the eighth day in the fourth fortnight of the hot season. As no year of an era is given and the date of Vīrasēna is not known, we can only fix on palæographic grounds the period to which the record may be referred; and the following remarks are offered towards elucidating this point. The letters that occur clearly are *k*, *g*, *t*, *n*, p, *m*, *y*, *r*, *v*, *sh* and *s*, and they may be compared with the Brāhmī forms in Tables II and III in Bühler's *Indische Palæographie*. The facts to be ascertained must be, not what are the earliest records with which letters found in this inscription tally, for particular forms, such for instance as those of *k* and *n*, persisted with little or no modification for several centuries, but rather what was the period when any later or new forms found in this inscription came into use.[2] The forms of certain of these letters, namely, *m*, *y*, *v*, and *sh* do not occur in Table II and are first found in Table III; hence these letters deserve most notice and attention may be confined to Table III. The form of *m* resembles most those in columns VI and VIII of that table; that of *y* those in columns I, II, IX and XIII; that of *v* those in columns I and VIII; and that of *sh* the form in column XIV. The forms of *y* and *v* are therefore found in inscriptions varying in date from the 1st century B.C. to the 2nd century A.D.; that of *m* in the 1st and 2nd centuries A.D.; and that of *sh* not until the second century A.D. The most significant therefore of these letters is *sh*, and its form shews that the inscription cannot be earlier than the 2nd century A.D. There are two other features which point to a somewhat later period. First, the mark for the long vowel *ā*, in the letters portrayed in Table III, is formed by a short horizontal bar drawn to the right from the head of a consonant, but here the bar always shows a slight curve upwards—a tendency that became more pronounced in one form of this vowel in the later Gupta alphabet. Secondly, the heads of the letters in this inscription are slightly, yet quite distinctly, wedge-shaped, and this feature also became well developed in the Gupta alphabet. It would therefore appear that this record should be assigned to a time later than the second century, that is, to the 3rd century A.D., and very possibly to the latter part of it; and this agrees with Mr. V. Smith's conjecture regarding Vīrasēna's age, mentioned above.

## TEXT.

1 Svamisa[3] Virasēnasa
2 saṁvatsarē 10 3 gīshmā-
3 naṁ pākshē[4] 4 divasē[5]

[1] Mr. Burn read the year rightly, as 13, in his account mentioned above. Mr. V. Smith read it as 113; but the character before that for 10 is clearly *rē*, the last syllable of *saṁvatsarē*.

[2] [This principle, however, must be applied with caution: any particular record may easily give the first available instances of types found in it, and so may carry them back to earlier times than had been previously established for them.—J. F. F.]

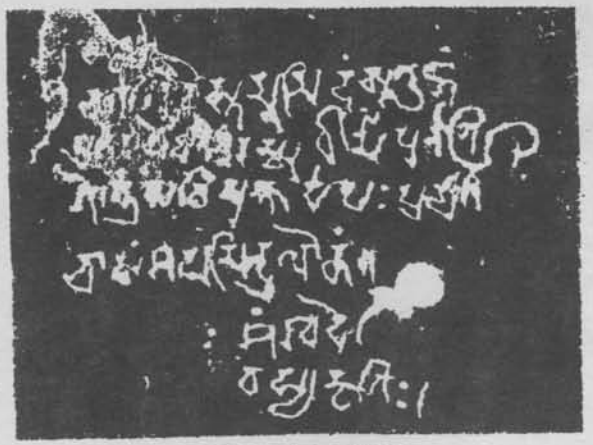

[3] Read *svāmisa*. There is a dot above the *sva*, which looks like an *anusvāra*, but may be only a flaw in the stone.

[4] Read *pakshē*.

[5] There is a dot above the *sē*, which looks like an *anusvāra*, but may be only a flaw in the stone.

## No. 7.—TWO RECORDS ON THE PILLAR AT KOSAM.

By F. E. Pargiter, M.A., I.C.S. (Retd.)

The two following inscriptions were noticed by General Sir A. Cunningham in his description of the pillar at Kosam in his Archæological Survey of India, Vol. I, p. 310. Ink-impressions of them were sent me by Dr. Fleet which he received from Dr. Konow, and at his request I have written this paper on them.

### A.—A verse of the 7th or 8th century, A.D.

This is described by General Cunningham thus:—"The next inscription in point of time consists of six lines in characters of the 6th or 7th century. As this record is placed on the lower part of the shaft, from 3 to 4 feet beneath the present ground level, and as the lines are perpendicular to the sides of the shaft, I infer that at the time when it was inscribed, the pillar was still standing upright in its original position, and that the surrounding buildings were still in perfect order. This inference is fully borne out by Hwen Thsang's account, etc."

It is written in the Gupta character of the latter part of the 7th century. The letters are large and somewhat irregularly formed, varying from 1½ to 1¾ inches in height. The language is Sanskṛit, and the composition is a verse in the *upēndravajrā* metre written in four lines with the author's name added in the fifth and sixth lines. But the engraver has marred the appearance of the verse by the manner in which he has inscribed it. The first line contains the first *pāda* of the verse, but in consequence of his making the first 8 *aksharas* of the second line somewhat small and close he got into it not only the second *pāda* but also the first 3 *aksharas* of the third *pāda*. The third line then contains the remainder of the third *pāda* and the first 3 *aksharas* of the fourth *pāda*; and the fourth line, receiving only the remaining 8 *aksharas* of that *pāda*, looks not only incomplete but also erroneous in beginning with the word *cha*. Consequently also the metre appears faulty and the meaning is obscured. When properly adjusted the *pādas* read aright and the metre is correct. The end of the second line is ornamented with a peculiar scroll, in which the symbol for the vowel *i* in the final *ti* has been continued in a line which bends around beneath the letter *t*, ascends on its right and finishes in a right-handed curve further to the right. The incorrect structure of the lines suggests an explanation of this scroll. The portion of the scroll along the right side of the letter *t* is an upright line. The first half of the verse ends with *su-dhīryaṁ*, but the engraver, thinking that it ended with

[1] This *akshara*, judging from what remains of it and from the space which it occupies, would seem to be a double consonant, of which *kh*, *ch* or *v* is the second member. It may perhaps be *sva* or *svā*.

[2] The fourth fortnight of the hot season would be the last fortnight of it, if we should reckon six seasons in the year, and would be (for the time of our record) about the first half of June: with the year of three seasons this fortnight would be about the first half of April.

the second line, put the usual bar there, and the mistake was rectified by turning the bar into a meaningless scroll, continuing its lower portion backward beneath the *t* into the vowel *i* and its upper portion forward in the curve to the right. There was not sufficient room to insert the single bar after *su-dhīryaṁ*, but the double bar at the close of the verse occurs correctly at the end of the fourth line.

The letters are of the Gupta character and resemble most closely those of the Aphsad inscription of about A.D. 675, portrayed by Bühler in his *Indische Palæographie*, Table IV, cols. XVIII and XIX (especially the former), with a tendency in some cases towards the shapes in the Multāi inscription of A.D. 708-9, and of the Dīghwā-Dubauli inscription of A.D. 761-2, cols. XX and XXI in that Table, such as the *dh* (l. 2). At the same time some of the letters have the earlier forms found in the Kahāum inscription of A.D. 459, col. V in that Table, such as *i* and *bh* (l. 1), *v* (l. 3), *ś* (ll. 4 and 5) and *k* (l. 6), though *k* also appears in its form in col. XVIII in the fourth line. The *n* has a peculiar shape, an upright line with a horizontal bar attached to its left side, as in *punāti* (l. 2), and *Indra* (l. 4), thus approximating to its modern form. The inscription may therefore be assigned to the end of the 7th or the beginning of the 8th century, A.D.

Cunningham inferred from Hiuen Tsang's account of this spot that this pillar was standing erect at that traveller's visit there during the early part of the 7th century in Harsha's reign, and the manner in which he says this verse is engraved (quoted above) shows that the pillar was also erect when it was engraved, which appears to have been at the end of that century or the beginning of the 8th century. He says the pillar is a Buddhist structure, and the earliest inscription which it bears is an incomplete record which he ascribes to the 4th or 5th century.[1] Buddhism must have retained its possession of this spot during Harsha's reign, for Mr. V. Smith says "Harsha himself distributed his devotions among the three deities of the family, Śiva, the Sun and Buddha; .... But, in his later years, the Buddhist doctrines held the chief place in his affections; and the eloquence of the Chinese Master of the Law induced him to prefer the advanced teaching of the Mahāyāna sect to the more primitive Hīnayāna doctrine of the Sammitīya school with which he had been familiar previously."[2] The question arises whether this verse half a century or more later is a Buddhist or brāhmaṇical inscription. I am not sure whether the reference to Indra's world could be a Buddhist beatitude. It seems more like a brāhmaṇic benediction, and this is supported by the facts that the verse is in Sanskṛit and that the author's name is Śaṅkha-dēva, which might be a synonym for Vishṇu. If then this verse be a brāhmaṇical inscription, may we infer that it marks the time when Brāhmaṇism ousted Buddhism from this spot?

## TEXT.

1 Ōm[3] Ya [īkshat]ē stambham=idaṁ su-tuṅgaṁ
2 [graḥ-ārucau] pāti[4] naras=su-dhīrmaṁ[5] punāti
3 gōttraṁ sa vimukta-pāpaḥ[6] prayāti
4 ch=āsaṁśayam=Indra-lōkaṁ ||
5 Śaṁkha-dē-
6 vasya kṛitiḥ |

[1] A. S. I. Vol. I. pp. 309-10.
[2] *Early History of India*, p. 291.
[3] Expressed by a symbol.
[4] These two words and the following *sa* are so much blurred that they are far from clear, but what remains of the letters viewed according to the requirements of the metre suggests the reading given.
[5] Read *dhīryaṁ*.
[6] The first of these two *p*'s differs considerably from the normal shape, but there can be no doubt that it is a *p* badly formed.

## TRANSLATION.

The man, who fixes his look on this very tall pillar, preserves great fortitude when the planets are adverse:[1] delivered from sin, he purifies his kindred and proceeds without doubt to Indra's world.

The composition of Śaṅkha-dēva.

### B.—An inscription of A.D. 1565.

This is described as two inscriptions by General Sir A. Cunningham in the following words[2]:—"This [that is, a brief record of Akbar's time] is followed by a short record of a *soni*, or goldsmith, in three lines, below which is a long inscription dated in Samvat 1621, or A.D. 1564, in the early part of Akbar's reign, detailing the genealogy of a whole family of goldsmiths. It is in this inscription that the name *Kōsámbipura* occurs, the founder of the family, named Anand Râm Dâs, having died at Kosam." He thus pronounced the first three lines of this record to be one inscription and the remainder a separate inscription, but they appear to me to be one, for the following reasons. First, the style of the writing is exactly the same throughout. Secondly, the space between *Srī-Gaṇēsaḥ* in line 1 and *Saṁbat* 1621 in line 4 is merely the size of a single row of letters and is just about the interval that would ordinarily be left between the invocation to a deity and the body of the composition. The remainder of line 1 and lines 2 and 3 have been inserted by curving the writing upwards to the right so as to widen out the space to the right between lines 1 and 4: thus there is just room for the word *mukha* between *bānān* in line 1 and *samaai* in line 4, and as lines 1 and 2 curve away upwards, room is found to insert *dēv Bhairav* beneath *darpan sōnīnha* and above the end of line 4. The whole inscription looks as if it had been written at first thus—*Srī-Ganēsaḥ* as the heading and then *Saṁbat 1621*, etc., to the end; and as if the words *bānān* to *dēv Bhairav* had been added afterwards, the writing being curved upwards so as to make room for these latter words in the manner described above. Thirdly, if lines 1-3 constituted a separate inscription, there was no reason to curve the writing, whether it were written before or after lines 4-18; because if written before, there would have been a clear space and the inscription would naturally have been written compactly in two or three straight lines conformably to its invocation; and if written afterwards, it would have been placed higher (for there is sufficient unused space above) and then written straight similarly. Fourthly, if lines 1-3 constituted a separate composition, it contains no personal name but merely refers vaguely to the "city goldsmiths"; whereas, if the whole is one inscription, the addition in lines 1-3 would be a natural after-thought as a preface to the subsequent names and in order to record a prayer to Bhairava on behalf of them collectively. No argument can be based on the fact that the prayer to Bhairava follows the invocation to Gaṇēśa, because the invocation and the prayer are in one and the same inscription according to either theory. Lastly, the inscription seems, when read as a whole, to give a better sense than when treated as two separate compositions—a point referred to more particularly at the end of this article.

The inscription is written in characters, well-made and about ¾ inch high, which (that is, such of them as occur) have a close resemblance to ordinary Nāgarī. The chief puzzle occurs in the letter *sh*, which, if read as such, produces meaningless words. The key to explain this difficulty lies in the fact that in the modern vernacular of Upper India this letter, when not initial and uncompounded, is very commonly pronounced *kh*; thus, *purush*, 'a man', appears as *purukh*, *ṛishi*, 'a rishi', as *rikhi* and *rikh*, *tushār*, 'mist, frost', as *tukhār*, and so on. This modification of the letter *sh* appears to have been so generally established, that the character

[1] This is a possible Sanskrit expression, though certainly peculiar. It is not, however, stranger than various compound words found in the Kāvya literature, and the author was limited in his choice of words by the metre.

[2] A. S. I. Vol. I. pp. 310-11.

for it is used here uniformly to express *kh*.[1] The proper character for *kh* seems to be that, which is used only once, namely, in the word *Lakhimī* (=Lakshmi) in line 7, and which approximates to the form of *kh* in Bengali.[2] Everywhere else *kh* is expressed by the character for *sh*; and this is done whether *kh* represents an original *sh* as in the word *purukh* (l. 9), or whether it is a genuine *kh* as in the words *mukha* (l. 2) and *likhītē* (l. 5), or whether it represents an original *ksh* as in the words *Lakhimanu* (l. 5), *khēma* (l. 8), and *Lakhimī* (l. 17). When this peculiarity is observed, the inscription becomes intelligible.

The inscription is in the vernacular. No distinction is made between the sibilants *ś* and *s*, and both are written as *s*, thus, *Mahēśa* appears as *Mahēsa* (l. 11) and *Kauśāmbī* as *Kausaṁbi* (l. 7), and *Śrī-Gaṇēśaḥ* as *Srī-Gaṇēsaḥ* (l. 1). Similarly *sh* when compounded is written *s*, as in *Baisnav* for *Baishṇava* (l. 6, and 15-18). Nor is any distinction made between cerebral and dental nasals (with one exception), thus, *darpaṇa* appears as *darpan* (l. 2), *kripaṇa* as *krapan* (l. 8) and *Baishṇava* as *Baisnav*. The one exception occurs in the invocation *Srī-Gaṇēsaḥ*, and the scribe's knowledge was so faulty that, though he has written the *ṇ* right, he has turned the *ś* twice into *s*. It seems possible further that he did not distinguish between the other cerebral and dental letters, for *Chamanda* (l. 13) looks as if obtained from *Chāmuṇḍā*.

The character for *v* appears in its ordinary Nāgarī form and also with a dot beneath it. The latter form occurs only at the end of words, as in *dēv Bhairav* (l. 3) and *Baisnav* (ll. 6, and 15—18). In words ending in *va*, the *v* in the present vernaculars drops its inherent *a* and is commonly pronounced with a vowel sound like *w* or *o*, thus, *dēva* becomes *dēw* or *dēo*. The dotted form therefore appears to represent *v* (with that sound), and the undotted form no doubt represents *b*, as seems clear from its use in the name *Kausaṁbi* (l. 7), the ancient form of which is always Kauśāmbī in Sanskṛit writings, and also in the word *bānān* (l. 1), which is obviously a verb corresponding to the existing verb *banā-nā* (Hindi) and *bānā-itē* (Bengali), 'to make, fabricate,' and in which the initial *b* is so well established that no form with an initial *v* ever appears, so far as I am aware. In a similar way final *ya* drops its inherent *a*, and the *y* is then often pronounced as *ē*, and this no doubt explains why the character for *ē* appears instead of *y* in *samaai* (l. 4).

As the language is the vernacular and the vernaculars have generally dropped the *a* inherent in the last consonant (if uncompounded) of a word, the presumption is that the words here must be read without the final *a*, and this is corroborated by the words *bānān* (l. 1) and *darśān* (l. 2) which, as discussed later, cannot have a final *a*. The nominative is the same in the plural as in the singular, as in *sōnī* (l. 1) and *purukh* (l. 9); and the plural base for the oblique cases is formed by adding *nha* to the singular base, as in *sōnīnha* (l. 2) and somewhat similarly in the pronoun *tēnha* (l. 9). The accusative-dative is formed with the suffix *kau* (l. 2) and the genitive with *kē* (l. 9, 15). The *kē* appears to undergo no modification, for it is the same with the nominative plural *purukh* (l. 9) and the apparently nominative singular *put* (l. 15). *Samaai* (l. 4; probably for *samayē*) appears to be the locative singular of *samay* or *samaē*. *Bānān* (l. 1) apparently = Hindi *banāēṅ*,[3] the 3rd person plural of the aorist tense. This verbal base appears with *ā* in Bengali *bānā-itē*. The second *darpan* in line 2 should, it seems to me, be *darsān*, that is, *darśān*, because there must be a verb in this sentence and the second *darpan* is meaningless; and *darsān* is so much like *darpan*, that the engraver might easily have confused the two by oversight and so have written *darpan* twice. *Darśān* would = Hindi *darśāēṅ*,[3] the 3rd person plural of the imperative, used honorifically for the singular. This causal verbal base appears in Hindi *darśā-nā* and Bengali *darśā-itē*. *Likhītē* (l. 5) seemingly=Hindi *likhtē*, the plural of the tense *likhtā*, which though called by some a conditional is very often used as a present tense. The pronoun *ya* (l. 1)=Hindi *yah*, and *pachhīlē* (l. 9)=Hindi *pichhlā*.

[1] [Compare Mr. Bhandarkar's remarks on pp. 50, 52 and 60 above.—Ed.]

[2] It cannot be the character for *ksh*, because Sanskrit *ksh* is modified into *kh* uniformly in this inscription.

[3] According to the method of transliteration generally adopted in Hindi grammars.

The words sōnarā (l. 5) and sōnī (l. 1, 10—15) deserve notice as they appear to be distinguished. Though the signatories are mentioned collectively as *sōnīs* (l. 1), yet those who sign as *sōnīs* are definitely stated to be the *purukh*, 'men,' that is workmen, of Lakshmaṇ sōnarā and of four other persons to whose names no description is added. *Sōnarā* therefore seems to be a higher term than *sōnī*, and if *sōnī* designates the workman, *sōnarā* must obviously mean the master or employer; so that, if the former is translated 'goldsmith,' the latter should be rendered 'master goldsmith.' *Sōniyā* in Hindi means 'one who separates gold from ashes, etc., in the mint,' but there appears to be no word in Hindi corresponding to *sōnarā*, unless it be *sōnār* or *sunār*, the ordinary term for a goldsmith.

As regards the personal names, the inscription shows that much the same custom obtained in the sixteenth century as prevails now in using names shortly, familiarly or colloquially. The vowel *u* was often substituted for a final *a*, thus we find *Lakhimanu* (l. 5), *Nalīgu* (l. 10), *Ratanu* (l. 14) and *Anadu* (l. 16, 18).[1] *Lakhimanu* would be the colloquial form of *Lakhiman*, that is, *Lakshmaṇa*; and *Ratanu* of some name beginning with *Ratna*, such as *Ratnadatta* or *Ratnachandra*. *Anadu* may be short for *Annada*, and the full name might be *Annada-dās* or *Annada-prasād*. *Birti* (l. 6) is probably short for some name beginning with *bṛitti*, that is, *vṛitti*. *Laghu* (l. 8) may=*Raghu*, the letters *r* and *l* being frequently interchanged in the colloquial; and the full name might be *Raghu-nāth*. *Chamanda* (l. 13) seems to point to some name like *Chāmuṇḍā-dās*, and *Chaṁdilā* (l. 15) to *Chandrēśa* or *Chandirēśa*. *Dhanē* (l. 15) is no doubt short for *Dhanēśa* or *Dhanēśvara*; and *Karam* (l. 16) may be abbreviated from *Karam Chānd* (=*Karma-chandra*). I cannot resolve *Hōrīl* (l. 12) or *Manā* (l. 17), nor *Nalīgu* or its variants (l. 10); but *Hōrila-siṁha* is given as a name in Monier-Williams' Dictionary.

As regards the date of this record, Dr. Fleet observes as follows:—"It is not capable of actual verification, because the inscription does not include the weekday or some other detail necessary to that end. But, with the year taken as the expired year and the month as the *pūrṇimānta* month,— in both respects in accordance with the practice which prevailed generally at that time in the locality to which the record belongs,— the equivalent of the given details, (Vikrama)-saṁvat 1621, Chaitra vadi 5, is **20 February A.D. 1565.**"

It appears from this examination that the purport of the inscription differs from Sir A. Cunningham's surmise. It shews that five leading goldsmiths with thirteen of their employés put up this address to Gaṇēśa and Śiva-Bhairava for favour to the goldsmiths of Kauśāmbī town. Only three of the leading goldsmiths belonged to that town, and two were strangers apparently. The fact that these two are named first suggests that they were men of more importance than the three residents, and perhaps they were gold-merchants rather than goldsmiths. One of these two was a Vaishṇava and so were four of the employés, yet they also joined in this invocation to Gaṇēśa and Śiva-Bhairava. Surely no ordinary occasion would have caused all these men, that is, the whole local guild of goldsmiths, to join in recording such an inscription on this pillar. At that time, early in 1565, several of Akbar's chief nobles and commanders had revolted against him, hostilities were still going on, and the whole country from Delhi to Allahābād must have been in a lawless condition. Kauśāmbī was presumably a town of no great size or strength then, and its goldsmiths as men of some wealth must have been in danger of extortion or pillage at the hands of the soldiery. In such circumstances was it not natural that they should invoke Gaṇēśa as the god of wisdom, and pray that Śiva-Bhairava, the terrible god of destruction, would display to them a face calm and bright as a mirror?

Lastly, it is particularly worthy of notice that this record mentions **Kōsam as Kausaṁbi, that is, Kauśāmbī,** at a period long before the time when archæologists began to identify the place with the Kauśāmbī, Kōsambī, of the Sanskrit and Buddhist books.

[1] [This practice seems to have been prevalent in Rajputana already in the 12th century A.D.; see Mr. Bhandarkar's remarks on p. 38 above.—Ed.]

## TEXT.

18 Basaṁta-Rām[12] Anadu Baisnav

## TRANSLATION.

Śrī Gaṇēśa! The town goldsmiths make this. May the god Bhairava show a mirror-like face to the goldsmiths!

Saṁvat 1621, at the time by name[13] the fifth day of the dark fortnight of (*the month*) Chaitra, write — Lakshmaṇ the master goldsmith, the Vaishṇava Birti son of Ānanda, Lakshmī-dās of the town of Kausaṁbi,[14] (*and*) of the same town the brothers Khēma-kṛipaṇ (*and*) Laghu.[15]

Their men (*write*) afterwards — Nalīgu the goldsmith, Mahēśa-dās the goldsmith, Hōrīl the goldsmith, Chamanda the goldsmith, Ratanu the goldsmith, the son of the goldsmith Chaṁdilō, Anadu Rām-dās, Lakshmī-dās, Basanta-Rām, (*and*) four (*others*), Dhanē Vaishṇava, Karam Vaishṇava, Manā Vaishṇava, Anadu Vaishṇava.

---

[1] Read probably *darsān* (for *darśān*); see remarks on the grammar.
[2] Read *samayē* probably.
[3] That is, Sanskṛit *vadi*.
[4] Read *paṁchamī*.
[5] Or perhaps *Lakhimnu*.
[6] Read *Baisnav*.
[7] Read *Ānanda°*.
[8] That is, *kṛipaṇ*.
[9] Or *Nanīgu* or *Nalīyu* or *Nanīyu*.
[10] Read *°dās*.
[11] Read *sōnī*.
[12] The last letter looks something like *mlēṁ*, but the extra marks may be due to injury.
[13] Dr. Fleet has drawn my attention to the constant occurrence of the expression "*Saṁvat — varshē*" in inscriptions, which is calculated to suggest that *samaai* is a synonym for *varshē* and should be applied to the preceding "*Saṁbat 1621*". Such a rendering however presents two difficulties to my mind; first, it would entail treating *nām* as a mere expletive, whereas the insertion of a mere expletive in this laconic inscription (for the preceding words, *bānān* to *bhairav*, were put in afterwards) would be strange; and secondly *samaya* is not ordinarily an equivalent of *varsha*, vernacular *bāras*, (which might well have been used here), but would apply quite correctly to a day, the *paṁchamī*.
[14] *Kausaṁbi-purī* is an adjective formed from *Kausaṁbi-pur*.
[15] *Tathā* seems to refer to the adjective *Kausaṁbi-purī*; otherwise there appears to be no reason for its insertion in l. 7. It applies obviously to both Khēmakṛipaṇ and Laghu, and so the word *bhāi* is probably plural agreeing with both, though the meaning would be the same if we translate "Khēmakṛipaṇ (*and*) Laghu (*his*) brother."

## No. 8.—THREE COPPER-PLATE RECORDS OF SONPUR.

By B. C. Mazumdar, B.A., B.L., M.R.A.S., Sambalpur.

The three copper-plate charters which I now publish were all found in the Feudatory State of **Sonpur**, attached to the district of Sambalpur. It was in the year 1898 that I deciphered them, as well as another charter which was found at **Satalma** (called Satallamā in the inscription) in the same district. Mr. Slocock, the then Deputy Commissioner of Sambalpur, who gave me the Satalma charter to get deciphered, took it back from me with the transliteration and translation of its text, and forwarded it to the Museum at Nagpur.[1]

In the sequel I shall have to refer to the Satalma plates as well as the copper-plate charters of the **Sōmavaṁśi kings of Kaṭak** which have been edited by Dr. Fleet.[2] For convenience of reference, the subjoined three inscriptions will be denoted by the letters A, B and C, respectively; the Satalma plates by S; and the records published by Dr. Fleet by F 1, F 2, F 3, F 4, F 5 and F 6.

As regards **orthography**, there are two points to be noticed before I proceed to deal with the individual inscriptions. The vowel *ṛi* was pronounced as *ri* and not as *ru*, as it is now done, by the inhabitants of Sambalpur and Orissa; see, e.g. *pravrita* for *pravṛitta* (C, l. 15), *riśaya* for *ṛishayaḥ* (C, l. 25). A few similar cases have also been noticed in the Satalma[3] grant and in the Kudopali plates.[4] *Ṭrikaliṅga* occurs for *Trikaliṅga* (A, l. 4; F 1, l. 3) and *Riśikēśa* for *Hṛishīkēśa* (F 1, l. 15). There was only one letter current to denote both *v* and *b*. Owing to the fact that *b* is the pronunciation for both of them in Bengal and Orissa, it cannot be said that *v* is used wrongly for *b*, or *vice versâ*.

### A.—Vakratentali charter of Mahābhavagupta I.

These are three plates (of four sides), of which the first and last are written on the inner sides only. They are narrower at the margins than in the middle. The height varies from $4\frac{1}{4}''$ to $4\frac{3}{4}''$ and the breadth from $8\frac{7}{8}''$ to $9''$. The plates are strung together on a nearly circular ring, $3\frac{1}{2}''$ in diameter and $\frac{1}{2}''$ thick, which is passed through circular holes cut on the left margin of each plate at a distance of about $\frac{1}{4}''$ from the edge. The ends of the ring are secured into the lower portion of a lump of copper which bulges out on either side along the ring for a space of $1\frac{1}{8}''$. In addition to this, a copper pin appears to have been driven through the lump of copper. In the upper portion of this lump is a deep impression, nearly circular, about $2''$ in diameter. Here is the figure of a goddess in relief, squatting apparently on a lotus, flanked on each side by an elephant with its trunk uplifted. The elephant on the left side is not quite distinct. Close to it is a much defaced legend. I have read it tentatively as *Śrī-Janmējayadēva* [*rājasya ?*]. Considering that the legends on most of the seals of this family are illegible and have not been deciphered, this reading must be looked upon as a mere conjecture.

The plates belong to the time of the *Paramabhaṭṭāraka Mahārājādhirāja Paramēśvara* **Śrī-Mahābhavaguptarājadēva**, who meditated on the feet of the *P. M. P.* **Śrī-Śivaguptadēva**. The king is described as the most devout worshipper of Śiva (*paramamāhēśvara*), the forehead ornament of the lunar race and the lord of **Trikaliṅga**. The grant was issued from the camp of victory pitched at **Suvarṇapura**. In line 36, the date is given as the **third year of the victorious reign of the *P. M. P.* Śrī-Janamējayadēva**. This is the earliest known record of Mahābhavagupta I. as well as of the Sōmavaṁśi kings of Kaṭak, as no inscriptions of his father

[1] These have been published by Prof. Hultzsch; above, Vol. VIII, pp. 138-43.
[2] Above, Vol. III, pp. 323-59. [3] Above, Vol. VIII, p. 139. [4] Above, Vol. IV, p. 256.

Mahāśivagupta I. have been so far discovered. It records the gift of the village of Vakratentalī belonging to the **Lupattarā-Khaṇḍa** to the *bhaṭṭaputra* **Jātarūpa**, who was a resident of **Mēraṇḍā** and an immigrant from **Rāḍhāpha**ṁ[1]**vallikandara**. He belonged to the Kauṇḍinya-*gōtra* and the Chhandōga-charaṇa. His *pravaras* were Maitrāvaruṇa and Vāśishṭha.[2] Kōi Ghōsha, the writer of these plates, is identical with that of F 1, dated in the 6th year of **Mahābhavagupta I.**[3], and the engraver, **Saṁgrāma, son of Rayaṇa Ojjhā**, is the same as that of S, which belongs to the 8th year of the reign of the same king.[4]

## B.—Nibinnā charter of Mahāśivagupta.

These are three plates (of four sides) of which the first and last are engraved on the inner sides only. They measure about $8\frac{1}{4}''$ to $8\frac{1}{2}''$ in breadth and about $5\frac{3}{4}''$ in height. The engraving is so deep that the empty side of the first and third plates show traces of the working of the chisel. They are strung on a circular ring which is passed through round holes (about $\frac{3}{4}''$ in diameter) cut on the left margin of each plate about 1" from the edge. The ring is $4\frac{1}{2}''$ in diameter and about $\frac{3}{4}''$ thick. The ends of the ring are secured into the lower portion of a lump of copper, which bulges out on either side along the ring to a space of $1\frac{1}{4}''$. The upper portion of the lump of copper is fashioned into a circular **seal** $1\frac{1}{3}''$ in diameter. On the seal is cut in relief a squatting figure. Nothing more than this is clear on the seal.

[1] Read *harēta*.

[2] Is it by mistake that *bhagavāḥ* has been engraved for *bhagavān*? May it be that the form *bhagavā* current in Pāli and Prākrit was then used in the vernacular too?

[3] Read *-māsē*. [4] Read *Vallabha-* (?) [5] Read *Saṅgrāmēṇa*.

[6] In the Nagpur Museum plates he is called *Rayaṇā-Ojjhā*.

The plates are dated during the reign of the *Paramabhaṭṭāraka Mahārājādhirāja Paramēśvara* **Śrī-Mahāśivaguptarājadēva**, who meditated on the feet of the *P.M.P.* **Mahābhavaguptarājadēva**. The king is described as the most devout worshipper of Śiva (*paramamāhēśvara*), the forehead ornament of the lunar race and the lord of **Trikaliṅga**. The grant was issued from **Vinītapura**. In lines 45-46 the date is given as **the 15th year of the victorious reign of the** *P.M.P.* **Śrīmad-Yayātirājadēva**. F. 5, which belongs to the same reign, but is 6 years earlier, was also issued from Vinītapura on the bank of the river **Mahānadī**.[1]

The plates record the gift of the village of **Nibiṇḍā** (l. 5) or **Nibinnā** (l. 17) in the **Kōsala** country to the *Dīkshita* **Puṇḍarīkaśarman**, who was a resident of the village of **Maramenḍā** in the Kōsala country and an immigrant from **Bhaṭaparōli**. The donee was the son of **Nārāyaṇa-śarman** and grandson of **Uhlāsa-śarman**. He belonged to the Bhāradvāja-*gōtra*, had the *pravaras* Āṅgirasa, Bārhaspatya and Bhāradvāja. The writer of the grant was the *Mahākshapaṭalaka* **Śrī-Uchchhava-Ṇāga**, son of **Allava-Nāga**, who was known to the *Mahāsandhivigrahika Rāṇaka* **Śrī-Chārudatta**, and the engraver was **Ṭṭhakura Panāka**.

### C.—The charter of Śatrubhañja.

These are three copper-plates (four sides), the first and last of which bear writing on the inner sides only. The third plate is a little smaller than the other two. The height and breadth of the plates vary — the former being smaller about the middle than at the margins and the latter being greater in the middle than at the margins. The first two plates measure 8″ in breadth in the middle and about $7\frac{7}{8}$″ at the margin. Their height varies from $4\frac{7}{8}$″ in the middle to 5″ at the margin. The third plate varies in height from $4\frac{3}{4}$″ to $4\frac{7}{8}$″ and $7\frac{5}{8}$″ to $7\frac{3}{4}$″ in breadth. The plates are strung together on a circular ring 3″ in diameter through a hole cut on the left margin of each plate at a distance of about $\frac{7}{8}$″ from the edge. Between the margin and the proper ring-hole is a second smaller hole on the third plate, the object of which is not apparent. The ends of the ring are secured at the bottom of an oval seal whose major and minor diameters are $2\frac{1}{4}$″ and $1\frac{3}{4}$″ respectively. Across the seal is engraved in relief the legend *Śrī-Śa*[*tru*]*bhaṁ*[*ja*]*-dēvasya* in the alphabet employed in the inscription. Above the legend is a crescent enclosing within its arc a round dot which is perhaps intended to represent the Sun. Below the legend is a recumbent bull facing the proper right. A small portion of the seal is broken to the proper right of the bull.

The inscription belongs to the reign of king **Śatrubhañjadēva** (l. 10) or **Bhañjabhūpati** (l. 14), who is described as belonging to the **Bhañja race** (l. 16 f.) and to the **Aṇḍaja-vaṁśa** (l. 16). He was apparently the ruler of **Ubhaya-Khiñjali-maṇḍala** (l. 17). In line 4 reference is made to many kings (named) **Śilābhañjadēva.**[2] In their family was king Śatrubhañjadēva. He granted **Milupāḍi-Khaṇḍakshētra** in the district of **Rōyarā-vishaya.** The donee was the *bhaṭaputra* **Kṛishṇa,** son of **Ākhaṇḍala** and grandson of **Mahōdadhi.** He was an immigrant from **Ālāpa-grāma,** belonged to the Kāśyapa-*gōtra* and was a student of the Sāmavēda. He is said to have had three *ṛishis* for his *pravara,* but their names are not given. The whole inscription is so full of mistakes that it is hardly possible to correct them. Even the imprecatory verses are not correctly quoted. There is no doubt that the record was composed by some ignorant person, and I cannot altogether suppress my suspicion about the genuineness of the grant.

Four other inscriptions of the Bhañja family are known, three from Orissa and the fourth from **Gumsūr** in the Ganjam District. One of them, which has been published by the late Professor Kielhorn,[3] furnishes the following pedigree:—

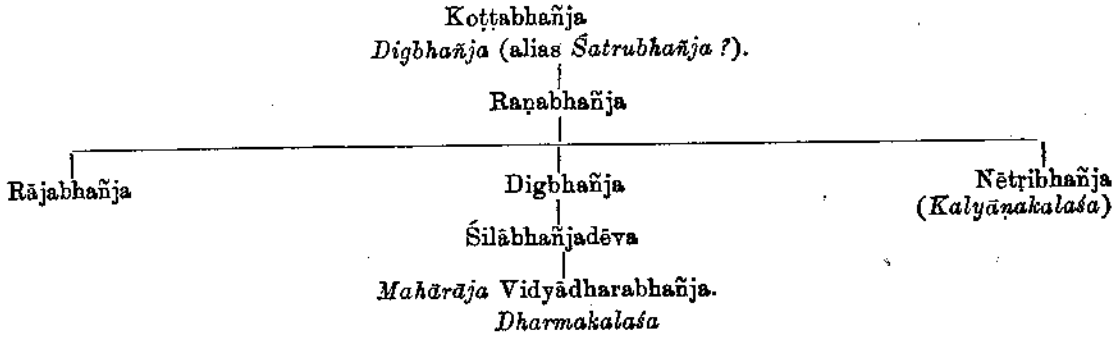

Raṇabhañjadēva
|
Digbhañjadēva
|
Śilābhañjadēva
|
*Mahārāja* Vidyādharabhañjadēva
*Dharmakalaśa*
(parama-māhēśvara).

[1] [The reading intended is probably *-Dhāradatta* and what looks like the *u* of *ru* may be due to a mistake of the engraver.—Ed.]

[2] Śilābhañjapāṭi is the name of a village in the Ōḍra country; see above Vol. III. p. 354.

[3] Above, Vol. IX. p. 278.

One of the **Bāmanghātī** plates[1] is dated in **Saṁvat 288** and during the reign of **Raṇabhañja**, son of **Digbhañja** and grandson of **Koṭṭabhañja** of the **Bhañja** family,[2] while the other belongs to the time of **Rājabhañja**, son of Raṇabhañja, and grandson of Koṭṭabhañja of the Bhañja family.[3] In the **Gumsūr** plates, the donor is **Nēṭṛibhañja**, son of Raṇabhañja and grandson of **Śatrubhañja**. The following tentative genealogy may be derived from these four records :—

The subjoined grant is dated during the reign of **Śatrubhañja**, but I doubt if it has to be assigned to the first king on the foregoing tentative genealogy. I would rather assign it to some successor of **Vidyādharabhañja** on the above table. The emblems on the seal may be taken to show that Śatrubhañja was a Śaiva. But in line 16 of the text he is described as a fervent devotee of the god Vishṇu (*parama-vaishṇava*). The modern representatives of the **Bhañja** family are the rulers of the native state of **Mōrbhañj** in Orissa, which probably owes its name to a king named Mayūrabhañja. The indirect reference to this king in the present grant in the epithet *aṇḍaja-vaṁśa-prabhava* is to my mind satisfactory evidence of the donor Śatrubhañja having lived at a comparatively later period. In the two **Bāmanghātī** plates mention is made of **Vīrabhadra**, the founder of the Bhañja family, who is said to have been born in the great *tapōvana* at **Kōṭyāśrama** by breaking open a pea-hen's egg.[4]

## TEXT.[5]

*First Plate.*

1 Ōṁ[6] Svasti [||*] Saṁghāra-kāla-hutabhug-vikarāla-ghōra-saṁbhrānta-ki[ṁ*]kara-kṛi-

6 na nṛipati-Śrī-Śilābha[ṁ*]jadēva prakaṭa-paurusha-raśmi-chakra-ni-

[1] No. 655 of the late Prof. Kielhorn's Northern list.

[2] The queer wording of the inscription makes it doubtful if Digbhañja was a mere surname of Koṭṭabhañja or if Digbhañja denoted a distinct king. In any case the identification of Śatrubhañja and Digbhañja with Koṭṭabhañja is purely tentative.

[3] No. 656 of the same list.

[4] The Bhañjas of Maurbhanja as well as of Ganjam have the peacock (*mayūra*) as something like a totem. The Bhañja-rājas all say that they had their origin in a peacock.

[5] From the original plates. The text is hopelessly corrupt and I have made no attempt to correct the numerous mistakes.

[6] Expressed also by a symbol at the beginning of the line.

[7] Śilābhañjadēva was apparently the father of the donor.

[8] From *la* of *sakala* up to *pā* of °*pāla*, there is an erasure in the original.

---

[1] The syllables *pṛithivyâ* are engraved over an erasure.

[2] This cross is incised below the line between the *aksharas la* and *sa*.

[3] The akshara *ja* seems to have been erased by the engraver himself.

[4] There is a *visarga* after the akshara *naṁ*. [5] This letter looks also like *râdhṛi*.

[6] *Aṇḍaja* means 'born of an egg (*aṇḍa*)' of a peacock.

[7] The *aksharas* from *ûja* of *khiñjali* up to *mâ* of the second *mâra* in the next line are engraved over an erasure. The akshara *śrî* at the beginning of the next line has perhaps to be cancelled.

[8] It is not easy to ascertain to whom the epithet *mahâsâmata* applies, as the construction is extremely faulty.

[9] The grant was made on the *akshaya-tritiyâ* day which falls on Vaiśâkha-śukla-tṛitîyâ. *Yugâdi-dinê* may mean 'on a Friday on which the Kaliyuga commenced.' [See also *Ind. Ant.* Vol. XXVI. p. 179, under Vaiśâkha-śuklapaksha.—Ed.]

[10] By *Gaṁgâsandhi* is perhaps meant the confluence of the Mahânadî and the Tel.

[11] The village Âlâpa could not be identified.

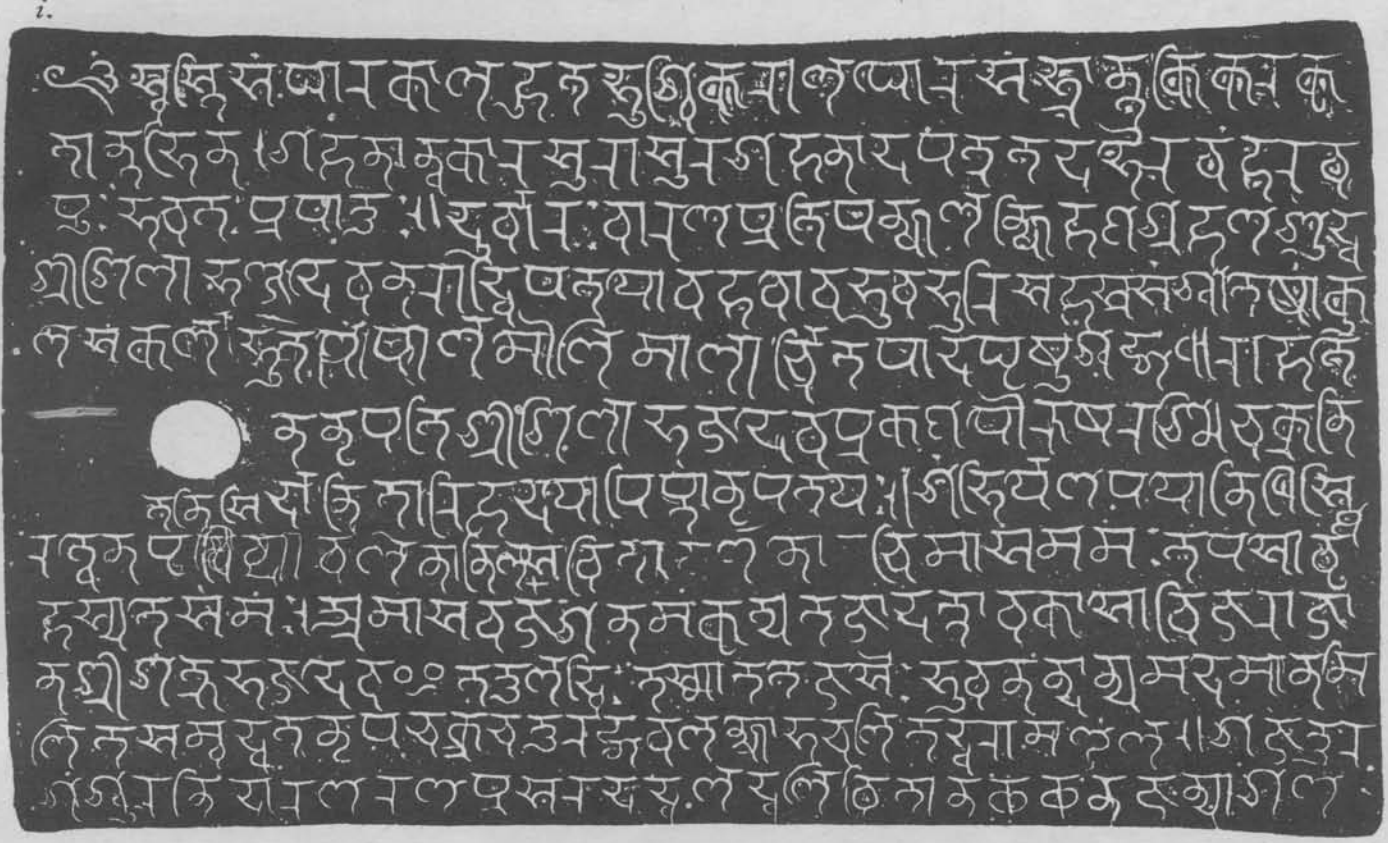

[12] Kṛishṇa, son of Âkhaṇḍala and grandson of Mahôdadhi, is the donee.

[13] The akshara *dâ* of *kadâchit* is engraved over an erasure.

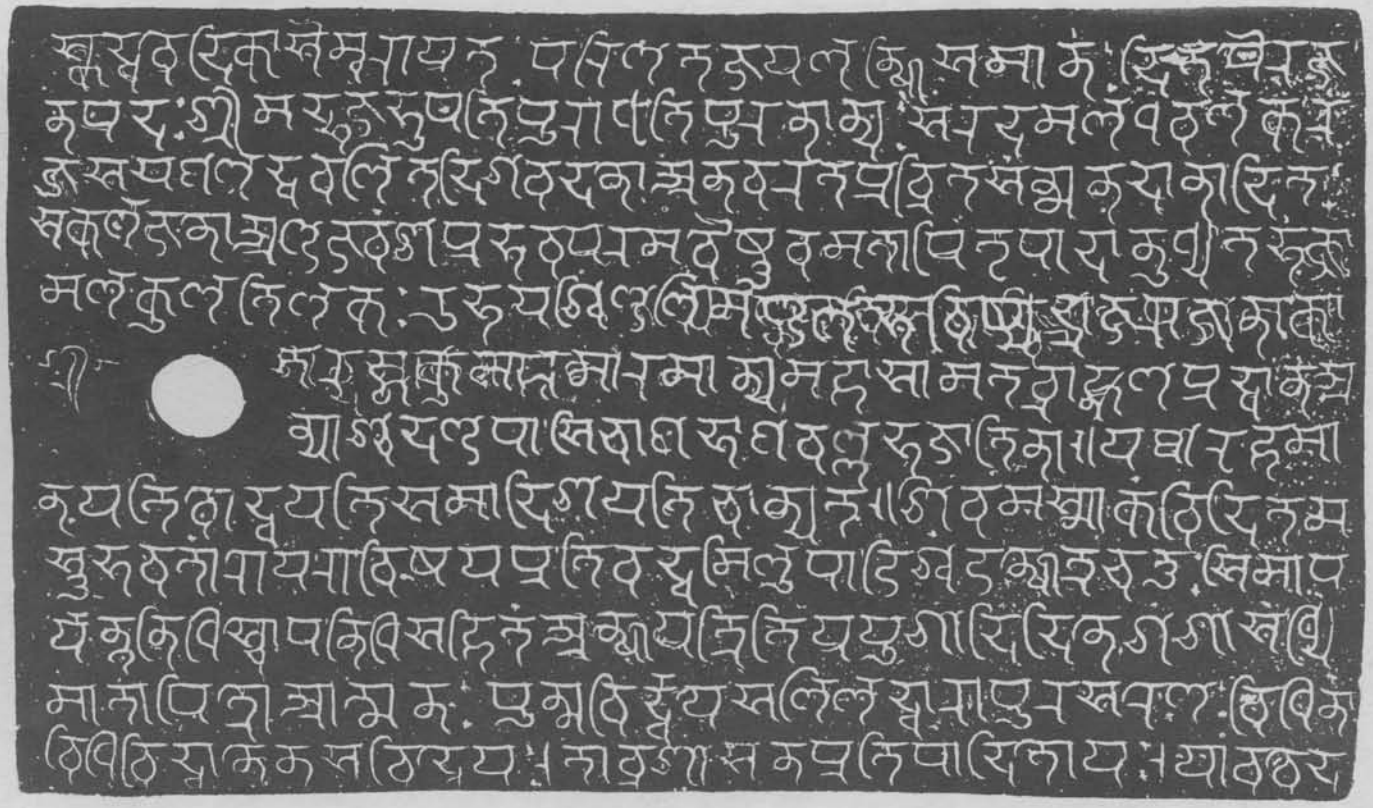

[14] Land enjoyed by a brâhmaṇa as rent-free is now called *brahmôttara*, not *brahmasva* as it is here.

Sonpur plates of Satrubhanja.

* * * * * *

In order to localise and identify the places mentioned in the foregoing three grants and other allied inscriptions we must try and ascertain how and where the originals were found. A and B as well as S were discovered by cultivators while ploughing fields in the villages granted by the charters. As regards **Milupāḍi Khaṇḍakshētra** of C, Milupāḍi or Milupāṇḍi may be the name of a plot of land. All fields in the district of Sambalpur as well as in the feudatory states attached to it bear local names; and if Khaṇḍakshētra denoted merely a stray piece of land, no identification of it is possible. But Khaṇḍakshētra may also be the name of a village; for in F 1, line 13, we actually find the word as the name of a village. The resident of that village is said to have come from **Oḍayaśṛiṅga**, which I identify with **Oḍśiṅgā** in the native state of Āṭmallik. **Rōyarā** being on the borders of Sonpur State (C, line 21), not far off either from Pāṭṇā or Āṭmallik, there might have been a village of the name Khaṇḍakshētra in the locality where the record was unearthed.

It must be noted that the states of Rerhakhol, Āṭmallik, Bodh and Pāṭṇā lie to the north, north-east, east and south, respectively, of the Sonpur State which they adjoin. Of the geographical names mentioned in F 1, the river **Ōṅgā** (now called **Ong**) flows through the states of Pāṭṇā and Sonpur. The Zamīndārī of Barpali (district Sambalpur) in which the village **Satallamā**, the modern **Satalmā** of S is situated, is also within a few miles from the river Ong flowing past Sālēbhaṭā. **Bakēbirā** and **Loiśiṅgā** (**Vakavedḍā** and **Lēiśṛiṅgā** of F 1) are also close to Sālēbhaṭā Police Station.

**Nuptara**, Nupursinga and Banktentuli (*Lupattarā Khaṇḍīya Vakratentalī grāmē*, line 5, A) are in the neighbourhood of the place where A was obtained. As **Suvarṇapura** (A, line 1) is certainly the Sanskṛitised form of **Sonpur**, so also is **Rāḍhāphaṁvallikandara** (A, line 12),

[1] The akshara *ni* and *hita* are engraved over an erasure.

[2] The form *sasye-sasye*, etc. indicating abundance of crops, shows that the dialect then in use was similar to Bengali, for this is now used only in Bengal as an idiomatic form.

[3] Read *Śivaṇāgēna*. The akshara *ṇa* of *ṇāga* is corrected apparently from *ga*.

[4] The word used here for 'engraving' must be some Dēśi term then current.

[What is intended is probably *Śivanāgēna Pāṇḍi-sutēna lāñchhitam*, and *mahārājaki mudrētiḥ* seems to mean *mahārājasya mudrayēti*. On the word *lāñchhita* see the late Professor Kielhorn's remarks, above, Vol. IX. p. 274.—Ed.]

[5] The form *mahārāja-ki* is Hindi pure and simple. The use of this form is worth noting.

a very high sounding form of **Rerhakhol**. The word 'kandara' means 'khol' both in Uriya and vulgar Bengali.

**Murasima** (F 1, line 1 and S, line 2) appears to be **Mursing** which is in the Jarāsiṅgā Zamindāri of the Pāṭnā State. The situation of Satalmā, Bakēbirā and Loiśiṅgā led me first to make this identification. My impression is confirmed by the fact that it is customary with the Zamindār of Jarāsiṅgā to be ceremoniously installed every year on the Dasara day (10th day from the full moon of the month of Aśvin) by going to Mursing, which is at present quite an insignificant village.

There is no doubt that when A was issued, the donor was present at Sonpur. The word *vijaya-kaṭaka* in line 1 of the Pāṭnā copper-plate grant (F. 1), like *vijaya-skandhāvāra* (A, line 1), occurring as it does after the name of the place where the king was residing, can never mean a town. "From Murasima (or from Suvarṇapura, as the case may be) where the king with his victorious soldiers was encamped" should be the meaning of the first line of the text of both F 1 and A.

It is very probable that a town was being built at Chaudwār, on the bank of the Mahānadī, opposite Kaṭak, either by **Janamējaya** or his son **Yayāti**; but it was never finished. Dr. Fleet has very rightly remarked (above, Vol. III, 324) that the town **Kaṭak** is of later origin than **Chaudwār**. If this be the case, how could the place attain any celebrity already in the time of Janamējaya? It may be that the town Kaṭak owes its name to the fact of its being built on a camping ground. As the king must have encamped in many different places, it is impossible that the name Kaṭaka had at such an early period as the reign of Janamējaya, become the proper name of the locality to which it is now applied. Dr. Fleet saw clearly what the word meant,[1] but was only misled by the name of the town where the plates edited by him were preserved. Since it is clear that the Sonpur charters were issued from Sonpur, there is no reason to suppose that the charters relating to Bakēbirā (F 1) and Satalma (S) — not far from one another — were not issued from some place in Pāṭnā during the military expedition of the grantor.

I am inclined to think that the town **Vinītapura**, whence **Mahāśivagupta** issued B granting the village of **Nibinnā**, is no other than **Binikā** in the Sonpur State. The villages Nibinnā and **Meṇḍā** (now a police station) are in the Binikā subdivision. From the source of the river to the Bay of Bengal there is no other town on the bank of the Mahānadī which bears such a name. Considering that even villages very often retain their old names, it is not likely that a town of such importance has lost its name altogether. For this reason I think Vinītapura is the Sanskṛitised form of the non-Aryan name Binikā.

It is a pity that the original find-spot of F 5 cannot now be known. How the charter relating to a village in the **Kōsala** country was carried to the Government record room at **Kaṭak**, was not at all inquired into by Babu Rangalal Banerji when he first edited it in 1877. I can easily imagine how the charters granted in favour of the chief minister of the king (F 2, F 3 and F 4) were carried by him and left behind.

I must, by the way, mention one fact here, regarding the names of those villages mentioned in the plates edited by Dr. Fleet, which I have failed to identify, because the locality where they were discovered could not be traced. Raṇḍā, Meṇḍā, Marḍā, Leṇḍā, Tuluṇḍā, Kuluṇḍā, Buleṇḍā, Balaṇḍā, and such other names many villages in the district of Sambalpur bear. Raṇḍā, Tuḷēṇḍā, Alāṇḍalā, etc. of the plates bear the provincial peculiarities of the names of villages in the district of Sambalpur.

The district of Sambalpur and the Uriya-speaking feudatory states attached to it, were included in the Chattisgarh Division of the Central Provinces till October 1905, for administrative

[1] Above, Vol. III. p. 341.

convenience due to their geographical situation. It is perfectly clear that this tract of country was also once included within **Kōsala-dēśa** or **Dakshiṇa Kōsala** of which **Ratanpur** (in the district of Bilaspur) was the capital, but did not form any part of **Ōḍra** or Orissa. For, in the first place, Nibinnā in Sonpur (B, lines 4, 5, 15 and 16) and Satallamā (modern Satalma) in Sambalpur (S, line 9) are described as villages in Kōsala-dēśa.[1] Secondly, the Brāhmaṇa who came from Orissa to be settled in the district of Sambalpur, could not have been called a man of Ōḍra-dēśa (S, lines 16 and 17) if the district were part of Orissa. It is worthy of note that even now, when anybody goes to Puri on pilgrimage, either from Sambalpur or from the feudatory states, he says he is going to Orissa. In popular language, Orissa does not include Sambalpur and its feudatory states.

The grantors of the charters F 1 to F 6, A, B, and S, called themselves lords of **Kōsala-dēśa**[2] as well as of **Trikaliṅga**. It is worthy of note that the **Kēsari** kings are counted in Orissa from Yayāti and not from his father Janamējaya. There is another Janamējaya in the list of kings, but he was a remote successor of Yayāti. Merely because no epigraphic record of Janamējaya has been obtained, it cannot be argued that it is Janamējaya Mahābhavagupta I., who has been wrongly shown on the list. This is at least certain that the Orissa record does not know anything of Śivagupta who is the first king of this line.

Since all the copper-plate grants of **Mahābhavagupta I.** relate to villages in Kōsala-dēśa[3] (including Sambalpur of course) it must be presumed that, to begin with, the Sōmavaṁśi kings became powerful in Kōsala-dēśa only; and that it was only subsequently that they extended their influence into Orissa. **Sādhāraṇa**, who was the chief minister of Mahābhavagupta I., was granted villages for his enjoyment in Kōsala-dēśa (F 2 to F 4). He could not have managed them if he had been living far away from those villages; nor would the king select such distant villages for his minister who was his favourite.

Whether the **Guptas** who were lords of **Kōsala** and **Orissa** were connected with the family of **Śivagupta**, son of **Harshagupta** of the **Rājim, Sirpur** and **Ratanpur** records is a question which awaits solution. That the Hinduised **Śabara king Udayana** belonged to, or rather claimed descent from, the lunar race, like the Sōmavaṁśi kings, and that the successors of Udayana from **Tīvara** downwards assumed the title Gupta, and were all Śaivas, have been fully established. From the inscription of **Bhavadēva** published by Professor Kielhorn (J. R. A. S. 1905, pp. 617-629) it may be inferred that different branches of the same family reigned simultaneously at different places. The assumption by Bhavadēva of the title **Kēsarin** has also to be noted. Dr. Fleet did not accept the suggestion of Sir Alexander Cunningham, not because there was any chronological difficulty in identifying the father of Janamējaya with Śivagupta of the Rājim plates, but because he considered it not possible on palæographic grounds.[4]

The characters of the Sambalpur and Orissa plates differ very much from those of the Rājim and Ratanpur records; but the cause of this difference may be the following. King Janamējaya and his successors had many Bengali Kāyasthas for their court officers. We get the names Kailāsa Ghōsha, father of Vallabha Ghōsha (S),[5] Kōi Ghōsha,[6] son of Vallabha

[1] [Satallamā was in Kaśalōḍā-vishaya—not in Kōsala-dēśa—Ed.]

[2] [In F 1, A and S, there is nothing to connect the donors with Kōsala; but in F 2 to F 6 and B the donative villages are said to be in the Kōsala country.—Ed.]

[3] [See the preceding note.—Ed.]

[4] Above, Vol. III. p. 338.

[5] [The text of this inscription has कायस्थ आङ्गवेल कै(वि)लासघोतेन.—Ed.]

[6] Kōi Ghōsha seems to be a contraction of Kailāsa Ghōsha.

Ghōsha (A and F 1), Malla Datta, son of Dhāra Datta[1] (F 1, F 2, F 3, F 4, and S) in the employment of Janamējaya; the names Chāru Datta,[2] Uchchhava Nāga and Allava Nāga[3] under king Yayāti (B) and the names Siṅga Datta[4] and Maṅgala Datta under Bhīmaratha (F 6). None but Bengali kāyasthas bear Datta, Ghōsha, Nāga, etc., as surnames. The Uriya Karans (who may be called kāyasthas) never used such surnames. The words Datta, Ghōsha, etc., as inseparable parts of the names of men, were in use in other parts of Northern India; and such names could be borne by persons of any and every caste. But as these words are surnames here of Kāyasthas, there can be no doubt that the kings had Bengali officers under them when they acquired territories in the forest tract of Sambalpur.

The writers and engravers used the alphabet which was current amongst them. Mr. Thomas remarked long ago that these letters resemble mostly, and are identical in some cases with, the modern Bengali alphabet. The letters *kra*, *ṅga*, *ñcha*, *tu*, and *pha* are striking examples. But it must also be borne in mind that some letters represent the modern Uriya forms of them only. If we compare the alphabet of the epigraphic records of the Pāla and the Sēna kings of Bengal, we can clearly see how the modern forms of Bengali and Uriya letters were evolved. These characters were also in use in the district of Ganjam, but they were slightly modified by southern influence (*e.g.* above, Vol. III., plate facing p. 222). Inscriptions written purely by Uriya scribes also bear the forms of these letters with the provincial peculiarities of Bengali letters (C). I cannot deal with the historical significance of it here.

The cumulative effect of the forgoing facts is certainly on the side of the suggestion of Sir Alexander Cunningham that the Guptas who were Kōsalēndras and Trikaliṅgādhipatis must have sprung from the Hinduised Śabara family of Udayana.

[The identification proposed by Mr. Mazumdar of Vinītapura with Binikā in the Sonpur State has been arrived at independently by Rai Bahadur Hira Lal in his article on the Sirpur Stone Inscription of Mahāśiva Gupta which, though received prior to this paper, has been unavoidably delayed for want of proper impressions of the inscription.—Ed.]

---

## No. 9.—FIVE VALABHI PLATES.

BY PROFESSOR STEN KONOW, PH.D.; CHRISTIANIA.

In the *Indian Antiquary*[5] has been published an "Account of a collection of copper-plates belonging to the Palitānā State. By the late A. M. T. Jackson, I.C.S." The collection consists of twelve plates, which were found some forty years ago. They were strung together on a copper wire, about $\frac{5}{8}$" thick, and suspended by it from the roof of a small underground chamber adjoining a tank in Palitānā. Two of these plates form a grant by the *Sāmanta Mahārāja* Siṁhāditya, the remaining ten make up four complete and two incomplete Valabhī grants.[6] The twelve plates have been kindly lent to Rai Bahadur V. Venkayya, the Government Epigraphist for India, who has been good enough to send me impressions of eight of them, prepared at his request in Dr. Vogel's office.

Rai Bahadur V. Venkayya describes the wire on which the plates had been strung as being about 8" in length. Its two extremities are secured into an oval seal measuring $2\frac{1}{16}$" by $1\frac{1}{4}$".

[1] [There is no evidence in the inscriptions to show that this man was a *kāyastha*. On the other hand, he is called a *rāṇaka* in F 2 and S.—Ed.]

[2] [See note 1 on page 98 above.—Ed.]

[3] [Chāru Datta is called a *rāṇaka*, while the other two are not spoken of as *kāyasthas*.—Ed.]

[4] [There is nothing in the inscription to show that Siṅga Datta, who held the office of *sandhivigrahin*, was a *kāyastha*.—Ed.]

[5] Vol. XXXIX. pp. 129 f.

[6] See above, pp. 16 and 80.

The seal bears in relief, on a countersunk surface, a recumbent bull, facing the proper right, with a pretty large hump, and below it the legend *Śrī-Bhaṭakkaḥ*. The bull and the legend are separated by two horizontal lines, of which the upper one is not quite distinct.

The eight plates contain three complete and two incomplete Valabhī grants. The three complete ones and one of the two incomplete ones belong to the *Mahāsāmanta Mahārāja* **Dhruvasēna I.** One of them is dated [ Valabhī- ] Saṁvat 206, two [ Valabhī- ] Saṁvat 210, while the incomplete one does not contain a date. The same is the case with the remaining plate, which forms the beginning of a grant issued by **Śīlāditya I. Dharmāditya.**

## I. PALITĀNĀ PLATES OF DHRUVASĒNA I.; [ VALABHĪ- ] SAṀVAT 206.

These are two plates, each written on one side only. According to Rai Bahadur V. Venkayya, "the working of the engraver's tool shows itself almost completely on the back of both plates." The length of the plates is $9\frac{7}{8}$" and the height $6\frac{3}{4}$"—7." The size of the individual letters is about $\frac{1}{4}$". The plates are, to judge from the impressions, in a very good state of preservation. The first plate contains 14 and the second 16 lines of well executed writing.

The characters are the same as in other old Valabhī plates. They comprise the signs for initial *ī* in *-Īśvara-*, l. 16, and for *ḍh* in *Ḍhiṇḍaka-*, l. 17. There are two signs of interpunctuation, *viz.* a single dot in l. 18 and a double dot or *visarga* in *vasēḥ* instead of *vasēt*, l. 27; *-Dhruvasēnasyaḥ*, i.e. *Dhruvasēnasya* ||, l. 29. The numerical symbols for 200, 6, and 5 occur in l. 30.

With regard to orthography, we may note that the name of the first ancestor of the Maitrakas occurs in the form *Bhaṭakka*, as in all the older plates. The form *Bhaṭārka* is a later attempt at Sanskṛitizing the name, and there is no reason for preferring it, at least so long as we do not know whether the name is Indian or not. The *ō* in *-phalōpa-*, l. 12. looks almost like an *i*. The dropping of a final *t* in *kaiś=chi*, l. 23; *vasēḥ*, i.e. *vasēt*, l. 27, and the writing of *s* instead of *sh* in *sōḍaśa-*, l. 17, are probably Prākṛitisms; compare also *-Drōṇasiṁhaḥ siṁha*. l. 10. Note further the use of an *n* instead of an *ṁ* before *ś* in *chatvāriṅśad-*, l. 16, and *chatvāriṁśad*, l. 18, and the doubling of surds, nasals and liquids after an *r*; thus, *-ōpārjjit-*, l. 3; *-maṇir=mmanv-*, *-dharmmā Dharmma-*, l. 7; *-ārttha-*, l. 11; *-pādāvartta-*, ll. 16, 17, 18; *pūrvvōttara-*, l. 18, etc.; but *-ārka-*, l. 20; and finally, the spelling *jy* in *Jarabhajyi-*, l. 19. The writing *jy* instead of *j* recurs in *Jyāvāla-* in l. 16 of the plates of Saṁvat 210, Śrāvaṇa śu. 15, which will be published below. It is comparable with the common modern spelling *jy* in order to denote the pure palatal and not the sound *dz* in Marāṭhī districts. This spelling is therefore of interest for the chronology of the change of *j* to *dz* in Marāṭhī. Professor Jacobi[1] has suggested to call the language usually designated Jaina Māhārāshṭrī, the language of Jaina commentators and poets, Saurāshṭrī. He draws attention to the old Jaina tradition that the ultimate redaction of the Jaina books was made in Valabhī in the year 980 after the Nirvāṇa of Mahāvīra. It would therefore seem probable that Jaina Māhārāshṭrī represents the dialect of Valabhī about 500 A.D. Jaina Māhārāshṭrī is closely related to Māhārāshṭrī, the parent of modern Marāṭhī,[2] and not to Śaurasēnī, from which Gujarātī is mainly derived. There are also other features which point to the conclusion that the language of Kathyawar and Gujarat generally has not always been of the same kind as at the present day, but more like the dialects from which Marāṭhī is derived,[3] and it is therefore possible to compare the spelling *jy* in Valabhī plates and in modern Marāṭhī with each other, though Marāṭhī is not now spoken in the districts where these plates were issued. The writing *rājaśrīḥ* l. 3, where the published grants of Dhruvasēna have *rājyaśrīḥ*, is perhaps also comparable, the modern change of *j* to *dz* not taking place in the word *rājā*.

[1] *The Kalpasûtra of Bhadrabâhu*, Leipzig, 1879, pp. 15. 18.

[2] Pischel, *Grammatik der Prakrit-Sprachen*, para. 20.

[3] See Dr. Grierson, *Linguistic Survey*, Vol. IX. Part II. pp. 326 f.

The writing is on the whole fairly correct. There are, however, some places in which the engraver has misread his draft. Thus we find *a* instead of *ā* in *chatvariṁśad-*, l. 16; *vapī*, l. 17; *-chāribhyaṁ*, l. 19; *sāmanyaṁ*, l. 24; *a* for *i* in *-vachchhurita-*, l. 5; *ā* for *a* in *-praśāsta-*, l. 7; *-paddhātir=*, l. 8; *-mahattarā-*, l. 14; *āṛṇava-*, l. 21; *ā* for *ē* in *-mōdāt=*, instead of *-mōdēta*, l. 25; *i* for *a* in *=ivabōddhā*, l. 11; *ī* for *i* in *-maulīmaṇir=*, l. 7; *g* for *ś* in *-vaṅga-*, l. 23; *t* for *g* in *-bhōtyaṁ*, l. 21; *t* for *n* in *=numattavyaḥ*, l. 25; *t* for *v* in *-ārjjat-*, l. 2; *d* for *p* in *-dātakaiḥ*, l. 25; *dhru* for *hṛi* in *sudhrut-*, l. 12; *n* for *v* in *-jīnyamāna-*, l. 6; *-nyavasthā-*, l. 8; *p* for *b* in *=āpādhā*, l. 23; *p* for *y* in *apam=*, l. 25; *ru* for *ka* in *-ābhishēru-*, l. 9; and so forth. Note also the absence of *saṁdhi* in *-dīdhitiḥ dīn-*, l. 5; *sṛishṭaḥ yatō*, l. 22, etc., and the confusion of the dual and the plural in *Vyāsagītau ślōkā bhavanti*, l. 26.

The plates contain a grant issued from **Valabhī** by the *Mahāsāmanta*, *the Mahārāja* **Dhruvasēna** bestowing several plots of land in the villages **Madkaṇā**, **Tāpasīya** and **Tinishaka**, in the **Hastavaprāharaṇī** (district), on the Chhandōgas Kumāraśarman and Jarabhajin, of the Śāṇḍilya *gōtra*, residents of **Śaṅkaravāṭaka**. Hastavaprāharaṇī is well known from other Valabhī inscriptions.[1] It corresponds to the modern Hāthab, 6 miles south of Gōghā in the Bhāvnagar State. The lower classes pronounce this name Hāthap,[2] and this form is probably the correct one. It can be regularly derived from *Hastakapra*, but hardly from *Hastakarapra* or *Hastavapra*. These forms look like learned Sanskṛit versions of an older *Hatthaappa* and are hardly genuine. *Astakapra* of the Periplus points to an original *Hastakapra*. The names of the three villages in the district are not elsewhere known. The grant was issued from **Valabhī**, the present Wālā, situated in 21° 52′ N. and 71° 57′ E. I cannot identify **Śaṅkaravāṭaka**, where the two donees were residing. The *dūtaka* was the *pratīhāra* **Mammaka**, who appears in the same capacity in the two grants of Dhruvasēna of Saṁvat 207.[3] The writer was the same **Kikkaka**, who wrote the remaining edicts of Dhruvasēna.[4] The date of the grant was the **5th tithi of the bright fortnight of Bhadrapada of the (Valabhī) year 206**, corresponding to **A.D. 525-26**. It is the earliest known grant of Dhruvasēna.

## TRANSLATION.

(Line 1.) Oṁ. Hail! From **Valabhī**. (*In the lineage*) of the **Maitrakas**, who forcibly prostrated their enemies. (*was born*) the general, the glorious **Bhaṭakka**, who obtained splendour in hundreds of battles fought within the circuit of the territories of adversaries of unequalled strength; who gained devotion by gifts, honours and straightforwardness towards those whom he had prostrated by his splendour; who obtained the glory of royalty by the strength of the array of devoted hereditary servants and friends; the devout worshipper of Mahēśvara.

(Line 4.) His son (*was*) the general **Dharasēna**, whose head was purified, bent before and reddened by the dust of his feet; the shining line of the nails of whose feet was inlaid with the lustre of the crest jewels of his foes when they bent with their heads (*before him*); whose wealth was being lived upon by poor and helpless people; the devout worshipper of Mahēśvara.

(Line 6.) His younger brother (*was*) the *Mahārāja* **Drōṇasiṁha**, whose spotless crest-jewel became auspicious by bowing down to his (*brother's*) feet; whose nature (*manifested itself in*) the performance of the regulations laid down by Manu and others; who like Dharmarāja (*i.e.* Yudhishṭhira) fixed the path of the laws of good conduct; whose anointment to the kingdom was performed by the paramount sovereign in person, the lord of the circuit of the territories of the whole earth, and whose royal glory was purified by (*his*) great liberality; the devout worshipper of Mahēśvara.

(Line 10.) His younger brother, who like a lion defeated singlehanded, by the strength of his own arm, the array of the troops of the elephants of (*his*) enemies; who was the refuge of those who sought for refuge; who grasped the real purport of the meaning of the *Śāstras*; who, like the *kalpa*-tree, granted the enjoyment of rewards according to the wishes of (*his*) friends and favourites; the devout worshipper of Bhagavat; who meditates on the feet of the paramount lord; the *Mahāsāmanta*, the *Mahārāja* **Dhruvasēna**, being in good health, issues the following order to all his *āyuktakas*, *viniyuktakas*, officers of the watch-stations, *mahattaras*, district officers, soldiers, *dhruvādhikaraṇikas*, *dāṇḍapāśikas*, and others according as they are concerned:

(Line 15.) Be it known to you that I have given as a *brahmadāya*, with libations of water, in the **Hastavapra**-*āharaṇī*, in the village **Madkaṇā**, hundred and forty *pādāvartas* belonging to the householder Īśvara and an irrigation-well with an area of sixteen *pādāvartas*; further in the **Tāpasīya** village, hundred and forty *pādāvartas*, the holding of Ḍhiṇḍaka; further on the north-eastern border of **Tinishaka** village hundred *pādāvartas*, together with an irrigation-well, to (two) inhabitants of **Śaṅkaravāṭaka**, (*viz.*) the brāhmaṇas Kumāraśarman and Jarabhajyi, of the Śāṇḍilya *gōtra*, students of the Chhandōga school, for the increase of the religious merit of My mother and father and in order to obtain for Myself in this world and the other such rewards as I wish. to last for the same time as the moon, sun, ocean, earth, the rivers and mountains, to be enjoyed by the succession of their sons and sons' sons, for the performance of the rites of *bali*, *charu*, and *vaiśvadēva* and others. Therefore, not even a slight obstruction should be made by anyone to these two while they are enjoying it in accordance with the proper conditions of a *brahmadāya*, cultivating it or assigning it (*to others*). And this Our gift should be assented to by those born in Our lineage and by future pious kings, bearing in mind that power is perishable, that the life of man is uncertain, and that the reward of a gift of land is common. And he who confiscates it or assents to its being confiscated, incurs the guilt of the five great sins together with the minor sins.

(Line 26.) There are also two verses sung by Vyāsa about this. The giver of land rejoices in heaven for sixty thousand years; but he who confiscates or approves (*of confiscation*) dwells in hell the same number of years.

The earth has been enjoyed by many kings beginning with Sagara; whosoever at any time possesses the earth, to him belongs, at that time, the reward.

(Line 28.) The sign-manual of Me the *Mahāsīmanta*, the *Mahārāja* **Dhruvasēna**. The messenger is the *pratihāra* **Mammaka**. Written by **Kikkaka**.

**The year 200 (and) 6; (the month) Bhadrapada; the bright (fortnight); the 5th** (*tithi*).

## II.—PALITĀNĀ PLATES OF DHRUVASĒNA I.; [VALABHĪ-] SAṂVAT 210.

These plates are described as follows by Rai Bahadur V. Venkayya,—"Two plates without ring or seal. Each of them has, however, two ring holes. The ring hole of the left-hand corner of the bottom of the first plate is not complete, a small piece of its lower margin being broken just below the ring hole. Each plate is written only on one side. The working of the engraver's tool shows itself in a few places on the back of both plates. The length of the plates varies from $10\frac{1}{8}''$ to $10\frac{1}{4}''$ and the height from $6\frac{1}{8}''$ to $6\frac{1}{4}''$." The height of individual letters is about $\frac{1}{4}''$. Each plate contains 14 lines of well executed writing in a very good state of preservation.

The alphabet is of the same kind as in the plates described above. The *visarga* is apparently used as a sign of interpunctuation in *bhavantiḥ*, i.e. *bhavanti* ‖, l. 23. The numerical symbols for 200, 10 and 5 occur in ll. 27 f.

The orthography is similar to that of the foregoing grant. Forms such as *kaiś=chi*, l. 21, *siha*, l. 9, and *=anumatī*, l. 23, look like Prākṛitisms. The forms *Jyāvāla-* for the common *Jāvāla-*, l. 16, and *-rāja-*, which perhaps stands for *rājya*, l. 3, have been discussed above. Surds, liquids and nasals are doubled after *r*; thus, *-ārjjavōpārjjit-*, l. 2; *-dharmmā*, l. 7. A surd has been doubled before *y* in *-ānuddhyātō*, l. 12; *-saṁbaddhyāmāna-*, l. 14. The engraver has not been careful to avoid miswritings. Thus the *anusvāra* has often been left out, and in ll. 9, 23 and 25, whole syllables are missing. An *a* is very often wrongly written instead of an *ā*; thus, *pratap-ōpanata-dāna-man-*, l. 2; *-nuragō*, l. 2; and other instances in ll. 3, 5, 7, 13, 14, 19, 20, 22, 25, 26, 27; *a* is written instead of *i* in *=ayam=*, i.e. *=iyam=*, l. 23; *i* is used for *ī* in *vāpi*, l. 18; *ī* for *i* in *-maṇī-*, l. 4; *-maṇīr=*, l. 7; *vidītaṁ*, l. 15; *ē* for *i* in *-numōdētaṁ*, l. 21; *u* for *ū* in *bhumi-*, l. 22; *g* for *ś* in *-vigrāṇan-*, l. 9; *n* for *ṇ* in *Maitrakānām=*, l. 1, and so forth. Writings such as *-dīdhitiḥ dīn-*, l. 5, on the other hand, are not mistakes of the writer, but this instance of wrong *saṁdhi* belongs to the original draft and recurs in most of the grants of Dhruvasēna. The redundant *bhavanti*, l. 23, is perhaps also due to carelessness in the original draft.

The grant was issued from Valabhī by the *Mahāsāmanta*, the *Mahārāja* **Dhruvasēna**, in order to confirm the Brāhmaṇa Vishṇuśarman, of the Jāvāla *gōtra*, a student of the Vājisanēya (*śākhā*) and a resident of **Siṁhapura**, in the possession of some land in the **Hastavapra-*āharaṇi***, *viz.* the *karada* field cultivated by the Brāhmaṇa Viśākha, on the south-western border of the **Bhallara** village, and the **Āmriḷikā** tank; and further 50 *pāḍāvartas* on the northern border of the **Vasukīya** village, to be entered from **Akshasaraka**. I am unable to identify the villages Bhallara and Vasukiya. Vasukīya is said to be **Akshasaraka-*prāvēśya***. This corresponds to the **Akshasaraka-*prāpīya*** in the Gaṇēśgaḍ plates of Saṁvat 207, which Professor Hultzsch[1]

[1] Above, Vol. III. p. 323.

translates "which belongs to the Akshasarakaprāpa," comparing the expression *Vaṭasthalikā-prāyīya-* in l. 5 of the copper-plate grant of Guhasēna of Saṁvat 248,[1] instead of which we should perhaps read *Vaṭapallikāprāpīya-*. It seems certain that *prāpīya* is synonymous with *prāvēśya*, which also occurs in the Khariār plates of Mahāsudēva.[2] *Prāvēśya* may, of course, be a fiscal term. It is, however, not likely that it means anything else than what it does in the common phrase *achāṭa-bhaṭa-prāvēśya*. *Prāpīya* must then be a Prākṛit form of *prāpya*.[3] I would accordingly translate *Akshasaraka-prāvēśya* "which is entered from Akshasaraka," *i.e.* borders on Akshasaraka. I cannot locate Akshasaraka. The last part of the word is probably *saraka*, lake, pond. Of the remaining geographical names mentioned in the plates, Valabhī and Hastavaprāharaṇī have been referred to above. The name Āmrilikā probably means "abounding in mangoes." Siṁhapura, where the donee resided, also occurs in the plates of Dharasēna IV. of Saṁvat 326 published in the *Bombay Journal*, Vol. X, p. 77 ff. It is the present Sihōr, situated in 21° 43′ N. and 72° E.

The *dūtaka* was the *pratihāra* Mammaka, and the writer Kikkaka, as in the preceding grant. The grant is dated on the 15th (tithi) of the bright fortnight of Śrāvaṇa in the (Valabhī) year 210, corresponding to A.D. 529.

## TRANSLATION.

[Lines 1-14 are practically identical with the beginning of the plates of Saṁ. 206].

(Line 15.) Be it known to you that for the inhabitant of **Siṁhapura**, (*viz.*) the Brāhmaṇa Vishṇuśarman, of the Jāvāla *gōtra*, a student of the Vājisanēya (*śākhā*), the following (*property*), *viz.* in the **Hastavapra**-*āharaṇi*, in the **Bhallara** village, on the south-western border, the *karada*[2] field (*formerly*) enjoyed by the Brāhmaṇa Viśākha, (and) the irrigation well **Āmrilikā** extending over twelve *pādāvartas*; further on the northern frontier of the **Vasukīya** village, which can be entered from (*i.e.* which borders on) **Akshasaraka**, fifty *pādāvartas*, which have formerly been and are still being enjoyed (by the donee), has been confirmed by Me, in accordance with the settled rules of former usage, in order to increase the religious merit of My mother and father, and in order to obtain for Myself such rewards here and in the other world as I may wish. Therefore obstruction should not be made by any one to him while he enjoys it, cultivates it, causes it to be cultivated or assigns it (*to others*). This Our confirmation should be confirmed by those born in Our lineage and by future pious kings, bearing in mind that the reward of a gift of land is common.

(Line 23.) There are also verses sung by Vyāsa about this. The earth has been enjoyed, etc. The giver of land, etc. He who rescinds grants of land made by himself or others, incurs the guilt of the killer of hundred thousand cows.

---

[1] Read *=iyam= asmad-anumatir=anumantavyā.*

[2] *Karada* perhaps means 'tribute paying.' It is of course possible to read *-prabhukta-kakarada-*.

(Line 27.) The sign-manual of Me the *Mahāsīmanta*, the *Mahārāja* **Dhruvasēna**. The messenger is the *pratīhāra* **Mammaka**. Written by **Kikkaka**. **The year 200 and 10; (the month) Śrāvaṇa; the bright (fortnight); the fifteenth** (*tithi*).

## III.—PALITĀNĀ PLATES OF DHRUVASĒNA I.; [VALABHĪ-] SAṂVAT 210.

These are two plates which have been described as follows by Rai Bahadur V. Venkayya,—"Each of them has two ring-holes. Each plate is written only on one side. The working of the engraver's tool shows itself in a few places on the back. The length of the plates is about $10\frac{1}{4}$"; the height varies from $6\frac{7}{8}$" to $7\frac{1}{4}$"."

The plates are in a good state of preservation. The first contains 15 and the second 12 lines of well executed writing. The average height of individual letters is $\frac{1}{4}$".

The characters are of the same kind as in the plates dealt with above. They comprise the signs for an initial *au* in *Aupasvasti-*, l. 17; for a final *t* in *triṁśat*, l. 17 and *ve(va)sēt*, l. 24; for a final *m* in *=ānujñātam*, l. 19. The curious shape of the *visarga* in *kṛishataḥ*, l. 20; *-gītāḥ*, l. 22; *-ādibhiḥ*, l. 23; *-vāsihanaḥ*, l. 25, is probably due to the engraver's misunderstanding his draft. Note also the signs of *-ē-* in *-kām=ēka-*, l. 11, and of *lō* in l. 12. A sign of interpunctuation occurs in l. 25. The numerical symbols for 200, 10 and 5 are found in l. 27.

With regard to orthography the remarks made about the preceding grants also hold good here. The wrong *saṁdhi* in *bhuṁjatō kṛish-*, l. 20, may be a Prākṛitism. The same is perhaps the case with *Drōṇasiṁhaṁs=siṁha iva*, l. 10. Consonants are doubled after *r* in the usual way; thus, *-ārjjavōpārjjita-*, l. 2 f.; *-dharmmā Dharmma-*, l. 8; *-maryyādayā*, l. 20, etc. The doubling of a surd before *y* in *-ānuddhyātō*, l. 13, *-saṁbaddhyamāna-*, l. 15, is also in accordance with the practice in similar grants. There are several instances of careless writing; thus we find *a* for *ā* in *dānaman-*, l. 2; *vapi*, l. 16; *brahmaṇa-*, l. 17; *-āpyāyanaya*, l. 18; *tā(sā)manyaṁ*, l. 22; *=ānumanta*, l. 24; *-dayaṁ*, l. 25; *ā* for *a* in *chā*, l. 24; *kṛishṇāhāyō*, l. 25; *u* for *ū* in *bhumi-*, l. 25; *ṛi* for *ri* in *triṁśat*, l. 17; *ē* for *a* in *vesēt*, l. 24; *ē* for *ai* in *śaraṇēshiṇīṁ*, l. 11; *chch* for *ch* in *chch=ānu-*, l. 24; *chhy* for *ndhy* in *Vichhyāṭavīshv=*, l. 25; perhaps *j* for *jya* in *-rāja-*, l. 3; *ñcha* for *śva* in *āñchayuja*, l. 27; *ta* for *gā* in *=ātami-*, l. 21; *t* for *tt* in *-tatvānāṁ*, l. 11; *āchchhētā*, l. 24; *tā* for *sā* in *tāmanyaṁ*, l. 22; *p* for *y* in *mapāpi*, l. 18.; *dē* for *ma* in *-aihikādēshmika-*, l. 19; *n* for *ṇ* in *maitrakānām=*, l. 1, for *t* in *nāny=ēva*, l. 24, and for *v* in *=anumantany=*, l. 22; *p* for *y* in *patō*, l. 20; *s* for *sh* in *śuska-*, l. 25. L. 21 contains a series of mistakes in *=chavityāny=aiśvaryyāny=ēsthira mōnuryya tāmanyaṁ*. Note also the superfluous *anusvāra* in *-siṁhaṁs=*, l. 10; *suhṛiṁt-*, l. 12; the superfluous *na* in l. 21; the redundant *ha* in *vāsihanaḥ*, l. 25; the omission of *nā* in *-ānīkā[nā*]m=*, l. 11; the omission of a *visarga* in *rājalhi*, l. 23, and the form *Kikakka* instead of *Kikkakēna*, l. 26. In l. 5, on the other hand, we find the correct *saṁdhi -dīdhitir=ddīn-*, while the other grants of Dhruvasēna have *-dīdhitiḥ dīn-*.

The grant was issued from **Valabhī** by the *Mahāsīmanta*, the *Mahārāja* **Dhruvasēna** to the Brāhmaṇa Skanda of the Anpasvasti *gōtra*, a student of the Vājisanēya *śākhā*, a resident of **Akrōlaka** village, who was therewith confirmed in the possession of an irrigation well (*vāpī*) and a field of thirty *pādāvurtas*, on the northern border of the village. I am not able to identify this village. The messenger was **Rudradhara**, who is not elsewhere known, and the writer, as in the preceding grants, **Kikkaka**. The grant is dated on the fifth (tithi) of the **dark (?) fortnight of Āśvayuja, in the (Valabhī) year 210**, corresponding to **A.D. 529**. The syllable denoting the fortnight has been miswritten, and it is possible that it should be restored as *śu* and not as *ba*. The mistake is due to the final syllable of the preceding word being wrongly repeated.

Palitana plates of Dhruvasena I.—[Gupta-] Samvat 210.

## TRANSLATION.

[Lines 1-15 are practically identical with the beginning of the plates of Saṁ. 206.]

(Line 16.) Be it known to you that, in order to increase the religious merit of My mother and father and to obtain for Myself in this world and the other such rewards as I may wish, I have, in accordance with the settled rules of former usage, confirmed (*the enjoyment of*) an irrigation-well with an area of twelve *pādāvartas* and thirty *pādāvartas* arable land on the northern border of **Akrōlaka** village which had formerly been and are still being enjoyed (by the donee) for the benefit of the resident of that same place, (*viz.*) the Brāhmaṇa Skanda, of the Aupasvasti *gōtra*, a student of the Vājisanēya (*śākhā*). Therefore not even a slight obstruction or dispute must be made by anybody to him while he enjoys (*this land*), cultivates it, causes it to be cultivated, or assigns it (*to others*) in accordance with the conditions under which he enjoyed (*it*) previously. This Our confirmation (*of the old grant*) should be confirmed by those born in Our lineage and by future pious kings, bearing in mind that power is perishable, that the life of man is uncertain, and that the reward of a gift of land is common.

(Line 22.) There are also verses sung by Vyāsa about this,—The earth has been enjoyed, etc. The giver of land, etc. Those who rescind a grant of land are reborn as black serpents living in the dry hollows of trees in the waterless forests of the Vindhyas.

(Line 26.) The sign manual of Me the *Mahāsāmanta*, the *Mahārāja* **Dhruvasēna**. The messenger is **Rudradhara**. Written by **Kikkaka**. **The year 200 (and) 10; (the month) Āśva[yuja]; the dark (?) (fortnight); the 5th** (*tithi*).

## IV.—PALITĀNĀ PLATE OF DHRUVASĒNA I.

This plate has been described as follows by Rai Bahadur V. Venkayya,—"One plate only of the inscription is preserved. It is written on one side and has two ring-holes at the bottom. The working of the engraver's tool shows itself almost completely at the back. There is also a square hole in the left-hand top corner of the plate, bored into the symbol representing the syllable *ōṁ*. Length of plate varies from 11″ to 11¼″; height varies from 6¼″ to 6½″."

The plate contains 13 lines of well executed writing. The average height of individual letters is ¼″.

The characters are similar to those used in the other plates. They comprise the sign of the *jihvāmūlīya* in *-Dhruvasēnaḥ=kuśalī*, l. 12. There are three different forms of the medial long *-ī-*. Two of them occur in *dīdhitiḥ dīn-*, l. 5, and the third in *-praṇīta-*, l. 6. Note also the form of *-ē-* in *-nām=ēka-*, l. 9, which is likewise used in the corresponding passage of the grant

With regard to orthography, we may note the usual doubling of consonants after *r*; thus, *-ārttha-*, l. 10; *sarvvān=*, l. 12. On the other hand, we have a single *dh* before *y* in *-ānudhyātō*, l. 11; *-saṁbadhya-*, l. 13, as in the grant of Saṁvat 206. The absence of *saṁdhi* in *-dīdhitiḥ dīn-*, l. 5, is in accordance with the common practice in Dhruvasēna's grants. In l. 4 we find *-ruṇa-*

V. VENKAYYA.

SCALE · 8

W. GRIGGS & SONS LTD., PHOTO-LITHO.

Paliana plate of Dhruvasena I. (incomplete).

*nata-* instead of *-ruṇ-āvanata-*, and the syllables *ṇāma-pra* have been omitted in l. 6. In l. 7 we find *viphita-* for *vihita-*. On the whole the engraver has done his work carefully.

The grant was issued from **Valabhī** by the *Mahāsāmanta*, the *Mahārāja* **Dhruvasēna**, but only the formal portion is preserved.

## V.—PALITĀNĀ PLATE OF [ŚĪLĀDITYA I. DHARMĀDITYA; VALABHĪ-SAṀVAT 286].

Rai Bahadur V. Venkayya has favoured me with the following description of this plate,—"One plate only of the inscription is preserved. It has two ring-holes at the bottom, but neither the ring nor the seal which it might have borne is forthcoming. A small piece of the plate is broken at the left top corner, damaging a portion of the symbol for *ōṁ*. Likewise a small piece is missing at the beginning of l. 10, where, however, no letter has been damaged. The plate is engraved only on one side. The working of the engraver's tool shows itself almost completely at the back. Length of plate varies from $11\frac{1}{2}''$ to $11\frac{3}{4}''$. Height about $8\frac{1}{8}''$."

The plate contains 18 lines of well executed writing. The average height of individual letters is $\frac{1}{4}''$.

The **characters** agree with those used in the grants of Śīlāditya I.

With regard to **orthography**, we may note the use of *ṛi* for *ri* in *tṛidaśa-*, l. 7; of *ri* for *ṛi* in *triṇa-*, l. 7; the writing of *ṁgh* for *ṁh* in *-saṁghatis=*, l. 5 and in *saṁghat-*, l. 13; the use of *n*

[1] Expressed by a symbol.

for *ṁ* in *-ānsa-*, l. 15; the doubling of consonants after *r* and before *y* in *-ārjjavōpārjjit-*, l. 2; *Bhaṭārkkād=*, l. 3; *sthairyya-dhairyya-gāmbhīryya=*, l. 6; *-ānuddhyātas=*, l. 14, and so on. There are a few mistakes, such as *ē* for *a* in *-pētha-*, l. 18; *t* for *tt* in *-satva-*, l. 4; *j* for *jj* in *-ōjvala-*, l. 18; *p* for *pr* in *-pabhāva-*, l. 4; a superfluous *anusvāra* in *-rāṁja-*, l. 3, and so on. The first *n* in *santāna-*, l. 9, has been misshaped and looks almost like a *v*. Note also the absence of *saṁdhi* in *-śabdaḥ rūpa-*, l. 6.

The plate contains only the formal portion of the grant and breaks off in the description of **Śīlāditya I. Dharmāditya**, but it is absolutely certain that Mr. Jackson was right in assuming that the grant was issued by him. The absence of *saṁdhi* in *-śabdaḥ rūpa-*, l. 6; the word *-dhairyya-* in *-sthairyya-dhairyya-gāmbhīryya-*, l. 6; and the word *-bala-* in *-ākhila-bala-dhanurddharaḥ*, l. 11, occur in all the grants of Śīlāditya but not in other Valabhī grants. It is also possible to state definitely that the plate belongs to a grant issued before Valabhī-Saṁvat 290, because the spellings *-saṁghatis-*, l. 5; *-tṛidaśaguru-*, l. 7, and *saṁghat-*, l. 13, which also occur in the Walā plates of Valabhī-Saṁvat 286, are not found in the Ḍhānk plates of Valabhī-Saṁvat 290. The last words of our plate are *-ōjvalatarī-kṛit-ārttha-*, and by comparing other Valabhī grants we find that the second plate must have begun *-sukha-sampad-upasēvā-*. Now these are the first words of the fragmentary second Walā plate of Śīlāditya I. Dharmāditya, dated Saṁ. 200 80 6 Vaiśākha-va(?) 6, which has been published by Dr. Bhandarkar.[1] The length of that plate is, according to the editor, 12″ and the height 8¼″. The size therefore also agrees with that of our plate, and there cannot be any doubt that the two plates belong together, so that the whole grant is now before us. To judge from Dr. Bhandarkar's edition the second plate is not well preserved. I asked Rai Bahadur V. Venkayya to be good enough to try to get hold of it so that it could be republished together with the first plate. His endeavours to do so have not, however, been successful, and I therefore edit the beginning alone.

## TRANSLATION.

(Line 1.) Ōṁ. Hail! From Valabhī. (*In the lineage*) of the **Maitrakas**, who had by force prostrated (their) enemies, from the devout worshipper of Mahēśvara, the illustrious **Bhaṭārkka**, who had acquired splendour in hundreds of battles connected with the circuit of the territories that he had obtained by means of his unequalled strength; who had gained the devotion of those whom he had prostrated by his splendour through his gifts, honours and straightforwardness; who obtained the glory of royalty by the strength of the array of devoted hereditary servants (*was descended*), the royal lineage being uninterrupted, the devout worshipper of Mahēśvara, the glorious **Guhasēna**, whose sins were all washed away by the prostrations at the lotus feet of (his) mother and father; to whom (his) sword was indeed a second arm from (his) childhood; and who brightened the touchstone of his strength by splitting open the temples of the rutting elephants of his foes; the collection of the rays of the nails of whose feet was combined with the lustre of the crest jewels of his foes who were prostrated by the power of that (*strength*); who rendered (his) title of king appropriate by pleasing the minds of (his) subjects by thoroughly observing the conduct laid down in all the *smṛitis*; who in beauty, loveliness, stability, firmness, profundity, wisdom and wealth surpassed (*respectively*) Cupid, the moon, the king of mountains, the ocean, the preceptor of the gods (Bṛihaspati) and Dhanēśa; who, through being intent upon granting safety to those who came for protection, threw away all the results of his deeds as if they were straw; who gladdened the hearts of learned people, friends and favourites by giving (them) riches in excess of their demands; and who was, as it were, the personified happiness of the vast circle of the whole world;

(Line 9.) his son (*was*) the devout worshipper of Mahēśvara, the glorious **Dharasēna**, whose sins were all washed away by the flood of the waters of the Ganges which flowed from the cluster of rays of the nails of the feet of his (*father*), whose wealth was being lived upon by hundreds of thousands of favourites; who was impetuously resorted to by attractive qualities as if from a desire for (*his*) beauty; who astonished the archers of all armies by his innate ability and excellent training; who was the preserver of religious grants bestowed by former kings; who was a remover of calamities that might oppress (his) subjects; who showed (the world) Śrī and Sarasvatī living together; whose prowess was skilful in enjoying the Fortune of the compact ranks of his foes; and who by his prowess obtained spotless royal splendour;

(Line 14.) his son [the devout worshipper of Mahēśvara, the glorious **Śīlāditya**], who meditates on his (*father's*) feet; who covers the whole horizon by the rise of his wonderful virtues that gladden the whole world; who supports the great burden of weighty desires on the pedestal of his shoulders (which have got their) splendour increased by the lustre of his sword that is

possessed of the brilliancy of victory in hundreds of battles; who though his intellect is pure by mastering the higher and lower divisions of all sciences, is always easily gratified by even a trifle of wit; who, though his heart possesses a profundity that is unfathomable by the whole world, well manifests his noble disposition in abundance of good conduct; who has achieved exalted fame by purifying the path of the kings of the Kṛitayuga which had become abandoned; [whose second name of **Dharmāditya** arose from his enjoying riches, happiness, and] wealth which have been made more resplendent by (his) non-obstructing the law.

## No. 10.—BURMESE INSCRIPTION AT BODH-GAYA.

BY TAW SEIN KO.

Translations of this inscription have already been published at pages 208-210 of Rajendralāla Mitra's *Buddha Gaya*, and at page 76 of Cunningham's *Mahābodhi*. There is some controversy as to the correct reading of the dates. The initial date is undoubtedly 657, which corresponds to 1295 A.D., and the final date 660, which is equivalent to 1298 A.D. During the period indicated by these two dates, the Burmese empire of Pagan was in the throes of a Chinese invasion. In 1284, Pagan had been occupied by the Chinese. In 1298 A.D., **Kyawzwa**, the titular king, had been dethroned by three **Shan** brothers, who bore divided rule at the new capitals of **Myinzaing**, **Metkaya**, and **Pinlè** in the Kyauksè district. Two years later, the **Chinese** again invaded **Myinzaing**. In these circumstances, the only inference is that the last repairs to the **Mahābōdhi Temple** alluded to in the inscription were carried out under the auspices of a **king of Arakan**.

There is, however, some difficulty in the identification of the personages mentioned in the inscription. *Mahāthera* **Pinthagugyi** cannot be identified with certainty. *Pinthagugyi* or the "great Pinthagu" is a title, designation, or *sobriquet*, rather than a personal name, and is derived from the Pāli word *paṁsukūlika*, "one who obtains the materials for his clothing from a dust-heap or a cemetery." Such a title was usually conferred on a Buddhist monk of exceptional sanctity and austerity, who had secured the esteem and admiration of the laity. There was such a celebrated Buddhist monk at Pagan during the reign of **Narapatisithu** (1167-1204 A.D.).

**Thadomin** sounds like an Arakanese title of a king or prince. It does not occur in the chronological lists appended to Phayre's *History of Burma*.

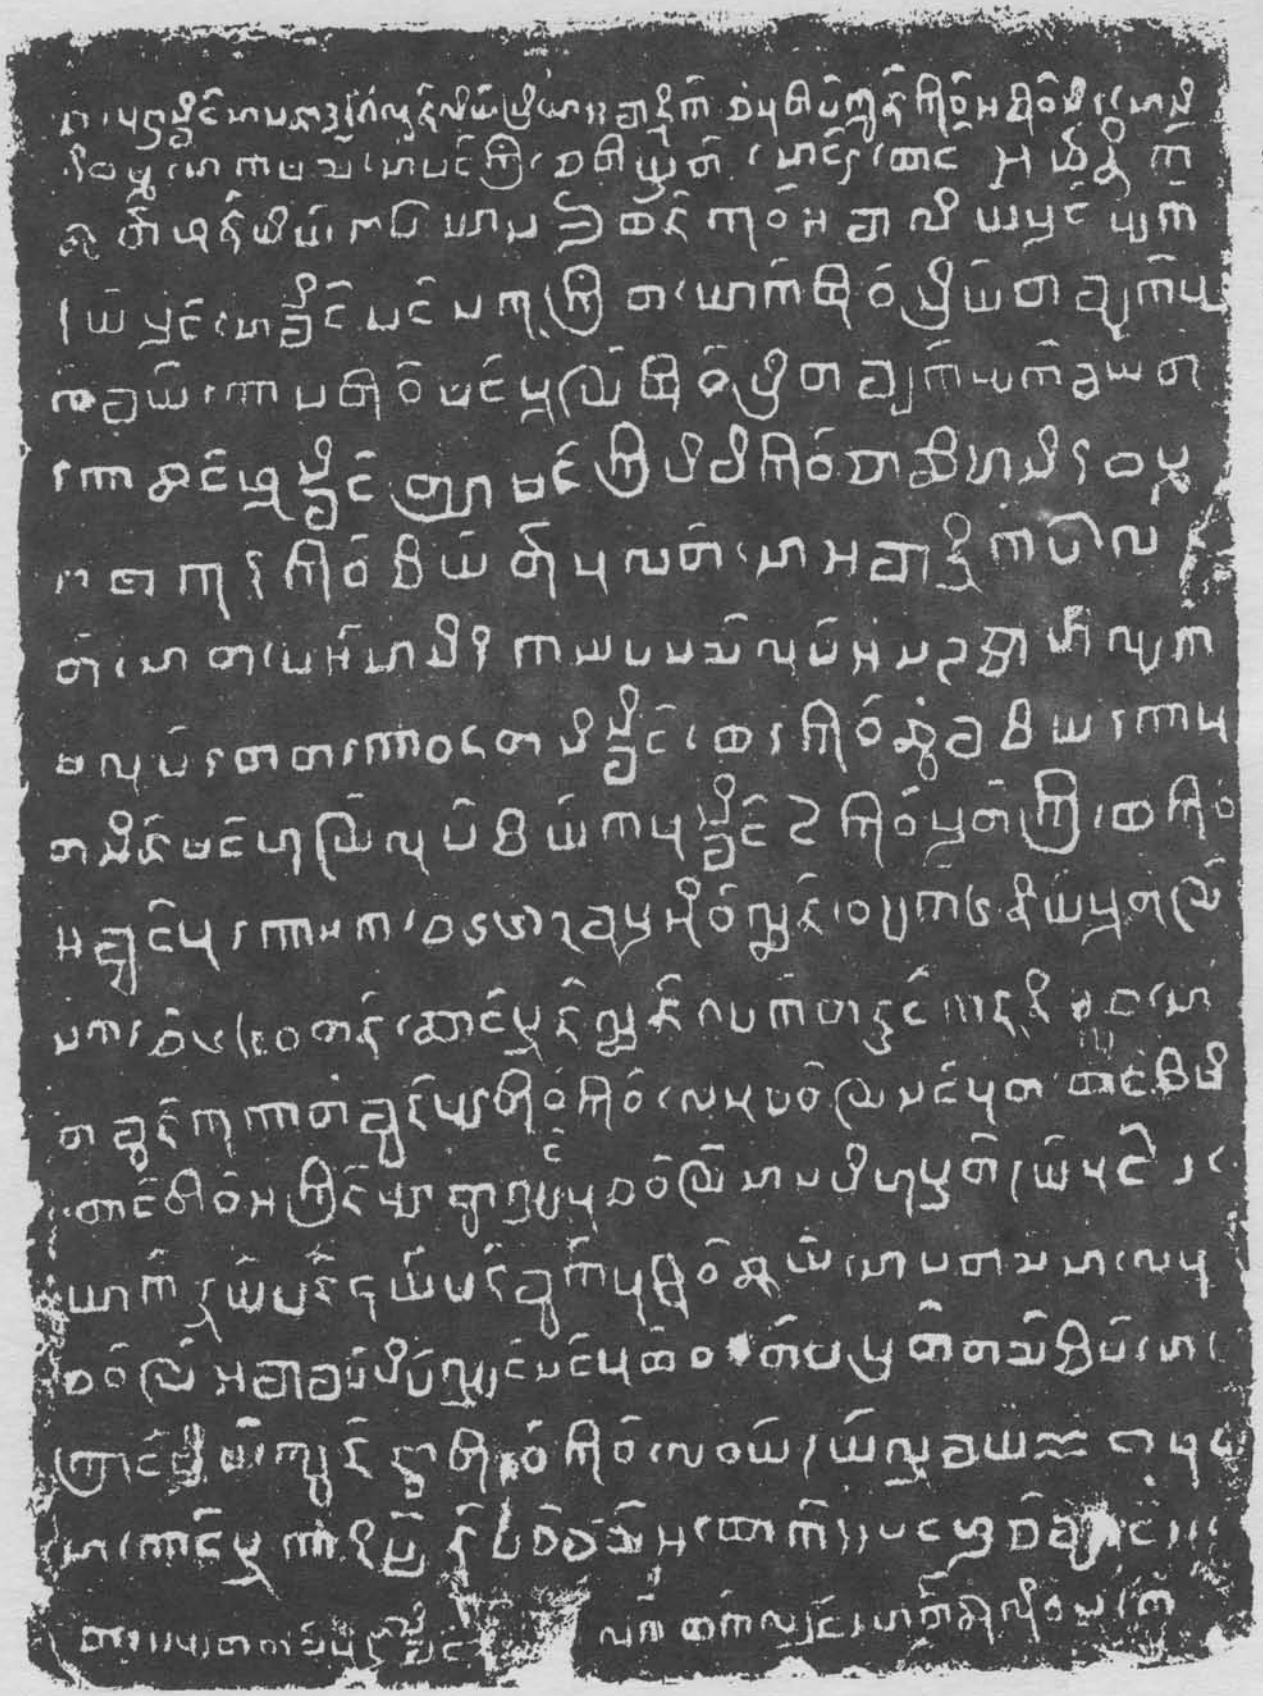

King **Sinbyuthakin** is called in the inscription *Sinbyuthikhin Trā Mingyi*. The first part means "the Lord of the White Elephant," and the second "Dhammarājā." Here, again, the expression is a common regal title and not a personal name.

**Siridhammarājaguru** is the title of a learned monk. All royal preceptors are called "Dhammarājaguru," or the "King's *guru*."

**Sirikassapa** and **Varavāsi** are ordinary names of Buddhist monks.

A great deal of interest centres round the designation "**Pyu-ta-thein-min**", which appears as "Pu-ta thin min" in lines 9-10 of the inscription below. I am inclined to identify this personage with the "King Sinbyuthikhin" mentioned in the same inscription, and both with Meng-di, No. 9 of the "Dynasty of the City Loung-Kyet" at page 301 of Phayre's *History of Burma*. This king reigned from 1279 to 1885, and is described as a "son of Meng-bhi-lu". There are two "Meng-bhi-lus," namely, No. 7 of the same dynasty, who reigned from 1272 to 1276 A.D., and No. 12 of the "dynasty of Ping-tsa City," who ruled from 1075 to 1078 A.D. (page 299, *ibid*). The latter king was driven out from his kingdom by a usurper, and his son and heir, **Mengre Baya**, sought refuge at the Court of **Kyanzittha**, **king of Pagan**. Mengre Baya died leaving a son called **Letyāmengnan**. This Arakanese prince

Burmese inscription at Bodh-Gaya.

V. VENKAYYA. SCALE ·35. W. GRIGGS & SONS Ltd., PHOTO-LITHO.

FROM IMPRESSIONS SUPPLIED BY MR. LONGHURST.

was restored to his ancestral throne by Alaungsithu, Kyanzittha's grandson and successor, in 1103 A.D., with the aid of 100,000 Pyus and 100,000 Talaings. Hence the fortunate prince is known in history as "Pyu-ta-thein-min," or "Lord of the 100,000 Pyus" (*vide* page 40, *ibid*). It is most probable that Meng-di, during whose reign the inscription was set up at Bodh-Gaya, was a descendant of Letyāmengnan and was also called a "Pyu-ta-thein-min."

On the same page, Phayre says: "Alaungsithu caused the Buddhist temple at Gaya to be repaired." I am inclined to think that, on that occasion, the King of Pagan deputed the *Mahāthera* Pinthagugyi to superintend the work, and that he required his *protegé*, Letyāmengnan, to render the necessary assistance in this work of merit. It would then appear that the "Thadomin" mentioned in the inscription was a descendant of Letyāmengnan, the Prince, who first bore the title of "Pyu-ta-thein-min" or "Lord of the 100,000 Pyus."

It is quite possible that one of the conditions of Letyāmengnan's restoration to the Arakanese throne was that, for the accumulation of merit of Alaungsithu, his suzerain and benefactor, he and his descendants were to render material assistance in the repair and maintenance of the temple at Bodh-Gaya. Viewed in this light, the chronology of the inscription and the *raison d'être* of the proceedings recorded therein become clear, reasonable, and logical.

## TRANSLATION.

1 When 218 years of the era of the Religion of the Lord Buddha had passed away, Siridhammāsoka, the Ruler of Jambudīpa,

2 built 84,000 chaityas, one of which was situated on the site,

3 where the Buddha took a meal (of rice porridge offered by Sujātā before attaining Enlightenment). This shrine, owing to the effluxion of time, fell into ruin,

4 and was repaired by the Mahāthera Pinthagugyi. Subsequently,

5 it was repaired by Thadomin. It again fell into disrepair,

6 and King **Sinbyuthikhin** deputed the Royal Preceptor,

7 **Siridhammarājaguru**, to undertake the work of repair.

8 **Sirikassapa**, the disciple of the Preceptor, had sufficient funds,

9 but could not take the work in hand (owing, probably, to the absence of skilled artisans)—

10 He, therefore, sent **Varavāsi**, a junior *Thera*,

11 to King **Pyutathin Min**, who complied with the solicitation for assistance.

12 The work of repair was begun on **Friday, the 10th, waxing of Pyatho 657 B.E.** (January 1295 A.D.),

13 and was completed on **Sunday, the 8th, waxing of Tazaungmon 660 B.E.** (November 1298 A.D.)

14 The following offerings were dedicated to the shrine: flags and streamers, 1,000 bowls of rice and 1,000 lamps (for several times), 2 boys in the place of the donor's own children,

15 and gold and silver flowers and cloth hung on bamboo framework.

16 In order to provide for the daily offering of rice at the shrine, at all times,

17 land, slaves, and cattle were purchased and likewise dedicated. May this

18 meritorious deed of mine lead me on to Nirvāṇa!

19 May I become a disciple of **Metteyya**, the coming Buddha!

---

## No. 11.—DATES OF CHOLA KINGS.

BY PROFESSOR H. JACOBI, BONN.

I have received from the Government Epigraphist, Mr. Venkayya, a large number of dates for examination, of which I here publish 32 dates of Chōḷa kings. In accepting this task I may be permitted to give expression to my admiration of the work done by my predecessor, the late Professor Kielhorn. Without the results he had worked out with inexhaustible patience, I probably should not have succeeded in verifying many of the dates which are now published.

The dates have been calculated with the help of my General Tables published in Volume I, p. 443 of this journal. The time of the end of *tithis* and *nakshatras* is given in *ghaṭikās* only, when the result at issue would not be influenced by a few *ghaṭikās*, more or less. In those cases, however, where a higher degree of accuracy is wanted, I have made use of the new special tables which I am going to publish in Part iv. of this volume. These tables yield the result within a few *palas* according to the Ārya, Sūrya, and Brahma-Siddhāntas, and the Siddhānta-Śirōmaṇi.

The date No. 198 reduces the time previously found for the commencement of the reign of **Rājādhirāja II.** to the period from the 7th to the 30th March 1163 A.D. The remaining dates confirm the results previously found.

### A.—PARAKĒSARIVARMAN RĀJĒNDRA-CHŌḶA I.

#### 191.—In the Vēdapurīśvara temple at Tirukkaḷittaṭṭai.[1]

1 Svasti śri [||*] Tiru-maṉṉi(maṉṉi) vaḷara . . . .

20 . . . . . kō=Pparakēsaripa[u]mar=āṇa śrī-R[ā]-

21 j[ē]ntra-Śōḷadēvaṟkku yāṇḍu oṉbadāvadu . .

24 . . . . . ivv=āṭṭai Magara-n[ā-

25 ya]ṟṟu Budaṉ-kiḻamai peṟṟa Tirukkĕṭṭai-nāṉṟu.

[1] No. 293 of the Madras Epigraphical collection for 1908.

"In the **ninth year** (*of the reign*) of **king Parakēsarivarman** *alias* **the glorious Rājēndra-Chōḷadēva,**— on the day of the auspicious (*nakshatra*) **Jyēshṭhā,** which corresponded to a **Wednesday** of the month of Makara in this year."

The date corresponds to **Wednesday, the 8th February 1021,** which was the 8th *tithi* of the second fortnight of Makara. The *nakshatra* was Jyēshṭhā which ended, according to the equal space system, about 18 *ghaṭikās* after mean sunrise.

## B.—VIKRAMA-CHŌḶA.

### 192.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[1]

1 [S]vasti śrī [||*][2] Pūmādu puṇara . . . . . .
3 . . . . . kō=Pparakēśaripatmar=āna Tribhuvanacha-
4 kavattigaḷ[3] śrī-Vikrama-Chōḷadēvarkku yāṇḍu 2 iraṇḍu āvadu Midhuna-nāyaṟṟu=[p]pū[r]vva- [pa]kshattu [dv]ādaśiyum Ti[ṅ]gaṭ-kiḻamaiyum peṟṟa [Vi]śāgattu nāḷ.

"In the **2nd—second—year** (*of the reign*) **of king Parakēsarivarman** *alias* **the emperor of the three worlds, the glorious Vikrama-Chōḷadēva,**— on the day of **Viśākhā,** which corresponded to a **Monday** and to the twelfth *tithi* of the first fortnight of the month of **Mithuna.**"

This date is intrinsically wrong. Monday, the 23rd June 1119 A.D. corresponded to the 14th *tithi* of the bright fortnight of Mithuna (Āshāḍha) and the *nakshatra* was Mūla.

### 193.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[4]

1 Pūmādu puṇara . . . . . .
2 . . . . . kō=Pparakēśaripatmar=āna Tribhuvanachakravarttigaḷ
3 śrī-Vikrama-Chōḷadēvarkku [y]āṇḍu mūṉṟāvadu Midu[ṇa*]-nāyaṟṟu pū[r]vva-pakshattu shash[ṭh]iyum Veḷḷi-kki[ḻam]aiyum peṟṟa Pūrattu nāḷ.

"In the **third year** (*of the reign*) **of king Parakēsarivarman** *alias* **the emperor of the three worlds, the glorious Vikrama-Chōḷadēva,**— on the day of **Pūrva-Phalgunī,** which corresponded to a **Friday,** and to the sixth *tithi* of the first fortnight of the month of **Mithuna.**"

The date corresponds to **Friday, the 4th June 1120 A.D.,** being the 6th *tithi* of the bright fortnight of Mithuna (Āshāḍha), the *nakshatra* being Pūrva-Phalgunī, which had begun about 12 *ghaṭikās* before mean sunrise and was current for the greater part of the day.

### 194.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[5]

1 [6] Śrī-Vikrama-Śōḷadēvaṟkku yāṇḍu 3 mūṉṟāvadu Miduna-nāyaṟṟu [p]ū[r]v[va]-pakshattu ashṭamiyum Viyāḻa-kkiḻamai[yu]m peṟṟa Uttirattu [nāḷ].

"In the **3rd—third—year** (*of the reign*) **of the glorious Vikrama-Chōḷadēva,**— on the day of **Uttara-Phalgunī,** which corresponded to a **Thursday** and to the eighth *tithi* of the first fortnight of the month of **Mithuna.**"

---

[1] No. 170 of the Madras Epigraphical collection for 1908.
[2] The space between *śrī* and *pū* was perhaps intended for a punctuation.
[3] Read °*chakravarttigaḷ*.
[4] No. 164 of the Madras Epigraphical collection for 1908.
[5] No. 171 of the same collection for 1908.
[6] This inscription is engraved in continuation of No. 170 of 1908 (from the middle of line 17 of the latter).

This date is apparently wrong. It belongs to the same year and month as the preceding one and may be expected to fall on the day previous, if we take the week-day to be given correctly, and on the following day if we assume the *nakshatra* to be right; but these items are Friday and Pūrva-Phalgunī in the preceding date and Thursday and Uttara-Phalgunī in this.

### 195.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[1]

1 Svasti śrī ||— Pūmādu puṇara . . . . . .
. . .
3 . . . . . kō=[2]Pparakēsari[var]mar=āna Tribhu[va]nach-
[cha]krava-
4 [3]rttiga[l] śrī-Vi]kra[ma-Śō]ladēva]rkku[4] yāṇḍu 12 ā[va]du Ṛishabha-[nā]yaṟ[ṟu]=
ppūrvva-pakshattu shashṭhiyum Viyā[ḻa]-kiḻakkiḻamaiyum[5] pe[ṟ]-
5 ṟa Ma[gattu nā]ḷ.

"In the **12th year** (*of the reign*) **of king Parakēsarivarman** *alias* **the emperor of the three worlds, the glorious [Vikrama-Chōḻadēva],**— on the day of **M[aghā],** which corresponded to a **Thursday** and to the sixth *tithi* of the first fortnight of the month of **Ṛishabha.**"

The date corresponds to **Thursday, the 15th May 1130 A.D.,** which was the 6th *tithi* of the bright fortnight of Ṛishabha (Jyaishṭha) and was coupled with the *nakshatra* Maghā. The 6th *tithi* ended about 41 *ghaṭikās* after mean sunrise, and the *nakshatra* Maghā commenced about 10 *ghaṭikās* after it according to the equal space system.

## C.—PARAKĒSARIVARMAN RĀJARĀJA II.

### 196.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[6]

1 Svast[i] śr[i] [||*] Puyal vāyttu . . . . . .
. . .
3 . . . . . kō=Pparakēsaripaṟmar=āna Rāja[r]ājadēvaṟku
yāṇḍu 5 āvadu nāḷ Vṛiśchika-nāyaṟṟu=p[p]ūrvva-[pa]kshattu tṛitiyaiyum
Śani-kkiḻamaiyum peṟṟa Uttirāḍat-
4 [tu nāḷ].

"In the time (*nāḷ*) of the **5th year** (*of the reign*) of **king Parakēsarivarman** *alias* **Rājarājadēva,**—on the day of **Uttarāshāḍhā,** which corresponded to a **Saturday** and to the third *tithi* of the first fortnight of the month of **Vṛiśchika.**"

The date seems to correspond to **Friday, the 24th November 1150 A.D.,** which was the third *tithi* of the bright fortnight of Vṛiśchika (Mārgaśirsha). The day was coupled with the *nakshatra* Uttarāshāḍhā, which commenced about 19 *ghaṭikās* before mean sunrise of that day, while the third *tithi* ended about 44 *ghaṭikās* after it. We must therefore assume that in the inscription, Saturday is wrongly given instead of Friday.

[1] No. 167 of the Madras Epigraphical collection for 1908.
[2] The letter *sa* of *kēsari* is written on an erasure.
[3] The syllable *r* at the beginning of the line is corrected from *ra*.
[4] The five syllables *maśōḻadēva* are written on an erasure.
[5] Cancel the first two letters *kiḻa*.
[6] No. 165 of the Madras Epigraphical collection for 1908.

### 197.—In the Aiyaṇār temple at Tiruppaṭṭūr.[1]

1 Svasti śrī [||*] Pū maruviya tiru-mādum . . . . . .
4 . . . . . kō=Pparakēśaripatmar=āṇa Tiribuvaṇachchakkaravattigaḷ śr[i]-
Rājarājadēvaṟ[ku y]āṇḍu 7 āvadu Ishaba-nāyaṟṟu a-
5 para-pakshattu dvādaśiyum Viyāḻa-kkiḻamaiyum peṟṟa Aśvati-nāḷ.

"In the 7th year (*of the reign*) of king Parakēsarivarman *alias* the emperor of the three worlds, the glorious Rājarājadēva,— on the day of Aśvinī, which corresponded to a Thursday and to the twelfth *tithi* of the second fortnight of the month of Ṛishabha."

The date intended in this inscription is **Thursday, the 21st May 1153 A.D.** It is, however, not the 12th, but the 11th *tithi* of the dark fortnight of the month Ṛishabha (Jyaishṭha); it was coupled with the *nakshatra* Aśvinī, which ended about 11 *ghaṭikās* after mean sunrise. The 12th *tithi* ended about mean sunrise of Friday at Laṅkā, according to the Ārya-Siddhānta, 22 *palas* after it, according to the Sūrya-Siddhānta 7 *palas* before it, and according to the Brahma-Siddhānta 52 *palas* before it. But as we have to reckon with true sunrise, which occurred on that day, say at Conjeeveram, 1 *ghaṭikā* 49 *palas* before mean sunrise at Laṅkā, the end of the 12th *tithi* fell after true sunrise of Friday, which day therefore was called the 12th *tithi*. The 12th (lunar) *tithi* was however coupled with the *nakshatra* Aśvinī, which ended in it, though the day in which it ended was called the 11th *tithi*.

## D.—TRIBHUVANACHAKRAVARTIN RĀJĀDHIRĀJA II.

### 198.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[2]

1 Svasti śrī [ō] Kaḍal-ś[ū]nda[3] pār=ēḻun= . . . . .
8 Tribhuvaṇachchakkaravattigaḷ śrī-Rājāta(dhi)rājadēvarkku yāṇḍu āṟāvadu
Mīṇa-nāyaṟṟu pūrvva-pakshattu shashṭhiyum Viyāḻa-kka(kki)lamaiyum peṟṟa Urōśaṇi-nāḷ.

"In the sixth year (*of the reign*) of the emperor of the three worlds, the glorious Rājādh[i]rājadēva,— on the day of Rōhiṇī, which corresponded to a Thursday and to the sixth *tithi* of the first fortnight of the month of Mīna."

This date corresponds to **Thursday, the 6th March 1169 A.D.** On this day, the 6th *tithi* of the bright fortnight of the month Mīna (Chaitra) ended about 38 *ghaṭikās* after mean sunrise and the *nakshatra* Rōhiṇī about 36 *ghaṭikās* after mean sunrise (according to the equal-space system). The present inscription brings the accession to the throne of Rājādhirāja II. between 7th and 30th March 1163.

## E.—KULŌTTUṄGA-CHŌḶA III.

### 199.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[4]

[1] No. 597 of the Madras Epigraphical collection for 1908.
[2] No. 172 of the same collection for 1908.
[3] The syllable *ḷa* seems to be entered below the line.
[4] No. 166 of the Madras Epigraphical collection for 1908.
[5] Between *ṇḍu* and the figure 2 there is some space in which traces of a letter or a figure are seen.
[6] The flourish added to the figure 2 may also be taken to represent the syllables *vadu*.
[7] The *tithi* seems to have been repeated by mistake.

"In the 2nd year (*of the reign*) of the emperor [of the three worlds], the glorious Kulōttuṅga-Chōḷadēva,— on the day of Pūrva-Phalgunī, which corresponded to the first *tithi* . . . . . to a Wednesday, to the first *tithi* of the second fortnight and to the twenty-first solar day [of the month of Kumbha]."

The date corresponds to **Wednesday, the 13th February 1180 A.D.**, which was the 21st day of the solar month Kumbha. The case is similar to that in No. 197; but here the first *tithi* of the dark fortnight of Kumbha was an expunged *tithi*, wherefore the day was to be called the 15th *tithi* of the bright fortnight. According to the Ārya-Siddhānta, the 15th *tithi* of the bright fortnight of Kumbha (Phālguna) ended 5 *ghaṭikās* 9 *palas* after mean sunrise at Laṅkā, and the 1st *tithi* of the dark fortnight 5 *palas* after mean sunrise of the next day (Thursday); but as the sun rose in Conjeeveram on that day 8 *palas* later, the end of the *tithi* was brought over to the preceding day, and was, therefore, expunged. But this first *tithi* of the dark fortnight of Kumbha was coupled with Pūrva-Phalgunī which ended on Wednesday about 34 *ghaṭikās* after mean sunrise.

### 200.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[1]

1 Svasti śrī [॥*] Tiribuvanachchakkaravatt[i]gaḷ [śrī]-Kulōttuṅga-Śōḷadēvaṟku yāṇḍu 2 vaḍu[2] Mīṉa-nā[ya]ṟṟu pūrva-pakshattu piradamaiyum Vi[y]āḻakkiḻamaiyum peṟṟa [U]ttiraṭṭādi-nāḷ.

'In the 2nd year (*of the reign*) of the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva,— on the day of Uttara-Bhadrapadā, which corresponded to a Thursday and to the first *tithi* of the first fortnight of the month of Mīna."

The date corresponds to **Thursday, the 28th February 1180 A.D.** On that day ended the 1st *tithi* of the bright fortnight of the month Mīna (Chaitra) and the *nakshatra* Uttara-Bhadrapadā, both about 19 *ghaṭikās* after mean sunrise at Laṅkā.

### 201.—In the Siddhanāthasvāmin temple at Tirunaṟaiyūr.[3]

4 mar=āna [Ti*]ribuvanachchakkara[va]ttigaḷ śr[ī]-Vīrarājēndra-Śōḷadēvarkku yāṇḍu āṟā[va]du nāḷ Siṁha-nāyaṟṟu apara-pakshattu navamiyum Śani-kkiḻamai-yum peṟṟa [Mṛi]ga-

5 [śī]rsha[ttu n]āḷ.

"In the time (*nāḷ*) of the **sixth year** (*of the reign*) **of king** [1]**Rājakēsarivarman** *alias* **the emperor of the three worlds, the glorious Vīrarājēndra-Chōḷadēva,**— on the day of **Mṛigaśīrsha,** which corresponded to a **Saturday** and to the ninth *tithi* of the second fortnight of the month of **Siṁha.**"

I take the date to correspond to **Saturday, the 10th September 1183 A.D.** For, on this day the *nakshatra* Mṛigaśīrsha **began** at about 4 *ghaṭikās* after mean sunrise at Laṅkā. The day, however, was not the 9th, but the 7th *tithi* of the dark fortnight of Siṁha (Bhādrapada), that *tithi* having ended about 16 *ghaṭikās* after mean sunrise.— The result shows that the word *navamiyum* of the original date should be altered to *saptamiyum* (or perhaps into *ashṭamiyum*, if that *tithi* was intended with which the given *nakshatra* mainly coincided, or in which it ended, as was the case in Nos. 197 and 199).

### 203.—In the Vīḻināthasvāmin temple at Tiruvīḻimiḻalai.[2]

1 [Sva]sti śr[ī] [||*] T[i]ribuvaṇachchakka[va]tti[gaḷ][3] śrī]-Kulō[t]tu[ṅ]ga-[Ś]ōḷadē-[va]ṟku y[ā]ṇḍu ēḻā-

2 vadu Magara-nā[ya]ṟṟu pū[rvva]-pak[shat]tu śatudaśi[y]u Viyāḻa-kkiḻa[mai]yum peṟṟa Puṇarpūśatti=[n]āḷ.

"In the **seventh year** (*of the reign*) **of the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva,**—on the day of **Punarvasu,** which corresponded to a **Thursday** and to the fourteenth *tithi* of the first fortnight of the month of **Makara.**"

The date intended seems to be **Wednesday, the 16th January 1185.** For, on that day the 14th *tithi* of the bright fortnight of the month Makara (Māgha) ended about 45 *ghaṭikās* after mean sunrise, and the *nakshatra* Punarvasu ended about 14 *ghaṭikās* after mean sunrise. The week-day however was Wednesday, and not Thursday, as given in the original date, apparently by a mistake.

### 204.—In the Vīḻināthasvāmin temple at Tiruvīḻimiḻalai.[4]

"In the **sixteenth year** (*of the reign*) **of the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva,** who was pleased to take Madurai and the crowned head of the Pāṇḍya,— on the day of **Rēvatī,** which corresponded to a **Friday** and to the [fifth *tithi*] of the first fortnight of the month of **Kumbha.**"

The date corresponds to **Friday, the 28th January 1194 A.D.,** the 5th *tithi* of the bright fortnight of the month Kumbha ending about 54 *ghaṭikās* after mean sunrise of that day, and the *nakshatra* Rēvati ending about 15 *ghaṭikās* after mean sunrise. As the *tithi* might be an

---

[1] Kulōttuṅga III. bears the surname Parakēsarivarman in his other inscriptions.

[2] No. 386 of the Madras Epigraphical collection for 1908.

[3] Read °*chakravarttigaḷ*.

[4] No. 418 of the Madras Epigraphical collection for 1908.

[5] Between *ga* and *tri* there is some space which may have contained a sign of punctuation

expunged one, I calculated the beginning of 5th *tithi* for true sunrise at Conjeeveram according to the Ârya-Siddhânta; it began nearly a *ghaṭikâ* before sunrise of Friday, which day accordingly was the 5th *tithi*.

### 205.—In the Vîḷinâthasvâmin temple at Tiruvîḷimiḷalai.[1]

1 Svast[i] śr[î] [||*] P[u]ya[l· vâ][y*]ttu [vaḷam] . . . . . Madurai koṇ[ḍu] Pâṇ[ḍiya]n muḍitta[l]ai[y]uṅ=goṇḍ -aru![ina] śr[î] -Kulôttu[ṅ]ga -Śôḷadêvaṟku yâṇḍu padinâḷâ-[va]du Ka[ṟ]-

2 kaḍaga -nâyaṟṟu apara -pakshattu śa[turttaśiyu]m[2] Tiṅgaḷ-kiḻamai peṟ[ṟa] Puṇa-[r]pû[śa]ttu nâḷ.

"In the seventeenth year (*of the reign*) of the glorious Kulôttuṅga-Chôḷadêva, who, having taken Madurai, was pleased also to take the crowned head of the Pâṇḍya,—on the day of Punarvasu, which corresponded to a Monday and to the fourteenth (or fourth) *tithi* of the second fortnight of the month of Ka[ṟ]kaṭaka."

The *tithi* in this date must be the 14th; for the 4th *tithi* of the dark fortnight of Tulâ (and Vṛiśchika) only can be coupled with Punarvasu. The 14th of Karkaṭaka however cannot also be coupled with that *nakshatra*; but the 14th of Mithuna. If we calculate for the 14th of the dark fortnight of Mithuna which corresponded to the 8th July, 1195 A.D., the *nakshatra* is indeed Punarvasu, but we find the week-day to be a Saturday instead of a Monday. Indeed the week-day would be incorrect on any possible assumption.

## F.—RÂJARÂJA III.

### 206.—In the Aiyaṇâr temple at Tiruppaṭṭûr.[3]

1 [Sva]sti śrî [||*] Tiribuva[ṇachchak]karavattigaḷ śrî-Râjarâja-

2 [4]dêvaṟkku yâṇḍu 4 vadu Dhanu-nâyaṟṟu pûrvva-pakshat-

3 tu da[śa]miyum Śevvâ-kkiḻamaiyum peṟṟa Rêvati-tâ(nâ)ḷ.

"In the 4th year (*of the reign*) of the emperor of the three worlds, the glorious Râjarâjadêva,—on the day of Rêvatî, which corresponded to a Tuesday and to the tenth *tithi* of the first fortnight of the month of Dhanus."

This date is also a doubtful one. The *tithi* given in the inscription corresponds to the 18th December 1219 A.D., but it is a Wednesday and is coupled with the *nakshatra* Bharaṇî and Kṛittikâ. The preceding day was a Tuesday, but it was the 9th *tithi* and was coupled with Aśvinî and Bharaṇî. If we assume the month to have been Vṛiśchika instead of Dhanus (for there are instances of such mistakes in these inscriptions, see above, vol. IX, p. 220, note 12, and p. 221, note 4), we find that Tuesday, the 19th November 1219 A.D., was the 11th *tithi* of the bright fortnight of Vṛiśchika, not the tenth *tithi* as stated in the inscription; but this tenth (lunar) *tithi* was coupled with the *nakshatra* Rêvatî, the one ending 13 *ghaṭikâs* before mean sunrise, the other beginning 40 *ghaṭikâs* before it; cf. No. 202.

### 207.—In the Aiyaṇâr temple at Tiruppaṭṭûr.[5]

1 [Svasti śrî ||] Tiri[*]buvaṇachchakkaravattigaḷ śrî-Râjarâjadêvaṟku yâṇḍu 7 âvadu Isha[ba]-nâyaṟṟu apara-pakshattu tri(tṛi)tiyaiyun=Diṅgaṭ-kkiḻamaiyum peṟ[ṟa] Mû[la]tti=ṇâḷ.

[1] No. 416 of the Madras Epigraphical collection for 1908.

[2] It is not impossible that the reading is *sadutiyum*, *i.e.* the fourth *tithi*.

[3] No. 595 of the Madras Epigraphical collection for 1908.

[4] The *ê*-symbol attached to *dê* is at the end of l. 1.

[5] No. 596 of the Madras Epigraphical collection for 1908.

"In the **7th year** (*of the reign*) **of the emperor of the three worlds, the glorious Rājarājadēva,**— on the day of **Mūla,** which corresponded to a **Monday** and to the third *tithi* of the second fortnight of the month of Ṛishabha."

I take the date to correspond to **Monday, the 30th March 1222 A.D.,** though the *nakshatra* of that day was not Mūla, but Uttarāshāḍhā and Śravaṇa. The third *tithi* of the dark fortnight of the month Ṛishabha (Jyaishṭha) ended, according to the Ārya and Sūrya Siddhāntas, 1 *ghaṭikā* 44 *palas*, and 46 *palas*, respectively, after mean sunrise, and something more after true sunrise; while the 4th *tithi* ended on the next day. According to the Brahma-Siddhānta, however, Sunday was the third *tithi* and Monday was an *adhika* or repeated *tithi*. The result is practically the same as was found by the two other Siddhāntas.

**208.—In the Mantrapurīśvara temple at Kōvilūr.**[1]

9 ṟṟa Śōḍi-nāḷ.

"In the year opposite the 7th year (*of the reign*) of the emperor of the three worlds, the glorious Rājarājadēva,— on the day of **Svāti,** which corresponded to a **Monday** and to the third *tithi* of the first fortnight of the month of **Kumbha.**"

The date corresponds almost certainly to **Monday, the 20th February 1223 A.D.** But the original date contains two errors: (1) it was not the 'first' fortnight, because in it the *nakshatra* Svāti is impossible; (2) it was not the 3rd but the 4th *tithi*. For, on calculating the above date, we find that the 20th February corresponded to the 4th *tithi* of the dark fortnight of Kumbha (Phālguna), and that almost the whole day coincided with the *nakshatra* Svāti.

**209.—In the Viḻināthasvāmin temple at Tiruviḻimiḻalai.**[3]

1 Svasti śrī [||*] Tribuvaṇachchakkaravattigaḷ [ś]rī-Irājarājadēvaṟkku yāṇḍu [1]1 [va]ḍu[4] Kumbha-nā[ya]ṟṟu apara-[pa]kshattu ēkādaśiyum Śaṇi-[k]kiḻamaiyum peṟṟa
2 Mūlattu nāḷ.

"In the [1]1th year (*of the reign*) of the emperor of the three worlds, the glorious **Rājarājadēva,**— on the day of **Mūla,** which corresponded to a **Saturday** and to the eleventh *tithi* of the second fortnight of the month of **Kumbha.**"

This date is the same as that in No. 214 below and will be dealt with in that place. It deserves to be remarked that, in this inscription just as in No. 214, the month Kumbha has been erroneously quoted instead of Makara.

[1] No. 215 of the Madras Epigraphical collection for 1908.
[2] The name Rājarāja is denoted by two abbreviations.
[3] No. 400 of the Madras Epigraphical collection for 1908.
[4] The date may also be read as 21.

### 210.—In the Mantrapurīśvara temple at Kōvilūr.[1]

1 [2]Svasti śrī [||*] T[i]r[i]buvaṇachchakkaravatt[i]ga[ḷ śi]-Rāśarāśadēvaṟku yāṇḍu [11][3] [4]Ishava-nāyaṟ[ṟu] pū[r]va-pakkattu saptam[i]yum Nāyaṟṟu-kk[i]ḻamaiyum perṟa Magattu nāḷ.

"(In) the **[11]th year** (*of the reign*) **of the emperor of the three worlds, the glorious Rājarājadēva,** — on the day of **Maghā**, which corresponded to a **Sunday** and to the seventh *tithi* of the first fortnight of the month of **Ṛishabha**."

If we take the year to be the 11th, neither the week-day nor the *nakshatra* comes out right. But if we calculate for the 21st year, both items come out right. The date corresponds to **Sunday, the 3rd May 1237 A.D.** The 7th *tithi* of the bright fortnight of Ṛishabha (Jyaishṭha) ended about 9 *ghaṭikās* after mean sunrise of the 3rd May, and the *nakshatra* Maghā covered nearly that whole day.

### 211.—In the Vīḻināthasvāmin temple at Tiruvīḻimiḻalai.[5]

1 S[va]sti śrī [||*] Tiribuvaṇachcha[k*]karavattigaḷ śrī-Rāja[rājadēvark]ku [y]āṇḍu 11 ā[va]du Dhaṇu-nāyaṟṟu pūrvva-pakshattu daśamiyum T[i]ṅgaṭ-kk[i]ḻamai-yu[m]

2 perṟa Irēvati-[n]āḷ.

"In the **11th year** (*of the reign*) **of the emperor of the three worlds, the glorious Rājarājadēva,**— on the day of **Rēvatī**, which corresponded to a **Monday** and to the tenth *tithi* of the first fortnight of the month of **Dhanus**."

The date as given in the inscription would correspond to Thursday, the 31st December 1226 A.D., which was coupled with Kṛittikā. This result is wrong in all details. If we calculate Monday, the 29th December of the same year, the *nakshatra* comes out right, but it is the 7th *tithi*. Now, assuming that the month Dhanus has erroneously been quoted for Makara, the original date would correspond to **Monday, the 30th November 1226 A.D.** This is apparently the right date. On that day, the tenth *tithi* of the bright fortnight of Makara ended about 37 *ghaṭikās* after mean sunrise, and the *nakshatra* Rēvatī ended about 18 *ghaṭikās* after mean sunrise.

### 212.—In the Mantrapurīśvara temple at Kōvilūr.[6]

1 ॐ Svasti śrī [||*] Tiribuvaṇachchakkara-
2 vatt[i]gaḷ śrī-Irāśarāśadēvaṟkku y[ā]-
3 ṇḍḍu[7] irubadāvadu Magara-nāyaṟṟu pū-
4 rvva-pakkattu saptamiyum Tiṅgaḷ-kki[ḻa]-

"In the **twentieth year** (*of the reign*) **of the emperor of the three worlds, the glorious Rājarājadēva,**— on the day of **Aśvinī**, which corresponded to a **Monday** and to the seventh *tithi* of the first fortnight of the month of **Makara**."

The calculation of the original date yields Wednesday, the 16th January 1236 A.D., which day was coupled with the *nakshatra* Aśvinī; but as the week-day is wrong, we must reject this

---

[1] No. 198 of the Madras Epigraphical collection for 1908.
[2] Two unintelligible symbols are engraved at the beginning of the line before the akshara *sva*.
[3] The figures in brackets may also be read as 21.
[4] Read *Ṛishabha-*.
[5] No. 409 of the Madras Epigraphical collection for 1908.
[6] No. 195 of the same collection for 1908.
[7] Read *yāṇḍu*.
[8] Read *perṟa*.

date. Assuming a mistake in the month, *viz.* Makara for Dhanus, we get Tuesday, the 18th December, which corresponds to the given *tithi* (ending 9 *ghaṭikās* after mean sunrise), but the *nakshatra* was Rēvati (beginning 13 *ghaṭikās* after mean sunrise). If we calculate for the following year, the 21st instead of the 20th, the date comes out right in all details. It corresponds to **Monday, the 5th January 1237 A.D.** On that day, the 7th *tithi* of the month Makara ended 14 *ghaṭikās* after, and the *nakshatra* Aśvini began 13 *ghaṭikās* before mean sunrise. This is probably the equivalent of the date, though it is rather surprising that the number of the regnal year should have been erroneously quoted.

### 213.—In the Viḷināthasvāmin temple at Tiruviḷimiḷalai.[1]

1 Svasti śrī:— T[i]rubu[va]ṇachchā(cha)kravartti[ga]ḷ śrī-R̤[ā]jarājadēva[r]ku [y]āṇḍu 20 iru[bad]ā[va]du Ṛishabha-[n]āya[r]ṟu pūr[vva]-pakshattu daśa[m]i[y]um [V]e[ḷḷi][2]-kkiḻamai[yum] p]e[r]ṟa Utt[ira]ttu [nāḷ].

"In the 20th— twentieth— year (*of the reign*) of the emperor of the three worlds, the glorious Rājarājadēva,— on the day of Uttara-Phalguṇī, which corresponded to a [Friday] and to the tenth *tithi* of the first fortnight of the month of Ṛishabha."

The date probably corresponds to **Friday, the 16th May 1236 A.D.** On that day, the 9th *tithi* of the bright fortnight of the month Ṛishabha (Jyaishṭha) ended 12 *ghaṭikās*, and the *nakshatra* Uttara-Phalguni 14 *ghaṭikās* after mean sunrise at Laṅkā. It appears therefore that, in the original date, the tenth *tithi* has been erroneously quoted instead of the ninth. Calculating Mēsha instead of Ṛishabha, we find that the 10th *tithi* of the bright fortnight ended on Thursday, the 17th April 1236 A.D., 40 *ghaṭikās* after mean sunrise, and the *nakshatra* Uttara-Phalguni began only 50 *ghaṭikās* after mean sunrise. If this date be the right equivalent, we have to assume that the month as well as the week-day are erroneously quoted in the original.

### 214.—In the Viḷināthasvāmin temple at Tiruviḷimiḷalai.[3]

1 Svast[i] śr[i] [||*] Tir[i]buvaṇachaka[va]ttigaḷ[4] śrī-Irājaïrājadēva[r]ku[5] yāṇḍu 21 vadu Kum[ba]-n[ā]ya[r]ṟu apara-pakshattu ēk[ā]daśamiyum[6] Śaṇ[i]-kkiḻam[aiyu]m pe[r]ṟa Mūlattu

2 nāḷ.

"In the 21st year (*of the reign*) of the emperor of the three worlds, the glorious Rājarājadēva,— on the day of Mūla, which corresponded to a Saturday and to the [eleventh] *tithi* of the second fortnight of the month of Kumbha."

The date corresponds to **Saturday, the 24th January 1237 A.D.** But the month Kumbha has erroneously been quoted instead of Makara. For, it is impossible that in Kumbha (Phālguna) the 11th *tithi* of the dark fortnight should coincide with Mūla; and besides, in that year Phālguna-ādi 11 was a Monday (or possibly a Sunday, for the end of the *tithi* fell very near sunrise), but certainly not a Saturday. But on the day stated above, the 11th *tithi* of the dark fortnight of Makara ended about 18 *ghaṭikās* after mean sunrise, and the *nakshatra* Mūla ended about 27 *ghaṭikās* after it.

---

[4] Read °*chakravarti*°. [5] Read -*Rājarāja*°.

[6] The syllable *mi* is written below the line. The *tithi* intended may have been either *ēkādaśi* or *daśami*. But No. 209 above, which is identically the same date, gives *ēkādaśi*.

**215.—In the Mantrapurīśvara temple at Kōvilūr.**[1]

1 [S]vásti śrī [||*] Tr[i]bhuvanachchakrava[tti]gaḷ śrī-[R]ājarā[ja]-
2 d[ē]varkk[u] yāṇḍu [2]6 āvadin=edirā[m=ā-
3 ṇḍu Kaṇṇi-nā]ya[ṟ]ṟu=[p]pūrvva-[pakshattu ashṭa]²mi-
4 [y]um Tiṅgaḷ-kiḻamaiyum [p]eṟṟa Aniḻattu nāḷ.

"In the year opposite the [2]6th year (*of the reign*) of the emperor of the three worlds, the glorious Rājarājadēva,— on the day of Anurādhā, which corresponded to a Monday and to the eighth *tithi* (or the fifth *tithi*) of the first fortnight of the month of [Kanyā]."

The date as given in the inscription admits of four cases: (1) 16th year, 5th *tithi*; the equivalent is Tuesday, the 2nd September 1231 A.D.; the *nakshatra* Anurādhā began 34 *ghaṭikās* after mean sunrise; (2) 26th year, 5th *tithi*: Wednesday, the 11th September 1241 A.D.; Anurādhā ended 47 *ghaṭikās* after mean sunrise. Assuming the eighth *tithi* to be given, the week-days will be (3) Friday and (4) Saturday for the 16th and 26th year respectively, and the *nakshatra* will also be wrong. If we compute the same four cases for Simha instead of Kanyā, we get a Monday only for case 1, *viz.* Monday, the 4th August 1231 A.D., but the *nakshatra* is Chitrā and Svāti. If we compute for Tulā instead of Kanyā, case No. 4 gives a Monday, *viz.* 14th October 1241; but then the *nakshatra* would be Śravaṇa and Śravishṭhā. Therefore the date of this inscription seems not to admit of verification.

**216.—On some detached stones in a grove at Tirukkāravāśal.**[3]

1 Svasti śrī [||*] Tiribuvaṇachchak[karava]tt[i]gaḷ śr[ī]-[4]Rājarājadēvaṟkku y[ā]ṇḍu 28 āvadu Kaṟkkaḍaga-nāyaṟṟu pūrvva-pakshat[t]n śatuṟtteś[i]yum Budaṉ-k[i]ḻamaiyum peṟ[ṟa*] Utt[i]rattu nā[ḷ].

"In the 28th year (*of the reign*) of the emperor of the three worlds, the glorious Rājarājadēva,— on the day of Uttara-Phalgunī, which corresponded to a Wednesday and to the fourteenth *tithi* of the first fortnight of the month of Karkaṭaka."

The original date erroneously quotes the 14th *tithi* instead of the 4th; for, Śrāvaṇa (=Karkaṭaka) sudi 14 cannot coincide with Uttara-Phalgunī, but sudi 4 may coincide with it. The corrected date corresponds to **Wednesday, the 22nd July 1243 A.D.** On that day the 4th *tithi* of the bright fortnight of the month Karkaṭaka ended 36 *ghaṭikās* after mean sunrise, and the *nakshatra* Uttara-Phalgunī ended 24 *ghaṭikās* after mean sunrise.

**217.—In the Mantrapurīśvara temple at Kōvilūr.**[5]

1 ॐ Svasti śrī [||*] T[i]r[i]buvaṇachchakkaravattigaḷ śi[Rāśarāśadēvaṟ[k]ku yāṇḍu 31 āvadu Mēsha-nāyaṟṟu . . . . . [6][pa]ñjami[y]um Tiṅgaḷ-kiḻamaiyum [p]eṟṟa [A]ṉiḻattu nāḷ.

"In the 31st year (*of the reign*) of the emperor of the three worlds, the glorious Rājarājadēva,— on the day of Anurādhā, which corresponded to a Monday and to the fifth *tithi* . . . . . of the month of Mēsha."

The 5th *tithi* of both fortnights in Mēsha did not fall, in the year of the inscription (1247 A.D.), on a Monday; and the *nakshatra* Anurādhā cannot be coupled with the 5th *tithi* of

[1] No 182 of the Madras Epigraphical collection for 1908.
[2] The reading may also be *pañjamiyum*.
[3] No 454 of the Madras Epigraphical collection for 1908.
[4] The word *Rājarāja* is expressed by two abbreviations.
[5] No. 199 of the Madras Epigraphical collection for 1908.
[6] In the original it cannot be made out whether *apara-* or *pūrva-paksha* was engraved.

either fortnight in Mēsha. The *tithi* is therefore wrong. Now, calculating for the week-day and the *nakshatra* given in the inscription, I find that on Monday, the 22nd April 1247 A.D., the *nakshatra* Anurādhā commenced 4 *ghaṭikās* after mean sunrise. The first *tithi* of the dark fortnight ended 34 *ghaṭikās* after mean sunrise. If this day is the one intended in the inscription, the word 'pañjamiyum' is a mistake for 'pradamaiyum.'

## G.—RĀJĒNDRA-CHŌḶA III.

### 218.—In the Mantrapurīśvara temple at Kōvilūr.[1]

1 ||— Svasti śrī [||*] Tiribuvaṇachchakkaravatt[i]ga[ḷ] śrī]-Irāśēndi[ra]-Śōḷadēvaṟkku yāṇḍu pa[t]tā[va]dinn= ed[i]rā[m=ā]ṇḍu Kaṇṇi-nā-

2 yaṟṟu a[pa]ra-pakshattu shashṭhiy[u]m Tiṅgaḷ-k[i]ḻa[m]aiyu[m] peṟṟa Rōśaṇi-nāḷ.

"In the year opposite the [tenth] year (*of the reign*) of the emperor of the three worlds, the glorious Rājēndra-Chōḷadēva,— on the day of Rōhiṇī, which corresponded to a Monday and to the sixth *tithi* of the second fortnight of the month of Kanyā."

The date corresponds to **Monday, the 11th September 1256 A.D.**; however the month Kanyā has erroneously been quoted instead of Siṁha. On the day in question, the 6th *tithi* of the dark fortnight of the month of Siṁha (being the 15th solar Kanyā) ended 51 *ghaṭikās*, and the *nakshatra* Rōhiṇī 45 *ghaṭikās* after mean sunrise at Laṅkā.

### 219.—In the Mantrapurīśvara temple at Kōvilūr.[2]

1 [S]vast[i] [śrī] [||*] [Tiribuvana]chchakkaravatt[i]gaḷ śr[ī]-Irāśēnd[i]ra-Śōḷadēvarkku yāṇ[ḍu pa]diṉ-ēḻāvadu I-[3]

2 [I]shabha- nāyaṟṟu pūrvva- pa[k]shaśattu[4] tri(tṛi)tiyaiyum Nāyaṟṟa-kkiḻa[m]aiyum[5] peṟṟa Pūśat[tu*] nāḷ.

"In the seventeenth year (*of the reign*) of the emperor of the three worlds, the glorious Rājēndra-Chōḷadēva,— on the day of Pushya, which corresponded to a Sunday and to the third *tithi* of the first fortnight of the month of Ṛishabha."

The date corresponds to **Sunday, the 21st May 1262 A.D.**, if we assume that the third *tithi* has erroneously been quoted instead of the second. For, on that day, the 2nd *tithi* of the bright fortnight of Ṛishabha (Jyaishṭha) ended about 42 *ghaṭikās* after, and the *nakshatra* Pushya commenced about 40 *ghaṭikās* after mean sunrise at Laṅkā.

### 220.—In the Mantrapurīśvara temple at Kōvilūr.[6]

"In the 17th year (*of the reign*) of the emperor of the three worlds, the glorious Rā[jēndra]- Chōḷadēva,— on the day of Aśvinī, which corresponded to a Friday and to the fourteenth *tithi* of the first fortnight of the month of Tulā."

---

[1] No. 208 of the Madras Epigraphical collection for 1908.

[2] No. 213 of the same collection for 1908.

[3] Cancel the letter *i*.

[4] Read *-pakshattu*.

[5] The *m* of *kiḻamai* is entered below the line.

[6] No. 223 of the Madras Epigraphical collection for 1908.

The date corresponds to **Friday, the 27th October 1262 A.D.** The *nakshatra* Aśvini ended about 36 *ghaṭikās* after sunrise, and the 14th *tithi* of the bright fortnight of Tulā (Kārttika) ended according to the Sūrya-Siddhānta 58 *ghaṭikās*, and according to the Brahma-Siddhānta 52 *ghaṭikās* after true sunrise at Conjeeveram. As the same *tithi* was current at sunrise according to both these Siddhāntas, it was no expunged *tithi*. But it was an expunged *tithi* according to the Ārya-Siddhānta.

### 221.—In the Viḷināthasvāmin temple at Tiruvīḷimiḷalai.[1]

1 Svast[i] śrī [॥*] [Tiribuvanach]chakka[ravat]t[i]gaḷ śr[ī]-[2]Rājēndra -[Śō]ḷadēvar]kku yā[ṇḍu] 1[8]vadu[3] [Kumba]-[4]nāyaṟṟu [pūrvva-pa]kshattu [pa]ñcha[miyu]m Budaṉ-k[i]ḻamai[yum] peṟṟa Utt[i]rāḍa[ttu nāḷ].

"In the 1[8]th year (*of the reign*) of the emperor of the three worlds, the glorious Rājēndra-Chōḷadēva,— on [the day of] Uttarāshāḍhā, which corresponded to a Wednesday and to the fifth *tithi* of the [first] fortnight of the month of [Kumbha]."

In the month Kumbha, the *nakshatra* Uttarāshāḍhā can occur only between the 8th and 11th *tithi* of the dark fortnight, in the month Tulā between the 5th and 8th *tithi* of the bright fortnight. We must therefore read *Tulā* in the inscription. The details of the date would be right if we assume that the fifth *tithi* has erroneously been quoted instead of the sixth. For, on **Wednesday, the 10th October 1263,** the 6th *tithi* of the bright fortnight of Tulā ended about 10 *ghaṭikās*, and the *nakshatra* Uttarāshāḍhā about 20 *ghaṭikās* after mean sunrise at Laṅkā.

### 222.—In the Mantrapurīśvara temple at Kōvilūr.[5]

1 [Sva*]st[i] śr[ī] [॥*] [Tribhuvaṇa]chchakkara[vat]tigaḷ [śrī]-R[āj]ēndira-[Ś]ō[ḷa]d[ē]varkku yāṇḍu [22] ā[vadu] Kumba[6]-nāya[ṟṟu] a[para]-pakshattu sha[shṭhi]yum Tiṅ[gaṭ]- k[iḻa]mai

2 p[e]ṟṟa Śōdi-nāḷ.[7]

"In the [22]nd year (*of the reign*) of the emperor of the three worlds, the glorious Rājēndra-Chōḷadēva,— on the day of Svāti, which corresponded to a Monday and to the sixth *tithi* of the [second] fortnight of the month of Kumbha."

I cannot verify this date satisfactorily. The *tithi* or the *nakshatra* must be wrong; for, the sixth *tithi* cannot coincide with the *nakshatra* Svāti. The nearest approach to the given date is in the twentieth year, Monday, the 14th February 1267 A.D., on which day the *nakshatra* Svāti commenced about sunrise; but it was the 4th *tithi* of the dark fortnight of Kumbha, which ended about 18 *ghaṭikās* after mean sunrise.

---

## No. 12.—DATES OF PANDYA KINGS.

By Professor H. Jacobi, Ph.D., Bonn.

V. Venkayya, M.A., Rai Bahadur, has sent me for examination the text and English translation of 17 Pāṇḍya dates, of which I herewith publish 15. In some cases my results

---

[1] No. 412 of the Madras Epigraphical collection for 1908.

[2] The syllable *rā* is denoted by an abbreviation.

[3] The word *vadu* is expressed by a flourish added to the figure 8.

[4] Between the letters *ba* and *nā* there is a symbol which may represent either *n* or the *ā*-sign. The name of the month is not quite clear. It may also be read [Tulā].

[5] No. 216 of the Madras Epigraphical collection for 1908.

[6] There is some unaccountable space between the aksharas *ku* and *m* of Kumba.

[7] The length of *nā* is inserted below the line.

are not satisfactory; still I thought it advisable to state what they are since they may be useful either for further consideration of historical questions involved by the inscriptions or for deciding the uselessness of the dates as being altogether wrong.

Nos. 90-94 enable us to fix the commencement of Jaṭāvarman Vīra-Pāṇḍya's reign, which has approximately been placed in 1310 A.D. by Mr. Krishna Sastri (*Annual Report* on Epigraphy for 1908-09, Part II, § 27). Four of these inscriptions quote, besides the details usually given in them, the corresponding solar day; thereby, as stated by Prof. Kielhorn (above, Vol. VI. p. 301), we can find the precise equivalent, though the year is not stated in any era, the regnal year only being given. For, as a given solar day may be coupled with any of the thirty *tithis* and of the seven week-days, a given combination of these three items will, on the average, occur only once in $7 \times 30 = 210$ years, and the chance will be still rarer if the *nakshatra* is mentioned, as is usually the case. In No. 89 the *tithi* is not given, but the combination of the remaining three items is such as will recur only once in about 150 years.

In order to solve the problems to which such dates give occasion, I have developed my tables (above, Vol. I) in detail for several centuries, and with their help the task became an easy one. These developed Tables will be published in book form in the Encyclopædia for Indo-Aryan Research. I shall there explain the method of solving the problem in question.

I now proceed to discuss the results of my examination of the dates in Nos. 90-94. They may be summarised as follows:—

**Jaṭāvarman Vīra-Pāṇḍya** (*September 29, December 1, A.D. 1295*).

No. 90. 6th year: 28th September 1302.
No. 91. 22nd year: 3rd May 1318.
No. 92. 44th year: 2nd December 1339.
No. 93. 43 (Cor. 46)th year: 2nd August 1339.
No. 94. 46th year: 16th June 1342.

Nos. 90-92 show that the king must have commenced to reign between the 29th September and the 1st December 1295. With this date for the commencement of the reign No. 94 agrees if we read the regnal year as 46, as we may, since the second figure of 4[9] put in brackets in the transcript, may also be read 6 as stated in the note. In No. 93, the regnal year cannot be 46, since No. 92 is dated in the same year of our era. The date, 2nd August, shows that the 46th year has wrongly been given instead of the 43rd.

According to No. 89 Tribhuvanachakravartin Kulaśēkhara seems to have begun reigning in 1379-80 A.D. I should, however, not place too much reliance on this result, before it has been corroborated by more inscriptions of the same king. For, if in our inscription the wrong *nakshatra* had been quoted, as is rather frequently the case in these records, the calculated equivalent would of course be also intrinsically wrong.

No. 84 fixes the beginning of the reign of a **Tribhuvanachakravartin Sundara-Pāṇḍya** in A.D. 1237-38.

## MĀṞAVARMAN SUNDARA-PĀṆḌYA I. (A.D. 1216-35).

**81.—In the Tiruttaḷīśvara temple at Tirupputtūr.**[1]

1 ... Svast[i] śrī [||*] ..... śrī-kō-Māṟupa[ṉ]mar-āṉa Tiribu[va]-ṉachchakkravattigaḷ Śōṇāḍu vaḷaṅgiy-aruḷiya śrī-Sundara-Pāṇḍi-

2 yadēvaṟku yāṇḍu 20 vadun(diṉ) edirām-āṇḍu [Ka]ṉṉi-nāyaṟṟu apara-[pakshat]t[u] Viyā[ḻa]-kkiḻamaiyu[m*] shashṭhiyum perṟa Pūśattu ṉāḷ.

[1] No. 129 of the Madras Epigraphical collection for 1908.

"In the year opposite the 20th year (*of the reign*) of the glorious king Māṟavarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva, who was pleased to distribute the Chōḷa country,— on the day of Pushya, which corresponded to the sixth *tithi* and a Thursday of the second fortnight of the month of Kanyā."

The date seems to correspond to Thursday, the 18th September 1236 A.D. That day was Āśvina badi 2 as required, the second *tithi* ending about 36 *ghaṭikās* after mean sunrise at Laṅkā. But the day was coupled with the *nakshatras* Aśvinī and Bharaṇī, and not, as quoted in the inscription, with Pushya. It is impossible, on any supposition, that Āśvina badi 2 should be coupled with Pushya; the *nakshatra* will always be one between Aśvinī and Mṛigaśiras, and never beyond the latter.

## JAṬĀVARMAN SUNDARA-PĀṆḌYA I. (?)

### (A.D. 1251 to 1261).

### 82.—In the Viḻināthasvāmin temple at Tiruviḻimiḻalai.[1]

1 Kōṟ=Chaḍapaṇe(ṇ)mar [2]Tiniṟibuvuṇaṅh[cha]ttaravattigaḷ [3]Śundara-Pāṇḍiyadēvarkku [4]ḍuṇḍu 2 [vadu] iraṇ[ḍ]āvadu Danu-nāyaṟṟu apara-paśakshat[tu[5] cha]tu[r*]daśi-yum Nāyaṟṟ[u-kkiḻa]mmai[6]-

2 yum perṟa Āyiliyattu na(nā)ḷ.

"In the 2nd—second—year (*of the reign*) of king Jaṭāvarman (*alias*) the emperor of the three worlds, Sundara-Pāṇḍyadēva,—on the day of Āślēshā, which corresponded to a Sunday and to the fourteenth *tithi* of the second fortnight of the month of Dhanus."

In this date, the wrong fortnight is cited; for, in the month of Dhanus or Pausha, Āśleshā cannot be coupled with *badi* 14, but only with *sudi* 14. However, the week-day does not come out right in either fortnight, if we assume the king to have been Jaṭāvarman Sundara-Pāṇḍya II. For, in K.Y. 4378 (=1276 ff. A.D.) Pausha was expunged, and both *sudi* 14 and *badi* 14 falling in the solar month of Pausha were not Sundays. The same holds good with Pausha sudi 14 and badi 14 of the preceding year. Assuming the king to have been the first of this name, the week-day comes out right for K.Y. 4354 Pausha sudi 14 corresponding to Sunday, the 4th January 1254. But the *nakshatras* coupled with that day were Punarvasu and Pushya; on the next day occurred Āślēshā.

## JAṬĀVARMAN SUNDARA-PĀṆḌYA.

### 83.—In the Viḻināthasvāmin temple at Tiruviḻimiḻalai.[7]

1 Svast[i] śr[ī] [||*] Kō=Chchaḍapaṇmar Tr[i]bhuvaṇachchakravatt[igaḷ śrī]-Su[ndara-Pāṇ]ḍya-dēva[rkku yāṇḍu] eṭṭāva[ḍ]u Dhanu-nāyaṟṟu pūrvva-pakshattu ashṭami[yu]m Veḻḻi-[k]k[i]ḻamaiyum perṟa Rē-

2 vati-nāḷ.

"In the eighth year (*of the reign*) of king Jaṭāvarman (*alias*) the emperor of the three worlds, the glorious [Sundara-Pāṇḍyadēva],— on the day of Rēvatī, which corresponded to a Friday and to the eighth *tithi* of the bright fortnight of the month of Dhanus."

[1] No. 395 of the Madras Epigraphical collection for 1908.
[2] Read *Tribhuvanachakravarttigaḷ*.
[3] A symbol resembling the figure 4 is engraved before *śu*. Perhaps it stands for *śrī*.
[4] Read *yāṇḍu*. [5] Read *pakshattu*. [6] Read °*kkiḻamai*°.
[7] No. 411 of the Madras Epigraphical collection for 1908.

I have calculated the date for both Jaṭāvarman Sundara Pāṇḍya I. and II.; in both cases, the result is not satisfactory. I give them here. In 1258 A.D. Pausha was an expunged month; if we assume that *sudi* 8, falling in solar Pausha, was intended, we find that it ended 4 *ghaṭikās* after mean sunrise at Laṅkā on Thursday, the 5th December, and the *nakshatra* Rēvatī began only 15 *ghaṭikās* after sunrise. Therefore, the date would be right, if the eighth *tithi* had been wrongly quoted instead of the ninth.— Now assuming the king to be the second of his name, the date would fall in 1292 A.D. The calculation proves that on Friday, the 19th December 1292 A.D., the 9th *tithi* ended a few *ghaṭikās* before the end of the day according to all Siddhāntas, and the 8th *tithi* ended on Thursday. But as the *nakshatra* Rēvati ended about 5 *ghaṭikās* before sunrise of Friday, it could not have been coupled with that day.

## TRIBHUVANACHAKRAVARTIN SUNDARA-PĀṆḌYA (A.D. 1237-38 to ?).

### 84.—In the Tiruttaḷīśvara temple at Tirupputtūr.[1]

1 ||| 6. Svasti śrī [||*] . . . . . Tribhuva[ṇa]chchakravattigaḷ śrī-Sundara-Pāṇḍiyadēvaṟku yāṇḍu 2 ṇḍāvad[u] Dhanu-nāyaṟṟu 11 ndi[ya]d[i]-yum pūrvva-pakshattu daśamiyum

2 Budhan-kiḻamai[yu]m [p]eṟṟa Aśvati-nāḷ.

"In the 2nd year (*of the reign*) of the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,— on the day of Aśvinī, which corresponded to a Wednesday, to the tenth *tithi* of the first fortnight and to the 11th solar day of the month of Dhanus."

Between 1200 and 1500 A. D. there is but one day which fulfils all requirements of the date of our inscription, *viz.* 4340 Kaliyuga, Pausha sudi 10, which corresponds to Wednesday, the 7th December 1239 A.D. On that day, at mean sunrise at Laṅkā, the 10th *tithi* of the first fortnight of the month Dhanus (Pausha) was running, and ended about 42 *ghaṭikās* afterwards, and the *nakshatra* Aśvinī had begun 7 *ghaṭikās* before mean sunrise at Laṅkā and ended about 49 *ghaṭikās* after it. Accordingly, this king began to reign in 1237-38 A.D.

## JAṬĀVARMAN SUNDARA-PĀṆḌYA II. (?)

### (A.D. 1275-76 to 1290).

### 85.—In the Viḻināthasvāmin temple at Tiruviḻimiḻalai.[2]

1 Svasti [śrī ||][3] K[ō]ṟ-Chaḍai[paṇ]mar T[i]ru[b]uvaṇachchakka[rava]tt[i]gaḷ śr[ī-Śu]ṇḍara-P[āṇḍi]yadē[va]ṟku yāṇ[ḍu 9]vadu Tulā-nāyaṟ[ṟ]u [apara]-pakshattu saptamiyum [N]āyaṟṟu-kkiḻa-

2 maiyum peṟ[ṟa P]ūśattu nāḷ.

"In the [9]th year (*of the reign*) of king Jaṭāvarman (*alias*) the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,— on the day of Pushya, which corresponded to a Sunday and to the seventh *tithi* of the second fortnight of the month of Tulā."

The week-day does not come out right for the 9th year of either Jaṭāvarman Sundara-Pāṇḍya I. or II. I have calculated the years 1259, 60, 61 and 1283, 84, 85 A.D.

[1] No. 130 of the Madras Epigraphical collection for 1908.

[2] No. 414 of the same collection for 1908.

[3] The punctuation after *śrī* is not distinct; the existing traces seem to point to the reading *Ōm*.

## JAṬĀVARMAN SUNDARA-PĀṆḌYA II.

### (A.D. 1275-76 to 1290).

### 86.—In the Mantrapurīśvara temple at Kōvilūr.[1]

1 Svasti [śrī][2] [||*] Kō=Ch[cha]ḍapaṇmar=āṇa Tiribu[va]ṇachchakkarava-
2 ttiga[ḷ] Su]ṇ[dara]-Pāṇḍiyadēvaṟkku yāṇḍu 14 vadu Siṁ-
3 ha-nāyaṟṟu pūrvva-pakshattu trit[ra]gaiyum[3] Budaṇ-kiḻamaiyum
4 peṟṟa Attattu nāḷ.

"In the 14th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, Sundara-Pāṇḍyadēva,— on the day of **Hasta**, which corresponded to a **Wednesday** and to the third *tithi* of the first fortnight of the month of **Siṁha**."

The date of this inscription is K.Y. 4391, Bhādrapada sudi 3 = Wednesday, **the 9th August 1290 A.D.** For, on that day the 3rd *tithi* of the first fortnight of Bhādrapada (Siṁha) ended about 46 *ghaṭikās* after mean sunrise at Laṅkā and the *nakshatra* Hasta began about 9 *ghaṭikās* after mean sunrise.

## KŌṆĒRIMĒLKOṆḌĀṆ JAṬĀVARMAN SUNDARA-PĀṆḌYA.

### 87.—In the Nīlakaṇṭhēśvara temple at Veḍāl.[4]

1 [Sva*]sti śrī [||*] Kōṇērimēlkoṇḍāṇ kōṟ=Chaḍapaṇmar Tirubuvaṇachchakkaravattigaḷ śrī-Śundara-Pāṇḍiyadēvaṟku yāṇḍu padi[ṉ-mū]ṉṟāvadiṉ=edir mu(mū)ṉṟāvadu Kaṟkaḍaga-nāyaṟṟu pūrvva-pakshattu saptam[iy]um Budaṇ-kiḻamaiyum peṟṟa Attattu nāḷ.

"In the third (year) opposite the thirteenth year (*of the reign*) of **Kōṇērimēlkoṇḍāṇ** king Jaṭāvarman (*alias*) the emperor of the three worlds, the glorious **Sundara-Pāṇḍyadēva**,— on the day of **Hasta**, which corresponded to a **Wednesday** and to the seventh *tithi* of the first fortnight of the month of **Karkaṭaka**."

[Professor Jacobi has not recorded the results of his calculation of this date.—Ed.]

## MĀṆAVARMAN KULAŚĒKHARA I. (A.D. 1268-1308).

### 88.—In the Sundararāja-Perumāḷ temple at Poṇ-Amarāvati.[5]

1 ☙ [Śrī] Svatt[i](sti) . . . . . kō-Māṟu[pa]-[ṉma*]r=āṇa(āṇa) Ti[ri*]buvaṇachchakkaravatt[i]gaḷ=emmaṇḍalamuṁ=goṇḍ-aruḷiya Kulaśēga-

2 radēvaṟku yāṇḍu 18 vadu Siṁha-nāyaṟṟu [pū]rvva-pakshattu pañchamiyum Tiṅgaḷ[6]-kiḻamaiy[u]m peṟṟa Utt[i]rāḍattu nāḷ.

"In the 18th year (*of the reign*) of king **Māṟa[varman]** *alias* the emperor of the three worlds, Kulaśēkharadēva, who was pleased to take every country,—on the day of **Uttarāshāḍhā**, which corresponded to a **Monday** and to the fifth *tithi* of the first fortnight of the month of **Siṁha**."

The date of the inscription seems to correspond to Monday, the 6th August 1295 A.D., on which day the 5th *tithi* of the month of Siṁha (Bhādrapada) ended, about 52 *ghaṭikās*

[1] No. 214 of the Madras Epigraphical collection for 1908.
[2] The punctuation after the syllable *śrī* is indistinct.

y]āṇḍu 4 vadin=edi[rā]m=ā[ṇḍu Kaṟ]kaḍaga-[nā]yaṟṟ=irubattēḷān=tiyadi Śaṇi-k-

2 [k]i[ḻam]aiyum peṟṟa Rōśaṇi-nāḷ.

"In the year opposite the 4th year (*of the reign*) of the emperor of the three worlds, the glorious Kulaśēkharadēva,— on the day of Rōhiṇī, which corresponded to a Saturday (and) to the twenty-seventh solar day of the month of Karkaṭaka."

The only day between 1200 and 1500, which I found to correspond to the date of the inscription, would be Saturday, the 25th July 1383 A.D.; it was the 27th solar Karkaṭaka, (Śrāvaṇa *badi* 10) and the *nakshatra* was Rōhiṇī. This king therefore would appear to have commenced reigning 1379-80 A.D.

In the years 1262 A.D., 23rd July, and 1475, 25th July, the 27th solar Karkaṭaka fell on a Saturday and the *nakshatra* was the next after Rōhiṇī, *viz.* Mṛigaśiras; we need therefore take no account of these years.

[The alphabet in which the inscription is engraved shows that it must be older than A.D. 1200.—Ed.]

## JAṬĀVARMAN TRIBHUVANACHAKRAVARTIN VĪRA-PĀṆḌYA (A.D. 1295-1342 ?).

### 90.—In the Viḻināthasvāmin temple at Tiruvīḻimiḻalai.[2]

Mūlattu nāḷ.

"In the 6th—sixth—year (*of the reign*) of king Jaṭāvarman (*alias*) the emperor of the three worlds, the glorious Vīra-Pāṇḍyadēva,— on the day of Mūla, which corresponded to a Friday and to the sixth *tithi* of the first fortnight of the month of Kanyā."

The date of this inscription corresponds to Friday, the 28th September 1302 A.D. On that day, the 6th *tithi* of the first fortnight of Āśvina (Kanyā) 4403 Kaliyuga ended 6 *ghaṭikās* after mean sunrise at Laṅkā and the *nakshatra* Mūla was running till about 15 *ghaṭikās* after mean sunrise.

### 91.—In the Tiruttaḷīśvara temple at Tirupputtūr.[5]

[1] No. 101 of the Madras Epigraphical collection for 1906.
[2] No. 401 of the same collection.
[3] In the syllable *kō*, the *ō* of the *ō*-sign is corrected from *ṟṟi*.
[4] *Vadu* is expressed by a flourish added to the figure 6.
[5] No. 128 of the Madras Epigraphical collection for 1906.
[6] *Vadu* is also expressed by a symbol.
[7] The word *tithi* is expressed by a symbol.

"In the 22nd year (*of the reign*) of the glorious king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Vīra-Pāṇḍyadēva,— on the day of Rōhiṇī, which corresponded to the second *tithi* of the first fortnight and to the [4]th solar day of the month of Ṛishabha."

I take this date to correspond to Sunday, the 3rd May 1318 A.D. This day was actually the 8th solar Ṛishabha (Jyaishṭha), not the 4th as found in the transcript of the inscription; the 2nd *tithi* of the first fortnight of Jyaishṭha (Ṛishabha) ended about 13 *ghaṭikās* after mean sunrise at Laṅkā, but the *nakshatra* Rōhiṇī had ended about 26 *ghaṭikās* before sunrise. It would therefore appear that the *nakshatra* quoted was that current at the beginning of the *tithi*, though it had ended before the day which is called after that *tithi*.

### 92.—In the Tiruttaḷīśvara temple at Tirupputtūr.[1]

1 Svast[i] śrī [||*] Kō=Chchaḍaivaṉ[mar-āṇa] Tr[i]bhuvaṇachchakravatt[i]gaḷ śrī Vīra-Pāṇḍiyadēvaṟku yāṇḍu 44 vadu Dhanu-nāyaṟṟu

2 5 tēdiy[uṁ][3] pūrvva-pakshattu prathamaiyum Bṛihaspati-vāramum peṟṟa Mūlattu nāḷ.

"In the 44th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Vīra-Pāṇḍyadēva,— on the day of Mūla, which corresponded to a Thursday, to the first *tithi* of the first fortnight and to the 5th solar day of the month of Dhanus."

This date corresponds to Thursday, the 2nd December 1339 A.D., on which day the first *tithi* of the first fortnight of Pausha (Dhanus) ended 32 *ghaṭikās* after mean sunrise at Laṅkā, and the *nakshatra* Mūla was current at sunrise and ended about 41 *ghaṭikās* after it.

### 93.—In the Tiruttaḷīśvara temple at Tirupputtūr.[5]

1 Svasti ś[r]ī [||*] Kō=Chchaḍaipaṉmar=āṇa Tr[i]bhuvaṇachchakravattigaḷ śrī-Vīra-Pāṇḍiyadēvaṟku yāṇḍu 46 vadu Kaṟkaḍaga-nāyaṟṟu 1[4 tēdi][4]

2 pūrvva-pakshattu [pa]ñjamiyum Sōmavāramum peṟṟa Uttirattu nāḷ.

"In the 46th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Vīra-Pāṇḍyadēva,— on the day of Uttara-Phalgunī, which corresponded to a Monday and to the fifth *tithi* of the first fortnight (and) to the 14th solar day of the month of Karkaṭaka."

This date apparently corresponds to Monday, the 2nd August 1339 A.D. On that day, the fifth *tithi* of the first fortnight of Śrāvaṇa (Karkaṭaka) ended about 15 *ghaṭikās* after mean sunrise at Laṅkā, and the *nakshatra* Uttara-Phalguni was current at sunrise, and ended about 6 *ghaṭikās* after it. However, the calculated date was actually the 15th solar Karkaṭaka, and not the 14th as stated in the inscription.

### 94.—In the Tiruttaḷīśvara temple at Tirupputtūr.[6]

[1] No. 122 of the Madras Epigraphical collection for 1908.
[2] The word *tēdi* is expressed by a symbol.
[3] No. 119 of the Madras Epigraphical collection for 1908.
[4] The word *tēdi* is expressed by a symbol.
[5] No. 120 of the Madras Epigraphical collection for 1908.
[6] The figure in brackets may also be read 6.
[7] *Tēdi* is denoted by a symbol; *tēdim* stands for *tēdiyum*.

"In the 4[0]th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Vīra-Pāṇḍyadēva,— on the day of Anurādhā, which corresponded to a Sunday, to the twelfth *tithi* of the first fortnight and to the 21st solar day of the month of Mithuna."

The date corresponds to Sunday, the 16th June 1342 A.D. On that day, at mean sunrise at Laṅkā, the 12th *tithi* of the first fortnight of Āshāḍha (Mithuna) and the *nakshatra* Anurādhā were current, the former ending about 24 *ghaṭikās*, and the latter 45 *ghaṭikās* after mean sunrise at Laṅkā. And the day actually was the 21st solar Mithuna.

## JAṬĀVARMAN VIKRAMA-PĀṆḌYA.

### 95.—In the Tiruttaḷīśvara temple at Tirupputtūr.[1]

1 ||| ๑ Svasti śr[ī] [||*] Kō-Chchaḍaipaṉmar=āṉa Tr[i]bhuvaṇachchakravatt[i]gaḷ
śrī-Vikrama-Pāṇḍiyadēvaṟku yāṇḍu 8[vadi]ṉ[2] edir 14 āvadu
2 Śak-ābdam 1344ṉ mēl śellāniṉṟa Śubhakiṛi[3]-varusham Dhanu-ravi 19 tēdi[4]
pūrvva-pakshattu tritigaiyum Buda-vāramum peṟṟa Tiruvōṇattu
3 nāḷ.

"In the 14th (year) opposite the 8th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Vikrama-Pāṇḍyadēva,— in the (cyclic) year Śubhakṛit, which was current after the (expiry of the) Śaka year 1344,— on the day of Śravaṇa, which corresponded to a Wednesday and to the third *tithi* of the first fortnight (and) the 19th solar day (when) the Sun (was in) Dhanus."

This date apparently corresponds to Wednesday, 16th December 1422 A.D., the corresponding Jovian year of southern reckoning being Śubhakṛit. But the third *tithi* has wrongly been quoted for the second. For, on the calculated day which was the 19th solar Dhanus, the 2nd *tithi* of the first fortnight of Pausha (Dhanus) was current at sunrise at Laṅkā and so was the *nakshatra* Śravaṇa. The third *tithi* began about 5 *ghaṭikās* after mean sunrise at Laṅkā, and the *nakshatra* Śravaṇa ended about 52 *ghaṭikās* after sunrise. It would therefore appear that the current *tithi* has been quoted instead of the one which ended on that day.

---

## No. 13.—GOHARWA PLATES OF KARNADEVA.

By Professor E. Hultzsch, Ph.D.; Halle (Saale).

These plates were found, whilst ploughing, in a field in an old fort at Goharwa, a village in the Manjhanpur tahsīl of the Allahabad District. The finder was a Kewat. He states that his plough turned up the plates and broke the ring which fastened them together. The find was rescued from him by one Ramnath, a zamindar of Mawai Kalan, and produced first before the Collector, and then, by the Collector's directions, before Mr. E. A. H. Blunt, C.S., Sub-Divisional Officer, Karwi, Banda district, who sent the plates to Rai Bahadur Venkayya. I edit the inscription from two sets of ink-impressions received from Mr. Venkayya.

These are two copper plates, resembling ordinary trays, which fit one into the other and form a compact box, with corresponding ring holes at the bottom of the first and at the top of the second plate. They were originally held together by a ring, in such a way that the

[1] No. 124 of the Madras Epigraphical collection for 1908.
[2] The syllables *vadi* are expressed by a flourish added to the figure 8.
[3] Read *Śubhakṛid*.
[4] The word *tēdi* is expressed by a symbol.

inscription was inside. The box measures nearly 15⅝ inches in length and about 11½ inches in breadth. The second plate, which fits into the box, is a little smaller than the first. The depth of the margin of each plate is about ⅛ inch. When Mr. Venkayya examined the plates, the seal had no ring and was detached from the plates. It is bell-shaped and has an almost circular surface which measures 3 inches in diameter. The upper portion of the seal bears, in relief, a seated figure of the goddess **Lakshmī**,[1] facing the front and attended by two elephants pouring water over her. At the bottom is a bull couchant, facing the proper right, between two indistinct symbols (drums ?). Across the centre is engraved the name of the king who issued the plates :—

श्रीमत्कर्णदेवः ॥

Thanks to the peculiar arrangement by which the inscription was protected from damage the writing is on the whole well preserved. The language of the inscription is **Sanskṛit**, prose (ll. 1, 33-44, 49) and verse (ll. 1-33, 45-49). The metre is irremediably wrong in two places (ll. 9, 20).

The **alphabet** is an early type of Nāgarī. व is nowhere distinguished from ब. य is often written like प, and च like व. The three letters ध, ध्व, and द्ध are very similar in shape. If at the end of a line no spare place was left for the next *akshara*, the engraver has filled up the line by a vertical dash. The end of a section is marked by the symbols ॥ ङ ॥ in three cases (ll. 33, 35, 44).

As regards **orthography**, the vowel *ṛi* is expressed by *ra* in *grahē* (l. 5) and takes the place of the syllable *ri* in *tṛibhuvana* (l. 4). Instead of the vowel *ḷi* a *u* is employed in *kupta* (l. 28). The palatal sibilant occurs instead of dental *s* in *śruta* (l. 26), and *s* for *ś* in eight instances (*bhṛisaṁ* and *āsā*, l. 15 ; *suṇḍā*, l. 23 ; *asvapati*, l. 34 ; *sākhinē* and *sarmmaṇē*, l. 40 ; *sukla*, l. 41 ; *vaṁsē*, l. 48). The *anusvāra* is replaced by *n* in *yaśānsi* (l. 32), *kh* by *sh* in *mayūsha* (l. 3), *ṇ* by *n* in *gṛihnāti* (l. 46), *ph* by *p* in *pūtkāra* (ll. 15, 24), and *y* by *j* in *iyāja* (l. 33). Other vulgar forms are *tāmvra* for *tāmra* (l. 32), *sāmvra* for *sāmra* (l. 39), *sīrmā*[2] for *sīmā* (l. 39), *Kōśamva-pattalāyaṁ* for *Kauśāmba-pattalāyāṁ* (l. 37), and *utkīrṇṇitaṁ* for *utkīrṇṇaṁ* (l. 49).

In the prose portion of the inscription, the rules of *sandhi* are not always observed, and even in the metrical portion, the *sandhi* is neglected in °*chayaiḥ tasmāt* (l. 18). Two cases of wrong *sandhi* are °*vaṁdyō Chēdīndra*° (l. 11) and *chaturāśramēka*° (l. 30). Final *t* is often written in the Hindī way without the *virāma*, and after such a *t* the *sandhi* is neglected in °**वृत्तवेतालो**° (l. 26), °**वशात भैवाच** (l. 30), and **श्रीमतधर्चतीर्थे** (l. 42).

The inscription opens with 30 verses praising the **(Kalachuri) king Karṇadēva** and his ancestors. Three of these verses (1, 12, 18) are found also in the Benares plates of the same king,[3] and the two first in the Rewah plate of Vijayadēva.[4] After an invocation of Brahman (verse 1) and Brāhmī (v. 2), the genealogy starts from the **Moon**, from whom was produced **Budha**, the progenitor of Purūravas (v. 3). Among the kings of the race of the Moon was **Bharata** (v. 4). The panegyrist next mentions the thousand-armed Haihaya emperor (Arjuna) who captured the demon Rāvaṇa (v. 5 f.). The first historical person is **Lakshmaṇarājadēva**, who defeated the kings of Vaṅgāla, Pāṇḍya, Lāṭa, Gurjara, and Kāśmīra (v. 8). His son was the 'moon among the kings of Chēdi,' **Yuvarājadēva** (v. 10), who became a supreme ruler

[1] In Captain Wilford's description of the seal of the Benares plates of Karṇadēva, the goddess is erroneously called **Pārvatī** ; see above, Vol. II. p. 297.

[2] Compare Tamil *śirmai* and *śīrvai* for *sīmā* and *śīvā*.

[3] Above, Vol. II. p. 305 ff., verses 1, 16, 26.

[4] *Ind. Ant.* Vol. XVII. p. 228.

(*Paramēśvara*, v. 12). His son was **Kōkalla** (v. 13), whose son, again, was **Gāṅgēyadēva**, the conqueror of the kings of Kīra, Aṅga, Kuntala, and Utkala (v. 17). His son was **Karṇa** (vv. 19, 30), king of Chēdi (vv. 25, 29). It will be observed that the panegyrical portion of the inscription contains nothing of historical interest besides the bare names of a few Kalachuri kings who are already known to us from other sources.

The prose portion of the inscription (l. 33 ff.) records a grant of land made by "this *Paramabhaṭṭāraka Mahārājādhirāja Paramēśvara*, the devout worshipper of Mahēśvara (Śiva), the lord of **Trikaliṅga**, the glorious **Karṇadēva**, who meditated at the feet of the *P. M. P.*, the glorious **Vāmadēva**,[1] the glorious **Karṇadēva** who has acquired by his own arm the sovereignty of the triad of kings, (*viz.*) of the Aśvapati, the Gajapati, and the Narapati,—being in good health (*and residing*) at the camp of victory pitched at the holy **Karṇa-tīrtha**."

Among the officers to whom the king's order was addressed, the following are specified: *mahādēvī*, *mahārājaputra*, *mahāmantrin*, *mahāsāndhivigrahika*, *mahāmātya*, *mahādharmādhikaraṇika*, *mahāpratīhāra*, *mahākshapaṭalika*, *mahābhāṇḍāgārika*, *mahāsāmanta*, *mahāpramattavāra*, and *mahāśvasādhanika* (ll. 35-37).

The object granted was the village **Chandapahā** in **Kōśamba-pattalā** (l. 37). The donee was "the Brāhmaṇa *Paṇḍita-śrī*-Śāntiśarman, son of *Āvasathika*-Mālhū, grandson of *Upādhyāya*-Sīlū, (*residing at*) **Vidabhī**, of the Kauṇḍinya-*gōtra*, with the three *pravaras* Aṅgirasa, Āmbarīsha, and Yauvanāśva, (*and*) studying the Vājasanēya-*śākhā*" (l. 39 f.).

The date of the grant was "**during the administration** (*vyavaharaṇa*) **renowned by the glorious Karṇa**,[2] **in the seventh year, in the month Kārttika, on the Kārttikī full-moon tithi of the bright fortnight, on Thursday**" (l. 41 f.). These details answer quite regularly to **Thursday, 5th November, A.D. 1047**: see Dr. Fleet's remarks, p. 146 below.

Before making the grant, the king had "bathed in the **Gaṅgā** at the holy **Argha-tīrtha** and worshipped the divine lord Śiva" (l. 42).

Ll. 45-49 contain six of the usual benedictory and imprecatory verses. At the end we are informed that "this (*edict*) was written by *Karaṇika-śrī*-Sarvānanda and engraved by Vidyānanda" (l. 49).

Among the geographical names mentioned in the grant, I cannot localise any besides Kōśamba-pattalā, which is a vulgar form of **Kauśāmba-pattalā**, 'the district of Kauśāmbī.' The same term occurs as Kōsamba-pattalā in a grant of Jayachchandra of Kanauj,[3] and the Karra inscription of Yaśaḥpāla[4] refers to a village in the **Kauśāmba-maṇḍala**, 'the province of Kauśāmbī.' Manjhanpur, the headquarters of the tahsīl in which the Goharwa plates were found, lies west of Allahabad. The same remark applies to Kosam, which used to be identified, without hesitation, with the ancient city of Kauśāmbī. Mr. V. A. Smith has proposed to locate Kauśāmbī further south, near Bharhut;[5] while Major Vost would place it at Gūrgī.[6] But the finding of the present record at Goharwa in the Manjhanpur tahsīl is another item of evidence showing that the country west-north-west of Allahabad between the Gaṅgā and Yamunā rivers must have formed part of the province of Kauśāmbī. Regarding Goharwa Mr. Blunt states that there are several temples, Jaina and others, inside the 'fort' in which the plates were found. I would suggest that this site might be carefully examined by one of the officers of the Archæological Department.

## REMARKS BY DR. FLEET ON THE DATE OF THE RECORD PUBLISHED ABOVE.

The record is dated "in the administration (*vyavaharaṇa*) renowned by the glorious Karṇa," in the seventh year, and on the full-moon *tithi*, coupled with a Thursday, of the month Kārttika. Karṇadēva's predecessor was his father Gāṅgēyadēva, who was reigning, we know, in A.D. 1030,[4] and for whom we have perhaps also a date in A.D. 1037-38.[5] For Karṇadēva as king we have the date Phālguna vadi 9, answering to 18 January, A.D. 1042.[6] On that day he made a grant, having bathed in the river Vēṇi on Phālguna vadi 2 on an occasion which the record mentions as *saṁvatsarē srāddhē* (read *śrāddhē*) of his father Gāṅgēyadēva. The editor emended the text here into *saṁvatsara-śrāddhē*, and interpreted the phrase as meaning "at the annual funeral ceremony" in honour of his father Gāṅgēyadēva. The emendation hardly seems necessary. However, in any case, the text appears to indicate distinctly, not some indefinite anniversary of the death of Gāṅgēyadēva, but the first anniversary of his death; and it is at any rate fully capable of being understood in this sense. Accordingly, Gāṅgēyadēva died on Phālguna vadi 2,=22 January, A.D. 1041.[7] The month Kārttika in A.D. 1041 was, therefore, in the first year of Karṇadēva. The month Kārttika in his seventh year came in A.D. 1047. In this year the given *tithi* was connected quite regularly with a Thursday: it ended at about 11 hours 45 minutes after mean sunrise (for Ujjain), that is, at about 5.45 P.M., on Thursday, 5 November; and, being current at sunrise, it gave its number to that same day. And this date, **Thursday, 5 November, A.D. 1047,** seems clearly to be the date of the record.

The result stated above is in agreement with the points, that this record gives the full titles of paramount sovereignty to Karṇadēva in lines 33-4, and that it does not contain anything to suggest that Gāṅgēyadēva was living when it was drawn up. The following remarks, however, may be added, in case it might be thought that the use of the term *vyavaharaṇa*, 'transaction of business, management, administration,' instead of *rājya* or *vijaya-rājya*, implies that Karṇadēva was reigning as the representative of his father, the latter being still alive. As we have seen, Gāṅgēyadēva was dead by 22 January, A.D. 1041. Before that, the nearest occasions on which the full-moon *tithi* of Kārttika can be connected with a Thursday are as follows:—In A.D. 1026 it began at about 21 hours 5 minutes after mean sunrise on Thursday, 27 October: but the lateness of the time (3 hours 5 minutes after midnight) precludes the possibility that the *tithi* should have been cited with that day. In A.D. 1023 it ended at about 11 hours 35 minutes after mean sunrise, that is, at about 5.35 P.M., on Thursday, 31 October, and consequently, being current at sunrise, gave its number to the day: but this is altogether too early a date for Karṇadēva to have been associated with his father in the administration for already six years; especially in view of the points, that for Karṇadēva's son and successor Yaśaḥkarṇa the earliest known date is in A.D. 1120, and that for Yaśaḥkarṇa's son and successor Gayākarṇa we have dates in A.D. 1151 and 1155-56.

[4] Albērūni tells us this: *India*, trans. Sachau, Vol. I. p. 202.

[5] Kielhorn's List of Northern Inscriptions, above, Vol. V. Appendix, No. 406.

[6] *Ibid.*, No. 407: edited above, Vol. II. p. 305.

[7] Or on 23 December, A.D. 1040, = Māgha vadi 2, if this *tithi* is preferred in consequence of what the editor pointed out in connexion with the weekday being not correct for Phālguna vadi 2 in A.D. 1042, and being correct for Māgha vadi 2, = 12 December, A.D. 1041. But it seems probable that the mistake lies in the weekday (or else in the *tithi*), rather than in the month.

## No. 14.—NARASAPATAM PLATES OF VAJRAHASTA III.; SAKA-SAMVAT 967.

By Professor Sten Konow, Ph.D.; Christiania.

The grant inscribed on these plates was first brought to light by Mr. Appa Rao, and a short note on it appeared on page 111 of Mr. Krishna Sastri's Annual Report on Epigraphy for the year 1908-1909. I now edit it from ink-impressions supplied by Rai Bahadur V. Venkayya, who has kindly sent me the following description of the plates:—

"These are five copper-plates with slightly raised rims, of which the first bears writing only on the inner side. They measure roughly $7\frac{3}{4}''$ in length and fluctuate between $3\frac{1}{4}''$ and $3\frac{1}{3}''$ in breadth. The plates are held together by a circular ring, which measures $4\frac{3}{4}''$ in diameter and is nearly $\frac{1}{2}''$ thick. The edges of the ring are secured in the bottom of an oval seal, which measures roughly $2\frac{1}{2}''$ and $2\frac{1}{4}''$ in its diameters. The seal is surmounted by a high recumbent bull with various emblems around it, which Mr. Appa Rao says represent a conch, an elephant-goad, a *triśūla*, a battle-axe, a crescent, a mace, a rope, and a drum. The plates with seal and ring weigh 295 *tolas*. The plates were received from the **Narasapatam** tāluka of the Vizagapatam district".

The inscription consists of 74 lines and is in a fair state of preservation.

The alphabet is the same kind of **Nāgarī** as in Vajrahasta's Naḍagām plates of Śaka-Saṁvat 979,[1] and in his Madras Museum plates of Śaka 984.[2] The *ñ* in conjuncts such as *ñch* and *ñj* is placed after the consonant. The compound *ñj*, which occurs in l. 69, is not used in any of the other known plates of Vajrahasta. It will be seen that the form of the *j* of this compound is slightly changed. There is almost no difference between *ḍā* (l. 55) and *dā* (l. 51); between *tu* (cf. l. 25) and *tta* (cf. l. 26); between *lu* (cf. l. 23) and *rṇṇ* (cf. l. 22). The *anusvāra* is usually denoted by a circle after the consonant. At the end of line 3 and before the sign of interpunction in l. 52, a *virāma* is added underneath. The sign of the *virāma* is also found in *-nivahān*, l. 17; *samabhunak*, l. 27. It has been omitted in *=avdāna*, l. 21; *-purassarāna- . . . janapadāna*, l. 51; *yāvata*, l. 56; *-ādityāta*, l. 58; *-gaurāvāta*, l. 64 f. In *=avdāna*, l. 21, and *-janapadāna*, l. 51, the bottom of the letter *n* has been somewhat lengthened. There are several superfluous signs of interpunction in the grant itself, ll. 53 ff. The numerical figures 967 occur in l. 73.

In ll. 7 and 50 some syllables and words are written in Telugu letters.

With regard to orthography we may note forms like *-prakshyalita-* instead of *-prakshālita-*, l. 4; *nairityē* instead of *nairṛityē*, l. 67, and the use of *v* instead of *b*; compare *-śavda-*, l. 9 f.; *-lavdha-*, l. 12; *-valāt=*, l. 16; *=avlāna*, l. 21; *=avdakān=*, l. 27; *-luvdha-*, l. 23; *Vaidumv-*, ll. 36, 58; *-āvda-*, ll. 39, 73; *-āvjayōḥ*, l. 48; *-vāhira-*, l. 53. The class nasal and not the *anusvāra* is regularly written before surds. Before *k* and *p* we also find the *anusvāra*; thus, *śaśāṁka-*, l. 7; *=alaṁkarishṇō*, l. 14; but *=Aniyaṁka-*, l. 26; *-paṁka-*, l. 46; *Taṁpavā-*, ll. 52 f., 71; but *=ālimpanti*, l. 46. Before *kh*, *gh* and *chh* there are no instances of the class nasal, but the *anusvāra* is used in all cases; thus, *-śaṁkha-*, l. 9; *-saṁghaṭṭa-*, l. 11; *-saṁghē*, l. 39; *lāṁchana*, *i.e.* *lāñchhana*, l. 10. In all other nasal compounds, the class nasal is used.

The consonants *k*, *ṇ*, *t*, *dh*, *m*, *y*, and *v* are doubled in all the instances where they occur after an *r*; thus, *-ārkka-*, l. 56; *-karṇṇa-*, l. 8; *-kīrttēḥ*, l. 36; *sārddha*, l. 53; *dharmma-*, l. 64; *sūryya-*, l. 40; *sarvva-*, ll. 18, 54. A *g* after *r* sometimes remains single and is sometimes doubled; thus, *mārgēṇa*, l. 42; *-vinirgata-*, l. 58; but *nṛipatir=Ggaṅg-*, l. 26; *-varg[ga]*, l. 42. The other consonants which are used after *r* in these plates, *viz.* *j*, *th* and *bh*, are never doubled.

[1] Above, Vol. IV. p. 183 ff.

[2] Above, Vol. IX. p. 94 ff.

Compare *-nirjit-*, l. 33 ; *-varjitaḥ*, l. 55 ; *=arthibhyaḥ*, l. 24 ; *pārthivaiḥ*, l. 27 ; *maṇēr=bhagavatō*, l. 8 ; *-tir=bhuvaṁ*, l. 30 ; *kṛimir=bhūtvā*, l. 71. Between *m* and *r* a *v*, *i.e.* a *b*, is inserted in *tāmvra-*, l. 61. There are besides, several other mistakes which may be due either to the writer or to the engraver. Thus we find *a* for *ā* in *-prakshyalita-*, l. 4 ; *Gang-*, ll. 13, 26, 44 ; *saṁriddhiman=*, l. 30 ; *-gīyaman-*, l. 36 ; *-chaṭṭa-*, l. 55 ; *a* for *i* in *-kṛita*, l. 39 ; *a* for *u* in *=ācharitaṁ*, l. 41 ; *ā* for *a* in *ānu-*, l. 48 ; *gaurāvāta*, l. 64 f. ; *ā* for *ō* in *-kul-āttamasya*, l. 44 ; *i* for *ī* or *ai* in *isānyē*, l. 69 ; *ī* for *i* in *sāśanīka-*, l. 71 f. ; *ū* for *u* in *-sūdūrāya*, l. 61 ; *ū* for *ō* in *=ēkūna-*, l. 34 ; *j* for *jj* in *-ujvalā-*, ll. 10, 30 ; *-vā[j*=]jātō*, l. 22 ; *ṭṭ* for *ṭ* in *-chaṭṭa-bhaṭṭa-*, l. 55 ; *t* for *tt* in *-chchhatra-*, l. 10 ; *-ōtuṅga-*, l. 12 ; *t* for *d* in *-samutbhavāyāś=*, l. 37 ; *d* for *t* in *praśchyōdan-*, l. 23 ; *y* for *yy* in *nyāyēna*, l. 41 ; *ś* for *s* in *āśinē*, l. 48 ; *-śīm-*, l. 54 ; *śūnu*, l. 59 ; *śimānō*, l. 65 ; *s* for *ś* in *-viṁsatiṁ*, l. 34 ; *-māhēsvara-*, l. 49 ; *-pravēsō*, l. 55 ; *-yasō-*, l. 57 ; *kāsyapa-*, l. 57 ; *sāsanī-*, l. 61 ; *vaṁsa-*, l. 68 ; *-silā*, ll. 68, 70 ; *isānyē*, l. 69 ; *sāśanīka-*, instead of *śāsanika-*, l. 71 f. ; *s* for *sh* in *-visayasya*, l. 65, and so forth. Mistakes such as *sē* for *tsa* in *prasādāsēm-(-dāt=sam-)*, ll. 8 f., the numerous instances where an *anusvāra* (cf. ll. 27, 39, 42, 53, 56, 72, 74) or a *visarga* (cf. ll. 21, 28, 51, 54) has been omitted ; the omission of *jō* in *tasy=ānu[jō*]*, l. 21 ; of *r* in *-karishṇō[r*]*, l. 14 : *sūnu[r*]*, l. 58 ; of *s* in *samā[s*]*, l. 21 ; of *sa* in *śā[sa*]nam=*, l. 73, and the many mistakes in l. 62, are probably due to the engraver, while the long omissions in ll. 34 and 65 just as well can be due to the writer of the draft.

There are several instances of wrong or irregular *saṁdhi* : compare *-dattām=vā*, l. 70 ; *-nivahān śrī-*, l. 17 ; *=gajānn=arthibhyaḥ*, l. 24 ; *saḥ śrī-*, l. 25 ; *prasiddhaḥ chatuḥ-*, l. 54 ; *-ādityāta Rūpadēvyāḥ jātaḥ*, l. 58 ; *-pūrvvan=tā-*, l. 61 f.

In l. 51 several dots indicate a correction. The engraver probably had to copy a corrected draft, and has reproduced it as he found it. The original reading of the passage was probably *samastāmātyapramukhajanapadān=* as in the Naḍagām and Madras Museum plates, or perhaps, *sāmantāmātyapramukhajanapadān=* ; see the footnote to the passage.

The language is **Sanskṛit**, but the construction in ll. 58 ff. is very loose and shows that the composer of the grant was not very well versed in the sacred tongue. With the exception of one imprecatory stanza, the body of the grant is written in prose. The introduction contains the same twelve verses as the Naḍagām and Madras Museum plates, with only one slight variation in verse 2, where our grant has *mahīpatiḥ* while the other two read *=vanīpatiḥ*. In the grant itself we find the curious expression *bhūmichhidrapidhānanyāyēn=*[1] instead of the common *bhūmichchhidranyāyēna*, l. 55. The epithet *paranārīsū(su)dūrāya* used of one of the donees in l. 60 f., is also curious.

The grant was issued from **Dantipura** by the devout worshipper of Mahēśvara, the *Paramabhaṭṭāraka Mahārājādhirāja* **Vajrahasta (III)**, the overlord of the three **Kaliṅgas**, and bestows some land on Irugana [*alias*] śrī-Mānāditya Chotta and Vīra-Bhūrīśrava. The name of the former was perhaps not Mānāditya Chotta but Āditya Chotta, though this reading would imply a serious grammatical slip in l. 60. He was the son of Mānāditya or Āditya Chotta, the son of Chotta Vādayarājā and Rūpadēvī of the Vaidumba family, to which Vajrahasta's mother Vinayamahādēvī likewise belonged. The donee Irugana Mānāditya Chotta was consequently a relative of the king.

The land granted comprised the **Gōrasatta** district with, *i.e.* including thirty-five villages outside **Taṁpavā**. Its boundaries are given in ll. 65 ff. : to the east **Vistīrṇaśilā**, to the south-east a banyan tree sacred to Gaṇēśa (*Vināyaka-vaṭa*) ; to the south a hill with the temple of **Ṭaṅku-Bhaṭṭārikā**, probably some form of Durgā ; to the south-west the **Andhārāvēṇi** hill ; to the west **Kāñchaśilā** on the **Vaṁśadhārā** ; to the north-west **Amrāpāthara** ; to the north

[1] *Bhūmichchhidr-āpivāna-* and *bhumichchhitr-āpidhāna-* occur in the two grants of Daṇḍīmahādēvī published by the late Prof. Kielhorn (above, Vol. VI., p. 139, text line 31 and p. 142, text line 29), who has corrected them into *bhūmichchhidr-āpidhāna-*.

**Madhupapāli**; to the north-east **Tālañjaraśilā**. I cannot localise any of these names with the exception of the river Vaṁśadhārā, which flows through the Ganjam and Vizagapatam districts. On it is a village which in the Indian Atlas is called Varanasy, situated in 18° 51′ N. and 83° 56′ E., and which I would identify with the Vārāṇasi-kaṭaka mentioned in the Puri plates of Narasiṁhadēva IV.[1] Another locality mentioned in Gāṅga plates, the Varāhavartanī,[2] I would look for in the course (*vartanī*) of the Varāhanadī, which rises in the Golkonda hills to the north of Narasapatam and flows into the Bay of Bengal at Vātāda.

The date of our grant is **the Śaka year 967, on the ninth day of the (solar) month Mina, on a Monday.** It is consequently the oldest known grant of Vajrahasta III.

The writers of the grant, the *sandhivigrahin* **Dhavala**, who is described as the grant writer (*śāsanika kāyastha*) of Taṁpavā, and the *kāraki* **Mēṇṭōju**, are not elsewhere known.

[1] Metre: Ślōka. [2] Read *āsīnē*. [3] Read *=anukūlē* or *=ānukūlyē*.
[4] Read *-māhēśvara-*. [5] The aksharas *ṭṭārakō mahārājā* are in Telugu characters.
[6] It looks as if the engraver has placed two dots under *hā* in *mahā-*, three under *sa* in *purassarāna*, one before and one after *sā* in *sāmanta* and three under *i* in *-jīvinaḥ*. The *ma* of *mahā* seems to have been cancelled. I take the three dots under *purassarāna* and *rājapādōpajīvinaḥ* to signify that these words should be cancelled. The two dots under *hā* perhaps correspond with the two dots, before and after *sā*, and indicate that *-hā-* should be replaced by *sāmanta*. We would then arrive at the reading *sāmantāmātyapramukhajanapadān=samāhūya*. The Nadagām and Madras Museum Plates read *samastāmātyapramukhajanapadān= samāhūya*, which may also be the reading intended.
[7] Read *-bāhira-pañcha-triṁśatā*. [8] Read *prasiddhaś=chatuḥ-śīm-*.
[9] Read *achāṭabhaṭapravēśō*. [10] Read *-kālaṁ yāvan-*.
[11] Read *-yaśō-*.
[12] The *ē* of *mē*, the *ē* of *pravēśō* in line 55 and the *ē* of *chakravālē* in line 44 look like *i*; also the *ē* of *Mēṇṭōju* in line 73 f.
[13] Read *Kāśyapa-*. [14] Read *sūnur=Vaidumbādityād-*. [14a] Cancel the *visarga*.
[15] In spite of *śrī-Mānādityachottāya*, (l. 60) which begins a verse in the ślōka metre, we should perhaps read *śrīmān=Āditya-Chottaḥ*.
[16] Read *sūnava*. [17] Read *-sudūrāya*. [18] Read *tāmrasāsa-*
[19] Read *=atō=sya vidhēyī-bhūya samasta-pravaṇikaraiḥ*. [It is not impossible that *-bhūy=ājñā-śravaṇakaraiḥ* was meant; see above, Vol. IX. p. 178, text l. 10 f.—H. K. S.]
[20] Read *-bhāvibhir=bhūpatibhir-*. [21] Read *-gaurarāt=paripālanīyam=iti*.

## TRANSLATION.

(Line 1.) Ōṁ! Hail. The son of the *Mahārāja* **Guṇamahārṇava**, who by his prowess conquered the circle of the earth, as (*the god*) Vishṇu by his strides, wishing to adorn the lineage of the glorious **G[ā]ṅgas**, the lords of the three **Kaliṅgas**, who were purified by gems (*in the shape*) of virtues praised over the whole earth, such as prudence, good breeding, generosity, charity, courtesy, truthfulness, purity, valour and firmness; who were of the Ātrēya *gōtra*; who washed off the stains of the impurities of the Kali age by the holy water of (*their*) taintless thoughts and deeds; the grandeur of whose universal sovereignty was resplendent by the unique conch-shell, the drum, the five *mahāśabdas*, the white parasol, the golden chowrie, and the excellent bull crest which they had obtained by the favour of the blessed Gōkarṇasvāmin, who resides on the summit of the lofty Mahēndra mountain, the lord of what moves and what cannot move, the sole architect in the creation of all the worlds, whose crest jewel is the moon; who were adorned by lofty staff-like arms which were embraced by the goddess of victory won in the scuffles of many battles,—

(Verse 1.) The glorious **Vajrahasta [I.]**, of exalted conduct, protected the entire (*earth*) for forty-four years, after he, the very valiant one, had, himself single-handed by the prowess of his arm, conquered the hosts of his foes and united the earth, which had formerly been divided and enjoyed in five parts by five kings.

(L. 19.) His son king **Guṇḍama [I.]** protected the earth for three years; his younger brother **Kāmārṇavadēva [I.]** for thirty-five years; his younger brother **Vinayāditya** for three years.

(V. 2.) Thereafter king **Vajrahasta [II.]** who was born of Kāmārṇava [I.], and who shone like a wishing-tree on earth, with radiant lustre,

(V. 3.) the incomparable head of liberal men, who gave to mendicants a thousand elephants, whose temples were sucked by bees attracted by the smell of the rut flowing (from them), he who was praised by kings, the glorious king **Aniyaṅkabhīma**, the ornament of the family of the **G[ā]ṅgas**, enjoyed the earth for thirty-five years.

(V. 4.) His eldest son, who was like the son of the king of gods, king **Kāmārṇava [II.]** protected the whole earth for half a year, prosperous and resplendent, after he had conquered the circle of (*his*) foes.

(V. 5.) After him his younger brother who was comparable to the mind-born (Cupid), a blameless treasure of virtues, the king named **Guṇḍama [II.]**, protected this whole circle of the earth for three years, after he had vanquished the host of (his) enemies with (his) mighty splendour.

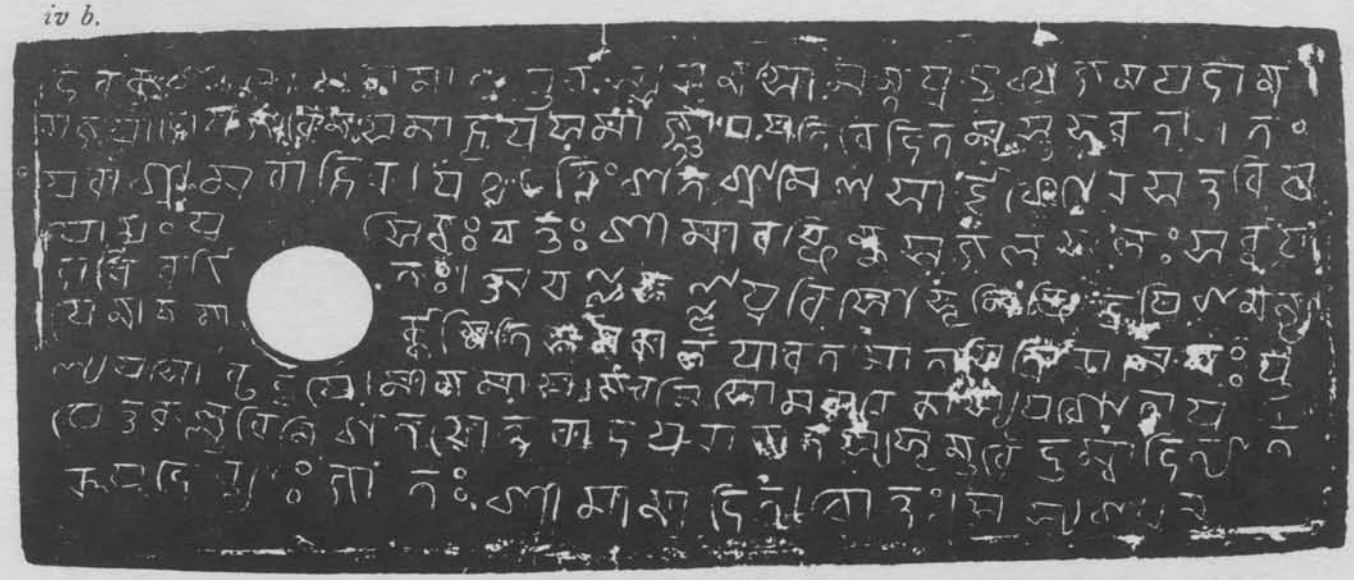

(V. 6.) Then his brother from a different mother, king **Madhu-Kāmārṇava**, [protected this earth for nineteen years].

V. VENKAYYA. SCALE ·8 W. GRIGGS & SONS LTD., PHOTO-LITHO.

(V. 7-8.) Then the son, named the glorious **Vajrahasta [III.]**, born from **Kāmārṇava** [II.], the foremost of all virtuous men, the eldest son of king Vajrahasta [II.], whose pure and shining fame was praised by the chiefs of poets, and from **Vinayamahādēvī**, who had sprung from the family of the **Vaidumbas**, as Śrī from the milk-ocean,

(V. 9.) he who was anointed to protect the whole earth when the aggregate of Śaka years reached the number of the sky (0), the seasons (6) and the treasures (9), while the sun was standing in Taurus, under the Rōhiṇī *nakshatra*, in the auspicious *lagna* of Dhanus, in the bright fortnight, on a Sunday, combined with the third (*tithi*) ;

(V. 10.) whose subjects are always enjoying wealth without ailments, sins and misfortunes, while (*he*), whose prowess is praised, protects the earth on the right path in order to get the three objects of life accomplished simultaneously ;

(V. 11.) while the circle of the (eight) quarters is being filled with the fame, spotless as the light of the moon and procuring joy to the earth, of him (*who was*) the best of the G[ā]ṅga family, the mahouts of the quarters over and over again anoint (their) elephants on the surface of (their) frontal globes with masses of thick red-lead paste ;

(V. 12.) through love of which virtuous man Śrī and Sarasvatī, sitting in (*his*) bosom and lotus-like mouth (respectively), shine in concord,

(L. 49.) he, the king, the devout worshipper of Mahēśvara, the *Paramabhaṭṭāraka Mahārājādhirāja*, the lord of the **three Kaliṅgas**, the glorious king Vajrahasta, being in good health, issues the (following) order from **Dantipura**, having called together the people headed by the feudatories, preceded by the high ministers, who live at the king's feet,—

(L. 52.) Be it known to you (that), for the increase of the religious merit and fame of (Our) mother and father and of Ourself, the well known **Gōrasatta** district (*vishaya*) with (its) thirty-five villages outside (*bāhira*) **Taṁpavā** village, circumscribed by the four boundaries, including water and land, free from all molestation, not to be entered by district officers (*chāṭas*) and *bhaṭas*, has been granted by Us, with libations of water, by means of a charter, after having made (*it*) into a copper-plate grant, according to the maxim of the covering of a hole in the ground (*bhūmi-chhidrapidhāna-nyāya*) to last as long as the moon, the sun, and the earth, on the ninth day of the month **Mīna**, on a **Monday**, to Iruguna śrī-Mānāditya Chotta, of the Kāśyapa *gōtra*, the son of śrī-Mānāditya Chotta, the son of Chotta Vādayarāja, who came from **Pettakallu**, born of Rūpadēvī, the sun of the Vaidumba family,[1] and to Vīra-Bhūriśrava (Bhūriśravas), who keeps far off from the wives of others, whose mind is set on truthfulness. Therefore, being obedient to him, the proper *bhāgabhōga* and other (*income*) should be brought to him, together with the *pravaṇikara* and the *kshētrakara*. Future kings [should preserve] this (my) gift, from reverence for the law of Manu, from time to time.

(L. 65.) The boundaries of the **Gōrasatta** district (*vishaya*) are (here) written : to the east **Vistirṇaśilā** ; to the south-east the Vināyaka-vaṭa (tree) near the hills ; to the south the border hill of Taṅku-Bhaṭṭārikā ; to the south-west the **Andhārāvēṇi** hill ; to the west **Kāñchaśilā**, on the bank of the **Vaṁśadhārā** ; to the north-west **Amrāpāthara** ; to the north **Madhupapāli** ; to the north-east **Tālañjaraśilā**. [Here follows one of the customary verses].

(L. 72.) This charter was written by the illustrious *sandhivigrahin* **Dhavala**, the grant-writer (*śāsanika-kāyastha*) of **Taṁpavā** village. **The Śaka year 967.** Thus also written by the *kāraki* **Mēṇṭōju.**

---

[1] [It is difficult to reconcile the fact that Rūpadēvī, a lady, is called the 'Sun' of the Vaidumba family. Perhaps Vaidumbāditya is to be taken as a proper name.—H. K. S.]

## No. 15.— TIRUVELLARAI INSCRIPTION OF DANTIVARMAN.

By K. V. Subrahmanya Aiyar, B.A., Ootacamund.

The subjoined inscription[1] is engraved on some of the stones forming the margin of the well on the southern side of the **Puṇḍarīkāksha-Perumāḷ** temple at **Tiruveḷḷaṛai**. This village is at a distance of 12 miles to the north of Trichinopoly and has several interesting ancient monuments. Among them may be mentioned (1) the rock-cut Śiva temple of **Jambunātha**[2] called in its inscriptions the **Tiruvāṇaikkal-Perumāṇaḍigaḷ**, with an inscribed boulder in front;[3] (2) the Vishṇu temple of Puṇḍarikāksha-Perumāḷ with another rock-cut cave[4] on the southern side of its first *prākāra*; and (3) the well on which the subjoined inscription is engraved.[5] Besides the above, there are the ruins of another Śiva temple in that part of the village where the Pallava well is situated. A big *liṅga* and a large sized Nandi are still to be seen in a field not far from the well.

The stones bearing the record under notice are not in proper order, but as none of them is missing, it has been possible to piece them together and make out the inscription completely. It is in an excellent state of preservation, having been engraved after the stones had been dressed for the purpose. The engraver seems to have taken great care as the record is almost free from any mistakes. The letters are cut deeply and the inscription is written in two sections of two lines each. The language of the record is **Tamiḷ prose and verse** with an admixture of Sanskṛit words and phrases written in Grantha characters.

The following peculiarities of the alphabet deserve notice. The vertical line to the right of *va* in *sva* reaches the full height of the top letter *sa*. The secondary *i* is written from the right to the left and touches the consonant on the right side only. The secondary *ā* is denoted by a short vertical stroke added to the right of the letter so as to touch it by a small horizontal line at the top. The length of the vowel *ā* and the *ū* of the combined consonant *vū* are as distinctly marked as in the modern characters. *Va* presents an early type. The bottom portion of *ḍu* is drawn out into a flourish as sometimes to completely cover the letter that precedes it. All the *ya's* occurring in this inscription have a big loop at the beginning. The *ē* symbol

---

[1] No. 541 of the Madras Epigraphical collection for 1905.

[2] The inscriptions on the outer walls of this temple which may be considered not so old as the cave itself, belong to the time of Rājakēsarivarman, Parāntaka I. and Rājēndra-Chōḷa I. (Nos. 512 to 514 of 1905). The cave consists of a cell cut into the rock with two niches on either side. Of the two to the right, the first contains an image of Vishṇu, while the second enshrines the god Gaṇēśa. In the two niches on the left side are put in stone images of a later date. The front part of the cave may be described as a verandah with four pillars cut out of the same rock.

[3] As many as 16 inscriptions have been copied from this boulder (Nos. 515 to 530 of 1905). They range in date from the time of a Pallava king whose inscription is partially built in by a modern platform raised in front of the shrine of the goddess, to those of the early Chōḷa sovereigns Rājakēsarivarman, Parakēsarivarman, Parāntaka I. and Vikrama-Chōḷa. The texts of 13 of these records have been printed by the late Pandit Natesa Sastri (*Ind. Ant.* Vol. XXXIV, pp. 265 ff.).

[4] Ten inscriptions of the Epigraphical collection for 1905 (Nos. 531 to 540) are from this cave, the kings represented being Nandivarman, Rājakēsarivarman, Parakēsarivarman, Rājarāja I., and Parakēsarivarman 'who took the head of the Pāṇḍya.' One of the inscriptions (No. 534 of 1905) dated in the 8th year of a Parakēsarivarman is interesting as it refers to gifts made by the queen of Uḍaiyār-Āṇaimēṛṛuñjiṇār (*i.e.* the king who died on an elephant's back) to the god Śrī-Kṛishṇa and his consort Rukmiṇī of the big temple at Tiruveḷḷaṛai. At present there is no shrine in the Puṇḍarikāksha-Perumāḷ temple dedicated to Śrī-Kṛishṇa but there is an image of that god found on the outer *gōpura*, right of entrance. We cannot be certain if this is the image referred to.

[5] Nos. 541 and 542 of the Madras Epigraphical collection for 1905 are engraved on stones forming the margin of this well.

touches the consonant that follows it. One graphic peculiarity of the record is that the loops of *ṉ* and *ṇ* are fully developed and the consonant *rai* resembles to a great extent the letter *ṉa*. The *puḷḷi* (or *virāma*) is invariably marked by a slightly curved line cut on the top of the letters. It is wrongly marked on *pe* in *perusiṅgiṇaru* (l. 2, section 1) and on *ṉē* in *vaimmiṇēy* (end of l. 2, section 2). The Sanskṛit words and letters that occur in the inscription are: *svasti* and *śrī* at the beginning of the record, *Bhāradvāja-gōtra*, *Dantivarmma* and *Pallava-tilatakulōrbhava* in line 1; *ratshi* of *ratshippār* in line 2 and *śrī* at the commencement of the Tamiḻ verse in section 2, line 1.

The object of the inscription is to record the construction of the well called **Mārppiḍuguperuṅgiṇaru** by one **Kambaṉ-Araiyaṉ**, the younger brother of a certain **Viśaiyanallūḷāṉ** of **Ālambākkam**. The work was commenced in the **4th year of Dantivarman**, who belonged to the **Pallavatilata** (°tilaka) **family** which is said to have sprung from the **Bhāradvāja-***gōtra*, and completed in his **5th year**. The capacity of the well accounts for the time taken in its construction. There are four entrances leading into the well and they are so constructed as to give it the shape of the *svastika* symbol 卐 [1]. The Tamiḻ verse in section 2 is written in the *Āsiriyaviruttam* metre, each line containing six feet (*śīr*). It declares that no object in this world is permanent, that life is sure to decay, and that, therefore, if one commands wealth, he must, after taking what is required for his maintenance, utilise the remainder in doing works of charity.

An inscription dated in the 8th year (=A.D. 1262-3) of the **Hoysaḷa** king **Vīra-Rāmanāthadēva** found on the margin of the same well records that a merchant (*vāṇiyaṉ*) repaired it as it had suffered considerable damage from floods and other causes.[2] The same record refers to the well as having been built by a merchant. In the 13th century A.D. the builder of the well was believed to have been a private individual and not a chief, as the title *Araiyaṉ* appended to his name would lead one to believe.[3] It is also interesting to learn that repairs were executed to it in A.D. 1262. It was perhaps then that the inscribed stones got out of order.

The proper names that occur in this record are of special interest. **Ālambākkam** may be identified with the village of the same name situated at a distance of 12 miles from Lālguḍi on the road to Ariyalūr. **Dantivarmamaṅgalam** and **Madhurāntaka-chaturvēdimaṅgalam** were its other names in ancient times, and it was situated in Poygai-nāḍu which was a subdivision of **Rājēndraśiṅgavaḷanāḍu.**[4] **Tiruveḷḷaṟai** is said to have been a village in **Vaḍavaḷi-nāḍu**, a district of Rājāśraya-vaḷanāḍu[5]. The members of the village assembly of Tiruveḷḷaṟai are referred to in two records of the Chōḷa king Rājarāja I. found in the Rājarājēśvara

[1] From each of the entrances, a flight of steps leads to the interior of the well. Midway between the entrance and the bottom of the well, on what may be described as the portal, is a piece of sculpture which was, in all probability, carved at the time when the well was constructed and hence synchronous with it. There are thus four groups of sculptures in all, on the four sides. The principal figures on the northern side are Śiva and Pārvatī seated on a pedestal with attendant deities, flanked on either side by a *nandi*. A number of female figures, probably the *saptamātṛis*, are found on the southern side. With an attendant deity on the right side, the god Yōga-Narasiṁha is figured on the eastern side in a sitting posture with legs folded and crossed and with something like a cloth passing round them. This group is flanked on the left by a lion while to the right is a *yāḷi*. I am not able to identify the images on the western side. Here are the figures of a warrior armed with a sword, a horse and a few other images.

[2] No. 542 of the Epigraphical collection for 1905 and *Annual Report* on Epigraphy for 1905-06, p. 63, paragraph 4.

[3] In spite of this belief it is not impossible that the builder Kambaṉ-Araiyaṉ was a chief who belonged to the Muttaraiyaṉ family.

[4] *Annual Report* on Epigraphy for 1909-10, Part II., paragraphs 14 and 25.

[5] *South-Ind. Inscrs.* Vol. II. Part III. p. 338.

temple at Tanjore and were required to supply two *brahmachārins* as temple-servants and two other persons as watchmen to that temple.[1]

The well Mārppiḍugu-peruṅgiṇaṟu should have been named either after the reigning king or a local chief under him. That it was not called after the builder is evident from the fact that he bore a different name. Nor do we know that Dantivarman had the surname Mārppiḍugu. It may be pointed out here that there was in ancient times a family of kings called **Muttaraiyaṉ** ruling over a portion of the Tanjore and Trichinopoly districts and a part at least of the Pudukkōṭṭai State.[2] Some of the members of this family had for their surnames Perumbiḍugu, Viḍēlviḍugu, *etc.* Śendalai, one of the places where their inscriptions have been found, is not far off from Ālambākkam whence the builder of the Tiruvelḷaṟai well hails. It may further be noticed that at Ālambākkam, there was, according to its inscriptions a big tank called **Mārppiḍug-ēri**. It is just possible that both the Mārppiḍug-ēri of Ālambākkam and the Mārppiḍugu-peruṅgiṇaṟu of Tiruvelḷaṟai came into existence at the same time and were named after the same person who, to judge from the similarity of the name, might have been a member of the **Muttaraiyaṉ** family and a feudatory of the Pallava king Dantivarman of our record.

From the Tamiḻ work *Nālāyiraprabandham*, it appears that the Vishṇu temple at Tiruvelḷaṟai was in existence from an early period,[3] as the Vaishṇava saints **Periyāḻvār** and **Tirumaṅgai-Āḻvār** composed hymns in its praise. The latter saint mentions the village not less than four times in his compositions and there is not much doubt that one of these references, *viz. Velḷaṟaiyuḷ kallaraimēl*[4] has to be taken to denote the rock-cut cave in the Puṇḍarīkāksha-Perumāḷ temple. From the fact that Tirumaṅgai-Āḻvār mentions in his hymn on Paramēśvaravinṇagar some of the battles where the Pallava king Nandivarman Pallavamalla gained victories over the Pāṇḍya sovereign and refers to another Pallava king Vayiramēgaṉ, it has been surmised that the Āḻvār was a contemporary of the latter and lived in the period immediately following the reign of the former whose achievements were fresh in the saint's mind.[5] Tirumaṅgai-Āḻvār[6] has thus been assigned to the 3rd quarter of the 8th century A.D. Accordingly, the cave in the Puṇḍarīkāksha-Perumāḷ temple probably came into existence before that time. One of the earliest inscriptions in the cave belongs to the time of a **Pallava tilaka** king **Nandivarman.** This record mentions a certain Viśaiyanallūḻāṉ, who is perhaps the same as that Viśaiyanallūḻāṉ whose younger brother was Kambaṉ-Araiyaṉ, the builder of the well at Tiruvelḷaṟai. If this be the case, it may be concluded that Nandivarman was perhaps the predecessor of Dantivarman. At any rate he could not be far removed in point of time from the other.

---

[1] *Ibid.* pp. 326 and 338.

[2] Inscriptions of this family have been found at Śendalai and Tiruchchattuṟai in the Tanjore District where there was a village called Viḍēlviḍugu-chaturvēdimaṅgalam. Tirumaiyam and Malaikkōyil in the Pudukkōṭṭai State also contain their records. The cave at Nārttāmalai was excavated by the son of Viḍēlviḍugu-Muttaraiyaṉ. A weight called *Viḍēlviḍugu-kal* was in use at Uyyakkoṇḍāṉ-Tirumalai near Trichinopoly.

[3] From some of these stanzas, it appears that the god in the Vishṇu temple was in a standing posture in ancient times also.

[4] *Miṇṇaiy-iru-ṭudarai Velḷaṟaiyuḷ-kallaraimēl* occurs in the *Periyatirumoḻi* of Tirumaṅgai-Āḻvār.

[5] Above, Vol. VIII, pp. 293-4.

[6] One other king referred to by this saint is the ancient Chōḻa Kō-Chcheṅgaṇṇāṉ who is mentioned both in the large Leyden and the Tiruvālaṅgāḍu plates. Tamiḻ literature speaks of this sovereign as having fought with the Chēra Kaṇaikkāl-Irumboṟai whom he eventually took prisoner and confined in a place called Kuḍavāyilkōṭṭam (*Puṟam* 74). The poet Poygaiyār celebrates the valour of this king in his *Kaḷavaḻi-nāṟpaḍu*. *Puṟam* 48 and 49 contain stanzas composed by the same author in honour of another Chēra king Kō-Kkōdai-mārbaṉ who, if not identical with Kaṇaikkāl-Irumboṟai, must have been a near relation of his and a contemporary of the Chōḻa Kō-Chcheṅgaṇṇāṉ. It is worthy of note that the *Periyapurāṇam* refers to the extensive building operations of this ancient Chōḻa king. The Śaiva saint Tiruñāṇaśambandar alludes to the construction of the temple at Tiruvaigaṉmāḍakkōyil and other places by the same king.

King Dantivarman of the subjoined record is stated to have been born in the Pallavatilaka family which had sprung from the Bhâradvâja-*gôtra*. In editing the Triplicane inscription of **Dantivarma-Mahârâja**, Mr. Venkayya remarked that he was perhaps the immediate successor of Nandivarman Pallavamalla and added in a note that his successors probably spoke of themselves as belonging to the "family of the Pallavatilaka." And *Pallavatilaka* is a shortened form of *Pallavakulatilaka* which was actually borne as a title by Dantivarma-Mahârâja of the Triplicane inscription.[1] Nandivarman Pallavamalla was a usurper as we know from the Kâśâkuḍi plates. Subsequent kings (there are at least two known so far) claiming descent in the Pallava line, trace their ancestry apparently to Dantivarman of the Triplicane inscription as evidenced by the epithet *Pallavatilaka-kulôdbhava* prefixed to their names. The application of this epithet to the king of the present record necessitates our distinguishing him from Dantivarma-Mahârâja, "the ornament of the Pallava race." That such a distinction has to be made is also evident from the fact that this is not the only inscription which introduces this family. Not less than five records have, so far, been found where members belonging to the Pallavatilaka family are mentioned,[2] and it is therefore difficult to suppose that all the writers did not intend any difference between the terms *Pallavakula* and *Pallavatilakakula*.

From the Tiruvâlaṅgâḍu grant of Râjêndra-Chôḷa I., we know that **Âditya I**, father of **Parântaka I.** (A.D. 907—947) fought with the **Gaṅga-Pallava Aparâjita**.[3] This king may be supposed to be the son of Nṛipatuṅgavikramavarman and his successor. In two records of the 18th and 22nd years of Nṛipatuṅga, **Aḍigaḷ-Kambaṉ-Mâṟambâvai**, queen of **Nandivarman** of the Pallavatilaka family makes grants and there is a much damaged inscription in the Airâvatêśvara temple at Niyamam apparently dated during the reign of a Chôḷa king also registering a grant made by the same queen.[4] From these facts it may be concluded that, of the two kings of the Pallavatilaka family hitherto known, Nandivarman was either a contemporary of the Gaṅga-Pallava Nṛipatuṅgavikramavarman or lived prior to his time by a few years. As Dantivarman of the subjoined inscription has been shown to be closer in point of time to this Nandivarman, he may be assigned roughly to the beginning of the 9th century A.D.

## TEXT.

[5] *Tilata* is a *tadbhava* of the Sanskṛit *tilaka*. [6] Read *rakshi*°, [6a] Read *Mûvâyi*°.

[7] In these four instances the final *y* seems to have been inserted to represent the full sound produced in pronouncing the words.

[8] *Taṇḍu* is a variant of the Sanskṛit *daṇḍa*.

[9] The doubling of the consonant *l* is a mistake. The first of them has to be deleted.

**TRANSLATION.**

*First Section.*

Hail! Prosperity! In the **fourth year** (*of the reign*) of **Dantivarman who was born** in the **Pallavatilaka** family which had sprung from the **Bhāradvāja-***gōtra*, **Kambaṉ Araiyaṉ**, the younger brother of **Viśaiyanallūḷāṉ of Ālambākkam**, commenced (*to build*) the big well at **Teṉṉūr**[1] in **Tiruveḷḷarai** and completed (*it*) in the **fifth** (*year of the same reign*). **Mārppiḍugu-peruṅgiṇaṟu** is the name of this (*well*). The three-thousand and seven hundred[2] of this village shall protect this (*charity*).

*Second Section.*

Prosperity! Without being (*passionately*) attached to this world where men seen (*today*) are not seen (*tomorrow*); without giving (*yourself*) up to despair looking for the (*final*) day appointed by the Creator; and before your (*limbs*) become weak at the appearance of old age with its (*appendage of a*) stick; if you have (*wealth*) maintain (*yourself*) and devote (*what remains to charity*) so that (*all*) the world may know (*it*).

---

## No. 16.—NEW SPECIAL TABLES FOR THE COMPUTATION OF HINDU DATES.

BY HERMANN JACOBI, PH.D.,

*Sanskrit Professor at Bonn, Germany.*

The new Special Tables which I publish now are intended to supplement the General Tables in the same way as the old Special Tables do, which were published in Vol. I. above, p. 450 ff., *i.e.* they are intended to test, according to one of the principal *siddhāntas* named at the head of the several Tables, the approximate result calculated previously by the General Tables. To these new Tables the remark in § 4, p. 403 *l. c.* applies also. "The General Table is to be used first; and only when by that table the end of the *tithi* falls very near the beginning of the day, and the week day comes out in error by one day only, need the Special Tables for the several *siddhāntas* be tried to see if one of them will furnish the desired result."

The plan on which the new Tables have been constructed is the same as in the General Tables, as far as their object, the highest possible degree of accuracy, will allow. Therefore the new Tables (1) refer throughout to mean sunrise at Laṅkā, not, as the old Special Tables do, to the beginning of the Solar year; (2) they furnish the quantities on which the *tithi* depends, in decimals of the circle and not in degrees, minutes and seconds as is the case in the old Tables. These innovations render the working of the new Tables very easy and almost mechanical.

The Special Tables differ from the General Tables in two points; (1) They contain three columns headed *a*, *b*, *c* instead of the two in the General Tables headed '*Tithi*' and '☾'s anomaly. *a* denotes mean distance of Sun and Moon, expressed in five decimals of the circle. By Tables XVIII, XIV, XV *a* can be converted into *tithis*, *ghaṭikās*, and *palas*; *b* denotes the mean anomaly of the moon in four decimals of the circle; and *c* the mean anomaly of the Sun, also in

---

[1] The southern part of Tiruveḷḷarai was probably called Teṉṉūr in ancient times.

[2] The signatory in one of the inscriptions of Rājarāja I (A.D. 985-1013) found at Māmallapuram in the Chingleput District is a certain Tiruvadigal Maṇikaṇṭhaṉ, a native of Tiru vel[*]araṉ. He calls himself as one of the 3,700 of that village (*South-Ind. Inscrs.* Vol. I., p. 65). This seems to indicate that at an early period there was a body of 3,700 persons at Tiruveḷḷarai to whom later members traced their descent. Reference to another such body of men is found in the expression *Tillai-mūvāyiravar*.

four decimals. (2) To the sum of *a* (mean distance of Sun and Moon) *two* corrections (equations) must be applied, while in the General Tables only one equation is needed. The arguments of these equations are the sums of *b* and *c*, respectively, and they are to be looked out in the tables of equations under the several *siddhāntas*. In order to calculate the value of the equation for an argument not entered in the table, but lying between two table values, a column headed Δ 10 has been inserted in the middle of these tables, which gives the increase or decrease of the equation for a difference of ten in the argument.

I now proceed to illustrate the working of the new Tables by a few examples.

*First example.*—Let it be proposed to verify the date: Kali-Yuga 4198, Chaitra *su. di.* 2 *ravau*, according to the Sūrya-Siddhānta. We first calculate the date according to the General Tables, and write down the calculation in the proper form (see above, Vol. I. p. 410).

| | | | | | |
|---|---|---|---|---|---|
| 4100 K.Y. | (1) | 5·58 | 111 | Ind. ● | =20·43 |
| 98 years | (4) | 399 | 59 | Ind. su. di. 2 | =22·43 |
| 4198 K.Y. | (5) | 9·57 | 170 | | |
| 15th sol. Chaitra | (4) | 22·52 | 593 | | |
| | (2) | 2·09 | 763 | | |
| | eq. 763=0 | | | | |
| | | 2·09 | | | |

Result: On the Monday (2) in question, the third *tithi* was running; it commenced on the preceding day (Sunday), about $5\frac{1}{2}$ *ghaṭikās* before mean sunrise. Now in order to calculate the result according to the Sūrya-Siddhānta, proceed as follows. Look out K. Y. 4100 or 41st century K. Y. in table I, 98 years in table II, and 15th Chaitra in table XIII (which is the same for all Siddhāntas) and sum up the quantities in the several columns (rejecting integers), thus:—

| | *w* | *a* | *b* | *c* |
|---|---|---|---|---|
| 41st century | (1) | 18563 | 6157 | 7863 |
| 98 years | (4) | 13299 | 571 | 9990 |
| 15th sol. Chaitra | (4) | 75053 | 5932 | 9500 |
| K. Y. 4198, 15 Chaitra | (2) | 6915 | 2660 | 7353 |

Now find the equation for *b* 2660 from table III, *viz.* 5, and the equation for *c*=7353 from table IV, *viz.* 3; then add these equations to *a*, *viz.* 6915+5+3=6923. Table XVIII gives 6667=*su. di.* 2; the difference from *a* just found, 6923—6667=256; this is according to tables XIV and XV equal to 4 *ghaṭikās* (*a*=226) and 32 *palas* (*a*=30). Therefore, according to the Sūrya-Siddhānta, the 2nd *tithi* ended 4 *ghaṭikās* 34 *palas* before mean sunrise. This result is very nearly right, and we may in most cases rest satisfied with it. If the highest degree of accuracy be required we subtract the increase of *a b c* for 4 *ghaṭikās* 2 *palas* from tables XIV and XV to the result found before; *viz.* from 6915 22—

| | | | | | | |
|---|---|---|---|---|---|---|
| 4 *ghaṭikās* | 226 | 24 | 2 | 6915 | 2660 | 7353 |
| 32 *palas* | 30 | 3 | — | −256 | 27 | 2 |
| | 256 | 27 | 2 | 6659 | 2633 | 7351 |

Equation for $b=2633$ is 4; equation $c$ for 7351 is 3; the sum of both equations=7 added to 6659 makes 6666, which falls short of 6667 by 1. Therefore the end of the *tithi* occurred one *pala* after the moment calculated or 4 *ghaṭikās* 31 *palas* before mean sunrise at Laṅkā.

*Second example.*—Computing the date K. Y. 4276 Bhādrapada *su. di* 13 *ravau*, our calculation by the General Tables stands thus (*l. c.* p. 411) :—

| | | | | | |
|---|---|---|---|---|---|
| 4200 K. Y. | (1) | 2·19 | 699 | Ind. ● | =26·54 |
| 76 years | (5) | 1·27 | 454 | Ind. su. di. 13 | = 9·54 |
| | (6) | 3·46 | 153 | | |
| 3rd Āśvina | (2) | 8·83 | 661 | | |
| | (1) | 12·29 | 814 | | |
| eq. 814 | = | 0·03 | | | |
| | (1) | 12·32=Sunday, *su. di.* 13. | | | |

Let it now be required to calculate the end of the 13th *tithi* according to the Arya-Siddhānta. By the General Tables we find that this moment occurred about 40 *ghaṭikās* (=0·68 *tithi*, table IV) after mean sunrise at Laṅkā. The Tables for Ārya-Siddhānta furnish the following data :—

| | | | | |
|---|---|---|---|---|
| 4200 K. Y. | (1) | 7236 | 1988 | 7848 |
| 76 years | (5) | 4208 | 4555 | 9 |
| 3 Āśvina | (2) | 28266 | 6615 | 4271 |
| | (1) | 39710 | 3158 | 2128 |
| 40 *ghaṭikās* | | 2257 | 242 | 18 |
| | | 41967 | 3400 | 2146 |

equation $b$ for 3400 is 215, equation $c$ for 2146 is 1178; their sum 1393 added to $a$ 41967= 43360. The difference from 43333, the value of 13th *tithi*, is $a$ 27=25 *palas*, by which the end of the *tithi* occurred before the moment calculated. The exact time is therefore 39 *ghaṭikās* 35 *palas* after mean sunrise at Laṅkā.

*Possible error.*—As in the tables fractions are neglected or counted as 1, according as they are less or larger than ½, the absolute error in every quantity may amount to ±0·5. Usually the plus and the minus of the different figures will compensate for each other, but in extreme cases the neglected fractions may sum up to ± 2·5 or ±3·5, according as 5 or 7 $a$'s are summed up. This error, in time, would be 2, 7 and 8, 7 *palas*, or 1 minute 5 seconds and 1 m. 29 s., respectively.

## SŪRYA-SIDDHĀNTA.

TABLE I.—*For centuries (of the Kali-Yuga).*

| cent. | $\frac{w}{7}$ | *a* | *b* | *c* | sol. corr. gh. p. |

For Sūrya-Siddhānta *with bīja* the last two figures of *b* must be augmented by: 42 in 4500 K. Y.
„ 43 „ 4600 „
„ 43 „ 4700 „
„ 44 „ 4800 „
„ 45 „ 4900 „
„ 46 „ 5000 „

For mean Distance ☾—☉ add 2006 to *a*.

For *mean* Longitude of the Sun add to *c*:
2145 between 3000 and 3300
2146 „ 3400 „ 4400
2147 „ 4500 „ 5000

For *true* Longitude of the Sun add 2206 to *c*, and subtract tenth part of equation *c*.

Table II.—*Sūrya-Siddhānta: Years of the century.*

| 39 | 1 | 41287 | 4358 | 7866 | — 5 | 37 |
| 40 | 1 | 30010 | 247 | 7870 | —14 | 59 |
| 41 | 1 | 18734 | 6135 | 7874 | —24 | 22 |
| 42 | 1 | 7458 | 2024 | 7878 | —33 | 44 |
| 43 | 0 | 92795 | 7550 | 7855 | +16 | 53 |

B.—SIDDHĀNTA-SIRŌMAṆI.

| cent. | *w* | *a* | *b* | *c* | sol. corr. gh. | p. |
|---|---|---|---|---|---|---|
| 42 | 1 | 7263 | 1995 | 7849 | —33 | 44 |
| 43 | 0 | 92595 | 7520 | 7825 | +16 | 53 |
| 44 | 0 | 81114 | 3408 | 7828 | + 7 | 31 |
| 45 | 0 | 70033 | 9296 | 7832 | — 1 | 52 |
| 46 | 0 | 58752 | 5184 | 7836 | —11 | 14 |
| 47 | 0 | 47471 | 1072 | 7839 | —20 | 37 |
| 48 | 0 | 36190 | 6960 | 7841 | —29 | 59 |
| 49 | 0 | 24909 | 2848 | 7846 | —39 | 22 |
| 50 | 6 | 10241 | 8373 | 7822 | +11 | 16 |

For mean Distance ☾ — ☉ add 1999 to *a*.

For *mean* Longitude of the Sun add to *c*: 2104 before 4100 K. Y. and 2105 after 4100 K. Y.

For *true* Longitude of the Sun add 2224 to *c* and subtract tenth part of equation *c*.

NOTE.—The beginning of the Solar month according to the Brahma-Siddhānta and the Siddhānta-Śirōmaṇi is earlier by one day than according to the other Siddhāntas.

Table X.—*Brahma-Siddhānta and Siddhānta-Śirōmaṇi; Years of the Century.*

Note.—The Table is correct for Siddhānta-Śirōmaṇi; for Brahma-Siddhānta the table value of *a* must be augmented: by 1 after the year 7, by 2 after 22, by 3 after 37, by 4 after 51, by 5 after 65, by 6 after 80, by 7 after 94.

| year. | *w* | *a* | *b* | *c* | sol. corr. gh. | p. | year | *w* | *a* | *b* | *c* | sol. corr. gh. | p. |

## No. 17.—NAVALAKHI PLATES OF SILADITYA I.—[GUPTA-] SAMVAT 286.

BY PROFESSOR H. M. BHADKAMKAR.

I edit the following plates from two impressions kindly sent to me by Mr. D. R. Bhandarkar, M.A., Archæological Superintendent, Western Circle. The two impressions together leave no doubt as to the correct reading of the original, with the exception of two names at the beginning of the second plate. In the case of these two names, the original itself seems to be damaged.

The plates were first found in 1904-5 at **Navalākhī**, near Shahāpūr, a village about 8 or 10 miles from Junāgaḍh, and are now preserved in the Bahadur Museum, Junāgaḍh. They are two in number, each inscribed on one side only. The edges are fashioned into rims on the four margins. The plates appear to have been held together by thick rings passing through two holes at the bottom of the first plate and at the top of the second. The holes are nearly $\frac{1}{4}''$ in diameter, and seem to have been bored before the grant itself was inscribed. The usual seal must have been attached to one of these copper rings, but as it is not forthcoming, I presume it has been lost. The plates measure about 10·8″ by 9″. The first bears 21 lines and the second 16. The average size of the letters is about $\frac{3}{10}''$.

The subjoined inscription is comparatively free from mistakes and differs in this respect from other records of the same dynasty, *e.g.* the Rājkōṭ Museum plates of the same reign dated in Gupta-Saṁvat 290, published by Dr. Bühler[1] (referred to in the sequel for the sake of brevity as '*the grant of 290*'). The characters belong to the western variety of the southern alphabets. As regards palæography, it is enough to note that the aksharas *ph* and *ḍh* are hardly distinguished (*e.g. kāryya-phalaḥ*, l. 7, and *pīṭhōdūḍha*, l. 14). The language is **Sanskṛit** prose with the exception of three imprecatory verses at the end. The rules of *sandhi* are followed in many places but neglected in others. As regards **orthography**, the following points may be noted :—

The letter *gh* is used instead of *h* in *saṁghatis* (l. 5), and *saṁghaṭārāli*° (l. 11). The guttural *ṅ* is used instead of the *anusvāra* in *chatvāriṅśatē* (l. 25) according to the practice of the Yajurvēdi Brāhmaṇas in their Vedic recitations; and the dental *n* takes its place in °*bhāsurataransa* (for °*tarāṁsa*) as is the practice with the Gujarātis of the present day. The final *m* of a word is changed only once into the nasal of the class to which the following letter belongs in *sāmānyañ=cha* (l. 30), while in other cases it is generally changed into an *anusvāra*. The letters *tri* in °*tridaśaguru*° (l. 6), and *tri* in *triṇavad*° (l. 7) are both wrong and should be corrected by a reciprocal interchange. Consonants conjunct with the *rēpha* are generally doubled (according to *Pāṇini* VIII, 4. 46) except in the case of sibilants, *e.g. darśayitā* (l. 11), and *varsha* (l. 33). When the letter *dh* is conjunct with *ya*, the unaspirated *d* is also prefixed, *e.g.* °*pādānuddhyāta* (ll. 12-13), in °*saṁbaddhyamānakān* (l. 18), and in °*svāddhyāya*° (ll. 19-20). The double *ṇṇa* is written as *ṇna* in °*chandrārkārṇnava*° (l. 28). The sign of *jihvāmūlīya*, which, in form, is just the letter *m*, is written conjunct with *kh* in l. 16, and *k* in l. 17, and to the group so formed the vowel signs of *i* in the first case, and of *u* in the second are added in the way usual with other conjunct letters. These are the only two occasions for this sign in the whole of this inscription, but while there are about half a dozen cases where the *upadhmānīya* symbol may be expected, it is written only twice in conjunction with *p* in *mātāpitrōḥpuṇyāpyāyanāya*, l. 19, and *sīdhuḥpunarādadīta*, l. 33. This sign is like the letter *chh*. Final *t* is denoted by the usual sign for the syllable *ta* with a slight stroke at the top slanting to the right.

[1] *Ind. Ant.*, Vol. IX. p. 237, *et seq.*

This inscription is one of the *Paramamāhēśvara* **śrī-Śīlāditya I.** *alias* **Dharmāditya,** the son of **śrī-Dharasēna,** and grandson of **śrī-Guhasēna** who belonged to the royal family founded by **Bhaṭārkka.** It is dated in the year **286 (A.D. 605)** on the **8th day of the dark half of Āshāḍha.** The date furnishes the numerical symbols for 200, 80, 6, and 8. The preamble of this grant, including the description of each one of the kings, is, as is quite natural, exactly the same as that of the grant of 290, referred to above.[1] A comparison of the copper-plate records of the family shows that Śīlāditya I. was the first king who omitted the names of the kings intervening between Bhaṭārkka, the founder, and Guhasēna, the grandfather of the present donor,—a practice which was subsequently adopted in all the later grants of this family.

The subjoined inscription records the gift of a village called **Bhōṇḍānaka,** situated within the provincial limits of **Vaṭanagara.** I am not certain whether this Vaṭanagara is the same as Vaḍnagar in the Baroda State, or is the Vaṭapadra which Dr. Bühler took to be the modern Vaḍōdrā or Baroda.[2] In any case, the village cannot be identified. The gift was made to forty-four Brāhmaṇas who had emigrated from **Saṁgapurī,** which is believed to be the same as the present **Shahāpūr** near Junāgaḍh. The cause of the immigration is not recorded. Probably they were induced to settle in this place by the present gift.

The names of the Brāhmaṇas are curious. Some look like surnames or family names, while others are clearly the names of particular individuals. The name Boppasvāmi may show that he was very likely a Tailaṅga Brāhmaṇa.[3] Some are Prākṛit forms of Sanskṛit names, *e.g. Khanda=Skanda, Sīha=Siṁha, Naṭṭaka=Nartaka, Gōvaśarmmā=Gōpaśarmmā,* as also *Bhaṭṭi* which seems to be derived from *Bhartṛi.* The last name is familiar as the one borne also by the author of the *Bhaṭṭi-kāvya.* It is probable that the names Bappaṭaka, Nāvuvaka, Khokkhaka, Giṁjaka, and Goggaka are also similar in origin, though I am unable to suggest the precise derivation.[4] Other names are pure Sanskṛit. *Vatsa* is a gōtra or family name of several Brāhmaṇas even at present. The names Drōṇa, Bhaṭṭi, Āditya, Bhadra, Bappaṭaka and Gōpa appear to belong to more persons than one among the donees of the present grant, and hence the individual of the same name subsequently mentioned is distinguished from the first named person, by prefixing *dvi, tri* as may be required. The prefixes mean, I believe, the second and the third.[5]

The following officials are mentioned in the grant :—

(*a*) *Āyuktaka.*—This word appears to be very old being found in Pāṇini II. 3, 40, where it signifies a person appointed to some small work of a special character, and from the nature of the example given in the *Kaumudi* to illustrate the rule, it seems probable that these may be Brāhmaṇas employed for religious or charitable purposes, such as the *pūjāris* or the worshippers at temples, *etc.*, or the *āśritas, i.e.* the learned men patronised by the king for holy merit.

---

[1] [The text follows more closely the Walā plates of Śīlāditya I. dated in Gupta-Saṁvat 286.—Ed.]

[2] The fact that the grant of 290 records the names of several villages ending in *ānaka,* gives greater probability to the second alternative. The fame, however, of Vaḍnagar as an early residence of Brāhmaṇas is yet preserved in the name of the local caste of Brāhmaṇas, and hence one feels inclined to the first supposition. I cannot decide the matter for want of more accurate information.

[3] Compare the name of Bōpadēva, the grammarian.

[4] It is not unlikely that they are derived from the names of the villages to which their families originally belonged. The name *Guhilābhaṭṭi* (l. 20) may be traced to Gohilwad-prānta of Kāṭhiāwāḍ.

[5] This leads to the inference that these may be family names. It is worthy of remark that among these names we recognise two of the modern ones of the Kōkaṇastha families, *viz.* Bāpaṭ and Bhānu. These are now met with only amongst the so-called Dakshiṇī Brāhmaṇas and I believe are not to be found amongst the original residents of Gujarāt or Kāṭhiāwāḍ at present. [In later inscriptions, *e.g.*, the Māndhātā plates (above, Vol. IX, p.106), the abbreviations *dvi* and *tri* stand for *dvivēda* and *trivēda.*—H. K. S.]

(*b*) *Viniyuktaka.*—This may be the officer in charge of the village as *pāṭīl* (the headman), *kuḷakarṇī* (the clerk of the village) or some such village officer.

(*c*) *Drāṅgika.*—The word *draṅga* means 'a town,' and *drāṅgika* may denote a town officer or merely an inhabitant of it.

(*d*) *Mahattara.*—This is often used to signify men of special respectability in a place, such as the heads of particular communities. It is also possible that this may form one word with the previous one and the two together may then mean 'the respectable inhabitants of the town.'

(*e*) *Chāṭa.*—Monier Williams' Dictionary raises the query whether this should properly be *chāra* (a spy). As, however, the word occurs in this form in almost all the grants of this family, this explanation is not tenable. Dr. Bühler renders it by 'fortune-teller' (*Ind. Ant.* Vol. IV. p. 106, note) though he is not certain of it. Yājñavalkya speaks[1] of *chāṭas* along with thieves, etc., as men who are likely to be injurious to the public. In *Mṛichchhakaṭikā*, Act V, the friend of the hero remarks in Prākṛit that "even dogs won't go to a place where the châṭas, courtesans, *etc.* reside" (Bombay Sanskrit series, Vol. I, p. 223, line 63). The similarity in sound with *chāṭu*, 'flattery' which this word presents is so close as to lead one to translate the word by 'flatterer'; and the word may in that case denote the attendants of the king who are very likely to misuse their position by being harmful to others. Or they may be the servants whose duty is to sing the praises of the king and his forefathers. [For other explanations of the term *chāṭa*, see above, Vol. IX, p. 284, note 10, and p. 296.—Ed.]

(*f*) *Bhaṭa* means 'a soldier.' Perhaps the word is connected with *Bhāṭa*—the herald attendant on a king, whose duty is to sing his praises.

(*g*) *Kumārāmātyas* is rendered by Dr. Bühler as 'the princes and ministers' (*Ind. Ant.*, Vol. IV, p. 175). As, however, the word *rājasthānīya* occurs before the expression under consideration, I believe it should be rendered as one word by 'the princes, the noble lords of *Rājasthāna*.' Dr. Bühler, however, translates the epithet as 'representing royalty.' The princes of the royal blood are even now given the epithet of *kumāra*, and I believe in old times they formed a council of the nobles, and were consulted by the ruling chiefs on points of imperial importance. [For a different explanation of the word *kumārāmātya*, see above, Vol. X, p. 50, note 2.—Ed.]

The requirements of a formal *śāsana* include also an accurate description of the granted land, which should be declared as given free of all dues for ever. The subjoined attributes of the word *grāma*, should accordingly be interpreted as supplying these requirements :—

*sōdrangaḥ.*—The word *udraṅga* is given in the Petersburg Dictionary as a synonym of *draṅga* (a town) and hence this adjective of *grāma* may be rendered by 'together with the hamlets.'

*sōparikaraḥ.*—Possibly means 'together with its appurtenances' as timber, trees, *etc.* standing on the land. Drs. Bühler and Fleet, however, suggest that all these attributes signify different sorts of land and other revenue. In that case, this adjective may mean 'together with municipal taxes levied on tradesmen, etc. for the management of the town' in accordance with Manu VII, 137.[2] It appears to

[1] चाटतस्करदुर्वृत्तसाहसाद्दसिकादिभिः ।
पीड्यमानाः प्रजा रक्षेत्कायस्थेश्च विशेषतः ॥ Yāj. Sm. I. 334-5.

[2] यत्किंचिदपि वर्षस्य दापयेत्करसंज्ञितम् ।
व्यवहारेण जीवन्तं राजा राष्ट्रे पृथग्जनम् ॥

me, however, that all such dues accruing from the village are mentioned by the adjective *sadhānyahiraṇyādēyaḥ*. Hence it seems preferable to take the first three adjectives as referring to the description of the gift.

*savātabhūtapratyāyaḥ*.—Several grants read °*pratyayaḥ* instead of *pratyāyaḥ*. The meaning of both seems to be nearly the same. The compound word may be translated by 'as determined by wind and other marks of the limits of a place.' I am told that this word is actually used in the *Narmadāmāhātmya* to signify the extent of the region on either bank as belonging to the Narmadā, where the distinctive breeze from the river is recognised. The boundary marks are, broadly speaking, described by Nārada,[1] quoted in many other *smṛitis*, as fivefold: *viz.* (1) huge trees or mountains; (2) rivers or tanks, (3) underground signs, (4) artificial marks made by men, and (5) by the order of the king. It is, I believe, to all these that this adjective refers. See, however, Dr. Bühler's note on the word (*Ind. Ant.* Vol. IV. p. 106). He understands the word as referring to certain dues from the village. Dr. Fleet also, in his *Gupta Inscriptions*, p. 170, note 9, appears to agree with Dr. Bühler.

*sadhānyahiraṇyādēyaḥ* is clearly 'together with the revenues in grain and gold.'

*sadaśāparādhaḥ*—'with the right to the fines for the ten offences,' see *Gupta Inscriptions*, p. 189, note 4.

*sōtpadyamānavishṭiḥ*.—*vishṭi* yields *vēṭha* in Marāṭhī. The adjective means 'with the right to forced labour as occasion for it occurs' as prescribed by Manu VII, 138.[2]

*ahastapraksḥēpaṇīyaḥ*.—This word is equivalent to the Marāṭhī idiom *hāta ghālaṇē* (lit. to put one's hand in a matter). The phrase, therefore, should be rendered 'not to be meddled with' by any of the royal officers.

*bhûmichchhidranyāyēna*.—'according to the principle of a hole in the earth.' This popular maxim is variously explained by Dr. Bhandarkar (*Ind. Ant.* Vol. I. p. 46) and by Dr. Bühler (*ibid.* Vol. IV. p. 106, note). In the uncertainty thus caused I may propose a third explanation. The word usually occurs after *pūrvapratta-dēvabrahmadēyavarjitaḥ*, though sometimes without it, and is to be connected grammatically with *nisṛishṭaḥ* that follows. It appears from this that both these words signify the reservations from the gift. The previous attribute having reserved the gifts to temples or Brāhmaṇas previously made, this word seems to reserve the right of the grantor to the mineral resources and treasure-trove, *etc.* The right of the king to these[3] is always urged against a gift unless it is expressly transferred. The word, therefore, may reserve this right in favour of the royal donor in spite of the gift of the land.

The word *dūtaka* (l. 34) is translated by some as 'messenger.' Seeing, however, that in several cases, princes of the royal blood are styled in this manner, I believe this must be a responsible officer who had to attest such *śāsanas* as required by the Smṛitis. In Manu VII, 63-5 the *dūta* is spoken of as a chief minister in special confidence with the king. His counsel was always sought on matters of utmost importance like peace and war. The word, therefore, should

[1] वृक्षिणौ सरितश्चैव नैधानी भयवर्जिता।
राजशासननीता च सीमा पञ्चविधा स्मृता॥

[2] कारुकान् शिल्पिनश्चैव शूद्रांश्चात्मोपजीविनः।
एकैकं कारयेत्कर्म मासि मासि महीपतिः॥

[3] See Ânandarâmâyaṇa, Sârakâṇḍa III, 264.
यद्भूम्यां वर्तते वित्तं तद्भूपस्य न संशयः।

be translated with Dr. Bhandarkar as 'the minister, the executive officer.' In this sense the word may perhaps be derived from द्वितीय, a joint officer.[1]

The word *divirapati*[2] seems to signify the head-clerk or at the most the chief secretary of the king. According to the Smritis, a *śāsana* had to be in the handwriting of the clerk whose business was to draft the important orders of peace and war; so it must be such an officer who is spoken of as *divirapati*.

[1] See also Dr. Fleet's *Gupta Inscriptions*, page 100, note 3.

[2] It is interesting to note that this word *divira* presents a close similarity to the word *dabira*, and is possibly a Sanskritised form of the latter. *Dabira*, I learn, is an Arabic word meaning 'manager' or 'secretary.' It was the official name of one of the eight ministers of Shivāji and is equivalent to the title *sumanta* of Sanskrit origin. This officer was very much the same as a "foreign secretary" and had charge of all the records concerning treaties, etc. with foreign powers.

[3] Expressed by a symbol.

[4] For the position, etc. of this city, see *Gupta Inscriptions*, p. 165, and note.

[5] For *Maitrakas* see *Ind. Ant.* Vol. XV. p. 361, note.

[6] For °*sampanna*° here and in later grants; the earlier reading is °*sapatna*°, on which see Dr. Hultzsch's interesting remarks in Vol. III, p. 319, above.

[7] For °*prahāra*° here and in later grants; the earlier ones of the same family read °*samprahāra*°.

[7a] Read °सत्व°.

[8] Read °संहति°.

[9] The word *dhairyya* does not occur in this compound in any of the Valabhī grants except the present one, the grant of 290, and that of Dharasēna II. (*Ind. Ant.* Vol. VII. p. 71). In its absence the word *adrirāja* in the following compound means *Himālaya*, but when the word occurs, the phrase *adrirāja* has to be split into two to correspond to the two qualities *sthairyya* and *dhairyya*. In that case *adri* may mean any mountain as a type of steadiness (*sthairyya*) and *rāja* may perhaps denote *Dharmarāja* as a type of courage (*dhairyya*), as suggested by his name *Yudhishṭhira*.

[10] Read °शुभाङ्ग°.

[11] Read °त्रिदशगुरु°.

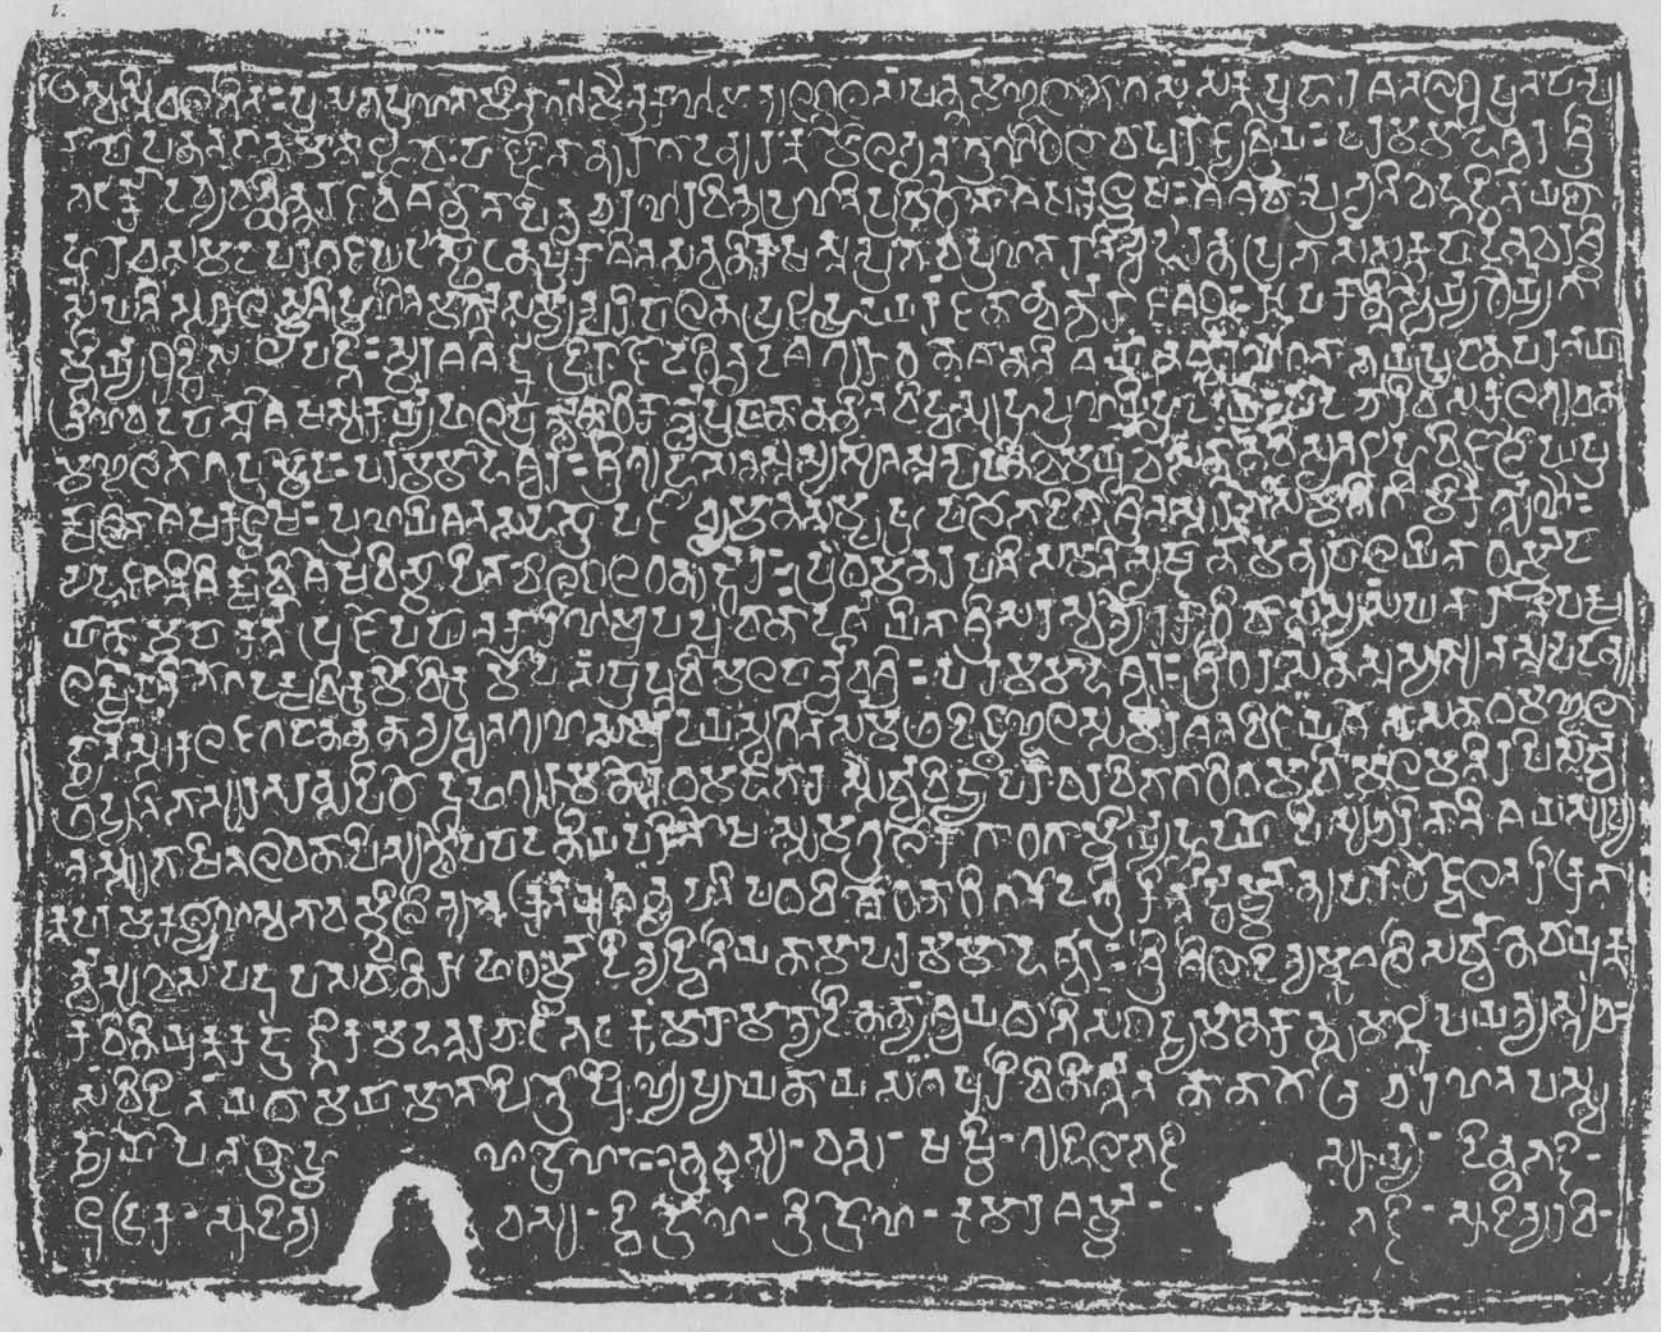

[12] Read °तृणवद°.

[13] Read फलः. The reading *phala* is also found in other grants.

[14] Read °त्सुहृत्प्रणयि°.

[15] *Pādachār=iva* means 'personified as it were'; *cf.* प्रकटस्येव धर्मस्य प्रसादो मूर्तिसंचरः; *Uttararāmacharita*, VI. 10.

[1] More properly [5] चत्वारिंशते.

[2] Read °विष्टिस्तु° or °विष्टिकस्तु, according to several other grants.

[3] Read °र्ण्णव°.

[4] This verse is introduced in the grant of 290 by the words *uktaṁ cha bhagavatā Vēdavyāsēna Vyāsēna.*

[5] The metre is *Upajāti* made up of *Upēndravajrā* and *Indravajrā.*

[6] For *mōdēta* many other grants read *mōdati*, but we have got *vasati* instead in the Smriti passages where it occurs.

[7] The original clearly reads the name as *Vatrabhaṭṭinā*, which does not make any sense. The grant of 290 reads Chandrabhaṭṭinā instead which perhaps is the proper spelling of the name. It should be noted, however, that Dr. Bhandarkar's plate (*Ind. Ant.* Vol. I. p. 17) also appears to read the name as Vatrabhaṭṭi which the Doctor reads as Vashabhata, as it does not look quite clear at the place.

[8] [The symbol here corresponds to the symbol at the beginning and may be read *ōṁ.*—H.K.S.]

## No. 18.—BANSWARA PLATES OF BHOJADEVA; [VIKRAMA-]SAMVAT 1076.

By Professor E. Hultzsch, Ph.D.; Halle (Saale).

Although the approximate period of the reign of the **Paramāra** king **Bhōjadēva of Dhārā** is settled from references in contemporary literature,[1] the only inscription of his time which had been discovered so far was the Ujjain copper-plate grant of **Sunday, 24th December, A.D. 1021.**[2] The copper-plate inscription now published is dated about two years earlier, *viz.* in the **[Vikrama] year 1076, on the 5th** *tithi* **of the bright fortnight of Māgha** (l. 31). The date of the grant was the **anniversary of the conquest of Koṅkaṇa** (l. 10). It follows from this that Bhōjadēva had undertaken an expedition into the Koṅkaṇ either in Saṁvat 1075 or in one of the years preceding it.

The subjoined transcript is based on an ink-impression prepared by Pandit Gaurishankar H. Ojha, Superintendent, Rajputana Museum, Ajmer, and transmitted to me by Rai Bahadur V. Venkayya. I have received no description of the original, which was found in the possession of the widow of a *ṭhaṭhērā* (copper-smith) living at **Banswara.**[3] But as the impression shows two ring-holes at the bottom of the first side and at the top of the second side, it may be presumed that the inscription is engraved on **two copper-plates** which are held together by two rings and measure $13\frac{1}{4}$ inches in breadth and $9\frac{7}{8}$ inches in height. The inscribed side of the second plate bears at its bottom in a rectangular border (before lines 28 to 32) a flying figure of **Garuḍa**, facing the proper left and carrying a snake in his left arm.

The **alphabet** is **Nāgarī** of the same type as in the Ujjain plates.[4] The *avagraha* is used, improperly, for marking the elision of a short *a* after a long *ā* in ll. 10 and 22. The consonant ष is expressed by ष throughout. Once श is wrongly replaced by ष,[5] and ष by श in four cases.[6] The gerund चुद्ध्वा is twice spelt चुध्वा.[7]

The document is drawn up in **Sanskṛit** prose mixed with verses which are nine in number. Excepting the different date and the particulars of the donee and the object granted, the new grant is practically identical with the Ujjain plates. A short abstract of it will therefore be sufficient for all purposes.

After two verses invoking the god Śiva (*Vyōmakēśa*, v. 1, or *Smarārāti*, v. 2), **Bhōjadēva**, successor of **Sindhurājadēva**, successor of **Vākpatirājadēva**, successor of **Sīyakadēva** informs all royal officers coming to **Vaṭapadraka** included in the **Ghāghradōra** district (*bhōga*) of the **Sthalī** province (*maṇḍala*) and the Brāhmaṇas and other inhabitants, that, **at the anniversary of the conquest of Koṅkaṇa**, having bathed and worshipped Śiva (*Bhavānīpati*, l. 10), he granted 100 *nivartanas* (in words and figures, l. 16) of land in the above-mentioned village (*viz.* Vaṭapadraka) to the Brāhmaṇa Bhāīla, son of Vāmana, of the Vasishṭha *gōtra* and the Vāji-Mādhyaṁdina *śākhā*, whose ancestors had emigrated from **Chhiñchhā** city (*sthāna*, l. 18).[8]

---

[1] See Bühler's remarks in Vol. I. pp. 230-233, above.

[2] Published, with English translation, by N. J. Kirtane, *Ind. Ant.* Vol. VI. p. 53 ff. The date was calculated by Kielhorn, *id.* Vol. XIX. p. 361, No. 169.

[3] This fact is very suggestive. If the copper-smith had not died, and if Mr. Ojha had not rescued the copper-plates from his widow, they would have shared the fate of many of their fellows, *viz.* the conversion into copper vessels.

[4] See the lithograph, *Ind. Ant.* Vol. VI. pp. 53 and 54. Instead of °विनिर्गतराधसुर° (l. 2 f. of plate ii) we may have to read विनिर्गत (ll) भूसुर°.

[5] See note 3 on p. 183.

[6] See notes 6 and 11 on p. 183.

[7] See notes 6 and 9 on p. 182, and 2 and 5 on p. 183.

[8] Cf. *Chiṁcha-kshētra*, above, Vol. IV. p. 207, text line 29.

Line 31 contains the date: **Samvat 1076 Māgha śu di 5.** A facsimile of the royal signature: "this (is) the own hand of śrī-Bhōjadēva" is affixed at the end of either plate (ll. 15 and 32).

The date does not include any details which admit of actual verification. But Dr. Fleet tells me that, with the year 1076 taken as expired, as in the Ujjain record, the details which are given take us to **3rd January, A.D. 1020.** The localities named in the grant cannot be identified, because there is no clue as to the exact neighbourhood in which we are to look for them, and because enough of them are not mentioned.

## No. 19.—THE SIRPUR STONE INSCRIPTION OF THE TIME OF MAHASIVA-GUPTA.[1]

By Rai Bahadur Hira Lal, B.A., Nagpur.

Sirpur is a small village on the right bank of the Mahānadī in the Mahāsamunda tahsīl of the Raipur District in the Central Provinces. It is 37 miles north-east of Raipur and 15 miles from Ārang. Sirpur was once the capital of **Mahā-Kōsala**[2] and was then known as **Śrīpura**,[3] as given in the stone inscriptions found there, and also in the copper plates found in Rājim[4] and Baloda.[5] The ruins in and around the village indicate that it was once a great city and there are scores of temple sites, the identification of which is now rendered impossible by the removal of the idols they contained to a place near a brick temple, which is the only one now standing as it was originally built. It is popularly known as the 'Lakshmaṇa temple.' Writing of the bricks with which it is built, Mr. Cousens who visited it in 1904 remarked[6] that they were of a finer make than any he had till then seen, either ancient or modern. They are moulded and carved with considerable artistic skill. About a third of the temple tower was gone, while the *maṇḍapa* had totally collapsed and was a heap of ruins when it was taken under Government conservation. It was while removing the *debris* of this *maṇḍapa* that the subjoined inscription was found and removed to the Raipur Museum where it is at present deposited. Sir A. Cunningham visited Sirpur in 1881-82 and noticed all the inscriptions he found there, remarking that *one of them* must belong to this temple. He was right in supposing that the temple must have had some inscription but it had not come to light then and it was about 2 years[7] ago that it was accidentally discovered.

It is perhaps the biggest inscription yet found in Sirpur. It is engraved on a thick reddish stone, which is not exactly rectangular, the breadth of the upper corner being 3′ 8½″ and that of the lower 3′ 9″, while the height at the right side is 2′ 3½″ and at the left 2′ 1½″. The writing covers a space 3′ 8″ by 2′ 1″. There are altogether 26 lines of writing, but some parts of the stone coming in contact with others have peeled off, and portions of lines 3, 4, 5, 6 at the left hand top corner and the last 4 lines have been partially damaged. The **characters** are **Nāgarī**, beautifully engraved, their average height being ¼″. They belong to the Northern class of alphabets of about the 8th or 9th century A.D. The most noticeable peculiarities are the antiquated forms of the letters *i*, *ṇa*, *sa*, *dha*, *tha*, *bha* and *ja*. The *mātrā* of *ā* is represented by a top stroke, and *ē* by a small stroke prefixed to the letter. The sign of *u* is added in the middle of the letter *ra* as usual, but when made long it is bent upwards as in *gurūpacharaṇē* in line 7 and *-rūpaiḥ* in line 12. In the case of the short *ru* in Purushōttama in line 1, the bend is upwards instead of downwards, but this is probably a mistake as other short *rus* have it in the usual way downwards. The signs for *ñ* and *ṇ* when joined to a class letter appear to be identical: compare *puñja* in line 1 and *maṇḍanam* in line 12. Forms of final *m* occur in ll. 4, 11, 12, 13 and 14 and of *t* and *n* in ll. 6 and 16 respectively.[8] The **language** is excellent **Sanskṛit**, highly rhetorical, containing 42 verses in various metres.

The record consists of two parts, *viz.* a eulogy in 23 verses and rules for the temple management from line 16 to the end. The inscription begins with an invocation to Purushōttama, which is in prose. The first three verses are devoted to the praise of the Nṛisiṁha or man-lion incarnation of Vishṇu. King **Mahāśivagupta**, his mother and two ancestors

[1] [This paper was partially prepared for the Press by Dr. Sten Konow when he was Government Epigraphist in 1908 and by Mr. H. Krishna Sastri when he officiated in that post for two months, from 17th July to 17th September 1911.—Ed.]

[7] That is calculating from the date this article was given for publication in 1908.

[8] [Final *n* occurs in line 6 also.—Ed.]

(father and grandfather), are next mentioned. The historical information which is here furnished is that, in the lunar race, there was a hero whose name is illegible (v. 4). His son was **Harshagupta** (v. 9). From him was born **Mahāśivagupta** (v. 12) who was also known as **Bālārjuna** owing to his proficiency in the use of arms (v. 13). He apparently had a younger brother named **Raṇakēsarin** (v. 12). We are then informed that his mother, named **Vāsaṭā** (v. 15), was the daughter of **Sūryavarmā**, king of **Magadha** (v. 16). She became a widow (v. 17) and caused to be constructed a temple of Hari (v. 20), the same to which this inscription was affixed. She and her acts are praised in seven verses (vv. 17 to 23).

The writer of this eulogy who calls himself *praśastikāraḥ kaviḥ* was **Chintāturāṅka Īśāna** (v. 24)[1], who in the second part proceeds to lay down the regulations for the management of the temple as follows:—Five villages, *viz.* **Tōḍaṅkaṇa, Madhuvēḍha, Nālipadra, Kurapadra,** and **Vāṇapadra,** were given (v. 25) for the maintenance of the temple to which apparently a *sattra* or an almshouse was attached. The villages were divided into four shares, three of which (subdivided into three separate parts) were to be reserved for the maintenance of the almshouse, repairs (to the temple) and for the support of the servants attached to the sanctuary (v. 26). The fourth share was divided into fifteen parts, of which twelve were to be enjoyed by a corresponding number of Brāhmaṇas fully conversant with the Vēdas, each of the three Vēdas (Rik, Yajus and Sāman) having four experts. The remaining three parts were to be enjoyed by a sacrificial priest and two others who were Bhāgavatas.[2] The names of these fifteen persons are duly recorded and it is enjoined that their descendants should inherit the gift if properly qualified for it, otherwise the grant should go to some other relatives by their own selection and not by order of the king (vv. 27 to 34). An additional village named **Vargullaka** is stated to have been given separately to the god himself, for meeting the expenses of offerings to him (v. 36). The engraver was a certain **Ārya Goṇṇa** (v. 35), the same who wrote the slab built flat into the pavement of the new work outside the court wall of the Gandhēśvara temple at Sirpur.[3]

Like other inscriptions of Sirpur this is also undated, and therefore its age can only be determined from its characters, which, as stated before, belong to the 8th or 9th century A.D. Mahāśivagupta who is mentioned in almost all the inscriptions so far found in Sirpur, seems to have been a temple-builder, or at least he encouraged others to build them. Apparently he was a Śaiva, although his mother was a Vaishṇava and so was his father who is described in verse 20 as *upāsitāchyutaḥ*, i.e. by whom Vishṇu was worshipped. From an inscription[4] in the temple of Gandhēśvara (correctly Gandharvēśvara as given in an inscription affixed to the parapet there) we know five ancestors of Mahāśivagupta, so that our inscription gives no additional information about the family, as it only takes us back to his grandfather. But verse 6 leads us to the important inference that **Mahāśivagupta's grandfather [Chandragupta]** had an elder brother who was the king's commander in chief. This elder brother cannot I suppose be any other than the **Tīvaradēva** of the Rājim and Balōdā plates. He was the son of **Nannadēva,** Chandragupta's father. Tivaradēva's inscriptions were issued from Śrīpura and he is described as being the 'supreme lord of **Kōsala**'.[5] He had apparently no issue and his brother probably succeeded him. A second historical fact to be gleaned from our inscription is the discovery of one additional name in the line of Varmā kings of Magadha, *viz.* **Sūryavarmā** who must have flourished about the 8th century A.D. He apparently belonged to the **Western Magadha** dynasty. He must have been a contemporary of Chandragupta, to whose son Harshagupta he gave his daughter in marriage.

Attention may be called to the name Raṇakēsarin (in verse 12) who would appear to have been a younger brother of Mahāśivagupta, although the word has been used in a double sense. Dr. Kielhorn[6] has drawn attention to this name with a view to show that names

[1] [The name intended seems to be Īśāna *alias* Chintātura.—H. K. S.]

[2] [That these three parts were to be so disposed of, is implied. It is not clearly expressed in the text of the inscription.—Ed.]

[3] *Progress Report* of the Archæological Survey of Western India, 1904, p. 50.

[4] *Ind. Ant.* Vol. XVIII. p. 179. [5] Fleet's *Gupta Inscriptions*, p. 396. [6] Above, Vol. IV. p. 287.

ending in Kēsarin were not foreign to this family as a curious coincidence between the Sirpur kings and the Orissa Kēsarī family. The second name of **Bhavadēva** who, Dr. Kielhorn says,[1] was 'a cousin of Indrabala's son Nannadēva, the father of both Tīvaradēva and Chandragupta,' was also Raṇakēsarin, but we meet it in the direct line here. In spite of the overwhelming palæographic evidence[2] which tends to disprove any connection between the Sirpur dynasty and that of the **Sōmavaṁśī kings of Kaṭak** (or more correctly of **Vinītapura** or **Yayātinagara**), in both of which a Śivagupta occurs, it seems possible that General Cunningham may still prove to have been right in linking them together, although the dates assigned to them by him are all wrong.[3] The kings of Sirpur appear to have been ousted by the **kings of Śarabhapura**,[4] which place has not been identified as yet.[5] The inscriptions of the latter have been found in the country round about and in close vicinity of Sirpur, *viz.* at Ārang, Raipur, Khariār and Sārangarh which enclose Sirpur from all directions, north, south, east and west. I have already identified several of the villages mentioned in them (see above, Vol. IX. p. 283) and their position shows that a very large portion of the present Chhattīsgarh Division came under their sway. Probably they could not conquer the whole of **Mahā-Kōsala** which extended from the confines of Berār to the boundary of the Kaṭak District. The Sirpur dynasty having been driven further east settled in some place on the bank of the Mahānadi. They still continued to rule at least a part of Kōsala. That seems to be the reason why they continued to call themselves 'Lord of Kōsala' unwilling to show a reduced front. They had probably lost the western portion of Mahā-Kōsala for ever, and that seems to be the reason why most of the villages granted by them are situated in the Sambalpur District and the adjoining feudatory states of Paṭnā and Sonpur.[6] The Sirpur dynasty probably regained its former power but could not regain the lost kingdom, as although the Śarabhapura kings seem to have fallen as quickly as they rose, they were succeeded by another rising power, the **Haihayas** of **Tummāṇa**, who eclipsed the chiefs of the whole of Chhattisgarh and extended their dominions still farther.

Dr. Fleet assigns the characters of the records of the Sōmavaṁśī kings of Kaṭak to the eleventh century and says that even if a somewhat earlier period than what has been arrived at, should be hereafter established for Śivagupta and his successors of the Kaṭak line, the palæographic changes in so many details appear more than can possibly be covered by the lapse of a single generation.[7] His conclusion is that the kings mentioned in these inscriptions 'are to be placed somewhere between A.D. 1000 and 1100.'[8] Since the characters of the Sirpur inscriptions are believed to belong to about the 9th century, it would appear that Dr. Fleet would place an interval of a little more than 100 years to account for the palæographic difficulties. This is a period which may easily be covered by three generations, and on examining the genealogical table made out from the records of the Sōmavaṁśī kings as given by Dr. Fleet,[9] it seems to me that a link of two generations is at present missing, which further discoveries might bring to light.

[1] *J. R. A. S.* 1905, p. 622. [2] Above, Vol. III. p. 333.

[3] [The date assigned by Prof. Kielhorn to Śivagupta Bālārjuna on the 'amalgamated Sirpur and Kaṭak Gupta dynasty' is about the beginning of the 9th century, while the Kaṭak king Mahābhavagupta II. and his three predecessors belong to about the 11th century (above Vol. IV. p. 257). If these two approximate dates are correct, then we would have two kings, *viz.* a doubtful Mahābhavagupta and Mahāśivagupta, of whom no records have so far been found, for about two centuries.—Ed.]

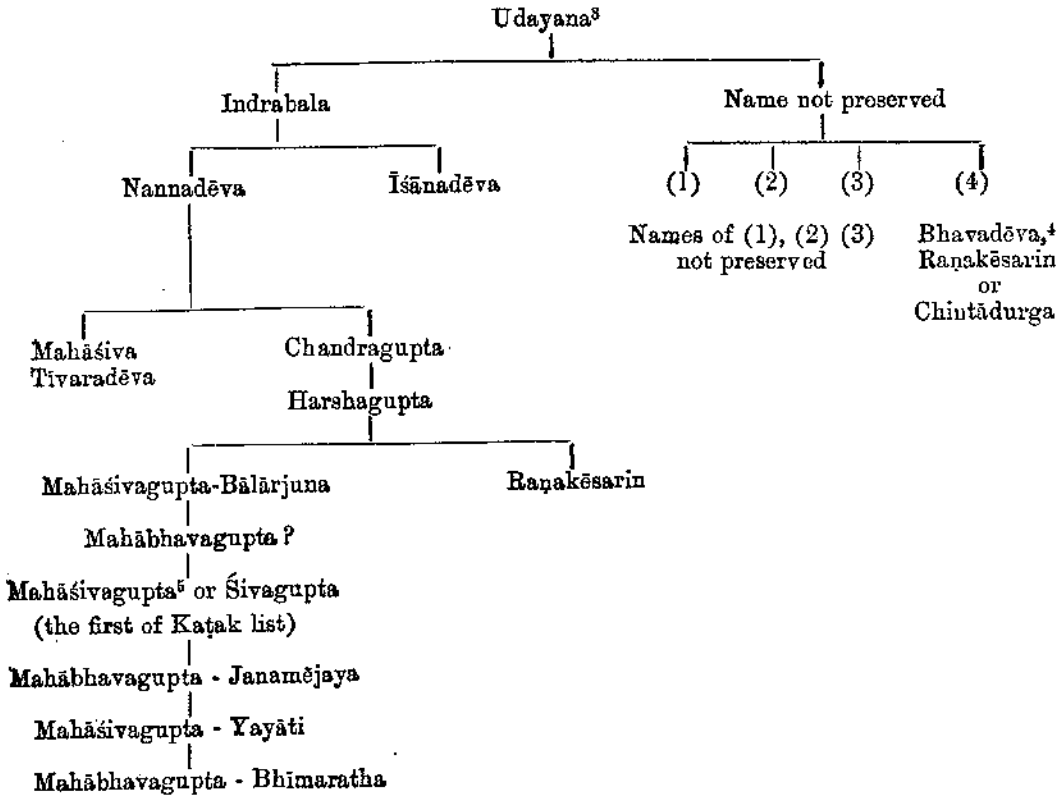

[4] [Mahāsudēva of Śarabhapura has been assigned by Mr. Hiralal to about the 8th century (above, Vol. IX. p. 283). And Tivaradēva, Prof. Kielhorn has assigned without hesitation to the middle of the 8th century. If these two approximate dates are correct, the usurpation by the Śarabhapura kings would have taken place at a time when the Sirpur kings must have been powerful.—Ed.]

[5] It may perhaps have been a new name imposed on the conquered city of Śrīpura by the victor from the fabulous animal of that name, who is believed to be a match for a lion, with reference to the claim of the Sirpur dynasty to be *Kēsarīs* (lions).

[6] See tabular statement appended at the end giving the geographical information ascertained by local enquiry or otherwise and map showing the situation of places identified.

[7] Above, Vol. III. p. 334. [8] *Ibid.* p. 333. [9] *Ibid.* p. 323.

There are four kings in this list, but there are only two names, *viz.* Śivagupta and Bhavagupta.[1] Three of them have a second name which may have been their birth-names or titles. The Śivagupta of our inscription had also a second name, *i.e.* Bālārjuna. This Bālārjuna Śivagupta may possibly be the grandfather of the titleless Śivagupta of the Kaṭak inscriptions. By the way it may be noted that his granduncle Tīvaradēva who was king was also called Mahāśiva as stated in the Balōdā and Rājim plates.[2] I suppose that the title of Harshagupta must have been Mahābhavagupta, and any further discoveries giving both the names would, I venture to think, confirm this surmise. So we can trace back the official title of Mahāśiva up to Tīvarvadēva at least and he was possibly great-great-granduncle of the first Śivagupta of the Sōmavaṁśi records. According to this view the genealogical tree of the amalgamated Sirpur and Kaṭak Gupta dynasty would be as under:—

[1] These were probably official names, assumed on installation as king, as is still done in some of the states towards Orissa; for instance, the Rāja of Bāmrā is either a Sūḍhaladēva or a Tribhuvanadēva. The present chief whose name was Satchidānanda when he was *yuvarāja*, is Tribhuvanadēva, and so was his grandfather, and his grandson will bear the same name.

[2] See above, Vol. VII. p. 103, and *Gupta Inscriptions*, p. 296.

[3] For sources of information for this genealogy, see *Ind. Ant.*, Vol. XVIII. p. 179, *J. R. A. S.* 1905, p. 621, Cousen's *Progress Report* of the Archæological Survey of Western India for 1904, p. 54, and above, Vol. III. p. 327. Note that Mahāśiva Tīvaradēva's regal uncle and his possible predecessor at least in one part of Mahā-Kōsala was a Bhavadēva, Chintādurga or Raṇakēsarin. Whether the name Bhavadēva was merely fortuitous or otherwise, I leave the reader to consider.

[4] [From the extracts given by Prof. Kielhorn (above, Vol. IV. p. 257) it appears that Bhavadēva was the fourth son of Udayana and not the fourth grandson as represented in the genealogical table. But on further examination of the inscription, Prof. Kielhorn has stated that "Bhavadēva Raṇakēsarin was the fourth son of Indrabala's younger brother whose name has not been preserved;" (J. R. A. S. for 1907, p. 621 f.—Ed.]

[5] Above, Vol. VIII. p. 140.

The Sirpur inscriptions show that Bālārjuna Mahāśivagupta must have been in a fairly prosperous state and so it was probably his son, a possible Mahābhavagupta, who was ousted from his ancestral capital. If we do not find any of his records, there is nothing to wonder at. A person in calamity driven out of his home would hardly think of bestowing grants or revel in perpetuating his name when his own position was so shaky, and his descendants would hardly be inclined to mention one who was in such a plight, it being better to omit than to record his tale of defeats.[1] For the matter of that, they might also have omitted his son Śivagupta's name as he also does not seem to have been in a much better position, but he was the direct ascendant of his renowned son, and it is possible that he might have prepared the way to the conquest of **Trikaliṅga** of which all his successors are called *adhipati*, though no such title attaches to his name in any of the inscriptions. It appears that it was **Janamējaya Mahābhavagupta (I)** who retrieved the good name of his dynasty by conquering the Trikaliṅga country. So far as is known, he was the first in his line to take the title of **Trikaliṅgādhipati**, though it was disputed by the Haihaya kings of Chēdi, as we find the title used by the Kalachuri Karṇadēva of Tripurī in his Benares plate of 1042 A.D.[2] and by other members of the same family up to 1174 A.D. But they were apparently raiders with superior power, the real rulers of Trikaliṅga being the Sōmavaṁśis. There is little doubt that these two houses came in contact with each other as in one of the Paṭnā plates (marked H) the donor claims a victory over Chēdi.

With regard to geographical names, the country of **Magadha** whence the temple builder was brought in marriage is well known. The other places mentioned are 6 villages given to the temple and its accessories. Of these, I think Karapadra is the same as **Kulapadar**, 15 miles south-east of Sirpur, and Vargulīaka is apparently **Gullū**, about 10 miles south-west of Sirpur and 5 from Ārang. Tōḍaṅkaṇa may be **Turēngā** near Kulapadar. About 4 miles from Turēngā there is a village named **Madhuban** which may be identical with Madhuvēḍha of the inscription. As regards the remaining two, Nālīpadra and Vāṇapadra, I could not find any villages answering to their names. Vāṇapadra must have been quite close to Sirpur, as it is stated to be 'on the spot'.

An endeavour has been made in the appended statement to identify places mentioned in other records of these kings, and it may not be out of place here to discuss the unsettled question of the capital of these kings. In the records of the Somavaṁśis the phrase '*śrīmatō vijaya-Kaṭakāt*' occurs which has been interpreted to mean 'from the victorious Kaṭaka', the capital, in preference to its simple meaning 'from the victorious camp'. That the latter is the real meaning clearly appears from the copper plates[3] of Mahābhavagupta Janamējaya belonging to the 3rd year of his reign (the oldest of all so far found), in which the word *skandhāvārāt* has been used instead of the usual *kaṭakāt*. It will be observed from other inscriptions that whenever *kaṭaka* is used, the name of the camp (a separate place-name) is invariably[4] given, but this is not the case when the charters purport to be issued from **Yayātinagara** or **Vinītapura**, which Dr. Fleet considers to be fanciful names of Kaṭaka itself. It has been assumed that Kaṭaka was the capital of these kings, but I am

[1] Another reason why his name is omitted may be found in the fact that all the records of this dynasty give only the name of the donor and his father in the ordinary business-like way, and since his son Śivagupta for reasons stated further on in the text probably never made a grant, it seems very doubtful whether we would ever get a direct proof of his existence.

[2] Above, Vol. II. p. 298.

[3] These plates were found some 13 years ago at Sōnpur, the capital of the state of the same name. They were shown to me when I visited that place about 12 years ago (*i.e.* 1896) and I took a copy of the inscription. [They have been published by Mr. Mazumdar (above, pp. 93 ff.).—Ed.]

[4] There is only one exception found in the Paṭna plates marked H in which Vinītapura and Kataka are both mentioned; but Mr. Laskar has noted that this record is full of mistakes and gross inaccuracies. See *J. A. S. B.* 1905, Vol. I. p. 6.

unable to share this view. The question has already been discussed by other scholars,[1] and the identification of Yayâtinagara with the modern Jâjpur has been suggested, but Dr. Fleet[2] has pointed out that this suggestion is untenable as the inscriptions distinctly imply that Yayâtinagara was on the Mahânadî, whereas Jâjpur is only on the Vaitaraṇî, about 50 miles away from the former river.

The name Yayâtinagara was apparently imposed upon Vinîtapura during the reign of Yayâti otherwise known as Mahâśivagupta. It is noteworthy that prior to his time the name Yayâtinagara does not occur in any inscriptions. In fact he himself used the older name Vinîtapura in the records of the 8th and 9th years of his reign, which fact shows that till then the idea of naming the town after himself had not occurred to him. It was probably somewhere between the 15th and 24th year of his reign that the town changed its name. Since then the official name seems to have become Yayâtinagara, and we have in all four inscriptions mentioning it, two of which belong to the 24th and 28th years of his own reign, and two to the 3rd and 13th year of his son's. This name apparently continued to be used as long as Vinîtapura was the capital, at least in official circles, but as is well known the original name usually sticks so persistently in the popular mind that it is difficult to eradicate it. Many a monarch has endeavoured to change the names of big cities after his own, but the old name has usually asserted the ground, and I suppose the same happened with Vinîtapura, which name can now be traced in the corrupted form **Binkâ**. This is a small town in the Sônpur State, 16 miles north of the present capital of that state. It fulfils all the conditions appertaining to Vinîtapura. It is on the bank of the Mahânadî, and the river scenery there is as beautiful as described in the inscriptions. From Sirpur it is about 100 miles as the crow flies and about 180 by river— quite a safe distance to which the ousted family might have removed itself. The two places are so situated that if one fled straight to the east he would meet Binkâ as the first place on the Mahânadî, as between these two places the river flows in a curve.[3] Binkâ, moreover, is central to all the camps from which the kings issued their charters. Of the 13 so far discovered, 5 were issued from the capital itself, 3 from a pleasure garden, which must have been somewhere in the big groves still to be seen on the outskirts of Binkâ, 3 were issued from **Mûrasîma** or the present **Mursingâ** in the Paṭnâ state, about 11 miles from Binkâ, one from Sônpur, and one from Vâmaṇḍâpâṭî[4] or Bâmrâ, 60 miles to the north-east, but this last was issued by a feudatory from his own head-quarters, and he has mentioned his overlord's capital as Yayâtinagara. The villages granted so far as they have been identified are situated close to and round about Binkâ as a glance on the accompanying map will show.[5] The existence of a village named Râjpâlî (meaning royal hamlet) within a mile of the present Binkâ town is significant. There are also remains of a fort close by and a ghât embankment on the Mahânadî.

---

[1] See above, Vol. VIII. p. 139 (where Professor Hultzsch prefers to take *kaṭaka* in the sense of 'a camp') and *J. A. S. B.*, 1905, Vol. I., pp. 2 and 3.

[2] Above, Vol. III. p. 355.

[3] My idea is that when Bâlârjuna's successor was driven out from Sirpur he fled straight off to the east and settled at a spot where he first met the sacred Mahânadî whose waters had sanctified generations of his ancestors. To this obscure place he in his dejection gave the appropriate name of Vinîtapura or the 'town of the humbled.' I feel this is rather fanciful, as at this distance of time it is difficult to read the motives which actuated the founder to name the town in that way, and all that can be said is, that the explanation is plausible.

[4] It may be noted that Bâmrâ is still called Bâmaṇḍâ by the Oriyâ people of Sambalpur.

[5] It is remarkable that there are amongst the donees Brâhmaṇa immigrants from Madhyadêśa and even distant Śrâvasti in Oudh. Their advent to this remote place may easily be explained by the fact that Binkâ lay, as it does now, on the high road to Jagannâth Purî, one of the four *dhâmas* or the most sacred places of India, which Hindus from all corners of the country visited as they still continue to do. Some of these learned Pandits of the celebrated district of Śrâvasti might have been induced to settle there, either by solicitations of the king or by necessity owing to the difficulty of crossing long distances for want of good communications, accentuated by the dangers of the road which was infested by robbers of all description.

## TRANSLATION.

(Line 1.) Ōm! Salutation to Purushōttama (Vishṇu).

(Verse 1.) Let the discus-holder's (*Nṛisiṁha's*[1]) foot protect you—the foot whose sharp claws emitted a sound like that of *guñjā* berries (*shaken*) by the gust of strong winds passing through the long spaces between each other, and (*looked*) terrific (more so) with the jaws shining with the flame of rays (*emanating*) from the nails, when they being lifted up, tore through the mass of dark clouds in the sky and revealed the stars with pearly brilliance, like a lion who, having overcome that storehouse of darkness,— the elephant, jumps about scattering brilliant pearls (*torn from his temples*).

(V. 2.) Let that Nṛisiṁha protect you, who looking with eagerness at (*his own*) nails, for the enemy (*Hiraṇyakaśipu*) who had not been secured for being torn with these (claws), happened to see him hiding through fear in the cavern-like cavity in the interior of the deep hollow of those (*nails*). With a laugh (*at his foolishness in taking shelter in the place where he could be easily crushed out*), joy (*at finding him out*) and contempt (*at the miserable creature*) he split the demon at once with the point of the other claw and threw him away with wrath like dirt that had collected there.

(V. 3.)[2] As if bearing the jaws like a beautiful conch and the tongue like a sword, with the face burning like the discus (*and*) with the eye-brows (*as if carrying*) the mace, this form of Vishṇu born for devouring, like sins, the demons, presented the appearance of the god of death . . . . . .

(V. 4.) There was the unequalled crest-jewel of the lunar race, whose wealth was wonderful on earth, just as the origin of the moon was miraculous and whose dignity was commensurate with his devotion to the lord of goblins (Śiva). He was indeed of manifold virtues, (*and*) famous on the earth by the name of **[Chandraguptarāja.]**

(V. 5.) This task is very difficult, this path before (me) insurmountable. I have no guide nor (*have I*) any friend (*who can*) share the burden (*with me*). I accomplish this single-handed . . . . . .

(V. 6.) Even his elder brother shining with regal power,[3] became his follower in battles and (*through him*) mighty, like him whose weapon is the plough (Balarāma), who likewise followed the killer of Kaṁsa (Kṛishṇa) in tearing up the mighty elephants of his unassailable enemy.[4]

(V. 7.) In bravery, a lion killing the elephants with (*swelling*) frontal globes,—rendered dull by the cries (*due to*) excessive rut,—with fodder placed in their mouths, or the trunks hanging down, is like a dog and cannot stand comparison with the king destroying (*his*) enemies blooming with the prosperity of their treasures, prowess, race and statesmanship.[5]

---

[1] [There seems to be a reference here not to Nṛisiṁha but to the Trivikrama-*avatār* of the god Vishṇu.—H. K. S.]

[2] The poet here seems to show that the terrific face of Nṛisiṁha bore the symbols of Vishṇu as also of Yama. The jaws being white bones were like the conch, the tongue like the sword which is also one of the weapons of Vishṇu, the round face, the discus and eye-brows the mace. Yama's attributes are projecting jaws, long tongue, red hot face and a club.

[3] [Perhaps Adhikāradhavala was a name or surname of his elder brother.—H. K. S.]

[4] [As the reading in the text is clearly °*dārṇṇēshu* (not *dāraṇēshu* as Mr. Hiralal seems to take it) the compound ending with that word is evidently an attribute of the word *raṇēshu*.—Ed.]

[5] [The passage कुम्भैरर्द्रितमल्लकानतिमदव्याहारमन्थात्मनो वक्त्रन्यक्षटणानघःकृतकरान् admits of two meanings, one applicable to the subdued kings and the other to elephants.—H. K. S.]

(V. 8.) Of him, the lord of the rulers of the earth, was born a son famous in the world (*who was*) a very treasure of jewels, (*who had*) a large number of undivided allies and (*who was*) high in character, (*thus*) resembling the high Mainâka hill which is the offspring of the lord of mountains, *viz.* the Himâdri (mountain), has extensive wings which are unclipped and is a mine of jewels.

(V. 9.) At the time of his birth, the goddess of wealth was transported with joy saying 'It is a long time since I found such a suitable place for myself.' Ever filled with joy (*harsha*) and verily inaccessible to grief he accordingly bore the name śrî **Harshagupta.**

(V. 10.) His precious days passed in enjoying all the sensuous objects, (*they were*) indefatigably applied in the path of virtue, and unceasingly (*spent*) in good assemblies; they never went fruitless (*when employed*) in the destruction of hostile power and were uninterruptedly devoted in the service of the elders. Thus they always caused wonder in (*the performance of*) many pleasing duties simultaneously.

(V. 11.) His enemies' town is hated by the spectators as the walls are crushed to powder, all the joints are separated in various ways, the limbs of the streets are also torn asunder, and on all sides there is an exhibition of dry bones. (*They exclaim*) 'what is to be seen here? How has the variegated appearance even of the entrance (*of the town*) disappeared?' Thus (*saying*) (*the spectators*) hate it like a bad drama destitute of interest even in the prologue, with torn curtains (*bhitti*), disjointed incidents, broken dialogues and dry plot.

(V. 12.) From him was born king **Mahâśivagupta** truly renowned as an incarnation of virtue (*dharmâvatâra*)[1] who conquered the earth with (*his*) younger brother **Raṇakêsarin** as did Pṛithâ's first son (Yudhishṭhira) with the aid of his younger brother Bhîma who was like a lion in battle.

(V. 13.) Indeed! greater than even his grandfather (*as he is*) he would beat even his teacher in battle with his prowess and strength; who would therefore be his vanquisher (*karttana*)? The crowd of enemies considering him **Bâlârjuna,** (to be) an all-conqueror amongst practisers of arms, gave up the hope even for their lives (*as they had done*) already for their wealth [like the foes of Arjuna (*i.e.* the sons of Dhṛitarâshṭra) who first gave up their hope for wealth when they found that young Arjuna promised to excel Bhîshma and surpass Drôṇa in prowess. What was Karṇa before him in the practice of weapons!]

(V. 14.) He who took deceptive forms for destroying the enemies, who was born black (Kṛishṇa) on this (*earth*) and who again becomes in the future also sinful (Kalki)— that Hari (Vishṇu) could not really stand comparison with him who kills his enemies without practising any deception, who bears the utmost whiteness[2] and who has no sinful motives.

(V. 15.) Of that lord of men, the conqueror in fierce battles, the illustrious **Vâsaṭâ** was the mother, like the very mane (*saṭâ*) of the man-lion form (of Vishṇu) bewildering the minds (*even*) of wise men (and of the gods), just like the mother of him who rides the peacock (Kârttikêya), the daughter of the mountain (*viz.* Pârvatî).

(V. 16.) Born in the unblemished family of the Varmans great on account of (*their*) supremacy over **Magadha,** the illustrious (and) pious king **Sûryavarmâ** who had caused trembling in the hearts of the gods by his virtuous acts, having got this daughter, obtained the very proud honour of being the father-in-law of the great lord (*Paramêśvara*) of the East, like Himâchala (who obtained before a similar honour by marrying his daughter Pârvatî to the great god (*paramêśvara*), Śiva).

---

[1] [Dharmâvatâra may have been a *birudu* of the king.—H. K. S.]

[2] [Perhaps the king had the surname Atyantadhavala.—H. K. S.]

[3] [It is worthy of note that the Śarabhapura kings Mahâjayarâja and Mahâsudêva granted villages in the Eastern country (Pûrva-râshṭra); Gupta Inscriptions, pp. 192, 195, 197 and 199.—Ed.].

(V. 17.) Even after (*her*) lord went to heaven, in spite of her always observing fasts and austerities, which cause leanness (*of the body*), her unaltered limbs retained their natural charming grace.

(V. 18.) She, like the Vēdas, was the shelter to the people belonging to the four *varṇas* (castes) and *āśramas*[1] (or) like Policy to a kingdom, like Wisdom (*herself*) in deciding between truth and falsehood, (*and*) the goddess of Wealth herself to the greedy. The spread of all sins was checked by her and the earth that was about to abandon her fidelity (*by wooing, so to speak, the Kali age*) was again reminded by her, as a friend, of the kṛita (*age*) for the sake of reunion [as a lady's maid reminds her mistress of (*her husband's*) acts to bring about a union (*between them*) when somewhat disturbed.]

(V. 19.) By whom Kali during his own regime (*i.e.* the Kali age) was dishonoured, that Kali who boasted of having access even to Damayantī[2] in olden times.

(V. 20.) By her this eternal abode of the lord Hari was caused to be made, to show exactly (*the abode Vaikuṇṭha*) where her deceased lord lived worshipping daily the imperishable (*Vishṇu in the heavens*).

(V. 21.) Oh kings! do not turn your minds to sins, seeing what has been clearly described of this wonderful world (*saṁsāra*) under the guise of the temple (*i.e.*) the diversity of acts of all creatures high and low— with cage-like bodies (*passing*) through various stages of existence—from the celestial beings (*downwards*).

(V. 22.) This itself tells the kings the appropriate fate of destruction and protection (*of charity*) by (the waving of) its flags (*tossed*) by the unsteady wind, in one moment going down, and in another rising up towards the sky.

(V. 23.) On the very bank of (*this*) ocean of the world, the great boat of *dharma* has been placed to cross it. This must be protected by kings. Neglected (*it*) would sink down.

(V. 24.) O (*future*) kings! (*Now*) listen to the perpetuation which the poet **Chintāturāṅka Īśāna**, author of the *praśasti*, submits to you for the protection of it (*i.e.* the charity).

(V. 25.) **Tōḍaṅkaṇa, Madhuvēḍha, Nālīpadra, Kurapadra** and in this place (*sthāna*) **Vāṇapadra,**— these five villages are given.

(V. 26[3].) Of these (*villages*) three shares have been divided in three ways for (*the maintenance of*) the almshouse, the repair of breaks and cracks (*in the temple*) and the support of the servants of the sanctuary (*one share being allotted for each of the purposes*).

(V. 27.) The fourth share has been divided into fifteen parts. These are (*for*) twelve Brāhmaṇas, four for each Vēda.

(V. 28.) **Brahma-Trivikrama, Arka** and another **Vishṇudēva,** as well as **Mahiradēva** (*are*) the four best learned in the Ṛigvēda.

---

[1] The Śūdras cannot study the Vēdas and have no *āśramas*.

[2] Damayantī pretended that she would remarry, thinking that hearing this news, her husband Nala would come forward and disclose himself, and although her intention was most noble, she nevertheless committed a sin by entertaining an unholy wish, and Kali thus secured a victory over this exemplary chaste lady, who was free from sin by act, thought or speech. The 19th verse alludes to this occurrence, and I am indebted to Pandit Hirananda, M.A., Officiating Principal of the Oriental College, Lahore, for pointing it out to me and for his kindness in going over the manuscript.

[3] I am indebted to Mr. Kṛishṇa Śāstrī for pointing out that खंडस्फुटित has a technical sense here. पादमूल he thinks means 'the sanctuary', both of which I have adopted in the translation.

(V. 29.) Similarly, **Kapardōpādhyāya, Bhāskara, Madhusūdana** and **Vēdagarbha** (*are*) the four fully conversant with the Yajurvēda.

(V. 30.) Again, **Bhāskaradēva, Sthirōpādhyāya, Trailōkyabaṁsa** and **Mōuḍḍha** (*are*) the four accomplished in the Sāmavēda.

(V. 31.) Their sons and grandsons (*who succeed them*) should be such as offer sacrifice to fire and know the six supplements of the Vēdas, who are not addicted to gambling, prostitutes and such other (*bad associations*), who have their mouths clean (*apiṭṭaka*) and who are not servants.

(V. 32.) If one does not answer to this description, (*he should be abandoned*); also one who dies sonless— in their places must be appointed other Brāhmaṇas possessing the foregoing qualifications.

(V. 33.) He should be their relative, advanced in age while being learned. He should be appointed by their consent alone and not by order of the king.

(V. 34.) Further, (*there are*) the Brāhmaṇa **Vāsavanandin** who at sacrifices declares holidays[1] and the two Bhāgavatas by name **Vāmana and Śrīdhara.**

(V. 35.) These fifteen parts, (*the alienation of which is*) prohibited by gift, sale and mortgage, must all be (*thus*) enjoyed by virtuous men. The writer of this is **Ārya-Goṇṇa.**

(V. 36.) The village which is on a low level[2] and is known as **Vargullaka** is separately given (*as a supplementary contribution*) for the maintenance of the almshouse, for *bali, charu* and *nivēdya* to the god.

(V. 37.) All the transactions should be performed unanimously by the principal Brāhmaṇas (resident there), and the worshippers (*pādamūla*) meeting together.

(V. 38.) Oh kings! protect this organization. Let this arrangement of mutual obligation continue (*for ever*). Alas! what indeed, will be the future of your fame!

(V. 39.) The establishment of (*the places of*) *puṇya* (*i.e. almshouses, etc.*) by those who destroy the (*deeds of*) glory of others is just like an elephant-bath (*throwing dust on one's own head*) or an axe for (*cutting one's*) feet. Therefore, seeing that riches are as fickle as the eyes of an intoxicated woman, it is better to follow the path of virtue and . . . . . .[3]

(V. 40.) He who was distinguished for the nobility of his character and family and whose name was **Kēdara,** became the helmsman of the boat of virtue in the ocean of existence for the queen and got this great receptacle of religious merit built completely.

(V. 41.) The illustrious king **Śivagupta** . . . . . the three worlds, gave to **Gōṇārya-Bhaṭṭa** . . . . .

(V. 42.) One part of this (*gift*) which is to be enjoyed by a virtuous Brāhmaṇa is reserved for one who is well read in the *Śāstras* and (*their*) commentaries, as well as the Vēdas and is of excellent character.

---

[1] [*Puṇyāha-vāchaka* (as Mr. Hiralal has read) is a priest who officiates in all auspicious ceremonies and proclaims by certain *mantras* a happy day to the ceremony and its performer.—H. K. S.]

[2] [*Tata ēva* may be more appropriately translated 'close at hand'.—H. K. S.]

[3] [Following the note 10 on page 193 above, I translate:—'O men! keep therefore (your) virtue, which is lovely as milk, unsullied'.—H. K. S.]

*Geographical names in the records of the Sōmavaṁśī kings of (Kaṭak) Viniṭapura, with identifications where ascertained.*

| Designation of the record and reference to its publication. | Place of find. | Name of place whence issued. | Villages granted. | Name of country in which the village granted was situated. | Grantee's residence and place from which he emigrated. | Remarks. |

## No. 20.—THE INSCRIPTION ON THE WARDAK VASE.

By F. E. Pargiter, M.A., I.C.S. (Retd.)

The Wardak vase or urn was found by Masson in the topes of Khawat in the district of Wardak in Afghanistan during the years 1834-7. He called the place Kohwāt and gave this description of it:—"These topes are situated on the course of the river, which, having its source in the Hazáraját, flows through Loghar into the plain east of Kabul, where it unites with the stream passing through the city. They are distant about 30 miles to the west of Kabul" (*Ariana Antiqua*, 117). The map of Kabul and its neighbourhood compiled by the Survey Department of India shows the district as "Khawat *or* Wardak," and as lying from 34 to 50 miles south-west of Kabul. Khawat therefore and not Kohwāt is the correct name of the spot where the vase was found in the Wardak district. Masson's description of the finding of the vase is this:—"There are five or six topes, strictly so called, with numerous *tumuli* ..... I found that three or four of these structures had been opened at some unknown period; and before the present Afghan inhabitants had dispossessed the former occupants, Hazáras, about one hundred years since . .. In the principal tope an internal cupola was enclosed, or rather had been .....I directed certain operations to be pursued, even with the opened topes, and pointed out a number of *tumuli* which I wished to be examined, as they were very substantially constructed: the results proved successful, in great measure, and comprised seven vases of metal and steatite, with other and various deposits. One of the brass vases was surrounded with a Bactro-Pali inscription, of which I did not take a copy, as to have done so I must have cleansed it. I was averse to take this liberty, being aware that the characters being firmly dotted in could by no chance be obliterated" (*Ariana Antiqua*, 117-8).

The inscription was copied and published in a plate, which is numbered X in E. Thomas's Edition of *Prinsep's Essays*, vol. I; and E. Thomas there says:—"I have devoted plate X to the exhibition of the inscription on the brass urn discovered in a tope about 30 miles west of Kabul in the district of Wardak. This urn, which in shape and size approximates closely to the ordinary water-vessels in use in India to this day, has originally been thickly gilt, and its surface has in consequence remained so excellently well preserved, that every puncture of the dotted legend may be satisfactorily discriminated" (*ibid*, 161-2). He tried to decipher the inscription and published his results there. Mr. E. C. Bayley then took the inquiry up but was not satisfied with his endeavours, and the elucidation was then entrusted to Babu Rajendralala Mitra. He published his rendering of the inscription together with the same plate in J. A. S. B., 1861, p. 337, to which Mr. Bayley added a note (*ibid*, p. 347). Prof. J. Dowson next undertook the decipherment of this and other records in the Kharōshṭhī character and published his results together with the same plate in J. R. A. S., 1863, vol. XX, pp. 221-68. His scrutiny left many parts of this inscription still undeciphered, and so the matter rested. Other scholars have given some attention to this inscription lately but were unable to complete the investigation.[1] Dr. Fleet then asked me in November 1910 to undertake the work, and supplied me with excellent ink-impressions. I now publish the results that I have been able to obtain.[2]

This vase is now in the British Museum, and I have inspected it and compared the ink-impressions with the inscription. The vase is 6·9 inches high and 6·6 inches broad at its

[1] See for instance M. Senart's rendering of part, Journal Asiat., sér. 8, vol. XV (1890), p. 121; and sér. 9, vol. VII (1896), p. 6: and Prof. Lüders', J. R. A. S., 1909, p. 661.

[2] I have to thank Dr. F. W. Thomas for valuable suggestions and criticisms on my results; and for the convenience of scholars I have mentioned many of them, at his desire, when they differ from my results.

widest part. Dr. Read tells me that it bears no traces of ever having been gilt, but that parts of the brass might have presented a brilliant appearance like gold, if they had been protected by remaining in contact with certain earth while buried in the tumulus.

The inscription is in the Kharōshṭhī script and consists of two portions. The first is written in three lines encircling the shoulder of the vase; and the second consisting of one line is written around the broadest part of the vase below the former and separated from it by three lines, and occupies not quite half the circumference. The first is the main portion and is in letters varying generally from $\frac{1}{4}$ to $\frac{3}{8}$ inch in height. In the fourth line or second portion the letters are about $\frac{1}{8}$ inch longer and correspondingly broad. They are formed of minute dents pricked into the metal, and the dents are so close together that from 8 to 10 are generally contained in $\frac{1}{4}$ inch in the first three lines, and from 7 to 8 in the last line.

The two plates annexed hereto, giving a facsimile of the record, have been prepared under Dr. Fleet's supervision from the ink-impressions which also were made under his direction. The shape of the part of the vase where lines 1 and 2 lie is such that ink-impressions of them cannot be made without introducing a gap at some point or another; the place selected was naturally that where the record begins, and a supplementary ink-impression was made of that part of the record and has been reproduced below the complete lines. It shows how the lines run right round the vase without any blank space in line 1, and with only a small space at the end of line 2, and gives in their complete forms the final *ti* of line 1 and the initial *i* of line 2, which are not perfect in the circular impression. To have reproduced line 3 in one piece would have entailed a somewhat cumbrous folding plate, hence it has been treated in three parts overlapping each other; thus 3-B repeats the last six syllables of 3 A, and 3 C repeats the last five syllables of 3 B and also shows at its end the *bha* with which 3 A begins. A fourth piece 3 D has been added to show how this line also practically runs quite round the vase, and contains the last seven and the first eight letters of the line.

The style of the script is that of the Kushaṇa inscriptions portrayed by Bühler in Table I of his *Indische Palæographie*, cols. x to xii. Further specimens of the script have been published lately, namely, the Taxila plate by Bühler (E. I. iv, 54), the Taxila vase by Prof. Lüders (E. I. viii, 296) and the Mathurā Lion-capital by Dr. F. W. Thomas (E. I. ix, 135). Mr. E. Thomas in discussing this inscription spoke of "the little care that has been taken to mark the nicer shades of diversity of outline which, in many cases, constitute the only essential difference between characters of but little varying form" (*Prinsep's Essays*, vol. I, p. 162). But it seems to me after a careful and detailed comparison of the letters, that the inscription has been carefully made, the letters are generally well-formed, only a few clerical errors occur, and the distinctions between letters which are similar in shape are generally expressed clearly[1] except as regards two particular letters, *y* and *ś*. For instance, *t* and *r* have the same general shape, and are fairly well distinguished, in that the downward stroke of *t* is usually of about the same length as the horizontal stroke, while in *r* it is generally about twice as long; and in only one or two places is the difference neglected. No distinction is made between long and short vowels, and the only special form that need be mentioned is *nē* in *munē* (l. 1).

The exception just referred to occurs in the letters *y* and *ś*, and these are the only letters that cause real uncertainty. Ordinarily *y* has a pointed top and *ś* a flat top, but the distinction is very far from being observed here and is indeed more often ignored; especially since sometimes the top has an intermediate roundish form and sometimes the letters are distorted by

[1] Characters should primarily be read as what they strictly appear to be, and the resultant words accepted and scrutinized. This is essential in dealing with the endless diversities in the different kinds of Prākṛit. To read characters so as to agree with the commoner forms of the Prākṛit words intended seems to be almost certain to obscure Prākṛit modifications that may be important critically and linguistically. See p. 208, note 3.

being tilted over to the right. We may confidently read *y* in *iya Khavadamri* (l. 1), and *ś* in *Śakya* and *śarira* (l. 1), *śava* (l. 3 A) and *śaphatiga* (l. 3 B); but in all other instances it is hardly possible to say positively, solely from the shape of the letter, whether it is *y* or *ś*, and regard must be had to the meaning. This is well illustrated by the word *puyae* which occurs thrice in l. 2 and once in l. 3 B. The *y* has a different shape in each of these places; in the last place it has undoubtedly the form of *ś*, and in all the other places its appearance is far more that of *ś*, than of *y*. In all these instances then what looks like *ś* is really *y*. Hence it is clear we must be prepared for similar confusion in other passages where one or other of these letters is intended, and the decision must rest mainly, if not entirely, on the sense. Thus we can read without doubt *y* in *Arṭamisiyasa* (l. 1) and in *paḍiyaṁśaṁ* (ll. 2 and 3 C); and *ś* in the words *kuśala* (l. 2), *mahiśa* (ll. 2 and 3 B) and also in *paḍiyaṁśaṁ*. There remain some words in which *y* or *ś* is combined with a vowel mark or another consonant, and, since *y* is written sometimes with a flat or rounded top, there would be nothing surprising if its top is made wide in order to find room where the vowel marks *i* and *ō* have to be inserted, so that *yi* and *yō* would then look like *śi* and *śō*. Accordingly *y* and not *ś* appears to be the correct reading in *kadalayigra* (l. 1), *paryata* (l. 3 A), *jalayuga* (l. 3 B), and *yō adra* (l. 3 A); while *ś* is right in *śōcha* (l. 2); while what looks like *asaṁśrana* (l. 4) is doubtful. These words will be discussed in the Notes *infra*.

The characters for *b* and *v* require some notice. *V* proper approximates to the character for *b*, but they are distinguished in that the top line is flat in *v* and is curved upwards on the left side in *b*. Thus we have *v* initial in *vagra* (thrice, ll. 1, 2) and *vihara* (ll. 1, 4) and medial in *bhavagra* (l. 3 A) and *avashatri* (l. 3 C); while *b* occurs in *bhradaba* (l. 2) and *nabagra* (l. 3 A); and in conformity therewith it is proper to read *b* rather than *v* in *paridhabēti* (l. 1). Another character is found for what is properly *va*, which occurs only as a medial and is evidently distinguished from *va* proper, for it is always small and without the stroke to the left at the bottom. It is used in *bhavatu* always, also in *bhagravada* (l. 1) and *parivāra* (l. 3 C), and apparently in *Khavadamri* (l. 1). This difference in shape may denote a difference in value, and this small form may perhaps have had the sound of *w*.

No distinction appears to be recognized between the letters *n* and *ṇ*. A slight difference may be perceived between the character in *imēna* (l. 1) and *mulēna* (l. 2) and that in *Hashṭuna* (l. 2) and *avashatrigana* (l. 3 C); and that constitutes the difference which Bühler has shown in his Table I, cols. x and xi; but his form of *ṇ* occurs here, not only in words where it should properly appear as in *sarvina* and *Rōhana* (l. 3 B), but also in words where it is inadmissible as in *imēna* (l. 1), *mulēna* (l. 2) and *satvana* (l. 3 A). There appears therefore to be no real distinction observed between *ṇ* and *n*, and this is what Prof. Lüders has noticed in his paper on the Taxila vase (E. I. viii, 297).

A letter that presents some difficulty is that which I read as *ḍi* in *gaḍigrēna* (l. 1) and *paḍiyaṁśaṁ* (twice ll. 2, 3 C). It is one and the same in all three places, for its form in the first and second places is identical, and, though it varies somewhat in the third place, yet it occurs there in precisely the same expression *agra bhaga paḍiyaṁśaṁ* as in the second, and must be the same in these two places.[1] Hence it must be read the same in all. It is certainly

[1] The letter has a tail or stroke to the right at the bottom; in the first two places the stroke is a straight line and in the third an upward curve. The difference seems to be intentional. In discussing the *r* stroke *infra* (p. 206) I have pointed out the difference made in it in the two portions into which the inscription must be divided, namely, the straight *r* stroke does not denote a real *r* in the first portion but does so in the second. The first two instances of this letter occur in the first portion, and its tail being made straight there like the unreal *r* could not create a misunderstanding; but in the third instance, which occurs in the second portion, that straight stroke might have suggested a real *r* stroke, and misunderstanding has been avoided by turning the tail into a curve, which has no special significance in the second portion (though it does represent a real *r* in the first portion).

not *ri*. M. Senart has taken it as *ti* and Prof. Lüders as *tri*, thus they read the word as *patiaṁśaē* and *patriyaṁśaē* respectively;[1] but I do not think it is *ti* or *tri*, because the right shoulder of the character is carried upwards far higher than in all other instances of the letter *t*,[2] and it differs from the genuine *ti* found in *paridhabētī* (l. 1), *rajatibaja*, *natigra*, *saṁbhati* (l. 2) and *śaphatiga* (l. 3B), and from the *tri* found in *avashatri* (l. 3C). There is no other letter that it resembles except *ḍ* and *ḍh*, which are figured in Bühler's Table I and in Dr. Thomas's Table IV (E. I. ix, 146). The word is evidently the same as in *agrapatiśaē* on the Mānikyāla stone, in *agrapratyaśatāyē* (E. I., i, 390, n° XVIII) and in *agrēbhāva-pratyaṁśatāyāstu* (E. I., i, 240) as noticed by M. Senart and Prof. Lüders.[3] Since this letter corresponds to the first *t* in those words, it cannot be *ḍhi* and can only be *ḍi*, which in this Prākṛit represents that *t* as will be explained (p. 208). This then is a modified or new form of *ḍ*.

A character occurs, which must apparently be a final anusvāra, in the word *paḍiyaṁśaṁ* (ll. 2, 3 C). M. Senart and Prof. Lüders have read it as *ē* as noticed above, but *ē* occurs in *bhagraē* and *puyaē* (ll. 2, 3B) and *dachhinaē* (l. 3A) and is wholly different from this letter, so that it cannot be *ē*. Moreover, it is quite different from the *ē* in *agrapatiśaē* on the Mānikyāla stone.[4] All the letters in the Kharōshṭhī script have been figured by Bühler in his Table I and by Dr. Thomas in his Table IV (E. I. ix, 146) except *ṅ*. This character is like none of those, nor can it be *ṅ* which never occurs as a final in Prākṛit. The only other sound for which no separate character has been met with is *ṁ* standing by itself as a final. Anusvāra is generally denoted by a leftward curve added to the bottom of a consonant, as in *saṁ* (l. 1), *saṁbhati* (l. 2), *aṁtara* (l. 3 A) and thrice in l. 4; but, if it should be difficult or inconvenient to add the curve to certain characters, such as *ku*, *bu* or *ho*, final *ṁ* could only be expressed by some independent sign, so that presumably there must have been some character to denote it in such cases; and it appears to be this character. The construction of the sentence supports this inference. It is not necessary to suppose that the dative is intended after *bhavatu* here, for the construction with *bhavatu* is clearly changed afterwards to the nominative, as in *agra bhaga bhavatu* (l. 3 C), and here the construction is evidently similar. *Paḍiyaṁśaṁ* is obviously the nominative to *bhavatu* which follows it in both places; and, as its termination is not masculine nor feminine, it must be a neuter nominative ending in *ṁ* (see p. 209). This character can hardly denote a final *m*, because *m* does not occur as a final in Prākṛit, as far as I know, except in poetry where a short syllable is required or before a vowel,[5] and neither of these conditions exists here; yet it would come practically to the same result if this character be read as final *m*.

A letter occurs which appears to be a new form of *ph*. It is discussed in the note on the word *śaphatiga* (l. 3 B), *infra*, p. 217.

As regards compound letters, we have *ṛṭ* in *Arṭa*° (l. 1), *ry* in *paryata* (l. 3 A), *śr* or *ry* in *asaṁśrana* (l. 4), *shk* in *Hōvēshkasya* (l. 2) and *shṭ* in *Hashṭuna* (l. 2). *Rv* occurs plainly in *sarva* (l. 3 A) and the first *sarvina* (l. 3 B), and is apparently intended by the similar character without the loop in the second *sarvina* (l. 3 B). *Tv* appears to be meant by the *t* with the upright line added in *satvana* (l. 3 A); and a new letter which I take to be *mbi* in *ṭumbimri* (l. 1) is discussed in the Notes (p. 213).

[1] Journ. Asiat., sér. 9, vol. VII (1896), p. 10: J. R. A. S., 1909, p. 661.

[2] This seems to me a most important feature and constitutes a strong reason why the letter cannot be read as *t*; besides which the arguments mentioned in note 3 on p. 208 militate against its being read as *t*, and this character, if taken as *t*, would add a fourth form to the three noticed there. Dr. Thomas however would read it as *t*.

[3] Journ. Asiat., sér. 9, vol. VII, pp. 8-10: J. R. A. S., 1909, p. 661.

[4] See plate in Journ. Asiat., sér. 9; vol. VII, p. 8.

[5] See Pischel's Prakrit Grammar, §§ 348, 349.

The letter *y* as the second member of a compound letter is well illustrated here, being formed by a rightward hook added to the tail of the first member as in *arupyata* (l. 3 B). Since the tail is often curved to the left, the addition of the hook gives the appearance of a double curve as in *Kamagulya* (l. 1) and *tya* in *Milyagasya* (l. 3 C), or even a triple curve as in *Śakya* (l. 1). This conjoint *y*-mark is added to another letter which resembles *d* or *n*, but the compound can only denote *sy* in the genitive termination *sya* because of its position. It is best formed in *masya* (l. 1), *Hōvēshkasya* (l. 2), *Vagra Marēgrasya* (l. 2) and *Milyagasya* (l. 3 C), somewhat variant in *Hashṭuna Marēgrasya* (l. 2), and badly shaped in *Marēgrasya* (l. 1).

The mark for *r* as the second member of a compound letter is a stroke to the right attached to the lowest point of the first member. It occurs often and raises some interesting questions. Dr. Thomas found on the Mathurā Lion-capital that conjunct *r* is so represented and also in two other ways, namely, by a similar stroke to the left and by a dot (E.I. ix, 137). The dot is not so used in this inscription. The stroke to the left occurs often, but has no significance; thus (to cite only a few instances) it is added to an initial *a* sometimes as in *Arṭamisiyasa* (l. 1), *agra* sometimes (ll. 2, 3) and *arupyata* (l. 3 B), to the first *ja* but not the two others in *maharaja rajatiraja* (l. 2) and to *bha* in *bhavatu* sometimes but not always (ll. 2, 3). These illustrations also shew that it cannot denote the doubling of a letter, nor a distinction between the vowels *a* and *ā*, nor the vowel *u* or *ṛi*. It seems to be a mere flourish in finishing the tails of letters written from right to left.

This stroke to the right occurs chiefly with the letter *ga*, which represents the suffix *ka* and is thus a very common termination and a very useful criterion for dividing the words. It occurs with *t* in *avashatri* (l. 3 C), thrice with *d* in *pudra* (l. 1), *midra* (l. 2) and *adra* (l. 3 A),[1] and once with *bh* in *bhradaba* (l. 2). In all these words, except perhaps the first, this *r* stroke represents a real *r*, and it is only in conjunction with *g* that uncertainty arises.

The letter *g* occurs both with and without this *r* stroke. The downward line of *g* ends straight in *jalayuga* (l. 3 B) and *bhaga* (twice in l. 3 C), and has the slight leftward flourish in *arōga* (l. 3 A), *śaphatiga* (l. 3 B), *avashatrigana* and *Milyagasya* (l. 3 C), and *saṁghigana* (l. 4). In all other places the rightward stroke appears, and in discussing it we must divide the inscription into two parts, the first part down to *bhavagra* (l. 3 A) and the second comprising the remainder. In the first part it has two shapes; first, a horizontal stroke more or less straight, as in *gaḍigrēna, kadalayigra, Marigra* and *bhagravada*[2] (l. 1), *Marēgrasya* (ll. 1, 2), *bhagraē, natigra, saṁbhatigrana* and *bhagra* (l. 2), *nabagra* and *bhavagra* (l. 3 A); and secondly, an upward curve which appears always in *Vagra* (ll. 1, 2) and *agra* (l. 2 twice). In the first part then the curved form represents a genuine *r* in *agra* and apparently also in *Vagra*, and the straight form is used in all the other cases and always incorrectly, for even in *Marēgra* and *Marigra* the *gra* probably does not contain a real *r*. In the second part, however, the *r* stroke is never added to *g* except where there is a real *r*, as in *agra* (l. 3 C) and *parigraha* (l. 4), and then it is denoted by the straight horizontal stroke which is the correct form.

It appears therefore that it was discovered while the record was being inscribed on the vase, that the straight *r* stroke was being improperly inserted, and that the fault was corrected after the word *bhavagra*; hence the difference between the first and second parts. The horizontal form, which is the correct sign, is used with *g* in the second part, and with all other consonants throughout the inscription, wherever a real conjunct *r* occurs; but in the first part a distinction was made in the case of *g*, the horizontal stroke being improperly employed to represent an unreal *r*, and the curved form being used to denote a real *r*. This peculiarity was discovered and rectified after the word *bhavagra* as mentioned. That word occurs in the middle of what seems to be a poetical quotation (see p. 218). Was it some discussion about the quotation that

[1] See p. 208, note 3.

[2] Compare *bhakravatō* (A. 11, line 12, in E. I. ix, 141) where Dr. Thomas styles the *r* stroke otiose (p. 142).

raised the question of orthography? Thus it might have been noticed that the addition of the unreal *r* vitiated the metre, as it certainly does in that word. Whatever be the explanation, it is certain that there is a difference in the use of the *r*-stroke with *g* in the two portions.

The persistent and incorrect addition of the horizontal *r* stroke to *g* throughout the first part cannot however be accidental, but must have some significance; and suggests that it denoted a modification of *g*. Such a modification could hardly be anything else than to give *g* the sound of *ǵ*. After I came to this conclusion, I found that Dr. Thomas had put forward a similar suggestion with regard to the peculiar *kr* which is employed on the Mathurā Lion-capital (E. I. ix, 137). There is however an important difference between this inscription and those on that capital, namely, that there an original *g* is hardened to *k*, as in *bhakravatō* (=*bhagavatō*) and *nakraraasa* (=*nāgarakasa*), while here an original *k*, when not initial and not compounded, is (as will be explained, see below) softened to *g*. It seems probable therefore that *gr* in the first part here had the sound of *ǵ*, and that *kr* on that capital had a sound like *ć*. It will be convenient to transliterate this diacritical *r* as an italic.

Similar to the *r* stroke is a straight stroke to the right, attached to the lowest point of the character for *mi*. It obviously denotes something different from plain *mi*, which occurs in *Arṭamisiyasa* (l. 1), *midra* (l. 2) and *Miṭyagasya* (l. 3 C). All the instances in which it appears are singular locative cases, and as the locative singular in the Prākṛits ends in *mhi* or *mmi*, we may justly take this character *mri* as meaning *mhi*. It can hardly denote *mmi*, because this means a doubled *m*, and letters are never written double in this script. It will however be convenient to transliterate this stroke also as an italic *r*.

It seems therefore from this examination that the straight *r* stroke was used as a diacritical sign to denote a modification of the main consonant in certain cases, certainly with *g* and *m* here and with *k* on the Lion-capital, in the way of giving that consonant a rougher, thicker or doubled sound.

The language is a form of Prākṛit and in discussing its character the phonetic changes may be noticed first, and the inflectional forms afterwards. Vowels remain the same as in Sanskṛit except that *au* is reduced to *ō*, and *ṛi* is replaced by *a* or *i*. There is no clear instance of the elision of consonants (except a final *t* once), not even of the semi-vowels *y* and *v* which are so liable to suffer in Prākṛit, except *y* of the genitive termination sometimes. Speaking generally the only changes that occur among consonants are, first, a uniform softening of all single tenues or hard consonants of the five classes to their corresponding medise or soft consonants; and secondly, the assimilation of the more difficult compound consonants. The changes may be conveniently set out in the form of rules.

*Rule 1.*—Sanskṛit tenues or hard consonants, when not initial and not compounded, are changed to their corresponding medise or soft consonants. This holds good for *k*, *t* and *p* throughout,[1] except *t* in verbal terminations. Thus *d* represents an original *t*—*bhagravada* =*bhagavata* (l. 1), *mada-pidara*=*mātā-pitara* and *bhradaba*=*bhrātaba* (l. 2). *B* represents an original *p*—*paridhabēti*=*paridhāpēti* (l. 1) and *nabagra*=*napagra* (l. 3 A). And *g* represents an original *k*, and thus the common suffix *ka* appears here as *ga*[2] or (with the diacritical *r* stroke discussed above) as *gra*—so *natigra*=*natika* and *saṁbhatigra*=*saṁbhatika* (l. 2), *nabagra*= *ṇṛipaka* (l. 3 A), *jalayuga*=*jalāyuka* (l. 3 B), and *saṁghiga*=*saṁghika* (l. 4). Whether this corrective applies to the name *Marēgra* and its variant *Marigra* is doubtful; yet it does probably because the stroke in them is that of the unreal *r*. One exception occurs, *rajatiraja* (l. 2), in which the original *t* has been preserved, probably because it is a special royal title.

[1] Pischel's Prakrit Grammar, § 192.

[2] *Ibid.* § 202.

This rule applied also to *ṭ*[1], thus *paḍiyaṁśaṁ=vaṭiyaṁśaṁ* (ll. 2, 3 C) for which see rule 6. Only one case of medial *ch* occurs, namely, *śōcha* (l. 2), and there the rule did not hold good if *śōcha*=Skt. *śaucha* (but see rule 4). The rule probably applied to aspirated tenues[2], but no instance occurs.

As mentioned above, an original *t* in verbal terminations remains unchanged; thus we find *paridhabēti* (l. 1) and *bhavatu* (ll. 2, 3).

*Rule 2.*—Rule 1 applied also where an original medial *t* was compounded with *r*—thus *pudra=putra* (l. 1), and *midra=mitra* (l. 2). The akshara in these words is clearly *dr* and not *t* or *tr*, for it has exactly the form of *d* (as in *dachhinaē*, l. 3 A) with the *r* stroke, and there is no instance here where an undoubted *t* approximates to *d* in shape as it appears to do at times on the Lion-capital.[3] But *t* combined with any other consonant was not softened, *e.g.*, *aṁtara=antara* (l. 3 A), and see note on *arupyata* (p. 217). The *ṭ* in *Arṭamisiyasa* (l. 1) remains unchanged, but this is a Greek word.

*Rule 3.*—Consequently in reading this inscription it must be noted that, where a media or soft consonant occurs as a non-initial, it may represent an original media or (since consonants are never written double here) a doubled media, or the corresponding tenuis; thus *d* can represent original *d* or *dd* or *t*, and similarly *g* and *b*. So *d*=original *d* in *sada* (l. 3 B), and= original *t* in *mada* (l. 2), and *b=bb* in *bhradaba* which=*bhrātabba*.

*Rule 4.*—Where a tenuis or hard consonant appears here singly (or combined with *r* or *v*) and as a non-initial (except *t* in verbal terminations), it represents a doubled letter, for otherwise it would have been modified according to rule 1. Thus as regards *t*, *natigra=nattigra=nattika* (by rule 1), and *saṁbhatigra=saṁbhattigra=sambhattika* (l. 2); *satva=sattva* (l. 3 A); and *arupyata=arūpyattā* (l. 3 B). *Śōcha* would follow this rule if we read *śōchcha*=a possible Skt. form *śauchya*, but see rule 1. So also in the case of aspirated tenues; thus, *dachhinaē=dachchhiṇāē* (l. 3 A), and *śaphatiga=śapphattiga* (l. 3 B).

*Rule 5.*—Conjunct *y* appears only where respect required the full form of the word, as in the personal names whether in the nominative or in the genitive case, *Kamagulya* (l. 1), *Marēgrasya* (ll. 1, 2), *Hōvēshkasya* (l. 2), and *Mityagasya* (l. 3 C); and in the special term *arupyata* in a quotation (l. 3 B). Elsewhere it is assimilated, as in *Arṭamisiyas(s)a* (l. 1), and *bhradaba* (l. 2) which=*bhrātabba* (by rule 3)=Skt. *bhrātṛivya* (*vy* turning to *bb* as in *kabba* and

[1] Pischel's Prakrit Grammar, § 198.

[2] *Ibid.* §§ 192, 200.

[3] E.I. ix, plate IV at p. 146. Having regard to the forms used there, Dr. Thomas thinks that this letter *dr* is *t*, but there appear to me to be grave objections thereto. First, as handwritings varied, each writing must primarily be scrutinized by itself as urged in p. 203, note 1; here the writing is minute, neat and well-formed, so that the presumption is that the differences between characters were made deliberately and have their special significance. Secondly, *t* proper appears in the words *paryata*, *aṁtara*, and *arupyata* (ll. 3 A and B), as well as in *paridhabēti* (l. 1), *rajatibaja* (l. 2) and *śaphatiga* (l. 3 B); and if this character *dr* is really *t* also, then *t* is made in two ways markedly different, and moreover without any reason, as we see especially in the compound words *natigra-midra-saṁbhatigrana*, where there was no reason to write the *dr* in *midra* different from the *t* in the two other words, if they are all alike *t*. Thirdly, if this *dr* is *t*, all distinction between *t*, *tr* and *dr* would be obliterated, a conclusion that seems to me highly improbable, considering how important and significant these three letters *t*, *d* and *r* are in the different kinds of Prākṛit. Fourthly, Sanskṛit *t* medial and uncompounded is certainly changed to *d* in this Prākṛit as shown under Rule 1, and the same change would be natural when *t* is compounded with *r* which is only a liquid, so that we should by analogy expect the *t* in Sanskṛit *putra* and *mitra* to appear here as *d*. My readings of the three characters as *t* (as in the words cited above), *tr* (as in *avashatri*, l. 3 C) and *dr* (as in *pudra*, *midra* and *adra*) give each character a consistent value throughout, a value which accords fully with definite phonetic changes; whereas, if we read all these characters as *t*, we should have three different forms for *t* (with none apparently for *tr* or *dr*) and this Prākṛit would become chaotic in its modifications. The confusion would be still further increased, if the letter which I read as *ḍ* (see p. 204) be treated as a fourth form of *t*.

*bhabba*); or is resolved into *iy* as in *paḍiyaṁśaṁ* from Skt. *pratyaṁśa*; but it remains when combined with *r* as in *paryata* (l. 3 A), see rule 6, and also note on *asaṁśrana* (p. 218).

*Rule 6.*—Conjunct *r* as the second member of an initial consonant is dropped; thus *paḍiyaṁśaṁ*=*paḍiyaṁśaṁ* (by rule 1)=Skt. *pratyaṁśa*, where the disappearing *r* has cerebralised the following *t* (ll. 2, 3 C) and *śava*=*śrāva* (l. 3 A), except in *bhradaba* (l. 2) where it has persisted perhaps in consonance with the old Persian *bhrātar*, "brother". In a medial akshara *r* is retained, whether as the first member as in *sarva* and *paryata* (l. 3 A) and *sarvina* (l. 3 B); or as the second member, as in *agra* (ll. 2, 3 C) and *parigraha* (l. 4), and see Rule 2.

The changes in the consonants then, it will be seen, are not random (if one may use the word) as so often seems to happen in Prākṛit, but follow a consistent plan, so that, if any word be re-adjusted according to these rules, it appears at once as actual Sanskṛit or but one step removed therefrom.

In considering the inflectional forms, it will be convenient to cite the words as they would appear in their more correct Prākṛit form when re-adjusted according to the foregoing rules, that is, to cite them from the reading in italics (p. 210 f.).

The Prākṛit of this inscription has more affinities with Ardha-Māgadhī than with Śaurasēnī, if we compare the grammatical terminations that occur with those given by Pischel.[1] The dative singular ends in *āē*, both for the masculine as in *bhāgāē* (l. 2), and for the feminine as in *pūyāē* (ll. 2, 3 C) and *dachchhiṇāē* (l. 3 A); and these are Ardha-Māgadhī forms. The locative singular ends apparently in *mhi* for the masculine and neuter, if we read *mri*=*mhi* in *Khavatamhi* and *vihāramhi* (l. 1); and it is only in Ardha-Māgadhī (as I understand) that the locative sing. ends in *ṁsi*, from which easily comes the form *mhi*, that is found in Pāli but not in any other Prākṛit, I believe. The genitive plural ends in *āna*, as in *saṁbhattikāna* (l. 2), *avashattrikāna* (l. 3 C), etc.; and this termination is found in Ardha-Māgadhī as well as other dialects, but not apparently in Śaurasēnī.

There are other peculiarities which mark this Prākṛit. The nomin. singular masculine of nouns ending in *a* appears as *a* and not *ō*, as *putra*, *katālayika* (l. 1), *bhāga* (l. 3 C) and *parigraha* (l. 4); except in the poetical quotation in l. 3 A, B, where the *ō* form appears in *yō* and *aṁḍajō*. The neuter nomin. ends in *aṁ* as in *paḍiyaṁśaṁ* (ll. 2, 3 C) and *vihāraṁ* (l. 4) both which words appear to be considered neuter instead of masculine; but *śōcha* (l. 2), which should be neuter, does not support this rule and suggests that the nomin. also ended in *a*: and the accus. ends in *a*, as in *śarīra* (l. 1). The genitive masculine has its ordinary ending *sa* as in *Arṭamisiyasa* (l. 1), but when used honorifically has its full form *sya*, as in *Marēgasya* (ll. 1, 2), *Hōvēshkasya* (l. 2) and *Miṭyagasya* (l. 3 C). From other noun-bases may be noticed the genitive *bhagavata Śākyamunē* (l. 1), which=Skt. *bhagavataḥ Śākyamunēḥ* without the visarga which disappears in Prākṛit;[2] and a form *ra* of the genitive singular of noun-bases ending in *ā*, that is, Skt. *ṛi*, as in *mātā-pitara* (l. 2), which is discussed in the Notes (p. 215). Among pronouns we find *ēsha* used as a neuter nomin. (l. 4)[3]; and from *idam*, not only the instrumental singular *imēna*[4] (ll. 1, 2), but also probably a new base *iya*.[5] Among the very few verbs that occur may be noticed *bhūyā* the apocopated form of Skt. *bhūyāt* (l. 2).[6]

The inscription records that in the year 51 and in Huvishka's reign, Kamagulya (or perhaps Kamakulya, by rule 1), son of Vagra Marēga (or perhaps Marēka, by rule 1), interred a relic of

[1] Prakrit Grammar, §§ 368-76.

[2] I do not find *munē* mentioned as a genitive by Pischel; it is given in Dr. E. Müller's Pali Grammar, p. 70, citing Oldenberg, KZ. xxv, 318.

[3] Noticed in Pischel's Prakrit Grammar, § 426.

[4] This is found in other inscriptions.

[5] See note on *iya Khavadamri* (p. 212).

[6] Pischel's Prakrit Grammar, §§ 459, 464.

Buddha at the Vagra-Mariga monastery, and enunciates a series of pious aspirations in favour of the Emperor Huvishka, his own father and relatives, a neighbouring Rāja and other persons and all creatures generally. The last line states that the monastery was bestowed on the Mahāsaṅghika sect among the Buddhists.

The dedicator Kamagulya does not say he has founded the monastery, nor does he imply that he dedicates the relic at the time of the foundation, but he simply declares that he places the relic in this vase inside a small vault within the monastery.[1] The natural inference therefore is that his father Vagra Marēga founded the monastery before and named it after himself, and that Kamagulya afterwards interred the relic within it. The last line does not conflict with this inference, because it seems, both from its purport and also from the larger letters in which it is written, to be a separate declaration, recorded no doubt as a safeguard for the Mahāsaṅghika sect on this sacred vase which would be sure of reverent preservation; and because it may be read in the past tense just as well as in the present, there being no verb.

The father Vagra Marēga is styled a *mahīśa* or local Rāja. He bears the name or title Marēga and so does his grandson (Kamagulya's nephew) Hashṭuna, but Kamagulya does not use this name for himself, and only says that he has fixed his residence at Khavata, the very place where the monastery was. One is tempted to infer that Marēga is an appellation derived from some town or district, that Vagra had his home there or was ruling there, and that Hashṭuna was also living there, perhaps as Vagra's heir-apparent (for Hashṭuna's father is not mentioned and may have been dead). Kamagulya speaks of his grandchildren (son's sons) but not of his son; hence it would seem that his son was dead.

None of the names mentioned, except Rōhaṇa who was also a *mahīśa* or neighbouring Rāja, appears definitely to be Indian. Vagra might be read as Vakra (by rule 1), and this name and Kamagulya (or Kamakulya) may have Indian affinities, but Hashṭuna seems more like an Iranian name.[2] Moreover Marēga (or Marēka) is not Indian, but suggests Marḛ, the old name of Merv, or other places of similar name which exist southward of Khawat. It seems probable that the dedicator and his family were Persian. The only other name mentioned, Miṭyaga (or perhaps Miṭyaka, by rule 1), appears almost certainly to be Greek.[3]

I will now set out the transliteration of the inscription and interlineate with it in italics the more ordinary Prākṛit forms of the words, as they would appear if re-adjusted in the light of the foregoing rules and of the discussion on the diacritical *r* stroke. As I read the inscription, all the different characters are treated as distinct and each has the same value consistently throughout; and the supposition that there are errors in it is reduced to the smallest limits; in fact, only three words appear to have mistakes, namely *rajatibaja* (l. 2), *aviya* (l. 3 A) and *asaṁśrana* (l. 4)—with perhaps *avashaṭri* also (l. 3 C).[4]

## TEXT.

[1] This is clear, whether we read *paridhabēti* or *patiṭṭhabēti* in l. 1. See notes, p. 214.

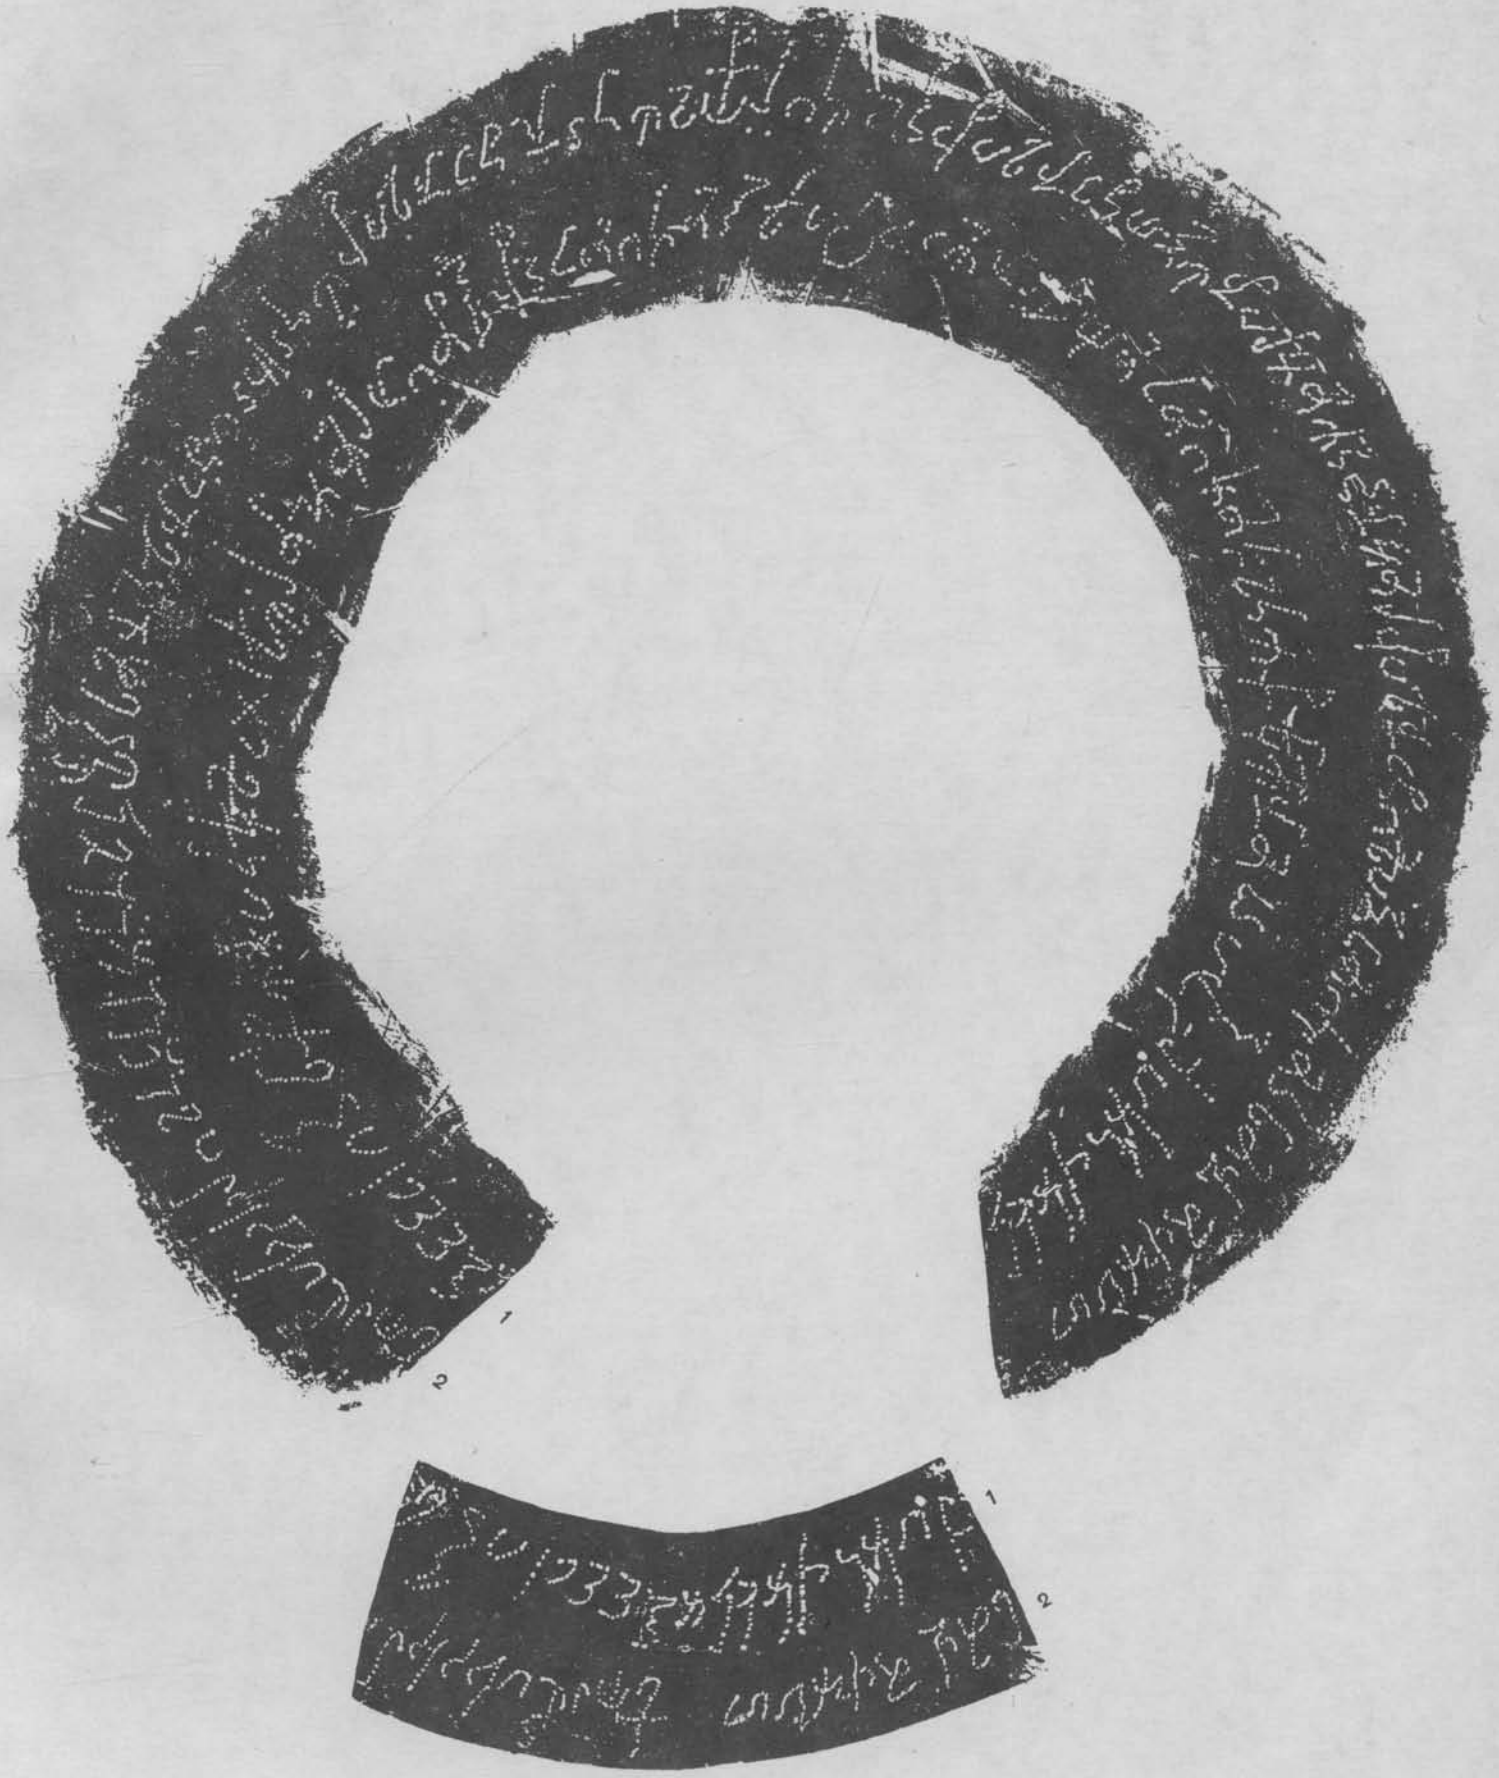

[2] It seems hardly possible to derive Hashṭuna from *hṛishṭa*. Dr. Thomas suggests O. P. *baγa* 'god' as the derivation of Baga (or Vagra); and compares Hashṭuna with *Histanes* and *Bisthanes*, and Marēga with the termination *bara* in *Sanabares*, etc. (J. R. A. S., 1906, p. 214). The *r* in *Vagra* is real.

[3] See Notes, p. 218.

[4] Dr. Thomas would add to this list the words *bhradaba*, *śōcha*, *nabagra*, *paryata*, *śaphatiga* and *arupyata*.

## TRANSLATION.

**In the year 51,** on *the day* 15 [of the first half ?] of the month **Artemisios. By means of this vase Vagra Marēga's** son **Kamagulya,** who has fixed his residence in this *place* **Khavata,** inters a relic of the Lord Śākya-muni inside a vault within the **Vagra Mariga** monastery.

By means of this meritorious foundation—may it (the relic) tend to the pre-eminent lot of the great king, the suzerain of kings, **Hōvēshka**! May it tend to the veneration of my parents! May it tend to the veneration of my brother's son **Hashṭuna Marēga**! May there be purity for me! May it tend to the veneration of *my* grandsons, friends and associates! And may there be a share of a pre-eminent lot for the territorial lord **Vagra Marēga**! May it tend to the bestowal of perfect health on all beings! May it tend to the veneration of all *these, namely,* the saintly king,[4] him who has *obtained* the condition of having mastered the doctrine, the *creature* which is born from moisture, from a womb (?) or from an egg, the *creature* whose life is in water, the graminivorous *animal and* the incorporeal soul! And

[1] The *ba* is a mistake for *ra*.
* to * including the next letter *ja* is line 3 A.
† to † excluding the first letter *aṁ* and including the letter *a* of *avashatrigana* is line 3 B.
‡ to ‡ excluding the first letter *sa* is line 3 C.
[2] The *vi* is probably a mistake for *ri*, see p. 216.
[3] This word is very difficult; see note on it *infra*.
[4] Or perhaps "the saint, the king" (see p. 216).

may there be a share of a pre-eminent lot for the territorial lord **Rōhaṇa**, all *his* household and *his* dependants together with *his* retinue! And may there be a supreme lot for **Mityaga**!

This monastery *is* (or *was*) a gift to the **Mahāsaṅghikas**, who are teachers (*or* who had no habitation ?).

## NOTES.

*Line 1.*

*Māsya* may be a clerical error for *māsa* or *māsasya*, unless it should be a genitive formed from the old Persian word *māh*, "month," Prākṛitized. A clerical error at the very beginning certainly seems improbable. Prof. Lüders has suggested that *māsasya* passed into **māhasya* and then into *māsya*,[1] but such a modification hardly agrees with the general character of this Prākṛit, which is close to Sanskṛit as explained above. His view however lends support to my suggestion that the Persian word may have been Prākṛitized as *mā*, the final *h* being dropped as visarga is dropped in Prākṛit, and the genitive *māsya* formed from it. The month may have been designated by a regular term *māh Arṭamisiya*, and this term may have been adopted here in its entirety, and then both words put into the genitive; the termination *sya*, and not *sa*, being added to *mā*, in order to distinguish the word from the common noun *māsa* and shew that it is a genitive. The general practice in this inscription is to inflect only the last of two or more words placed in apposition, but in this case both words are certainly in the genitive, unless we suppose *māsya* is a clerical error for *māsa*, which is improbable. The general rule then may have been varied in this formal and precise statement of the date.

*Arṭamisiya* = the Greek month *Artemisios* Prākṛitized, the Greek *t* being transliterated by the cerebral *ṭ*. At the present time the English *t* is always so transliterated.

*Stēhi*, and not *stihi*, appears to be the actual reading. I cannot offer any explanation of this puzzling word, and can only throw out a suggestion that, as the Greek month was sometimes divided into two parts called *mēn histamenos* and *mēn phthinōn*, *stēhi* might, through the old Persian root *stā*, "to stand," possibly and perhaps in abbreviation represent *histamenos*. If this be possible, the date would be the 15th day of the first half of the month.

*Gaḍigrena*.—The difficult letter *ḍi* in this word has been discussed above (p. 204). *Gaḍigra* may = *gaḍika* (by rule 1), or *gaḍḍika* (by rules 1 and 3), or *gaṭika* (by rule 1). It undoubtedly refers to this vase. *Gaḍika*, or better *gaḍḍika*, is probably a dialectical form of Sanskṛit *gaḍḍuka*, which means "a kind of jar, especially a golden vase"—a term that would have well suited this vase in its pristine brilliance, for when discovered portions of it were so bright as to resemble gold (see p. 203).

*Pudra* must, it seems to me, agree with *Kamagulya* and govern *Vagra-Marēgrasya*, though this construction varies from the ordinary arrangement by which it should follow the word it governs. The ordinary construction, by which *pudra* would govern *Kamagulya*, seems to me to lead to serious difficulties. The rendering I have adopted, though not common, is not irregular, and makes the whole sentence plain.[2]

*Iya-Khavadamhi*[3] is obviously the locative case of the place to which the following word *ḳadalayigra* refers, and the place therefore is denoted by the expression *Iya-Khavada* or *Iya-Khavata* (by rule 1). There can be no doubt that we have here the ancient form

[1] J. R. A. S. 1909, p. 666.

[2] Dr. Thomas would prefer to make *Vagra-Marēga* the donor, though there are serious difficulties in doing so

[3] This might be read as *Iyakkha adamhi*, for the fourth letter has some resemblance to *a*, and the *kh* would be doubled by rule 4; but *Iyakkha* conveys no meaning, and *adamhi* as a locative from the pronominal base *adas* (see Pischel's Prakrit Grammar, §§ 429, 432) would be out of place.

of the present name of the place, Khawat, where this vase was found. If this expression be taken as one word, it would be *Iyakkhavata* (by rule 4), and this is suggestive of the Greek *Iakkhos*, "Bacchus or Dionysos," whose legend was localised in this region as is well known. This view was tempting but appears untenable, because it is highly improbable (as a distinguished Greek scholar has informed me) that the oriental Greeks of this region would have had the name *Iakkhos* in public vogue, as it only had a real base in Attica and was a literary figment outside. Moreover, no Greek derivation can apparently be suggested except perhaps *Iakkho* + *hodos*, which is unsuitable. Again *Iyakkhavata* is hardly an Indian word. The only alternative is to divide it into *iya Khavata*, and this division gives forthwith the modern name Khawat, while *iya* appears to be a pronoun meaning "this," or "here." The pronoun *idam* developed, or had as an equivalent, a base *ia* in Prakrit (apart from the feminine nomin. *iyam*), for the masculine or neuter locative *iammi* is found[1] and the base *ia* itself did exist.[2] This *ia* might well be written *iya* here, for this inscription has literary qualities, and the neighbouring old Persian word *iyam*, which is its exact equivalent and is both masculine and feminine, might naturally influence the spelling. *Iya Khavatamhi* would then mean "in this very Khavata," where the monastery was situated. Or *iya* might equally well be taken as=Skt. *iha*, "here."[3] Either way the meaning is the same. Khavata, or Khāvata or Khāvāta as it might be read, does not seem to have any meaning, if considered to be of Indian derivation though *āvata* was a termination used in the names of places, as *Vāraṇāvata*.[4]

*Kadalayigra*=*kṛitālayika* (by rule 1), which is formed from *kṛitālaya*, as *hṛidayika* from *hṛidaya*, *kāyika* from *kāya*, etc. The whole is a more precise adjective than *kṛitālaya*, both meaning "having fixed one's residence." It suggests that Kamagulya did not belong to this place originally, but had come to reside here.

*Ṭumbimhi*.—The first akshara is clearly *ṭu* or *thu*, and *thūpa*, *thuba* or *thuva* suggests itself, but is inadmissible because the second akshara is not plain *p*, *b* or *v*. No other word beginning with *thu* seems possible. The letter must be read then as *ṭu*. The second *akshara* is a new character. At first sight it seems to be based on the character for *st*; see the previous word *stēhi* and the forms of *sti* and *stu* in Bühler's Table I (n°. 39, v, vi and vii) and Dr. Thomas' Table IV (E. I. ix, p. 146); but it cannot be *sti* or *stu*, because (1) it has a stroke to the left at the bottom more than *st* has and also the vowel mark *i*; (2) that stroke cannot denote *u*, for *u* is not so made here and *u* would be in addition to *i*; and (3) *st* could not follow the preceding vowel *u*, and *shṭ* alone would be permissible after *u* in this dialect which clearly distinguishes between the three sibilants. The character however is not *shṭ*, for *shṭ* is found in the name *Hashṭuna* afterwards. Moreover all such renderings are meaningless, and the character cannot denote *st* at all. In shape it is a *b* (or *v*) with a cross-line through its middle and the vowel-mark *i*, hence presumably it represents *bi* (or *vi*) in combination with some other consonant denoted by the cross-line. If it be so, then, since the language is a Prākṛit, the cross-line can only mean some secondary consonant such as *m*, *y*, *r* or *v*. It is not *y* nor *r*, for their forms have been discussed above (p. 206); and *v* is hardly possible in

[1] Pischel's Prakrit Grammar, § 429.

[3] See J. R. A. S. 1909, p. 1089.

[4] M. Bh. i, *142*, 5675. It does not make the matter easier if we read *Iśakhavata*, which is not impossible since there is very little distinction between *ya* and *śa* in this inscription (see p. 203). This rendering might be resolved as *Iśa* + *khavata* or *Iśa* + *akkhavata* (by rule 4); but these words yield no satisfactory solution (though *akkhavata* could = *akshavata*) and do not account for the present name Khawat. Moreover any such solution would weaken the special significance of *kadalayigra*. Professor Rapson has pointed out to me that *iśa* occurs with the meaning "here" in the third line on the reverse of figure N. xvi. 2 in Plate CI of Dr. Stein's "Ancient Khotan." If we read *iśa* here, the expression becomes *iśa Khavadamhi* with precisely the same meaning as *iya Khavadamhi*; but the latter reading is preferable because the letter resembles *y* rather than *ś*.

combination with *b*, and hardly probable in combination with *v*, for *vv* would be a doubled *v* and letters are not written double here. Only *m* therefore seems possible, and the character is presumably *mbi* (or *mvi*). In support of this it may be observed, that *m* could hardly be expressed by the usual curve for *ṁ* (see p. 205) added to *ṭu*, and could therefore be only indicated by some addition to the letter *b* (or *v*) to form the compound *mb* (or *mv*). The word therefore is *ṭumbimhi* (or *ṭumvimhi*), the locative case of *ṭumbi* (or *ṭumvi*). No Indian word seems possible, and the only inference that arises is that *ṭumbi* (or *ṭumvi*) is a foreign word adopted and Prākṛitized. Since the cerebral *ṭ* is used to denote the Greek *t*, as in *Arṭamisiya*, *ṭumbi* suggests the Greek word *tumbion*, the diminutive of *tumbos*, "a sepulchral chamber or vault." *Tumbion* would become *ṭumbiya* in Prākṛit and might be shortened to *ṭumbi* in ordinary parlance. Greek influence was strong in this region, and *tumbion* would be an appropriate word to denote the substantially constructed cavity or cupola in the ṭumulus in which the vase was found (see p. 201). This rendering is surprising, yet none other seems to me possible from the scrutiny.

*Bhagravada Śakya-munē* has been discussed above (p. 209).

*Paridhabēti=paridhāpēti* (by rule 1)=Skt. *paridhāpayati*, causal of *pari-dhā*, and means "encloses." The usual term to express the installation of a relic-shrine is *patiṭṭhāvēti*, and this suggests itself as the word intended here. *Ṭh* and *dh* are similar and the third akshara might be read either way, but *patiṭhabēti* (as *patiṭṭhābēti* might appear here by rule 4) does not appear to be intended for three reasons based upon the writing, the grammar and the sense. First, the second akshara is certainly not *t* but *r*, for it agrees exactly with the two *r*'s which immediately precede in the word *śarīra*; secondly, if it were intended, it would presumably appear as *padiṭhabēti* or perhaps *paḍiṭhabēti* (by rules 1 and 4) and *di* or *ḍi* could hardly lead to an erroneous *ri*; and thirdly, this word must be taken with *imēna gaḍigrēna*, in which the relic was enclosed, and *paridhābēti* suits the context better than *patiṭṭhābēti*.

*Line 2.*

*Kuśala-mūlēna.*—This expression occurs on the Mānikyāla stone,[1] and is also a technical Buddhist term. As a technical term—'The three Kusalamúlas, "roots of goodness or groundwork of merit" are *alobho*, *adoso*, *amoho*, freedom from covetousness, from anger, and from ignorance':[2] but this interpretation is unsuitable here, and the expression here presumably means something different, as Prof. Lüders also apparently holds when dealing with the Mānikyāla stone.[3] It may mean "well-conceived foundation," "virtuous endowment," if *kuśala* be taken as an adjective; and "root of well-being," "source of meritorious action," if *kuśala* be taken as a noun.[4] Here from its general adaptability it may imply all these meanings with reference to the relic.

*Agra bhāga.*—*Agra* means "foremost, pre-eminent," and *bhāga* "portion, lot, destiny." The word might be read *bhagga* (by rule 3), which would=Skt. *bhāgya*, "fortune, lot, destiny." The meaning is the same either way. M. Senart has pointed out that *agrabhāga* here corresponds to *agrēbhāva* in the inscription of Tōramāṇa Shāha of Kura (E. I., i, 240), which has *agrēbhāva-pratyaṁśatāyāstu*.[5] *Agrēbhāva* denotes a state or condition, and *agrabhāga* here must presumably imply the same, "a pre-eminent lot," and not "a first share." I do not understand

[1] See J. R. A. S. 1909, p. 645.

[2] See Childers' Pali Dictionary, s. v. *kusalo*; and Aṅgut. Nik. vol. I, p. 203. Dr. Thomas takes it to mean 'a work of merit,' 'a pious work.'

[3] Prof. Lüders explains it as equivalent to the phrase which is found at Mathurā, *anena* (or *imena*) *deyadharmapariṭyāgena* (J. R. A. S. 1909, p. 660). Is not that a parallel rather than an equivalent phrase?

[4] See Childers' Pali Dictionary.

[5] Journ. Asiat., Sér. 9, vol. VII, p. 10. See note to *paḍiyaṁśaṁ infra*.

to what *bhāga* as a "share" could refer,[1] whereas a condition is intelligible and natural. He first translated *agrabhāga* as "prosperity," but afterwards agreed with Bühler to seek in it a direct allusion to the acquisition of bōdhi.[2] I would rather suggest that, since the expression appears to denote a condition, it refers to Buddhahood. With the word *pratyaṁśa* added (see note to *paḍiyaṁśaṁ, infra*), "a share of Buddhahood" seems to be as appropriate as "a share of bodhi." The expression can hardly refer to any worldly blessing, because in that case is it not rather witless to utter such a wish on behalf of Huvishka, who enjoyed already the highest position on earth ?

*Bhavatu* is used here with the dative, as *agra bhāgāē* and *pūyāē*. Since the dative implies 'purpose, intention, aim,' *bhavatu* with the dative means "may it be for the purpose of," "may it be with an aim towards," that is, "may it tend towards," "may it operate towards."

*Mada-pidara=mātā-pitara* (by rule 1). This must be the genitive of *mātā-pitā* treated as a singular noun ;[3] and it is so treated in the Taxila plate, where the accus. *mata-pitaraṁ* occurs (E. I. iv, 55). The genitive must be employed here after *pūyāē* as in all the other similar sentences. This appears to be a new form of Prākṛit genitive, and the nearest approach to it is *piaraha* which is a genitive of *pitā*.[4] Its real formation appears to be this—*pitara=pitaraḥ* (the visarga disappearing in Prākṛit) which would be correctly formed as a genitive from *pitar* (which is the essential base of *pitṛi*),[5] just like *giraḥ* from *gir* and *caraḥ* from *char* in Sanskṛit.[6] The declension of *pitṛi* in Sanskṛit shows similar forms from the base *pitar*, as *pitaraṁ, pitarau, pitaraḥ* and *pitari*.

*Pūyāē.—Pūjā* means more than "honour" and implies some degree of veneration or reverence ; hence *pūyāē bhavatu* means "may it tend to the veneration."

*Bhradaba* as the word clearly is and not *bhradara*. *Hashṭuna Marēgrasya* is in apposition to this word and not to *mē*, for the declarant is Kamagulya and *mē* refers to him ; and the meaning is that Hashṭuna Marēga is the *bhradaba* in relation to *mē*, that is, Kamagulya. *Mē* is inserted parenthetically, like *cha* in *mahiśa Vagra Marēgrasya* (l. 2) and in *mahiśa Rōhana* (l. 3 B). *Bhradaba* cannot well be treated as a mistake for *bhradara* on the analogy of the preceding *mātā-pitara* and so taken as the genitive of *bhrādā*, because (1) it is contrary to the general practice to inflect two words in apposition as would happen if we read *bhradara Hashṭuna-Marēgrasya* ; and (2) it is unnecessary to suspect any mistake. Indeed one should hesitate to suppose there is an error in spelling, unless the mistake is patent (as in *rajatibaja*, l. 2) or the word actually written appears impossible (as in *aviya*, l. 3 A, and *asaṁśrana*, l. 4) ; and one should presume that what has been written is what was intended, if it has an intelligible

---

[1] Unless we adopt a valuable suggestion by Dr. Thomas. Taking *agrabhāga* in its literal meaning "chief share," he thinks that it denotes a chief share in the merit resulting from this donation. To my mind the addition of the word *pratyaṁśa* makes a difficulty in this rendering.

[2] Journ. Asiat., sér. 8, vol. XV, p. 123 ; and sér. 9, vol. VII, p. 10.

[3] Dr. Thomas is inclined to think it may be a genitive plural in *-rām*.

[4] Pischel's Prakrit Grammar, § 391.

[5] This explanation is supported by the exactly analogous use of the genitives *bhagavata(ḥ)* *Śākyamuṇi(ḥ)* ; see p. 209.

[6] The word *bhratara* appears in the Taxila plate, and Bühler takes *bhratara sarva* there as = *bhrātṛīṁ sarvān*, but finds the construction irregular, as it occurs in the middle of several genitives. It is really the genitive, exactly analogous to *mātā-pitara* here, and as such accords fully with the other genitives there. That passage would then run thus — *sa-putra-darasa* (*ayu-bala-vardhie*) *bhratara sarva-*(*cha*)*-natiga-*[*baṁ*]*dhavasa cha*, the first *cha* being inserted parenthetically (like *cha* in this inscription, see note on *bhradaba*) with reference to *sarva-natiga*, and the second *cha* being in its correct place grammatically but referring specially to (*sarva*)-[*baṁ*]*dhava*. These *cha*'s are used more with regard to the sense than strict grammar. *Bhatara* also occurs on the Mānikyāla stone inscription and is treated as a genitive by Prof. Lüders (J. R. A. S., 1909, p. 666). *Natiga* there must = *natigra* here ; see note on it.

and appropriate meaning.[1] Nor can the word be read as *bhrada ba*, treating *ba* as=Skt. *vā* or *ēva*, because (1) Skt. *v* when single is not changed to *b* here, and (2) neither word would suit the context but only *cha*. *Bhradaba* is therefore one word and=*bhrātabba* (by rules 1 and 3), which=Skt. *bhrātṛivya*, "nephew;" and the whole phrase = Skt. *mad-bhrātṛivya-Haṣhṭuna-Marēgasya*.

*Śōcha* has been discussed above (p. 208).[2]

*Bhuya*=Skt. *bhūyāt*, the final *t* being dropped in Prākṛit.[3] This word is well chosen here to convey a less positive meaning than *bhavatu*. Where the declarant expresses his desire on behalf of other persons he uses the imperative tense, but here in uttering his desire on his own behalf he modestly uses the precative.

*Natigra=nattika* (by rules 1 and 4)=Skt. *naptṛi* + *ka*.

*Saṁbhatigra=saṁbhattika* (by rules 1 and 4)=Skt. *sambhaktṛi* + *ka*, "sharer, favourer" here no doubt "partisan, associate."

*Mahiśa=mahīśa*, Skt. *mahī* + *īśa*. It occurs again in l. 3 B,[4] and, as the persons named are inferior to the Emperor Huvishka, it evidently means a local Rāja. There were apparently two Rājas in this part of the country, Vagra Marēga and Rōhaṇa.

*Paḍiyaṁśaṁ*.—This word occurs again in l. 3 C. It has been fully discussed above (pp. 204 f., 209, 215), where the similar expressions found elsewhere have been mentioned, *agrēbhāva pratyaṁśatāyāstu*,[5] *agra-pratyaśatāyē bhavatu*,[6] and *bhatara Svarabudhisa agra-patiśaē*.[7] It=*paṭiyaṁśāṁ*, (by rule 1)= Skt. *pratyaṁśa* "division, share," as M. Senart and Prof. Lüders have pointed out. I would translate *agra-bhāga-paḍiyaṁśaṁ* as a "share in a pre-eminent lot." It is to be noticed that this phrase is used only with reference to the two local Rājas, Vagra Marēga here and Rōhaṇa in l. 3 B, whereas full *agra-bhāga* is applied to Huvishka and Mityaga.

*Line 3.*

*Arōga* may=Skt. *a-rōga*, or stand for *ārōgga* (by rule 3) and=Skt. *ārōgya*. The meaning is the same, and the latter is probably preferable because *ārōgya-dakshiṇāyē* is said to occur on an inscription at Mathurā.[8]

*Aviya-nabagra*.—*Aviya* is no doubt a mistake for *ariya*,[9] for the *v* is as large as the usual size of *r* and only the small stroke at the top of *r* is wanting. These words then=*ariya-*

---

[1] Dr. Thomas however thinks that there must be a mistake, and that the word intended is *bhradara*, genit. sing. of *bhrada*, that is *bhrātā*, 'brother'; *b* being wrongly written for *r* as in *rajatibaja*.

[2] Dr. Thomas suspects that it is really an error for *sō cha* and = *tat cha*. *Tat* appears as *taṁ* in Prākṛit (Pischel's Prakrit Grammar, §425).

[3] Pischel's Prakrit Grammar, §§ 459, 464.

[4] This word might also be read as *mahiya*, because *ś* and *y* are often made alike here (see p. 203), and Dr. Thomas would read it so and take it as = *mahyam* or *mama*, referring to the donor; but if so, the two passages seem tautological as regards the donor.

[5] Bühler read this as °*śatāyās tu*, and translated it "(their) share being a preferential one" (E. I., i, 241); but Prof. Lüders takes it as °*śatāya astu*, and I agree with him. I would translate it thus, "may it tend to the condition of (their obtaining) a share of a pre-eminent existence."

[6] Which Bühler translated as, "may (the merit of this gift) be by preference for their parents" (E. I., i, 390) but I would suggest that *agra* is short for and = the full phrase *agrēbhāva* or *agrabhāga*, for *agra* is a noun and means the "foremost or topmost point"; and that the translation should be, "may it tend to their parents' having the condition of (obtaining) a share in a pre-eminent position."

[7] Which Prof. Lüders translates "for the principal share of (my) brother Svarabuddhi"; but I would suggest it means, "(let it tend) to my brother Svarabuddhi's (having a) share in a pre-eminent position."

[8] Referred to in I. A., vol. 33 (1904), p. 155.

[9] I have to thank Dr. Thomas for this suggestion. He thinks further that *nabagra* may be a mistake for *naragra* and = *nāraka*, "beings in hell;" *b* being wrongly written for *r* as in *rajatibaja*.

*napaka* (by rule 1)=Skt. *ārya-nṛipa+ka*, "the saintly king." They might be taken separately as "the saint, the king," if it is probable that the dedicator would have invoked a blessing not only on the saintly king, but also on kings generally. If so, the *ariya* must be distinguished from the *śrāvaka* who is mentioned next.

*Paryata-śava-bhavagra*=*paryatta-śāva-bhāvaka* (by rules 1 and 4)=Skt. *paryāpta-śrāva-bhāva+ka*.[1] *Śāva* which means "hearing" appears to signify "learning, instruction" here and the whole phrase to be a circumlocution for *śrāvaka*.

*Yō adra aṁtara aṁḍa-jō*.—The first letter might be read as *śō*, but that could only represent Skt. *śvas*, "tomorrow," and is meaningless here. The *jō* at the end clearly answers to *yō* at the beginning, so that the whole is one long phrase; and, as no sandhi blends the intervening words as in the following words *jalāyuga*, *śaphatiga* and *arupyata*, the intervening words are obviously distinct and must each be read with *jō*; otherwise they would have had the same termination *ō* instead of ending in *a*. The whole phrase therefore becomes *yō adra-jō aṁtara-jō aṁḍa-jō*, and as *aṁḍa-jō* clearly means an "egg-born creature" and the following word *jalāyuga* means "a creature that has its life in water," *adra-jō* and *aṁtara-jō* must denote other great groups of living creatures. *Adra* (as the word appears to be, though the second letter is not clear even in the original)=*āddra* (by rule 3)=Skt. *ārdra*, "moist"; and this adjective is evidently used substantively here,[2] so that *adra-jō* means "a creature born from moisture," and=Pāli *saṁsēda-jō*. *Aṁtara*=Skt. *antara*, "the interior," and *antara-jō* may mean "born from the interior," and=*garbha-ja*, that is, "mammalian."

*Jalayuga*=*jalāyuka* (by rule 1)=Skt. *jala* + *āyu* + *ka*, "a creature which has its life in water." The word might be read as *jalāyukā* or *jala-śūka*, which mean "a leech," but such a narrow and unsatisfactory allusion is out of the question.

*Śaphatiga*.—The word looks like *śaśētiga* or *śaśvētiga*, or we might read *y* instead of *ś* in either or both places, since these two letters are not well distinguished (see p. 203)-; but no such reading gives any sense, because the latter part whether read as *ētiga* or *ettika* (as it should be by rules 1 and 4) is an impossible ending, however we attempt to restore the word in Sanskṛit. The first letter certainly seems to be *ś*. The second letter however differs markedly from the first and diverges from *ś* or *y*, in that its left limb is prolonged unusually downward as in *p* and *ph*. I am led therefore to think that it is not *ś* or *y* but is a badly formed *p* or *ph*, and that the stroke which resembles the vowel mark *ē* is really the top part of *p* or *ph* shifted slightly to the right.[3] Of these two letters *ph* is preferable, because the right limb has an upward curve which *p* does not possess and which is not the mark of *r* in *pr*. As *ph* it is a new form, yet *ph* has two different shapes in Bühler's Table I, so that its character was not rigidly settled. Taking the second letter then as *ph*, we obtain a reading which is appropriate. *Śaphatiga*=*śapphattika* (by rules 1 and 4)=Skt. *śashpâttṛi* + *ka* "an animal feeding on grass." This is no doubt a pretentious word,[4] but it accords with the contiguous words and occurs as will be seen in a poetical quotation.

*Arupyata*=*arūpyattā* (by rule 4), "incorporeal soul."[5] This may represent Skt. *arūpin* + *ātmā*, but not *arūpya* + *ātmā*, because *arūpya* does not have the meaning "incorporeal." Pāli

[1] Dr. Thomas would read *paryata* as = *paryaṁta*.

[2] *Adra* might = a possible noun *ārdrya*, "moisture"; but the general character of this Prākṛit seems against it. Dr. Thomas would read *adra aṁtara* as *atra aṁtara* and as = *atrāṁtare*; but as regards the character *dr*, see p. 208, note 3.

[3] Dr. Thomas however would read the word as *śa(ṁ)śētiga*, that is *sāṁsvēdika*, equivalent to Pali *saṁsēda-ja*, from Skt. *sam* and *svēda*; but there is no instance here where an original *s* is turned to Prākṛit *ś*, or an original *d* to Prākṛit *t* (see rules 1 and 3, pp. 207, 208).

[4] *Śashpa-bhuj* is in the dictionary.

[5] Dr. Thomas would take this word as = *arūpyāṁta*.

has *arūpī* and *āruppa* (=Skt. *ārūpya*, formed directly from *a-rūpa*), both meaning "incorporeal." *Arupyata* might represent the latter word, if read as *ārūpyattā*, but *arūpyattā* seems preferable, because the first syllable is probably short since we have here presumably a śloka quoted.

All these words from *ariya* to *arupyata*[1] have a particularly literary style and rhythm, and here alone occurs the nomin. termination *ō*. These features suggest that we have a poetical quotation here, in which all the words were in the nomin. singular as shown by the *ō* form and the word *arūpyattā*. If then these words be adjusted according to the rules set out above, and the nomin. form *ō* be restored, and *jō* be added to the two words from which it has been omitted, the passage falls into the śloka metre :—

.. .. ariya-napakō paryatta-śāva-bhāvakō
Yō āddra-jō antara-jō aṇḍa-jō [cha] jalāyukō
Śapphattikō arūpyattā.[2]

*Sarvina*=Skt. *sārvīṇām*, genitive plural of *sārvī*,[3] a feminine collective noun formed from *sarva*, precisely like *sāmagrī* from *samagra*, and with the same meaning. It is used in the plural, because it applies to each of the preceding terms.

*Sada*=Skt. *sadas*, "residence, dwelling"; *sada-sārvī* means "household." It is used in the plural, probably honorifically, with reference to all the houses that composed the residence of the Rāja Rōhaṇa.

*Avashatriga*=*avashattrika* (by rules 1 and 4)=Skt. femin. form *avasaktrī* + *kā*. But perhaps the *ri* is a mistake for or a reminiscence of the vowel *ṛi* of the masc. form, and the word intended would be *avasaktṛi*+*ka*. *Avasaktṛi* is not actually found in Sanskṛit, but would be a legitimate formation from the root *ava-sañj* (which does occur) and would mean "an adherent." The preposition *ava* sometimes changes a following *s* to *sh* as in *avashṭambh* and *avashvan*, and, though it does not so modify the root *sañj* in Sanskṛit, yet it might do so in Prākṛit, especially when there is a closely allied root *svañj*, "to embrace," which would I imagine be modified after *ava*.[4] Both roots would be alike in Prākṛit.

*Paḍiyaṁśaṁ* is discussed above (p. 216). The medial *ṁ* is not so clear here as in that earlier place.

*Miṭyaga* (or perhaps *Miṭyaka* by rule 1) seems to be Greek both from its appearance and also from the use of the cerebral *ṭ*, see *Arṭamisiya* (p. 212); but the only Greek words I can suggest after enquiry are *métoikos*, which means "a foreign settler" but is hardly a name, and *mētiókhos*, in which the *kh* could hardly be represented by *k*. It is noteworthy that the dedicator expresses the same wish for full *agra-bhāga* for Miṭyaga as for Huvishka.

*Line 4.*

*Ēsha viharaṁ.*—*Vihāra* appears to be treated as a neuter noun, because *vihāraṁ* is clearly the nomin. case. *Ēsha* is used as a neuter in Prākṛit.[5]

*Asaṁśrana* is a difficult word. The second akshara is like *saṁ* at the beginning of the inscription, and the third appears to be *ś* or *y* compounded with *r*[6]; and if the former is *saṁ*,

[1] Dr. Thomas would put a different meaning on the text, thus—"I propose (tentatively) to understand all creatures to be referred to, 'from *āryas* to the beings in hell, and all the *aṇḍajas*, etc. in between (*atrāntare*) including the invisible (*arūpa*).'"

[2] Can any Pāli scholar identify these verses?

[3] *Sārviyām* occurs in a Skt. quotation in Pischel's Prakrit Grammar, § 16.

[4] See Pāṇini viii, 3, 68-9.

[5] Pischel's Prakrit Grammar, § 426.

[6] It differs from the usual forms of *ś* and *y*, in that the left limb is extended unusually downward.

the only tenable reading for the latter is *śra*, and the whole word would be *asaṁśrana*; but this seems impossible, if taken as one word, and if it is divided into *asaṁ śrana*, we only obtain two difficult words, and initial *śr* is inadmissible since it drops its *r* as shewn in *śśva* (see p. 217). There seems to be a clerical error in the word. Two emendations may be offered. First, it may be a mistake for *a-saṁśraya*, "having no asylum or habitation;" the gift of a vihāra to Mahāsaṅghikas who had no sanctuary would have been a natural act of piety. Or secondly, as Dr. Thomas suggests, the *saṁ* may be a mistake for the somewhat similar letter *cha*, and then the next letter may be read as *rya*,[1] so that the word would be *āchāryāna*, genitive plural of *āchārya*, "teacher." On the whole this seems preferable,[2] and I have adopted it in the translation.

## No. 21.—SURAT PLATES OF VYAGHRASENA; THE YEAR 241.

By Professor E. Hultzsch, Ph.D.; Halle (Saale).

In my article on the Pārḍi plates of the Traikūṭaka king Dahrasēna[3] it was stated that the late lamented Mr. A. M. T. Jackson, I.C.S., had in his hands an unpublished copper-plate grant of Dahrasēna's son and successor Vyāghrasēna.[4] At my request Rai Bahadur Venkayya obtained the original plates on loan through the Government of Bombay, who were good enough to permit them to be sent to me for inspection.

As stated by Mr. Jackson, the copper-plates come from Surat. They are two in number, each measuring between 9¼ and 9½ inches in breadth, and about 3⅛ inches in height, and bear writing only on their inner sides. They are comparatively thin and have no raised rims, but the writing on them is in a state of fairly good preservation. A number of letters are filled with verdigris and therefore have not come out on the impressions, though their outlines are quite visible on the original plates. As in the case of the Pārḍi plates, there are two ring-holes at the bottom of the inscribed side of the first plate, and two corresponding ones at the top of the second plate. A long copper wire is passed through the two holes on the right, and its ends are twisted round, but not soldered. A second copper wire may have held the plates together on the left, but is now missing. The total weight of the plates and wire is 50 tolas.

The alphabet is of an early southern type. The Jihvāmūlīya occurs once (l. 1) and the Upadhmāniya five times (ll. 4, 5, 6 (twice), and 14). In three instances (*mā*, l. 9, and *lā*, ll. 13 and 18) the secondary form of *ā* is expressed by a hook at the *bottom* of the preceding consonant. The date at the end of the inscription contains the abbreviation *saṁ* (for *saṁvat*) and the numerical symbols 1, 5, 10, 40, and 200.

The language is Sanskṛit prose; but two verses of Vyāsa are quoted near the end. The rules of grammar and of *sandhi* are carefully observed; only ll. 10-14 contain a few blunders, and l. 8 two clerical mistakes. *Anusvāra* is replaced by *ṅ* in *vaṅśa* (l. 5) and *vaṅśya* (l. 12).

The inscription records a grant of land to a Brāhmaṇa by the *Mahārāja* Vyāghrasēna (l. 7 f.) of the Traikūṭaka family (l. 1), who issued his order from "the victorious Aniruddhapurā" (l. 1). This city, which appears to have been the capital of the Traikūṭaka kings, is mentioned also in the slightly different form "the victorious Aniruddhapurī" as the place of residence of the donee in the Bagumrā plates of [Kalachuri-]Saṁvat 406.[5] Vyāghrasēna

[1] This *ry* is different from the *ry* in *paryaṭa* (l. 3 A) in that the left limb extends downwards here much further than in *paryaṭa*. Whether this difference is accidental or implies a distinction is doubtful.

[2] Though, on this interpretation, one would have expected *Mahāsaṅghika āchāryāna*.

[3] Above, Vol. X. p. 52 f.

[4] *Journ. Bombay Br. R. As. Soc.* Vol. XXIII. p. 6 f.

[5] *Ind. Ant.* Vol. XVIII. p. 270.

claims to have ruled the **Aparānta** country[1] (l. 2). This statement furnishes an interesting confirmation of two verses of Kālidāsa's *Raghuvaṁśa* (iv. 58 f.), where the mountain **Trikūṭa**, from which the designation of the Traikūṭaka family must be derived, is placed in the territory of the king of Aparānta.[2] According to the *Vaijayantī* (ed. Oppert, p. 37, verse 35), which is quoted by Mallināṭha on *Raghuvaṁśa*, iv. 53, the chief place of Aparānta seems to have been **Śūrpāraka**, the modern **Sōpārā**, with which I feel tempted to identify Aniruddhapura, the capital of the Traikūṭakas. The object of Vyāghrasēna's grant was the hamlet **Purōhitapallikā** in the **Iksharaki** district (*āhāra*, l. 8), which I am unable to identify. From the name given to the hamlet we may perhaps infer that the donee, Nāgaśarman (l. 10), was the king's family priest (*purōhita*).

The date of the grant was **the 15th tithi of the bright fortnight of Kārttika in the year 241** of an unspecified era (l. 18). As we know from coins that Vyāghrasēna was the son of Dahrasēna,[3] whose Pārḍi plates are dated in [Kalachuri-]Saṁvat 207, the date of the new inscription must be also referred to the **Kalachuri era of A.D. 249**, and the specified month places the record in **A.D. 490 or 491.**

The following short pedigree comprises all that we know from coins and inscriptions regarding the **Traikūṭaka kings of Aparānta, residing at Aniruddhapura**:—

*Mahārāja* Indradatta.

|

*Mahārāja* Dahrasēna

(A.D. 456 or 457).

|

*Mahārāja* Vyāghrasēna

(A.D. 490 or 491).

## TRANSLATION.

(Line 1.) Hail! From the victorious **Aniruddhapura**, the glorious *Mahārāja* **Vyāghrasēna**,— (*who belongs to the family*) of the **Traikūṭakas**; who meditates on the feet of (*his*) mother and father; who is a servant of the feet of Bhagavat (Vishṇu); who is the lord of **Aparānta** and other rich countries, annexed or inherited (*by him*); to whose lotus-feet innumerable kings are bowing; who has obtained bright fame, pervading all directions, by distributing the vast treasures acquired with his own arm by ruling (*his kingdom*) and by conquest; whose body is as brilliant as the autumnal moon; whose conduct is as noble as that of excellent men of former times; who has been created, as it were, as an example of good conduct; who has repelled neighbouring enemies; who is more distinguished than other kings; who has become the ornament of his family; who has occupied forts, cities, and oceans by armies of many great heroes; whose nature is as deep as the ocean and as firm as the chief of mountains (Himālaya); who ravishes the hearts of men by nature; whose wealth is shared

by scholars, refugees, elders, relatives, and devotees; (*and*) who has acquired desirable glory by practising self-restraint in a manner worthy of (*his*) descent,— commands all residents of **Purōhitapallikā** included in the **Iksharakī** district (*āhāra*) :—

(L. 9.) "Be it known to you, that, in order to increase the merit of (*Our*) mother and father and of Ourself, we have granted to the Brāhmaṇa Nāgaśarman of the Bhāradvāja *gōtra* this hamlet (*pallikī*), not to be entered by irregular or regular soldiers, unless (*in order to arrest*) robbers or persons guilty of high-treason, exempt from all taxes and from forced labour, to be enjoyed, under the rules of an *agrahāra*, by (*the donee's*) descendants, (*and*) to last as long as the moon, the sun, the ocean, and the earth shall exist.

(L. 12.) "Therefore kings belonging to Our lineage and others, considering that sovereignty is liable to cessation, that life is followed by separation, and that (*only*) virtues are lasting a long time, admitting the principle that gifts to virtuous men are noble achievements, and desirous of accumulating for a long time brilliant fame, as bright as the rays of the moon, must approve and protect this grant of a hamlet.

(L. 15.) "For the holy Vyāsa, the arranger of the Vēdas, has spoken :—

[Here follow two of the customary verses.]

(L. 17.) Having enquired (*regarding the necessary details of the grant ?*), (*this edict*) was written by me, the great minister for peace and war (*mahāsāndhivigrahika*) **Karka, Hālāhala** being the messenger (*dūtaka*), in the year **241**, on the 15th (*tithi*) of the **bright** (*fortnight*) of **Kārttika**.

## No. 22.— FIVE BANA INSCRIPTIONS FROM GUDIMALLAM.[1]

BY V. VENKAYYA, M.A., RAI BAHADUR.

**Guḍimallam** is a village in the Kālahasti Zamīndārī of the modern Chittoor District, about 8 miles from Rēṇiguṇṭa Junction, and 13 miles south-west of Kālahasti town. On a hurried visit to the village which I paid in August 1903, I found important inscriptions; and subsequently a member of the Madras epigraphical establishment was deputed to examine the place more leisurely. In all, 26 inscriptions were copied in the **Paraśurāmēśvara** temple at the village.[2] They belong to the **Pallava king Nandippōttaraiyar** (No. 229 of 1903); the **Gaṅga-Pallava kings Vijaya-Dantivikramavarman** (No. 226 of 1903) and **Nṛipatuṅga** (No. 228 of 1903); the **Bāṇa prince Vijayāditya** (Nos. 223 and 224 of 1903); the **Chōḷa kings Parāntaka I.** (No. 225 of 1903), **Rājakēśarivarman** (No. 222 of 1903), **Vikrama-Chōḷa** (Nos. 212 and 213 of 1903) and **Rājarāja III.** (Nos. 204-11, 214, 216-21 and 227 of 1903). The village is called **Tiruvirperumbēḍu** in **Śilai-nāḍu**, a sub-division of **Vēṅgaḍa-kōṭṭam** in **Perumbāṇappāḍi**, a district of **Jayaṅgoṇḍa-Chōḷa-maṇḍalam**. In the earlier records (Nos. 226, 223, 225, 229 of 1903) the forms **Tiruvippirambēḍu** and **Tiruvirpirambēḍu** (Nos. 228 and 224 of 1903) and **Tiruvirperumbēḍu** (No. 222 of 1903) occur. In three of them, the village is mentioned without the district to which it belonged (Nos. 223, 226 and 229 of 1903). In four others Śilai-nāḍu and Vēṅgaḍa-kōṭṭam are added. If we accept the form which occurs in the earliest inscription, *viz. Tiruvippirambēḍu*, the name may be analysed into *Tiruvippiraṉ* and *pēḍu*. *Vippiraṉ* is apparently a *tadbhava* of the Sanskṛit *vipra*, 'a brāhmaṇa.' Consequently, the name would signify 'the sacred village of the brāhmaṇa.' The temple receives the names— Paraśurāmīśvarattu-Mahādēva (A. below), Paraśurāmīśvaragarattu-Perumāṇaḍigaḷ (D. below), Paraśirāmīsvaragarattu-Piraṉār (E.

---

[1] My thanks are due to Dr. Fleet who very kindly read two proofs of this article at my request and made a number of valuable suggestions, almost all of which I have adopted.

[2] Nos. 204 to 229 of the Government Epigraphist's collection for 1903.

below), Paraśurāmīśvarattu-Perumāṇaḍigaḷ (No. 222 of 1903) and Paraśirāmīśvaramuḍaiyār (No. 221 of 1903). Thus the temple is invariably called Paraśurāmīśvara from the time of the earliest inscriptions down to the present day. None of the epigraphs, however, furnishes any clue as to the circumstances which led to the choice of this name.

The subjoined inscriptions A. to E.[1] are the earliest records of the temple and are selected for publication as they throw some light on the history of a feudatory family, that of the **Bāṇas**, the members of which appear to have played an important part in Southern India in ancient times: a general note on the history of this family is given on pp. 229 to 240, below. Most of the stones on which these inscriptions are engraved were found lying in the court-yard of the temple. The fact that three of them register gifts to the Paraśurāmīśvara temple may be taken to show that the stones belonged originally to it: perhaps they became detached from the temple when it was built (or rebuilt) during the reign of the Chōḷa king Vikrama-Chōḷa.[2]

The palæography of these records does not call for any special remarks. Attention may, however, be drawn to the fact that two dots placed one above the other are used as a sign of punctuation in line 10 of A.[3] The initial vowel *i* is written in line 31 of B. and line 25 of D. exactly as in the Grantha portion of the Kāśākuḍi plates of the Pallava king Nandivarman Pallavamalla, while the more common form of the letter occurs in line 52 of the former record. Less important peculiarities are noticed in the footnotes to the text of each of the records. As regards the language, which is Tamil, the only point that deserves to be noted is the use of the phrase *chandrāditya gatam* (ll. 32 to 35 of B; and l. 10 of E.) instead of the more common *chandrāditya vat*.[4]

A. records a gift of land for a lamp to burn in the **Paraśurāmīśvara** temple by a certain **Muḷḷiṟkiḷār** who was one of the members of the committee administering the village of **Tiruvippirambēḍu**. The land granted was purchased by the donor from another member of the same committee. In B. a third member of the same committee granted land for removing silt from the tank called **Veḷḷēri** at Tiruvippirambēḍu. Out of the produce of this land were to be met the charges for digging pits in the tank and depositing the silt on the tank-bund. In C. the stone is mutilated on the right side, so that the writing has suffered on three sides of it. The missing letters on the first side can be restored with some certainty, while on the third side restoration is not possible. The object of the grant is consequently not clear; but it probably registers the gift of a lamp. In D. the Bāṇa queen **Mādēvi-aḍigal** granted 30 *kaḻañju* of gold from the interest of which was to be met the expenditure on account of twilight offerings and lamps to the Paraśurāmīśvara temple at Tiruvippirambēḍu. The assembly of Tiruvippirambēḍu accepted the endowment and undertook to provide twilight offerings and lamps. E. registers a gift of gold by a native of **Vīramaṅgalam** for a perpetual lamp. The amount consisted of twenty *kaḻañju* of gold, and the interest on it was calculated at the rate of four *mañjāḍi* per year for each *kaḻañju*. Out of the interest amounting to 4 *kaḻañju*, 180 *nāḻi* of ghee was to be purchased at the rate of 45 *nāḻi* for each *kaḻañju*. At one *uri* of ghee per day, 180 *nāḻi* would be enough for the whole year. The assembly of Tiruvippirambēḍu took charge of the endowment and agreed to provide the ghee required every day.

---

[1] These five inscriptions have also been published by Mr. T. A. Gopinatha Rao, M.A., in the *Indian Antiquary*, Vol. XL. pp. 104-114. It will be seen that there are some differences both in the readings and in the translations. Further, ll. 46 to 58 of B. are altogether omitted by him and ll. 18 to 43 of C. are left out as they are fragmentary.

[2] *Madras Epigraphical Report* for 1903-04, p. 24, No. 212 of 1903.

[3] Compare *South-Ind. Inscrs.*, Vol. II. p. 111, note 1.

[4] The expression *chandrāditya gaḷi* occurs in an inscription of the Chōḷa king **Parakēsarivarman** at **Kuḻumiyā**-malai (No. 350 of 1904).

The relationship which the members of the committee or commissioners (*gaṇattār*) bore to the village assembly is not clear. In other words, their respective jurisdiction is not known. The commissioners are said to be ruling the village. Two other villages besides Tiruvippirambēḍu are at present known to have possessed this constitution, *viz.* Uttiraṉmērūr, the modern Uttaramallūr in the Chingleput district[1] and Aimbūṇḍi, the modern Ammuṇḍi near Tiruvallam in the North Arcot District.[2] These seem to have been pretty large villages. Perhaps the commissioners were expected to represent the interests of the king.

**A.—Inscription of the time of Vikramāditya Māvali-Vāṇarāya: dated in the 23rd year of Nandippōttaraiyar.[3]**

**TRANSLATION.**

Hail! In the twenty-third year (*of the reign*) of the glorious Nandippōttaraiyar,—while Vikramāditya-Māvali-Vāṇarāya was ruling over the Vaḍugavaḷi-mēṟku (province), Muḷḷiṟkiḷār, (one) of the members of the committee (*gaṇa*) administering (the village of) Tiruvi[p]pirambēḍu, purchased by a deed of sale[8] (the field called) Vēppamboḷappāḷ (*from*) Kaṇiyar Agniśarman of Kuḷaippalūr, (one) of the members of the committee administering this village, and gave (it) to (the god) Mahādēva (Śiva) of (the temple of) Paraśurāmīśvara at this village, as an endowment for (supplying) ghee to the sacred lamps.[9] The assembly of this village

[1] *South-Ind. Inscrs.* Vol. III. p. 3.

[2] *Ibid.* p. 113. [Vēḷachcheri in the North Arcot district was another such village; see Nos. 302, 308, 312 and 315 of the Madras Epigraphical Collection for 1911.—H. K. S.]

[3] No. 229 of the Madras Epigraphical collection for 1903. As will be seen from the accompanying photo-lithographic plate, ll. 1 to 24 are engraved on one of the broad sides of the stone and ll. 25-26 on one of the narrow sides.

[4] The secondary *ā* of *ṟā* is a separate symbol.

[5] The *visarga* is used here as a sign of punctuation; compare *South-Ind. Inscrs.* Vol II. p. 111, note 1.

[6] The *akshara hādē* are much smaller than the rest of the inscription.

[7] The *puḷḷi* which is conspicuous by its absence in the whole inscription is marked on the last letter *m*.

[8] The term *vilai-śrāvaṇai* occurs twice in a similar context in *South-Ind. Inscrs.* Vol. III. p. 105, text-line 5.

[9] With *tiruviḷakku-ney-ppuṟam* compare *ambala-ppuṟam* (above, Vol. III. p. 285, text-line 7), *nandavāṉa-puram* (*South-Ind. Inscrs.* Vol. III. p. 5, text-line 5), *paḍukku-ppuṟam* (*ibid.* p. 7, text-line 8) and *veṇṇāḻiga-ppuṟam* (*ibid.* p. 12, text-line 6).

ordered that all the oil-mills (*śekku*) of this village shall be set up on this land[1] and the oil required exclusively for the sacred lamps shall be procured (*from them*).

**TRANSLATION.**

Hail! In the **forty-ninth year** of the glorious king **Vijaya-Dantivikramavarman**,—while **Vijayāditya-Mahāvali-Vāṇarāya** was ruling over the earth,—I, **Ayyappōṛṛi**, the headman (*kiḷār*) of **Kaḷiyamaṅgalam**, (one) of the members of the committee administering (the village of) **Tiruvippirambēḍu**, gave the field called **Nandikuṇḍil** in (the tank) **Tūmbaṇēri** of our

[1] It is also possible that the reading is *śēkk-uḷḷaṇa* (instead of *śekk-uḷḷaṇa*), in which case the translation would be "all (the crops) for which the fields of this village are (fit) shall be raised on this field, and the oil required for the sacred lamps shall be purchased (out of the produce)."

[2] No. 226 of the Madras Epigraphical collection for 1903.

[3] This initial vowel *i* is written as in the Grantha portion of the Kāśākuḍi plates. The more usual form occurs in ll. 37, 46 and 52 below.

[4] This symbol for one thousand occurs in one of the Nānāghāṭ inscriptions. This line has been read by Mr. Gopinatha Rao as °*ṇāṛai*, which is probably a printer's mistake for °*ṇārai*. The reading °*ṇāṛai* is unlikely as the symbol for *ai*, in other cases where it occurs in the inscription (ll. 6, 22 and 30), is not separated from the consonant to which it belongs. Besides the accusative °*ṇārai* would be wrong and would have to be corrected into °*ṇāṉ* or °*ṇār*.

[5] This side of the stone is damaged, but no letters have suffered on that account.

[6] The length of *ṇā* is added to the right of *ṇ* and goes up; compare *South-Ind. Inscrs.* Vol. I. p. 114 and Vol. II. p. 200, note 1.

[7] The vowel *e* is almost a semicircle with a loop at the left end.

(village) to (the tank called) **Veḷḷēri** of this village, as the tank-field (*ērichcheṉṟu*). I gave (it) so that (they) may dig pits in this Veḷḷēri (tank) and deposit (the silt on the bund)—(paying the charges) from the produce (*bhōgu*) of this (field).

This charity has to last (as long) as the moon and the sun endure. One who maintains this charity shall obtain the merit of having performed one thousand horse-sacrifices. One who destroys it shall incur the sin of ruining Vāraṇāśi. The feet of one who protects this charity shall be on my head.

### C.—Inscription of the time of Vāṇavidyādhara-Mahābali-Vāṇarāya: dated in the 24th year of Nṛipatuṅga.[1]

### TRANSLATION.

Hail! Prosperity! In the year of the Śakas 8[2]7, while **Vijayāditya-Vāṇarāya** was ruling the earth,— we, (the members of) the assembly of **Tiruviṟpirambēḍu** in **Śilai-nāḍu**, (a subdivision) of **Tiruvēṅgaḍa-kōṭṭam**, received gold from the magistrate (*adigāri*) **Tāḷi**, the headman of **Vīramaṅgalam**, for burning (one) perpetual lamp, as long as the moon and the sun endure, to the god (*pirāṇār*) of (the temple called) **Paraśurāmīśvaragaram** in our village. The interest on this gold— the capital of twenty *kaḷañju*— is four *kaḷañju* of gold annually, at the rate

[1] Another translation of the passage is: "Son of Māraka . . maḍigaḷ, who was the great queen *mahādēvi-Aḍigaḷ*) of the glorious Vāṇavidyādhara."

[2] No. 224 of the Madras Epigraphical collection for 1903.

[3] The *akshara ñi* (*ji*) is corrected from *ṇu*.

[4] Above the *akshara ṭṭā* is a secondary *i* which seems to have been erased by the engraver himself.

of four *mañjāḍi* (for each *kaḷañju*). One hundred and eighty *nāḷi* (may be purchased annually) for (this amount) at the rate of forty-five *nāḷi* of ghee for (each) *kaḷañju*. We shall without obstruction burn a perpetual lamp with one *uri* of ghee daily. If there be any obstruction, we (the members of) the assembly shall incur the sin committed by sinners between the Ganges and Kumari.

### Note on the history of the Bāṇa princes.

Of the foregoing records, the inscription A. is dated during the reign of the **Pallava king Nandippōttaraiyar**[1] whose feudatory was the **Bāṇa chief Vikramāditya-Māvali-Vāṇarāyar.** B. belongs to the time of the **Gaṅga-Pallava king Dantivikramavarman,** who had **Vijayāditya-Mahāvali-Vāṇarāya** for his feudatory, and C. to that of **Nṛipatuṅga,** who probably belonged to the same family, though the characteristic portions of the names of the kings of that line are here missing. The grant recorded in the latter was made while **Vāṇavidyādhara-Mahābali-Vāṇarāya** was governing the **Vaḍugavaḷi-meṛku** (province). D. and E. are dated in the **Śaka era**[2] and belong to the time of the **Bāṇa chief Vijayāditya-Mābali-Vāṇarāya.** The tract of country in which Kālahasti and Guḍimallam are situated belonged to the Pallavas,[3] and it is therefore no matter for surprise that an inscription of that dynasty and two of the Gaṅga-Pallavas have been found there.

The identity of Nandippōttaraiyar of the Guḍimallam inscription A. with Nandivarman Pallavamalla of the Kāśākuḍi plates remains doubtful, though not unlikely. As regards Dantivikramavarman, another inscription of his reign dated two years later than his Guḍimallam record has been found at Tiruchchāṇūr near Tirupati ;[4] and we may, for the present, identify him with the first Gaṅga-Pallava king **Dantivarman** of the **Bāhūr plates,** and Nṛipatuṅga with his grandson **Nṛipatuṅga-Vikramavarman.** Earlier inscriptions of the former, ranging from the 10th to the 21st year, have been so far found in the vicinity of Conjeeveram[5] and may be taken to show that his territory was limited. Why the two later inscriptions are found in a different part of the country is a point on which no information is at present forthcoming. His son Nandivikramavarman, too, seems to have been ruling a limited country, to judge from his inscriptions found

---

[1] Mr. Gopinatha Rao identifies Nandippōttaraiyar with Kō-Vijaya-Nandivikramavarman and accordingly concludes that B. is older than A. It will be seen that the photo-lithographs of these two records issued with this paper do not bear out this conclusion. Apart from his wholesale identification of all kings in whose names the word *nandi* is found as well as of those with *danti* as part of their names, both of which I consider untenable, even Mr. Gopinatha Rao cannot deny that there were at least two kings with the name Nandivarman, *viz.* Nandivarman Pallavamalla and Kō-Vijaya-Nandivikramavarman or -Nandivarman. Surely it cannot be contended that Nandivarman Pallavamalla has left no stone inscriptions. And as he is called Nandipōtarāja in the Kāśākuḍi plates, Nandippōttaraiyar of A. may for the present be identified with him. This initial mistake of Mr. Gopinatha Rao has led him to other errors in the chronology of the Bāṇas.

[2] The fact that the Śaka era is used in them is probably due to the fact that the Gaṅga-Pallavas had completely collapsed and the overlordship of the Chōḷas had not yet been recognised in that part of the country. The Bāṇas who had been feudatories of the Gaṅga-Pallavas had probably not yet made up their minds to transfer their allegiance to the Chōḷas. Similarly, in a Tiruvallam inscription, we find the Śaka date 810 given and no overlord of the Bāṇa chief is mentioned (*South-Ind. Inscrs.* Vol. III. p. 95). Other Tamil epigrapha which are dated in the Śaka era are Nos. 338 and 356 of 1902 (*Ep. Ind.* Vol. VII. pp. 136 and 137) and No. 426 of 1903 (*Annual Report* on Epigraphy for 1903-04, paragraph 20). One of the inscriptions of the Chōḷa king Virarājēndra I. is dated in the Śaka year coupled with the cyclic year (No. 273 of 1904). A record of Parāntaka I. found at Grāmam in the South Arcot District is dated in the Kaliyuga era and gives the number of days that had actually elapsed on a certain day during the reign of the Chōḷa king (*Ep. Ind.* Vol. VIII. p. 261). Another of Parakēsarivarman Uttama-Chōḷa found at Tiruviḍaimarudūr in the Tanjore District is also dated in the Kaliyuga era (*Madras Epigraphical Report* for 1907-08, paragraph 53).

[3] See the *Madras Epigraphical Report* for 1906-07, Part II, paragraph 38.

[4] No. 262 of the Madras Epigraphical collection for 1904.

[5] See the Director-General's *Annual* for 1906-07, Part II, p. 238, note 7.

so far. Nandivarman's son Nṛipataṅga was evidently the most powerful king of the family, as his inscriptions are found both in the ancient Pallava territory and in the Chōla country.[1] In fact, it may be presumed that the Gaṅga-Pallavas occupied a comparatively insignificant position during the reign of the first two kings. This partly accounts for the fact that the descendants of the original Pallavas of Conjeeveram continued until a very late period side by side with the Gaṅga-Pallavas.[2]

Apart from the Pallavas and the Gaṅga-Pallavas, the five subjoined records throw considerable light on the history of a feudatory family which played an important part in the ancient history of Southern India. These are the **Bāṇas**, who traced their descent to the demon Mahābali. They claim to be lords of **Nandagiri**, *i.e.* Nandidroog in the Chik-Ballāpur tāluka, Kōlār District, Mysore State, and their traditional capital, the place of origin claimed by them, was **Parivipura**, regarding which place see p. 231 below. The inscriptions of this family have been found in the northern portion of the North Arcot District and in the Kōlār District of the Mysore State.[3] They seem to have been the guardians of the Pallava and Gaṅga-Pallava territories in the north and often figure in cattle-raids and similar frontier wars.

The earliest mention of the Bāṇas is in the **Tāḷgund pillar** inscription of the Kadamba king Kākusthavarman. Here it is said that Mayūraśarman, the first Kadamba king, who may be assigned roughly to the 5th century A.D., levied tribute from '**the great Bāṇa**'[4] who was perhaps a Pallava feudatory. We are not told definitely where 'the great Bāṇa's' dominion lay.[5]

The country ruled over by the Bāṇas is called *Āndhrāt pathaḥ paśchimatō kshitiḥ*, '**the land to the west of the Āndhra road (or of the country called Āndhrapatha),**' in Sanskṛit in the Udayēndiram grant of Vikramāditya II;[6] **Vaḍugavaḷi-mēṟku** in A. above; **Vaḍugavaḷiyiṉ mēṟku** in C. above; the **Vaḍugavaḷi twelve-thousand** in a Tiruvallam inscription of Vijaya-Nandivikramavarman;[7] **Vaḍugavaḷi 12,000 and Maṉṉe 200** in a record from the vicinity of Puṅganūr in the North Arcot District;[8] and "**the twelve-thousand villages in the Āndhra-Maṇḍala**" in the Muḍiyanūr plates, professing to be dated in A.D. 338.[9] The last mentioned record is spurious, but there seems to be no objection to admit its evidence on the geographical point.

**Perumbāṇappāḍi**, which occurs in later Tamil inscriptions, was apparently another name for the Bāṇa territory. This province seems to have extended from Puṅganūr in the west to Kālahasti in the east. The river Pālār probably formed the southern boundary of the province in ancient times.[10] None of the foregoing terms make it clear if the Bāṇa dominions formed part of the Āndhra country, or were situated to the west of it, or should be looked for to the west of a road running from the Tamil to the Vaḍuga, Āndhra or Telugu, country. The question is further complicated by the absence of any definite boundaries of the Āndhra country that could be

[1] See above, Vol. VIII. p. 293.

[2] See the Director-General's *Annual* for 1906-07, Part II, p. 239 f.

[3] *Madras Epigraphical Report* for 1906-07, paragraph 45.

[4] Above, Vol. VIII. p. 35. The *Bṛihad-Bāṇa* of verse 15 corresponds to the term *Perum-Bāṇa* of the territorial term Perumbāṇappāḍi which appears to denote the Bāṇa dominions.

[5] From the way in which he is here mentioned it looks as if his dominions were not very far from Śrīparvatam, *i.e.* Śrīśailam in the Kurnool District.

[6] Above, Vol. III. p. 76, text-line 21.

[7] *South-Ind. Inscrs.* Vol. III. p. 90.

[8] *Madras Epigraphical Report* for 1906-07, Part II, paragraph 45.

[9] *Ind. Ant.* Vol. XV. p. 175. Dr. Fleet has told me that the real reading is not *Andhramaṇḍalē dvādaśa°* but *Andhramaṇḍaladvādaśasahasragrāma-sampādita*, etc., "lord of the seven and a half lakh country supplemented by the Andhramaṇḍala twelve-thousand villages."

[10] *Madras Epigraphical Report* for 1906-7, Part II. paragraph 45.

easily recognised and identified. On the analogy of the terms *Dakshiṇāpatha* and *Uttarāpatha*, *Āndhrapatha*, which actually occurs in the Mayidavōlu plates with Dhaṇiñakaḍa or Amarāvati as its capital (or one of its towns),[1] may be taken to be a synonym of *Vaḍugavaḷi* occurring in Tamil inscriptions. In this case, it is not clear why the Bāṇas are said in some of the records to be ruling the western portion of it, and not the whole of it as the others make us believe. Besides, Perumbāṇappāḍi, which seems to have been another name of the Bāṇa territory, and which has been tentatively located in the northern portion of the modern North Arcot District, could not have formed part of the Āndhra country. On the other hand, we have reason to suppose that it was included in Toṇḍai-nāḍu or -maṇḍalam, also called Drāviḍa.[2] The Chinese pilgrim Hiuen-Tsiang who visited India in the 7th century A.D. locates Āndhra in the modern Gōdāvari and Kistna districts.[3] Varāhamihira's location of Āndhra in the 6th century A.D. also takes us to the same locality.[4] The tract of country in which the inscriptions of the family have been found, *i.e.* the northern portion of the North Arcot District and a part of the Kōlār District of the Mysore State, would correspond to the Perumbāṇappāḍi of Tamil inscriptions, but cannot be in the west of the Āndhra country, nor form any part of it, as implied in the term *Vaḍugavaḷi-mēṛku*, *Vaḍugavaḷiyiṉ mēṛku* and *Āndhrāt pathaḥ paśchimataḥ*. Consequently we have to suppose, at least provisionally, either that there was a road leading to the Āndhra country (perhaps from Drāviḍa) or that the country which lay between Āndhra and Drāviḍa was called Vaḍugavaḷi, as the road to the Āndhra country lay through it, and it was the country to the west of this road or the western portion of it that was ruled by the Bāṇas. There is still a third possibility. It may be supposed that the name Vaḍugavaḷi-mēṛku or its equivalent was the name correctly applied to the Bāṇa dominions in very early times. Then they were probably ruling, as Pallava feudatories, a portion of the modern Ceded districts which would be situated to the west of the Āndhra country. That this is not altogether a wild conjecture is shown by the fact that the Pallava dominions originally extended into the Ceded districts and that the Bāṇas were also ruling some frontier province in that part of the country during the time of the Kadamba king Mayūraśarman. With the rise of the Chalukyas of Bādāmi in the 7th century, the Pallavas appear to have been driven out of the Telugu country and it may be supposed that the Bāṇas were forced into the northern portion of the North Arcot District. This province they continued to call Vaḍugavaḷi or Vaḍugavaḷi-mēṛku, though it was no longer to the west of the Āndhra country.[5]

Their traditional capital seems to have been **Paṛivipuri** (corrupted into Prapuri), **Paṛivai, Parigipura** or **Paṛvipura.** This place has not yet been identified. The form Parigipura may be taken to show that it may be identified with Parigi in the Hindupur tāluka of the Anantapur District.[6] This capital is mentioned for the first time in the Sholinghur rock-inscription of Parāntaka I.[7] It may, therefore, be assumed that Paṛivipura became the chief town of the Bāṇas

[1] Above, Vol. VI. p. 88.

[2] See the Director-General's *Annual* for 1906-7, Part II. p. 238, note 2.

[3] Beal's *Buddhist Records of the Western World*, Vol. II. p. 217 f.

[4] *Ind. Ant.* Vol. XXII. p. 173.

[5] The Western Gaṅgas called themselves lords of Kuvaḷālapura though their capital was Taḷakāḍ. The Telugu-Chōḍas claimed to be lords of Uṛaiyūr, though their dominions lay in the Telugu country. Similarly, local families claiming descent in the Pallava race called themselves lords of Kāñchīpura and devotees of the goddess Kāmakōṭyambikā (*i.e.* the Kāmākshī temple at Conjeeveram). In the same way, the Bāṇas might have applied the original name of their territory to any district occupied by them in later times. See also pp. 238 and 239 below.

[6] Mr. Sewell's *Lists of Antiquities*, Vol. I. p. 122.

[7] Above, Vol. IV. p. 221. Here the forms *Paṛivai* and *Prapuri* occur. *Paṛiripuri* occurs in the Udayēndiram plates of Pṛithivīpati II. (*South-Ind. Inscrs.* Vol. II. p. 388) and *Paṛigipura* in an inscription of the Bāṇa chief Aggaparāja (*Nellore Inscriptions* by Messrs. Butterworth and Venugopaul Chetty, p. 1201) and *Paṛivaipura* in No. 86 of the Madras Epigraphical collection for 1906 (*Annual Report* for 1906-7, Part II. paragraph 46). The form *Paṛvi* is furnished by No. 194 of the same collection for 1899 (*Annual Report* for 1899-1900, paragraph 85).

after they were reduced to the position of Chōḷa feudatories. Tiruvallam in the North Arcot District seems to have borne the other name **Vāṇapuram**, and it is not unlikely that it was one of the important towns, if not the capital, of the Bāṇa territory.[1] Long after the Bāṇas ceased to be rulers, members of the family claimed to be lords of Paṛivipura and Nandagiri.[2] The Bāṇa crest was a bull, and their banner bore the emblem of a black-buck, while their drum was called *Paiśāchа*.[3] Mahābali, the progenitor of the Bāṇas, is said to have been made door-keeper by the lord of gods and demons, Paramēśvara (Śiva) worshipped in all the three worlds.[4]

The **Udayēndiram grant of Vikramāditya II**,[5] furnishes the following genealogy of the Bāṇas for eight generations:

Bali.

Bāṇa.

Bāṇādhiraja.

Jayanandivarman,
who ruled the land west of the Andhra country.

Vijayāditya.

Malladēva *alias* Jagadēkamalla.

Bāṇavidyādhara.

Prabhumērudēva.

Vikramāditya I.

Vijayāditya II.
Pugaḷvippavarganḍa.[6]

Vijayabāhu-Vikramāditya II.,
"dear friend of Kṛishṇaraja".

[1] *South-Ind. Inscrs.* Vol. III, p. 89.

[2] See *e.g. Madras Epigraphical Report* for 1899-1900, paragraph 85.

[3] These are mentioned for the first time in the Udayēndiram plates of the Gaṅga-Bāṇa king Pṛithivīpati II. (*South-Ind. Inscrs.* Vol. II. p. 388, verse 24.)

[4] The expression *sakala-jagat-tray-ābhivandita-sur-âsur-ādhīsa-Paramēśvara-pratihārī-kṛita-Mahābali-kuḷōdbhava* is translated by Mr. Rice, on the strength of some Kanarese tradition, "born of the family of Mahābali, who had made Paramēśvara, lord of gods and demons worshipped in all the three worlds, (his) door-keeper;" *Ep. Carn.* Vol. X. p. ii, note 5.

[5] Above, Vol. III. p. 74 f.

[6] The title Pugaḷvippavarganḍa was also borne by a brother-in-law of the Chōḷa prince Rājāditya, son of Parantaka I. (above, Vol. VII. p. 134). This Pugaḷvippavarganḍa is called Iḷāḍarāja (*i.e.* chief of Virāṭa or Berar) (*Madras Epigraphical Report* for 1906-7, Part II, paragraph 65). His son Vīra-Chōḷa was a contemporary of the Chōḷa king Rājarāja I. and made a gift to the Jaina shrine at Pañchapāṇḍavamalai in the North Arcot District (above Vol. IV. p. 139).

As the last of them, Vikramāditya II., is said to have been the "dear friend of **Kṛishṇarāja**," who is no doubt identical with the **Rāshṭrakūṭa king Kṛishṇa II.** (A.D. 888 to 911-12),[1] we may assign him roughly to the beginning of the 10th century A.D. This would carry Jayanandivarman, the earliest known member of the family, to about the end of the 7th century A.D. But the Udayêndiram plates tell us that Jayanandivarman came to the throne after "many" Bāṇa princes had passed away. The antiquity of the family is carried further by the Tālgunda inscription of **Kākusthavarman**,[2] which, as I have already noted, reports that Mayūraśarman, the first Kadamba king, levied tribute from "the great Bāṇa." Thus the history of the family is carried back to the 5th century A.D.

According to the Tamil poem *Manimēgalai*, the queen of the **Chōḷa king Neḍumuḍikkiḷḷi**[3] was **Śirtti**, daughter of a **descendant of Māvali**. This is apparently a reference to the Bāṇa family. Śirtti was also called **Rājamādēvi** and she had a son named **Udayakumara**. The time when the Bāṇa father-in-law of the Chōḷa king flourished, cannot be made out satisfactorily at present. But it may be presumed that the former is earlier than Jayanandivarman, the first Bāṇa king mentioned in the Udayêndiram plates.

No authentic records of the earlier kings of the family have come down to us. Of **Koṅgaṇivarman**, the progenitor of the **Gaṅgas of Kōlār**, it is said that he was anointed to conquer the **Bāṇa-maṇḍala.**[4] It may be presumed that this statement gives pointed expression to the hostility which generally existed between the Gaṅgas and Bāṇas in their later history, particularly during the period of supremacy of the Rāshṭrakūṭas of Mālkhēḍ who were the suzerain lords of the Western Gaṅgas.

A stone inscription of the Gaṅga king **śrī-Mādhava-Muttarasa** at Tallapaḷḷi[5] which Mr. Rice assigns approximately to A.D. 725,[6] refers to his expedition against **Mahāvali-Bāṇarasa** and to a battle at **Kōyāttūr**, *i.e.* the modern **Laddigam** in the Puṅganūr Zamindāri. At Kendaṭṭi-Maḍivāḷa in the Kōlār District is a stone inscription of Nītimārga-Koṅgoṇivarman (Kl. 79) which Mr. Rice assigns to about A.D. 890. The Gaṅga king's feudatory Noḷambādhirāja of the Pallava family is here said to have ordered a general of his to fight against the Bāṇa

---

[1] *South-Ind. Inscrs.*, Vol. III. p. 92.

[2] Above, Vol. VIII. pp. 24 ff.

[3] He also bore the other names Kiḷḷi-Vaḷavan, Māvaṇkiḷḷi, Vaḍivēṟkiḷḷi and Veṇvēṟkiḷḷi and is said to have wedded a Nāga princess named Pīḷivaḷai. It is believed that he fought a battle on the bank of the river Kāri against the Chēras and Pāṇḍyas. The Chōḷa king also overcame the former by besieging Karuvūr. It was apparently during his reign that Kāvirippūmpaṭṭiṇam, the Chōḷa capital, was destroyed by a tidal wave. The king is said to have died at a place called Kuḷamuṟṟam and he was known in later times as "Kiḷḷivaḷavaṉ, who died at Kuḷamuṟṟam." In the Tamil anthology known as *Puṟanāṉūṟu*, there are 18 pieces in his honour composed by ten poets. In the note appended to each of these poems is mentioned this name of the king which does not figure in the body of the poem. Consequently, the assumption that these ten poets were contemporaries of the king is based on tradition current at the time when the notes were added. In the absence of definite information as to the authenticity of the tradition on which the notes are based, it is safer to abstain from drawing any historical conclusions from them. The anthology in which these 18 poems are included is believed to have been compiled by a poet named Perundēvaṉār, who probably flourished in the 8th or 9th century A.D. (*Annual Report on Epigraphy* for 1898-99, paragraph 16). The date A.D. 105-120 for Kiḷḷi-Vaḷavaṉ assigned by the late Mr. Kanakasabhai Pillai is based on the Singhalese chronicles, whose chronology is far from satisfactory. Without being dogmatic on the point, I would leave the chronology of early Tamil literature an open question until indisputable evidence is available on the point. For a tentative date of the Chōḷa king Karikāla, who was the grandfather of Kiḷḷi-Vaḷavaṉ according to Mr. Kanakasabhai, see the Director-General's *Annual* for 1906-7, Part II, p. 224, note 1; and p. 225, note 10.

king (Bāṇarasa). At Baṅgavāḍi in the same district is a Bāṇa epigraph which refers to the capture by the Permanaḍigal (*i.e.* the Western Gaṅga king), of Mahārājara-nāḍ which belonged to the Bāṇa chief (Mb. 228).[1] That the Gaṅgas and the Bāṇas were also occasionally on friendly terms is shown by the marriage of the Gaṅga princess **Kundavvaiyār**, daughter of **Pṛithivīpati I.**, with the Bāṇa king **Bāṇavidyādhara.**[2]

The kings mentioned in the stone inscriptions bear several names, and, consequently, it is often very difficult to identify them with those in the foregoing genealogical table. Though we have reason to suppose that the Bāṇas were feudatories of the Pallavas, the references to them in Pallava inscriptions are very few. In A. above, **Vikramāditya-Māvali-Vāṇarāya**, governing the Vaḍugavaḷi-mēṛku, figures as a feudatory of the **Pallava** king **Nandippōttaraiyar**, who may be identical with **Nandivarman Pallavamalla**, the last powerful king of the Pallavas. If this be the case, the Bāṇa king Vikramāditya under reference, cannot be identified with Vikramāditya I. of the foregoing table. One of the earlier kings must have borne the surname Vikramāditya; perhaps Bāṇavidyādhara, or his predecessor.

After the downfall of the Pallavas of Conjeeveram, their empire seems to have been split up, and we find the Bāṇas playing a very important part in all the frontier wars. The **Gaṅga-Pallava king Narasiṁha-Vikramavarman**, whose initial date has been placed by Dr. Fleet between A.D. 760-70, had a feudatory named **Skanda-Bāṇādhirāja.**[3] At **Baṅgavāḍi** in the Muḷbāgal tāluka of the Kōlār District is an inscription recording the death of a servant of this king on the occasion of a cattle-raid.[4] **Vijaya-Skandaśishya-Vikramavarman** of the **Rāyakōṭa plates**, who may have been a successor of Narasiṁha-Vikramavarman, also had a Bāṇa feudatory.[5] **Danti-Vikramavarman** (B. above) had **Vijayāditya-Mahāvali-Vāṇarāya** for his feudatory. This Vijayaditya must be earlier than Vijayāditya II., in the foregoing table. Dantivikramavarman's son and successor **Nandivikramavarman** had **Vikramāditya-Māvali-Vāṇarāya** for his feudatory in the 17th year of his reign[6] and an unnamed **Māvali-Vāṇarāya** in the 62nd year of his reign.[7] The former has perhaps to be identified with Vikramāditya I., as we have some reason to suppose that Nandivikrama married a daughter of the **Rāshṭrakūṭa** king **Amōghavarsha I.** (814-15 to 877-78).[8] This Vikramāditya is probably identical with Bāṇavidyādhara who married a daughter of the **Western Gaṅga Pṛithivīpati I.**, another contemporary of the Rāshṭrakūṭa king Amōghavarsha I.[9] The Bāṇa contemporary of Nandivikrama's son Nṛipatuṅga was **Vāṇavidyādhara-Mahābali-Vāṇarāya** according to C. above. As Professor Hultzsch has tentatively identified the **Pirudi-Gaṅgaraiyar**, mentioned in the Āmbūr inscriptions as a feudatory of Nṛipatuṅga, with the Gaṅga Pṛithivīpati I.,[10] it may be supposed, at least for the present, that this Vāṇavidyādhara is identical with the son-in-law of the Gaṅga king Pṛithivīpati I.

The accompanying table shows at a glance the synchronisms of the Bāṇas, the Pallavas and the Gaṅga-Pallavas:—

| | Bāṇas. | | Pallava. |
|---|---|---|---|
| 1. | Vikramāditya Māvali-Vāṇarāya, | feudatory of | Nandippōttaraiyar (23rd year). |

[1] El. 235, Bp. 48 and Bp. 86 of the Kōlār volume mention a Mahāvali Bāṇarasa ruling the Gaṅga 6,000 province. The first two are assigned by Mr. Rice to about A.D. 890 and the third to about A.D. 770. These inscriptions may imply a temporary occupation of the Gaṅga country by the Bāṇas; see *Ep. Carn.* Vol. X. Introduction, p. vi.

[2] *South-Ind. Inscrs.* Vol. III. p. 99.

[3] Above, Vol. V. p. 160. The first member of the name Skanda-Bāṇādhirāja might denote his overlord.

| Bāṇas. | | | Gaṅga-Pallavas. |
|---|---|---|---|
| 2. Skanda-Bāṇādhirāja | feudatory | of | Vijaya-Narasiṁhavarman. |
| 3. Māvali-Vāṇarāya | do. | do. | Vijaya-Skandaśishya-Vikramavarman. |
| 4. Kārōniri-Bāṇarāja | do. | do. | Vijaya-Īśvaravarman.[1] |
| 5. Vijayāditya-Mahāvali-Vāṇarāya | do. | do. | Vijaya-Dantivikramavarman (40th year). |
| 6. Vikramāditya (I.) Māvali-Vāṇarāya | do. | do. | Vijaya-Nandivikramavarman (17th year). |
| 7. Māvali-Vāṇarāya | do. | do. | Vijaya-Nandivikramavarman (62nd year). |
| 8. Vāṇavidyādhara-Mahābali-Vāṇarāya | do. | do. | Nṛipatuṅga (24th year). |

9. Mahāvali-Vāṇarāya, Śaka-Saṁvat 810.[2]
10. Vijāyāditya-Māvali-Vāṇarāya, son of 8, Śaka-Saṁvat 820, 827, 831.[3]
11. Vikramāditya (II), contemporary and "dear friend" of Kṛishṇarāja, *i.e.* the Rāshṭrakūṭa-king Kṛishṇa II. (A.D. 888 and 911-12).

The inscriptions discovered in the Puṅganūr Zamīndārī of the North Arcot District mention Mahāvali-Bāṇarasa-**Vikramāditya**-Bāṇakandarpa-Jayamēru, Mahāvali-Vāṇarasa-**Bāṇavidyādhara** and Mahāvali-Vāṇarasa-**Vijayāditya**-Virachūḷāmaṇi-Prabhumēru. One of the records of the first of these kings refers to a battle fought at **Soremaṭi**, where the Bāṇa opposed, on behalf of the **Permanaḍi** (*i.e.* the Western Gaṅga king?), the **Noḷamba** (king?) and **Rāchamalla** and **Mayindaḍi**.[4] A *vīragal* at Madanapalle in the Cuddapah District refers to a battle at the same place, which probably took place during the reign of the **Vaidumba king Gaṇḍa-Triṇētra**.[5] A stone at **Baṅgavāḍi** in the Kōlār District refers to an encounter between the same parties.[6] If the Rāchamalla in these *viragals* was a Gaṅga, he may be identified with the **Satyavākya Koṅguṇivarma-Permanaḍi Rājamalla**, whose final date is about A.D. 870-71.[7] If this identification be correct, the date of the Mahāvali-Bāṇarasa of the Puṅganūr inscriptions may be taken roughly as the middle of the 9th century A.D.

According to the **Gūlgānpode** epigraphs,[8] Vikramāditya, who has been identified by Dr. Fleet and Professor Hultzsch with Vikramāditya I. (No. 6 in the foregoing genealogical table) was also called Jayamēru.[9] It may, therefore, be concluded that the above mentioned Mahāvali-Bāṇarasa-**Vikramāditya**-Bāṇakandarpa-Jayamēru is identical with Vikramāditya (No. 6 in the preceding table of synchronous kings). Perhaps the Mahāvali-Vāṇarasa-**Bāṇavidyādhara** mentioned in another Puṅganūr inscription is also identical with Vikramāditya I. In the two Gūlgānpode inscriptions, reference is made to a commander named **Prabhumēru**, who might have been a general called after the father of Vikramāditya I. It is, however, not unlikely that Vijayāditya-Virachūḷāmaṇi-Prabhumēru mentioned above is identical with **Vijayāditya II.**, in which case the Prabhumēru of the Gūlgānpode records might be the son of **Vikramāditya I.** This identification receives some support from the fact that, in one of the Gūlgānpode tablets, it is said that, by order of Prabhumēru, a hero fought against the **Kāḍuvaṭṭi** force, while in the Puṅganūr record of Vijayāditya reference is made to a raid on **Kōyatūr**, *i.e.* Laddigam in the Puṅganūr Zamīndārī, by **Kāḍuvaṭṭi-Mutṭarasa**.[10]

As **Vikramāditya II.** was a friend of **Kṛishṇarāja**, who has been identified with the **Rāshṭrakūṭa Kṛishṇa II.** (A.D. 888 and 911-12), it may be concluded that the **Vijayāditya**.

son of **Bāṇavidyādhara**, mentioned in D. and E. above, must be identical with **Vijayāditya II.** This identification, if confirmed by future researches, would show that Vikramāditya I. also bore the surname Bāṇavidyādhara—a fact already surmised by Dr. Fleet from the Gulgānpode records.

The fact that the two **Guḍimallam** inscriptions of **Vijayāditya** are dated in the Śaka era and that they mention no overlord is significant: the dates are **Śaka-Saṁvat** 820 and 827 corresponding to A.D. 897-98 and 904-5. We have another date for the same king in an inscription at Maṇigaṭṭa-Gollarahaḷḷi:[1] here the **Bāṇa** prince **Bejeyitta-Bāṇarasa** is said to be ruling in Śaka-Saṁvat 831, corresponding to A.D. 909-10. If this be the case, the Bāṇa king **Vikramāditya II.** must have assumed the leadership of the Bāṇas towards the close of the reign of the Rāshṭrakūṭa king Kṛishṇa II. The reasons which must have led to Vikramāditya's courting the friendship of the Rāshṭrakūṭas may now be examined.

We have already seen that the **Gaṅgas** and **Bāṇas** were often fighting with one another. At **Kendaṭṭi-Maḍivāḷa** in the Kōlār District is a stone inscription of **Nitimārga Koṅguṇivarman** which Mr. Rice assigns to about A.D. 890.[2] The Gaṅga king's feudatory, **Noḷambādhiraja** of the **Pallava** family, is here said to have ordered a general of his to fight against the Bāṇa king (Bāṇarasa). Another unnamed Bāṇa king is said in a *vīragal* at **Baṅgavāḍi** in the same district to have opposed a confederacy of the **Noḷamba king, Rāchamalla, Mayindaḍi** and **Daḍiga.**[3] At **Dharmapuri** in the Salem District is a pillar (now removed to the Madras Museum) which records a gift by the Pallava king **Mahēndrādhirāja-Noḷamba.** The latter claimed to have "**destroyed the Mahābali** (*i.e.* **Bāṇa**) **family.**" The inscription is dated in A.D. 892-93. Mahēndrādhirāja-Noḷamba was the son of **Noḷambādhirāja** by **Jāyabbe,** the daughter of the **Gaṅga king Rājamalla.**[4] As the latter was the grandfather of the Noḷamba king Mahēndrādhirāja, whose date is A.D. 892, we may identify the Gaṅga king Rājamalla with the **Satyavākya-Koṅguṇivarma-Permanaḍi Rājamalla** for whom Dr. Fleet gives the date A.D. 840 to 870-71.[5] The Nitimārga-Koṅguṇivarman of the Maḍivāḷa inscription, whose contemporary and feudatory was the Noḷamba king Noḷambādhirāja, has to be identified with Rājamalla's father **Raṇavikrama,** for whom Dr. Fleet gives the approximate dates A.D. 810 to 840. It is just possible that Noḷambādhirāja was contemporaneous with both Rājamalla and his father Raṇavikrama and fought against the Bāṇas. We have already seen that the northern portion of the North Arcot District was included in the Bāṇa dominions. At **Vaḷḷimalai,** which would be almost in the centre of the Bāṇa territory, we have an inscription of the **Gaṅga king Rājamalla.** Of him it is said that, having seen the Vaḷḷimalai Hill, he took possession of it and caused a Jaina *basti* to be made on it.[6] Though it is not stated from whom the Gaṅga king took possession of the hill, we may suppose that it was wrested from the Bāṇas. An image of a pupil of the Bāṇa prince's spiritual preceptor is cut in relief on the hill not far from the Gaṅga inscription. This unfortunately is the only vestige of Bāṇa rule which is now traceable on the hill. But **Mēlpāḍi,** which is only a mile from the hill, is said to have belonged to **Perumbāṇappāḍi** in the Chōḷa inscriptions found in two Śiva temples at the village.[7] It may, therefore, be supposed that the Gaṅgas and Noḷambas had joined together[8] to fight against the Bāṇas.[9] The capture of Vaḷḷimalai by the Gaṅga king Rājamalla was effected apparently in the campaign

[1] *Ep. Carn.* Vol. X. Kōlār, Mb. 229.

[2] *Ibid.*, Kl. 79. In the introduction to the Kōlār volume, p. vii, Mr. Rice assigns the Bāṇa prince mentioned in the inscription to about A.D. 850.

[3] Above, Vol. VII. p. 23. [4] Above, Vol. X. p. 56. [5] Above, Vol. VI. p. 66.

[6] Above, Vol. IV. p. 141. [7] *South-Ind. Inscrs.*, Vol. III. p. 22.

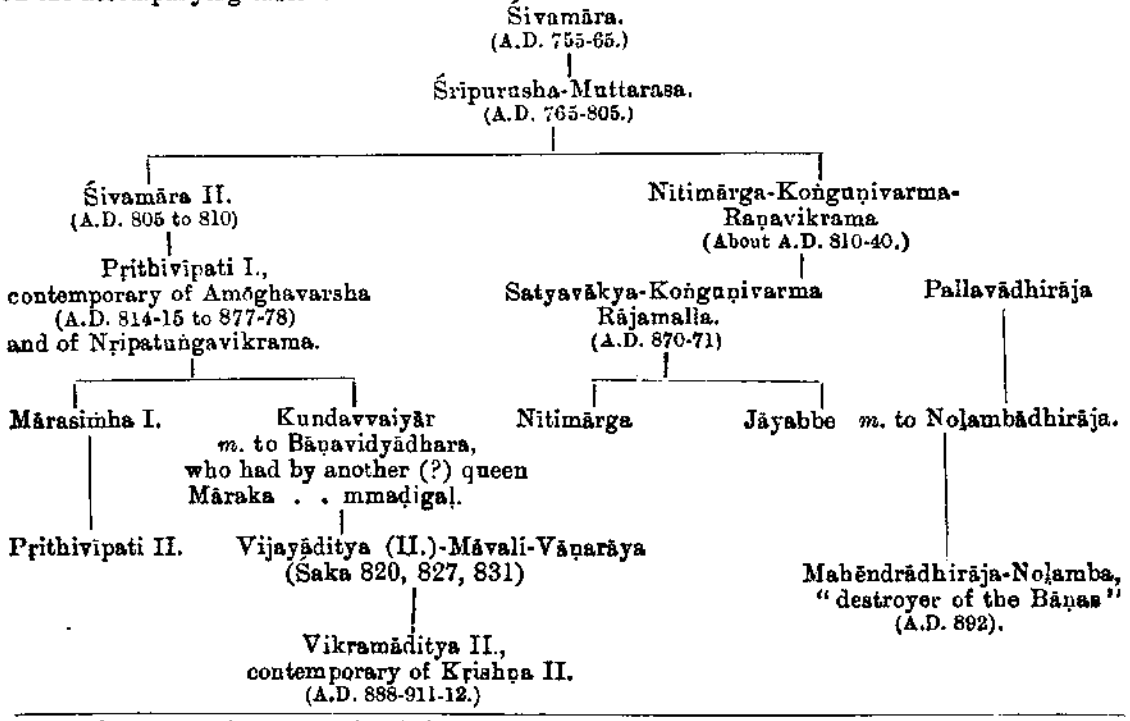

[8] In the 10th century the relationship between the Gaṅgas and Noḷambas seems to have been completely altered and the Gaṅga prince Mārasimha II. boasted of having destroyed the Noḷambas; above, Vol. V. p. 179.

[9] The enmity between the Bāṇas and Noḷambas is also indirectly shown by the fact that the Gaṅga 6,000 district was sometimes governed by the Bāṇas and at other times by the Noḷambas; see *Ep. Carn.* Vol. X., Kōlār, Introduction, pp. vi and vii.

against the Bāṇas.[1] The claim of the Noḷamba king Mahēndrādhirāja, grandson of the Gaṅga king Rājamalla, to have destroyed the Mahābali family was evidently not an empty boast. Consequently, the Bāṇas must have been driven to a corner about the time of which we are now speaking.

Again, in the Tamil country, the **Gaṅga-Pallavas** who had been overlords of the Bāṇas were evidently tottering at the time. Prior to A.D. 897-98, the date of the earlier Guḍimallam inscription (D.), the decisive battle of **Tiruppuṟambiyam** must have been fought between the Gaṅga-Pallava **Aparājita** and the **Pāṇḍya king Varaguṇa. The Chōḷas** must also have taken the place of the Gaṅga-Pallavas in the tract of country of which we are at present speaking. It was evidently a time when the Gaṅga-Pallavas had disappeared from the scene and their place had not been actually taken by the Chōḷas. Perhaps this was why the two last of the subjoined inscriptions do not mention any overlord, but are dated in the **Śaka era.** This state of things probably continued for some time. For, in Śaka-Saṁvat 831, corresponding to A.D. 908-9,[2] the same Bāṇa prince **Vijayāditya II.** was ruling, but there is no mention of any overlord in the inscription. Perhaps his son **Vikramāditya II. of the Udayēndiram plates** represents himself as an independent king for this reason. The political condition of Southern India at the time rendered it necessary for Vikramāditya II. to make friends with some powerful king. As the Bāṇa prince Vijayāditya seems to have ruled until at least A.D. 909, his successor Vikramāditya II. must have assumed the leadership of the Bāṇas subsequent to that date. In this case, he must have become the friend of Kṛishṇa II. towards the close of the latter's reign.

Though the Noḷamba king Mahēndrādhirāja claims to have "destroyed" the Bāṇas, they continued much longer. They appear to have lost their power and influence with the decline of the Gaṅga-Pallavas. The synchronisms of the Gaṅga, Bāṇa and Noḷamba dynasties are shown on the accompanying table[3] :—

[1] Reference is made in a Bāṇa inscription to an invasion of Kāñchī by the Gaṅga king Rāchamalla. The Bāṇa prince was apparently ruling the Gaṅga 6,000 district at the time; see *Ep. Carn.* Vol. X. Kōlār, Bp. 86.

[2] *Ep. Carn.* Vol. X. Kōlār, Introduction, p. vi.

[3] For the Gaṅgas, compare the table given by Dr. Fleet, Vol. VI. above, p. 59.

The subsequent history of this feudatory family is not altogether devoid of interest. How long **Vikramâditya II.** continued to rule, we have at present no means of ascertaining. Either he or his successor must have been conquered by the **Chōḷa king Parāntaka I.** in or before A.D. 921-22. The latter claims to have uprooted by force two lords of the **Bāṇa** kings.[1] We are not, however, told whether he uprooted two Bāṇa kings in succession or simultaneously. Anyhow, he made over the Bāṇa kingdom to his Gaṅga feudatory **Pṛithivīpati II. Hastimalla** in or before A.D. 915-16[2] and called him **Śembiyaṉ Māvalivāṇarāyaṉ**, *i.e.* "the Mahāvalivāṇarāja (who was a feudatory) of the Chōḷa king."[3] At **Yedarūr** in the Kōlār District of the Mysore State is a stone inscription dated in Śaka-Saṁvat 883 corresponding to A.D. 961 which mentions a Bāṇa chief named **Sambayya** as a feudatory of **Iṛiva-Noḷamba.**[4] Again at **Sannamūru** in the Podili division of the Nellore District is another stone inscription of the Bāṇa family. I have read the date tentatively as Śaka-Saṁvat 890 (corresponding to A.D. 968) and the name of the Bāṇa chief as **Aggaparāju.**[5] The latter does not mention any overlord and this may be taken to show that he was semi-independent. The date falls into the reign of the **Eastern Chālukya king Amma II.**[6] and is a few years prior to the interregnum in the **Vēṅgi** country.[7] What part, if any, this Bāṇa king played in the interregnum we have at present no means of ascertaining. We shall not be far wrong if we suppose that the **Chūṛaballirāju,** who figures in a stone inscription at **Koṇidena** (near Narsaraopet in the Guntur District)[8] was a descendant of Aggaparāju. The inscription of Chūṛaballirāju is dated in Śaka-Saṁvat 1073, corresponding to A.D. 1150-51, which falls into the reign of the **Chālukya king Rājarāja II.**[9]

In the Tamil districts of the Madras Presidency, the history of the Bāṇas does not come to an end with their conquest by Parāntaka and the transfer of their dominions to their rivals, the Gaṅgas. It has been surmised that the Bāṇas were originally settled in the Telugu country and that at a later stage in their history they moved into the northern part of the modern North Arcot District but retained the original designation of their territory. After Perumbāṇappāḍi was transferred to the Gaṅgas, or perhaps at an earlier period in their history,[10] the Bāṇas seem to have moved further south, crossed the river Pālâr which seems to have been originally the southern boundary of their territory, and settled on the banks of the river **Southern Pennar,** calling the new province **Vāṇakōppāḍi or Vāṇagappāḍi.**[11] In A.D. 948-9, the **Rāshṭrakūṭa king**

[6] He reigned from A.D. 945 to 970.

[7] Above, Vol. VI. p. 349.

[8] *Madras Epigraphical Report* for 1899-00, paragraph 85. The description of Chūṛaballirāju is as follows: —*Sakala-sur-āsur-ādhīśvara-Paramēśvara-pratihārikṛita-(°rīkṛita)-Vaśishṭa-gōtra-kṛishṇa(°kṛishṇa)dhvaja-Paiśāchika-paṭu-paṭaha-ghōshaṇa-vṛishabha(°vṛishabha)-lāñchchana(°lāñchhana)-Nandagirināṭha-Parvi-puravar-ādhīśvara-kārmmukha(°kārmuka)-Rāma-monage-muṁkolva-ahita-Dhanaṁjaya-patikitābharaṇa-sahaja-liyakāra-śaraṇāgata-vajraprākāra-samaraikamārtta[ṇḍa*]-yubhayarāya-kaṭakamu ne]ṛva-chelvānegal-agaja-dānamalla-kīrttigenalla-Vīraperbbā[ṇa]-śrīmanmahāmaṇḍalēśvara-Chūṛaballirāju.*

[9] A later reference to the Bāṇas occurs in the Sanskṛit work *Pratāparudrayaśōbhūshaṇa* of Vidyānātha. But this does not throw any light on the history of the family.

[10] The name Vāṇakōvaraiyar occurs already in two inscriptions of the 17th year of the Gaṅga-Pallava king Vijaya-Nandivikramavarman (above, Vol. VII. p. 139 and No. 302 of the Madras Epigraphical collection for 1902). Perhaps a small colony of the Bāṇas moved out of Perumbāṇappāḍi soon after the decline of the Pallavas of Conjeeveram.

[11] In the time of Rājēndra-Chōḷa I, Vāṇagappāḍi or Vaḍagarai-Vāṇagappāḍi was called Maduraṇṭaka-vaḷanāḍu and Rājēndra-vaḷanāḍu during the reign of Kulōttuṅga I; *Madras Epigraphical Report* for 1906-7, Part II, paragraph 46.

Kṛishṇa III. had a **Gaṅga** feudatory named **Pṛithivīgaṅgaraiyar**, whose wife was the daughter of **Vāṇakōvaraiyar**.[1] This may be taken to show that the province of Vāṇagappāḍi had come into existence prior to A.D. 948-9. Kṛishṇa III. appears to have made over the province to a **Vaidumba** feudatory of his, as it figures among the territories administered by the latter.[2] We have, however, no reason to suppose that the Bāṇas were completely driven out of Vāṇagappāḍi at the time. The **Vāṇarāja Aḷagaraiyaṇ** who is mentioned in a **Tirumāḷpuram** inscription of **Pārthivēndravarman** was apparently a member of the family who had settled in the vicinity of Conjeeveram.[3] We have a certain **Maṛavaṇ Narasiṁhavarman** *alias* **Rājarāja-Vāṇakōvaraiyar**, with the usual Bāṇa titles, as a feudatory of the **Chōḷa king Rājarāja I.** in an inscription at **Jambai** in the South Arcot District.[4] The same Bāṇa chief built the tank at Neṛkuṇṛam *alias* Vayiramēga-chaturvēdimaṅgalam.[5] In an inscription of a Chōḷa king named **Karikāla**, whose time is at present unknown, reference is made to a certain **Vāṇakōvaraiyar Viraparumar** (*i.e.* Vīravarman).[6]

In later times[7] there was a chief named **Poṇparappiṇa Vāṇakōvaraiyar**, a feudatory or officer of **Sakalabhuvanachakravartin Peruñjiṅgadēva**.[8] He is apparently identical with **Magadēśaṇ Vāṇakulōttamaṇ and Vīramāgadāṇ Rājarājadēvaṇ Poṇparappiṇāṇ**[9] **Magadaipperumāḷ**,[10] mentioned in certain inscriptions from Tiruvaṇṇāmalai in the South Arcot District and Kuḍumiyāmalai in the Pudukkōṭṭai State. A number of Tamil verses in his praise have been found engraved on stone in the South Arcot District and in the Pudukkōṭṭai State.[11] His title Magadēśaṇ or Magadaipperumāḷ is interesting. From Hoysaḷa inscriptions we know that the Hoysaḷa king **Narasiṁha II.** uprooted the **Makara** or **Magara** kingdom.[12] The Tiruvēṇḍipuram inscription of the Chōḷa king Rājarāja III. informs us that Narasiṁha II. "uprooted the **Mahara kingdom**, seized him (*i.e.* the Mahara chief), his women and treasures and halted at Pāchchūr." In editing the inscription Dr. Hultzsch had remarked that the Magara kingdom has to be looked for in the Coimbatore or Salem District.[13]

At Tiṭṭaguḍi on the border between the districts of Trichinopoly and South Arcot has been found an epigraph of **Magadēśaṇ Poṇparappiṇa Vāṇakōvadaraiyar** recording the gift of a

---

[1] Above, Vol. VII. p. 195. This Pṛithivīgaṅgaraiyar, who also bore the surname Hastimalla, was different from and later than his namesake who was a contemporary of the Chōḷa king Parāntaka I. In a Tirukkōvalūr inscription of the Chōḷa king Parakēsarivarman, the queen of Vāṇakōvaraiyar figures as the donor (*ibid.* p. 141).

[2] *Madras Epigraphical Report* for 1904-5, Part II, paragraph 28.

[3] *Ibid.* for 1906-7, Part II, paragraph 46.

[4] No. 86 of the Madras Epigraphical collection for 1906. This is how he is described in the inscription: *Sakala-sur-āsura-samadhikata(-gata ?)-vijaiya-śri-manōhāri-vallabha-mahārāja-Maha(hā)bali-kula-tilakāyamāna-[Pa]ṇṇaiśariruḍaiyananda-Nandagri(giri)nātha-Paṛivaipura-paramēśvara-veṭchi-chinnāḷa ṁgḥṛita (°chihn-āḷaṁkṛita)-ṛrishabhalāñjanaḥ* (°*tāñchhanaḥ*).

[5] No. 84 of the Madras Epigraphical collection for 1906.

[6] No. 109 of the same collection.

[7] In the time of Kulōttuṅga I., his throne at Muḍigoṇḍaśōḷapuram was called Vāṇāḍhirājaṇ (Nos. 93, 94, 95 and 96 of 1910). One of his officers was Vāṇarājaṇ or Vāṇarāya (No. 138 of 1896 and No. 312 of 1901). Vikrama-Chōḷa had also an officer named Mahābali-Vāṇarāya (No. 545 of 1904 from Tiruvārūr) and another called Virudarājabhayaṅkara-Vāṇakōvaraiyaṇ (No. 112 of 1895).

[8] No. 159 of the Madras Epigraphical collection for 1906.

[9] It is doubtful if this chief is identical with Rājarājadēvaṇ Poṇparappiṇāṇ *alias* Vāṇakōvaraiyaṇ of Aṛkaḷūr who was a feudatory of Kulōttuṅga III. (Nos. 532, 533 and 557 of the Madras Epigraphical collection for 1902).

[10] Nos. 507, 543 and 544 of 1902 and Nos. 381, 382, 383 and 385 of the Madras Epigraphical collection for 1906.

[11] The chief's claim to have covered with gold (*poṇparappiṇa*) is obscure. He might have gilt the Tiruvaṇṇāmalai temple. It may also be that he regilt the Śiva temple at Chidambaram.

[12] *Bombay Gazetteer*, Vol. I. Part II. p. 507.

[13] Above, Vol. VII. p. 161. Toḷudagaiyūr, where Śōḷakōṇ, an adherent of the rebel Peruñjiṅga, was staying is probably identical with Toḷudūr on the Madras-Trichinopoly road, 8 miles from Vāḷikaṇḍapuram and 28 miles west-south-west of Vṛiddhāchalam.

village in **Magadai-maṇḍalam.**[1] Three other records from the same village[2] show that the district of Magadai should have been close to the village, if it was not actually included in it. It would not be an altogether wild conjecture to suppose that Mahara, Makara and Magara of the Hoysaḷa inscriptions is identical with the Magadai-maṇḍalam ruled over by the Vāṇakōvaraiyar Poṉparappiṉāṉ mentioned in the foregoing paragraph.[3] If this identification be true, it would indicate the movement of the Bāṇas further south as far as the Pudukkōṭṭai State. The chief of this province who was evidently a feudatory of the rebel **Peruṇjiṅga** had to be overcome before the latter could be attacked by the Hoysaḷa generals commissioned to liberate the Chōḷa king Rājarāja III. from captivity.[4]

We have traced the movement of the Bāṇas as far south as the Pudukkōṭṭai State. In still later times they figure as feudatories and officers of the **Pāṇḍyas** in the 13th century A.D.[5] Mr. Sewell mentions two chiefs, one named **Sundara Tōḷ Mahāvilivāṇādirāyar** and the other **Muttarasa Tirumalai Mahāvilivāṇādirāyar** as rulers of Madura in the period A.D. 1451—1499.[6] We have a few inscriptions of the 16th century which show that the Bāṇas continued to wield some power and influence. These have been found at Kāḷaiyārkōyil, Tiruppullāṇi and Dēvīpaṭṭaṇam in the Madura district. The earliest of the chiefs mentioned in them is **Mahābali-Vāṇādharāya-Nāyaka.**[7] Then came **Sundarattōḷ-Uḍaiyār Māvali-Vāṇādarāyar**[8] or **Sundarattoḷuḍaiya Mahābali-Vāṇādarāyar.**[9] He was apparently also known as Māvali-Vāṇādarāyar without any additional designation.[10] In two of them he bears the epithet *iṟandakālam eḍutta* 'who revived the past,' (*i.e.* re-established the Pāṇḍya kingdom). This may be taken to show that he took some part in the attempt made by the contemporaneous Pāṇḍya princes Śrīvallabha and Kulaśēkhara to set up a show of Pāṇḍya sovereignty.[11]

Thus the history of the Bāṇas furnishes another instance of the movement of a tribe from one part of Southern India to another. This aspect of Indian history has already been explained in my article on the Pallavas published in the Director-General's *Annual* for 1906-7.

---

[1] No. 10 of the Madras Epigraphical collection for 1903. The donee in the Madras Museum plates of the Pāṇḍya king Jaṭilavarman was a native of Śabdāḷi in the province of Magadha. In editing the plates, I assumed (*Ind. Ant.* Vol. XXII. p. 74, footnote 91) that this was the well-known province of that name in Northern India. It is, however, not impossible that the former is identical with Magadai-maṇḍalam.

[2] Nos. 12, 14 and 15 of the Madras Epigraphical collection for 1903.

[3] It is worthy of note that there is a village named Poṉparappi in the Kaḷḷakurchi tāluka of the South Arcot District which may be supposed to have been included in the dominions of the Bāṇa chief Magadēśaṉ. It is just possible that the name Poṉparappi has to be traced to the Bāṇa chief of whom we are now speaking.

[4] Above, Vol. VII. p. 168.

[5] In the Sir Walter Elliot collection is an impression of Tribhuvanachakravartin Kōṉērimaikoṇḍāṉ, whose feudatory was Aḷagāṇḍār *alias* Mahābali-Vāṇarāyar. The king's surname was apparently Avaṇivēṇḍarāma which may be that of a Pāṇḍya king; *Arch. Surv. of Southern India*, Vol. IV. p. 185. In the reign of Māṟavarman Sundara-Pāṇḍya I. (A.D. 1216-35) the throne of the Pāṇḍya king at Madura was called Vāṇādharāyaṉ, while Vikrama-Pāṇḍya-Vāṇādarāyaṉ was one of the officers of Jaṭāvarman Sundara-Pāṇḍya I. (A.D. 1251-61). Prince Kulaśēkhara-Mahābali-Vāṇarāyar figures in a record of Jaṭāvarman Vīra-Pāṇḍyadēva from Śiṉṉamaṉūr in the Madura District.

## No. 23.—DATES OF CHOLA KINGS.

By R. Sewell, I.C.S. (Retd.), M.R.A.S.

### RAJARAJA I.

**223.—In the Umāmahēśvara temple at Kōnērirājapuram.**[1]

1 [Sva]sti śr[ī] [||*] Tirumaga[ḷ pō]la . . . . . .
4 . . . . . śrī-Kōv=Irājarāja-Rājakēsariparma[rk]k=iy[ā]ṇ[ḍu 2]6 āvadu . .
5 . . . . . i[y]-ā[ṭ]ṭai [Kaṛ]ka[ḍa]ga-nā[ya*]rṛu apara-pakshattu padi[ṇā] . . . m Bu[da]ṉ-kiḻamai[2]
6 perṛa P[uṇ]ar[pūśat]ti-[n]āṇṛu.

"In the **[2]6th year** (*of the reign*) of the glorious king **Rājarāja-Rājakēsarivarman,**—on the day of **Punarvasu,** which corresponded to a **Wednesday** and to the [four]teenth[3] [*tithi*] of the second fortnight of the month of **Karkaṭaka** of this year."

The date in this case is, like most others of this early period, worded in a manner a little different from the stereotyped form of later years in South India; so much so that while Mr. Krishna Sastri has stated it as referring to the 14th, or possibly 16th, solar day in Karkaṭaka, I find that it tallies with the 14th *tithi* of the second fortnight of Āshāḍha but with the 19th solar day of Karkaṭaka, and, since the word for "14th", *padi*[*ṇā*] . . . *m*, occurs in the original between *apara-pakshattu* and *Bu*[*da*]*ṉ-kiḻamai*, I presume that it is possible that the number "14" refers rather to the *tithi* than to the solar day.[4]

In the 26th year of Rājarāja I Rājakēsarivarman, the 14th *tithi* of the second fortnight of Āshāḍha was current at mean sunrise on Thursday, July 13th A.D. 1010, which was the 19th solar day of Karka. Now the 14th *tithi* of Āshāḍha is devoted to one of the Śivarātri festivals, and accordingly this *tithi* is liable to be joined with the Wednesday rather than with the Thursday, the midnight between the two having been included in it (Kielhorn, *Ind. Ant.* 1897, pp. 177, 181). This 14th kṛishṇa *tithi* began 13h. 15m. before mean sunrise on the Thursday and included the midnight in question; while the *nakshatra* Punarvasu began, according to the equal-space system, 18h. 6m. before that mean sunrise, and considerably earlier than that by the systems of Garga and the Brahma-siddhānta, being current both at midnight on Wednesday and at mean sunrise on Thursday. I think therefore that the day corresponding to the given day was **Wednesday, July 12th A.D. 1010.** If this is correct the accession of this sovereign must have taken place between June 25th and July 12th A.D. 985.

### KULOTTUNGA-CHOLA I.

**224.—In the Umāmahēśvara temple at Kōnērirājapuram.**[5]

1 Svasti śrī [||*] Puṉaḻ-mādu viḻaṅga . . . . .
7 . . . . . [śrī-Rājakē-
8 śariva]nmar=āna [6]Dhiribhvanachchakkaravatt[i]ga[ḷ] śrī-

[1] No. 624 of the Madras Epigraphical collection for 1903.
[2] The letter *m* is engraved at the beginning of line 6. [3] The *tithi* may also be the sixteenth.
[4] Mr. Krishna Sastri's reason for thinking of the solar day and not of the *tithi* is that the numbers of lunar *tithis* are in South India commonly given in Sanskrit and not in Tamil. But neither the 14th nor the 16th solar day of Karka was Wednesday in this year, but Saturday and Monday respectively, and the use of the Tamil numeral is probably a consequence of the high age of the record.
[5] No. 647 of the Madras Epigraphical collection for 1909. [6] Read *Tribhuva-*.

9 [Kulō]ttu[ṅ]ga-Sōḷadēvarkku iyāṇ-
10 ḍu [nāṟpatton]badāvadu Mēsha-nāyaṟṟu pūrvva-
11 [pak]sha[ttu Utti]ramum Budan-kiḻamaiyum [p]e-
12 [ṟṟa] tra[y]ōdaśi-nāṟṟu.[1]

"In the **forty-ninth year** (*of the reign*) **of the glorious Rājakēsarivarman**, *alias* **the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva**,—on the day (which was) the thirteenth *tithi* and which corresponded to a **Wednesday** and to (*the day of*) **[Uttara-Phalgunī]** of the first fortnight of the month of **Mēsha**."

The given date corresponds to **Wednesday, March 26th A.D. 1119**, on which day the 13th śukla *tithi* of the first fortnight of Chaitra was current at mean sunrise, as also the *nakshatra* Uttara-Phalgunī. This day was the 3rd solar day of Mēsha.

Thus the 49th year of Kulōttuṅga-Chōḷa I began on, or later than, 27th March A.D. 1118 and the reign must have begun on, or later than that date in A.D. 1070; so that for this king's accession we now have the period March 27th to October 8th A.D. 1070.

### 225.—In the Umāmahēśvara temple at Kōnērirājapuram.[2]

1 Svasti śrī [||*] [Puga]ḷ śūḻnda] . . . . . .
13 . . . . . Kō[v=I]rājakēsaka(ri)[va]rmmar=āṇa Tr[i]-
bhuva[ṇach]chakkarava[r]ttigaḷ śri-Kulōttuṅga-Śōḷadēvaṟ[ku] yāṇḍu
47āvadu Dhan[u]-nāyaṟṟu pūrvva-pakshattu piradamaiyum Tiṅgaḷ-
14 kiḻamaiyum peṟṟa Mūlatti-nāḷ.

"In the **47th year** (*of the reign*) **of king Rājakēsarivarman** *alias* **the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva**,—on the day of **Mūla** which corresponded to a **Monday** and to the first *tithi* of the first fortnight of the month of **Dhanus**."

To paraphrase the opening passage of Professor Kielhorn's remarks on his Chōḷa date No. 40 (Vol. VI. p. 279),—"a date in the month of Dhanus of the 47th year of the king's reign will be expected to fall near the end of A.D. 1116." Now, as detailed, the given date is incorrect for the 47th regnal year. But it is perfectly correct for the 48th year, *viz.*, towards the end of A.D. 1117. Now Mr. Krishna Sastri informs me that the figures 47 are perfectly clear in the original and cannot be read 48. We must therefore assume that the composer of the record made a mistake.

The given date, except for that mistake, corresponds with **Monday, November 26th A.D. 1117**, which was the 2nd solar day of Dhanus, and on which day at mean sunrise the first *tithi* of the first fortnight of Pausha was current. By the equal-space system the nakshatra current at that mean sunrise was Mūla, but by the system of Garga and by the Brahma-siddhānta the current nakshatra was Pūrva-Āshāḍha. I conclude that the date is genuine, but that the composer erroneously stated the 47th instead of the 48th regnal year.

### 226.—In the Sāra-Paramēśvara temple at Tiruchchiṟai.[3]

1 [4]Tr[i]bhvanachchakrava[t]tigaḷ [śri-Kulōttuṅ]ga-Śōḷadēvaṟku yāṇḍu
47 āva[du] Ishaba-[n]āyaṟṟu apara-pakshattu daśami[y]um Budan-
k[i]ḻamaiyum
2 poṟṟa Śadaiya[t]ti-nāḷ.

[1] Read *nāṉṟu*. [2] No. 653 of the Madras Epigraphical collection for 1909.
[3] No. 620 of the Madras Epigraphical collection for 1909. [4] Read *Tribhuv-*.

"In the 47th year (*of the reign*) of the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva,—on the day of Śatabhishaj which corresponded to a Wednesday and to the tenth *tithi* of the second fortnight of the month of Ṛishabha."

This date is unreliable. In the 47th year of Kulōttuṅga-Chōḷa I the 10th kṛishṇa *tithi* of Vṛishabha was current on Tuesday, May 9th A.D. 1116 (not on Wednesday), and on that Tuesday at mean sunrise the *nakshatra* current was Uttara Bhadrapadā; so that it was not possible for any moment of the Wednesday to be connected either with the *nakshatra* Śatabhishaj or with the 10th kṛishṇa *tithi*. Śatabhishaj had expired before mean sunrise on the previous Monday. Working for the 48th year of this king I find that in that year the 10th kṛishṇa *tithi* fell on Saturday, the 5th day of Vṛishabha, the *nakshatra* current at mean sunrise being Pūrva-Bhadrapadā. The corresponding day in European reckoning was April 28th A.D. 1117.

It is incorrect for a possible 47th year of Kulōttuṅga-Chōḷa II, or of Kulōttuṅga-Chōḷa III.

## VIKRAMA-CHOLA.

### 227.—In the Sāra-Paramēśvara temple at Tiruchchiṟaḷ.[1]

1 T[ribhuvanach]chakravattigaḷ śrī-Vi[kki]ra[ma-Śō]ḷadēva]ṟku yāṇḍu 5āvadu Miduna-[n]āya[ṟṟu] apa[ra-pa]kshat[tu] tra-

2 [yōde]śiyum Viyāḻa-kk[i]ḻa[maiyum] peṟṟa Urōśaṇi-nāḷ.

"In the 5th year (*of the reign*) of the emperor of the three worlds, the glorious Vikrama-Chōḷadēva,— on the day of Rōhiṇī, which corresponded to a Thursday and to the thirteenth *tithi* of the second fortnight of the month of Mithuna."

This date is unsatisfactory. Given that the accession day of this sovereign was, as settled by Professor Kielhorn (*Ep. Ind.*, Vol. VII, p. 5), the 29th of June A.D. 1118, the date should correspond to a day in A.D. 1122 or 1123. In A.D. 1122 the 10th day of Mithuna was Sunday, June 4th, and on that day the 13th *tithi* of the second fortnight of Jyēshṭha and the *nakshatra* Rōhiṇī were current at mean sunrise. The week-day stated in the inscription is, however, Thursday. Consequently I hesitate to accept it. Moreover, that June 4th would be in the king's 4th not 5th year.

For A.D. 1123 both week-day and *nakshatra* would differ from those stated in the original; the week-day of June 23rd, which was the day on which the 13th śukla *tithi* in Mithuna was current at mean sunrise, being Saturday, and the then current *nakshatra* being Mṛigaśiras.

Nor does the result agree with the given details for the 5th year of the king, on the supposition that his reign began, as originally set forward by Kielhorn, on 18th July A.D. 1108. Hence I can find no exact agreement in any case.

### 228.—In the Māgaḷēśvara temple at Tirumāḷam.[2]

1 ||ꝏ S[va]sti [śr]ī [||*]Pū-mādu puṇara . . . . . .

3 Kō=[3]Pparakēsa[r]ipanmar=āna Tri[buva]nachchakravattigaḷ śrī-Vikrama-Śōḷadēvaṟku yā[ṇḍu][4] ][3]āvadu[5] Āni-māsattu Tiṅgaṭ-kkiḻamai peṟṟa Tiruvōṇamum tr[i]tigaiyum=āna nāḷ.

[1] No. 621 of the Madras Epigraphical collection for 1909.

[2] No. 97 of the Madras Epigraphical collection for 1910.

[3] The syllable *ppa* is written as a group.

[4] The syllable *ṇḍu* is perhaps written as a group.

[5] *āvadu* is denoted also by an incomplete flourish added immediately after the figure 13.

"In the 1[3]th year (*of the reign*) of king Parakēsarivarman *alias* the emperor of the three worlds, the glorious Vikrama-Chōḷadēva,—on the day which was the third *tithi* and (*the day*) of (the *nakshatra*) Śravaṇa, which corresponded to a Monday of the month of Āṇi."

This date is correct in all respects for the 13th year of the reign of Vikrama-Chōḷa as fixed by Professor Kielhorn, who established the day of the king's accession as June 29th A.D. 1118. It corresponds to **Monday, June 15th A.D. 1131**, the fourteenth year of the reign beginning June 29th of that year and June 15th being still in the thirteenth year. The date proves that the reign could not have begun before June 16th A.D. 1118.

On that Monday, June 15th A.D. 1131, the 3rd *tithi* of the second fortnight of solar Āṇi (or Mithuna), was current at mean sunrise, as was also the *nakshatra* Śravaṇa.

## KULOTTUNGA-CHOLA II.

### 229.—In the Māgāḷēśvara temple at Tirumāḷam.[1]

1 ॥ ॥ ಒ Svasti śrī [॥*]Pūmaṇṇu padumam . . . . . .
4 . . . . . Kōv=Ir[ājakēsariṉaṇmar=āṇa Tribhuvana-
chakravarttigaḷ śrī-Kulō]ttuṅga-Śōḷadēvaṟku yāṇḍu
11 pa[dī]n-oṉṟāvadu Danu-nāyaṟṟu iraṇḍān-diyadiyum Śani-kkiḻamaiyum peṟṟa
[Pū]śatti-[nāḷ].

"In the 11th—eleventh—year (*of the reign*) of king Rājakēsarivarman *alias* the emperor of the three worlds, the glorious Kulōttuṅga-Chōḷadēva,—on the day of Pushya, which corresponded to a Saturday and to the second solar day of the month of Dhanus."

The date regularly corresponds to **Saturday, November 27th A.D. 1143**, which was the second day of the solar month Dhanus, and on which day at mean sunrise the moon was in the *nakshatra* Pushya by all systems. This day fell in the eleventh year of Kulōttuṅga Chōḷa II, which began, as at present found by me (Vol. X, p. 138, No. 190), between 26th March and 14th July A. D. 1143, his accession having taken place on some day between those dates in A.D. 1133.

The stated date would be incorrect for the eleventh year of Kulōttuṅga-Chōḷa I, in which year the 2nd Dhanus fell on a Thursday (November 26 A.D. 1080), with Bharaṇi as the *nakshatra* current at sunrise. And the record cannot belong to the reign of the third king of that name whose title was Parakēsarivarman.

This date regularly corresponds to **Wednesday, March 9th A.D. 1194,** which was the 15th of Mīna and was in the sixteenth year of Kulōttuṅga-Chōḷa III. At mean sunrise on that day the 1st *tithi* of the second fortnight was current, and the moon was in the *nakshatra* Hasta.

### 234.—In the Unnatapurīśvara temple at Melaṭūr.[2]

1 [ഛ] Tiribuva[na]chchakkara[va]rttigaḷ ś[irī]-Kulōttuṅga-Śōḷadēva[r*]kku yāṇḍu [3]vadu Ishaba-nāyaṟṟu [pū]rva-pashshattu[3] t[i]r[i]t[ī]y[a]aiyum Budaṉ-k[iḻa]m-[aiyum peṟṟa Pu]naṟpūśa[ttu] n[āḷ].

"In the **[3]rd year** (*of the reign*) of the **emperor of the three worlds,** the glorious **Kulōttuṅga-Chōḷadēva,**—on the day of **Punarvasu** which corresponded to a **Wednesday** and to the third *tithi* of the first fortnight of the month of **Ṛishabha.**"

Since this date is so worded as to afford no clue as to which of the three known Kulōttuṅgas' reign it belongs, I have tested it for each of those sovereigns; with an unsatisfactory result in the end.

In the third year of the reign of Kulōttuṅga-Chōḷa I the 3rd śukla *tithi* of Vaiśākha in the solar month Vṛishabha was current at mean sunrise on Tuesday, April 24th, A.D. 1072, and also at mean sunrise on Sunday, May 12th, A.D. 1073; either of which days, according to our present knowledge as to the date of that king's accession, might have fallen in his third year. In the first case the *nakshatra* current at mean sunrise was either Mṛigaśiras or Ārdrā according to the authority used, and in the second case was Ārdrā by all systems.

For the reign of Kulōttuṅga II we also have the choice of two years; and the day mentioned in the record, so far as the *tithi* is a guide, may have been Friday, May 17th, A.D. 1135 when the *nakshatra* was Ārdrā by the equal-space system for 7h. 1m. after mean sunrise, but Punarvasu by Garga and the Brahma-siddhānta; or it may have been Wednesday, May 6th A.D. 1136, when the corresponding *nakshatra* was similar to that in the last case, Ārdrā lasting by the equal-space system for 7h. 36m. after mean sunrise.

This latter date, therefore, would exactly tally with the given details if we could assume that the *pañchāṅgas* of that day were calculated, in the matter of the *nakshatra*, either by the

[1] No. 662 of the Madras Epigraphical collection for 1909.

[2] No. 30 of the Madras Epigraphical collection for 1910.

[3] Read *-pakshattu*.

system of Garga or that of the Brahma-siddhānta; but at present I think that the weight of evidence shows that the equal-space system was then in use. Though the week-day is correct therefore the *nakshatra* is not so. And for that reason I hesitate to accept the date.

For the reign of Kulōttuṅga-Chōḷa III the 3rd śukla *tithi* of Jyēshṭha corresponded to Monday, May 18th, A.D. 1181, which was the 25th solar day of Vṛishabha; on which day at mean sunrise the moon was in Punarvasu by all systems. This therefore would coincide with the given date if we presumed that the week-day had been wrongly stated as Monday instead of Wednesday. The 3rd śukla *tithi* in question ended at 1h. 41m. after mean sunrise on the Monday, so that it could not be connected with the Tuesday, still less with Wednesday. I am therefore, as before, unable to accept that date as correct.

From the above transliteration it appears that the number of the regnal year "3" is somewhat doubtful. If the number is capable of being certainly ascertained, no doubt the date could be conclusively verified.[1]

## RAJADHIRAJA II (?).

### 235.—In the Kailāsanātha temple at Ālambākkam.[2]

1 Svasti śrī [||*] Tiribuvanachchakkara[va]ttiga[ḷ śr]ī-Rājādh[ir]ājadēvaṟkku yāṇḍu paṇṇiraṇḍā[va]du [3][Si]maha-nāyaṟṟu apara-pakshattu daśa[mi]yum Tiṅga[ḷ-k]-iḻamaiyum peṟṟa Mūlattu nāḷ.

"In the twelfth year (*of the reign*) of the emperor of the three worlds, the glorious Rājādhirājadēva,—on the day of Mūla which corresponded to a Monday and to the tenth *tithi* of the second fortnight of the month of [Si]ṁha."

This date is intrinsically wrong. During the month of Siṁha a tenth *tithi* of the second fortnight can never be connected with the *nakshatra* Mūla; but a tenth *tithi* of the first fortnight can be so, and I have therefore tested the date for both these days in the reigns of Rājādhirāja I and II respectively.

Taking the latter first, the date must, for his 12th year, fall in A.D. 1174. In that year, in the month of Siṁha, the 10th kṛishṇa *tithi* fell on a Friday, and the 10th śukla *tithi* also on a Friday; the *nakshatra* in the second case being Mūla by all systems. As the week-day is thus altogether wrong I reject this date, although in the second case the *nakshatra* stood as stated.

For the reign of Rājādhirāja I we have it, as established by Kielhorn, that his twelfth year began between March 15th and December 3rd, A.D. 1029. Hence the month of Siṁha in that regnal year may have been either in A.D. 1029 or 1030. In the first of these two cases the 10th kṛishṇa *tithi* of Siṁha fell on a Thursday, the *nakshatra* being Mṛigaśiras. This is plainly wrong. The 10th śukla *tithi* of Siṁha in A.D. 1029 was current at sunrise on a Thursday, the nakshatra Mūla having expired 3h. 36m. before that sunrise. This also does not fit the description.

Now for the second case, *viz.*, the Siṁha of the year A.D. 1030 (Śaka 952). The 10th kṛishṇa *tithi* was current at sunrise of Monday, July 27th, A.D. 1030, which was the 1st day of Siṁha; but the *nakshatra* then current was Rōhiṇī. This is altogether wrong. In the same year, A.D. 1030, the 10th śukla *tithi* was current at sunrise of Tuesday, August 11th, which

[1] After examination of the original Mr. Krishna Sastri informs me that it is possible, though not probable, that the regnal year was "2," and not "3." I have consequently calculated the date for the 2nd year of each of these kings, finding it irregular in each case, both week-day and *nakshatra* being different to the given ones.

[2] No. 728 of the Madras Epigraphical collection for 1909.

[3] The letter *Si* appears to be a correction; read *Siṁha-*.

was the 10th Simha, the then current *nakshatra* being, by the equal-space system, Mūla. This 10th śukla *tithi* had begun 13h. 54m. before mean sunrise on the Tuesday, and had been current during that time on the latter part of Monday, August 10th. During the whole of that period of 13h. 54m. on Monday, Mūla had been current. If, therefore, it is assumed that the *tithi* quoted in the record was the *tithi* current at the time the action referred to in the inscription was accomplished, and not the *tithi* current at sunrise, the date may be accepted as genuine and stated as corresponding to Monday, August 10th, A.D. 1030, the second fortnight having been wrongly stated instead of the first. In that case—and it is possibly correct—we shall have the period within which this king's accession must have taken place narrowed to the interval between March 15th and August 11th, A.D. 1018.

But I am rather doubtful about this date because the *tithi* in question was the 10th śukla *tithi* of Bhādrapada, and according to Albērūnī the 10th śukla *tithi* of Bhādrapada was considered an unlucky day.[1]

## RAJARAJA III.

### 236.—In the Kachchhapēśvara temple at Tirukkachchūr.[2]

1 Svasti śrī [ ‖ * ] Tribhuvaṇa[ch]chakkaravattigaḷ śrī-Rājarājadēvaṟku yāṇḍu 14-vadu Dhanu-nāya-

2 ṟṟu=ppūrvva-pakshattu prathamaiyum Uttirāḍamum peṟṟa nāḷ.

"In the **14th year** (*of the reign*) of the **emperor of the three worlds, the glorious Rājarājadēva,**—on the day which corresponded to the (*day of the nakshatra*) **Uttarāshāḍhā** and to the first *tithi* of the first fortnight of the month of **Dhanus.**"

No week-day being given here we can only be guided by the *nakshatra*. The date corresponds to **Tuesday, December 18th A.D. 1229,** which was the 23rd Dhanus, and on which day at mean sunrise the first *tithi* of the first fortnight of Pausha, and, by all systems, the *nakshatra* Uttara-Āshāḍha, were current.

### 237.—In the Kachchhapēśvara temple at Tirukkachchūr.[3]

1 Svast[i] śr[ī] [‖ *] T[iri]bhuvanachchakkara[va]ṟṟigaḷ śr[ī]-Irājarā[ja]dēvar[k]ku 3[ṟā]vadu[4] Magara-nāyaṟ-

2 ṟu=p[pū]rva-[pa]kshattu [5]saturttiyum Mūlam[u]m peṟṟa [N]āyaṟ[ṟu]-kki[ḻama]i-nāḷ.

"In the **3rd** (year) (*of the reign*) of the **emperor of the three worlds,** the **glorious Rājarājadēva,**—on the day (*which was a*) **Sunday,** (and) which corresponded to (*the day of*) **Mūla** and to the fourth *tithi* of the first fortnight of the month of **Makara.**

This date is irregular in itself, besides being wrong in other respects. On a 4th *tithi* of the first fortnight in Makara the moon cannot be in the *nakshatra* Mūla. Makara in the 3rd year of Rājarāja III occurred late in A.D. 1218 and early in 1219. The 4th śukla *tithi* corresponded to Monday, January 21st, A.D. 1219, which was the 27th day of Makara, on which day

[1] Mr. Krishna Sastri informs me that it is just possible to read the solar month in the original as "Rishabha," and that the characters show that it could not belong to the reign of Rājādhirāja I. I have freshly computed the date: finding that it is irregular for the solar month Vṛishabha in the reign of either of the known Rājādhirājas. In no case can either a 10th śukla or 10th kṛishṇa *tithi* in solar Vṛishabha be connected with the *nakshatra* Mūla. The week days also do not correspond.

[2] No. 264 of the Madras Epigraphical collection for 1909.

[3] No. 270 of the Madras Epigraphical collection for 1909.

[4] The usual flourish for expressing *āvadu* is also written in continuation of the figure '3'.

[5] Read *chaturthi-*.

at mean sunrise the *nakshatra* was Uttara-Bhadrapadā. The day corresponding to Mūla in that solar month was Tuesday, January 15, A.D. 1219, which was the 21st day of Makara, and on that day the 12th *tithi* of the second fortnight was current at mean sunrise.

### 238.—In the Chōḷiśvara temple at Tuṟaiyūr.[1]

Svast[i] śri [||*] Tribhuvaṇachchakkara[vat]tigaḷ śrī-Rājarājadēvaṟku yāṇḍu 3vadu Miṇa-nāyaṟṟu apara-pakshattu [ē]kādaśi[yu]m Śaṇi-kkiḻamaiyum peṟṟa Śadaiyattu nā[ḷ].

"In the 3rd year (*of the reign*) **of the emperor of the three worlds,** the glorious **Rājarājadēva,**—on the day of **Śatabhishaj,** which corresponded to a **Saturday** and to the eleventh *tithi* of the second fortnight of the month of **Mīna.**"

This date is also irregular. In the third year of Rājarāja III the month of Mīna fell early in A.D. 1219. The eleventh *tithi* of the second fortnight in that month corresponded to Thursday, March 14th 1219, which was the twentieth day of Mīna. On that day at mean sunrise the 11th kṛishṇa *tithi* and the *nakshatra* Dhanishṭhā were current. On Friday, March 15th, at mean sunrise the current *tithi* was the 12th kṛishṇa and the current *nakshatra* was Śatabhishaj. On Saturday, March 16th, at mean sunrise the current *tithi* was the 14th kṛishṇa, the 13th being expunged, and the current *nakshatra* was Pūrva-Bhadrapadā. So that it is not possible in that year to form at any time a combination, even at any time of a day, of a Saturday, the 11th kṛishṇa *tithi*, and the *nakshatra* Śatabhishaj; nor can we arrive at any solution without altering two out of three of the elements given in the date as stated. This would be dangerous.

The date is irregular for the reigns of Rājarāja I or II.

### 239.—In the Umāmahēśvara temple at Kōnērirājapuram.[2]

1 Svast[i] śr[i]ḥ [||*] T[i]ribu[va]ṇachchakkaravatt[i]gaḷ śrī-R[ā]jarājadēvarkku yāṇḍu irubattunālāvadiṇ ed[i]rām=āṇḍu Mēsha-nāyaṟṟu a[pa]ra-[pakshattu a]shṭamiyum Veḷḷ[i]-kkiḻamaiyum peṟṟa T[ir]u[vō][3]ṇattu nāḷ.

"In the **year opposite the twenty-fourth year** (*of the reign*) **of the emperor of the three worlds,** the glorious **Rājarājadēva,**—on the day of **Śravaṇa,** which corresponded to a **Friday** and to the eighth *tithi* of the second fortnight of the month of **Mēsha.**"

The given date corresponds to **Friday, April 5th A.D. 1241,** which was the 12th day of Mēsha. On that day at mean sunrise the 8th kṛishṇa *tithi* was current, and the moon was in Śravaṇa.

### 240.—In the Muktīśvara temple at Samayavaram.[4]

1 [Svas]ti śrī [||] Tirubuvaṇa[ch]chakkaravattigaḷ śrī-Rāśarāśadēvaṟku yāṇḍu [6]-

3 [ttu] nāḷ.

"In the [6]th year (*of the reign*) **of the emperor of the three worlds,** the glorious **Rājarājadēva,**—on the day of **Mūla,** which corresponded to a **Wednesday** and to the fifth *tithi* of the second fortnight of the month of **Mēsha.**"

---

[1] No. 701 of the Madras Epigraphical collection for 1909.

[2] No. 661 of the Madras Epigraphical collection for 1909.

[3] The syllable *vō* seems to be a correction from *śrava-*.

[4] No. 746 of the Madras Epigraphical collection for 1909.

The date is unsatisfactory. From the details given it would seem that the number of the regnal year is not clear. On the supposition that the number of the year is shown by a single *akshara* I have tested the date for every year of Rājarāja III's reign from the first to the ninth inclusive, and in no case have obtained the desired combination.[1]

The nearest approach was found in the 1st regnal year, Mēsha of A.D. 1217, the 4th regnal year, Mēsha of A.D. 1220, and the 8th regnal year, Mēsha of A.D. 1224.

In A.D. 1217 the week-day corresponding to the 5th kṛishṇa *tithi* was Wednesday, and the day was the 5th day of Mēsha, or March 29th; but the *nakshatra* Mūla only began, by the equal space system, at 1h. 23m. *after* mean sunrise on that day, though at that moment (mean sunrise) the moon was in Mūla by the systems of Garga and by the Brahma-siddhānta. This was in the king's *first* regnal year.

In A.D. 1220 the 5th kṛishṇa *tithi* was current at mean sunrise of Thursday, March 26th which was the 2nd day of Mēsha, having been current for the last 20h. 3m. on the previous Wednesday. According to the equal-space system Jyēshṭhā was the *nakshatra* current during all those hours of Wednesday, Mūla only beginning 1h. 38m. after mean sunrise on Thursday; though by the system of Garga Mūla was current for the last 11h. 12m. and by the Brahma-siddhānta for the last 16h. 12m. on the Wednesday. So that by these latter authorities Mūla and the 5th kṛishṇa *tithi* ran together for a considerable period on Wednesday, March 25th. But I can ascertain no reason why the Wednesday and not the Thursday, at whose sunrise the 5th kṛishṇa *tithi* was current, should have been coupled with that *tithi*. There was nothing special, so far as I can gather, in that *tithi* which would warrant a departure from the usual procedure of naming the day from the *tithi* current at sunrise. These days in A.D. 1220 were in the king's *fourth* regnal year.

In A.D. 1224 the 5th kṛishṇa *tithi* fell on Wednesday, April 10th, which was the 17th day of Mēsha, but the *nakshatra* current at mean sunrise of that day was Pūrva-Āshāḍhā by all systems, Mūla having ended on the Tuesday. This was in the *eighth* regnal year of Rājarāja III.

The date is irregular for his other regnal years from the first to the ninth inclusive.

It is also irregular for the 6th year of either Rājarāja I or II.

## RAJANARAYANAN SAMBURAYA.

### 241.—In the Kachchhapēśvara temple at Tirukkachchūr.[2]

1 S[va]sti śrī[ǁ*] Irājanārāyaṇaṇ [3]Śambū(bu)rāyaṛku yāṇḍu[4]

2 13 āvadu[5] Tulā-ravi apara-pakshattu [6]dutiyai[yu]m Na-

3 yaṟṟu-kiḻamaiyum per[ṛa] Kātti[ga]i nāḷ.

"In the 13th year (*of the reign*) of Rājanārāyaṇaṇ Śamburāya,—on the day of Kṛittikā which corresponded to a Sunday and to the second *tithi* of the second fortnight of the month of Tulā."

---

[1] Since the above was in print I have been informed that a clause in the body of the inscription makes it clear that the 6th regnal year was intended. This being so the date must be held to be irregular.

[2] No. 268 of the Madras Epigraphical collection for 1909.

[3] *Śa* is engraved below the line.

[4] The syllable *ṇḍu* is represented by a flourish added to *yā*.

[5] The word *āvadu* is represented by a flourish added to the figure 13.

[6] Read *dutiyai-*.

Two inscriptions, one at the Ulagaḷanda-Perumāḷ temple at Kāñchī, and the other at the Kailāsanātha temple at Śevvallimēḍu, are dated in the year Vyaya, and expressly state the year as Ś. 1268 (A.D. 1346-47) and as being in the 9th year of this king's reign. A third record of the 7th year also exists at Śevvallimēḍu. If these are found on examination to contain fuller details of the date it may be possible to gather from them sufficient evidence as to the date of his accession. But so far this can only be fixed as being in Ś. 1259 or 1260, *i.e.*, on some day between March 26th A.D. 1337, the first solar day of Mēsha Śaka 1259, and March 25th A.D. 1339, the last solar day of Mīna Śaka 1260. Consequently the thirteenth year must lie between March A.D. 1349 and March 1351, and the month of Tulā stated in the present inscription at Tirukachchūr must correspond either to (about) October A.D. 1349 or the same month in A.D. 1350.

The details of the date are irregular for A.D. 1349, the second *tithi* of the second fortnight in Tulā in that year falling on Tuesday, September 29th, on which day at mean sunrise the moon was in Bharaṇī. I doubt even if the date can be accepted as regular for A.D. 1350. In that year the second kṛishṇa *tithi* of Kārttika was current at mean sunrise of *Monday*, October 18th, that day being the 20th day of Tulā, and the moon at its sunrise being in Rōhiṇī. The *tithi* had been current for the last 21h. 11m. of Sunday, October 17th, and up to 3h. 5m. before sunrise on the Monday the moon had been in Kṛittikā, according to the equal-space system. By the system of Garga the moon had been in Kṛittikā up to 15h. 13m., and by the brahma-siddhānta up to 15h. 56m. before the Monday sunrise. If therefore the week-day had been stated as Sunday, the date given would have proved regular as regards the *nakshatra* but wrong as regards the *tithi*, which should have been stated as the 1st kṛishṇa. The 2nd kṛishṇa *tithi* and the *nakshatra* Kṛittikā had been together current for some hours on the Sunday, but not on the Monday; and I can ascertain no ceremonial reason why a 2nd kṛishṇa in Kārttika should be coupled with the day prior to that on whose sunrise it was current.

I have tested the date for several other years about this period but quite without success. It is not correct for A.D. 1351, in which year the given *tithi* corresponded to Friday, October 6th, which was the 9th Tulā and on which day at mean sunrise the moon was in Bharaṇī.

[Incidentally I may mention that I find the date quoted by Professor Hultzsch for the 17th year of this king's predecessor, Veṉṟumaṉkoṇḍa Śambuvarāya (*South-Indian Inscriptions* I, p. 78, No. 52) to be perfectly regular. The date corresponds to May 10th A.D. 1339, and the king's accession is fixed as having taken place between May 11 A.D. 1322 and May 10 1323].

## RAJANARAYANAN SAMBUVARAYA.

### 242.—In the Vyāghrapādēśvara temple at Siddhaliṅgamaḍam.[1]

1 Svas[t]i [śrī] [||*] Sakalalōkachcha[kra][2]vatt[i] Irāśaṇārā[ya]ṇaṇ Śambuva-rāyaṟku yiyāṇḍu[3] 20 āvadu[4]

2 Magara-nāyaṟṟu pūrvva-pakshattu [5]titigaiyum [6]Buda[ṉu]m peṟṟa Tiruvōṇa[t]tu nāḷ.

"In the **20th year** (*of the reign*) of **Rājanārāyaṇaṇ Śambuvarāya** the emperor of all the **worlds**,—on the day of **Śravaṇa**, which corresponded to a **Wednesday** and to the third *tithi* of the first fortnight of the month of **Makara**."

---

[1] No. 396 of the Madras Epigraphical collection for 1909.

[2] Between the syllables *kra* and *va* is a letter which is indistinct.

[3] Cancel the syllable *yi*.

[4] The word *āvadu* is represented by a flourish added to the figure 20.

[5] Read *tritīyai-*

[6] The word *Budaṉum* is written below the line.

It is almost certain that the *nakshatra* or the *tithi* quoted in this inscription must be wrong, for by the equal-space system and that of Garga the 3rd śukla *tithi* in the solar month Makara can never correspond to Śravaṇa, while by the Brahma-siddhānta it could only do so for about 12 minutes at the beginning of the *tithi*. The moon could, however, be in Śravaṇa on the 1st or 2nd śukla *tithi* of that month. In the present case I think that the quoted *tithi* is correct, since it fell on a Wednesday as stated, but that the *nakshatra* has been wrongly quoted as Śravaṇa when it should have been Dhanishṭhā.

If I am correct in this supposition the given date corresponds to Wednesday, January 2nd A.D. 1359, on which day at mean sunrise the 3rd śukla *tithi* was current, the day being the 7th civil day of Makara. The current *nakshatra* at mean sunrise was, however, Dhanishṭhā and not Śravaṇa. This day being in the 20th regnal year of Rājanārāyaṇa Śambuvarāya we have it that his accession occurred on some day between January 3rd A.D. 1339 and January 2nd 1340. As stated above, p. 251, the Kāñchī and Śevvalimēḍu inscriptions show that the accession could not have taken place later than the last day of Śaka 1260, which was March 25th A.D. 1339. And consequently, if the present date is accepted, the reign of this king began between January 3rd and March 25th A.D. 1339.

But if so, the last date examined, No. 241, is not regular, for it should have corresponded with a day in September-October A.D. 1351, being in the 13th year. And for that year it is incorrect.

## PERUNJINGADEVA.

### 243.—In the Vyāghrapādēśvara temple at Siddhaliṅgamaḍam.[1]

1 Svasti śrī [||*] Sakalabuvaṇachakkaravattigaḷ śrī-Kō=P[p]eruñjinga-[d]ē-
2 varkku yāṇḍu 19 vad[u] Ṛishabha-nāyaṟ[ṟu] apara-pakshattu t[ṛ]i-
3 tiyaiyum Tiṅgaḷ-kiḻamaiyum peṟṟa Mūlattu nāḷ.

"In the **19th year** (*of the reign*) of the **emperor of all the worlds**, the **glorious king Peruñjiṅgadēva**,—on the day of **Mūla**, which corresponded to a **Monday** and to the **third** *tithi* of the second fortnight of the month of **Ṛishabha**."

The reign of this king has been previously determined by the late Prof. Kielhorn to have begun between 11th February and 30th July A.D. 1243.

The present date is quite regular for the 19th regnal year. It corresponds to **Monday, May 8th A.D. 1261**, which was the 14th Vṛishabha, Śaka 1184 expired. On that day at mean sunrise, and thereafter for 13h. 32m., the 3rd kṛishṇa *tithi* of Vaiśākha was current; the moon being by the equal-space system in Mūla at sunrise and for 3h. 40m. after it. By the systems of Garga and the Brahma-siddhānta the nakshatra current at mean sunrise was Pūrva-Āshāḍhā.

We now therefore know that the accession of Peruñjiṅgadēva took place between May 8th and July 30th A.D. 1243.

[1] No. 417 of the Madras Epigraphical collection for 1905.

## No. 24—DATES OF PANDYA KINGS.

By R. Sewell, I.C.S. (Retd.), M.R.A.S.

### MARANJADAIYAN.

**66.—In the Jambunāthasvāmin temple at Tiruveḷḷaṟai.**[1]

1 Svasti śrī [||*] Kō Māṟañjaḍaiyaṟku yāṇḍu nāl[ā]-
2 vadaṟk=edir oṉbadāvadu Vṛiśchika-ñāiṟṟu Ti-
3 ṅgaṭ-ki[ḻamai] peṟṟa Aśvati [muda]l-āga.

"In the ninth (year) **opposite to the fourth year** (*of the reign*) of **king Māṟañjaḍaiyaṉ**.—from (*the day of*) **Aśvinī** which corresponded to a **Monday** of the month of **Vṛiśchika**."

The names of two sovereigns bearing the title Māṟañjaḍaiyaṉ have been brought to light in the territories at one time subject to the Pāṇḍyan kings. The earlier was alive in A.D. 770 as is gathered from the Āṉaimalai inscription; the later is believed to have succeeded to the throne some time in A.D. 862-63 (*Ep. Ind.*, Vol. IX, p. 88). No sufficient details exist for verification of the date given for the former. I have examined the date of the present record on the supposition that it might refer to that Māṟañjaḍaiyaṉ whose reign is said to have begun in A.D. 862-63.

It appears to belong to his thirteenth year, which would perhaps be the year A.D. 874-75. The date given is so far regular that on Monday, the 29th day of the solar month Vṛiśchika, the *nakshatra* Aśvinī was current for 3h. 24m. at the *end* of the day by all the three *nakshatra* systems. This civil day corresponded to **Monday, November 22nd A.D. 874.** On that day Rēvatī expired and Aśvinī began at 20h. 36m. after mean sunrise. Therefore according to the ordinary practice of Southern India the Monday in question would have been coupled with Rēvatī and not with Aśvinī. The lunar day current at the Monday sunrise was the 10th śukla of Margaśirsha. The 11th śukla *tithi* began at 18h. 34m. on that Monday, or 34m. after midnight.

Now I understand that the 10th śukla of Mārgaśirsha is considered an unlucky *tithi* (at least Albērūnī says that it is so); but that the 11th is peculiarly auspicious since it is the occasion of the great *Vaikuṇṭha*, or *Mukkōṭi-ēkādaśī*, festival in Southern India, and of the *mōkshada ēkādaśī* in other parts.[2] And as this *tithi* ran for about 5½ hours before the end of the civil day, Monday, while the *nakshatra* Aśvinī was similarly current for about 3½ hours before the end of the day, it seems quite possible that this constituted an occasion justifying a departure from the usual practice and the coupling of the Monday in question with Aśvinī instead of with Rēvatī.

If I am right in this surmise the date may be accepted as genuine, and if so this king's reign began some time between November 23rd, A.D. 861, and November 22nd, 862; always supposing that "in the ninth year opposite the fourth year" means "in the thirteenth year." Coupling with this the date given in the Aivarmalai record (*Ep. Ind.*, Vol. IX, p. 88), which makes Śaka 792 synchronous with the king's eighth year, we have for his accession the period **March 22nd to November 22nd A.D. 862.** This presupposes that the quoted Śaka year 792 was the current year.

---

[1] No. 84 of the Madras Epigraphical collection for 1910.

[2] That the *Mukkōṭi-ēkādaśī* festival takes place on 11th śukla of *Mārgaśirsha* I gather from the late S. M. Natesa Sastri's *Hindu Feasts, Fasts, and Ceremonies*, p. 60. Mr. L. D. Swamikannu Pillai (*Indian Chronology*, p. 50,) places it on the 11th śukla of *Pausha*; but I believe that this is not the case.

## MARAVARMAN SUNDARA-PANDYA.

### 97.—In the Muṇḍīśvaramuḍaiyār temple at Maṇappaḍaivīḍu.[1]

1 ... Svasti śrī [||*] Kō Mārapaṇmar-āṇa Tribhuvaṇachchakravattiga[ḷ] emmaṇḍala-
muṅ=goṇḍ-aruḷi[ya*] śrī-Sundara-Pāṇḍiyadēvarku yāṇḍu 10vadu Vṛiśchikanāyaṟṟu
pūrvva-pakshattu ashṭamiyum peṟṟa Rēvati-nā[ḷ].

"In the **10th year** (*of the reign*) of **king Māṟavarman** *alias* the **emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,** who was pleased to take every country,— on the day of **Rēvatī,** which corresponded to the 8th *tithi* of the first fortnight of the month of **Vṛiśchika.**"

I have tested this date for the 10th year of the three known Māṟavarman Sundara-Pāṇḍyas, the first of whom began to reign between March 29 and September 4, A.D. 1216, the second between June 15, A.D. 1238, and January 18, 1239, and the third between June 2, A.D. 1531, and June 1, 1532; that is to say I have calculated the *tithi* and *nakshatra* mentioned, during the course of the solar month Vṛiśchika, in each of the years A.D. 1225, 1226, 1247, 1248, 1540, 1541. In no case was Rēvatī current at any time during the civil day which might have been connected with the 8th śukla *tithi* of a lunar month. I must therefore hold this date to be unsatisfactory.

## JATAVARMAN SUNDARA-PANDYA.

### 98.—In the Neḍuṅgaḷanāthasvāmin temple at Tiruneḍuṅgaḷam.[2]

1 Svasti śrī [||][3]Kō=Chchaḍaipaṇmar=āṇa T[i]r[i]buvaṇachchakkara[vat]tigaḷ
śr[ī]-Suṇdara-P[ā]ṇḍiyyadēvarkku yāṇḍu
2 mūṉṟāvadu Ṛishabha-nāyaṟṟu pūrvva-pakshattu ēkādaśiyum Tiṅgaṭ-kiḻa[m]ai-
[yu]m peṟṟa Pūśattu nāḷ.

"In the **third year** (*of the reign*) **of king Jaṭāvarman** *alias* the **emperor of the three worlds,** the **glorious Sundara-Pāṇḍyadēva,**—on the day of **Pushya** which corresponded to a **Monday** and to the eleventh *tithi* of the first fortnight of the month of **Ṛishabha.**"

This date is also irregular when examined for the third year of any known king of the name declared in the record. Tested for the reigns of the first or second Jaṭāvarman Sundara-Pāṇḍya the stated day must fall in either A.D. 1253, 1278, or 1279. In the first case the given *tithi* fell on a Saturday, in the second on a Wednesday, in the third on a Tuesday; in the first two cases the *nakshatra* was Hasta and in the third Chitrā. On an 11th śukla *tithi* in Vṛishabha the moon cannot be in Pushya.

### 99.—In the Kachchhapēśvara temple at Tirukkachchūr.[4]

1 Svast[i] śrī[||*] . . . . . [Kōṟ=Śaḍai] . . . . . .
2 buvaṇachcha[k]karavatti[ga]ḷ śrī-Śundara-[P]āṇḍi[ya]dēvarkku y[āṇ]-
3 ḍu 7vadu[5] Mīna-nāyaṟṟu pūṟuva-pakshattu daśamiyum Nāyaṟṟu-[kiḻa]-
4 maiyum [p]eṟṟa Atta[t*]tu nāḷ.

"In the **7th year** (*of the reign*) of **king Jaṭā[varman** *alias*] **the emperor of the [three] worlds,** the **glorious Sundara-Pāṇḍyadēva,**—on the day of **Hasta** which corresponded to a **Sunday** and to the tenth *tithi* of the first fortnight of the month of **Mīna.**"

---

[1] No. 446 of the Madras Epigraphical collection for 1909.

[2] No. 680 of the Madras Epigraphical collection for 1909.

[3] There is some space between *Śrī* and *Kō* which might have been intended for a punctuation.

[4] No. 303 of the Madras Epigraphical collection for 1909.

[5] *vadu* is expressed by a flourish added to the figure 7.

This date is altogether unsatisfactory. In the 7th year of the reign of Jaṭāvarman Sundara-Pāṇḍya I the 10th śukla *tithi* in Mīna corresponded to Saturday, March 10th A.D. 1258, the Pushya *nakshatra* being current at mean sunrise.

For the 7th year of the reign of Jaṭāvarman Sundara-Pāṇḍya II I have tried all the possible years. In no case is the *nakshatra* quoted correct for the day corresponding to the 10th śukla *tithi* in Mīna, these being always either Punarvasu, Pushya, or Āślēshā, and never Hasta. Only in one year, A.D. 1284, does the 10th śukla *tithi* correspond to a Sunday, and that was on 27th February of that year; but the *nakshatra* for that day was Punarvasu.

The record cannot belong to the reign of any possible king of the name coming between Māṟavarman Kulaśēkhara I, whose last known date is June 9th A.D. 1309, and the second king of that name, whose reign began in March A.D. 1314; since in all the possible years that I have tried, the *nakshatra*, on the given day, is either Punarvasu or Pushya. Indeed during the month of Mīna the moon cannot be in Hasta on a 10th śukla *tithi*.

### 100.—In the Vighnēśvara temple at Tirukkachchūr.[1]

1 Svasti śrī [||*] Kōr=Chaḍapaṉmar=āṉa Tiṟibhu[va]ṉa[2]chchakkaravattigaḷ e[m*]maṇḍa[la]muṁ=goṇḍ-aruḷiya śrī-Sundara-Pāṇḍiyadēvaṟkku yāṇḍu 8vadu[3] Ṛisha-

2 bha-nāyaṟṟu pūrvva-pakshattu tradiyaiyu[m*][4] Viyāḻa-kki[ḻa*]maiyum peṟṟa Pūśattu nā[ḷ].

"In the 8th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva, who was pleased to take every country,— on the day of Pushya which corresponded to a Thursday and to the third *tithi* of the first fortnight of the month of Ṛishabha."

This date is irregular. To correspond with the 8th year of the named king, either the first or the second of the dynasty, the day must fall in either A.D. 1258, 1283, or 1284. In 1258 the 3rd śukla *tithi* in Vṛishabha was current at sunrise of a Tuesday, and the *nakshatra* was Mṛigaśiras or Ārdrā at sunrise. In 1283 the week-day was Saturday, and the *nakshatra* was Mṛigaśiras by all systems. In 1284 the week-day was Friday, and the *nakshatra* at sunrise was Punarvasu by all systems. Part of the 3rd śukla *tithi*, in this last case, coincided with Thursday; it did so in fact for the last $10\frac{1}{2}$ hours of that day; but during that period the *nakshatra* was Ārdrā or Punarvasu.

### 101.—In the Neḍuṅgaḷanāthasvāmin temple at Tiruneḍuṅgaḷam.[5]

1 [Sva]s[ti]i [||*]samasta-jagad-ādhāra . . . . . .

5 [Sun]da[ra]-Pā[ṇḍiya]dē[va]ṟku[6] yāṇḍu pa[i]to[ṇ]ṟāvadu[7] Makara-nāyaṟṟu pū[rvva]-pakshattu [sha]sh[th]iy[u]m Budhan-kiḻa[m]aiyum

6 peṟṟa Urōśaṇ[i]-ṉāḷ.

"In the eleventh year (*of the reign*) of . . . . . [Sun]dara-Pāṇḍyadēva, —on the day of Rōhiṇī which corresponded to a Wednesday and to the sixth *tithi* of the first fortnight of the month of Makara."

---

[1] No. 319 of the Madras Epigraphical collection for 1909.

[2] Read *Tribhuvana-*.

[3] *vadu* is represented by a flourish.

[4] Read *tṛitīyaiyum*.

[5] No. 677 of the Madras Epigraphical collection for 1909.

[6] The portion of this line, from *ṇḍiya* to *vadu*, is written over an erasure.

[7] Read *padinoṉṟāvadu*.

The date is irregular whether for the reign of Jaṭāvarman Sundara-Pāṇḍya I, or for the second king of that name. The given *tithi* in Makara corresponded with a Wednesday in A.D. 1261, the 11th year of Jaṭāvarman Sundara I, and in January of A.D. 1286 which might possibly have been in the 11th year of Jaṭāvarman Sundara II; but the corresponding *nakshatra* on those Wednesdays was either Pūrva or Uttara-Bhadrapadā. In January 1287 the 6th śukla *tithi* in Makara fell on a Tuesday, with the *nakshatra* Aśvinī current at mean sunrise, and in January 1288 it fell on a Sunday, with the *nakshatra* Rēvatī current at mean sunrise.

### 102.—In the Kachchhapēśvara temple at Tirukkachchūr.[1]

1 Svasti śrī[||*] . . . . . ☙ Kō=Ch[cha]ḍa[pa]ṉmar=āṇa Tiribuvaṇachchakkaravattigaḷ śri-[Śu]ṇḍara-Pāṇḍiyadēvaṟku yā[ṇ]ḍu 13vadu[2] pad[i]ṉmūṉ[ṟ]āvadu Kum[bha]-nāyaṟṟu pūrvva-[pa]kshattu pañchamiyum Bu-

2 dan-ki[ḻa]maiy[u]m peṟṟa Aśvati-nāḷ.

"In the 13th—thirteenth—year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,— on the day of Aśvinī which corresponded to a Wednesday and to the fifth *tithi* of the first fortnight of the month of Kumbha."

This date is irregular. For the 13th year of Jaṭāvarman Sundara-Pāṇḍya I the 5th śukla *tithi* in Kumbha has Aśvinī for *nakshatra*, but the week-day was Monday. It corresponded to 4 February, A.D. 1264. For the 13th year of Jaṭāvarman Sundara-Pāṇḍya II we may test the date in two ways, according as we accept one or the other of the accession periods fixed by the two groups of inscriptions. If we accept the earlier period, the 5th śukla *tithi* of Kumbha in the 13th year corresponded to 8 February, A.D. 1288, and at sunrise on that day the *nakshatra* was Aśvinī; but the week-day was Sunday. If we accept the later, the quoted day corresponded to 27 January, A.D. 1289; but on that day at sunrise the *nakshatra* current was Rēvatī, and the week-day was Thursday. The fifth śukla *tithi* was current for 3h. 24m. at the end of Wednesday, but the *nakshatra* Aśvinī did not begin till 13h. 46m. after mean sunrise on the Thursday, so that it could not possibly be connected with the Wednesday previous.

## JATAVARMAN SUNDARA-PANDYA I.

### 103.—In the Kachchhapēśvara temple at Tirukkachchūr.[3]

1 Svast[i] śr[i] [||*] . . . . . [Kōṟ=Chaḍai]paṉmar=āṇa T[i]ribuva[ṇa]chcha[k]karavatt[i]gaḷ śr[i]-Śundara-P[ā]ṇḍ[i]yadēvar[k]-

2 ku yāṇḍu 8va.lu[4] Miḍuṇa-nāyaṟṟu apara-pakshatt[u] Tiṅgaḷ-kiḻamaiyum peṟṟa Uttiraṭ[ṭ]ādi-nāḷ.

"In the 8th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,— on the day of Uttara-Bhadrapadā which corresponded to a Monday of the second fortnight of the month of Mithuna."

The month of Mithuna in the 8th year of Jaṭāvarman Sundara-Pāṇḍya I fell in A.D. 1258, in which year the 1st day of that month corresponded to Monday, May 27th, and the 8th kṛishṇa *tithi*. The *nakshatra* current at mean sunrise by the systems of Garga and Brahmagupta was Uttara-Bhadrapadā, but by the equal-space system Pūrva-Bhadrapadā was

[1] No. 315 of the Madras Epigraphical collection for 1909.

[2] *vadu* is represented by a flourish.

[3] No. 305 of the Madras Epigraphical collection for 1909.

[4] *cadu* is expressed by a flourish added to the figure 8.

then current. Examining Kielhorn's dates Nos. 11 to 18 (*Ep. Ind.*, Vol. VI, pp. 306 ff.) I find that in six cases it is impossible to say which system was generally in use in the Chingleput tract during that reign; but No. 12 proves that in A.D. 1253, near Trichinopoly, neither the system of Garga nor that of the Brahma-siddhānta was in use, and No. 16 from near Tanjore shows that the latter was not used there in A.D. 1260.

On the morning in question, according to the equal-space system, Uttara-Bhadrapadā began 55 m. *after* mean sunrise; and though this throws a slight doubt on the date I think it may be accepted.

For the reign of the second king of that name the date must fall in A.D. 1283 or 1284 and for those years the quoted *nakshatra* would be incorrect; though it is correct in all respects for Monday, June 1st, A.D. 1282, which was the 6th day of Mithuna. And if the quoted regnal year had been the 6th instead of the 8th, I should have had no hesitation in accepting it.[1] As the case stands, however, I think that the date is genuine and that it belongs to the reign of Jaṭāvarman Sundara-Pāṇḍya I.

### 104.—In the Muktīśvara temple at Pūrattukkōyil.[2]

1 Svast[i] śrī [||*] Kō-Ch[cha]ḍai[paṉma]r-ā[ṉa Tribhuva]na[chchakkarava]-
2 tti[gaḷ śrī]-Śundara-[Pāṇḍiya]dēvaṟku [yā]ṇḍu 11vadu
3 Kaṉṉ[i]-nā[ya]ṟṟu [apara-pa]ksha[ttu] . . . . [yum Buda]ṉ-kiḻa[m]ai-
4 [yu]m peṟṟa Śōdi-nāḷ.

"In the 11th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,—on the day of Svāti which corresponded to a Wednesday and to the . . . . *tithi* of the second fortnight of the month of Kanyā."

The given elements of the date do not correspond to any possible 11th or—supposing a wrong regnal year to have been stated,—10th or 12th year of Jaṭāvarman Sundara-Pāṇḍya II; nor to any śukla *tithi* on a Wednesday in Kanyā in any of those years, supposing that the fortnight was wrongly recorded.

The day apparently corresponds to **Wednesday, August 31st A.D. 1261,** which was in the 11th year of Jaṭāvarman Sundara-Pāṇḍya I, and on which day at mean sunrise, which was the 3rd day of Kanyā, the 4th śukla *tithi* was current, the current *nakshatra* being, by the equal-space system, Svāti. By the other two systems of Garga and the Brahma-siddhānta the *nakshatra* was Viśākhā.

I think that the record is one of the reign of Jaṭāvarman Sundara Pāṇḍya I, and that the fortnight was wrongly stated. The date does not correspond to any day in the dark fortnight during the given solar month.

6 [ḍiya]dēvaṟ[k]ku yāṇḍu 8vadu[1] | Ma[ka]ra-[n]āyaṟṟu [p]ūrvva-pakshattu daśamiyum Budaṉ-[k]iḻamaiyum peṟṟa Rō-

7 [ṣaṇi]-nāḷ.

"In the 8th year (*of the reign*) of the glorious king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,—on the day of Rōhiṇī which corresponded to a Wednesday and to the tenth *tithi* of the first fortnight of the month of Makara."

For the 8th year of Jaṭāvarman Sundara-Pāṇḍya I, the 10th śukla *tithi* in solar Makara fell on a Sunday, at whose sunrise the *nakshatra* was Kṛittikā. Neither Rōhiṇī nor the 10th śukla *tithi* could be connected with a Wednesday.

For the 8th year of Jaṭāvarman Sundara-Pāṇḍya II the year may correspond either with A.D. 1282-83, or 1283-84, according to the initial date accepted for the reign. The given date is irregular for both these years. It is, however, perfectly regular for the 9th regnal year of this king, if his accession dated from some day in the year 1276-77; for the given lunar day falling on the 23rd day of Makara, corresponds regularly to **Wednesday, January 17th A.D. 1285**, on which day at mean sunrise the 10th śukla *tithi* and the *nakshatra* Rōhiṇī were current. Since this date is regular in all its details, I think it should be accepted. But in that case either it clashes with most of the other records of this king as to the initial date of his reign, or the regnal year is wrongly given as the 8th, when it should have been stated as the 9th. A mistake of this kind is frequently made, and I believe it to have been made in this instance.

### 106.—In the Vyāghrapādēśvara temple at Siddhaliṅgamaḍam.[2]

1 Svasti śrī; Kō[ṟ]=Śaḍaipaṉmar=āṉa Tirubu[va]ṉa[ch]chak[ka]ra[va]ttigaḷ śrī-

2 Śundara-Pāṇḍiyadēvarkku [y]āṇḍu 13[vadu] Mīṉa-[nāya]ṟṟu pū[rvva]-paksha-

3 ttu Śaṇi=kkiḻamaiyum[3] shash[ṭh]iyu[m][4] peṟṟa Rō[ṣa]ṇi-nā[ḷ][5].[6]

"In the 13th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,—on the day of Rōhiṇī which corresponded to the sixth *tithi* and to a Saturday of the first fortnight of the month of Mīṉa."

For the reign of Jaṭāvarman Sundara-Pāṇḍya I the date is irregular, as the given *tithi* in his 13th year fell on a Wednesday, though the *nakshatra* was Rōhiṇī.

Working by the group of inscriptions which fixes the reign of Jaṭāvarman Sundara-Pāṇḍya II as beginning in 1276 and, therefore, his 13th year as beginning in 1288, I find the date so far satisfactory that for 4h. 31m. at the *end* of Saturday, February 26, A.D. 1289, which was the 4th day of Mīṉa, the 6th śukla *tithi* of Phālguna and the *nakshatra* Rōhiṇī were together current. At sunrise on Sunday, both this *tithi* and *nakshatra* were current, and by ordinary practice they would have been coupled with Sunday, February 27, and not with Saturday, February 25th. Phālguna śukla 6th began 7h. 8m. *after* mean sunrise on that Saturday.

Working by the earlier accession-date fixed by the other inscription-group the date is irregular.

With the reservation above stated the date corresponds to **Saturday, February 26th, A.D. 1289**; and this fixes the beginning of the reign as subsequent to February 26th, A.D. 1276.

**107.—In the Kachchhapēśvara temple at Tirukkachchūr.**[1]

1 Svasti śrī [‖*] . . . . . Kō=Chchaḍapaṉma[r]=āṉa Tiṟibuvanachchakkaravattigaḷ śrī-Śundara-Pāṇḍiyadē[va]rkku yāṇḍu 1[3]vadukku edirām=ā-

2 ṇḍu Kaṟkaḍaga-nāyaṟṟu apara-pakshattu deśamiyum Tiṅgaḷ-kkiḻamaiyum peṟṟa Kāttigai-nāḷ.

"In the year opposite to the 1[3]th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,— on the day of Kṛittikā which corresponded to a Monday and to the tenth *tithi* of the second fortnight of the month of Karkaṭaka."

The date given is incorrect for the 14th year of the reign of Jaṭāvarman Sundara-Pāṇḍya I, but correct for that of the second of that name. It corresponds to **Monday, July 3rd, A.D. 1290**, which was the 6th day of solar Karkaṭaka, or Karka, and on which day the 10th kṛishṇa *tithi* of Jyēshṭha was current at sunrise. At sunrise, also, on that day the *nakshatra* Kṛittikā was current according to all the three systems of calculation. According to this the accession-day of Jaṭāvarman-Sundara-Pāṇḍya II must have been subsequent to July 3rd A.D. 1276.

**108.—In the Kachchhapēśvara temple at Tirukkachchūr.**[2]

1 . . . . . Kō Śaḍapaṉmar=āṉa Tiṟibuvaṉachchakkara-vattigaḷ śrī-Śundara-Pāṇḍiyadēvarkku [y]āṇḍu 17vadu Siṁha-nāyaṟṟu pūrvva-pakshattu

2 . . miyum Tiṅgaḷ-kiḻamaiyum peṟṟa Uttirāḍattu nāḷ.

"In the 17th year (*of the reign*) of king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Sundara-Pāṇḍyadēva,—on the day of Uttarāshāḍhā which corresponded to a Monday and to the . . *tithi* of the first fortnight of the month of Siṁha."

This date is incorrect for the 17th year of the reign of Jaṭāvarman Sundara-Pāṇḍya I. It is, however, correct for the reign of the second king of that name. It corresponds to **Monday, August 25th A.D. 1292**, which was the 28th Siṁha, and on which day at sunrise the 11th śukla *tithi* was current, the *nakshatra* being Uttara-Āshāḍhā by all systems. This was in the 17th year of the reign of Jaṭāvarman Sundara-Pāṇḍya II., if his accession took place on or before August 25th, A.D. 1276.

---

I have given great attention to the question of the date of accession of Jaṭāvarman Sundara-Pāṇḍya II, because the evidence regarding it has hitherto been in a very unsatisfactory condition; and after concluding my examination of the eleven inscription dates sent to me this year, which, with those previously examined by the late Professor Kielhorn and myself, make a total of twenty-six records, I have come to the conclusion that this king **ascended the throne on a day between the 6th and 25th August A.D. 1276.**

As I differ from the opinion expressed by the late Professor Kielhorn and have modified the conclusions I had previously formed (above, Vol. X, pp. 144 f.) it is necessary to state the case at some length. The difference of opinion alluded to has reference to records Nos. 23 to 27. Kielhorn considered that the regnal years stated in Nos. 23 and 24 were wrong, and adhered to those given in Nos. 25 and 27. He considered that a wrong *tithi* had been stated in No. 26, and corrected, rightly as I think, the "13th" *tithi* to the 3rd. After this correction the date

[1] No. 302 of the Madras Epigraphical collection for 1909.

[2] No. 303 of the Madras Epigraphical collection for 1909.

agrees with Nos. 23 and 24 as regards the day of the king's accession. Accepting this alteration I think that instead of altering the regnal years given in Nos. 23 and 24, it was those given in Nos. 25 and 27 that required correction. It is only fair to remember that apparently Professor Kielhorn had, at the time that he wrote, very few inscriptions of this king before him.

With these preliminary remarks I proceed to summarize the results for all the records yet examined, from which it will be seen that there is now a strong presumption in favour of the accession-date put forward by me. In the list, "K" stands for Kielhorn, and "S" for Sewell. The inscription-dates are published above, in Vols. VI, pp. 310-12, VIII, pp. 278-280, and X, pp. 127-28 as well as in the present article.

From this statement it will be seen that we have six dates, *viz.*, Nos. 23, 24, 76, 77, 106 and 107 which as they stand, without any alteration, show that the king's accession took place in 1276 A.D. after August the 5th; one, No. 108, which shows that it may have taken place on or before August 25, 1276; and two, which, as they stand show that it took place before August 27th in that year. These are Nos. 54 and 55. Also one, No. 26, which, without alteration of the regnal year, supports that conclusion though a wrong *tithi* was quoted. Seven others, Nos. 25, 27, 52, 53, 74, 75 and 105, are not inconsistent with it if one year is either added to or deducted from the given regnal year. Nine others are either irregular or belong to the reign of a different king.[1]

Referring to my remarks on the accession-date of this king at p. 129 of Vol. X, it will be seen that I now accept K. 26, with Kielhorn's proposed alteration. It was "intrinsically wrong" for the stated *tithi*, but, with the alteration made, it supports the accession-date which I now believe to be the correct one. With regard to two other dates, Nos. 55 and 75, I was doubtful on account of apparent errors in them; but in view of the light since thrown on the matter they may be accepted with those errors corrected.

## JATAVARMAN KULASEKHARA.

"In the 2nd year (*of the reign*) of the glorious king Jaṭāvarman *alias* the emperor of the three worlds, the glorious Kulaśēkharadēva,—on the day of Anurādhā which corre-

[1] Since this paper was in print I have seen Professor Jacobi's article above (pp. 132, ff.). His No. 86 (p. 136) confirms my opinion, since it shows that the king could not have begun to reign earlier than 10th August A.D. 1276, 9th August of that year being still in his 14th year. This still further reduces the doubtful days of his accession, and, being accepted, proves that he ascended the throne on a day between 10th and 25th August A.D. 1276.

[2] No. 135 of the Madras Epigraphical collection for 1910.

[3] A letter *ku* has been engraved and erased after *śrī*; *kula* is written over an erasure.

sponded to a **Wednesday and** to the thirteenth *tithi* of the first fortnight and to the twentieth solar day of the month of **Mithuna.**"

This date is irregular for any year in the reign of Jaṭāvarman Kulaśēkhara I, as well as for any in the reign of Māṟavarman Kulaśēkhara II; nor is it correct for any date between A.D. 1190 and 1350 except in the case of two years. One is in A.D. 1239 and the other is in A.D. 1334. In each case the 13th śukla *tithi* coincided with the 20th day of solar Mithuna; and in each case the week-day was Wednesday and the *nakshatra* current at mean sunrise was **Anurādhā**; the only exception being that in A.D. 1239, if the calculation were made by the Brahma-siddhānta, Anurādhā had expired 20m. before mean sunrise on that day. But this objection need not be taken into account, since that *nakshatra* was probably current at true sunrise.

For the year A.D. 1334 the coincidence is absolute. In the first case the given date corresponds to Wednesday, June 15, A.D. 1239; in the second case it corresponds to Wednesday, June 15, A.D. 1334. In the first case the king's reign began after June 15, 1237, and before June 15, 1238; in the second case the reign began after June 15, 1332, and before June 15, 1333. Careful study of the characters and form of the original inscription will doubtless lead to certain determination as to which of these two years is the correct one.[1] If this king's reign should be found to begin between 1332 and 1333 A.D., we shall have the name of a hitherto unknown Pāṇḍyan king, coming probably between Māṟavarman Kulaśēkhara II and Māṟavarman Parākrama Pāṇḍya, and bearing the title "Jaṭāvarman" according to custom. And if his reign began between 1237 and 1238 A.D. we shall similarly have a new "Jaṭāvarman" between Māṟavarman Sundara Pāṇḍya I and Māṟavarman Sundara Pāṇḍya II, but with a certain overlapping of reigns. In the other case there is no overlapping; and if this should prove correct the king's title will have to be, at least provisionally, stated as "Jaṭāvarman Kulaśēkhara II."

## MARAVARMAN KULASEKHARA.

### 110.—In the Mūlasthānēśvara temple at Teṉkarai.[2]

This date is irregular. In the first place the moon can never be in Hasta on a 7th śukla *tithi* during the solar month Makara. For the 23rd year of either of the known kings of the name stated, which correspond, for the 7th śukla *tithi* of Makara, to a day in January A.D. 1291 or January A.D. 1337, the week-day is Monday in the first case, and Friday in the second; and the corresponding *nakshatras* are Rēvati in the first case, and Aśvini in the second. Working for a possible 7th kṛishṇa *tithi*, on the supposition that a mistake had been made by the engraver, I find the week-days to have been respectively Tuesday and Friday, with *nakshatras* Chitrā and Viśākhā.

[1] I have since been informed that, while it is difficult to decide the point from characters alone, the earlier date is the more probable.

Attattu
3 nāḷ.

"In the 28th year (*of the reign*) of king **Māṟavarman** *alias* the **emperor of the three worlds**, the glorious **Kulaśēkharadēva**, — on the day of **Hasta** which corresponded to a **Friday** and to the tenth *tithi* of the second fortnight of the month of **Kanyā**."

This date is intrinsically wrong, for on a tenth kṛishṇa *tithi* in solar Kanyā the moon cannot be in the *nakshatra* Hasta. In such a month the day of Hasta must be either the 14th or 15th kṛishṇa, or the 1st or 2nd śukla *tithi*. Moreover the week-day given is incorrect for the tenth kṛishṇa *tithi* in Kanyā, both in the 28th year of Māṟavarman Kulaśēkhara I (A.D. 1295) and in a possible 28th year of Māṟavarman Kulaśēkhara II, which would fall in A.D. 1341.

## MARAVARMAN KULASEKHARA I.

### 112.—In the Mūlasthānēśvara temple at Teṉkarai.[4]

"In the [2]8th year (*of the reign*) of the glorious king **Māravarman** *alias* the **emperor of the three worlds**, the glorious **Kulaśēkharadēva**, who was pleased to take every country,—

---

[1] No. 734 of the Madras Epigraphical collection for 1909.
[2] The *va* of *Sva* is not added in the right place.
[3] Read *apara-pakshattu dasamiyum*.
[4] No. 124 of the Madras Epigraphical collection for 1910.
[5] No. 126 of the Madras Epigraphical collection for 1910.
[6] The year might also be read as 20. What is taken for 8 would in that case be the first letter *ā* of *āvadu*

on the day of **Pushya,** which corresponded to a **Sunday** and to the fourth *tithi* of the second fortnight of the month of **Vṛiśchika.**"

For the 28th year of the reign of Māṟavarman Kulaśēkhara I, which began in June A.D. 1295, this date is perfectly regular. It corresponds to **Sunday, November 27th, A.D. 1295,** on which day, the 30th day of solar Vṛiśchika, the 4th *tithi* of the second lunar fortnight was current at mean sunrise, the *nakshatra* then being Pushya by all systems.

It would be incorrect for the 20th year of that king, or for a possible 20th or 28th year of the second king of that name.

## MARAVARMAN KULASEKHARA II.

### 114.—In the Muktiśvara temple at Pūrattukkōyil.[1]

1 Sva[s]t[i] śr[ī] [॥*] Kō Māṟa[paṉ]ma[r=ā]ṉa T[i]rubu[va]ṉachcha[ka]ravattigaḷ [śrī]-Kulaśē[ga]radēvarkku y[ā]ṇ[ḍu 6vadu]

2 Magara-nāya[ṟ]ṟu pūrvva-paksha[tta pratha]maiyum Śaṇi-kkiḻa[m]ai[yum p]eṟṟa Aviṭṭattu nāḷ.

"In the **[6th] year** (*of the reign*) of **king Māṟavarman** *alias* **the emperor of the three worlds, the glorious Kulaśēkharadēva,**—on the day of **Dhanishṭhā** which corresponded to a **Saturday** and to the [first] *tithi* of the first fortnight of the month of **Makara.**"

This date regularly corresponds, for the 6th year of the reign of Māṟavarman Kulaśēkhara II, to **Saturday January 12th, A.D. 1320,** which was the 17th day of Makara; on which day at mean sunrise the 1st śukla *tithi* was current, the *nakshatra* being Dhanishṭhā by all systems.

It is incorrect for the 6th year of the reign of Māṟavarman Kulaśēkhara I.

## JATAVARMAN PARAKRAMA-PANDYA.

### 115.—In the Vikrama-Pāṇḍyēśvara temple at Śōḻapuram.[2]

1 Svasti śr[ī] [॥*] Śakābdam āyirattu-iru-[ṇ]ūṟṟu-[nāṟ]pattu-nāliṉ mēl śrī-Kō= Chchaḍaipa[ṉmar=āṉa] Tr[i]bhuva[na]chchakravatt[igaḷ śrī]-Parākrama-P[ā]ṇḍiyadēva[rku yāṇḍu 8] M[īṉa]-nāya[ṟṟu] 28[3][tēdi]yu[m] pau[r]ṇ[y]ai[yu]m Budaṉ-kiḻamai[y]um peṟṟa Śittirai-u[ā]ḷ.

"After **the Śaka year** (one) **thousand two hundred and forty-four (had passed)**—in the **year 8** (*of the reign*) of the **glorious king Jaṭāvarman** *alias* **the emperor of the three worlds, the glorious Parākrama-Pāṇḍyadēva,**—on the day of **Chitrā,** which corresponded to a **Wednesday,** to the full-moon *tithi,* and to the 28th solar day of the month of Mīna."

This date is regular when calculated by the Ārya-siddhānta. It corresponds to **Wednesday, 23rd March, A.D. 1323,** on which day at mean sunrise—the day being the 28th of Mīna,—the full moon, or 15th śukla *tithi,* was current; it having begun 15h. 35m. in mean time before, and ending 7h. 52m. after mean sunrise.

The *nakshatra,* however, is found to have begun, by the equal-space and Garga systems, 1h. 30m. *after* mean sunrise; though by the Brahma-siddhānta it was current at mean sunrise, having begun 2h. 14m. earlier. I have calculated the date by the Brahma-siddhānta, and find that that authority was *not* used by the framers of the *pañchāṅga* in current use at the

[1] No. 742 of the Madras Epigraphical collection for 1909.

[2] No. 487 of the Madras Epigraphical collection for 1909.

[3] The syllables *tēdi* are expressed by a symbol.

time; for by it the day of the week, of the solar month and the number of the *tithi* all work out differently, as also does the *nakshatra* for mean sunrise of the day so established. It follows that the date was calculated by the Ārya-siddhānta; but that (i) either there was a slight error in the calculation of the *nakshatra*, or (ii) the *nakshatra* for which calculation was made was the one current at the time of the action recorded in the inscription,— which action probably took place between 1h. 30m. and 7h. 52m. after mean sunrise on the same 23rd March. The inscription belongs to the reign of a king named Jaṭāvarman Parākrama-Pāṇḍya whose reign began between 24th March A.D. 1315 and 23rd March 1316.

## MARAVARMAN VIKRAMA-PANDYA.

### 116.—In the Vyāghrapādēśvara temple at Siddhaliṅgamaḍam.[1]

1 [S]vasti śrī [||*] Kō [M]ārapatmar=āṉa[2] Tribhuvaṇach[ch]akkaravattigaḷ śrī-[3]Vikrama-Pāṇḍ[ya]yadēvaṟku yāṇḍu

2 [6]vadu [Kaṉṉi]-nāyaṟṟu pūrvva-pakshattu prathamaiyum Nāyaṟṟu-k[ki]lamaiyum perṟa At[ta][t*]tu nāḷ.

"In the **[6]th year** (*of the reign*) of king **Māravarman** *alias* **the emperor of the three worlds, the glorious Vikrama-Pāṇḍyadēva,**—on the day of **Hasta**, which corresponded to a **Sunday** and to the first *tithi* of the first fortnight of the month of **Kanyā.**"

According to the information supplied to me, doubtless from palæographic deduction, this inscription belongs to a period later than the fifteenth century A.D., and consequently to a king whose date has not yet been established, and with whose name we are not yet familiar. This may well be so, but I find it impossible, the details being given as they are here, to find a date which would correspond with those details, without examining them separately for every year; and this would entail a vast and perhaps unnecessary amount of labour.[4]

Meanwhile I would point out that, if it is permissible to suppose that this Māṟavarman Vikrama may be identical with the Kōṉēriṉmaikoṇḍāṉ Vikrama whose reign began (*Ep. Ind.*, Vol. IX, p. 228) between 13th January and 27th July, A.D. 1401, the given date very fairly well fits in with his reign. In the 6th year of this king's reign the 15th day of Kanyā corresponded to Monday, September 13th, A.D. 1406. On that day at mean sunrise the 1st *tithi* of the first fortnight was current, as also, by all systems, the *nakshatra* Hasta. The 1st śukla *tithi* had begun 11h. 20m. before mean sunrise, that is to say, it had been current for 11h. 20m. on the Sunday (September 12); and during that time the *nakshatra* Hasta had been current by all systems, it having begun by the equal-space system and that of Garga 17h. 11m., and by the Brahma-siddhānta 20h. 35m. before the Monday sunrise. That Sunday was a particularly sacred day being the Mahālaya-amāvāsyā day, with both sun and moon in Hasta. The moon's *nakshatra* has been already stated. At the moment when the 1st śukla *tithi* began on the Sunday the sun's mean longitude was 165° 4′ 27″, proving him to have been in Hasta.

It may be that the same conditions existed at an altogether later date, and the years can be examined individually if a palæographic study of the original inscription can be undertaken which would confine possibilities within a limit of, say, 50 years.

---

[1] No. 410 of the Madras Epigraphical collection for 1909.

[2] The length of *rā* is written in continuation of the letter *r*.

[3] Read *Vikrama-Pāṇḍyadē-*.

[4] [Mr. Krishna Sastri now informs Mr. Sewell that palæographically the inscription more probably belongs to the end of the 13th century. Mr. Swamikannu Pillai has accordingly calculated the date as corresponding to Sunday, August 29, A.D. 1288.—S.K.]

## MARAVARMAN VIRA-PANDYADEVA.

### 117.—In the Vyāghrapādēśvara temple at Siddhaliṅgamaḍam.[1]

1 Svasti śrī [||*] Kō Māṟapaṉmar [2]Ntribhuvanachchakkaravattigaḷ śrī-Vīra-
Pāṇḍiyadēvaṟku yāṇḍu 15vadu Dhanusu-nāyaṟṟu [a]para-
2 pakshattu ash[ṭa]m[i]yum Saṉi-kkiḻamaiyum perṟa Attattu nāḷ.

"In the 15th year (*of the reign*) of king Māṟavarman, the emperor of the three worlds, the glorious Vīra-Pāṇḍyadēva,—on the day of Hasta, which corresponded to a Saturday and to the eighth *tithi* of the second fortnight of the month of Dhanus."

The date is incorrect for the reign of the only Māṟavarman Vīra-Pāṇḍya as yet known to history, whose 15th year began between 13th March and 28th July, A.D. 1457. In that year the 12th Dhanus corresponded to Friday, December 9th, A.D. 1457, on which day the 8th *tithi* of the second fortnight was current at mean sunrise. But the week-day was not Saturday, and the given *tithi* could not be connected with Saturday; while though the *nakshatra* at mean sunrise was Hasta by the Brahma-siddhānta having begun 2h. 26m. earlier, it was Uttara-Phalgunī by the equal-space system and that of Garga.

In the previous year the given *tithi* was current at sunrise on a Monday.

The date, however, is perfectly regular for the 15th year of *Jaṭāvarman* Vīra-Pāṇḍya which year began between the 11th November A.D. 1266 and the 13th July 1267. In that 15th regnal year the 14th day of Dhanus corresponded to Saturday, December 10th A.D. 1267, and at mean sunrise on that day the 8th *tithi* of the second fortnight was current, having begun 5h. 40m. before mean sunrise. At that sunrise the *nakshatra* Hasta was current by all systems.

I think, therefore, that the date is correct, but that the record belongs to the reign of *Jaṭāvarman* Vīra, and not of *Māṟavarman* Vīra-Pāṇḍyadēva. A study of the palæography of the record will settle this question, since of course the inscription may belong to the reign of a later sovereign, bearing the name as given, who is not yet known to us historically.[3]

If my identification is considered satisfactory the commencement of the reign of Jaṭā-varman Vīra-Pāṇḍya is fixed as having taken place between December 11th, A.D. 1252, and July 13th, 1253.

---

## No. 25.—THE TIBETAN ALPHABET.

By A. H. Francke.

### Tibetan accounts of its origin.

As regards Tibetan historiography in general, there are two distinct schools of it, *viz.* the Central Tibetan and the West Tibetan school. Thus, the records referring to the introduction of the Tibetan alphabet vary to a certain degree, according to the schools of writers.

**Central Tibetan records.**—The Petersburg *rGyal rabs gsalbai melong*, Sarat Ch. Das' *The Tibeto-Mongolian dictionary*, Togbarlowa and the Bodhimör. They all agree on the following points: king **Sroṅ btsan sgampo** (c. 600—650 A.D.) sent his minister **Thonmi** to Hindustan, Southern Hindustan or **Magadha**, to learn reading and writing. He received instruction from a certain **Li byin** (the Lijin of the Mongols) in reading and writing, and formed the Tibetan alphabet after the **Lañtsha** and **Vartula** characters, Tibetan **dBu chan** after Lañtsha, and Tibetan **dBu med** after Vartula. He brought the Tibetan alphabet up to 30 characters,

[1] No. 395 of the Madras Epigraphical collection for 1909. [2] Read *Tribhuvana-*.

[3] Since the above was in print I am assured that the title *Māṟavarman* is quite clear in the original.

by taking 24 from the Indian alphabet, and inventing six new characters himself. For the expression of the Tibetan vowels he added four vowel signs.

**The West Tibetan school** states that king **Sroṅ btsan sgampo** sent his minister **Thonmi** and 16 fellow students to Kashmir, to learn the characters. They learnt the characters from the Brahman **Li byin**, and pandit **Seṅge** taught them the language (Sanskrit). Bringing them into agreement with the Tibetan language, they formed 24 *gSal byed* and 6 *Rin*, altogether 30 characters. (The following sentence is probably a later addition): Besides, they made them to agree with the Nagara characters of Kashmir and brought them into shape.

Looking at these two, the West Tibetan record strikes me as being the more original of the two. In the first place, the country from which the alphabet was brought to Tibet, is given here as being **Kashmir**. This is more in accordance with the result of Dr. Vogel's examination of the alphabet. Then, the passage about the forming of the Tibetan alphabet after the Indian Lañtsha and Vartula characters, which is altogether doubtful, is omitted here. The West Tibetan account makes mention of the Indian Nāgari alphabet, it is true, but this passage looks like a later interpolation.

**European statements.**—The Central Tibetan account, which makes the Indian Lañtsha and Vartula characters the parents of the Tibetan alphabet, was accepted by a number of European and Indian writers on this subject. Thus, Jäschke in his Tibetan grammar, p. 1, says that the Tibetan script was adapted from the Lañtsha form of Indian characters. Grünwedel, in his *Mythology* says, that the Tibetan script was formed after the Indian characters of those times, the so-called Vartula; and Sarat Ch. Das, in his article 'The Sacred and Ornamental Characters of Tibet' (J. A. S. B., Vol. LVII, p. 41) speaks of the 'letters which **Sambhoṭa** had introduced from **Magadha**, and which he had **shaped partly after the form of** some of the Wartu characters of Magadha'.

As we now know, the Tibetan characters were directly derived from Indian **Gupta**. And this fact was already recognised by Csoma de Kőrös, the Nestor of Tibetan studies. He says on p. 204 of his grammar: "The Tibetan alphabet itself, as has been noticed in other places, is stated to have been formed from the Dēvanāgarī prevalent in Central India in the seventh century. On comparing the forms of its letters with those of various ancient Sanskrit inscriptions, particularly that at Gaya, translated by Mr. (now Sir Charles) Wilkins, and that on the column at Allahabad, translated by Capt. Trover and Dr. Mill, a striking similitude will be observed." When Csoma wrote this, the term of Gupta had not yet been coined for that particular kind of script. Otherwise he would have used the term.

The next student of Tibetan, who told me the same thing, was Dr. F. W. Thomas of the India Office Library. In his opinion, this fact was so apparent and firmly established, that he did not think it necessary to write a line about it. And in his letter of the 7th June, 1906, he sent me a list of Gupta characters from Indore, of the year 465 A.D., which agree very closely with the Tibetan characters.

The same view has been expressed more recently by Col. Waddell, in his article on ancient Tibetan inscriptions from Lhasa (J. R. A. S., 1910).

With regard to the date of the introduction of the Tibetan alphabet, and the place of its provenence, Dr. Vogel has favoured me with the following note:—

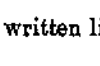

**Relation of Tibetan to Indian scripts.**

"Besides the ordinary Tibetan character, the lamas have the so-called **Lañtsha** which is exclusively used for Sanskrit formulas. The local tradition (of Central Tibet) holds, that the

Lañtsha is the older of the two, and that from it the ordinary Tibetan alphabet has been derived. This has been repeated by European writers, but in view of palæographical evidence there cannot be the slightest doubt that the tradition has reversed the real facts.

"The ordinary Tibetan character is the more ancient of the two, and the Lañtsha originated several centuries later. Both were derived from Indian scripts, but quite independently of each other. The time of their origin can be approximately fixed, by a comparison with the characters used in Indian Sanskrit inscriptions.

"The Tibetan alphabet is based on the Indian script, which had developed from the **Western Gupta** and which used to be designated by the name of **Kuṭila**. Bühler has rejected this appellation and has proposed to call it 'acute-angled' (spitz-winklig).[1] The Tibetan has retained the characteristics of this script; acute angles at the lower ends, small wedges at the tops, and in general a very ornamental and elegant appearance. As regards the date, when it was introduced into Tibet, the following points may be noted.

"Initial *ā* is indicated by the sign for initial *a* with a curve attached to the bottom of the vertical, and not by a stroke to the right as in Nāgarī. The stroke came into general use in India from about 900 A.D. [Let me note that this curve is a subjoined small *'a* (No. 23 of the Tibetan alphabet). But another ancient form of *a* is found in inscriptions near Khalatse. There the syllable *ōm* is written like that  —F.].

"The *ja* has the ancient type of the Gupta period (with central bar to the right) which was preserved in India till about 700 A.D. [The Śāradā has kept this form throughout].

"The *ta* closely agrees with the corresponding Śāradā letter in that the left half of the curve has disappeared. [But see some forms of the 8th century.—F.]

"The *da* has no wedge at the lower end, as is found in India from about 700 A.D.

"In *pa* the vertical is not prolonged beneath, as happens in India from about 700. Neither is this the case in Śāradā.

"The *pha* has retained its Gupta type, which existed in India till about 700 A.D. It differs considerably from the Śāradā *pha*.

"The *ba* resembles Śāradā *va*. The vertical, as in *pa* is not prolonged beneath. [But see one case from the 8th century.—F.]

"The *ma* has a loop, but the vertical is not prolonged beneath. It is therefore different from the Śāradā letter, but closely resembles the Indian *ma* of about 700 A.D.

"The *ya* is of special importance, as it has the tripartite shape, which in India became changed into the bipartite form in the seventh century. [The most ancient Ladakhi *yē dharmā* formula from Khalatse which Dr. Vogel believes to date from c. 600 A.D., exhibits already the bipartite form of *ya*.—F.] The Śāradā has the bipartite type.

"In *la* we observe the same as in *pa* and *ba*: the vertical is not prolonged beneath, as happened in India after 700 A.D. The absence of these prolongations is the more remarkable, as the Tibetan is fond of long down-strokes.

[1] *Indische Palæographie*, p. 49.

"Our conclusion is, that the **Tibetan is derived from the Northern Indian script, which was used in the 7th century.** It is not based on the Śāradā, but has certain points of similarity with this script, which suggest that both were derived from the same Northern Indian character."

My own view is, that the Tibetan alphabet was quietly worked out in the ancient monasteries of **Turkistan**, the Tibetan **Li yul** and that **Sroṅ btsan sgampo's** minister **Thonmi** reaped the fruit of such learning. My reasons are the following: The script used for Sanskrit in Turkistan, the so-called **Central Asian Brāhmī**, is another descendant of Indian Gupta, and closely related to the Tibetan script.[1] Similar characters were used also in **Ladakh** for Sanskrit formulas between 600 and 800 A.D. These characters were probably the parent of the so-called **Brutsha** (*Bruzha*, Dard) form of writing.[2] The Turkistan monasteries were the very places where any new kind of script might have been invented, as is shown by a number of new languages which were first reduced to writing in Turkistan. Then, the man who taught **Thonmi** in Kashmir, is called **Li byin** which name doubtless means, 'Blessing of the land **Li**' (blessing of **Khotan**). This name may be compared with such names as *Khri bdun yul byin*, 'Blessing of the land **Khri bdun**.' Thus, the man who taught Thonmi may have been a native of Turkistan. We have a single testimony of history for the early use of Indian characters in Western Tibet, in the Chinese *Sui shu*, where it is stated, that such characters were used in the Empire of the 'Eastern Women' (Guge), etc. The Tibetan alphabet, though probably invented earlier, may have followed the development of the North Indian alphabets, until it remained stationary from the 7th or 8th century.

Regarding the language for which the alphabet was invented, I am of opinion, that it certainly was the classical Tibetan. But we must not believe that classical Tibetan was generally spoken in the 7th century. From passages occurring in a good number of documents excavated by Sir Aurel Stein in the deserts of Turkistan, we know for certain that the Tibetan dialects were then already developed to an advanced degree. It is very improbable that the prefixes should have been pronounced in full in those days. There is a possibility that Tibet was in possession of an archaic sacred language from time immemorial, that it was this language which was first reduced to writing, and that this already sacred language was accepted as the language of Buddhism. In this connection the following note from Dr. Barnett's article 'Tibetan MSS., in the Stein collection' (*J. R. A. S.*, 1903, p. 112) will be of interest. "It was probably in the reign of **Khri Sroṅ lde btsan**, if not later, that the larger part of the Northern Canon, including the Śālistamba Sūtra, was translated into Tibetan. If this be so, it is singular, that a nation, which according to tradition had been hitherto buried in barbarism, should within a century and a half have accepted a new faith, assimilated its doctrines in the most scholastic form of Mahāyāna, and concurrently developed a culture and a political organisation, which made it a formidable rival to the older homes of civilisation on its north-western frontier. Probably tradition has exaggerated the facts; it may be that Buddhism was fairly well known in Tibet before the seventh century, and **Sroṅ btsan sgampo** was only its Constantine. A new page of history is opening before us."

The Tibetans themselves distinguish between two types of characters in their alphabet. One type was taken directly from the Indian alphabet, whilst the other was invented by **Thonmi Sambhoṭa**, or his forerunners. The first type is called **gSal byed** (consonants), and the second,

[1] Compare A. H. Franke, *The similarity of the Tibetan to the Kashgar-Brahmi Alphabet.* Memoirs of the Asiatic Society of Bengal, Vol. I, pp. 43 ff. [The correspondence between Central Asian Gupta and Tibetan is not so great that it is necessary to assume that they have been developed in the same locality. They have both been developed from the same source, and that explains the similarity—S. K.]

[2] Plate III, *e* of Sarat Ch. Das' article 'The Sacred and Ornamental Characters of Tibet, *J. A. S. B.*, Vol. LVII, p. 41.

**Riñs.** The order of the Tibetan alphabet is of Indian origin. But it is strange to observe, that the group of gSal byed was divided into two parts, by inserting the Riñs between them. The Tibetan alphabet was arranged as follows:

| gSal byed | | gSal byed | | Riñs | | gSal byed | |
|---|---|---|---|---|---|---|---|
| 1 | k | 9 | t | 17 | ts | 24 | y |
| 2 | kh | 10 | th | 18 | tsh | 25 | r |
| 3 | g | 11 | d | 19 | dz | 26 | l |
| 4 | ṅ | 12 | n | 20 | w | 27 | ś |
| 5 | ch | 13 | p | 21 | ź | 28 | s |
| 6 | chh | 14 | ph | 22 | z | 29 | h |
| 7 | j | 15 | b | 23 | 'a | 30 | a |
| 8 | ñ | 16 | m | | | | |

As we see, there are seven Riñs, instead of six. Regarding the gSal byed, Dr. Vogel's note will suffice. Let me add a few words about the Riñs. The sibilants *ts*, *tsh*, and *dz* are distinguished from the signs for the ordinary palatals by an additional stroke.—The Tibetan *w* is a combination of *l* and *b*. We may say it is a *b* with a prefixed *l*. Also *b* with other prefixes may become a *w*; thus, the West Tibetan pronunciation of the word *dbaṅ*, power, is *waṅ*.—The Tibetan *ź* was derived directly from the most ancient form of the Tibetan *ś*, by omitting the stroke on the left side of the *ś*.—The letter *z* is simply an inverted *j*.—The Tibetan character for *'a* may have been developed from the Indian *g*. *'A* as initial is in many dialects pronounced like *gh*. But as a prefix it generally has a nasal sound. Before the noose of the Tibetan *g* was properly developed, the characters for *g* and *'a* may have looked much the same. To distinguish them, *'a* was furnished for a time with an additional stroke. Compare the accompanying tables.[1]

It is strange that *a*, the first letter of the Indian alphabet, should be found at the end of the Tibetan alphabet. I am rather inclined to believe that it was a later development. In many ancient documents, the Tibetan *a* looks almost exactly like a *ya*, and there are a number of words in which an original *ya* has been dropped, or been turned into a vowel-bearer *a*. Thus, *yaṅ* becomes *'aṅ*; *yid* becomes *id*; *yoṅ* becomes *'oṅ*, etc. But in its later development the letter *a* became decidedly similar to the *a* of the Ṭākarī script, for which reason it was derived from it by General Cunningham. As has been noticed, old forms of the *a* in Ladakh are furnished with a hook at the lower left hand corner.

### Laṅtsha and Vartula.

Dr. Vogel has favoured me with the following note on Laṅtsha: "As regards the Laṅthsa, it is based on the Indian script of the tenth century. A characteristic of this script, to which Bühler has drawn attention, are the small tails, slanting to the right from the ends of the verticals. These are most prominent in the Nāgarī of the 10th century. Notice also the long straight topstrokes found in Nāgarī. Notice especially the letters *gha*, *ja*, *ya* (bipartite), *ra* (with loop). See plates in Sarat Ch. Das' 'Sacred and Ornamental Characters of Tibet,' *J. A. S. B.*, Vol. LVII, and Hodgson's plates in *Asiat. Res.*, Vol. XVI (1828).

[1] There are several incomplete tables of Tibetan alphabets from the eighth or ninth century among the documents of the Stein collection. There, the arrangement of the characters is in the following respect different from the present day arrangement: The letter *b* (often pronounced *v*) is not placed between *ph* and *m*, as shown above, but between *l* and *ś*. Thus it has the place of the *v* in the Sanskṛit alphabet. In the same tables the letter *wa* appears as a *ba* with a superadded *'a*. This ancient alphabet consists of 29 letters only.

A. H. Francke, *fecit.* Scale—Seven-tenths. S. I. O., Calcutta.

Our conclusion is, that the **Lañtsha** was introduced into **Tibet** about 1000 A.D., and in this instance not from Northern, but from **Eastern India.** It should be remembered, that in the hill districts of Northern India, and probably in the plains of the Panjab also, **Śāradā** was used, and not Nāgarī. The Indian alphabet was adopted wholesale and practically unchanged, probably because it was intended to be used for Sanskrit exclusively.

This explains how the Tibetan tradition came to reverse the real facts. The Lañtsha used exclusively for the sacred language, was considered as the holy script, and consequently the belief arose that it was the original character from which the ordinary Tibetan alphabet was derived. The Vartula is only a variety of Lañtsha."

Although the Tibetan script has almost remained stationary since the eighth century, it has undergone a few slight changes, which help us roughly to date ancient documents and inscriptions. The following are the chief characteristics :

(1) **The Stein MSS. from Turkistan, and stone monuments from Lhasa, of the 8th or 9th century.**—The *j* has only two parallel horizontal strokes to the right of the vertical stroke. The *t* in many cases looks as if the left half of the curve had not yet entirely disappeared. The shape of the *th* in many cases reminds us strongly of the old Brāhmī or Gupta form. The *b* is almost invariably of triangular shape. In one case the right vertical stroke of the *b* is prolonged below the line. The letter *'a* in many cases is furnished on the top with a short additional stroke. The *ś* in many cases shows the structure of the *ź* distinctly. In *s* the connecting line between the two vertical lines mostly proceeds from the lower end or the middle of the left vertical line. The *h* mostly has a horizontal position like the *h* of **Central Asian Brāhmī.**

**Vowel signs.**—The *i* vowel sign is very often inverted, and, apparently in the older documents, joined to its consonant base. All the other vowel signs are joined to their consonant bases. The *o* vowel sign prefers the left upper end of the consonant, with the exception of *ch*, *tsh*, *kh*, and *y*, where it is joined to the middle, and *l*, where it is joined to the right upper end. The *u* vowel sign is joined to the right lower end of the consonant. The *e* vowel sign is joined to the middle of the upper line of the consonant, with the exception of *s*, *m*, and *p*, where it is joined to the left upper end, and *l*, where it is occasionally joined to the right upper end. It is often of the shape of a whip.

**Other characteristic marks.**—(a) The suffixed *d* (called *drag*) is used rather frequently ; (b) subjoined *y* appears regularly below *m* when the latter is followed by *i* or *e* ; (c) the articles *pho* and *pha* instead of *po* and *pa* are found occasionally, and also *chhiṅ* instead of *chiṅ* in the supine, *chhi* instead of *chi* as interrogative pronoun ; (d) the vowels *e* and *o* are occasionally followed by a lengthening *'a* ; (e) there are a good number of cases, where the final consonant of a syllable is written below the first consonant ; (f) the euphonic laws are somewhat different from those of the present day ; (g) aspirated consonants suffer a *g*, *d*, or *b* prefix to be placed before them (*gchhig*, one, etc).

(2) **Documents of the 11th and 12th centuries, from Lahoul and Spiti.**—The *b* is of quadrangular form, and all the consonants have their present beautiful shape.

**Vowel signs.**—The *i* vowel sign is no longer inverted (with the exception of a few cases in *dBu med*), nor is it joined to its consonant base. The *o* vowel sign shows a tendency to be joined to the right upper end of its consonant base, but occasionally changes about, especially in the case of *s*. In *p* and *m* it is still joined to the left upper end. The *e* vowel sign is joined to the left upper end of the consonant base in the case of *s*, *m*, and *p* (probably). In most other cases it shows a tendency to being joined to the right upper end. The *u* vowel sign is always joined to the right lower end of its consonant base. In *dBu med*, the *u* vowel sign alone is joined to its consonant base.

**Other characteristic marks.**—(a) The *drag* is still occasionally found; (b) the *m* is mostly furnished with a subjoined *y*, when placed before *i* and *e*; (c) the articles *pho* and *pha*, the supine in *chhiṅ*, and the pronoun *chhi* have disappeared; (d) the vowels *e* and *o* are still occasionally followed by a lengthening *'a*; (e) the final consonant of a syllable is no longer written below the first consonant; (f) aspirated consonants do not any more suffer a *g*, *d*, or *b* prefix to be placed before them; (g) abbreviations of words appear; (h) inverted dental letters are used to express Sanskrit cerebrals. (A few have already been used in the eighth or ninth century.)

Sarat Ch. Das attributes the work of increasing the Tibetan alphabet from 30 to 50 characters to Śānta Rakshita of the 8th century; palæographical evidence may be adduced to prove this. A few inverted dental letters occur in the documents of the Stein collection. Dr. Vogel makes the following note on these new characters: "Another point is noteworthy. There are several letters which the Tibetan has not directly borrowed from India, but which are due to a secondary development in Tibet itself. They are the following; (a) Initials *ṛi*, *ṛī*, *ḷi*, and *ḷī* derived from the signs for *r* and *l* with vowel marks. The long vowels have the *'a* attached beneath; (b) Mediæ aspiratæ *gha*, *jha*, *dha* and *bha* formed of the signs for *ga*, *ja*, *da*, and *ba* with addition of subscribed *ha*; (c) cerebrals *ṭa*, *ṭha*, *ḍa*, and *ṇa* formed by reversing the signs for the dentals *ta*, *tha*, *da*, and *na*; (d) cerebral sibilant *ṣha* formed by reversing the sign for the palatal sibilant *śa*."

(3) **Stone inscriptions of the 15th and 16th century from Spiti, etc.**—All the characters have their present form.

**Vowel signs.**—With the exception of the *i* vowel sign, the vowel signs are still joined to their consonant bases. The *o* vowel sign prefers the right upper end of the consonant base. This is particularly evident in the case of *p*, *m*, *l*, and *s*. The same may be said of the *e* vowel sign.

**Other characteristic marks.**—The *drag*, the *y* between *m* and *i* or *e*, and all the other characteristics of the ancient orthography have disappeared. I believe that with **Buston's** edition of the great encyclopædias (1310 A.D.) the last remnants of the ancient orthography disappeared. I do not believe that there are any complete copies extant of the encyclopædias which exhibit the ancient orthography. According to Sarat Ch. Das, it was **Tsoṅkhapa** (c. 1400 A.D.) who introduced the new orthography.

(4) **Modern Tibetan Vowel signs.**—In *dBu chan*, none of the vowel signs is necessarily joined to its consonant base. In *dBu med*, only the *u* vowel sign may be joined to it. But the vowel signs are often found joined to their consonant bases, as was the case formerly.

---

## No. 26.—LIST OF MINISTERS' NAMES FOUND IN THE TIBETAN INSCRIPTION IN FRONT OF THE TA-CHAO-SSU-TEMPLE (JO-KHANG) IN LHASA, 822 A.D.

BY A. H. FRANCKE, PH.D.

On p. 89 of Vol. X of the *Epigraphia Indica* I published my reading of the text and a translation of the Tibetan part of the Tibeto-Chinese stone-inscription in front of the Ta-chao-ssu Temple (Jo-Khang) in Lhasa. My reading of the Tibetan text was based on a rubbing of the inscription reproduced in Bushell's article "The Early History of Tibet".[1] My article treated only of the principal part of the inscription and did not take into account the list of names of Tibetan ministers which was inscribed on the same stone monument. That list is found reproduced on a second plate appended to Bushell's article. This reproduction is also

[1] *J. R. A. S.*, Vol. XII, 1880, pp. 535 ff.

based on a rubbing stated to have been obtained at Peking in 1869, which was said then, from the condition of the paper, to date at least from the last century.

When I had just written my first article on the Ta-chao-ssu inscription, Professor Waddell's first article on "Ancient Historical Edicts" came into my hands.[1] At first, I did not feel sure whether it would be right to publish my translation in these circumstances; but as Professor Waddell did not announce a translation of the Mu-tsung inscription in his preface, but only expressed some doubts regarding it, which I did not share, I sent my translation to the press. Since then, I have been in the pleasant position of cataloguer of Sir Aurel Stein's Tibetan manuscripts from Turkistan, and my work on these documents has suddenly given new interest to the list of ministers' names, found on the north side of the stone. I discovered that most of the names of ministers carved on the Lhasa stone monument, occur also in Sir Aurel Stein's documents, and this remark does not only hold true of the Mu-tsung edict of 822 A.D., but also of the earlier Potala inscription of 730 A.D. The names of the ministers **rJe-blas** and **sTag-sgra**, found in that edict, also occur repeatedly among Sir Aurel Stein's excavated documents. Thus, the name sTag-sgra is found in Nos. MI, xliv, 7, and x, 95; and the name rJe-blas in Nos. MI, xiv, 108, and xiv, 65, of the Stein collection. The names Khri-bźer and sTag-bźer of the Potala inscription of 764 A.D. are found in M. I. xvi, 3.

The ministers' names of the Mu-tsung edict are found in twenty short inscriptions in various states of preservation, which are separated from one another by Chinese inscriptions. The following article does not deal with the latter.

**No. 1.**

**Text:** Bod-chhen-poi-blon-
dum-gyi . . . . . 'adzinbai-gtogs-
thabs-daṅ-myiṅ-rus.

**Translation:** Titles, names, and clan-names of the ministers of great **Tibet** who have seized the [agreement] and .... others.

NOTES: *Rus* is probably the same as *rus-pa*, bone, clan; *dum* I cannot explain; *'adzin-ba* instead of *'adzin-pa* is often found in ancient documents.

**No. 2.**

**Text:** Bod-chhen-poi-chhab-srid-kyi-blon-po-chhen-
. . . . . la-gtogs-pai-thabs-daṅ-myiṅ-
rus.

**Translation:** Titles, names, and clans of the great ministers of the government of great **Tibet**, attached to . . . . . and others.

**No. 3.**

**Text:** . . . . . khā-chhen-po-la-gtogs-te-
. . . . . sa-la-dbaṅ-źiṅ-chhab-srid-
'adzin
. . . . . dpal-chhen-po . . . . .

**Translation:** . . . . . belonging to the great (heaven?), seizing the government, and reigning on earth, . . . . . great glory . . . . . .

**No. 4.**

**Text:** . . . . . gy(i)-go-chhog-gi . . . . . .

**Translation:** . . . . . of the highest(?) . . . . .

NOTE: *chhog* may stand for *mchhog*, best.

**No. 5.**

**Text:** blon-chhen-po-blon-l . . . . . .

**Translation:** The great minister, minister L . . . . . .

[1] *J. R. A. S.*, 1909, p. 923.

No. 6.

Text: (blon-dmag) .....

Translation: (crowd of ministers?) ... ...

No. 7.

Text: (blón-rgyal) .....

Translation: (royal minister ?) .....
(or: minister and king ?).

No. 8.

Indistinct.

No. 9.

Text: chhab-srid .....
Khod-ne-stań.

Translation: government .....
Khod-ne-stań.

The name *Khod-ne-stań* has not yet been found in the Stein collection.

No. 10.

Text: chhab-srid-kyi-blon-po-chhen-po-źań-khri-bźer-lha-mthoń.

Translation: The great minister of the government, uncle Khri-bźer-lha-mthoń.

Notes: The word *źań* 'uncle,' in connection with names of ministers is repeatedly found among the Stein relics. It may be compared to the title *agu*, 'uncle,' of the heroes of the Kesar Saga. The name *Khri bźer* is probably the personal name, and *lHa-mthoń* (god-seer) may be a clan-name.

The name *Khri-bźer* is found in the following documents of the Stein collection: M. Tagh. aV, 0015; aIV, 00122; bI, 0092; MI, i, 23; xvi, 1, 8; xxviii, 0016, etc.

The name *lHa-mthoń* has been found only once, *viz.* in M. Tagh, aI, 0012.

No. 11.

Text: chhab-srid-kyi-blon-po-chhen-po-blon-rgyal-bzań-'adus-(r)kań.

Translation: The great minister of the government, minister rGyal-bzań-'adus-(r)kań.

Notes: Here again, as in all the following cases, I take the first name as the personal name, and the second as the clan-name.

The name *rGyal-bzań* occurs in MI, xiv, 108g, and xiv, 0016 of the Stein relics. The name *'aDus-rkań* has not yet been found.

No. 12.

Text: Bod-chhen-poi-blon-po .....-l-gyi-thaba-dań-myiń-rus.

Translation: Titles, names, and clan-names of the ..... ministers of great Tibet.

No. 13.

Text: Nań-blon-mchhims-źań-rgyal-bźer-khod-ne-brtsan.

Translation: The perfect minister of Inner Affairs, uncle rGyal-bźer-khod-ne-brtsan.

Notes: *mchhims* is probably connected with *'achhims-pa*, to be full, perfect.

The name *rGyal-bźer* occurs in the following documents of the Stein collection: M. Tagh, aIV, 00122 bI, 0092; bI, 0095; bI, 00104; MI, xxx, 001; xlii, 002. In No. M. Tagh, bI, 0096, we find the name *rGyal-bźer-legs-brtsan*.

The name *Khod-ne* has not yet been discovered in the Stein collection.

**No. 14.**

**Text:** Phyi-blon-bkā-la-gtogs-pa-chog-ro-blon-btsan-bźer-lha-goṅ-

**Translation:** The minister of Chog-ro, who is under the command of the minister of Outer Affairs, bTsan-bźer-lha-goṅ.

NOTES: *Chog-ro* is the well known name of a province.

The name *bTsan-bźer* is found in the following of Sir Aurel Stein relics: M Tagh, aII, 0057; MI, xxvii, 19.—The name *lHa-goṅ* occurs in MI, xiv, 58 in the following connections: *'O-nas-lha-goṅ* and *dBaṅ ..... lha-goṅ*.

**No. 15.**

**Text:** ..... mchhims-źaṅ-brtan-bźer-stag-tsab(tsaṅ?).

**Translation:** The perfect ....., uncle brTan-bźer-stag-(tsab).

NOTES: The name *brTan-bźer* has not yet been found in the Stein's relics.

**No. 16.**

**Text:** mÑan-pon(Kha-ba-soi-slog-gi-bla-'abal)-blon-Klu bzaṅ-myes-rma.

**Translation:** The lord of curses (magician) the superior of Kha-ba-soi-(slog?), minister Klu-bzaṅ-myes-rma.

NOTES: *Pon*, instead of *dpon*, master; several syllables between *Khab* and *'abal* are indistinct. *Kha-ba-so* are mentioned as officials in the account of *gNya-khri-btsan-po* in the *La-dvags-rgyal-rabs*.

For the name *Klu-bzaṅ* see No. 17. A name similar to *myes-rma* is found in No. MI, xxiv, 0034 of Sir Aurel Stein's relics, in the name *Laṅ-khrug-sme-rma*. Let me add that several ancient names contain the syllable *myes* as well as *rma* as one of their parts in the Stein collection.

**No. 17.**

**Text:** bKai-phr(i)n-blon- ..... n-ka-blon-stag-bźer-(hab?)-(nyen).

**Translation:** The minister who announces the orders, ..... minister sTag-bźer-(hab-nyen?).

NOTES: The name *sTag-bźer* is found in the following of the Stein documents: MI xxvii, 19; xxviii, 5; xxviii, 0038, 0041; xlii, 2; xvi, 3.—In No. MI. xvi, 19, the name *sTag-bźer-legs-koṅ* is found.

**No. 18.**

**Text:** rTsis-ba-chhen-po- ..... blon-stag-gzigs.

**Translation:** The great accountant, ..... minister sTag-gzigs.

NOTES: *rTsis-ba*, instead of ordinary *rTsis-pa*. The name *sTag-gzigs* has not yet been found in the Stein relics.

**No. 19.**

**Text:** Phyi-blon ..... źaṅ-klu-bzaṅ.

**Translation:** The minister of Outer Affairs, ..... uncle Klu-bzaṅ.

NOTES: The name *Klu-bzaṅ* is found in the following of the Stein documents: M. Tagh, aII, 0078; MI, xxvii, 19.

**No. 20.**

**Text:** Źal-che-ba-chhen-po-zal-blon-rgyal .....

**Translation:** The great judge, the minister of judgment, rGyal .....

NOTES: *che-ba* instead of ordinary *chhe-pa*. Unfortunately, the name of the minister has not been preserved in full; there are many names, beginning with *rgyal*, occurring in the Stein relics.

GENERAL NOTE: Let me add that in the ancient documents of Sir Aurel Stein's collection, we generally find only the personal names of the ancient ministers, preceded by their titles. It is only in rarer cases that we find the personal names and clan-names combined. My explanation of this fact would be that in all those cases, where the personal name alone is given, we may be sure that the document deals with the 'famous' minister, whose personal name and clan-name are both found on the Mu-tsung monument. But there were certain officials, whose personal names were in agreement with those of one or other of the famous ministers, but whose clan-name differed from theirs. It is only in such cases, as I believe, that the documents of the Stein collection give both names, so as not to leave any doubt with regard to the identity of the person in question.

In conclusion let me say that up to this I have examined more than six hundred of Sir Aurel Stein's relics.

## No. 27.—TIWARKHED PLATES OF THE RASHTRAKUTA NANNARAJA; SAKA 553.

BY RAI BAHADUR HIRALAL, B.A.

**Tiwarkhēḍ** is a small village on the south bank of the Ambhōrā-nadī, in the Multāī tahsil of the Bētūl District in the Central Provinces. It is 14 miles south of the Multāī town which is 29 miles south-east of Badnūr, the head-quarters of Bētūl District. The village has no ancient remains except a mud fort built as a protection from the Piṇḍārī free-booters during the declining period of the Nāgpur Bhonslā rulers. This *garhī*, as it is called, is now dug up in several places, and the site occupied by the villagers. Within its premises Nandgiri Gosain, a resident of Tiwarkhēḍ, built a new house about 40 years ago. While digging for the foundations he came upon a set of copper-plates, but not knowing what they were, he stowed them away in his lumber room, where they continued to enjoy the same obscurity as they had done underground, until Mr. Balwant Singh, Sub-Inspector of Police, Multāī Station house, visited the village in the beginning of the year 1910, when Bāpū Gosain (son of Nandgiri now dead) observing that the plates contained some curious writing presented them to him for decipherment. Mr. Balwant Singh treated the plates with nitric acid to remove the accretions of centuries and then kindly forwarded them to me. It is a somewhat curious coincidence that the Multāī plates referring to the same line of kings were also found in the custody of a Gosain.[1]

Our plates are two in number, each measuring $6\frac{1}{4}'' \times 3\frac{1}{8}''$. They are substantial, being $\frac{1}{8}''$ thick. Each plate is inscribed on one side only, the inscribed surface giving an appearance of a depression owing to the edges having been made slightly thicker. The writing is in an excellent state of preservation except that the left top corner of the first plate and the left bottom corner of the second one are a little bit corroded; still the lettering is pretty clear. The ring which was uncut when it reached my hands has a seal on a flattened out surface. It is oval in shape and bears the stamp of a figure which is now indistinguishable, but the legend *śrī-Yuddhīsura* underneath, is fairly distinct. The record contains 16 lines, each plate bearing 8 lines. Under the eighth line the word *svahastēna* is inscribed, but this word occurs in its proper place in line 11. On the margin of the second plate there appear to be 3 figures and 2 letters (probably after-additions) engraved one under the other, which I read as 553 *shāra*,[2] meaning apparently 'the year 553.'

The characters of the record belong to the northern class of alphabets. The engraving is well done throughout. The average size of letters is about $\frac{1}{4}''$. The orthographical peculiarities worth notice are:—(1) the doubling of the letter with a *rēpha* on, as in *vistīrṇṇē* (l. 1 f.); but this is not uniform as in *-Durgarājā* (l. 2) *ga* has not been doubled; (2) the two different ways in which the vowel sign of *ē* has been expressed as in *Rāshṭrakūṭānvayē* (l. 1 f.) of which the *ē* of *yē* is formed by attaching the sign to the letter instead of superscribing it as in *grāmē* (l. 9); (3) the letter *t* has been doubled before *r* in *sagōttrāya* (l. 6) and *puttrāya* (l. 7) and *dh* before *y* in *Māddhyandina-*, l. 7; (4) the sign of *ā* attached to the letters *j* and *ṭ* is represented by an upward stroke, instead of a downward one, as in *jā* of *-Durgarājā* (l. 2) and in *ṭā* of *Muṇḍibhaṭṭāya* (l. 7); (5) *b* is not distinguished from *v* as in *-trahmaṇya* (l. 5). Final form of *t* occurs in line 2.

The language is Sanskrit, but the record seems to have been composed by a clerk who did not properly remember the *ślōkas* in praise of the dynasty mentioned in the plates. He therefore introduced prose, maintaining the sense, if not the original wording which, if correctly put in, would have turned the first 6 lines into verse. At present, they are a mixture of verse and prose.

[1] See *Indian Antiquary*, Vol. XVIII. p. 230, *et seq.*

[2] This word seems to have some connection with the Hindi word *sāla* 'year,' unless it is a mistake for *Śaka*.

[As will be seen from the accompanying photo.-lithograph the first two figures look very much like the English numeral 5. *Shāra* is probably meant for Shāka.—V. V.]

Commencing with *vistīrṇē* in line 1 to *-Durgarājā(jō) nṛipaḥ* in line 2 there is the first half of a *Śārdūlavikrīḍita* verse, the other half of which may be completed from the Multāī plates, where it is given in full.[1] Again in line 4 f. we find a quarter of the same kind of verse beginning with *dānārdrīkṛita* and ending with *dvipēndrāyitaṁ*. In line 6 we again find a quarter of a *Vasantatilaka* verse beginning with *śrī-Nannarāja* and ending with *-chand[r*]aḥ*. All the rest is prose except a benedictive quotation in line 12. It is again the first half of a verse incorrectly quoted, other words of similar meaning having been inserted for words forgotten, thereby affecting the metre. It appears to me that the record being a business matter, no great attention was paid to formal portions which were copied from memory in the office of the record-keeper, wherewith synonymous words were sometimes substituted for the original ones without any consideration for metre.[2]

The inscription refers itself to the **Rāshṭrakūṭa** dynasty of which four kings are mentioned. It records a grant of land in the villages **Tivērēkhēṭa** and **Ghūikhēṭā** situated on the south bank of the **Amvēviaraka-***nadī*, to one **Muṇḍibhaṭṭa**, son of **Svāmibhaṭṭa**, a Mādhyandina Brāhmaṇa of the Bhāradvāja-*gōtra*, by king **Nannarāja**[3] (Nandarāja ?). The grant was made on two occasions, *viz.* on the **Mahākārttikī** day and on a **solar-eclipse**, the latter at the **Kapilā-***tīrtha*. Apparently the Rāja went to bathe there and made the gift, as did his two principal officers, **Gōvinda** in charge of religious affairs and **Narasiṁgha** (Narasiṁha) the minister for peace and war, who gave away 10 *nivartanas* (of land) of **Karañjamalaya** on the eastern bank of the **Sārasavāhalā** and the **Darbhavāhalā**. The charter was afterwards issued from **Achalapura** and is dated in the **Śaka year 553 increased by eight months**, *i.e.* in the month of **Kārttika** as specified in the text. The date corresponds to **October 631 A.D.**

It does not, however, appear that there was a solar-eclipse in the month of Kārttika. Mr. Gōkul Prasād Īśwardās (now Tahsīldār of Hōshaṅgābād) informs me that there was a solar eclipse in the expired Śaka year 553 on the *amāvāsyā* of Māgha (27th January, 632 A.D.) *i.e.* after our charter was given away. But the solar-eclipse referred to must have occurred prior to the date of the issue of the charter. In the Śaka year 553 current, there were two eclipses, a total one in the month of Śrāvaṇa on the 13th August 630 A.D. and an annular one in the month of Māgha on 7th February 631 A.D. The total eclipse having occurred at night was not visible, but the annular one was, as it occurred 17 minutes after sunrise. The former took place on a Monday and the latter on a Thursday. Thus while a grant made on an *amāvāsyā* falling on Monday (*sōmavatī*) coupled with a total eclipse would be more meritorious than that made on a Thursday with an annular eclipse, it is possible that the visibility of the latter may have counterbalanced other considerations and invested it with greater importance. So the greater likelihood is that the grant was made on the 7th February 631 A.D. And this date falls much nearer the date of the issue of the charter than the other.

With regard to the history of the Rāshṭrakūṭa dynasty, this record does not throw any additional light on what is known from the Multāī plates. It gives the same information (in rather a vague form on account of its defective composition) as the Multāī record, mentioning **Durgarāja** as the original ancestor, whose son was **Gōvindarāja**, from whom was born **Svāmikarāja**, whose son was **Nannarāja** (Nandarāja), whose second name **Yuddhāsura** occurs on the seal. Our charter is, however, very important from one point of view. In the Multāī plates no less than five villages are mentioned, *viz.* the village granted with four others which bounded it on its

[1] See *Indian Antiquary*, Vol. XVIII, p. 234.

[2] [The text is so full of mistakes that the exact sense of the original is not apparent in several cases. For instance the part played by Saṁragaṇa (if it has to be taken as a proper name) in line 9, is obscure. No attempt is therefore made to correct the text.—V. V.]

[3] In the Multāī plates the name of the king is *Nandarāja*. The name *Nanna* in the **Rāshṭrakūṭa** family is also known from later times. A grant of Śaṅkaragaṇa, the son of Nanna, the son of **Kakkarāja**, dated Śaka 715, has been published above, Vol. IX, pp. 193 ff.

four sides. None of these has been as yet identified. Dr. Fleet writing in 1889 remarked :—'Mr. Ommanney reported that neither have the villages mentioned any resemblance in name to any in the Multāī District nor could he discover any at all like them at Hōshaṅgābād or Jabalpur. It is therefore not even certain that the grant really belongs to the locality in which the holders of it have resided for so long a time. All that can be said on this point is that the characters show that it belongs to some part of Central India, or of the Central Provinces.[1] On 30th July 1909 Dr. Fleet wrote to me, 'It would be a valuable bit of work if you can locate this record. It is important to decide by identification of places, what locality it does belong to, because it has a bearing on three leading matters :—(*a*) the origin of that branch of the Rāshṭrakūṭas which had the Garuḍa crest; (*b*) the northern or southern use of the Śaka era; (*c*) the origin of that particular type of Nāgarī. It is almost impossible that all these 5 villages should have ceased to exist. But though some years ago I closely examined many sheets of the Indian Atlas I could not locate them. All the probabilities are that this record belongs to the south of the Narbadā. I have practically satisfied myself that the places do not exist in Gujarāt and Khāndēsh.' Although it has not been possible for me to locate with anything like certainty the villages of the Multāī plates, our present charter has come to light as if to solve the difficulty which antiquarians have felt for the last twenty years or for the matter of that for three quarters of a century calculating from the date of the first discovery of the Multāī plates. The fact of the Rāshṭrakūṭa domination on the Multāī plateau is now once for all fully established inasmuch as our plates were found in the very village where Nannarāja granted lands to Muṇḍibhaṭṭa. **Tivērōkhēṭa** of the inscription is undoubtedly the present **Tiwarkhēḍ** and the **Amvēviaraka-*nadī*** the **Ambhōrā-*nadī*** on whose south bank the present village is still situated. As noted above, the engraver has made no difference between *b* and *v*. The real name of the river appears to have been Ambēviara, *ka* being a pedantic addition to make it sound like Sanskrit. According to the record **Ghūikhēṭa** should also be somewhere near the Ambhōrā-nadī, but it is untraceable now. There is one **Ghūikhēḍ**, about 40 miles south of Tiwarkhēḍ in the Chāndūr tāluk of the Amraoti District of Berār, but I do not find the river running to it. About 55 miles from Tiwarkhēḍ lies the town of Ellichpur (commonly pronounced Elachpur or Alachpur) which I take to be the corrupted form of **Achalapura** from whence our charter purports to have been issued. Ellichpur is a well known historical[2] place and was the headquarters of a district until 1905. The transposition of letters *cha* and *la* in *Achalapura* to *Alachapura* is of the same category which changed the old name of Benares from *Vāṇārasi* to *Vārāṇasī*.[3] Even at the present day we often hear *Lakhnau* pronounced as *Nakhlau* and *matlab* as *matbal*. In the Nirvāṇa-kāṇḍa of a Prākṛit work of the Jains there is mention of Achalapura as follows :—

*Achchalapuravaraniyaḍē isāṇaibhāya-Mēḍhigiriśiharē*
*āhuṭṭhayakōḍīō ṇivvāṇagayā ṇamō tēsiṁ.*

'On the summit of Mēḍhigiri near the good town of Achchalapura towards north-east (of it) three and a half crores (of saints) obtained salvation. I bow down to them.'

This Mēḍhigiri or Meṇḍhagiri is now better known as Muktāgiri,[4] a hillock on which several Jain temples are constructed, which contain idols dated in the 14th century A.D. It is only

[1] *Indian Antiquary*, Vol. XVIII, pp. 230-231.

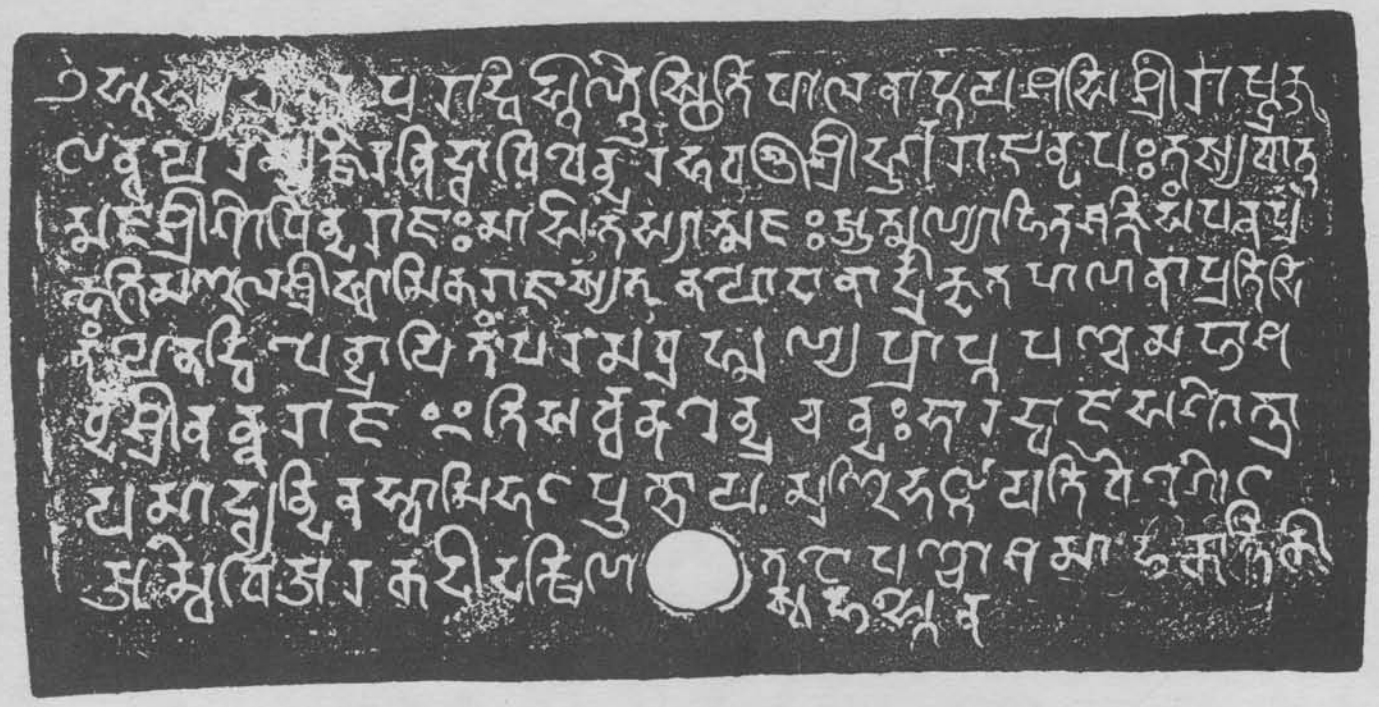

[2] Chammak, the old Charmāṅka, which was granted by a Vākāṭaka king is only 6 miles from Ellichpur; see *Gupta inscriptions*, p. 236.

[3] In the Nirvāṇa-kāṇḍa, a manuscript preserved in the Deccan College Library at Poona, the name of Benares appears as *Vāṇārasi*, whereas latterly elsewhere we have it as *Vārāṇasī*.

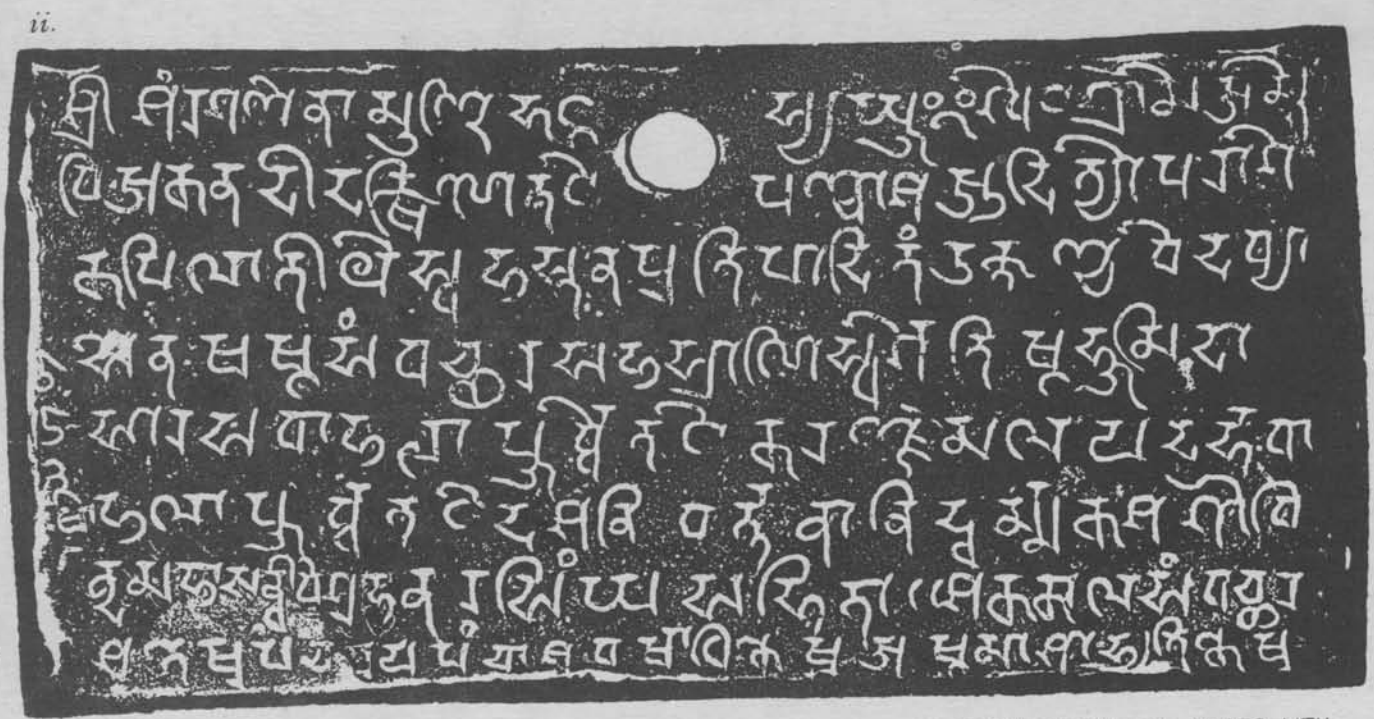

A modern recorded example of similar transposition may be seen in Mr. R. Hughes Buller's Census Report of Baluchistan for 1901 where on p. 99 he says: "The Mengāls, Bizanjos and Zahris, the three largest of the Brahui tribes are termed *Jaḍgāl* or *Jagḍāl*."

*ii.*

V. VENKAYYA. FULL-SIZE. W. GRIGGS & SONS, LTD., PHOTO-LITH.

6 miles north-east of Ellichpur and is classed as a *Siddha-kshētra* by the Jainas. It is visited by the pilgrims of that community from all parts of India. In the Śrēṇikā-Purāṇa[1] of the Jainas the name of the town again appears without transposition of letters. These references not only prove the identity but indicate that Ellichpur was an important place in olden days and that the Rāshṭrakūṭas had made it the head-quarters of a province if not their capital which is believed to have been at Mālkhēḍ further south. The old name Achalapura was apparently given to Ellichpur with a certain meaning, as the latter is situated just at the foot of the Satpura Hills (*achala*). With regard to other places mentioned in the inscription, the **Sārasavāhalā** and **Darbhavāhalā** appear to have been streamlets which I have been unable to identify. It is not clear what **Karañjamalaya** was. It may have been a village, in which case it may be identified with one of the numerous Kāranjās in Berār. If it was a forest of *karañja* or *kañji* trees (*Pongamia glabra*) or a field having *karañja* trees, it would now be very difficult to identify with certainty even if we came upon a forest or field having these trees.

## TRANSLATION.

Ōm! Hail! From **Achalapura.** In the widely spread (and) pleasing glorious **Rāshṭrakūṭa** lineage, which has acquired reputation by the preservation of stability there was (born) a king, the illustrious **Durgarāja,** just as in the (broad and charming) ocean of milk (was produced the moon). His own son was the illustrious **Gōvindarāja.** His son was the illustrious **Svāmikarāja,** possessed of a host of subjects acquired by self-centred prowess. His son, who resembles the lord of elephants in having his hand moistened (with the water poured) at donations (*dāna*) while the elephant has the trunk wet with the rutty juice (*dāna*),[4] (is) called the illustrious **Nannarāja,** who is most kind to the Brāhmaṇas, who has attained the five great sounds and who is the moon amongst all the kings.

To **Muṇḍibhaṭṭa,** son of **Svāmibhaṭṭa,** of the Bhāradvāja-*gōtra* (and) the Mādhyandina-(*śākhā*), fifty (*nivartanas*[5] *of land*) in **Tivērēkhēṭa** (*village*) on the south bank of the **Amvēviaraka** river (were given) through the illustrious **Śaṁ[ka]ragaṇa** on the **Mahākārttikī** (*day*). To (the same) **Muṇḍibhaṭṭa** were given by our own hand at the **Kapilā**-*tīrtha,* fifty (*nivartanas of land*) in the **Ghūikhēṭa** village on the south bank of the **Amvēviaraka** river, on (the occasion of) a solar eclipse.

And it has been said by (Vyāsa) the arranger of the Vedas:—The giver of land dwells in heaven for sixty thousand years.

Ten *nivartanas* (of land) on the east bank of **Sārasavāhalā** (and) on the east bank of **Darbhavāhalā** of **Karañjamalaya** (were given) *(perhaps to the same donee)* jointly by the **Superintendent of religious affairs** (*dharmakaśa*) **Gōvinda** and the **Great Minister for peace and war** (*mahāsandhivigrahin*) **Narasiṁha.**

**In five centuries of years increased by fifty-three years (and) also increased by eight months of the Śaka era.**

---

[1] Read *-Narasiṁha-*. [2] Read *-sahitaṁ.* [3] Read *-māsābhyadhikēshu.*

[4] I am indebted to Mr. Venkayya for drawing my attention to the pun on the word *dāna* in this sentence.

[5] *Nivartana* is a land-measure which the dictionaries give as equivalent to 20 *rods.* The word occurs in a commentary on *ślōka* 21, chapter 140 of the Śāntiparvan in the Mahābhārata *yaḥ kīnāśaḥ śataṁ nivartanāni bhūmēḥ karshati tēna vishṭirūpēṇa rājakīyam api nivartanadaśakaṁ karshaṇīyaṁ śrīyavad rakshaṇīyaṁ cha.* From enquiries which I personally made in Berar, I came across some old men both of the literate and the illiterate class who told me that in their younger days, about 50 years ago, a land-measure called *netana* equal to 9 *bīghas* was in use, and that 13 *netanas* made a *chāhur* which is still in use and is equal to 120 *bīghas.* In Berar a *bīgha* is 2,670 sq. yds. A *netana* would, therefore, be equal to 2,670 × 9 or 24,030 sq. yds., a little less than 5 acres or 20 *rods* which contain 24,200 sq. yds. Taken with reference to a *chāhur* of 120 *bīghas* a *netana* would be equal to 9$\frac{1}{13}$ *bīghas* or 24,646 sq. yds., *i.e.* slightly in excess of 5 acres. In popular calculations such complex fractions as $\frac{1}{13}$ are often neglected and it seems to me that the real value of a *netana* was somewhere midway between 9 and 9$\frac{1}{13}$ *bīghas* and this would be 5 acres or 20 *rods.* I therefore feel no hesitation in holding that *netana* is a corruption of the old *nivartana.* In the *sannads* in possession of the Berar jāgirdars *netana* occurs as a land-measure. That the use of the *netana*-measure was much prevalent in the Deccan may be inferred from the Gadvāl plates of Vikramāditya I. of A.D. 674 (about the same period as our grant); above, Vol. X, pp. 102 to 106.

## No. 28.—THE PARIKUD PLATES OF MADHYAMARAJADEVA;

By R. D. Banerji, M.A., Indian Museum, Calcutta.

The plates bearing the subjoined inscription were sent in 1906 to the late Dr. Theodor Bloch, then Superintendent, Archæological Survey, Eastern Circle, by Mr. J. R. Blackwood, I.C.S., Magistrate of the Puri District of Bengal. They were handed over to me by Dr. Bloch in 1908 for decipherment. I finished my article early in 1909 and gave the paper to Dr. Bloch; but he fell ill after looking through the transcript of the first plate and never recovered sufficiently so as to be able to finish it. The plates were not presented to the Indian Museum and consequently there is no record of them in that office. I had only heard from Dr. Bloch that they had come from **Pārikud** in the Puri District.[1] When I was touring in that district for collecting specimens for the Indian Museum, in September 1910, I learnt from Mr. J. Clarke, I.C.S., the then Magistrate, that the plates belonged to the Rāja of Pārikud, who had no intention of presenting them to the Museum. The plates will, accordingly, be sent back to the Rāja after publication. I am obliged to Mr. Clarke for the following information about the plates. The name of the present owner is Śrī-Gaurachandra-Mānasinha Harichandana Mardarāja Bhramaravara Rāya, Rāja Bahādur of Pārikud. The Rāja is not able to trace which of his ancestors first secured the plates and from what source they were received, nor is he able to state the locality in which they were discovered. The plates used to be preserved in his record room. Mr. Clarke kindly procured for me the genealogical tree of the Pārikud family, but I find that none of the kings mentioned in the subjoined inscription could be traced in the copy sent to me, though I heard from Mr. Clarke that the Rājas of Pārikud claim to have been descended from the kings mentioned in the copper-plate record.

The inscription is incised on three thin plates of copper, measuring $7\frac{3}{4}'' \times 4\frac{1}{2}''$ and held together by a circular ring of the same metal whose diameter is roughly $3\frac{1}{8}''$. To this ring was affixed a seal of some other metal, presumably brass (?), of which, however, there remains only a mutilated part and the solid base in which the edges of the ring are fixed. The last of the plates is broken in the right upper corner, while the first shows a slit from the ring-hole to the edge, as in the case of the Buguḍa plates of Mādhavavarman.[2] This record which has been engraved on the second side of the first plate, and on both sides of the other two plates has already appeared in the *Vaṅgīya-Sāhitya-Parishad-Patrikā*.[3] It refers itself to the reign of **Madhyamarājadēva** of the **Śailōdbhava family** who ruled in the **Kōṅgōda-maṇḍala**. The language of the grant is very incorrect **Sanskrit** and the record has been very carelessly incised. Doubling of consonants has been avoided, and almost invariably letters are left out at the ends of words. There is one incorrectly spelt word in the inscription, which is quite unintelligible to me. It is *viśrakē* in l. 49.

The object of the inscription is to record the grant of a village in the **Kaṭakabhukti-vishaya** to twelve Brāhmaṇas, *viz.* Śilasvāmi, Gōvardhanasvāmi, Vandhusvāmi, Kavadisvāmi Nārāyaṇasvāmi, Mādhavasvāmi, Bharaṇisvāmi, Durgasvāmi, Ādityasvāmi, Rudrasvāmi, Śivasvāmi and Sukhasvāmi.

---

[1] [It may be noted that these plates were sent to the office of the Assistant Archæological Superintendent for Epigraphy, Southern Circle, in 1906 by Mr. D. R. Bhandarkar while the latter was the acting Archæological Surveyor of the Bengal Circle. The plates were returned to Mr. Bhandarkar with a set of ink-impressions for publication in the *Epigraphia Indica* (*vide* Report on Epigraphy for 1905-6, Appendix A, No. 8). The accompanying photo-lithographic plate is prepared from the impressions supplied by the Assistant Archæological Superintendent's office (Madras).—V. V.]

[2] Above, Volume III, p. 41 f.

[3] Volume XVI, p. 193.

The inscription supplies the new word *timmira* which is not found in published copper-plates, in the phrase *dvādaśa-timmira-pramāṇa*, l. 44. Perhaps "*timira*" is the correct spelling. The new verses of the inscription, which are not found in the Buguḍa plates, contain nothing of importance. I could only infer from them that the kingdom of Madhyamarāja contained all sorts of hermits (vv. 12 and 13). There is no mention of the doings of the king. We may gather, however, that he was a man of great strength (v. 17), a capable archer comparable to the son of Pṛithā (*i.e.* Arjuna) (v. 16) and an ardent devotee of Śiva (vv. 14 and 15). The inscription is dated twice: 1st, in the **regnal year twenty-six: shaḍ-viṅśatimē vijaya-varddhamāna-rājyē** (l. 45) and again at the end, in an era which has not been specified.[1] The letters on the third plate have suffered very much from corrosion and the numerals of the date have become very indistinct. I find on prolonged examination that the numerals are 80, 8, but Messrs. Venkayya and Krishna Sastri to whom the paper was first submitted are of opinion that nothing whatever can be discovered. If my reading of the date be correct, I would refer it to the Harsha era, though no instance of the use of this era has so far been found in Orissa.[2] If my views be correct, the date of the grant would be 88 + 606 = 694 A.D.

Up to this date three inscriptions of the **Śailōdbhava** dynasty of the **Kōṅgōda-maṇḍala** have been published:—The Buguḍa plates of Mādhavavarman;[3] (2) the Ganjam plates of the time of Śaśāṅkarāja,[4] and (3) the Khurda plates of Mādhavarāja.[5]

The first part of the inscription on the Pārikud plates is in verse, like that of the Buguḍa plates of Mādhavavarman, and the first nine verses of both are identical. The tenth verse of the Buguḍa grant is not to be found in this record and the eleventh verse of that record appears as the tenth of the Pārikud inscription. The Buguḍa grant furnishes the genealogy of the family from Raṇabhīta to Sainyabhīta, while the Pārikud grant carries the genealogy two generations further.

The following tables show the genealogy according to the Buguḍa and Pārikud grants:—

*Buguḍa plates.*

Śailōdbhava
(*in his family*)
Raṇabhīta
Sainyabhīta I.
(*in his family*)
Yaśōbhīta
Mādhavavarman Sainyabhīta II.

*Pārikud plates.*

Śailōdbhava
(*in his family*)
Raṇabhīta
Sainyabhīta I.
(*in his family*)
Yaśōbhīta I.
Sainyabhīta II.
Yaśōbhīta II.
Madhyamarāja.

[1] [From the accompanying photo-lithographic plate it will be clear that the date is here very badly damaged. What is seen is a circle which may denote 20. It is just possible that the regnal year of the king is simply repeated in numerical symbols preceded probably by the word *saṁvatsarē*.—V. V.]

[2] It may have been imported from Northern India as was the Gupta era in the case of the date of the Ganjam plates of the time of Śaśāṅka; above Vol. VI, p. 143. [Palæography is hardly in favour of this early date. Professor Kielhorn thought that the Buguḍa plates, which are earlier, may belong to the 10th century; see above, Vol. VII, p. 103.—S. K.]

[3] Above, Vol. III, pp. 41 ff. and Vol. VII, pp. 100 ff. and plate.

[4] Above, Vol. VI, pp. 143 ff.

[5] *J. A. S. B.*, Vol. LXXIII, Pt. I, 1904, pp. 282 ff.

The Khurda and Ganjam plates mention three generations only :—

*Khurda plates.*

Sainyabhita

Yaśōbhīta

Mādhavarāja

*Ganjam plates.*

Mādhavarāja.

Yaśōbhīta

Mādhavarāja II.

(619-20 A.D.)

Both of these plates, like the Buguḍa and Pārikud grants, were issued from the **Kōṅgōḍa-maṇḍala** and the similarity in names as well as the name Sainyabhīta found on the seals of the Buguḍa, Ganjam and Khurda grants leads one to believe that Mādhava was the surname of both Yaśōbhita's father and son. But the characters of the Ganjam and Khurda grants are much older than those of the Buguḍa and Pārikud plates. It may be that the former were written in the current alphabet of North Eastern India while in the latter the alphabet prevalent in the Northern Circars, was used.[1] If the four grants be held to belong to the same country, then it may be affirmed with some degree of certainty that the Sainyabhīta of the Khurda grant is the same as the Sainyabhita I of the Buguḍa and Pārikud grants. As Yaśōbhīta is a common factor, we have to admit that Sainyabhīta II. is the same person as Mādhavarāja of the Khurda and Ganjam plates.

It is not certain whether Yaśōbhīta II. and Madhyamarāja are different persons. When the late Professor Kielhorn published the Buguḍa grant for the first time, he was of opinion that Mādhavavarman was a son of Sainyabhīta II.[2] Dr. Hultzsch, in his paper on the Ganjam grant of the time of Śaśāṅkadēva,[3] pointed out that Sainyabhīta was probably a surname of Mādhavavarman, and this view was subsequently also adopted by Professor Kielhorn.[4] A similar case occurs in this inscription also. In the metrical portion of this inscription, there is nothing to show that there was any relationship whatsoever between Yaśōbhīta II. and Madhyamarājadēva. In ordinary circumstances and on the analogy of the Buguḍa inscription, it may be assumed that Madhyamarāja is a *biruda* of Yaśōbhīta II, but there is one small phrase, the import of which, though very weak, yet may prove that king Madhyamarāja was a son of Yaśōbhīta II. This is the phrase in the 27th line :—*Madhyamarājadēva-guṇa-dhṛiḍ=rājyaṁ pituḥ prāptavān.* The word *pituḥ* may refer to Yaśōbhīta II.

The inscription records the grant of a village in the **Kaṭakabhukti-vishaya.** As the king addresses the officers of the **Kōṅgōḍa-maṇḍala,** it is apparent that the village was situated in that district. The identity of **Kōṅgōḍa** with **Kong-u-t'o** is, perhaps, well known.[5] Very little can be added to Dr. Kielhorn's remarks about the characters of these inscriptions in his note on the Buguḍa plates.[6] The king **Madhyamarāja** had performed the *vājapēya* and *aśvamēdha* sacrifices (ll. 38-39). He was a devout worshipper of Śiva and the fact that he performed the *aśvamēdha* sacrifice shows that he claimed the rank of a supreme monarch (*chakravartin*).

[1] [It is difficult to follow Mr. Banerji when he says that the alphabet of the Ganjam and Khurda plates is much older than that of the Buguḍa and Pārikud plates and at the same time asserts they may be local varieties current simultaneously.—V. V.]

## No. 29.—EIGHT CHOLA DATES.

By The Honourable Diwan Bahadur L. D. Swamikannu Pillai, M.A., B.L., L.L.B.

In his paper on the dates of Chōḷa kings (above, Volume X, pp. 121 ff.) Mr. R. Sewell has shown, by an elaborate calculation of a Tamil date from Nandalūr and of five Telugu dates from Bāpaṭla (Nos. 186 to 190) of king Kulōttunga-Chōḍa II., that the accession of **Kulōttunga-Chōḍa II. (Kulōttunga-Chōḷa II. of Tamil inscriptions) must be placed between March 26th and July 14th A.D. 1133.** The subjoined eight dates, besides confirming the correctness of Mr. Sewell's results, enable us to reduce the limits of the accession of Kulōttunga-Chōḷa II. to the period **May 9th—July 14th A.D. 1133.** Also, in the date from the Nandalūr Tamil inscription (which I have included among the eight dates now calculated) the difficulty felt by

[1] [The reading intended is perhaps *vipaschitē*.—V. V.]

[2] See above, Vol. III, p. 45, note 15.

[3] This sign of punctuation is superfluous.

Mr. Sewell about the *nakshatra* Śravaṇa is explained by a reference to the custom usually followed in fixing the day of the Śivarātri in Southern India. The Śivarātri begins at midnight, when the *nakshatra* Śravaṇa must be current, and is kept all the following day. The inscription presumably refers to the *nakshatra* Śravaṇa only in this sense, as it was not current at sunrise on the following day.

## KULOTTUNGA-CHOLA (II)

### 244.—In the Vaidyanāthasvāmin temple at Tirumalavāḍi.[1]

1 Svasti Śri [||*] Pū-maruviya puviyēḻum . . . . .

33 . . . . . Kōv=Irājakēśari-

34 patmar=āṇa Tribuvaṇachchakkaravattigaḷ śri-Kulōttuṅga-Śōḻadēvaṟku

35 yāṇḍu 2āvadu Danu-nāyaṟṟu apara-pakshattu navamiyu[m] Ti[ṅ]-

36 gaṭ-kiḻamaiyum perṟa Attatti-ṇāḷ.

"In the **2nd year** (*of the reign*) of **king Rājakēsarivarman** *alias* **the emperor of the three worlds, the glorious Kulōttuṅga-Chōḻadēva,**— on the **day of Hasta**, which corresponded to a **Monday** and to the ninth *tithi* of the second fortnight of the month of **Dhanus.**"

The date corresponds to **Monday, the 10th December A.D. 1134,** on which day the *nakshatra* Hasta ended at 54 *ghaṭikās* after mean sunrise, while the 9th *tithi* of the dark fortnight of the lunar month Mārgaśira *commenced* on the same day at 45½ *ghaṭikās* after mean sunrise. The solar month was Dhanus, as recorded in the inscription.

### 245.—In the Karavandīśvara temple at Uḍaiyārkōyil.[2]

1 Svast[i] Śr[i] ||— Pū-ma[un]u-padumam . . . . . .

29 . . . . . Kōv=I[rā]jakēsaripaṟmar=āṇa

30 [Tr]ibuva[ṇa]chchakkaravattigaḷ śrī-Ku[l]ōttuṅga-Śōḻadēvaṟkku yā-

31 ṇḍu 4 nāl-āvadu . . . . . .

33 Śiṅṅa-nāyaṟṟu apara-paksha[tt]u Tiṅga[ḷ-ki]ḻamai[yu]m [śadurtt]iyu[m] perṟa Irēvadi-[nāḷ].

"In the **4th— fourth— year** (*of the reign*) of **king Rājakēsarivarman** *alias* **the emperor of the three worlds, the glorious Kulōttuṅga-Chōḻadēva,**— on the day of **Rēvatī**, which corresponded to a **Monday** and to the fourth *tithi* of the second fortnight of the month of **Siṁha.**"

The date corresponds to **Monday, the 17th August, A.D. 1136,** on which day the fourth *tithi* of the second fortnight of the lunar month Bhādrapada ended at 41 *ghaṭikās* after mean sunrise, while the *nakshatra* Rēvatī ended on the same day shortly after sunrise. The ending moment of the *nakshatra* in mean Laṅkā time was just *before* sunrise on the 17th August, but from the time of the year and for any place in Southern India, it will be seen, from Table XIII of my *Indian Chronology* that the ending moment of the *nakshatra* in *local* time must have been shortly *after* sunrise, so that the inscription is correct in giving the *nakshatra* as Rēvatī. The solar month was Siṁha.

6 . . . . . śrī-Kulōttu[ṅga]-Śōḻadēvaṟ[ku] yāṇḍu eṭṭ-āvadu Kumbha-nāyaṟṟu apara-pakshattu=chchaturddaśi[yum] Veḷḷi-kkiḻamaiyu[m] Tiruvē(vō)ṇamum=āṇa Śivarāttiri-nāḷ.

"In the eighth year (*of the reign*) of king **Rājakēsarivarman** *alias* the emperor the glorious **Kulōttuṅga-Chōḻadēva**,— on the day of **Śivarātri**, which was (*a day of*) **Śravaṇa**, a **Friday**, and the fourteenth *tithi* of the second fortnight of the month of **Kumbha** in the eighth year (*of the reign*) of the glorious **Kulōttuṅga-Chōḻadēva**."

The date corresponds to **Friday, the 7th February, A.D. 1141**, on which day the 14th *tithi* of the second fortnight of the lunar month Māgha ended at 41½ *ghaṭikās* after mean Laṅkā sunrise, while the *nakshatra* Śravaṇa had ended at 8 *ghaṭikās* after midnight between the 6th and 7th February. Now, Śivarātri is celebrated on the day following the *midnight* (nearest to Māgha *amāvāsyā*) at which the *nakshatra* Śravaṇa is current. Therefore Śivarātri in the year in question fell on a Friday, and it was the solar month of Kumbha, as stated in the inscription.

**247.—In the Tyāgarājasvāmin temple at Tiruvārūr.**[2]

1 Svasti śrī [||*] Pū-maṇṇu-padumam . . . . . .

4 . . . . . kōv=Irājakēsaripaṇmar=āṇa Tiribu[va]ṇa[ch]cha-[k]karavattiga[ḷ] śrī-Kulōttuṅ[ga]-Śōḻadē[va][ṟ*]kku yāṇḍu 10 āvadu [Da]ṇu-nāyaṟṟu [pū]rva-paksha[ttu] ēkāde(da)śi[yum Tiṅga]ṭ-kiḻamaiyum peṟṟa A[ś]vati-nāḷ.

"In the 10th year (*of the reign*) of king **Rājakēsarivarman** *alias* **the emperor of the three worlds, the glorious Kulōttuṅga-Chōḻadēva**,— on the day of **Aśvinī**, which corresponded to a **Monday** and to the eleventh *tithi* of the first fortnight of the month of **Dhanus**."

The date corresponds to **Monday, the 30th November, A.D. 1142**, on which day the 11th *tithi* or *ēkādaśī* of the first fortnight of the lunar month Mārgaśiras ended at 59 *ghaṭikās* after mean Laṅkā sunrise, while the *nakshatra* Aśvinī ended on the same day at 41 *ghaṭikās* after mean Laṅkā sunrise.

It may appear at first sight that a *tithi* which ended at 59 *ghaṭikās* after mean Laṅkā sunrise may possibly have been carried forward to the next day in local time, but it will be seen from Table XIII of my "Indian Chronology" (p. 157 of the Tables) that in the year A.D. 1142, on the 251st day of the solar year, which was our day, the difference between mean Laṅkā time and Tanjore time was only an addition of 4 *palas* to the former, which would still have placed the ending moment of the *tithi* within the civil day noted above, *i.e.* the 30th November. The solar month was Dhanus, as stated in the inscription.

"In the **15th— fifteenth— year** (*of the reign*) of the **emperor of the three worlds**, who had this glorious panegyrical poem (in his honour)[5], the **glorious Kulōttuṅga-Chōḷadēva**,— on the day of **Bharaṇi**, which corresponded to a **Monday** and to the sixth *tithi* . . . . . "

Neither the solar nor the lunar month is traceable in the inscription which only refers to a sixth *tithi*; but it will be observed from Table XI of my "Indian Chronology" that a 6th *tithi* can concur with the *nakshatra* Bharaṇī only in the dark fortnight of lunar Śrāvaṇa or of lunar Bhādrapada. We work for the latter in the year A.D. 1147 and find that the date corresponds to **Monday, 18th August, A.D. 1147**, on which day the 6th *tithi* of the dark fortnight ended at $39\frac{1}{2}$ *ghaṭikās* after mean sunrise, while the *nakshatra* Bharaṇī ended on the same day at $12\frac{1}{2}$ *ghaṭikās* after mean sunrise. The solar month was Siṁha. *N.B.*—Monday, 9th August A.D. 1137, would have satisfied the *vāra*, *tithi* and *nakshatra*, but we reject this date, as A.D. 1137 was obviously not the 15th year of our king.

"In the **[1]5th year** (*of the reign*) of the **emperor of the three worlds,** who had (*this*) panegyrical poem (in his honour), the **glorious Kulōttuṅga-Chōḷadēva,**—on a **Sunday** which was the sixteenth solar day of the month of **Ṛishabha.**"

The lunar *tithi* is not cited, but the week day affords a clue to the date. During the 15 years A.D. 1135 to A.D. 1149 there were only two years in which the 16th day of solar Vṛishabha was a Sunday, and they were A.D. 1137 and A.D. 1148. We reject the former date, as it obviously was not the 15th year of our Chōḷa king, and we conclude that the date of the inscription was **Sunday, 9th May, A.D. 1148,** which was the 16th day of Vṛishabha.

*Summary.*

We can now arrange the eight dates discussed above in chronological order and endeavour to discover therefrom the commencement of the reign of Kulōttuṅga-Chōḷa II.

(244) 2nd year : Monday, 10th December, A.D. 1134.
(245) 4th year : Monday, 17th August A.D. 1136.
(246) 8th year : Friday, 7th February A.D. 1141.
(247) 10th year : Monday, 30th November A.D. 1142.
(248) 14th year : Thursday, 10th April A.D. 1147.
(249) 15th year : Monday, 18th August A.D. 1147.
(250) 15th year : Thursday, 25th December A.D. 1147.
(251) 15th year : Sunday, 9th May A.D. 1148.

*Dates disclosed by Inscriptions.*

We see that the 15th year of the reign must have commenced between the 10th April, A.D. 1147, which fell in the 14th year and the 18th August A.D. 1147 which fell in the 15th year. At the same time the last inscription shows that the regnal year did not change till after 9th May. Therefore regnal years of Kulōttuṅga-Chōḷa II. must have regularly commenced between 9th May and 18th August, rather 9th May and 17th August, if we bear in mind the result of inscription 245; that is, the reign itself commenced between 9th May and 17th August A.D. 1133; the 2nd year of the reign in May, June or July, A.D. 1134, and so on with the 3rd and subsequent years.

[1] No. 315 of the same collection for 1902.

## No. 30.—MANNARKOYIL INSCRIPTION OF JATAVARMAN SUNDARA-CHOLA-PANDYADEVA.

BY K. V. SUBRAHMANYA AIYAR, B.A.; OOTACAMUND.

The subjoined inscription[1] is engraved on the base of the north wall of the central shrine in the **Gōpālakṛishṇasvāmin temple** at **Maṇṇārkōyil** in the Ambāsamudram tāluka of the Tinnevelly district. With the kind permission of the late Rai Bahadur V. Venkayya I edit it from an inked impression prepared in 1905.

The inscription which is in tolerably good preservation consists of 8 lines of **Tamiḷ** prose written in the **Tamiḷ** alphabet of the period to which the record belongs. The letters are well engraved. There are a large number of Sanskṛit words and syllables in Grantha characters.[2] Two forms of *ya* occur, one with a closed loop to the left which occurs only in the beginning of line 1, and the other, which is more common, without this loop. The secondary *ā*-symbol is, in a few cases, not separated from the consonant to which it is added. In the majority of cases the central loops of the consonants *ṇ* and *ṉ* appear fully developed, though there are instances where they are written without the loops. Another peculiarity is that the secondary *i*-sign is marked on the left top corner instead of on the head of the letters as is generally seen in records of this period. This is especially the case with *pi*, *vi*, and *li*, while in *ṉi* the *i*- sign is sometimes added on to the top of the letter and sometimes by its right side, according to the shape of the letter *ṉ* which, in this record, is not uniform. The signs for *u* and *ū* in the letters *mu* and *ru* are not distinguished. Only in one case a curve has been added to the *u* in *mu* in order to denote the length. Except in the letters *lai* and *ḷai* where the first part of the vowel *u* is used to denote the *ai*-symbol, the secondary *ai* is invariably marked by two secondary *e*-signs written side by side as in Grantha. The group *nta* is always employed whenever the two letters come together. The palatal *ñ* is so shaped in some cases that it may at first sight be mistaken for *ṇā*. The guttural *ṅ* occurring in *puraṅgarai* (l. 3), =*Tiruvaraṅga*- (l. 6) and *Iruṅgaṇḍi*- (l. 8) and the syllable *ṟu* are peculiarly shaped.

The object of the inscription is to register a sale of land to the Vishṇu temple called **Rājēndraśōḷa-Viṇṇagar**. Lines 2 and 3 give the boundaries and extent of the various fields that were sold, and line 4 describes the formal transfer of the land to the temple by the assembly of **Rājarāja-chaturvēdimaṅgalam**. Lines 5 and 6 give the names of some of the members of the assembly at whose instance the lands appear to have been sold. The conveyance was drawn up by the accountant (*karaṇattāṉ*) of the village and was attested by several of the persons who ordered the sale (ll. 7 and 8). It is interesting to note that most of the members of the assembly were learned men, and this is indicated by the titles *bhaṭṭa*, *sōmayājin* and *kramavit* affixed to their names. Further, it might also be pointed out that these members were not natives of the village but immigrants from other parts of Southern India, who had settled in the several suburbs (*śēri*) of the village. A list of these suburbs and villages is given at the end of this paper.

This inscription is a record of one of the **Chōḷa-Pāṇḍya** kings.[3] South-Indian inscriptions point to the existence of at least three **Chōḷa** princes who bore the title Chōḷa-Pāṇḍya. **Rājēndra-Chōḷa I.** (A.D. 1011-44), after he had subjugated the **Pāṇḍya** country, is said to have appointed his son Chōḷa-Pāṇḍya to rule over it.[4] **Parakēsarivarman Rājēndradēva** (A.D.

[1] No. 109 of the Madras Epigraphical collection for 1905.

[2] It is worthy of note that two of the signatures at the end of the inscription are in Sanskṛit. Such admixture of Sanskṛit words in a Tamiḷ record of this period may be accounted for, to a certain extent, by the revival of learning brought about by the immigration to the Southern country of a large number of Brāhmaṇas from the north as a result of the conquests of Rājēndra-Chōḷa I., which extended as far as the Ganges.

[3] *Annual Report* on Epigraphy for 1905, Part II, p. 50, paragraph 25.

[4] *Ibidem*, 1906, Part II, p. 68, paragraph 17.

1052-64) is reported to have conferred the title of Śōḷa-Pāṇḍiyaṉ[1] on his younger brother, the victorious **Mummaḍiśōḷaṉ**.[2] The Chōḷa king **Vīrarājēndra** (A.D. 1062-70) is also stated to have been pleased to grant the **Pāṇḍimaṇḍalam** "whose crown of jewels is exalted in this world, to his royal son **Gaṅgaikoṇḍaśōḷaṉ**[3] along with the title Śōḷa-Pāṇḍiyaṉ, the leader of an army of very tall elephants."[4] Inscriptions discovered so far reveal the names of two Chōḷa-Pāṇḍya princes, *viz.* **Jaṭāvarman Sundara-Chōḷa-Pāṇḍya** and **Māṟavarman Vikrama-Chōḷa-Pāṇḍya**. The former of these is spoken of in a Maṇṇārkōyil record as one of the sons of **Rājēndra-Chōḷa I.**[5] and he is, therefore, identical with the first Chōḷa-Pāṇḍya ruler. It is perhaps to the same king that we must attribute inscriptions dated during the reign of Jaṭāvarmaṉ *alias* **Uḍaiyār Śōḷa-Pāṇḍyadēva** found at **Suchindram**[6] and **Śevilipēri**,[7] though the name Sundara does not occur.

The title Chōḷa-Pāṇḍya given to them seems to have been invented to indicate the double fact that they were members of the Chōḷa family and were made to rule over the Pāṇḍya territory. The position held by them was apparently that of a viceroy acting under the orders of the Chōḷa king ruling at Tanjore. The necessity for their appointment arose from the fact that the Pāṇḍyas could never be completely subdued. They continued in a state of chronic revolt against the Chōḷa yoke during the whole period of Chōḷa supremacy in Southern India.[8]

The subjoined record is dated in the 13th year of the reign of king **Jaṭāvarman Sundara-Chōḷa-Pāṇḍyadēva**. As his accession to the throne has been fixed at A.D. 1020-1 from the fact that his 15th year probably coincided with the 24th of his father,[9] it follows that this inscription should have been engraved about A.D. 1033-4 which corresponded to his 13th year. A few facts concerning the king's reign deserve mention.[10] His latest known date is the 23rd year[11] corresponding to A.D. 1043-4, which was the last year of the reign of his father. Sundara-Chōḷa-Pāṇḍya's inscriptions have so far been traced in the ancient Pāṇḍya and Kēraḷa dominions, *i.e.* in the modern districts of Madura and Tinnevelly and portions of the Pudukkōṭṭai and Travancore States.[12] His **Chōḷapuram**[13] inscription is dated in the 11th year and registers the gift of a lamp by a certain **Sarvalōkāśraya Vishṇuvardhana-Mahārāja** *alias* **Śaḷukki-**

---

[1] *South-Ind. Inscrs.*, Vol. III, Part I, p. 62.

[2] The title Mummaḍiśōḷaṉ was first borne by Rājarāja I.

[3] Rājēndra-Chōḷa I. appears to have first assumed the title Gaṅgaikoṇḍaśōḷaṉ after his conquest of the North The city of Gaṅgaikoṇḍachōḷapuram owes its name to him.

[4] *South-Ind. Inscrs.*, Vol. III., Part I, p. 36.

[5] No. 112 of the Madras Epigraphical collection for 1905.

[6] Nos. 69 and 70 of the same collection for 1896.

[7] No. 408 of the same collection for 1906.

[8] Parāntaka I. is known to have defeated the Pāṇḍyas thrice in the field. His grandson Sundara-Chōḷa claims to have driven the Pāṇḍya king into the forest, while Āditya II. (Karikāla), even when he was a youth, fought against Vīra-Pāṇḍya. Uttama-Chōḷa's title Madhurāntaka indicates his hostility to the Pāṇḍyas and the Tiruvāḷaṅgāḍu plates give Amarabhujaṅga as the name of the Pāṇḍya sovereign defeated by Rājarāja I. Rājēndra-Chōḷa I., Rājādhirāja and Vīrarājēndra I. claim to have defeated the Pāṇḍyas. The Pāṇḍyas seem to have asserted their independence already during the reign of Kulōttuṅga I. At any rate, we have no reason to suppose that the Chōḷa-Pāṇḍya kings continued very long. In fact their rule could not have lasted more than half a century, which was probably occupied by the rule of the few princes known from inscriptions.

[9] *Annual Report* on Epigraphy for 1905, Part II, paragraph 25.

[10] Sundara-Chōḷa-Pāṇḍīśuram-uḍaiyār, the ancient name of the ruined Śiva temple at Perunduṟai in the Pudukkōṭṭai State suggests that the temple was probably called after the king and built in his time.

[11] No. 18 of the Madras Epigraphical collection for 1894 and No. 438 for 1909.

[12] His inscriptions found at the following places roughly indicate the extent of the country ruled by him :—

Āṉaimalai, near Madura; Perunduṟai in the Tirumaiyam tāluka of the Pudukkōṭṭai State; Maṇṇārkōyil, Tiruvāḷīśvaram, Ambāsamudram, Vīraśikhāmaṇi, Kaḷugumalai, Gaṅgaikoṇḍāṉ, Śevilipēri, Shērmādēvi, and Āḍaṉūr in the Tinnevelly district; Chōḷapuram and Śuchīndram in the Travancore State.

[13] No. 32 of the Madras Epigraphical collection for 1896.

**Vijayādittan-Vikki-aṇṇaṉ.** The terms Śaḷukki and Vishṇuvardhana-Mahārāja, occurring in the name of the donor, suggest that he must have been a member of the **Eastern Chālukya** family.[1]

According to the **Tiruvālaṅgāḍu** grant, the Pāṇḍyas were first attacked by Rājēndra-Chōḷa I., with the result that their king deserted his country from fear. Establishing his son Chōḷa-Pāṇḍya as the protector of the Pāṇḍya territory, Rājēndra-Chōḷa proceeded westwards, conquered the forces of the **Kēraḷa** ruler in a fearful battle and returned to his capital leaving that country also in charge of the same prince. That the Chōḷa-Pāṇḍya here referred to is none other than **Jaṭāvarman Sundara-Chōḷa-Pāṇḍya** of our record has already been noticed. It may be pointed out now that while the stone inscriptions of the 5th and 6th years of Rājēndra-Chōḷa I. mention his conquest of the Kēraḷas, the invasion of the Pāṇḍya country is practically omitted in the historical introduction of all his records. If, as stated in the Tiruvālaṅgāḍu grant, the Chōḷa king conquered the Kēraḷas immediately after he had overcome the Pāṇḍyas, the latter event would have taken place before A.D. 1016-7, which corresponds to his 5th year.[2] It would thus appear that Sundara-Chōḷa-Pāṇḍya was in charge of the two conquered countries from or prior to A.D. 1016-7, *i.e.* four years before his accession.[3] That he actually ruled over the Kēraḷas is borne out by some of the inscriptions at Maṇṇārkōyil, where mention is made of two of his **Chēra** feudatories named **Rājasiṁha** and **Rājarāja.**[4] In one of his inscriptions,[5] it is stated that the Chēra king (*Śēramāṉār*) Rājasiṁha built the Vishṇu temple called **Rājēndraśōḷa-Viṇṇagar,** *i.e.* the modern Gōpālakṛishṇasvāmin temple at Maṇṇārkōyil. The name of the Chēra king conquered by Rājēndra-Chōḷa is not given. Nor do we know if it was Rājarāja or Rājasiṁha.

Among the geographical names that occur in this inscription, **Maṇṇārkōyil** does not find a place. It seems to be a shortened form of Maṇṇaṉārkōyil[6] and probably denotes the modern Gōpālakṛishṇasvāmin temple. The village in which the temple was situated, was called **Rājarāja-chaturvēdimaṅgalam** in ancient times. It was a *brahmadēya* in **Muḷḷi-nāḍu,** a district of **Muḍigoṇḍaśōḷa-vaḷanāḍu** which was a subdivision of **Rājarāja-Pāṇḍināḍu.** A number of hamlets appear to have been attached to this village in early days. The modern villages of **Ambāsamudram**[7] and **Kalladaikkuṟichchi**[8] were its southern hamlets, while **Pāpāṅguḷam**[9] (Vēḷārkuṟichchi) and **Āḻvārkuṟichchi**[10] (Kāḍēṟu; text l. 2) situated at a distance of about 8 miles from Ambāsamudram, formed its hamlets on

[1] We do not know of any Eastern Chālukya prince with this name at the time. About A.D. 1030 the approximate date of the Chōḷapuram inscription, the ruler of Vēṅgī was Rājarāja I. (A.D. 1022-1063).

[2] It cannot, however, be inferred from this that the Pāṇḍyas remained independent even until this date, because earlier inscriptions of Rājēndra-Chōḷa I. have been found in the Tinnevelly and Madura districts. The existence of these records in that part of the country might be taken to show that the Pāṇḍyas acknowledged the overlordship of the Chōḷa sovereign even before the invasion, conquered as the Pāṇḍya country was by Parāntaka I. and Rājarāja I. It was perhaps the Pāṇḍya king's attempt to assert his independence that caused the invasion in the present instance.

[3] Perhaps he was not formally installed in the Viceroyalty but allowed to issue orders in his own name as soon as he was placed in charge of the Pāṇḍya territory. This privilege was probably granted some time after he had been actually governing the subjugated province.

[4] Nos. 111, 113 and 114 of the Madras Epigraphical collection for 1905.

[5] No. 112 of the same.

[6] *Maṇṇaṉār* means Vishṇu.

[7] No. 102 of the Madras Epigraphical collection for 1905. The ancient name of Ambāsamudram was Iḷaṅgōykkuḍi.

[8] No. 90 of the same collection for 1907.

[9] The Vishṇu temple of Rāmasvāmin at Pāpāṅguḷam is called in its inscriptions Bagavadi-Viṇṇagar-Āḻvār at Vēḷārkuṟichchi, the north-western hamlet of Rājarāja-chaturvēdimaṅgalam (No. 124 of the Madras Epigraphical collection for 1907).

[10] The Vaṇṇiyappar temple at Āḻvārkuṟichchi was called in ancient times Tiruvaṇṇichchuramuḍaiyār at Kāḍēṟu, the north-western hamlet of Rājarāja-chaturvēdimaṅgalam (No. 121 of the Madras Epigraphical collection for 1907).

the north-western side. Four other hamlets of Rājarāja-chaturvēdimaṅgalam, *viz.* **Pāmbuṇāri, Kōṇāḍu, Kaḍaiyam** and **Pulakkuḷam** *alias* **Vārimāyileṭṭi** are also mentioned in this inscription. Of these, Kaḍaiyam may be identified with the village of the same name, situated to the west of Ambāsamudram. The modern name of Pulakkuḷam is Punakkuḷam[1] and it is also in the vicinity of Ambāsamudram. I am not able to identify the two others. The position assigned to several of the hamlets would point to the identification of the *brahmadēya* of Rājarāja-chaturvēdimaṅgalam with the modern village of **Brahmadēśam** in the same tāluka and it may be noted that the Śiva temple of **Tiruvāliśvaram** and the Vishṇu temple of Rājēndraśōḷa-Viṇṇagar which are stated in their inscriptions to be in Rājarāja-chāturvēdimaṅgalam, are quite close to Brahmadēśam. From the boundaries described in the grant portion of the subjoined record it appears that at Maṇṇārkōyil there was in ancient times another Vishṇu temple called **Rājarāja-Viṇṇagar.** This has now disappeared. The district of Muḷḷi-nāḍu mentioned above seems to be different from another of the same name in which Shērmādēvī was situated, because while the first was in the subdivision of Muḍigoṇḍaśōḷa-valanāḍu the second was in Uttamaśōḷa-valanāḍu.[2] Though the names Uttamaśōḷa and Muḍigoṇḍaśōḷa after which the two subdivisions are named may refer to the same Chōḷa king (perhaps Rājēndra-Chōḷa I.), yet, as these divisions occur in the inscriptions of the same period, there is not much doubt as to their representing different local areas. Further, it may be pointed out that the two subdivisions named above comprised different districts. Thus, for instance, the districts of **Nechchura-nāḍu,**[3] **Kiḻkaḷa-kūṟṟam**[4] and **Kiḻvēmba-nāḍu**[5] were in Muḍigoṇḍaśōḷa-valanāḍu, while **Purattāya-nāḍu,**[6] **Nāñji-nāḍu**[7] and **Marugal-nāḍu**[8] were in the subdivision of Uttamaśōḷa-valanāḍu. A rough idea of the extent of Muḍigoṇḍaśōḷa-valanāḍu might be formed from the fact that Tinnevelly, Kaḷugumalai, Ambāsamudram and the villages near them were originally included in it. In Uttamaśōḷa-valanāḍu were situated Cape Comorin, Shērmādēvī, and Chōḷapuram near Nāgerkoil. Rājarāja-Pāṇḍināḍu was the name applied to the Pāṇḍya country after its conquest by the Chōḷa king Rājarāja I.; and it mainly consisted of the districts of Madura and Tinnevelly and a part of the Travancore and Pudukkōṭṭai States. Though the Pāṇḍyas were defeated several times on previous occasions and their dominion acquired by the Chōḷas by conquest, the name of their country does not appear to have been altered prior to the time of Rājarāja I.

Two rivers are mentioned in this record, *viz.* **Muḍigoṇḍaśōḷappērāṟu** and **Rājarājappērāṟu.** As one of the fields sold to the temple is said to have been situated to the north of the former and south of the latter, the relative position of the two is established beyond question and affords facilities for the identification of both. **Porundam,** the original name of Muḍigoṇḍaśōḷappērāṟu is synonymous with the Tāmraparṇī, which near Maṇṇārkōyil runs parallel to its tributary, the Gaṭanā, and is to the south of it. Rājarājappērāṟu is, therefore, identical with the Gaṭanā. In passing, it may also be pointed out that the two rivers join within a mile's distance of Maṇṇārkōyil at a place called Tiruppuḍaimarudūr.

## TEXT.

1 Svasti śrī [||*] **Kō=Chchaḍaiyapaṇmar=āṇa Uḍaiyār śrī-Sunta(nad)ra-Śōḷa-Pāṇḍiyadēvarkku yāṇḍu padiṇ[mū]ṇṟā[va]ḍu**[9] **śrī-Rājarāja-Ppāṇḍināṭṭu Muḍigoṇḍaśō[ḷa]-valanāṭṭu Muḷḷi-nāṭṭu brahmadēyam śrī-Rājarāja-**

[1] It may be noted that in the Tinnevelly district there are two kinds of tanks, *puṇakkuḷam* and *kāluvarattukkuḷam*. The former depends on rain for its supply of water, while the latter is fed by a channel from a river.

[1] *oru-pū* and *iru-pū* are terms still employed in some parts of the country to mean single-crop and double crop lands.

[2] The *akshara kā* seems to be corrected from *ku*.

[3] This word is written below the line in the original.

[4] Read *āṛupāy-kchal*.

[5] The *akshara y* looks like *p* in the original.

[6] The *y* of this word is a correction from *p*.

[7] Here the original reads *po* instead of *ya*.

[8] *Sōmāśi* is the abbreviated Tamil form of the Sanskrit *sōmayājin*.

[9] *kiramavittaṇ* stands for the Sanskrit *kramavid*, one who knows the *kramapāṭha* of the Vēdas.

[10] *Kāḻidāda* is the Tamil form of *Kāḻidāsa*.

[11] Read *paramasvāmigaḷukku*.

[12] Read *-chaturvēdimangalattu*.

## TRANSLATION.

Hail! Prosperity! In the thirteenth year of (*the reign of*) king **Jaṭāvarman** *alias* **Uḍaiyār śrī-Sundara-Chōḷa-Pāṇḍyadēva**, the great assembly of **Rājarāja-chaturvēdimaṅgalam** sold the following land to the Supreme Lord (*paramasvāmin*) of *śrī*-**Rājēndraśōḷa-Viṇṇagar** at *śrī*-Rājarāja-chaturvēdimaṅgalam, a *brahmadēya* in **Muḷḷi-nāḍu** (a district of) **Muḍigoṇḍaśōḷa-valanāḍu** (which was a subdivision) of *śrī*-**Rājarāja-Pāṇḍināḍu**. (The land lies) to the west of (the path called) Iḍaikkuṇṇavetṭi[4] (leading to) our hamlet (*paḍāgai*) of **Pāmbuṇāṟi**, to the east of the *dēvadāna* of the god of *śrī*-**Rājarāja-Viṇṇagar**, to the north of (the river) **Taṇ-Porundam** *alias* **Muḍigoṇḍaśōḷappērāṟu**[5] and to the south of (the river called) *śrī*-**Rājarājappērāṟu**. The great assembly of *śrī*-Rājarāja-chaturvēdimaṅgalam sold to the Supreme Lord of *śrī*-Rājēndraśōḷa-Viṇṇagar, six *vēli* of river-fed double-crop land lying within these boundaries together with three *vēli* of maḷukkāḍu-land of the same (class) which was being brought under cultivation;[6] three *vēli* of dry maḷukkāḍu-land; one (*vēli*) and seven *mā* of river-fed double-crop land in **Kōnāḍu**, a hamlet of our village; half (a *vēli*) of double-crop river-fed land at **Kāḍēṟu** in **Kaḍaiyattu-Padaiyāvili**, a hamlet of this village; half (a *vēli*) of single crop land close to the bank of the tank at **Pulakkuḷam** *alias* **Vārimāyileṭṭi**, a hamlet of this village; half (a *vēli*) of crop-yielding marshy land in the bed of this tank;—in all measuring seven (*vēli*) three quarters and two *mā* of river-fed double crop land; three *vēli* of maḷukkāḍu-land of the same (class); three *vēli* of dry maḷukkāḍu-land; half (a *vēli*) of single crop land; half (a *vēli*) of marshy land in the tank; together making a total of fourteen and three-fourths (*vēli*) and two *mā*. For the land thus given away by sale, this shall be the sale deed and the document evidencing the receipt of the money for our having obtained on hand the entire sub-amount agreed upon by us. Besides this, no other deed evidencing the payment in full of the sale money (*vilai-māv-aṟudi-poruḷ-śēlav-ōḷai*) shall be demanded. We, the members of the great assembly of *śrī*-Rājarāja chaturvēdimaṅgalam, gave the land with libation of water to the Supreme Lord of Rājēndra-śōḷa-Viṇṇagar, having sold it completely and obtained the entire price and having executed the

[1] Read *Rāśipuṟattu*. [2] Read *Yajñaṉ*.

[3] Read *Śārṅgiṇaḥ*. This is a verse in the Anushṭubh metre.

[4] Literally this word means a path cut through a hill.

[5] At first sight one would take the expression *Taṇporundamāṇa-Muḍigoṇḍaśōḷa=ppērāṟu* to mean 'Muḍigoṇḍaśōḷappērāṟu which is ever filled with water', but the real significance of the words seems to be that Muḍigoṇḍaśōḷa=ppērāṟu is another name for Taṇ-Porundam or the cool Porundam. Porundam and Porunai are other names of the river Tāmraparṇī.

[6] The word *vaṭakkāniṉṟa* seems to be used in this sense also in No. 326 of the Epigraphical collection for 1908, in the passage *i-nnilattukku kālum-kalli kāḍum-veṭṭi nilamum-vaṭakki payir-ēṟṟi*. Here *vaṭakki* seems to mean cultivating or ploughing in which sense it does not appear to be used at present.

sale deed. We (the following persons) thus ordered the sale (of the above mentioned land) :— Koṭṭaiyūr Śaṅgaraṇ-Śivadēvabhaṭṭa-śōmāśiyār of śrī-Rājarājachchēri ; Tiruppēr Dēvadēvēśa-Nārāyaṇaṇ of śrī-Mummaḍiśōḻachchēri ; Kriāñji śrī-Mahēśvara-kramavittaṇ of śrī-Arumoḻidēvachchēri ; Kōrōvi Kāḷidādabhaṭṭa-śōmāśiyār of śrī-Nittaviṇōdachchēri ; Karāmbichchēṭṭu-Śrīdarabhaṭṭaṇ of śrī-Chōḻēndraśiṅgachchēri ; Kiōrōvi Madhava-śōmāśiyār of śrī-Sundaraśōḻachchēri ; Kōṭṭattu-Dēvadēvēśaṇ-Chandraṇ of śrī-Vāṇavaṇmādēvichchēri ; Karippurattu-Poṟkumāra-kramavittaṇ of śrī-Uttamaśōḻachchēri ; Kīraṇūr Śōlaippiṟāṇ-Subrahmaṇyabhaṭṭaṇ of śrī-Śembiyaṇmādēvichchēri ; Nimbai Iḷaiyanambibhaṭṭaṇ of śrī-Kuṇḍavachchēri ; Kuṇḍūr Tiruvaraṅga-Nārāyaṇa-kramavittaṇ of śrī-Pañchavaṇmādēvichchēri ; Iḍaiyāṟṟukkuḍi Sōmanakkaṇ of śrī-Lōkamādēvichchēri. We, the members of the great assembly of śrī-Rājarāja-chaturvēdimaṅgalam, thus ordered and sold (the land) to the Supreme Lord of śrī-Rājēndraśōḻa-Viṇṇagar. I, Koṭṭaiyūr Śaṅgaraṇ-Śivadēvabhaṭṭa-śōmāśi know this ; this is my signature. I, Kōrōvi Kāḷidāda-śōmāśi know this : this is my signature. I know this : the sigature of Tiruppēr Dēvadēvēśa-Nārāyaṇaṇ. I know this : the signature of Kirāñji Mahēśvara-kramavittaṇ. I know this : the signature of Śrīdaṇūr Kēśavaṇ Śēnduppirāṇ. I know this : the signature of Karāmbichchēṭṭu-Śrīdarabhaṭṭaṇ. I know this : the signature of Kōrōvi śrī-Mādhava-śōmāśi. I know this : the signature of Nimbai Iḷaiyanambibhaṭṭaṇ. I know this : the signature of Iruṅgaṇḍi-Dēvadēvēśabhaṭṭaṇ. I know this : the signature of Rāśipurattu-Yajñaṇ. Thus known by Nārāyaṇa, son of Vīra, who was the devotee of the devotees of Vishṇu (and) resident of Śāstamaṅgala. Thus known by Śōlaipp[i]rāṇ .Subrahmaṇya. At the command of the great assembly I, Śuṟṟi Śaṅgaraṇ *alias* Samaṇjasapriyaṇ, the accountant (*karaṇattāṇ*) of this village assembly, wrote this document ; (this is my) signature.

**List of villages and chēris mentioned in the inscription.**

| Serial Number. | Names of villages. | Serial Number. | Names of *chēris* of Rājarāja-chaturvēdimaṅgalam.[1] |
|---|---|---|---|
| 1 | Koṭṭaicūr | 1 | Rājarāja-chēri |
| 2 | Tiruppēr | 2 | Mummaḍiśōḻa-chēri |
| 3 | Kirāñji | 3 | Arumoḻidēva-chēri |
| 4 | Kōrōvi | 4 | Nittaviṇōda-chēri |
| 5 | Karāmbichchēḍu | 5 | Chōḻēndraśiṅga-chēri |
| 6 | Kōṭṭam | 6 | Sundaraśōḻa-chēri |
| 7 | Karippuram | 7 | Vāṇavaṇmādēvi-chēri |
| 8 | Kīraṇūr | 8 | Uttamaśōḻa-chēri |
| 9 | Nimbai | 9 | Śembiyaṇmādēvi-chēri |
| 10 | Kuṇḍūr | 10 | Kundavai-chēri |
| 11 | Iḍaiyāṟṟukkuḍi | 11 | Pañjavaṇmādēvi-chēri |
| 12 | Śrīdaṇūr | 12 | Lōkamādēvischēri |
| 13 | Iruṅgaṇḍi | | |
| 14 | Rāśipuram | | |
| 15 | Śāstamaṅgalam | | |

[1] Of these *chēris* Nos. 1—5 are named after the surnames of Rājarāja I., No. 6 after his father Parāntaka II. Sundara-Chōḻa, No. 7 after his mother Vāṇavaṇ-mahādēvī, who performed *sahagamana* on her husband's death, No. 8 after the Chōḻa king Uttama-Chōḻa, son of Gaṇḍarāditya, No. 9 after the mother of Uttama-Chōḻa, No. 10 after Rājarāja's sister and Nos. 11 and 12 after his queen. In *Ind. Ant.*, Vol. XI., p. 135, I have shown that Chōḻēndrasiṁha was a surname of Rājarāja.

## No. 31.—DADHIMATI-MATA INSCRIPTION OF THE TIME OF DHRUHLANA; [GUPTA-]SAMVAT 289.

By Pandit Ram Karna; Jodhpur.

This inscription is the oldest of all so far discovered in Mārwār. It was found in a very ancient temple, which is dedicated to the goddess Dadhimatī, commonly called **Dadhamat-***mātājī*, situated in a desert where the boundaries of two villages named **Gōṭh** and **Māṅglōd** meet. These villages are 24 miles north-east of Nāgōr, the principal town of the district of the same name, in the Jōdhpur State. The rims of the slab are raised one inch high on all sides, and it was discovered lying upside down in one of the corners of the hall of the temple of the goddess.

When the news of this find reached Jōdhpur, the stone was brought to the Tawārikh Mēhkmā or Historical Department of the State, where its contents were first deciphered by me. The stone had been kept there for several years when, on the request of the *pañchas* of the Dāhimā-Brāhmaṇa community of Jōdhpur, the Darbār kindly ordered that it should be returned to them with instructions to take proper care of it, it being the most valuable and oldest inscription in the State. The reason why it was made over to them was that all the Dāhimā-Brāhmaṇas recognise Dadhimatī as their *kula-dēvī* or family goddess, and that they consequently urged that the presence of such an inscription rendered the edifice more sacred and important in their eyes and proved the antiquity of the temple of their *mātājī*. The stone is, therefore, now lying in its former position in the *sabhā-maṇḍapa* of this temple.[1]

The inscription covers a space of writing 1′ high by 1′ 7¼″ broad. The average size of the letters is about $\frac{3}{16}$″. Considerable skill seems to have been exercised in engraving this inscription, and the rims are raised one inch high, as noted above, presumably with a view to protect the writing from the effects of weather and rain or from other stones coming into contact with the written surface; but, in spite of this care and foresight, the right half of the sixth line has been rubbed off, apparently with an instrument, by somebody. Otherwise, the inscription is in an almost perfect state of preservation. It contains 13 lines of writing in Sanskrit, which is grammatically faulty and inaccurate in some places, *e.g.*, *Avighnanāgaḥ-pramukhā* (l. 2), *datta dramma-pañchāśaḥ* (l. 7f.), *dataḥ drammaśataḥ* and *Bappakaḥ Pūrṇṇamukha-putrēṇa* (l. 10), etc., etc. Besides, there are several minor mistakes of engraving. The text is in prose excepting lines 11 and 12 wherein a verse occurs, which is a quotation from the *Dēvī-Māhātmya*, as will be shown subsequently. The date of the inscription is given in the last line. The characters belong to the northern class of alphabets; and the letters *r*, *ś*, *ṇ*, *n*, *jh*, *h*, *d*, and *b*, are identical with those of the Mandasōr inscription of *Rājādhirāja* Yaśōdharman-Vishṇuvardhana of M. V. 589.[2] In respect of **orthography** it may be noticed (1) that in all cases where the word Brāhmaṇa occurs (except in ll. 3 and 12), the sign for *v* is used for *b*, though in the case of other words wherein the letter *b* occurs the sign for *b* is invariably employed; (2) the consonant following *r* has been doubled only once in the word- *Pūrṇṇa-* in l. 10; (3) the rules of *parasavarṇa* have been throughout observed with the exception of the word *-saṁnidhya-* in l. 1.

[1] Its contents have since been committed in Dēvanāgarī characters to a copper-plate which has been fixed on the left hand of the entrance and in the front wall (facing the deity) of the Sabhāmaṇḍapa for the reason that if the stone, which is now old enough, be broken, the contents may not be destroyed. A new *prašasti* has been added, composed by Pandit Ram Karna, and giving the genealogy of the Rāthōrs from Sīhā and down to the late Mahārāja, Sir Sardar Singh. [The accompanying plate has been prepared from an impression prepared by Pandit Ram Karna himself.—Ed.]

[2] Published in *Ind. Ant.*, Vol. XV, p. 224 ff., and *Gupta Inscrs.*, p. 152.

The inscription opens with obeisance to the goddess Sarasvatī. Then follows a request to *dēvī* **Dadhimatī** by the community (*gōshṭhikā*) of **Dadhya-Brāhmaṇas**, headed by **Avighnanāga.** These Brāhmaṇas used to reside, it appears, in the same temple and were the worshippers of the *dēvī*. A passing reference is also made here to one **Śrī-Dhrūhlāṇa,** who appears to have been then the ruling prince, but who this chief was and where he ruled we are unable to ascertain. Lines 3 to 10 contain the names and *gōtras* of the donors with their fathers' names and the amount contributed by each, the details whereof are embodied in the subjoined table.

| No. | Name of donor. | Name of father. | Gōtra. | Clan. | Amount contributed. |
|---|---|---|---|---|---|
| 1 | Avighnanāga . . . . | Laṅgaka . . . . | Vachchha[1] . | Āvō . | 1,100 |
| 2 | . . . . . Miśra . . | Kaṭaka . . . . | ... | ... | |
| 3 | Mātulya . . . . | Pūphaka . . . . | ... | ... | |
| 4 | Yaśapati . . . . | Yakshadinna . . . | ... | ... | |
| 5 | Majhabīha . . . . | Gaṇabhaṭa . . . | ... | ... | 100 |
| 6 | ..... | ..... | ... | ... | 120 |
| 7 | Vishṇudēva . . . . | Ḍhūlaṇa . . . . | ... | ... | 50 |
| 8 | Nimbagaṇa . . . . | Śūraka . . . . | ... | ... | 100 |
| 9 | Dhaniyaka . . . . | Achiutita . . . . | ... | ... | 300 |
| 10 | Bālāditya . . . . | Avigabaka . . . | ... | Mahattara | 100 |
| 11 | Bappaka . . . . | Pūrṇṇamukha . . . | ... | ... | 150 |
| 12 | Sōmānaka . . . . . | ..... . . . | ... | ... | 4 |
| 13 | Achilakadē [va*] | Nimbāditya . . . | ... | ... | |
| 14 | Suvaka | | | | |

Line 11 contains the verse[2] *sarva-maṅgala-maṅgalyē śivē sarvārthasādhikē | śaraṇyē tryaṁbakē Gauri Nārāyaṇi namō=stu tē*, quoted from the *Mārkaṇḍēya-Purāṇa*, as said above. Then follow (l. 12) the names of the Brāhmaṇas numbered 12-14 in the above table. The reason why their names are mentioned after this verse and not along with those of their caste fellows specified above, is not quite clear. Probably they contributed their mite after the engraving of the inscription had commenced. The last line, *i.e.*, the 13th, gives the date which is the 13th of the dark half of Śrāvaṇa of the year 289 (Gupta, equivalent to Vikrama-Saṁvat 665 or 608 A.D.).

It may be noted that the date of this inscription has been expressed in numerical symbols. The numeral 200 has been represented by a sign resembling ५ which is just after the fashion

[1] [Perhaps the same as *Vatsa*.—V. V.]

[2] Its meaning is, O goddess Nārāyaṇi, obeisance to thee, who art the source of all blessings, doer of good, accomplisher of desired objects, giver of shelter, endowed with three eyes and Gaurī (*i.e.* the spouse of the god Mahādēva).

so often observed in the Jaina manuscripts[1] (*vide* Bühler's Table IX). Again, 80 has been expressed by a symbol which differs but little from that given in Bühler's Table. Then follows the sign for 9, which is also in harmony with the Valabhī system. So that 200 80 9 stand for the year 289, which has been given in the symbolical system so often met with in early inscriptions. Then follow the words *Śrāvaṇa ba* apparently for *Śrāvaṇa badi* (*i.e.* the dark half of the month of Śrāvaṇa), the letter *di* after *ba* having been omitted for want of space. The date 13th has, again, been expressed by numerical symbols. 10 has been represented by a sign which is just like that met with in the Vākāṭaka inscriptions (*vide* Table No. IX of Bühler, referred to above) and 3 is denoted by three more or less parallel lines (≡) which is also after the Gupta fashion. Similarly, the numeral 4 in the last line has also been represented by the symbol (꤬) which is after the same Gupta or Nēpāl system (*vide* table quoted above). There is a dot after this symbol in the original stone, but it appears to have been inadvertently engraved by the mason. If the author had meant 40, the sign for 40 and not that for 4 would have been used in its place. From the above, it is quite clear that the date of the inscription is of the Gupta era and not Vikrama or Harsha. Secondly, the formation of the characters resembles that of the Mandasōr pillar inscription of king Yaśōdharman, as already noted, which fact also corroborates the conclusion arrived at above; and thirdly, we know that the Gupta rule, which had extended far and wide over the land, came to its end at about the same period.

It may be inferred from the words *asmin dēvyā nivēśē* of line 3 that the temple of the goddess Dadhimatī was *in situ* when the contribution was raised by the Dadhya-Brāhmaṇas headed by Avighnanāga. Had this subscription been called for erecting the shrine, some such word as *kārita* would have been used. The temple is therefore a very old one. Additions to the temple were made by a Dāhimā Brahmachārī named Vishṇudāsajī in V.S. 1906.[2]

In the beginning of this inscription there is a mention of *Dadhya*-Brāhmaṇas.[3] These are now-a-days known as Dāhimā-Brāhmaṇas, and are one of the *chha-nyātī* (six castes[4]) of Brāhmaṇas of the Pañcha-gauḍa section. There is no doubt that the Dadhyas of our inscription are the modern Dāhimās, because, first, the whole of the community of the Dāhimā-Brāhmaṇas recognise this goddess (Dadhimatī) as their *kula-dēvī* or family goddess; secondly, the majority of the population of the villages, adjoining the temple within the limit of 10 to 20 *kōs*, consists of these Brāhmaṇas; thirdly, most of the modern names of the Khāmpas (clans) of this community are after the names of the villages situated round about the temple, *e.g.*, Gōṭhēchā after Gōṭh, Māṅgalōdyā after Māṅglōd, Āsōpā after Āsōp, Īṇāṇyā after Īṇāṇā, Khatōḍa after Khāṭū, Bōrāḍā after Bōrāwār, Ḍiḍawāṇyā after Ḍiḍwāṇā, etc. The Dāhimā-Brāhmaṇas assert that they are descended from the well-known Dadhīchi-*Ṛishi* and style themselves *Dādhīchas*; while in this inscription they are termed *Dadhyas*, certainly after the name of the goddess Dadhimatī. A reference to No. 2 in the above table would show that the epithet *Miśra*, which is still used by the Dāhimās, was common in those days. In the third line there occurs a word *āvō*; but there is no clan amongst the

[1] [A closer approximation to the symbol used in the present inscription occurs in Pandit G. H. Ojha's *Palæography of India*, plate 42, column 9, where it is stated that the symbols in that column are taken from "various records and charters."—V. V.]

[2] Further repairs to the temple are being executed by the Dāhimā-mahāsabhā, by raising subscriptions from the whole community of Dāhimā Brāhmaṇas residing in all parts of India. Nearly a sum of Rs. 10,000 has already been collected and spent for the purpose.

[3] [Though it seems most natural to read *śrī-dadhyā*, I feel little doubt that what the engraver had before him was *śrī-dēvyā*.—S.K.]

[4] The names of the six castes who interdine but do not intermarry are :—1. Dāhimā, 2. Pārīkha, 3. Gauḍa, 4. Gūjara-gauḍa, 5. Sāraswata, and 6. Śikhawāla (some say Khaṇḍēlawāla).

Dāhimā-Brāhmaṇas known by this name. It therefore appears that it is perhaps a contracted form of the word *āvōṭī*, just as the word *brāhmaṇa* is written in the abbreviated form *brāhra* in line 12. It is also possible that the letter *ṭī* of the word *āvōṭī* has been carelessly omitted. The word *āvōṭī* or *ābōṭī* means a worshipper; and hence it may be inferred that the Dadhyas were worshippers of the goddess Dadhimatī in those days. The office of worshipping this goddess is now held by the Sēvagas (or Bhōjakas). It is just possible that the Dadhya-Brāhmaṇas, as they took up some other profession, later on employed a Sēvaga for this purpose, whose descendants are up to this day doing the same work. This supposition is further strengthened by the fact that the Dāhimā-Brāhmaṇas of the village Rōl, 10 miles from this temple, even now personally perform the worship of the deity and offer oblations in her honour in the months of Chaitra[1] and Āśvina when fairs are held in and around the temple. In these fairs the inhabitants of the adjoining villages meet together to worship the goddess and offer their cattle for sale.

The most noteworthy information furnished by this inscription is the light it throws on the date of the *Mārkaṇḍēya-Purāṇa*. In line 11 of our inscription is quoted the 9th verse of the 91st chapter of that *Purāṇa* or the 10th chapter of the *Dēvī-Māhātmya*, as the latter begins from the 81st chapter and ends with the 93rd. From this quotation we can conclusively and convincingly assert that the *Dēvī-Māhātmya* was composed before V. S. 665, *i.e.* before the 7th century A.D. It would, therefore, be futile if any one were to assign a date, later than the 7th century, to the *Dēvī-Māhātmya* or the *Mārkaṇḍēya-Purāṇa*. The section *Dēvī-Māhātmya* is regarded by some scholars as an interpolation, but what can with certainty be contended is that the *Dēvī-Māhātmya* is not a production later than the 7th century or thereafter. Rev. K. M. Banerjea writes in the introduction to his edition of the *Mārkaṇḍēya-Purāṇa* as follows[2]:—

"We cannot help noticing in this place the dignity imparted to the work under review. It is classed in the same category with the Vēdas, and described as an immediate product from Brahmā's mouth. Although a Purāṇa, it is not attributed to Vyāsa, whom other Śāstras consider as the author of all works bearing that title. The *Mārkaṇḍēya Purāṇa*, however, does not acknowledge him as its composer, editor or compiler.[3] It claims equal honour in this respect with the Vēdas themselves."

And he says in the beginning of his preface[4] that "the section called *Dēvī-Māhātmya* was probably an interpolation." A reference to chapter 94, verse 1,[5] would show that when recapitulating the past, the speaker (*i.e.* Mārkaṇḍēya-Ṛishi) says that he has caused him (the addressee, *i.e.* Kraushṭuki-Ṛishi) to hear the *Dēvī-Māhātmya*. This internal evidence alone is sufficient to prove that the *Dēvī-Māhātmya* is not an interpolation but forms a part and parcel of the *Mārkaṇḍēya-Purāṇa*. Besides, if the *Dēvī-Māhātmya* were to be removed from it, the

[1] In the months of Chaitra and Āśvina falls the *Nava-rātra*, *i.e.* the first nine days of the bright half of the months when worship of the goddess is eloquently recommended in the *Dēvī-Māhātmya*. The Dāhimā-Mahāsabhā is contemplating to re-assume the management of the temple which was formerly in their own hands even when the Sēvagas were the worshippers. The annual meetings of the *sabhā* have been held in this temple for three consecutive days in every Chaitra-Navarātra, for the last four years, and the Mahāsabhā has recently started a school there.

[2] P. 15 of the Bibl. Ind. Edition, Calcutta, 1862.

[3] This statement has apparently been made on the authority of the Bengal manuscripts of the Purāṇa that were at Mr. Banerjea's disposal when editing the work, but the Maithila and other manuscripts of the same Purāṇa recount in the ordinary way the names of the eighteen Purāṇas and their author.

[4] *Vide* p. 1.

[5] सावर्णिकमिदं सम्यक् शौष्ट्रं मन्वन्तरं शृणु । तत्र देवीमाहात्म्यं महिषासुरसंयुतम् ॥१॥

total number of verses attributed to this Purāṇa in the commencement would fall short by the number contained in the *Māhātmya*.[1]

But to return to our inscription. It does not give the names of the clans wherewith the Dadhya-Brāhmaṇas were then known; and the two names *āvō* and *mahattara*, which may be presumed to be clan-names, are not identical with the modern ones. It is therefore evident that the present Khāmpas, such as Gōṭhēchā, etc., must have been introduced only after V. S. 665. There is one *gōtra* mentioned in the inscription, *viz.* **Vachchha** (Vatsa) which is even now found among the Dāhimā-Brāhmaṇas. Had their present clans been well known, they would certainly have been mentioned as the epithet "Miśra" has been in l. 4.

The record does not contain the name of the person who composed it, nor of the mason who engraved it.

[1] [The above should be compared with the able discussion of the age of the Mārkaṇḍēya by Mr. Pargiter, in the introduction to his translation in the Bibl. Ind., Calcutta, 1904, where he sums up his results on p. 22 as follows,—"The *Dēvīmāhātmya*, the latest part, was certainly complete in the 9th century and very probably in the 5th or 6th century A.D. The third and fifth parts, which constituted the original Purāṇa, were very probably in existence in the third century, and perhaps even earlier, and the first and second parts were composed between those two periods."—S. K.]

## No. 32.—SEVADI COPPER-PLATES OF THE CHAHAMANA RATNAPALA; VIKRAMA-SAMVAT 1176.

By Pandit Ram Karna, Jodhpur.

These copper-plates were found at Sēvādī, a village in Bālī district, Gōdwār province, Jōdhpur State. They were brought to light in a house in this village in consequence of a heavy downpour of rain. The news of the find reached the Police Sub-Inspector who forwarded the plates to the Māhkmā Khās, Rāj Mārwār. They were thence sent to the Historic department (Tawārikh Mēhkmā) of the State for being deciphered and for impressions being prepared therefrom. One set of impressions has been furnished to the Ajmer Museum at the request of the Curator.[19] The original plates are now in charge of the Superintendent of the Tawārikh Mēhkmā.

The plates are three in number, of which the first is inscribed on one side only. The second is written on both sides, and the third bears but three lines of writing on its inner side. The inscription is perhaps incomplete as shown by the isolated and unconnected letter *ka* at the end. The average breadth of the plates is 9″ while the average length is 11½″. The edges have been slightly raised into rims, and the plates are strung on two almost circular rings, the ends of which are open and bear no sign of any seal. The ends of the rings are so wide apart as to permit the plates passing out of them without any difficulty. Their diameter varies from 2″ to 2¼″, and their thickness is slightly over ⅛″.

The inscription consists of sixty lines of writing and is in an almost perfect state of preservation. The characters belong to the northern class of alphabets. Attention may be drawn to the somewhat rare forms of the letters *i* and *bh*, while the archaic formation of

SCALE 4

W. GRIGGS & SONS, LTD., PHOTO-LITH.

the labial *ph* is rather peculiar to this inscription. The language is **Sanskrit**; and the text is in prose with the exception of thirteen lines at the beginning and seventeen at the end containing 11 and 15 verses (numbered), respectively, although the numbers of the last two are omitted. In respect of orthography the following may be noted: (1) the sign for *v* is also used for *b*; (2) there is an indifference about the doubling of the consonants after *r*, *e.g.* *-karmāṇau* in l. 52; (3) rules of *parasavarṇa* have in some places been violated; (4) *ś* and *s* have been confounded, *e.g.* *-yasaskarāṇi* (l. 53), *-sahaśrāṇi* (l. 58).

The object of the inscription is to record a grant of a village named **Guṁdakūrchchā** (the modern Gūndoch as we shall see later on) to Brāhmaṇas residing in the same village, by a **Chāhamāna** king named **Ratnapāladēva**,— the son of **Pṛithvīpāla**, in V. S. 1176.

The inscription opens with obeisance to the god Brahman. The introductory verse extols the word *svasti*. A person came out of the eye of **Indra**, lord of the east, while looking; and from this person sprang the **Chāhamāna** dynasty (v. 2), which is extolled in the succeeding verse (v. 3). The next eight verses unfold the following Chāhamāna genealogy. There lived a king named **Lakshmaṇa**, whose son was **Śōbhita**, who is here called lord (*pati*) of **Dhārā**. His other name is Śōbhita.[1] From him sprang **Balirāja**, who was succeeded by his paternal uncle[1] **Vigrahapāla**. Vigrahapāla's son was **Mahēndra** whose other name is **Manindu** to whom the Rāshṭrakūṭa king Dhavala lent a helping hand against Muñjarāja.[2] Mahēndra's son was **Aṇahilladēva**, who was blessed with two sons named **Bālaprasāda** and **Jēsaladēva**, whose (latter's) other name is **Jēndrarāja**[1] or **Jindarāja**. Jēsala's son was **Pṛithvīpāla**. Then comes the prose portion of the inscription. Pṛithvīpāla's son was **Ratnapāladēva**, who is styled a *Mahārājādhirāja*. He issues the following order after having called together all his ministers, civil and military officers, the headmen as well as the leading persons among his subjects and all the resident Brāhmaṇas of the **Saptaśata**-*vishaya* (of 700 villages):—

"Be it known to you that, the seat of our Government being in **Naḍūla** (**Nāḍōl**) and the head-quarters of our armies in the village **Nahurā**, after having bathed and put on two cleaned clothes, setting aside such faults as vehement desire, hatred, jealousy, moral decline, and others of like nature; being in the state of absolute goodness; realising the instability of the world; holding *tila* (sesamum), unhusked grain (barley), *kuśa* (grass) and water in our right hand; having satisfied gods and *pitṛis* with water; remaining true to our duty; comprehending (the fact that) life is more unsteady than the drop of water on the petal of the day-lotus; having worshipped the consort of Pārvatī (*i.e.* the god Mahādēva), who is the ruler of both the moveable and the immoveable; having adored Vishṇu (*who is*) the greatest in the world and is skilful in destroying heaps of sins and is able to save from (the pains of) birth, old age and death; having restrained the totality of the senses for a moment; having realised (the fact that) wealth (would) collapse in a moment and such other inconstancies (of the world); having satisfied Brāhmaṇas and other venerable persons by gifts of gold, food, and clothes; favouring (*i.e.* following) the right path; recalling (mentally) the fear of the next world; accepting the fruit of (actions in both) this and the next world; having seen that the lettering of the charter formerly issued by the *Mahārāja* **Jindarāja** has disappeared, and (having) a mind to renew the same in its former state; for the increase of our religious merit and fame; and for our well-being in the next world; with a pure mind inspired by great devotion; our sins vanishing far (from us) and we being conscious of self (*i.e.* being in our right senses), we have, with libations of water, granted this charter according to the former state of things on **Thursday, the 8th of the dark half of the month of Jyēshṭha, when 1176 years, reckoned (in the**

[1] See above, Vol. IX, p. 83.

[2] Above, Vol. X, p. 68.

name of) **Vikramāditya** had elapsed, to all the resident Brāhmaṇas of the great Brāhmaṇa village named **Guṁdakūrchchā**, that has survived in all the four *yugas*, who delight in the six[1] acts of sacrificing, etc., prayer, study of the Vēdas, meditation and religious practices, who are well-versed in the sacred lore of *Itihāsas* (epic poems), *Purāṇas* (legends), *Rāmāyaṇa*, *Bhārata*, in words and sentences, and in (the *Smṛitis* of) Yājñavalkya, Kātyāyana, Bhṛigu, Aṅgiras, and **Mārkaṇḍa**; in the six *darśanas*[2] beginning with the *Bhaṭṭa-darśana* (Pūrvamīmāṁsā) and other sciences; who are performers of sacrificial rites prescribed in the *Yajur-vēda*, such as *Āvasathya* (sacred domestic fire), *Agnihōtra* (daily offering to fire), *Agnishṭōma* (liturgical rite in the Sōma sacrifice), *Sautrāmaṇi* (rite sacred to Sutrāman, *i.e.* Indra), *Paśubandha* (animal sacrifice lit. binding of victim to sacrificial post), *Chāturmāsya* (sacrifice to be offered every fourth month) and others; who are competent to break the hard knot of sins; who are well-versed in the Vēdas[3] and the Vēdāṅgas[4]; and whose fame is as brilliant, extensive and praiseworthy as that of the full moon. In the beginning of the Kali-age a pious *Mahārāja* (named) *śrī*-**Jājuka** who was ruling **Kanyakubja**, rode a mare, and the land that he could traverse in 4 *praharas* (or 12 hours), was granted by him, with the pouring out of water, for his welfare in the next world, to a Brāhmaṇa named **Gōvinda**, by a *śāsana*, the glorious **Guṁdakūrchchā**, a brush (*kūrcha*) for manifesting the picture of good conduct, circumscribed by the four boundaries, (ll. 16-36). From that time the name Guṁdakūrchchā (of the village so) named after the Brāhmaṇa Gōvinda became famous on (this) earth (l. 37). In the *Kṛita*-age it was known by the name of **Nishaḍhā**, in *Trētā* as **Triyaṁbakī**, in *Dvāpara* as **Khanitrī** and in *Kali* as **Guṁdakūrchchā** (l. 38). Its (four) boundaries (are described as follows) :—

> "To the east (lies) the way (leading) to the village (named) **Vērā** and passing by (the village) **Ghōḍiyā**, the reservoir (*raḍuha*), (locally called **Nāḍī**), (the village) **Tōusāla**, and the Śiva temple of the village **Ārāchandra**.
>
> To the south (are situated) the pond (named) **Rājjī** near the village of **Khavaḍa**, and the villages **Chāṁgauhā**, **Kṛikuḍapadra**, **Gugī** and the proximity of the *pratōlī* (main gate) of the village **Chadarapadra**.
>
> To the west (are to be found) the villages (named) **Mīlua**, **Ākandhāpadra** and **Goḍāiṇī**, and three reservoirs of water (*raḍuha-traya*).
>
> To the north (passes) the way which leads to **Lavaṇa-khēḍa**, going from the three reservoirs of water (*raḍuha-traya*) to (the village named) **Suṁnēvī**, thence going round the mountain named **Sēhatuṁga** and (finally) reaching the village **Vērā**" (ll. 39-43).

"These are the four boundaries marked out. Within these limits, future kings, whether of our own family or others, should not demand even a single flower from the *śrī-lōkas* (*i.e.* Brāhmaṇas) residing in **Guṁdakūrchchā** (*i.e.* should levy no tax, flower being mentioned as an insignificant article of no practical value) (l. 44)."

Then follow 15 imprecatory verses, after which there stand the first half of a verse and the letter *ka* which perhaps was the beginning of the second half left out for some reason unknown to us.

We thus see that the inscription refers itself to the **Chāhamāna** family of **Lakshmaṇa**, whose progenitor is, in this inscription, said to have been born out of the eye of the god Indra; while, in other inscriptions of the family it is recorded that, "when the solar and lunar races had come to an end, the holy **Vachchha** (*i.e.* Vatsa) brought about the creation of a new race

[1] The six acts prescribed for the Brāhmaṇas are sacrificing, conducting sacrifices, studying, teaching, giving and taking.

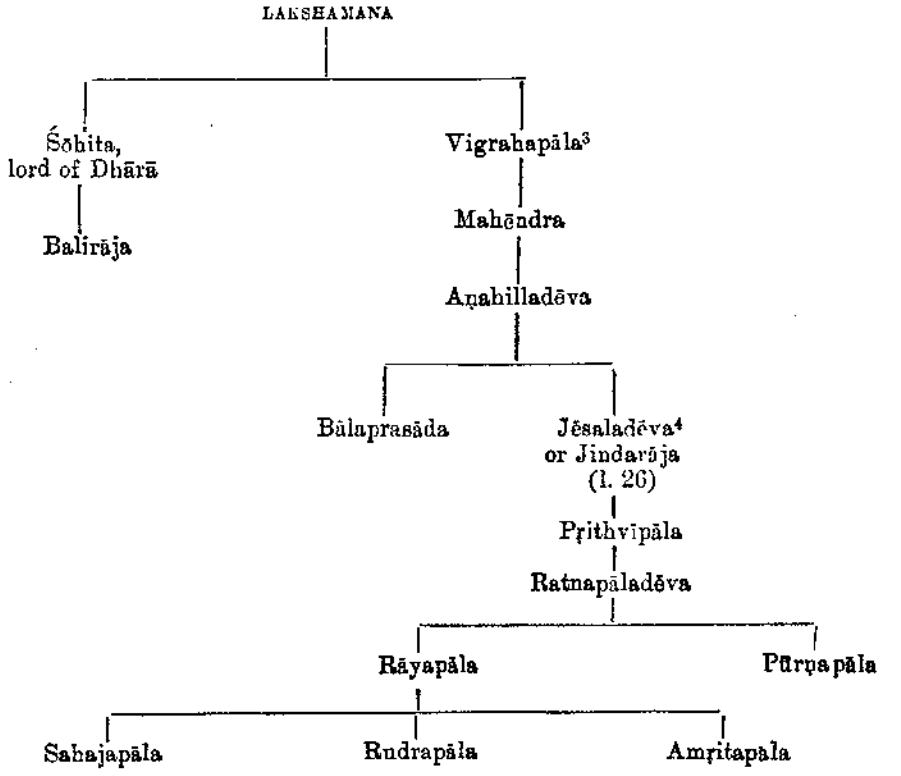

[2] The six *darśanas* are *Pūrva-mīmāṁsā* of Jaimini, *Uttara-mīmāṁsā* of Vyāsa, *Nyāya* of Gautama, *Vaiśēshika* of Kaṇāda, *Sāṁkhya* of Kapila and *Yōga* of Patañjali.

[3] The four Vēdas are, *Ṛik*, *Yajur*, *Sāma*, and *Atharvan*.

[4] The six *Vēdāṅgas* are, *Śikshā* (orthography or phonetics), *Kalpa* (rituals or liturgy), *Vyākaraṇa* (grammar), *Nirukta* (etymology and lexicography), *Chhandaḥ* (prosody), and *Jyōtisha* (astronomy).

of warriors, the Chāhumāna race."[1] This fact is further corroborated by an inscription where we read[2] that "there was the hero Chāhamāna, a source of joy to the great *Ṛishi* Vatsa.' Professor Kielhorn also points out[3] that "according to verse 12 of the Bijolī rock inscription of Sōmēśvara (No. 154 of his *Northern List*) Sāmanta, the first Chāhumāna chief, was born in the Vatsa-*gōtra* at Ahichchhatrapura." The current belief that the four races of **Paramāras, Chālukyas, Chāhamānas** and **Pratihāras** sprang from the *agni-kuṇḍa* receives no support from this inscription.

The genealogy unfolded by our inscription, is the same as that given by Prof. Kielhorn in his paper on the Chāhamānas of Naddūla, referred to above, as far as Pṛithvīpāla, and the name of **Ratnapāladēva**, the hero of our inscription, is an addition to it. But an inscription recently discovered at **Maṇḍōr**, when archæological excavations were being carried out under the supervision of Dr. Marshall, reveals the name of two further generations, *viz.*, **Rāyapāla**, son of Ratnapāla, and **Sahajapāla**, son of Rāyapāla. Before the discovery of the inscription at Maṇḍōr, it was not known whose son Rāyapāla was, though he was known to be a Chāhamāna from his eight inscriptions found in the Gōdwār District. From these latter we further learn that Rāyapāla had besides Sahajapāla two other sons, *viz.*, **Rudrapāla** and **Amṛitapāla**; while in another inscription of Ratnapāla (published in the *Bhāvanagar Prākṛit and Sanskṛit Inscriptions*), the name of Ratnapāla's son is given as **Pūnapāksha**, which I am inclined to read as Pūrṇapāla. So the dynastic list would now stand as follows :—

[1] *Ep. Ind.* Vol. IX, p. 79.

[2] *Ibid.*, p. 71.

[3] The present inscription does not give us the relation which Vigrahapāla bore to his predecessor Balirāja. It is taken from Kielhorn's Genealogical Table (above, Vol. IX, p. 83).

[4] Called Jēndrarāja (Jindurāja) in Prof. Kielhorn's Table.

In our inscription, Śōhita is styled lord of **Dhārā**. Śōhita's time is after V.S. 1039[1] when **Muñja** was ruling over Dhārā. It is possible that he defeated Muñja and became, for some time, lord of that city or country. This supposition is confirmed by the fact that Śōhita's son **Balirāja**, routed the army of Muñjarāja.[2] The *Mahārāja* **Jindarāja** mentioned in line 26 is the same as **Jēsaladēva** of verse 10 above. We may also note that the grant, the renewal of which is recorded in this inscription, is stated to have been originally made by *Mahārāja śrī*-**Jājuka** in the beginning of the Kali age.

Of the localities mentioned in our inscription, all of them except 5 have been identified :—

Gumdakūrchchā—is the modern **Gūndōch**, 5 *kōs* south of Pālī (called Mārwār-Pālī), the principal town of the district of the same name and a railway station on the Jōdhpur-Bikaner Railway. It is a *Jāgīr* village held by Ṭhākur Gōpāl Singh, son of Ranjit Singh, of the Ūdāvat clan of Rāthors.[3]

Vērā—**Bēḍ** (now desolate) 1 *kōs* east of Gūṇdōch.

Khavaḍa—**Khōḍ**, 4 *kōs* south of Gūndōch.

Gugī—**Gōgāvās** (now deserted).

Chadarapadra—**Chāñchōdī**, 7 *kōs* south.

Mīlua—**Mālōla** (now uninhabited), 1 *kōs* south.

Ākandhāpadra—**Kāndā**, 1 *kōs* west of Gūndōch.

Gōḍāiṇī—**Gurḍāi**, 3 *kos* west.

*raduha-traya*—are the 3 Nāḍīs (or reservoirs of water) called **Ḍūlī**, **Bhāṇḍlāī**, and **Ghāṇēvara**, 1 *kōs* (west).

Sēhatuṅga—Kāliyōṭūṁka and Baḍā Bhākara are the names of 2 small hills and a way leading to Bēḍ passes between the two.

Ghōḍiyā—**Bachūjī-rō-Gurhō**, 1 *kōs* east of Gūndōch.

*raduha*—is the Nāḍī called Sānvaliyō, 3 *kōs* east.

Ārāchandra—now desolate; but there is still a temple of Śiva in the desert, ¾ *kōs* south of Gūndōch.

Nahurā—now called **Bāmaṇān-rō-Nōrō**. It lies in the Jālōr District and is situated at a distance of 11 *kōs* to the west of Gūndōch.

## TEXT.[4]

---

[1] This is the latest date given for Lakshmaṇa by Mr. D. R. Bhandarkar; above, table opposite p. 78.

[2] *Ep. Ind.*, Vol. IX, p. 71.

[3] Besides Gūndōch proper, he holds the following villages as his *Jāgīr*—Kōnalā, Bachūjī-rō-Gurhō, two *dhāṇis* (hamlets) near Gūndōch, Pratāppurā and Gōpālgarh. The annual rental of all these villages is estimated at ₹7,000 per annum by the State for the purposes of levying State taxes, etc. The majority of the population consists of two different castes of Brāhmaṇas, *viz.* Gurjar-Gauḍas and Śaṅkhavālas. The former claim the village to have been granted to their ancestor named Gaṅgēya (a corruption of Gōvinda of our inscription). The *kūrcha* grass still grows here in abundance—a fact which leaves not even a shadow of doubt as to its being the same village.

No. 33.—THREE INSCRIPTIONS OF THE REDDIS OF KONDAVIDU.

By J. Ramayya, B.A., B.L.

A.

This inscription is engraved on three sides of a stone pillar planted in front of the temple of Virabhadra-svāmin in the village of Phirangipuram[23] in the Sattenapalli tāluka of the Guntur District. I first saw and copied it in April 1897. Subsequently, my friend Rao Sahib Krishna Sastri visited the place and took an estampage of the inscription, from which I edit it. The letters are cut deep and the inscription is in an excellent state of preservation.

The Telugu characters and orthography of this inscription are similar to those of the Tottarāmūḍi plates of Kāṭaya-Vēma.[25] In the present inscription, however, the aspirated forms of *b*, *ḍ* and *p* are distinguished from the unaspirated ones by a stroke resembling the Telugu figure 1 affixed at the right-hand corner of the bottom of the letter. This sign is not found in the case of *bha*, *bhā* and *bhu*, the first and last of which are, however, distinguished from the corresponding unaspirated letters by the presence of the *tulakaṭṭu* or top-stroke. Sometimes a consonant is unnecessarily doubled after an *anusvāra* as in *vinōdumṁḍḍu*-(l. 103).

A remarkable feature in the orthography of the Telugu portion of the inscription is the use of the sign of the *pūrṇānusvāra* for denoting *ardhānusvāra* as in *-okkaṁḍu-* (l. 97 f.), *-pati-*

---

[1] Read °दत्ता. [2] Read शतक्रतौ. [3] Read महीं महीभृता.
[4] Read श्रेष्ठ. The syllable ष्ठा is written below the line.
[5] Read दानाच्छ्रेयोनु°. [6] Omit the first वी.
[7] Read हि. [8] Read ब्रह्म°. [9] Read °हारकाः.
[10] Read °त्याहुर्ब्रह्म°. [11] Read विषमुच्यते. [12] Read ब्रह्म°.
[13] Read षष्टिं वर्षसहस्राणि. [14] Read हर्ता चैवानुमन्ता च. [15] Read तान्येव नरके.
[16] Read ऋणहर्ता. [17] Read तथा हारयिता. [18] Read त्रयः.
[19] Read °दिन्द्राय°. [20] Read ऋण°. [21] The inscription abruptly stops here.
[22] A station on the Bezwada-Guntakal branch of the Madras and Southern Mahratta Railway.
[23] Above, Vol. IV, pp. 318 ff.

*yuṁ Gṛishṇa-* (102 f.), *=anuṁguṁ-butri* (104 f.), *-nārāyaṇuṁḍu-*(105 f.), *-puṭaṁbulaṁ bari-* (123), and *vēṁḍiṁ jēva* (125 f.). In all these places, metre requires the *ardhānusvāra* only; and this was, no doubt, what was intended to be read. The use of the complete circle which is the sign of the full *anusvāra* to denote the half-*anusvāra*, is common in inscriptions and in old manuscripts and shows that the modern sign of the *ardhānusvāra*— *i.e.* the left half of a circle,— had not yet come into vogue at the beginning of the 15th century A.D. It shows also that '*ardhānusvāra* was *pūrṇānusvāra* incompletely pronounced,' as the author of the *Āndhrabhāshāthūshaṇam* puts it, and disproves the view of some of the later grammarians who seem to think that *ardhānusvāra* was the earlier and *pūrṇānusvāra* the later form of the sound. It also falsifies the much bolder theory of the late Prof. M. Seshagiri Sastri who held that *ardhānusvāra* simply denotes the elision of a consonant.[1] In modern Telugu the words *pūchi*, *ḍichi*, and *nūchi* are pronounced only with an *ardhānusvāra* after the first vowel, but Nannichōḍa, in his *Kumārasambhavam*, used these words as *pūñchi*, *ḍāñchi* and *nōñchi* and made them rhyme with *eñchi*, and even now we hear, in the Guntur, Nellore, and the Ceded Districts, *vāṇḍu* for *vāḍu* (he), *tūñchu* for *tūchu* (weigh), *mīnḍa* for *mīḍa* (above), *pēṇṭa* for *pēṭa* (market town) and *pēṇḍa* for *pēḍa* (dung). In the Roman text of the Telugu portion of the inscriptions, the *anusvāra* to be elided is printed in italics.

The language of the inscription is partly **Sanskrit** and partly **Telugu** and it is throughout in verse. The sixth and seventh verses are also found in the *Śṛiṅgāradīpikā*, a commentary on the *Amaruśataka* by Kōmaṭi-Vēma[2], and the thirteenth verse is taken, with a slight modification, from the Madras Museum plates of Vēma.[3] The first verse is devoted to the praise of the boar-incarnation of Vishṇu and the second and third to the praise of the Sun and Moon, and Vināyaka. In the next verse, the poet appropriately eulogizes the feet of Vishṇu which gave birth to the (Śūdra) caste, which is a veritable ocean of good qualities. In that caste was born king **Vēma** who was 'a seventh emperor,[4] as it were, and an eleventh incarnation of Vishṇu' (v. 5). Vēma ruled for a long time, enjoying what was left of the kingdom after enjoyment by Brāhmaṇs, and constructed the flight of steps from *Pātālagāṅgā* to the summit of the Śrīśaila as if to climb up to the abode of Śiva (v. 6). He had an elder brother named **Mācha**, who had three sons, *viz.*, king **Reḍḍivōta**, śrī-**Kōmaṭīndra**, and king **Nāga**, who were like *dharma*, *artha*, and *kāma* personified (v. 7). **Ped[d*]a-Kōmaṭi** begot a son named **Vēma**— as great as Karṇa in charities— even as the ocean begot the moon (v. 8). Verses 9 and 11 describe the military greatness of Vēma, while vv. 10, 12 and 13 praise his charities which extended from Śrīśaila to Kāśī (Benares), touching on the way **Kumārāchala, Pañchārāma, Siṁhāchala, Śrīkūrma** and **Purushōttama**. The queen of this king was **Sūramāmbikā**, who, on the second day of the dark fortnight of the month of **Phālguna** in the year **Virōdhi** corresponding to the Śaka year counted by the moon, **Rāmas, Rāmas and the earth** (1331), performed the ceremony of *pratishṭhā* (completion and dedication to public use) of the tank called **Santānapayōnidhi** (vv. 14 and 15). The next three verses contain a hyperbolical description of the tank, and then follow three verses from the *Mahābhārata* on the merit of digging tanks. The last Sanskrit verse tells us that this pure *dharmaśāsana* was composed by **Śrīnātha** who was the *Vidyādhikārin* of Vēma and a storehouse of learning.

The three Telugu verses that are engraved on the east face of the pillar, are in the Sīsa metre, each verse consisting of four long lines in the proper Sīsa metre followed by four

[1] See his *Theory of Ardhānusvāra*, Edition of 1892.

[2] See the late Rai Bahadur Venkayya's remarks on the Phirangipuram inscription, in his Report on Epigraphy for 1900, p. 21, paragraph 55.

[3] Above, Vol. VIII, pp. 9 ff.

[4] That is, as great as any of the six emperors (*ṣaṭchakravartin*) spoken of in the Purāṇas.

short lines in the Tēṭa-gīta metre. The first verse announces the fact of the completion of the tank and gives us the additional information that the day of the ceremony of *pratiṣṭhā* was a Friday and that Sūramāmbā was the daughter of king **Ganna** of **Dhānyavāṭī** (Dharaṇikōṭa). The next two verses contain a hyperbolical description of the tank of which it is stated that its waters were as purifying as those of Gaṅgā, Yamunā, and all other sacred rivers, that it was full of water-lilies which blossomed at the touch of the rays of the moon which was the crest of (the idol of) Śiva established on its bank, that the deafening roar of its waters filled all space, that it was the sporting ground for fish, crabs, and other water animals, and that its waves kissed the sky (v. 24). "How, to such a tank as this, can be likened the ocean which was trodden to dust by the hoofs of the false Boar that was Vishṇu, which became dry by the touch of the fire of the arrows of Rāma, that was drunk up by sage Agastya, and that was dammed with stones by hosts of monkeys and bears?" (v. 25).

In regard to the date of the inscription, the Honourable Dewan Bahadur L. D. Swamikannu Pillai, the learned author of the "Indian Chronology," kindly informs me that "the *tithi* ended at $23\frac{1}{2}$ *ghaṭikās* after mean sunrise on **Friday, 21st February, A. D. 1410**".

The inscription confirms, but adds little to, what we know already of the history of the **Reḍḍis of Koṇḍavīḍu**, which I discussed at length in my paper on the Madras Museum plates of Vēma.[1]

Special interest attaches to this inscription as well as to the two following ones from the fact that they were composed by the great Telugu poet **Śrīnātha**.

Vēma, son of Pedda-Kōmaṭi, bore the titles *Saṁgrāma-Dhanaṁjaya* (vv. 9 and 11) and *Vīranārāyaṇa* (v. 23). He seems to have been both a scholar and a patron of scholars. The *Śṛiṅgāradīpikā*, of which he is the reputed author, says that he was well versed in all the branches of knowledge and that his court was the resort of poets among whom was the great Sanskrit poet Vāmanabhaṭṭa Bāṇa, the author of the drama *Pārvatīpariṇaya* and of the poem *Vēmabhūpālīyam* of which Vēma was himself the hero. Śrīnātha held the position of *Vidyādhikārin* (Poet Laureate[2]) under Pedda-Kōmaṭi-Vēma and he seems to have held the same position under his son **Rācha-Vēma**, as will appear from the next inscription.[3] After the death of Rācha-Vēma he seems to have gone to Rajahmundry where he was patronised by **Vēma-Reḍḍi** and **Vīrabhadra-Reḍḍi**. He was a prolific writer and his poetry is characterised by originality and vigour of expression. He is the author of the following works:—

1. Marudrāṭcharitramu.
2. Śālivāhana-Saptaśati.
3. Śṛingāranaishadhamu.
4. Bhīmakhaṇḍamu.
5. Kāśikhaṇḍamu.
6. Haravilāsamu.
7. Paṇḍitārādhyacharitramu.
8. Vīthi-Nāṭakamu.

Nos. 3 to 6 have been published. A *Vīthi-Nāṭakamu* purporting to be the work of one Vinukoṇḍa Vallabhāmātya has been recently edited by Mr. Mānavalli Rāmakrishṇa Kavi, M.A.,

[1] Above, Vol. VIII, pp. 9 ff.

[2] [*Vidyādhikārin* appears to have been a responsible high place somewhat similar to the 'President, Board of Examiners' of the present day. That Śrīnātha did occupy such a place is evident from what is said of him in the introduction to the *Bhīmakhaṇḍamu*, in the Sīsa-foot *bhāshiṁchināḍavu bahudēśa-budhalatō vidyāparīkshaṇa-vēḷalandu*.—H. K. S.]

[3] Śrīnātha's connection with the Reḍḍis probably began in the reign of Ana-Vēma to whose minister he dedicated his *Śṛiṅgāranaishadhamu*.

and I agree with the editor in considering that Śrīnātha, who was Vallabha's contemporary, was the real author of this little poem. The poetry is certainly that of Śrīnātha.[1]

In the introduction to his *Bhīmakhaṇḍamu*, the poet tells us that he was a Brāhmaṇa of the Pākanāṭi sect. The Pākanāṭis are found mostly in the Nellore District and there is a family of them at Sūlūrupēṭa, whose housename is Śrīnāṭham (Śrīnāthuni). These Brāhmaṇs usually call their sect Prāṇnāṭi to distinguish it from that of Pākanāṭi Kāpus or Reḍḍis and interpret that term as meaning the "Eastern Country." This etymology is obviously incorrect.[2] The Telugu term Pākanāḍu is evidently derived from Tamil Pākkaināḍu, which is found in several Tamil inscriptions in the Nellore District[3] and the word *pākkai* is the Tamil rendering of the Sanskrit *pūga*, meaning areca-nut. Pūṅgi, a variation of Pūgi, appears in inscriptions as the name of the country "which extended from the eastern slopes of Srīgiri to the eastern sea on both sides of the river Kuṇḍi."[4] In my paper on the Madras Museum plates of Vēma, I was unable to explain the signification of this term, but there is no doubt about it now. The Telugu form of *pūgi* is *pōka*— *ō* being nasal— and a sect of the Reḍḍis of the Cudappah District call themselves Pōkanāṭi and not Pākanāṭi Reḍḍis.

Śrīnātha was a much travelled man for his times. He tells us, in a stray verse attributed to him, that he visited the courts of the Vijayanagara king Harihara II. and Rāvu Sarvajña-Siṅgamanāyuḍu of the Veluguṭi family, and that he was patronised by Sāḷuva Teluṅgu Rāya. He spent, however, the best part of his life at the courts of the Reḍḍi chiefs of Koṇḍavīḍu and Rajahmundry and dedicated most of his works either to those chiefs or to their officers. The traditional history of the Veluguṭi family tells us that Liṅgamanāyuḍu of that family having killed Vēma-Reḍḍi of Rajahmundry in battle and taken his sword called the *Nandikantapōtarāju*,[5] Śrīnātha was deputed by Vēma's brother Vīrabhadra to get back the sword and that the poet succeeded in doing so by eulogizing Liṅgamanāyuḍu in three verses.[6]

B.

This inscription also belongs to the time of Pedda-Kōmaṭi-Vēma and is engraved on both sides of five copper plates. About ten years ago, the plates were sent by the Tahsildar of Guṇṭūr to the Collector of the Kistna District in which Guṇṭūr was then included, and I edit the inscription from impressions taken by me at that time. The inscription consists of two

[1] Śrīnātha is also the reputed author of the ballad *Palnāṭivīracharitramu*; but some dispute his authorship and the point requires investigation.

[2] [The Bitragunta plates of Saṅgama II (above, Vol. III, p. 27, verse 19) describe Pāka-vishaya or Pāka-nāḍu as a district situated 'on the shore of the Eastern Ocean (*i.e.* the Bay of Bengal),' including within it the town Vikramasiṁhapura, *i.e.* the modern Nellore. Pūgi or Pūṅgi-vishaya, on the other hand, was a part of Pāka, confined in extent to either bank of the river Kuṇḍi or Guṇḍlakamma and extending from Śrīśaila to the Bay of Bengal. Prāṇnāḍu 'Eastern Country' as applied to themselves, by the Pākanāṭi Brāhmaṇas of the Nellore district appears, therefore, to have been the correct etymological interpretation of the term Pāka-nāḍu, though the form Pākkai-nāḍu of Tamil inscriptions was undoubtedly derived from *pūgi*, *pūgi* or *pōka*, which formed a part of the name of the northern sub-division of Pāka-nāḍu and meant an areca-nut. Consequently it looks as if the larger territorial division Pāka-nāḍu or Pākkai-nāḍu derived its name from the smaller Pūṅgi-vishaya, which was perhaps the earlier and the more ancient.—H. K. S.]

[3] *Nellore Inscriptions* by Messrs. Butterworth and Venu Gopaul Chetty, Vol. II, p. 873, and Vol. III, pp. 1397 and 1401.

[4] Above, Vol. VIII, p. 10.

[5] In another place it is called *Sandikantapōtarāju*.

[6] The *Velugōṭivāri-vaṁśacharitramu* by Vellāla Sadāśiva Śāstrulu and Avadhānamu Śēsha Śāstrulu, Madras edition of 1910, pp. 59 and 60. In this book the Reḍḍi king who was killed, is called Anavēma-Reḍḍi. But this is clearly a mistake for Allaya-Vēma-Reḍḍi.

parts; the first part records the grant by Pedda-Kōmaṭi-Vēma of the village of **Ālapāḍu** to a Brāhman named **Viśvēśvarabhaṭṭa**, and the second part records the distribution of the village by the donee, among a number of other Brāhmans. The first part consists of twenty **Sanskrit** verses intercepted, after verse 18, by a long **Telugu** prose passage which describes the boundaries of the village. The first, fourth, fifth and eighth verses are found also in inscription A. We learn from this part of the record that Pedda-Kōmaṭi-Vēma had a younger brother named **Mācha** who is known to have been killed in battle by **Kumāra-Vēdagiri-Nāyuḍu** of the **Velugōṭi** family.

The object of the inscription is to record the fact that on the **Śivarātri day in the month of Māgha** in the year **Nanda** corresponding to the **Śaka year counted by the oceans, Rāmas, and the moon** (1334), Pedda-Kōmaṭi-Vēma granted the village of Ālapāḍu, situated on the eastern bank of the river **Tuṅgabhadrā**, in the beautiful **Velanāṇḍu** district of the **Triliṅga-*vishaya*** to Viśvēśvara-bhaṭṭa who was the great-grandson of Mādhava, grandson of Guṇḍaya and son of the great poet **Mādhava-bhaṭṭa** of the Yajuḥ-*śākhā* and the Bhāradvāja-*gōtra*. The enclosing boundary line of the village is specified in great detail in Telugu prose[1] after which comes the usual imprecatory verse *sva-dattā[d*]=dviguṇam puṇyaṁ*, etc. The last verse tells us that the inscription was composed by **Śrīnātha**. The signature at the end consists of the phrase *śrī-Vīranārāyaṇasya*, *i.e.* of the glorious **Vīranārāyaṇa**.

The second part of the inscription, which is engraved on both sides of the fourth and fifth plates, states that Viśvēśvara-bhaṭṭa, here stated to be a student of the Yajuḥ-*śākhā*, of (the three *pravaras*) Āṅgirasa, Bārhaspatya and Bhāradvāja, to have been the son of Mādhavāchārya, 'who was capable (equally) of cursing or conferring boons,'[2] and to have been born as a gift of the glorious (God) Nṛisiṁha, divided the village **Ālapāṭi-Vēmavara** (*i.e.* Ālapāḍu renamed Vēmavara after the donor) given to him by king Pedda-Kōmaṭi-Vēma, into 60 shares out of which he reserved apparently 15 shares for himself and distributed the remaining 45 shares as shown in the list appended at the end of this article.

**Ālapāḍu** is identical with the village of that name in the Tenāli tāluka of the Guntur District. **Tuṅgabhadrā** was a branch of the Kṛishṇā river and branched off from the main river near Bezwada. It has ceased to exist as a river after the construction of the Kṛishṇā anicut and its course is marked by the main and the Kommamūr canals of the Guntur tāluka and the drain which is in continuation of the latter.

The Honourable Swamikannu Pillai has kindly furnished the following note about the date of the inscription:—"Śaka 1334, Nandana, Śivarātri, *i.e.* Māgha *bahula* 13 or 14. I understand that Śivarātri is celebrated at midnight when the *nakshatra* Śravaṇa is current, whether the *tithi* be the 13th or the 14th. Now the *nakshatra* Śravaṇa was current at midnight between **Monday, 30th, and Tuesday, 31st January, 1413 A.D.** which was Nandana, Śaka 1334. The 14th *tithi* ended at 15½ *ghaṭikās* on Tuesday, 31st January 1413. The *nakshatra* Śravaṇa ended at 12½ *ghaṭikās* on Tuesday, 31st January 1413".[3]

---

[1] The description as usual includes the mention of a number of anthills distinguished by different trees that grow over or near them and of the villages, Pedapūṇḍi-Maṇḍūru (north-east), Tāṇḍiparati (south-west), Jaṭalammapāḍu and Chunḍūru.

[2] The same is stated of Mādhavabhaṭṭa in the first part of the inscription (v. 15). It is also recorded here that Mādhavabhaṭṭa had thoroughly accomplished (the repetition of) the *mantra* (invoking the blessings) of **Lakshmi-Nṛisiṁha**.

[3] [It will be seen from l. 29 that there was an eclipse of the sun in connexion with the *Śivarātri*. Mr. Sewell has kindly informed me that the Śivarātri ended at mean sunrise on Wednesday, February 1st. There was an important eclipse of the sun on that morning (Wednesday), conjunction taking place at 3 h. 58 m. after mean sunrise.—S. K.]

C.

This inscription consists of a Telugu verse in the Sīsa metre followed by another in the Tēṭa-gīta metre and is engraved on the western side of a hillock called *pullaribōḍu* north-east of Amīnābād near Phiraṅgipuram. Like the last two inscriptions, this was also composed by the poet Śrīnātha. It records that, on the full moon day of the month of Māgha in the year Manmatha corresponding to the Śaka year 1337 (expressed in words), king Vēmaya-Rāchavēmana[3] (*i.e.* Rāchavēmana, son of Vēmaya, *i.e.* Pedda-Kōmaṭi-Vēma) had a channel called Jaganobbagaṇḍa-kāluva[4] dug as a feeder to the tank Santāna-vārdhi which his mother Sūrāmbā had excavated. This tank is, no doubt, the same as that referred to in the Phiraṅgipuram inscription A. As pointed out in my paper on the Madras Museum plates of Vēma,[5] this inscription shows that Rāchavēmana was Pedda-Kōmaṭi-Vēma's son and *not* his brother.

The Honourable Swamikannu Pillai informs me that the *pūrṇimā-tithi* referred to in the inscription ended at 43 *ghaṭikās* after sunrise on Tuesday, 14th January, A.D. 1416.

## Inscription A.

### TEXT.[6]

*West Face.*

1 कल्याणं जगतां तनोतु

2 स विभुः कादंबिनीमेचकः क्रीडा-

3 [क्री]डतनुः पयोधिपयसो विश्वं-[7]

[1] It is stated that the share is given to provide Akkamāmbikā with *haridrā* (*i.e.* turmeric powder used as a toilet only by women with living husbands).

[2] The list of donees ends with the signature (*vrālu*) of the donor Viśvēśvarabhaṭṭa.

[3] The inscription gives him the following attributes:—"the gem of plenty (*chintāmaṇi*) in (bestowing) gifts (mentioned by) Hēmādri, (the very god) Śaṁkara (Śiva) (riding) on the bulls (*basuva*), *viz.*, the enemy kings, Phalguna (Arjuna) on the battle-field and the paramour of prostitutes, *i.e.* the proud hostile chiefs." The third attribute was a surname of his father Pedda-Kōmaṭi-Vēma.

[4] The channel was evidently so named after Jaganobbagaṇḍa, a title of frequent occurrence among the Reḍḍi kings.

[5] Above, Vol. III, p. 12 f.

[6] From ink-impressions supplied by Mr. Krishna Sastri.

[7] The *anusvāra* stands at the beginning of the next line.

## No. 34.—MAREDAPALLI GRANT OF SRI-RANGARAYA II; SAKA 1497.

By V. Natesa Aiyar, B.A.

The subjoined grant is published from two sets of Sir Walter Elliot's ink-impressions which the late Government Epigraphist for India was kind enough to place at my disposal. It is dated in **Śaka-Saṁvat 1497**, the cyclic year probably being **Yuva**, and belongs to the reign of **Śrī-Raṅgarāya II**, of the third Vijayanagara dynasty. Mr. Sewell is of opinion that this date[4] marks the commencement of Śrī-Raṅgarāya's rule.

Although a number of inscriptions belonging to this dynasty has already appeared in the pages of the *Indian Antiquary* and the *Epigraphia Indica*, yet not a single Sanskrit inscription of this particular king has been published *in extenso*.[5] And what is more, even the chroniclers of these times do not seem to have thought it either necessary or proper to make more than a passing mention of the successors of the renowned Rāmarāya on the Vijayanagar throne. This, perhaps, is partly accounted for by the fact that the battle of Tāḷikōṭa of A.D. 1565, in which king Rāmarāya fell, sounded, as it were, the death-knell of the dynasty and crippled its power and resources once and for ever. Nevertheless, it can hardly be doubted that such information as can be gleaned from the grants and other documents of the rulers of this

---

[1] Read *-ēḍunun=oppu*.
[2] Read *Magha-*.
[3] Read *basava-*.
[4] Sewell's *Forgotten Empire*, p. 218.
[5] A fragmentary translation of an inscription of this king from Dēvanahaḷḷi in Mysore is published in Mr. Rice's *Mysore Inscriptions*. See No. 140, p. 252 ff.

dynasty who lived during the days of its decline, will be useful in so far at least as they will enable us to determine with tolerable certainty the extent of their dominions and the seats of their government, if not also their relations with their quondam viceroys in distant provinces.

Turning to the grant itself, it may be observed that the tops of the first, second, fourth, and sixth pages of the impressions are marked by the Telugu numerals 1, 2, 3 and 4. There also appear faint traces of the numeral 5 at the top of the eighth page. This seems to indicate that the grant was originally incised on five plates of which the first and the last were engraved only on the inner, and the intervening three on both sides. Judging from the impressions, the plates can be said to have been in good preservation. They measure $9\frac{3}{8}'' \times 7\frac{1}{4}''$ and seem to have had raised rims and a ring passing through the centre of their top.

The alphabet is **Nandināgarī**. The following are some of the orthographical peculiarities and errors :—

(1) the doubling of *y*, *t*, and *d* after *r* in *-turyyō* (ll. 9 and 13) ; *-śauryyēṇa* (l. 25) ; *-mūrttiḥ* (l. 46) ; *-kīrtti-* (l. 61) ; *bharttuṁ* (l. 87) ; and *-śārddūlamarddanaḥ* (l. 117) ;

(2) the doubling of *n* when followed by *r* in *nivasannrājati* (l. 81) ;

(3) the dropping of the *visarga* before sibilants in *-saptamaśrīpati-* (l. 11) and *svaḥkāminī-svatanu-* (l. 18) ;

(4) the use of the *anusvāra* instead of class nasals in *narēṁdraḥ* (l. 11) ; *Tātapiṁnama-* (l. 13) ; *haraṁ* (l. 14) ; *niraṁjanāni* (l. 34) ; *-bhāvāṁchitaḥ* (l. 65) ; and *-maṁḍalīka-* (ll. 102 and 105) ;

(5) the use of *n* instead of *ṅ* in *dinnāgān* (l. 58) ;

(6) the use of *ḷ* instead of *l* due, perhaps, to vernacular influence in *lāḷitaṁ* (l. 5) ; *-chaḷikshmā-* (l. 10) ; *surabhiḷāśugaṁ* (l. 21) and *-mē(ma)rāḷa-* (l. 55) ; and lastly,

(7) the use of the symbol for *ḍh* to denote *ṭh* (ll. 57 and 58). The words *chaurāśi* (l. 90), *sāmula* (l. 94), *dhaṭṭa* (l. 107) and *diśāpaṭṭa*, which occur in the Viḷāpāka grant[1], are also found here.

The inscription opens with obeisance to the god Gaṇādhipati and consists of eighty-three Sanskrit verses. It closes with the word *Śrī-Virūpāksha* in old Kanarese characters. The first three verses invoke respectively the gods Śiva, Vishṇu and Gaṇēśa in the manner of the British Museum Plates of Sadāśivarāya.[2] The following eighteen verses carry the genealogy of the dynasty, partly mythical and partly historical, down to Tirumalarāya's reign and have their exact parallel in verses 3-20 of the Koṇḍyāta grant of Veṅkaṭa II.[3] Verses 22-29 describe king **Tirumalarāya** but record no historical facts.[4] With verse 30 begins the description of the donor **Śrī-Raṅgarāya II**, son of king Tirumala and **Veṅgaḷāmbā**. In verse 42 he is said to have belonged to the Ātrēya-*gōtra*.

[1] *Ep. Ind.*, Vol. IV, p. 270.

[2] *Ibid.* p. 12.

[3] *Ind. Ant.*, Vol. XIII, p. 129.

[4] Identical with these are the verses 24-27, 29, 30 and 32 of the Tumkur Plates of Tirumalarāya ( see *Ep. Carn.*, Vol. XII, pp. 2-3).

His ancestry is given as follows :—

Tātapinnama of the lunar race of kings (l. 13)
|
Sōmidēva (l. 15)
|
Rāghavadēvarāṭ (l. 16)
|
Śrī-Pinnama, the lord of the town of Āraviḍu (l. 16)
|
Bukka (m. Ballāmbikā) } who placed on a firm footing the kingdom of Sāḷuva-Nṛisiṁha (ll. 17-18).
|
Rāmarāja I (m. Lakkāmbikā) } who captured the forts of Avanigiri and Kandanavōlu (Kurnool) and put to flight Kāsappuḍaya (ll. 26-27).
|
Śrī-Raṅgarāya (I) (v. 15) (m. Tirumalāmbikā)
|
Rāmarāja II. (vv. 17-18) Tirumalarāya (m. Veṅgaḷāmbā) (vv. 20-29) Veṅkaṭādri (v. 19)
|
Śrī-Raṅgarāya II, the donor (v. 30 ff.)

Most of these details are found in the Kūniyūr plates of Veṅkaṭa II.[1] Śrī-Raṅgarāya II is reported to have captured several fortresses including the inaccessible Koṇḍavīḍu and Vinikoṇḍapura from his camp at Uddagiri (Udayagiri in Nellore) and to have been residing at Penukoṇḍa (v. 31).[2] He married two wives, *viz.*, Tirumaladēvī and Kṛishṇāmbā (v. 32). He reduced the Chaurāśidurga (*i.e.* eighty-four hill forts, perhaps, in Mahārāshṭra). He bore in his heart Śārṅgadhara (*i.e.*, the god Vishṇu) (v. 35). Some of his *birudas* were *Manniyān Sāmula* (v. 36), *Gaṇḍaragūḷi* and *Manyapuli* (v. 38). He was highly extolled as the vanquisher of Avahaḷurāya and the king of Utkala (vv. 37-8). He was the lord of Āraviḍu and adopted the surnames *Vēṅgyatribhuvanīmalla* (l. 102), *Urigōlasuratrāṇa* (*i.e.* Sulṭān of Oraṅgal) (l. 103), *Raṇamukharāmabhadra* (l. 104), *Kalyāṇapurādhipa* and *Chāḷukkachakravartin* (ll. 108-9). As suggested by Dr. Hultzsch the first and the fourth of these *birudas* were perhaps reminiscences of the Western and Eastern Chalukyas.[3] He calls himself the suzerain of the Raṭṭas and Magadhas (l. 107) *Konarāṇi-kōṭala-koṅga*, and Oḍḍiyarāya-diśāpaṭṭa (v. 45). With verse 53 commences the grant proper.

The date is expressed as the twelfth tithi (*prathamadvādaśītithau*) of the bright fortnight of the month of Āshāḍha in the Śaka year reckoned by the horses (7), the treasures (9), the Vēdas (4),and the moon (1) (*i.e.* 1497), the cyclic year being Yuva. This date falls in A.D. 1574 expired.[4]

The grant was made before the god Rāmachandra.[5] The donee was Aubhaḷabhaṭṭa who belonged to the Kāśyapa-*gōtra* and was a follower of the Kātyāyana-*sūtra* and the

[1] *Ind. Ant.*, Vol. III, pp. 238-9.

[2] This is already known to us from two inscriptions published by Mr. Rice (*Ep. Carn.* Vol. VII, Sh. 83, and Vol. XII, Ck. 39); see *Ind. Ant.*, Vol. XXXVIII, p. 94.

[3] *Ep. Ind.*, Vol. IV, p. 270.

[4] Sewell's *Indian Calendar*, p. LXXX.

[5] Perhaps, the Rāmasvāmin temple at Penugoṇḍa is referred to here. It may be noted in this connection that although the capital of this dynasty had been removed to Penugoṇḍa by king Tirumala, the father of the present donor, the name of the guardian deity occurring at the end of the grant is given as Śrī-Virūpākṣha.

Śuklayajuḥ-*śākhā*. He was the son of **Varadabhaṭṭa** and grandson of **Bālēndubhaṭṭa** (vv. 55-7).

The village granted was **Mārēḍapalli** *alias* **Kṛishṇāpuram** belonging to the **Rāyadurga-rājya** girt round by **Hastināvati** (*i.e.* the modern Hampi in the Bellary District), to the **Pennavēṇṭha** (?-*nāḍu*) and to the **Bhūdigumma-sīma**[1] (vv. 58-9). It was to the east of the river **Penna** (? Northern Pennār) and south of the hill bounding the village of **Chōḷasamudra** and near the *chemaḍa*-bush lying east of **Nīlādri** (*lit.* blue hill) situated on the outskirts of the village of **Korakodru** and close to the river Penna. It was to the west of the blue elevated ground bordering on the *Giḍḍamāḷigāni-kshētra* and lying to the west of **Kummarllapalli**, which again was the western boundary of the village of **Palukūr**, west of the tamarind tree adjoining the sandy tract bounding the village of **Vēlēṭi**. It was to the north of the stone pillar set up near the *śamī* tree growing on the outskirts of **Timmāpura**. Of these places, Kṛishṇāpuram may have taken its name from **Vīrakṛishṇama** of the Kāśyapa-*gōtra*, at whose instance the grant was made. He was the son of **Varabayyappa** and lord of **Maṇināgapura** and is said to have borne the biruda *Sitakaraganḍānka* (vv. 70-3) and to have been the terror of Dhavaḷāṅka(na).[2]

The titles *Sindhu-Gōvinda*, *Sitakaraganḍa*, *Davaḷanku-Bhīma* and *Maṇināgapuravarādhīśvara* are applied to Tirumalarāja of Udayagiri in an inscription of Śaka-Saṁvat 1457, the cyclic year Manmatha, corresponding to A.D. 1535-36.[3] In a copper-plate record of Śaka-Saṁvat 1484, the cyclic year Rudhirōdgārin, corresponding to A.D. 1563-64[4] the same epithets are given to Kṛishṇapa-Nāyaka, son of Baiyappa-Nāyaka, of Balam (Bēlūr). Of Kṛishṇapa-Nāyaka (also called Eṛa-Kṛishṇapa-Nāyaka) Mr. Rice remarks, that he "is represented in most of the inscriptions as the head of the family, who was enfeoffed by Kṛishṇarāya of Vijayanagara. He was the *haḍapada*, or bearer of the king's betel-bag".[5] According to Mr. Rice, Veṅkaṭādri-Nāyaka, son of Kṛishṇapa-Nāyaka, was the head of the Balam family in Śaka-Saṁvat 1498, the cyclic year Dhātṛi, corresponding to A.D. 1576-77[6]. About Maṇināgapura Mr. Rice adds, "I have been unable to identify Maṇināgapura. It appears to be a place in the Central Provinces."

The composer of the inscription was the son of **Sabhāpati** and the engraver **Gaṇapayāchārya**, the son of Vīraṇa. These two persons also figure in the same capacities in the Tumkūr Plates of Tirumalarāya.[7]

The grant concludes with the usual imprecatory verses and *Śrī-Virūpāksha* in old Kanarese characters at the end.

# No. 35—MALEPADU PLATES OF PUNYAKUMARA; THE FIFTH YEAR OF HIS REIGN.

By H. Krishna Sastri, B.A.

Mr. J. Ramayya Pantulu, B.A., B.L., while he was Deputy Collector in charge of the Jammalamadugu Division of the Cuddapah district, in 1904, brought to the notice of the Madras Epigraphical Department a set of copper plates and a number of stone inscriptions relating to a family of kings whose existence was not known till then. These copper plates and stone records[1] were secured by Rai Bahadur V. Venkayya, through the kind offices of Mr. Ramayya Pantulu, and a brief account of their contents was given in his *Annual Report* on Epigraphy for 1904-5, p. 48, paragraphs 5 and 6. I publish below, with the permission of the Editor, the inscription on the copper plates and also append in a postscript, as a specimen, the text and translation of one of the well-preserved stone epigraphs whose importance will be recognised when it is stated that they are the earliest Telugu records from the Cuddapah district and belong to a dynasty of kings who, though claiming Chōḷa descent, had, nevertheless, their dominion in the Pallava territory.

Regarding the discovery of the plates, Mr. Ramayya Pantulu writes:—"They were given to me by a man of the Sāli caste named Varadappa, who told me that he found the plates while digging foundations for a *mutt* at Mālēpāḍu. He preserved the plates in the temple of Emberumān at Vōlpucharla whither he had removed himself and gave them to me when I visited that temple." The plates are three in number, and measure, roughly, $7\frac{1}{4}$" by $2\frac{7}{8}$". "They are held together by a ring whose ends are secured in an oval-shaped seal which measures about $1\frac{1}{2}$" by $1\frac{7}{8}$", and which bears in high relief, a tiger which stands to the proper left, raises the left fore-paw, opens the mouth and has a twisted tail."[2] The first and last of the plates are written only on their inner sides and show traces of having had raised rims, which were apparently meant to protect the writing on these plates from coming into contact with the written sides of the middle plate. The circular copper ring which holds the plates together, measures $3\frac{1}{2}$" in diameter and is about $\frac{5}{8}$" thick. The plates with seal and ring weigh 93 tolas. They have been presented to the Madras Museum— again through the kind intervention of Mr. Ramayya Pantulu— and will be deposited there after the final proof of the subjoined article has been passed for printing.

The seal with the emblem cut on it in bold relief— evidently the crest of the kings to whom the record belongs— deserves special consideration. The posture of the animal,[3] the sharp twist of its tail above the back, and the profuse mane round its neck— all considered together — make the figure look more like a lion than a tiger, although the possibility of the latter was suggested by Mr. Venkayya when he first discussed the question, from the supposed connection the kings mentioned in the Mālēpāḍu record bore to the Chōḷas of Tanjore whose crest was the tiger (*vēṅgai*).[4] Similar figures are engraved on the top of a broken slab at

[1] Some of the stone records which were not either set up in temples or otherwise properly cared for, were removed to the Madras Museum for preservation in the year 1905.

[2] *Madras Epigraphical Report* for 1904-5, p. 48.

[3] See the accompanying plate.

[4] *E.g.* in the historical introductions of Vīrarājēndra I. the king is stated to have "despatched (*the banner of*) the ferocious tiger into all directions" (*S.-I. I*, Vol. III, Part I, p. 37); see also, above, Vol. III, p. 125, note 3. Fine specimens of the Chōḷa tiger are depicted on the seal of the large Leyden Grant, the Tiruvālaṅgāḍu plates and the Madras Museum plates of Uttama-Chōḷa (*Ep. Ind.*, Vol. III, Plate facing p. 104). They are seen also on the coins of Uttama-Chōḷa and on the Chōḷa pillar on the top of Mahēndragiri in the Ganjam district (No. 396 of the Madras Epigraphical collection for 1896).

Peddamuḍiyam[1] and on another at Muddanūr,[2] both of which bear records of about the same age as the subjoined inscription and belong, evidently, also to members of the same family. That these figures represent a lion and *not* a tiger, receives confirmation from an unexpected source. In a record of the 11th century A.D. from the Bastar State,[3] it is stated that a chief named Chandrāditya, a feudatory of the Nāgavaṁśī king Jagadēkabhūshaṇa-Mahārāja Dhārāvarsha, was a descendant of Karikāla-Chōḷa of the solar race, belonged to the Kāśyapa-*gōtra*, was the lord of the river Kāvēri (Cauvery) and of the (historic) town of Oṛaiyūr (Uṛaiyūr in the Trichinopoly district) and bore the lion-crest.[4] As the kings mentioned in the Mālēpāḍu plates will also be seen from the sequel to have possessed almost the same family-titles, and as it is not improbable that Chandrāditya of Bastar (whose capital was Ammagāma[4]) may have been a later member connected with some collateral branch of this same family, it may be assumed for the present, that the crest figured on the seal of the Mālēpāḍu plates, is a lion like that of Chandrāditya of Bastar. It is curious to note also that Sir Walter Elliot in his *Coins of Southern India* (Plate II, Nos. 49 to 54) refers to certain specimens which bear on their obverse sides the same figure as the one under discussion and tentatively attributes them to the Pallava kings of Vēṅgī. The monolithic shrine at Śīyamaṅgalam which was excavated in the time of the Pallava king Lalitāṅkura (*i.e.*, Mahēndravarman I.) about the beginning of the 7th century A.D.,[5] also bears sculptures of two identical lions which face one another and are similar in design to the lion depicted on the Muddanūr stone (see accompanying plate). The seals of Indravarman[6] and Vikramēndravarman II.[7] of the Vishṇukuṇḍin family and that of the Uruvupalli plates of the early Pallava king *Yuvamahārāja* Vishṇugōpavarman[8] bear similar figures. A small signet of *lapis lazuli* discovered among the Buddhist ruins of Amarāvati has on it the representation of a lion with the open mouth and the raised left foreleg together with the legend *Bhūtisa* written in early Brāhmī characters of the 3rd century B.C.[9] Ancient coins recently found at Bojjanakoṇḍa in the Vizagapatam district by the Superintendent, Archæological Survey, Madras, bear almost the same crest on their obverse sides.[10]

The writing on the plates belongs to the Southern class of alphabets and closely resembles that of the Ēḍēru plates of the Eastern Chalukya king Vijayāditya II (A.D. 799 to 843).[11] The horizontal top-strokes, often left unfinished in our plates, indicate perhaps an even earlier stage of development. Accordingly, in many cases, we find two points (one on each side of the letter) taking the place of a complete top line. The letter *k* is distinguished from *r* by a vertical stem which projecting from the top of the right side of the latter, supports over it the *talakaṭṭu*

[9] Director-General's Archæological *Annual* for 1905-6., p. 166.

[10] *Madras Epigraphical Report* for 1908-9, p. 5, paragraph 5. The tiger crest of the Hoysaḷas figured on the frontispiece of Mr. Rice's *Epigraphia Carnatica*, Vol. V., has also got the twisted tail, the mane, the conventional slender waist, and the face of a lion. Sir Walter Elliot interprets similar figures (?) on two Hoysaḷa gold coins (*South-Indian Coins*, p. 152 D, Nos. 90 and 91) as maned lions. In the legend about Saḷa, the founder of the Hoysaḷas, the Kanarese word used is *puli* which distinctly means 'a tiger'. It is not altogether impossible that a tiger was also represented by the artists of the day, with the mane and other features that were naturally characteristic of a lion. It is stated in the *Śukranītisāra* (IV, iv, 167) that a *tiger* and a *lion* have almost the same form, the difference being only in the mane which the latter possesses.

or head-line. This stem of *k* is found to be in continuation of the right side of the letter *r* in the Ēḍēru plates, whereas here the stem begins a little removed from the right top of *r*. The use of the Dravidian *ḷa* (l. 9), *ṟa* (l. 20) and *ḻa* (ll. 8, 18 and 19) is also worth recording. As regards orthography it may be remarked that *m* and *v* coming after a *rēpha* are doubled (ll. 5, 6, 7, 11, 16, 19, 21, 22 and 24), except in *Pōrmukharāma* (l. 12 f.). The consonants *d* and *t* are likewise doubled after *r* in ll. 17, 22 and 24, and before *r* in l. 23, the only exceptions being *Purushaśārdūla* and *Mārdavachitta*, in l. 13. The language of the inscription is Sanskrit prose. An invocatory verse at the beginning and two imprecatory verses at the end are, however, written in the Āryā-Gīti and Anushṭubh metres, respectively.

After an invocation to Śiva, the record introduces us to a king **Nandivarman** of the Kāśyapa-gōtra. He was born in the family of **Karikāla** who was "the (celestial) tree *mandāra* on the mountain Mandara[1] — the **race of the Sun**, the doer of many eminent deeds such as stopping the overflow over its banks of the (*waters of the*) daughter of Kavēra (*i.e.* the river **Kāvērī**), who made his own the dignity of the **three kings** (*of the South*). Nandivarman had three sons, **Siṁhavishṇu, Sundaranandа** and **Dhanaṁjayavarman.** The youngest Dhanaṁjayavarman, on whom devolved the sovereignty in regular succession, had a son "who acquired the title **Chōḷa-Mahārāja**, was well versed in grammar and other sciences and was the lord of the **Pāṇḍya, Chōḷa** and **Kēraḷa** (countries)." This was **Mahēndravikrama-varman**, "who was equal in prowess to (*god*) Mahēndra and possessed many surnames such as the glorious **Muditaśīlākshara,**[2] **Navarāma,**[3] *etc.*" His son was king **Guṇamudita** and the latter's brother was the prosperous king **Puṇyakumāra.** This Puṇyakumāra, otherwise known as **Pōrmukharāma,**[4] **Purushaśārdūla,**[5] **Mārdavachitta,**[6] **Madanavilāsa,**[7] *etc.* thus ordered the inhabitants of his own dominion as well as those of **Hiraṇya-rāshṭra**: "Be it known to you that we, in the current **fifth year**, of our increasing and victorious reign, on the **full-moon day** of (*the month of*) **Kārttika**, have granted free from all molestations and taxes twice twenty-five (*i.e.* fifty) *nivartanas* of land (measured) by the royal unit, in the south-east quarter of the village named **Birapāṟu** (situated) in **Hiraṇya-rāshṭra**, on the southern bank of the river **Suprayōga**, to (*a certain*) **Chiruvaṇahaḷa-Kēśavaśarman** of the **Ātrēya-*gōtra***, at the request of (*the chief*) **Koṭṭikuḷdarāja.**" The inscription ends with two imprecatory verses (ll. 23 to 27) and a short Sanskrit clause invoking felicity on cows and Brāhmaṇas (l. 27).

Of the foregoing kings, Karikāla who held sway over the three kingdoms of the south and stopped the overflow of freshes in the Cauvery, is identical with the quasi-historical **Karikāla-Chōḷa** of Tamil literature, of whom many stories are related in the poems *Puranāṇūru*, *Porunārāṟṟuppaḍai*,[8] *Śilappadigāram* and *Paṭṭiṇappālai*.[9] Karikāla-Chōḷa is claimed by the Chōḷa kings of Tanjore to have been one of their famous ancestors, and to him is attributed the characteristic feat of constructing banks on either side of the river Cauvery and of renewing the town of Kāñchī with gold.[10] The exact time when this king flourished has not been properly made out. Inscriptions of a family of Telugu chiefs grouped by Mr. Venkayya under the name

[1] *I.e.* an ornament to the family which was as high (noble) as the mountain Mandara.

[2] Literally 'one who delighted in stone script (*i.e.* in inscriptions).'

[3] *I.e.* a new Rāma.

[4] A Rāma in front of battle. It may be noticed that the first component of this title, *viz. pōr* is a Dravidian word meaning 'battle' and cannot according to strict rules of Grammar be compounded with non-Dravidian Sanskrit words.

[5] A tiger among men (*i.e.* the best of men).

[6] One whose heart is tender.

[7] Amorous like (the god of) Love (Madana).

[8] Mr. Kanakasabhai's *Tamils*, Ch. V.

[9] *Ind. Ant.*, Vol. XLI, pp. 144 to 149.

[10] *Madras Epigraphical Report* for 1905-6, Part II, paragraph 15.

Telugu-Chōḍas,[1] state that an ancestor of these was a certain Karikāla "who caused the banks of (*the river*) Kāvērī to be built by **Trilōchana** and other kings who fixed their glances on (his) lotus feet (*i.e.* were subordinate to him)." [2] Apparently here also, the reference is to the king Karikāla-Chōḷa mentioned in the Mālēpāḍu plates. Karikāla's subordinate Trilōchana was, in all probability, a Telugu contemporary whose approximate date is possible to deduce from inscriptions. Trilōchana, **Triṇētra, Triṇayana** and **Mukkaṇṭi** are synonymous terms and occur frequently in Telugu epigraphs with the suffix Pallava, as the name of a mythical ruler of Pallava origin who held sway over the Telugu country at some period of its early history.[3] The Paurāṇik genealogy of the Eastern Chālukya kings invented as early as the time of Vimalāditya,[4] refers to a Trilōchana-Pallava[5] as the ruler of **Dakshiṇāpatha** and a powerful opponent of the **Chalukya** adventurer **Vijayāditya** of **Ayōdhyā**. This Trilōchana-Pallava is, perhaps, identical with the Trilōchana of the Telugu-Chōḍa inscriptions and with Triṇayana-Pallava and Mukkaṇṭi of other Telugu epigraphs. It may therefore be presumed that the three kings Karikāla, Vijayāditya and Trilōchana-Pallava were almost contemporaneous. From the account given in the Eastern Chālukya copper plates—whatever its historic value may be—it appears as if five generations had intervened between the mythical king Vijayāditya and Kubja-Vishṇuvardhana before the latter came to rule over the Vēṅgī-dēśa and founded the Eastern Chālukya dynasty. Dr. Fleet has proved that this Kubja-Vishṇuvardhana was the younger brother of Pulakēśin II.— the Satyāśraya-Vallabhēndra of Eastern Chālukya records — and that he succeeded to the throne as *yuvarāja*, in or about A.D. 615.[6] Calculating backwards for five generations, we arrive at the conclusion that Vijayāditya of Ayōdhyā and, therefore, also Trilōchana-Pallava and Karikāla, must have flourished about the end of the fifth century A.D.[7] The history of the Pallavas at this period is obscure, and it is not unlikely that Karikāla-Chōḷa was supreme at the time and held the Pallava dominions under his sway. The three kings of

[1] *Madras Ephigraphical Report* for 1900, paragraph 44.

[2] The actual phrase which precedes the name Karikāla in these inscriptions is: *charaṇa-sarōruha-vihita-vilōchana-Trilōchana-pramukh-ākhila-pṛithvīśvara-kārita-Kāvērī-tīra.* Some inscriptions substitute the word *vihata* for *vihita*. In this case the explanation would perhaps be *charaṇa-sarōruhēṇa vihatāḥ-tāḍitāḥ ata ēva vilōchanāḥ-vinashṭa-dṛiṣṭaḥ, tējasa iti yāvat, Trilōchana-pramukhā yasya saḥ, i.e.* Trilōchana and other lords of earth whose eyes were blurred by (the brilliance of) his (*viz.* Karikāla's) lotus-feet (on the occasion when they prostrated to him). Karikāla is stated to have got thousands of Ceylonese coolies "to work on the embankments of the Kāvērī river, a hundred miles in length, which he constructed" (Smith's *Early History of India*, p. 416). Almost all the families of kings and chiefs in the south which trace their origin to the Sun, mention Karikāla among their ancestors and describe him as having constructed banks on either side of the river Kāvērī. The Kākatīyas of Warangal and, in latter times, the Maṭla chiefs of Cuddapah and the Sāḷuva chiefs of Kārvētinagar and a number of feudatory families who intermarried with the Vijayanagara kings of the lunar race, mention Karikāla in their genealogy. In the Telugu poem *Narasabhūpālīyamu* which was dedicated to one of the Toraganṭi chiefs of the solar race who were related to the kings of the third Vijayanagara dynasty by intermarriage, it is stated that Karikāla planted rows of avenue trees on either bank of the Kāvērī in order to hide her 'who was the queen of the ocean' from public gaze.

[3] See *e.g.* above, Vol. VI, p. 277, footnote 2.

[4] *Ibid.*, p. 348 f.

[5] The modern village Peddamuḍiyam in the Jammalamaḍugu tāluka of the Cuddapah district, is called Trilōchanapura in one of its later records. It was, as Mr. Ramayya Pantulu has pointed out to me the ancient Muḍivēmu-Agrahāra where Vishṇuvardhana, the son of Vijayāditya of Ayōdhyā, was born and brought up. Its name Trilōchanapura connects it with the mythical king Trilōchana-Pallava who opposed Vijayāditya. The Pallava genealogy so far disclosed, either from copper plates or stone inscriptions, does not mention any name like Trilōchana-Pallava; but the Kādambas of Goa (*Dyn. Kan. Distr.*, p. 566) and the Noḷambas of Hēmāvati (above, Vol. X, p. 58) claim, respectively, Trilōchana-Kādamba and Triṇayana-Pallava as the founders of those dynasties.

[6] *Dyn. Kan. Distr.*, p. 352 and *Ind. Ant.*, Vol. XX, p. 283.

[7] *Arch. Surv. Report* for 1905-6, p. 174 f.

the South whom Karikāla is stated to have subdued were, evidently, the Pāṇḍya, Chōḷa and Kēraḷa[1] as specified in l. 9 of the text, in connection with Mahēndravikramavarman—a later member of this same family. The inclusion of the Chōḷa among the kings conquered, although it is wrong, is, nevertheless, meant to show that Karikāla virtually ruled over the whole of Southern India. The Tamil poem *Śilappadigāram* says of him that he was an of Avantī and the overlord of Vajra and Magadha.[2]

Of Nandivarman and his three sons Simhavishṇu, Sundarananda and Dhanaṁjayavarman we do not know much at present. The first two names bear resemblance to Pallava names. Sundarananda figures as one of the ancestors of an unidentified Telugu-Chōḍa chief Śrīkaṇṭha whose Madras Museum plates have been noticed by Professor Kielhorn in one of the previous volumes of this journal.[3] A certain **Dhanaṁjaya Eṛiga** referred to in some epigraphical records from the Maddagiri tāluka of the Tumkur district calls himself a **Chōḷa** ruling the **Āḷvāḍi six hundred** district.[4] Mr. Rice assigns these records, on palæographical evidence, to about the middle of the 8th century A.D. The Chōḷas of the Tumkur district (round Niḍugal and Hēmāvati) may have been of a common stock with the Chōḷas of Cuddapah, and Dhanaṁjaya Eṛiga was either directly or indirectly connected with Dhanaṁjayavarman of the Mālēpāḍu plates. Again, a stone record at **Kalamaḷḷa**[5] in the Cuddapah district makes mention of a certain **D[h]anaṁjeyuṇḍu** who was ruling **Rēnāṇḍu**. The record is not dated; but to judge from the characters, it may roughly be referred to the same period as the Mālēpāḍu plates. It is, therefore, not unlikely that we have here a direct reference to Dhanaṁjayavarman, the last son of Nandivarman. Mahēndravikramavarman who assumed the titles **Chōḷa-Mahārāja, Mudita-śīlākshara** and **Navarāma**, appears to have been so named after Mahēndravikrama, a name or surname of Mahēndravarman I.,[6] the Pallava contemporary of the Western Chalukya king Pulakēśin II., in the 7th century A.D.[7] After Guṇamudita, of whom nothing is stated in the inscription, came Puṇyakumāra Pōrmukharāma to whose reign our grant belongs. Two of the *birudas* assumed by him, *viz.* Mārdavachitta and Madanavilāsa indicate some apparent affinity to Mattavilāsa and Vichitrachitta, the recognised *birudas* of Mahēndravarman I.[8] This resemblance in the *birudas* suggests, as will be pointed out below, the possibility of some undefined relationship, political or otherwise, that may have existed between the Chōḷas of the Cuddapah district and the Pallavas of Kāñchī.

Puṇyakumāra, we are told, addressed his order to the inhabitants of his own dominion and to those of Hiraṇyarāshṭra. The latter territorial division, though not actually included in the province governed by Puṇyakumāra, must have been bordering on it and perhaps also subordinate to him. It is not impossible that this was actually the kingdom ruled by **Koṭṭikuḷadarāja,**

[1] Tamil literature refers to "the battle at Veṇṇil where Karikāla defeated the Chēra and the Pāṇḍya kings" (*Ind. Ant.*, Vol. XLI, p. 146). It is not impossible to interpret the word *trairājya-sthiti* of l. 4 in the sense of "the position of *trairājya*". In Western Chalukya copper-plates the Pallava King is often referred to as *Trairājya-Pallava* or *Trairājya-Kāñchipati*, where *trairājya* evidently denotes the sovereignty over the whole of Southern India.

[2] Above, Vol. X, pp. 26f.

[3] Above, Vol. V, p. 123, note. Professor Kielhorn who has compared the palæography of these with that of the Masulipatam plates of Vijayāditya III. (A.D. 844-888), is of opinion that the Madras Museum plates of Śrīkaṇṭha are also of about the same period. It may be pointed out that an ancient coin of about the 4th or 5th century A.D., discovered at Eḍjjanakoṇḍa, bears on one of its sides the legend *Śrīkaṁṭa* and on the other the Pallava symbol of the vase and the lion (*Madras Epigraphical Report* for 1908-9, Part I, paragraph 5).

[4] *Ep. Carn.*, Vol. XII, Introduction, p. (7).

[6] *A. S. R.* for 1903-4, p. 271, and *Madras Epigraphical Report* for 1908-9, Part II, paragraph 14. The names Navarāma and Mahēndravarman also occur in the plates of Śrīkaṇṭha noticed above.

[7] *Dyn. Kan. Distr.*, p. 350.

[8] *Madras Epigraphical Report* for 1908-9, Part II, paragraph 14.

at whose request the subjoined grant was made. The river Suprayōga, on whose southern bank the village Birapāṟu was situated, is mentioned again in the Uruvupalli plates of the Pallava king *Yuvamahārāja* Vishṇugōpavarman.[1] It is there stated to have formed one of the boundaries of the village of Uruvupalli situated in the district of Muṇḍa-rāshṭra. Koṇḍakūṟa or Kaṇḍukūṟa, another boundary of Uruvupalli, mentioned in the same plates, is suggested by Mr. Venkayya to be identical with the modern Kandukūru,[2] the headquarters of a tāluka of that name in the Nellore district. And as Muṇḍa-rāshṭra is probably the same as Muṇḍai-nāḍu mentioned in some of the Nellore Tamil inscriptions,[3] the river Suprayōga has to be looked for somewhere in the Nellore district. Puṇyakumāra's sway thus appears to have extended beyond Cuddapah, even into Nellore. An inscription at Kalujavvalapāḍu in the Podili division of the Nellore district refers to a chief of the solar race (to which also Puṇyakumāra belonged) and is worded almost in the same style as the stone epigraphs of the family under reference[4]. The existence of this record may be taken to be a further proof of the influence of the Chōḷa kings, in the Nellore district, already at this early period. I am unable to identify the village of Birapāṟu which was situated on the bank of the river Suprayōga.

Before fixing the probable period to which the Mālēpāḍu plates belong, it may be useful to examine some of the allied lithic records referred to at the beginning of this paper. One from **Rāmēśvaram** near **Proddaṭūru**[5] and another from **Chippili** near Madanapalle,[6] have to be assigned on palæographical evidence to Puṇyakumāra of the Mālēpāḍu plates, though neither of them which mentions him refers to the family to which he belonged or the *gōtra* in which he was born. The latter is a memorial tablet in the Kanarese language and registers that "while the glorious Puṇyakomarān (*i.e.* Puṇyakumāra) was ruling Chirpuḷi (Chippili), Indarāḷa rose (in rebellion ?), and (in the conflict that ensued, a certain) Parasurāman pierced and fell." The former tells us: 'In the victorious and increasing years of the reign of the lord of the earth (*pṛithivī-vallabha*), the **Chōḷa-Mahārāja Pōrmukharāma Puṇyakumāra, in (his) fifth year, queen Vasantapōṟi-Chōḷa-Mahādēvi** presented three hundred (measures) of land in the fields of **Viriparíti** to the temple of **Vasantīśvara** at **Tārumunṟi**— the *āṇati* (*ājñapti*) of the grant being a certain **Mārpiḍugu Raṭṭaguḍlu**." Although one may feel doubtful about the identity of Puṇyakomarān of the Chippili record, there is little doubt that Pōrmukharāma Puṇyakumāra of the Rāmēśvaram pillar inscription is identical with the donor of the Mālēpāḍu copper plates. The mention in this record of (Puṇyakumāra's?) queen Vasantapōṟi-Chōḷa-Mahādēvi, of (his) officer Mārpiḍugu Raṭṭaguḍlu and of the villages Viriparíti and Tāramunṟi is apparently of much historical interest. Mārpiḍugu is a name or surname quite familiar to the period to which the inscription belongs and was in use among the ruling Pallava sovereigns and their subordinates.[7] Raṭṭaguḍlu is an honorific title largely used in the epigraphs under reference. Its significance, as indicated by the context, appears to justify our connecting it with the later Sanskrit word *rāshṭrakūṭa* which has been explained in the sense "the headman of a

[1] *Ind. Ant.*, Vol. V, p. 53. [2] *Madras Epigraphical Report* for 1904-05, Part II, paragraph 2.

[3] *Ind. Ant.*, Vol. XXXVII, p. 283 and note.

[4] *Nellore Inscriptions*, p. 1179. The occurrence of epithets like *raḍḍōḍiya* and *raḍḍōḍlu* in connection with the original founders of the temple as stated in this record, is also worthy of note.

[5] No. 384 of the Madras Epigraphical collection for 1904. [6] No. 299 of the same collection for 1905.

[7] Names ending in *piḍugu* were common in Pallava times. Perumbiḍugu was the name of a channel which was dug from the river Pālār to feed the Paramēśvara tank in the village of Kūram near Conjeeveram, in the time of the Pallava king Paramēśvaravarman I. (*South-Ind. Inscrs.*, Vol. I, p. 155). Pagāppiḍugu was the surname of king Mahēndravarman I. Mārpiḍugu was the epithet either of a Pallava king named Dantivarman or of one of his subordinates, in whose time a well was constructed at Tiruvellarai in the Trichinopoly district. A tank at Ālambākkam in the same district was called Mārpiḍugēri. Agraṇipiḍugu occurs among the names of the ancestors of the Telugu Chōḷa chief Śrikaṇṭha who perhaps belonged to the same family as Puṇyakumāra. According to the *Nandikkalambakam*, Viḍēlviḍugu was a surname of the hero of that Tamil poem.

village." The following other forms of *raṭṭaguḍlu* are also found in the Chōḷa records of the Cuddapah district: (1) *raṭṭeḍlu*, (2) *raṭṭaguṭṭu* (perhaps the singular form of *raṭṭaguḍlu*) and (3) *raṭṭāḍlu*. Further, in some inscriptions, *raṭṭaguḍi* is found compounded with the name of a royal family, as Saḷki-Raṭṭakuḍi, Chaḷki-Raṭṭaguḍi, Gagga-Raṭṭaguḍi, Vallava-Raṭṭaguḍi, Chōḷiya-Raṭṭaguṭṭu, and Chōḷa-Raṭṭōḍi. In these forms apparently the first part denotes the dynasty Saḷki or Chaḷki (*i.e.* Chaḷukya), Gagga (Gaṅga), Vallava (Pallava ? or Vallabha-Rāshṭrakūṭa) and Chōḷiya or Chōḷa, under whose patronage the dignity (*paṭṭam*) of *raṭṭaguḍi* was held by the individual or individuals who bore them. The familiar phrase *rāshṭrakūṭa-pramukhān=kuṭumbinaḥ*, which occurs in copper plate inscriptions, shows also that the *rāshṭrakūṭas* were *kuṭumbins* 'cultivators' (*kuḍi* in Tamil) who enjoyed a higher social status than others of their community. The Reḍḍis of the Telugu country according to their own account belong to the *Paṇṭakula* 'the cultivating caste' and command much respect. A class of Reḍḍis in the Nizam's Dominions, is still known by the name Raḍraḍḍis which appears to me to be a reminiscence of the older honorific *raṭṭōḍi*. Thus the Sanskrit *rāshṭrakūṭa* and the modern *reḍḍi* have to be traced to the form *raṭṭaguḍi* and its variants which were current in the Cuddapah district in the period of the lithic records under discussion.[1]

Six other stone epigraphs,[2] from the Cuddapah district, begin with a short eulogy of the Chōḷa kings, which is identically the same in all.[3] The ruling chief is introduced by the general appellation Chōḷa-Mahārāja and not by his proper name. Four allied records refer to an unnamed eldest son (*prathama-priya-putra*) of **Vikramāditya Bempaṇāḍhirāja**,[4] a **Vikramāditya-Chōḷa-Mahārāja** and queen **Eḷañchōḷa-Mahādēvi**[5] and prince **Śatyadituṇṛu**, son of **Śaktikomara Vikramāditya** (and grandson of) **Chōḷa-Mahārājādhirāja Vikramāditya.**[6] These are names not mentioned in the genealogical portion of the Mālēpāḍu plates and consequently their relationship to Puṇyakumāra, to whose family they must belong, is not certain. The general appellation Chōḷa-Mahārāja, however, was, according to text line 8, first acquired by Mahēndravikramavarman, the father of Puṇyakumāra. It is not improbable that the Chōḷa-Mahārāja mentioned in the six lithic records quoted above, is identical with Mahēndravikramavarman. The province over which these Chōḷa kings apparently ruled is stated in four records to have been the **Rēnāṇḍu seven thousand.** One stone epigraph from **Mālēpāḍu** (see Postscript, below) adds the district **Śiddhi one thousand,** perhaps the same as the Siddhant country. A later inscription of the 12th century A.D. from Peddamuḍiyam,[7] mentions the **Rēnāḍu seventy,** which must have formed a sub-division of the **Rēnāṇḍu seven thousand** district. Mr. Ramayya Pantulu identifies Rēnāḍu with "the black-soil country which roughly includes large portions of the modern districts of Cuddapah and Kurnool, along the valley of the Kundēru river."

The period of the record could only be approximately fixed. The lion crest adopted by the Chōḷa kings was, as we have seen, already familiar in the 3rd century B.C. It was a Buddhist symbol used also by the Pallavas of the 3rd and 4th centuries of the Christian era and

[1] For a detailed criticism on the terms *raṭṭa* and *rāshṭrakūṭa* see above, Vol. VII, p. 221 f. A similar development of the title *Gauḍa* from the earlier *grāmakūṭa, gāmaüḍa* has been maintained by Dr. Fleet, *ibidem*, p. 183.

[2] Nos. 405, 406 and 408 of the Madras Epigraphical collection for 1904; No. 352 of the collection for 1905 and Nos. 466 and 517 of the collection for 1906.

[3] This eulogy runs as follows:—*Svasti śrī ari-durdhara-vara-bhuj-āsi-bhāsura prachaṇḍa-pradyōta-Dinakara-kula-nandana Kāśyapa-gōtra Karikāl-ānvaya*—'Hail! Prosperity! (Chōḷa-Mahārāja) who is resplendent with an excellent sword in hand which his enemies could not oppose, who gladdens the family of the Sun whose rays are powerful, who belongs to the Kāśyapa-gōtra (and) to the family of Karikāla.'

[4] No. 403 of the Madras Epigraphical collection for 1904. [5] No. 400 of the same collection.

[6] No. 393 of the same collection. The text of this record with translation is published below, in a postscript.

[7] No. 350 of the same collection for 1905 (below p. 344, n. 2). Inscriptions of the 16th century A.D. at Peddamuḍiyam and Dombara-Nandyāla refer to the country in which these villages were situated as Rēnāṭa-Sīma, in the Ghaṇḍikōṭa-rājya.

by the Vishṇukuṇḍin family of about the 7th century A.D. Again the adoption by Puṇyakumāra and his ancestors of titles and names which were current among the Pallava kings of the Simhavishṇu line, makes it probable that they were either the subordinates of those Pallavas or succeeded them politically in, at least, a portion of their extensive territory. Besides, the existence of a kingdom called Chu-li-ye in the time of the Chinese traveller Hiuen Tsiang (640 A.D.)[1] somewhere about the tract of country in which we find these Telugu-Chōḷa records, is conclusive proof "that this kingdom existed in the 7th century A.D." Allowing thus a little more than a century to the five rulers from Nandivarman to Puṇyakumāra, the date of the Mālēpāḍu plates may roughly be referred to about the end of the 8th century A.D., which is also the period determined by palæographical evidence.

The connection that existed between these Telugu-Chōḷas of the Cuddapah district and the Tamil Chōḷas of Tanjore, both of whom claim Karikāla as their ancestor, is not clear. After a more or less independent rule in Rēnāṇḍu for about a century or two, the Chōḷas of Cuddapah appear to have dispersed. Some of them became subordinate to the Western Chālukyas who conquered and occupied the northern portion of the Pallava country.[2] A collateral branch appears to have adventured further north to seek service in Chakrakōṭa under the Nāgavaṁśi king [Dhārāvarsha] Jagadēkabhūshaṇa-Mahārāja (A.D. 1060-61).[3] In the 12th and 13th centuries there flourished in the Guntur, Nellore, North Arcot, Cuddapah and Chingleput districts influential kings of the Telugu-Chōḷa (now changed into Telugu-Chōḍa) family who owed allegiance to the Kākatīyas of Warangal.[4] The Kākatīyas themselves trace their descent from the sun and count among their mythical ancestors the ancient king Karikāla-Chōḷa.[5] In the Anantapur district and the bordering Kanarese country there flourished also a branch of these Chōḷas. Even as late as the 16th century A.D., Chōḷa chiefs with the traditionary legend of descent from Karikāla and lordship over the ancient town of Uraiyūr[6] are found serving as viceroys under Vijayanagara rulers.

[1] *Madras Epigraphical Report* for 1905, p. 49.

[2] A Kanarese record (No. 350 of 1905) of the Western Chālukya king Tribhuvanamalla Vikramāditya VI. dated in Śaka 1048 (= A.D. 1124-25) mentions the *Mahāmaṇḍalēśvara* Atyaṇa-Chōḷamahārāja whose eulogy begins with the very same passage as in the earlier Chōḷa records of the Cuddapah district under reference. Peddamuḍiyam, the village from which it comes, is described as "the jewel of villages, the great *agrahāra* Muḍivēmu, where resided one hundred and fifty pious (Brāhmaṇas) who were well versed in Vēdas and Purāṇas, in penance and in devotion to Nārāyaṇa and who were the lotus-tank (as it were), in which the Mahārājādhirāja Vishṇuvardhana and others had their birth." The last adjunct is explained by Mr. Ramayya Pantulu to be a clear reference to the birth of Vishṇuvardhana at Muḍivēmu mentioned in the mythological account of the later Eastern Chālukya copper plates.

[3] *Madras Epigraphical Report* for 1909, p. 112. [4] *Madras Epigraphical Report* for 1900, p. 17 f.

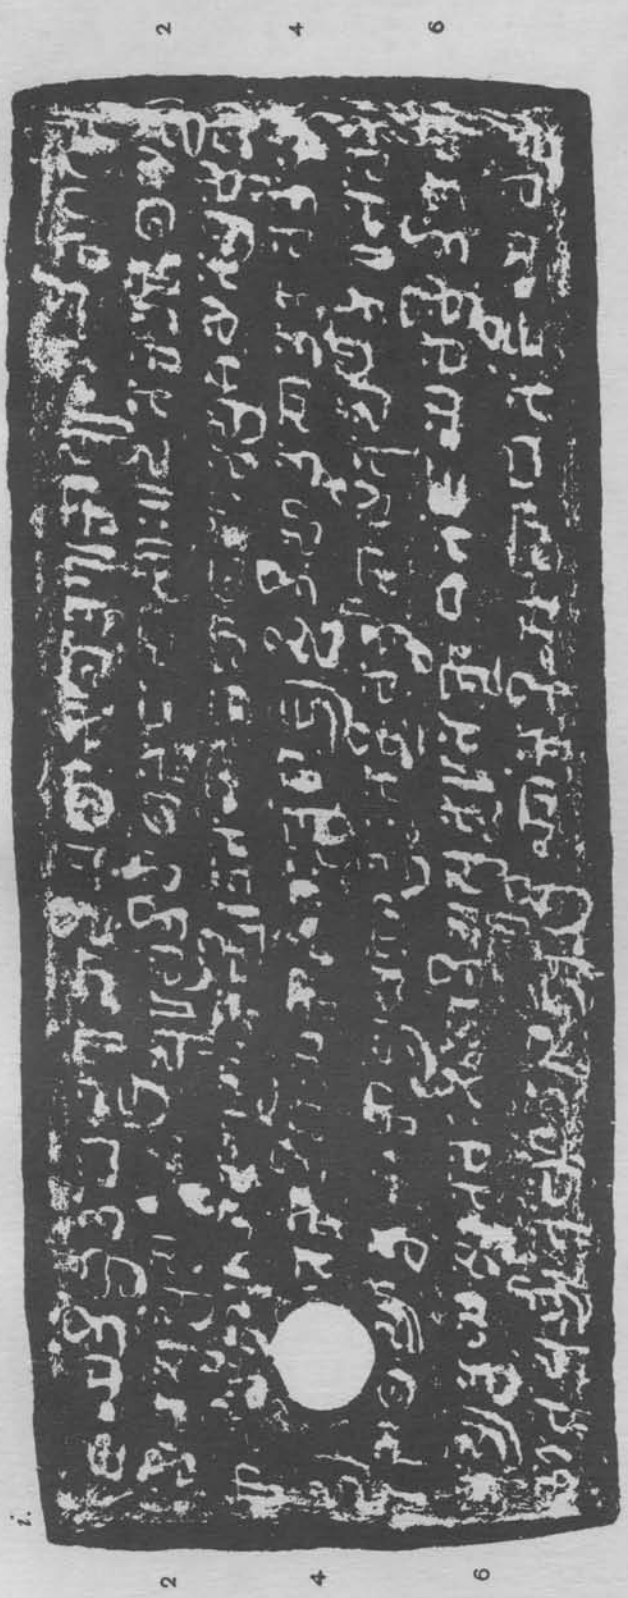

[5] *Ibid.*, p. 106, paragraph 44.

[6] The title 'lord of Uṟaiyūr (Oṟeyūr)' assumed by the Telugu-Chōḍa chiefs occurs for the first time in the Bastar record of Chandrādityadēva of the 11th century A.D. Earlier Chōḷa inscriptions from Cuddapah do not speak of Oṟeyūr.

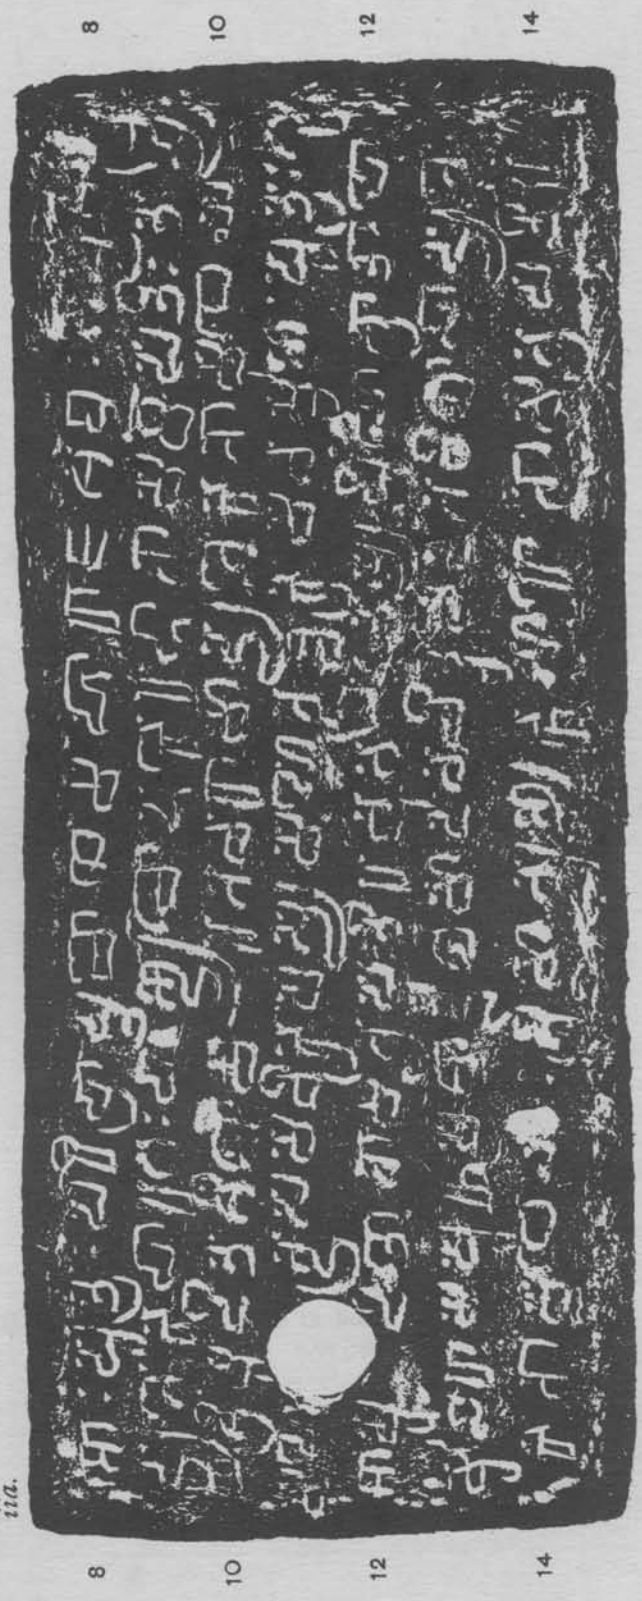

[7] From the original plates. [8] A faint symbol for *Ōṁ* is visible at the beginning of the line.

[9] Metre: Āryā Gīti. Read *-kaṇṭhagō hāraḥ*. The adjectives which qualify *hāraḥ* 'the necklace' (of Śiva), are applicable also to *gagana* 'the sky' to which the necklace is compared. In the first case the necklace is made up of beads resembling the digit of the moon and of pearls big and bright; it is also auspiciously brilliant and flawless. The sky is the seat of the digit of the moon, full of big and bright stars, full also of good lustre shed by the stars and clear. It may be noted that *Chandrahāra* in Kanarese means 'a necklace of flat moon-like (circular) gold beads.'

Malepadu plates of Punyakumara ; the fifth year.

## TRANSLATION.[4]

Hail! **Śatyaditunṛu (Satyāditya)** of the Kāśyapa-gōtra, son of **Śaktikomara Vikramāditya** (and grandson of) the great lord, the glorious **Chōḷa-Mahārājādhirāja Vikramāditya**, while ruling the **Śiddhi one thousand** and the **Rēnāṇḍu seven thousand** (*districts*), gave to **Rēvaśarmma** of the Kāśyapa-gōtra, (*a resident*) of **Komaṛipāṛa**, five *marutru*[5] (of land) at **Chiṛumbūru** . . . . . on the north side . . . . . east side . . . . . the boundary of the fields of **Juggi**; (*on*) the south side . . . . . To him that maintains this (*charity*), (*shall accrue*) the merit of establishing a thousand temples, a thousand tanks (and) a thousand villages! He that obstructs this, shall live in the world of him who commits the five great sins (*such as*) the murder of a son, the murder of a woman (*and*) the murder of a cow!

---

[1] The vowel sign for *u* is added, though wrongly, to the compound letter *ṛi*.

[2] The *anusvāra* which is to be connected with *ṛu* is placed over the letter *bū* which follows it. This peculiar position of the *anusvāra* is often found in the Telugu records of this period. The pronunciation intended may be either Chiṛumbūru *or* Chiṛṇubūru (the modern Chilamkūru near the Kalamaḷḷa railway station). The latter possibility is supported by the system of spelling generally followed in Prakrit manuscripts where an *anusvāra* placed at the top of any letter has the effect of doubling the preceding letter. The similar position of the *anusvāra* in the words *puṇyaṁbu* and *vakraṁbu* (l. 23 f.) cannot be explained in the same way. [3] Read *silpina*.

[4] The subjoined is only a tentative translation of the inscription. Its peculiarities of orthography, grammar and idiom require independent study and discussion. I could only here draw particular attention to the use of *ṛu ṛi* for *ṇḍu, ṇḍi*, the use of the Dravidian *ḷ* for *l*, the wrong forms *gōtriniki* for *gōtruṇiki* (l. 12) and *dīni* for *dīni* (l. 19), the addition of the genetive suffix to the qualifying adjective instead of to the noun (ll. 10 to 12), the use of the expletive suffix *vu* in *vē-guḷḷuvu* (l. 21), the ungrammatical *vēvāṛ-ūṛḷu* for *vē-vāḷḷu* and the word *vadya* for *vadha*. Again, I am unable to explain the phrase *ēnu maṛutru-gānu tāgiri* in l. 18 f.

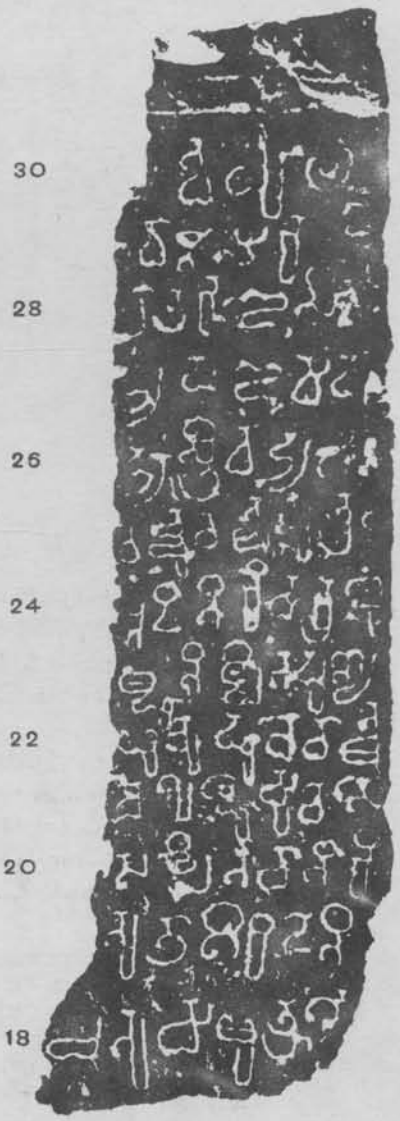

[5] *Marutru* is evidently the plural of *marutu*, which again is a corruption of the Kanarese *mattar, mattaru* 'a measure of land.'

Malepadu stone inscription of Satyaditya.
