APPENDIX.

PROFESSOR BÜHLER'S INDIAN PALEOGRAPHY; edited by J. F. FLAET.

THE INDIAN ANTIQUARY,

A JOURNAL OF ORIENTAL RESEARCH.

VOLUME XXXIII. — 1904.

JANGNĀMAH OF SAYYAD 'ĀLIM 'ALĪ KHĀN, A HINDI
POEM BY SŪDISHT.

BY WILLIAM IRVINE, LATE OF THE BENGAL CIVIL SERVICE.

THE original manuscript from which my copy of this work was made, was found a year or two ago by my agent, Maulvi 'Abd-ul-'Aziz, in the library of the Mahārājah of Benares at Rāmnaḡar, access to which had been obtained for him through the kind offices of Leslie Porter, Esq., C.S., Commissioner and Agent to the Governor-General.

The book in question is in the Persian character. From the nature of the language, 'Abd-ul-'Aziz inferred a Panjābī origin. If this be correct, possibly the author was a native of the Upper Dūābah where the Bārhaḡ Sayyads live; and the language there used would seem to a down-country man little, if at all, distinguishable from the Hindī of the Eastern Panjāb. The liberal use of Persian and Arabic, with the absence of Hindū imagery, suggests that the author, in spite of his Hindū appellation (Sūdisht), was probably a Muhammadan. When writing in the vernacular, Muhammadans often adopted a Hindū name as their *takhalluṡ*, or pen-name. The abrupt way in which the poem opens, shows that some introductory lines have been lost.

For my own part, I am inclined to think that the author was a Muhammadan of the Dakḡin, or one who had long lived there. The scene is in the Dakḡin; and in lines 33, 112, and 113 we have the curious contraction *bāj* for *ba-juz*, which is certainly not known in Northern India, and, according to J. T. Platts (*Dictionary*, p. 118), is a word used by the poet Walī, and peculiar to Southern India. Mahrattah scholars may possibly detect forms borrowed from that dialect. The name of Sūdisht does not appear in Grierson's *Modern Vernacular Literature of Hindustan* (Calcutta, 1889).

From internal evidence I believe that the poem is a contemporary effusion; and as Walī was then alive, it is not impossible that he was the writer. He lived in the Dakḡin at Aurangābād or Burhānpur, and was in Dihlī in the year 1132 H. (1719-20) — see J. F. Blumhardt's *Catalogue of Hindī and Hindūstānī Manuscripts in the British Museum*, p. 5. The events recorded in the poem took place in 1132 H. (1720), and the few historical facts given in it are correct according to the prose chronicles. But the work is more a lament on the fate of young 'Ālim 'Alī Khān, than

a record of events, which are not given in any detail. As it seems to me, the greater number of the lines are sweet and musical, many very striking, and some most pathetic.

Transliteration of Text.

Translation.

[Opening lines are wanting.]

- "Kih : Le kar Nizām-ul-mulk fauj sāth
 "Chal ātā hai sīdhā Dakhin ki jo bāt
 "Tūman sang jāng, hoshyārī karo,
 "Larāi ki begī tayārī karo."
 5 Sūnā aur kiya dil men apnī 'ajab :
 "Larāi hamān sāth kyā-bi sabab ?"
 So ise mon āko khabar yūn debā
 Kih utarā Nizām-ul-mulk Narbadā.
 Hui bāt Sayyad pai tahqiq jab,
 10 Būlā bhej arkān-i-daulat kon tab ;
 Nazar jabān tabān jā chadhāwānī lagī,
 Du'ayān ism nit dadhāwānī lagī ;
 Pakāne lagī har jins ke ṭā'am,
 Khilā, in lagī dam-ba-dam subh-o-shām.
 15 Hāthī, ūṭh, ghorī, ṭaṣadduq kī,e,
 Jo kuchh jag mon karnā, so ūn sabh kī,e,
 Ṭaṣadduq ūtārī ūtārī lage.
 Rūpai khwān bhar bhar ke wāran lage,
 Jahān lag qutb, ghaus, au pīr the,
 20 Jahān lag walī khās, khabīr the,
 Jahān lag jo ko sāhib-i-hosh the,
 Zamānah kī āfat ke sarposh the,
 Jahān lag muqarrab the, dargāh ke,
 Jahān tak jo the khās is rāh ke,
 25 Madad māng sakālān son, kinā suwāl,
 Jahān tak qalandar the, ahl-i-kamāl ;
 "Main farzand 'Alī kā, wa āl-i-rasūl,
 "Karo 'arz merā tūm itnā qabūl ;
 "Pare hai mujhe āj mushkil mahāl,
 30 "Tūmen mil-ke sabh, mujh ko lenā nibhāl,
 "Rakho lāj mardon ke maidān men,
 "Achi jān jab tain merī jān men ;
 "Khudā bāj nā koī mujhe yār hai,
 "Use ke karam kā jo ādhār hai."

That : "Nizām-ul-Mulk with an army
 "Is coming straight on the Dakhin road,
 "He means to fight with thee, be on thy guard,
 "Prepare forthwith for war."
 He heard and wondered in his mind :
 "To fight with me what can be the reason ?"
 Meanwhile they came with the news
 That Nizām-ul-Mulk had crossed the Narbadā.
 When the Sayyad had verified the fact,
 Then sent he a summons to all his councillors ;
 Offerings to various places were presented,
 Invocations to His Name were uttered unceas-
 ingly ;
 Food of every sort began to be prepared,
 Men were fed every instant from morn to night.
 Elephants, camels, horses, were given in alms,
 Whatever sacrifice could be done that did he,
 Alms of every sort were presented.
 Trays filled with rupees were held up before
 shrines,
 Wherever there was a leader, a saint, a holy man,
 Wherever there was a noted friend of God, or
 learned one,
 Wherever there was one possessed of understand-
 ing,
 A coverer up of this age's calamities,
 Wherever there was one connected with any
 shrine,
 Wherever there was one specially noted in the
 Way,
 Help was asked from all, the question was put,
 Wherever there was any recluse, of perfect
 qualities ;
 "I am a son of 'Alī, of the Prophet's race,
 "Be pleased so far to accept my requests ;
 "This day there falls on me a desperate difficulty,
 "All of you join together, find me a way of
 escape,
 "I risk my reputation in the field of heroes,
 "Unconquered while breathes a breath of life ;
 "Besides God there is none my friend,
 "His mercy is my only staff and stay."

- 35 Būlā phir najūmī, kholā,ī najūm;
 "Kaho, kyā hai-yah ghulghalah, kyā hajūm,
 "Kaho, dīn hai kaise, satārā hai kon,
 "Fath kis koṇ hai, ur awārā hai kon,
 "Ajhi kar sabh mil, mūjhe bol deo,
 40 "Bhalā yā būrā, yak-ba-yak khol deo."
 Najūmī kahe haiṇ khūsh-āmad ki bāt;
 Kahāṇ 'ilm-i-kāmil inhoṇ ke hāt?
 "Nawāzūngā tūmanā, karūngā nihāl,
 "Oḍhāpūngā tūmanā dū-shālā wa shāl."
- 45 Kahe sab najūmīyān: "Napat khair hai,
 "Satāre kī gardish kā ṭapak bahuter hai,
 "Yaqīn hai hamaṇ koṇ fath pāyoge,
 "Fath pā-ke begī soṇ phir āyoge."
 Pūchhā bāt, ba'ze faqīrāṇ būlā;
- 50 "Tūmhārī bhī is bāt moṇ kyā salā?"
 Kahe tab faqīrāṇ-ne: "Sun liyo to āb,
 "Shahr chhor-jāne moṇ, nahīṇ kuchh suwāb,
 "Nah umarāo koī, sāhib-i-fauj, hai,
 "Shitābi ke karneṇ meṇ, kyā būjh hai,
 55 "Navvī fauj, lashkar, navvā kul sipāh,
 "Daghā-hī daghā hai, daghā khwāb-ma-
 khwāh."
 Uthe bol yārāṇ ke: "Sunte ho, Shāh,
 "Yūh kyā kām hai, tūmana deo salāh,
 "Sipāhī na janoṇ ih, kul bāgh haiṇ,
 60 "Saff-i-jang meṇ ag taiṇ ik āg haiṇ,
 "Sakat kyā jo ko rū-ba-rū ho kharā,
 "Kharā ho, to chariyoṇ seṇ dege udā,
 "Yih ūh fauj hai, fauj-i-dushman-shikan,
 "Agar ho jama' Hind, agar sabh Dakhan,
 65 "Shujā'at taiṇ, gar zor-i-bāzū kareṇ,
 "Pahārāṇ achheṇ, to tarāzū kareṇ,
 "Kareṇ tal ūpar, mār talwār soṇ,
 "Be kul fauj ho ran ke sardār koṇ."
 Rahe Shāh tab, ho-ke andeshah-nāk;
 70 "Tūmhārā hai hāfiz wah zāt-i-pāk!
 "Būrā dil meṇ mat lenā is bāt-kā,
 "Bharosā nahīṇ ham koṇ is sāth kā;
 "Fath-hī-fath, pun badā mār hai!
 "Azīzāṇ! Tūmhārā khudā yār hai!"

Next he sent for astrologers, the stars were read;
 "Say what is this uproar, what this crowd,
 "Say how is the day, what is its star,
 "Who gains the victory, who is put to flight,
 "This day consult jointly and make your report,
 "Good or evil, unfold to me every detail."
 The astrologers said their words of flattery;
 When held they full knowledge in their hand?
 "Gifts will I shower on you, richly endow you,
 "Throw on your shoulders shawls, double and
 single."
 Spoke all the star-readers: "It is altogether well,
 "The stars in their courses have many throbings,
 "We verily believe that victory will be yours,
 "Crowned with victory you will soon return."
 He asked questions from certain recluses he had
 called;
 "You, too, must say in this what is your advice."
 Then said the mendicants: "Listen, your Honour,
 "To quit the city is devoid of all profit,
 "There is no noble who has an army;
 "What wisdom is there in such haste?
 "Untried your army and troops, all are raw
 soldiers,
 "Deception upon deception, deception in every
 case."
 Out spoke his friends: "You hear, my lord!
 "What sort of action is this that these men
 counsel?
 "These know not your fighters, every one a tiger,
 "In battle rank they rage as one great fire,
 "What force exists that dares to stand and face
 us,
 "If such appear, we will put it to flight with
 sticks.
 "Ours is such an army, an army of enemy-
 breakers,
 "Let Hind assemble, let the whole Dakhin come,
 "Then by our valour, wielding the strength of
 our right arm,
 "Should even mighty mountains weigh the scales,
 "They shall be turned upside down by our sword-
 blows,
 "With part of your army you will win the battle."
 Then said the ruler, full of anxiety:
 "Your protector is that Lord All-pure,
 "Be not displeased at this saying,
 "Confidence I have not in them,
 "Be the end victory or not, still it is a big fight,
 "Dear companions, God is your friend!"

- 75 Kahe sun-ke Nawāb main itnī bāt
Kih : "Marnā o jīwanā hai sab Rabb ke hāth,
"Jo bāzī dī, hamānā koṃ mil jāegā,
"Jī, e tak ūh danyā moṃ bachāega,
"Mūjhe 'ār-hī-'ār inkār hai,
80 "Kih taḥqīq marnā so yak bār hai !
"Karīngā jo kuchh mujh soṃ ho āwegā,
"Yihī nāṃw danyā moṃ rah jāegā."
Andeshah so kul dīl koṃ khālī kīyā,
Nikal meṃ kī begī, ūtāwalī kīyā,
85 Uṭhe beg begī soṃ ghar meṃ ga,e
Adab soṃ khare ho-ke mān so kahe
Kih : "Tum mā, main farzand hoṃ, lārkā,
"Baḍī mān kā aur baḍī piyār kā ;
"Sunō tum, kih Dillī bahū dūr hai,
90 "Hamārā ism jag meṃ mshbūr hai,
"Ḥukm ho, to jā bāhar derā karūṃ,
"Būrhānpūr[r] lag ek pherā karūṃ.
"Main potā hūṃ us Shāh yazdān kā,
"Hūṃ farzand Nūru-d-dīn 'Alī Khān kā
95 "Mūjhe baith rahnān badā nang hai,
"Agar āj Rustam sete jaṅg hai.
"Hasenge mujh dekh Quṭb-ul-Mulk,
"Dakhin meṃ kyā thā Nizām-ul-Mulk,"
"Yih sun-ke karenge ta'jjab Nawāb,
100 "Kih farzand 'Ālim 'Alī, kām-yāb,
"Darā jīū soṃ, ur nikal nā sakā,
"Shujā'at kā nāmūs kuchh nā rakhā.
"Dunyā moṃ do-bārā kuchh ānā nahīṃ,
"Bah danyā janam lag ṭhakānā nahīṃ,
105 "Agar hai haiyātī, to phir āwenge,
"Fatḥ ho, to mūkh ā-ke dikhlā denge;
"Apas dīl meṃ hamānā ūtāro na koī,
"Du'ā moṃ achhwant basāro na koī,
"Pakar hāth sompo Khudāwand ko,
110 "Raho 'aish, ārām, wa ānand soṃ."
Kahe mū neṃ : "Main kyūṃ razā deūṃ tūjhe,
"Dakhin meṃ tere bāj hī kon mūjhe,
"Khudā bāj ko tūjh koṃ sāthī nahīṃ,
"Mūjhe maḡlahat kuchho yih bhātī nahīṃ,
115 "Nanhā yā baḍā, ko tere sāth hai ?
"Tūṃ jātū hai laṛe, yah kyā bāt hai."
Ba jadām-jad mā koṃ razī kīyū,
Ba har ḥāl chalnē ke rukḡṣat kīyā,
Chhau suwārah ūs waqt Sayyad ke pās,
120 Sīpāhī o chelah o kull 'ām-o-khās,

Having listened the Nawāb resumed :
"Death and life lie all in the hand of God,
"What part he allots will fall to us,
"While in the world he will preserve us,
"I abhor disgrace or ignominy ;
"And of a truth, death comes only once !
"I will do whatever I am capable of,
"This renown will survive me in the world."
Thus he thrust out all anxiety from his heart,
Suddenly he issued forth in haste,
He rose and as quickly as he could went home,
Reverently he stood and to his mother spake :
"You are my mother, I am thy son, thy boy,
"I respect you as mother and you love me;
"Listen to me, Dillī is very far away,
"Our name is in the world renowned,
"If you permit, I will bring forth my tents,
"As far as Burhānpur I will journey.
"I am descended from that God-like Lord,
"I am the son of Nūr-ud-dīn 'Alī Khān.
"For me to sit idle is a great disgrace,
"Even if to-day the contest be against a Rustam :
"Looking at me Quṭb-ul-Mulk will scoff and say,
"What a mere nothing was Nizām-ul-Mulk in
the Dakhin."
"Hearing this affair the Nawāb will marvel,
"That his son, 'Ālim 'Alī, the fortunate,
"Trembled in his heart and could not come forth,
"His reputation for valour he could not maintain.
"Twice over we cannot enter the world,
"For life no reliance can be placed on this world :
"If destined to live I will return,
"If victorious, I will come to show my face ;
"Never in your heart look down on me,
"Never in your prayers forget or overlook me,
"Take me by the hand and confide me to the
Lord,
"May you live on in ease, comfort, and delight."
His mother said : "Why should I grant consent,
"For with me in the Dakhin who is there but
thee,
"Besides God whom is there to be your Helper ?
"This project is in no way agreeable to me,
"Young or old, whom have you to follow you,
"Yet you want to fight, what an idea is that ?"
With great effort he obtained his mother's
consent,
In one way or another got leave to depart,
State and retinue went with the Sayyad,
Soldiers and slaves, servants private and public,

Tawakkal kiyā, aur dil koñ dīth :

"Main Sayyad hūñ, ab kyā dikhāyūñ so pīth."

Bulāyā shītābī soñ diwān koñ,

Kahā: "Ab likho khaṭ Amīn Khān koñ:—

125 "Dakhin meñ tūmeñ mard ho-ke mashhūr,

"Shītābī haman pās ānā garūr,

"Rafaqat soñ mil, jān-fighānī karo,

"Jald ā, o aur mihrbānī karo,

"Kih yah waqt hai waqt-i-kām kā,

130 "Tūmhārī shujā'at nang-o-nām kā;

"Jo kūchh tūm kahoge, so hogā qabūl,

"Hai shāhid hamārā Khudā aur Rasūl."

Chalneñ lage jā-ba-jā thār thār,

Rawānah kī, e qāsidāñ ek bār,

135 Nigabdasht kā khūb garmī kiyā,

Jah ne jo māngā, so chah ūsko diyā,

Kaho jāe derā deo maidān meñ,

Nazik Mahamdi Bāgh, unchāñ meñ.

Athī bārwin (12) māt-i-Rajab kā chānd,

140 Chālā ghar tañ, ghamsher o baktar koñ bāndh:

Waise hon ūh sardār sārīyāñ mane

Kih jyon chānd hai kul satārīyāñ mane;

Naqāre, damāme, bajāte chale,

Būpī, asharfiyāñ le luṭāwe chale,

145 Kiyā jāe-ke dere meñ chār-ek maqām,

Kare fiqr, tadbīr har subh-o-shām;

Jahāñ lag the sardār, jodhāñ, bali,

Bulā-kar kahā Sayyad 'Alim 'Ali

Kih: "Tum ho sipāhī, main sardār hūñ,

150 "Bhalā yā hūrā sābh kā gham-khor rahūñ,

"Shahr chhor derā main bāhar kiyā,

"Tawakkal khudā-i-muṭaffā par kiyā,

"Suno bāt, ik dil ke kahtā hūñ main,

"Kih jis fikr meñ gharq rahtā hūñ main.

155 "Kahāñ Hind, Bārḥā, kahāñ hai Dakhāñ,

"Kahāñ khwesh, qurbat, kahāñ hai haman,

"Kahāñ soñ, kahāñ soñ, kidhar soñ, kahāñ,

"Kih Bārhe soñ qismat le ā, I yahāñ,

"Azizāñ! Main 'Alim 'Ali Khān hūñ,

160 "Jawānī meñ sakaliyāñ meñ ba-jāñ hūñ;

"Jawānī jo kūchh dil meñ gham nahīñ mūjhe,

"Marāñ aur jīñ kā wahm nahīñ mūjhe,

"Mare jīñ koñ rahmat o ghyābāgh hai,

"Jawānī meñ jīwāñ baḍī ās hai,

Placing his hope on God, he braced his heart:

"I am a Sayyad, how can I turn my back."

In haste he sent for his chief man,

Said: "Write at once this letter to Amīn Khān:—

"In the Dakhin you are a man well-famed,

"Without fail you must hasten here to me,

"Come quickly and do me the favour

"To join my force, and spend your life-blood,

"Verily this time is the time for deeds,

"For your valour, your name and fame,

"Whatever you demand shall be agreed to,

"Be witness our God and his Prophet."

Then began to set out strings of men to all parts,

Message-carriers were despatched forthwith,

Recruiting went on most busily,

Whatever anyone asked that he got,

Was told to go and put up his tent in the plain

Close to Muhamdi Bāgh, on the high ground.

It was the twelfth of the moon Rajab,

He left his house clad in mail, his sword on hip;

Such amidst the throng was that leader

As is the moon amongst the stars.

Beating kettledrums, large and small, he marched,

Scattering gold and silver coin as he passed.

He went and rested some days in his tents,

Planned and consulted from morn to night.

Wherever there were leaders, brave and bold,

They were sent for, and told by Sayyad 'Alim 'Ali

Thus: "You are soldiers, I am the general,

"Let good or ill befall, I share the cares of all;

"I have quitted the city and put up my tents,

"Relying upon God and His Chosen One.

"Listen while I tell what is in my mind,

"The matter which keeps me plunged in thought.

"Where are Hind and the Bārḥah? Far from

the Dakhin!

"Where are my friends and relations, so far from me!

"O where and O where, whither gone, and where!

"For the Fates have brought me from Bārḥah here.

"Friends! I am 'Alim 'Ali Khān,

"In the morn of youth, with all my powers.

"For the joys of youth in my heart I grieve not,

"As to life and death, I have no illusions,

"The soul after death receives mercy and praise,

"The young man has great longing for life,

- 165 "Jiwan aur bhalā jab lakṇ lāj hai
 "Wagarnah to kyā takht aur tāj hai,
 "Jab lak hawāe yārān mere sāth moṇ,
 "Achho waqt-i-jang sabh meri bāt moṇ,
 "Jidhar ma'rkā ā paṛgā nadān,
 170 "Ūdhar ek dil ho-ke karnā nadān.
 "Karo, mard ho, dil moṇ mardāngī,
 "Hai maḡhūr mardoṇ ki mardāngī.
 "Hai Bārhe kā kul Hind moṇ neknām,
 "Main mangtā niyat, ābrū, sabh-o-shām,
 175 "Jo āyā hai so phir ūh mar jāegā,
 "Nah kūchh sāth liyāyā, nah le-jāegā."

Khabar soṇ maqāmāṇ ki, mā mīhrbān
 Taraphne lagā jīū aur sabh prān,
 Ga'i shahr ki bāharī, jā milt,

- 180 Napaṭ ārzū soṇ lagāyā gali.
 Kahā māṇ koṇ : "Mā ! Tūm se kahā pāūngā,
 "Agar jag moṇ, so bāz phir āūngā,
 "Abas phir ke taqdī' kyūn āi tūmeṇ,
 "Phir āte haiṇ begī shībābi hamen,
 185 "Na kūchh dil moṇ tum be-qarārī karo,
 "Shahr ki taraf ab suwārī karo."
 Kahī mā : "Nahīn chain dil moṇ mūjhe,
 "Main dekhūngī kis des, phir-kar, tūjhe,
 "Karūn kyā, ṣabr mūjh soṇ ātā nahīn,
 190 "Tere pāchhah kūchh mūjh koṇ bhātā nahīn.
 "Ik ik din mūjhe hai ik ik sāl kā,
 "Khudā koṇ khabar hai meri hāl kā,
 "Naḡiboṇ moṇ kyā hai, nahīn kūchh khabar,
 "Yah jīwanā ho rahe mūjhe jyūn zahr."
 195 Būlā-kar sa-o-pā baḡe tol ke,
 Zar zar-kashī, ṣāf, bahū mol ke,
 Būlā, Luṭf Khān, 'Umr Khān koṇ,
 Mirzā Mahamdī aur Maṭhī Khān koṇ,
 Jabāṇ lak the sardārāte, rū-shinās,
 200 Būlā bhej-kar sabh ke, āeṇ pās,
 Sar-o-pās har yak koṇ dene lagi,
 Bajā liyā-ke taslim, lene lage.
 Kahā ba'd-az-ān : "Sabh koṇ sūgand hai
 "Kih 'Alim 'Alī mūjh koṇ dīlband hai,
 205 "Namak ki shart hī bajā liyāoge,
 "To dil-sāchah phir martabā pāyoge.

"Khudā tūm sabhoṇ koṇ nigahbān hai,
 "Baḡe bast dunyā moṇ imān hai,"

Kīe 'ahd sārīyān ne, sūgand khā,

- 210 Kih : "Mālik dil kā hamārā Khudā,
 "Jab lak jīw tau moṇ hai, o dam moṇ dam,
 "Rajhenge ḡaṣūrī moṇ ṣābit-qadam,

"To live on is better while reputation lasts,
 "That gone, what matters throne and crown !
 "So long as the hearts of my friends are mine,
 "In war-time all remain loyal to me,
 "Finally wherever the strife and battle fall,
 "There to the end with one heart they still strive.
 "Be men and in your hearts resolve to be brave,
 "By manly virtue a man gains renown.
 "In all Hind is Bārhaḡ well esteemed,
 "I pray for strength and honour all day long,
 "All mortals here below are doomed to death,
 "We brought nothing here and shall carry
 nothing away."

Hearing of these halts, his gracious mother
 Became restless in her heart and soul,
 She issued from the city, paid him a visit,
 With exceeding love took him to her arms.
 He said to his mother : "Mother, what can I say,
 "If still in this world, I will certainly return,
 "Why uselessly do you again worry yourself,
 "I shall come back at once, without delay,
 "Allow no anxiety to enter your heart,
 "Mount and return towards the city."
 Spoke his mother : "My heart is not at rest,
 "What land shall I ever see, where you return,
 "What shall I do, I cannot acquire patience,
 "With you absent, there can be no pleasure for me.
 "Each single day to me is like a year,
 "God alone can know what is in my heart,
 "What may be my lot I know not at all,
 "This life I lead is to me like poison."
 She called for robes of great weight,
 Of gold brocade, lovely, of great price,
 She sent for Luṭf Khān and 'Umr Khān,
 For Mirzā Mahamdī and for Maṭhī Khān,
 For so many of the chiefs as she knew by name.
 Men were sent for them, they drew near,
 She began to give robes to each one,
 They made their obeisance and accepted them.
 After that she said : "All must swear
 "That to 'Alim 'Alī Khān they are loyal,
 "They will behave as duty to their salt demands,
 "Thus receiving at the last the reward of the
 true-hearted.

"May God keep you all under His gracious eye,
 "Good faith is a great thing in the world."
 All pledged themselves, they swore an oath ;
 "The ruler of our hearts is God,
 "While life remains, while breathing breath,
 "We will stand firm-footed before our lord,

" Qadam son qadam, hāth son hāth jor,
 " Karege jablak hogī dushman kī mor;
 215 " Hamen dil son qurbān hai, aur nigār.

" Rakho dil mon, Sāhib! tūmen bar-qarār."
 Kahi: " Aftā! Tum namak-khwār ho,
 " Wafādār, be-shak, o dildār ho."
 Widā' ho prān, mā koṅ kinā salām,
 220 Kiyā kūch begī son, bas wa as-salām!
 Chale, aur ga'e beg ūtar ghāt son,
 Le-kar lāo-lashkar wa sabh bhānt son.
 Karl fauj apne ke kitne suwār,
 Jo dekhā to maujūd chālis hazār;
 225 The itne shutar-nāl, gaj-nāl, bān,

Sūne koī shalq, to jāwe prān,
 Rahekle o topeṅ thāp itne sanghāt,
 Kahi, e kyā? Nahīn koī kahoi kī bāt!
 Nizāmu-l-mulk par ho wājib, yaqīn
 230 Kih ab jang sābit hai, be kāf-o-shin,
 Kahāyā salām aur kahāyā du'ā
 Kih: " Larnā mere sāth kuchho nahīn naf'ā,
 " Kiyā hai Dakhin kā mujhe Sūbahdār,
 " Larāī kā mat deo mujh son bichār,
 235 " Chale jāo sīdhi Hindūstān koṅ,
 " Chachā pas apne so amān son.
 " Main larke se kyā tegh-bāzī karūn,
 " Bhalā hai jo kuch kār-sāzī karūn."
 Sūnā jab khabar Sayyad-i-'ālā-janāb
 240 Kahā: " Dehū begī son is kā juwāb."
 " 'Nanhe 'umr hūn, pun main larke nahīn,
 " 'Kisi bāt kā dil mon dharke nahīn,
 " 'Main Sayyad hūn, tum dil mon kyā liyāe
 ho?
 " 'Mere mulk par chal-ke, kyūn ā'e ho?
 245 " 'Mujhe 'ār-hī-'ār hai, 'ār-i-nang;
 " 'Chale āo begī, nah liyāo darang.
 " 'Agar lākh dar lākh faujān milēn,
 " 'Kih jin ke dhamak son tabq thalēn,
 " 'Main ū shakhs hūn, jo talan-hār nāh,
 250 " 'Shujā'at meri kis pai iḡhār nāh?
 " 'Agar hai haiyātī to gham nahīn mujhe,
 " 'Agar maut hai, to wahm nahīn mujhe,
 " 'Jo māryā hai qismat mon meri qalam,
 " 'Nah howegā siyādah, nah howegā kam,
 255 " 'Main rāst-i-Risā par hūn jo kūchh rāzā,
 " 'Wahl khūb hai, jo karegā Khudā.'"
 Ba-har-hāl ūh fauj ūtari nadi,
 Pakaṛ dil manī, dund da'wā badī;

" Foot set to foot, hand joining hand,
 " We stand fast so long as the enemy resists;
 " Heartily we offer ourselves a sacrifice and
 offering,
 " You may, lady, set your heart at rest."
 She replied: " Bravo! you are true salt-eaters,
 " Faithful, without a doubt, and great of heart."
 The loved one said farewell, he saluted his mother,
 He marched at once, enough and there's an end.
 He moved on and quickly descended the pass,
 Took army and baggage, all kinds of soldiers.
 He had in his army crowds of horsemen,
 When counted he found them forty thousand;
 There were so many camel-pieces, elephant guns,
 rockets,
 That hearing them discharged one's breath went,
 Of field guns, siege guns, such a collection,
 What shall we say? There is nothing can be said.
 Nizām-ul-Mulk seeing certainly of a truth
 That war was now on foot, without any doubt,
 Sent his compliments and a prayer,
 Saying: " To fight with me is devoid of profit,
 " They have made me governor of the Dakhin,
 " Think not of fighting with me,
 " Make your way straight to Hindūstān,
 " Join your uncle and be in safety.
 " How shall I use sword-play with a child,
 " It will be well whatever pretext I make."
 When the exalted Sayyad heard this message
 He said: " Send forthwith this my answer:
 " 'Young in age I am, but not a boy,
 " 'Nothing can make my heart to flutter,
 " 'I am a Sayyad, what idea have you taken up,
 " 'Into my country why have you advanced?
 " 'I feel the ignominy, the slur on my reputation,
 " 'Come on at once, make no lingering.
 " 'If thousands on thousands of soldiers advance,
 " 'Whose tread makes the heavenly vault to shift,
 " 'I am that man who neither shirks nor flinches,
 " 'Who is there to whom my valour is not evident.
 " 'If life survives, I sorrow not,
 " 'If it be death, I treasure no illusion,
 " 'To what the pen has recorded as my fate
 " 'Nothing can be added, from it nothing taken
 " 'I am pleased and contented, whatever His
 pleasure,
 " 'That thing is best which God provides.'"
 In short that army crossed the river,
 Cherishing in its heart great expectations;

- Idhar son waho lashkar, udhar son uh fauj,
 260 Pare ā nasik, jyūn samudar ki mauj.
 Napaṭ dāb ābi lage tab abbāl,
 Barsne lagā rāt-din barghāl,
 Katak dhyūns guzarī thī is bāt koṇ.
 Diyā ko khābar ā ūhi rat koṇ :
 265 "Subh jag howegā, yūn hai khābar,
 "Yihī zikr lashkar moṇ hai ghar-ba-ghar."

Kahā : "Jūnth hai, yah nahīn, kyā i'tibār,

- "Hamāre haij jāsūs bhī boshyār."
 Na jānā kih jāsūs, qāsid, tamām,
 270 Ho rahe haij Nizāmu-l-mulk ke ghulām.
 Thī tārikh chhauṇ jo Shawwāl ki,
 Badi naḥas-tar, sakht janjāl ki,
 Athā roz itwār kā, nā-ba-kār,
 Gharī thī wah Mirrikh ki, ashak-bār,
 275 Thī sāt at ūh sāt mane khūn-fishān,

- Satārā Zuhāl kā thā wuh be-gumān.
 Kharā ho kiyā 'arṣ; "Ai Dastgir !
 "Nizāmu-l-mulk fauj le-ke kasir;
 "Mangā yū kamānā mere hāth kiyān.
 280 "Jo haij rāt-din wah mere sāth kiyān."

Subh koṇ ūthā Sayyad-i-neknām,
 Bhatā, aur laga bolne khūsh-kalām :

- "Naqārā de ātā hai, ai Qiblah-gāh !
 "Hukm ho, to tayār howe sipāh ?"
 285 "Mangā yū sipar āhanī, phul-dār,
 "Sawāri moṇ ājhan moṇ jo ham so piyār."
 Kabe : "Kyā khair hai āj, dostān !"
 Ūthā bol begī son Ghiyās Khān :
 "Auh 'Alim 'Alī ! Sayyad, mihrbān !
 290 "Shujā'at moṇ zāhir jis kā nishān !
 "Shitābī merā khol torā mangāo,
 "Mere khās ghore koṇ pākhar chadhāo,
 "Hāthī koṇ sarī jākah sar son bandhāo,
 "Jo haudaj hai jangl, qulābā lagāo,
 295 "Lagā bar-kash ūs koṇ khūbi khare,
 "Hū, ā waqt ab, phir darrang mat karo."
 Kiyā jā ghul, aur ūthā, do hāth,
 Kahā : "Yā nabi, sarware-be-kāināt !
 "Khābar jag kā āj hai thār thār,
 300 "Yahi ghul hai sabb fauj moṇ ashkār.
 Sūnā soch baktar mangayā shitāb,

Hotā mustā'd, jān-i-ālā-janāb.

Here was that camp, there was that army,
 They drew near like the waves of the ocean.
 It grew exceedingly overcast, rain threatened,
 The rainy season began, it rained day and night,
 The army endured discomfort from this cause.
 A man came that night and reported :

"To-morrow the fight will be, that is the rumour,
 "This is spoken of in the camp from place to place."

He said : "It is a lie, it cannot be, can this be trusted,

"Are not my spies, too, on the alert ?"

He knew not that all his spies and messengers
 Were entirely slaves of Nizām-ul-Mulk.

It was on the sixth of the month Shawwāl,
 A day most unfortunate, full of perplexity,
 It was a Sunday, most unpropitious,
 The hour was that of Mars, fraught with tears,
 The moment chosen was one devoted to blood-shedding ;

The star was Saturn without a doubt.

He stood up and prayed : "O Protector !

"Nizām-ul-Mulk comes with a huge army !

"Send for the bow that was put in my hand,

"The one which was given to keep day and night."

At day-break rose the well-famed Sayyad,

In pleasing manner he began to speak persuasively :

"He comes beating his drums, O venerated One !

"If orders issue, the army will prepare,

"Bring my shield, of iron, engraved with flowers,

"Let those who love me ride with me this day."

He added : "How fortunate is this day, O friends."

Up at once and cried out Ghiyās Khān :

"O 'Alim 'Alī ! the lord, the gracious !

"Whose valorous standard is far renowned :

"Let them bring at once my helm and gun,

"Array my choicest steed in armour,

"Go fix on my elephant's head his circlet,

"Get out my war canopy, bind it to its staples,

"See that its surcingle is well and tightly drawn,

"Now is the time, delay not any longer."

He cried aloud, he raised both hands on high,

He said : "O prophet, chief of created beings,

"Signs of battle on this day abound,

"This outcry is clear all through the army."

His mind made up, at once he called for his hauberk,

He becomes eager of soul, does the exalted lord.

- So jāsūs itne moṇ āyā shitāb,
Pastne moṇ dūbā j̄yūṇ gharq āb.
305 Kahā : "Liyāo jo kuchh merā sāj hai,
" Mūjhe kām dushman sete āj hai,
" Kaṭāre wa nezā wa shamsher liyāo,
" Jo tarkash hai khāṣā, so begī mangāo,
" Tuman koṇ merī lāj ki lāj hai,
310 " Madad ko nah, tum bin, mūjhe āj hai."
Kamr bāndh hatyār, is koṇ sambhāl,

Lagāyo chhine mūkh koṇ, le le rūmāl.
Kahā : " Liyā, o huqqa, do dam zaṇq hai,
" Kih huqqa soṇ hamānā ke bhi shauq hai."
315 Khabardār itne moṇ liyāyā khabar
Kih : " Pāiṭhe ho gayā, Sayyad, sher-i-nar,

" Nizām-ul-mulk fauj koṇ sāth le,
" Tūmhāre amīro kā dīl hāth le,
" Kiyā tūm ūpar fauj-bandī soṇ chāl.
320 " Fath deo tūmanā koṇ ab Zul-jalāl !
" Agarchah nahīn kisi koṇ kuchh 'ilm-i-
ghaib,
" Sabhoṇ koṇ to dastāhī bi, kul qarīb."
Sūnā soch jāsūs jharkā sunā,
Huqqa sāmnē thā, so sarkā sanā ;
325 Kahā : " Log mere wafā-dār hai,
" Main chākar nahīn jāntā, yār hai,
" Sabhe ek jiwaṇ, wa sabh ek tan,
" Shujā'at ke haiṇ khān ke sabh ratn,
" We dāne haiṇ tasbīḥ ke, main imām,
330 " Rachhoṇ ek dhāge moṇ hil-mil madām,
" Mere sāth kyūṇkar judāī karen,
" Mūjhe chhoḍ, kyūn rū-siyāhī karen,
" Lūṭāyā hūn in par main sabh mulk, māl,

" Nizām-ul-mulk kyā karegā nihāl ? "
335 Ūṭhā bol sabh soṇ : " Suwārī karo !
" Dunyā sahal hai, dīl soṇ yārī karo,

" Hausā mat karo, xindagī hai sahal,
" Sharāfat moṇ mat liyā, o apne khalāl,
" Khudā ke karm kā hūn umedwār,
340 " Rahkegā mere lāj Parwardigār.
" Main Sayyad hūn, ūh mūjh par chal ā, o
haiṇ,
" Mere ghar pai nā-ḥaqq balā liyā, o haiṇ,
" Khudā ke hai inṣāf, mānoṇ tūmeṇ,
" Fath hai, to hamārā yih jānoṇ tūmeṇ."

Then came a spy with hurrying feet,
Pouring with sweat as if plunged in water.
He said : " Bring me all my harness,
" This day my business is with the enemy,
" Bring dagger and lance and scimitar,
" That special quiver bring to me quickly,
" On you alone depend my name and fame,
" No aider exists for me to-day unless it be you."
Round his waist he bound his weapons, and
adjusted them,
Applied chhine to his face, using his handkerchief.
He said : " Bring a pipe, I long for a whiff or two,
" For I, too, am fond of smoking my pipe."
Then a scout brought in a report,
Saying : " O Sayyad ! that male tiger has
appeared,
" Nizām-ul-Mulk has brought with him his army,
" He has taken hold of your leader's hearts,
" He has declared hostilities against you.
" May the All Powerful now give you the victory !
" Although none can read the hidden record,

" Yet for all of us God's hand is very near."
He listened and reflecting rebuked the scout,
His pipe lay before him, he took a pull,
And said : " My men are quite to be trusted,
" I look on them not as servants but as friends,
" We are all one soul, all one body,
" All of them jewels from the mine of Bravery,
" They are grains of a chaplet, I am the priest,
" Strung on one thread they are ever united,
" Wherefore should they abandon me,
" By throwing me over why blacken their faces ?
" I have showered on them gifts of goods and
land,
" How further can Nizām-ul-Mulk enrich them."
He up and spoke to all : " To horse !
" The world is a slight thing, stand by me heart
and soul,
" Play not the buffoon, living is an easy matter,
" Bring no stain on your high descent,
" On the mercy of God I place my reliance,
" The Provider will keep aloft my fame.
" I am a Sayyad, he has attacked me,

" On my house unjustly bringing calamity !
" There is a God of Justice, as you will find out,
" If I win the day all this you will know."

(To be continued.)

NOTES ON THE INDO-SCYTHIANS.

BY SYLVAIN LEVI.

Extracted and rendered into English, with the author's permission, from the "Journal Asiatique," July-Dec., 1896, pp. 444 to 484, and Jan.-June, 1897, pp. 5 to 42, by W. R. PHILIPPS.

(Concluded from Vol. XXXII. p. 426.)

PART III. — SAINT THOMAS, GONDOPHARES, AND MAZDEO.

WHAT follows here is practically a translation of the whole of the third part of M. Lévi's Notes, in the *Journal Asiatique*, Jan.-June, 1897, pp. 27 to 42, slightly condensed in some places. As in Parts I. and II., the figures in thick type in square brackets mark the pages of the original.

M. Lévi first [27] reminds us how the name of the king Gondophares, which had been perpetuated through the Christian middle ages, as shewn by the Golden Legend, was deciphered upon an ancient coin from Gandhâra (see Cunningham's paper, *Coins of Indian Buddhist Satraps with Greek Inscriptions*, in *J. A. S. Bengal*, 23, 1854, p. 679 ff.). Thus, the legend and the coins form a bond between Indian and Christian antiquities. It is a curious fact that the tradition regarding the apostle St. Thomas should have preserved for eighteen centuries the remembrance of a comparatively obscure king, ruling about the confines of India, Iran, and Scythia. We ought, therefore, to examine the details of the legend, and see if we can get any real history out of it.

M. Lévi then refers to Gutschmid's famous paper on the subject (Von Gutschmid, *Die Königs-namen in den Apocryphen Apostelgeschichten*, in *Rheinisches Museum für Philologie*, 1864, 161-183 and 380-401; *Kleine Schriften*, II. 332-394).

He points out that though Gutschmid discussed the question in a masterly way, his ingenious sagacity was exercised on insufficient materials, and his conclusions have since been shaken. We have now much additional valuable material, coins and inscriptions; moreover, the literature of St. Thomas and of the apocryphal Acts has been increased with new texts and important works.

Among these works M. Lévi cites the following :¹ —

Max. Bonnet, *Supplementum Codicis Apocryphi, I., Acta Thomæ*, Lipsiæ, 1883. — Wright, *Apocryphal Acts of the Apostles from Syrian MSS.* (II. English translation, London, 1871). — Malan, *Certamen Apostolorum, Conflicts of the holy Apostles translated* . . . London, 1871. — K. Schröter, *Gedicht des Jakob von Sarug über den Palast den der Apostel Thomas in Indien baute*, in *Z. D. M. G.* XXV. 1871, 321-377. — R. A. Lipsius, *Die Apokryphen Apostelgeschichten und Apostellegenden*, 3 Vols., Braunschweig, 1883-4.

M. Lévi mentions an Armenian version of the apocryphal Acts of Thomas, not yet printed. M. Carrière called his attention to the manuscript in the Berlin Library, and M. Frédéric Macler noted all the proper names for him, and translated several passages. The text appears to be identical with the Syriac, edited by Wright.

Having thus specified the new material available, M. Lévi proceeds to a new examination of the question : —

[28] Two apostles, Thomas and Bartholomew, are said to have evangelised India. But if we compare the legendary accounts of the two saints, a marked difference appears. The legend of St. Bartholomew is founded upon vague and impersonal notions. The Greek compiler of the *Martyrdom of Bartholomew*, copied slavishly by Abdias, begins with a pedantic display of false science :

¹ [For names of some additional works, see articles in *Indian Antiquary*, 1903, pp. 1 ff. and 145 ff., entitled *The Connection of St. Thomas the Apostle with India*. We may also point out that Malan's book is now out of date, being quite superseded by E. A. W. Budge, *The Contendings of the Apostles*, 2 Vols.; London, 1901. — W. B. P.]

"Historiographers say that India is divided into three parts : the first, according to them reaches to "Ethiopia; the second to Media; the third is at the end of the country; on one side it extends to "the region of darkness, and on the other to the Ocean. It was to this India that Bartholomew "went" (*Acta Apostolorum apocrypha*, ed. Tischendorf, Lipsiae, 1851, p. 243; *Abdies Apostolicae historiae*, ed. Fabricius, Hambourg, 1719, p. 669). The other notions are of the same character; the scene of the Acts is so indefinite, that king Polymius, who put the apostle to death, has been taken for Polemon II., king of Pontus, and also for Pulumäyi, king of the Dekkan (*Lipsius, op. cit.*, II. 2, 71; E. Kuhn, *Barlaam und Joasaph*, München, 1893, *Abhand. d. k. bayer. Akad. d. Wiss.*, XX. bd., I. abth., p. 85). [29] The route of Thomas is, on the contrary, clear and logical. The king Goundaphoros has directed the merchant Abbanēs, who was returning to Syria, to get him a skilful architect, for he wishes to have a magnificent palace built. Christ appears to Abbanēs and sells Thomas to him as one of his slaves. The apostle, who hesitated to go so far, does not dare to resist his divine master, and embarks with Abbanēs. A good voyage brings them to the port of Andrapolis, capital of a kingdom. They disembark, continue their journey by land through the towns of India, and arrive at last at the residence of Goundaphoros. Then, at Christ's command, the apostle directs himself towards the east, and penetrates into Further India (*Inde Ulérieure*).² He arrives at the capital of the king Misdeos, and suffers martyrdom upon a hill near the town. A Christian piously steals away the body of the saint and takes his relics to Mesopotamia.

Abbanēs and his companion follow the regular trade route between the coast of Syria and the Pañjāb. Pliny (*Hist. natur.* 6, 26, 103) and the author of the Periplus, who wrote soon after St. Thomas, trace in detail the same route. Passengers and cargoes which came to Alexandria from Mediterranean ports, were reshipped on the Red Sea; thence direct services and coasting lines went from Myos Hormos and from Berenikē, touched at Cape Syagros [30] in Arabia, and from this point reached, with or without stoppages (*escales*), the trading places (*comptoirs*) of the mouths of the Indus, Patala or Barbarikon; "the ships remain there at anchor; the goods go up the river to "the capital, Minnagar, situated quite inland, the metropolis of Scythia, governed by Parthians, "who, troubled by internal dissensions, are constantly driving each other out" (*Periplus mar. Erythr.* 38-39). If the country was not safe, it was better to prolong the voyage to Barygaza, on the coast of Ariakē, at the mouth of the Narmadā; a great caravan route led from this port, by Ozēnē (Ujjayani), to Proklais (Pushkalavati) on the borders of Bactriana (*Perip. mar. Erythr.* 48).³

[31] Carried away by the spirit of system, Gutschmid thought he must amend the apostle's route. So he makes Andrapolis, the city where St. Thomas disembarked, a town of the Andhras; thus locating it on the Konkan coast, where the Andhra-Sātakarpi dynasty ruled in the first century of our era. Then he makes the travellers take their course thence towards the north and

² In connection with his rendering of *India superior* by *Inde Ulérieure*, Further India, M. Lévi has here added a note as follows: -- I have found exactly the same expression in a passage of Ammianus Marcellinus (XXXIII., 6, 32 *seq.*): Zoroaster and Hydaspes, the father of Darius, developed magic; the latter of them "cum superioris Indiae secreta penetraret, ad nemorosam quandam venerat solitudinem cujus tranquillia silentiis praecelsa Braconum ingenia potantur." It is plain that *superior India* means here the most remote part of India. We may compare the expressions *Germania superior*, *Maesia superior*, in which the word *superior* marks the province situated furthest up in going up the course of a river. In the same way, *India superior* should designate the upper basin of the Indus (of course, in India); in opposition to the lower course of the river, where there were *India citerior* with *prima Indiae civitas*, and *India ulterior* with the kingdom of Gudnagar.

³ The tradition of the Christians of Malabar, the Christians of St. Thomas as they are called, apparently invalidates the data of the Acts. According to their tradition, the apostle came in 52 A. D. from Socotra to the island of Malankara, near Cranganor (Malabar), and founded the seven communities of Cranganur, Palur, North Parur, South Pallipuram, Naranam, Nellakkul and Quilon; having gone thence to Mailapur (suburb of Madras) in Coromandel, he converted the king Sagan; a brahman put him to death with a thrust from a lance on a neighbouring mount. The body of the Saint was transported to Edessa, as in the other legend. But the antiquity of this legend has still to be proved; it does not rest upon any positive document. Most historians, including Lipsius, reject it. The precision of the Acts contrasts with this colourless story; the former contain the name of a true contemporary, forgotten by history; the latter borrows from local fable a dynastic name which symbolises the past. Paulinus a S. Bartholomæo saw in Sagan the Saragapes of the Periplus, a Sātakarpi king, and in particular Sālivāhana the Sātakarpi; as a chronological indication, Sagan-Sālivāhana has as much value as the Vikramāditya of the tales.

west to the kingdom of the Iranian Masdeos, otherwise Mazda. This amended route is absurd; in order to go from Syria to the Parthians, it was unnecessary to make a détour by the Dekkan. Gutschmid, having thus gratuitously introduced absurdity into the narrative, proceeds to impute it to the compiler of the Acts, and makes it his text in order to prove what he thinks is the true origin of the story. He decides accordingly that the author had clumsily borrowed the legend of a Buddhist missionary, perhaps Nāgārjuna, who went from the Dekkan to preach to the Yavanas and Pahlavas. Then he makes all the details support his hypothesis: the frequent appearances of Christ (christophanies) are apparitions of the Buddha; the healing power of the relics is a Buddhist superstition; the miracles of Thomas correspond to the supernatural powers of the arhat; the demons driven out by the sign of the cross are only rākshasas ill disguised; finally, the lion which tears to pieces and kills the impious attendant is the unintelligent realisation of a consecrated name: Sakyasimha, the lion of the Sakyas!

Gutschmid's ingenious structure rests on disputable and false data. [32] His geographical interpretation, founded on the name Andrapolis, is upset by the Syriac and Armenian; the former writes Sndrūk, the latter Sndrak; in the Greek the initial sibilant may have dropped, as, for instance, in Andrakottos, a form used concurrently with Sandrakottos. Thus the Andhras, the Dekkan, and Nāgārjuna would all be struck out at once. However, let us even suppose the name Andrapolis to be correct, and Gutschmid's location right. But then how about the route? The Periplus marks out the way from the ports of Gujarāt to Kābul as *viā* Ujjayinī. But, in order to bring the apostle to the Parthians, Gutschmid is obliged to flatly contradict the unanimous testimony of the texts. In the Acts, the apostle on quitting the kingdom of Gondophares directs his course towards the east; in the *Passio*, he takes his way to Further India (Inde Ulérieure). The Ethiopian version, which represents an autonomous form of the tradition, also conducts St. Thomas to the east after the conversion of Gondophares; in that version the capital of the king Mastius (Misdeos) is called Quantaria, a name which suggests Gandhāra, occupied by Sakas, Kushanas and Parthians at different times. Another tradition, foreign to the Acts, but constant among the Greek fathers from the 5th century, gives the name Kalamīnē to the town where St. Thomas suffered martyrdom. As to this name, Gutschmid calls attention to a village Kalama upon the coast of Gedrosia, opposite the island of Karbinē or Karmina; the name perhaps conceals, in a distorted form, the [33] town of Min, Minnagara, metropolis of Indo-Scythia.⁴

An exact knowledge of India appears in the episodes and details of the Acts. On disembarking at Sndrūk-Andrapolis, Thomas is obliged to take part in a feast; he there sings a mystical hymn in his mother-tongue. In the multitude which surrounds him, only one person understands him; she is only a flute player, like Thomas, a native of Palestine (Ἑβραία); the king of the country had engaged her to enliven the assembled guests with her music. This accidental meeting is not so removed from probability as to be surprising. According to Strabo (ed. Müller-Didot, 82, 18), young female musicians of western origin were articles of import certain to please in India;⁵ professionally they were not distinguished from "the young well-made girls intended for debauchery," whom the Greek merchants offered together with musical instruments to the kings of the ports of Gujarāt (*Perip. mar. Erythr.*, § 49; the term *μουσικά*, which reappears in this passage, and is generally translated "musical instruments," recalls at once the *μουσικὰ παιδικία* of Strabo).

⁴ The town of Gondophares has no name given to it except in the *Passio*, the manuscripts of which call it Eliforum, Yroforum, Hienforum, Inforum, Hierapolis. — [What is here briefly called the *Passio* is the second of the two Latin versions of the Acts of St. Thomas printed by Max Bonnet, *op. cit.* Its heading is *Passio Sancti Thomae Apostoli*. The other version is headed *De Miraculis Beati Thomae Apostoli*. — W. R. P.]

⁵ M. Lévi has here added a note as follows: — This occasion is a suitable one for drawing attention to a new illustration, as unexpected as it is striking, of the liking which the wealthy Indians had for young people of the west. The 3rd fasciculus of the Oxyrhynchus Papyri, edited by Messrs. Grenfell and Hart (London, 1903), contains a fragment of a Greek farce, played in Egypt, which has its scene laid in India, and has for its topic the adventures of a young Greek, Charition, who finds himself in the power of an Indian king. By its importance for the history of the Indian theatre, this fragment calls for special study.

The forerunner of Columbus, Eudoxus of Cyzicus [about 130 B. C.], on setting out from Gades to go to India, shipped as cargo *μουσικὰ παιδασκάρια καὶ ἰατροὺς καὶ ἄλλους τεχνίτας*.

The wild asses, which came of their own accord to be harnessed to the apostle's chariot [34] and drew him to the town of Misdeos, are in India found only upon the borders of the Indus, where Gondophares and his neighbour reigned (cf. Hunter, *Imperial Gazetteer of India*, Vol. 14, Index, s. v. *Asses*, *Wild*).

We also find that monuments agree with nature and with the texts in attesting the accuracy of the narrator: the ruins of Gandhāra, recovered from the dust of ages after a long period of oblivion, still bear the indisputable stamp of the Greek artists, who came, like the hero of the Acts, "to fashion columns (stelae) in stone, and also temples and royal residences." Did that unknown sculptor also dream of heavenly palaces, who cut upon a Buddhist pillar the image of the Good Shepherd, such as it is seen in the catacombs at Rome (Cole, *Græco-Buddhist sculptures from Yusaftai*, 1885; cf. Grünwedel, *Buddhistische Kunst in Indien*, Berlin, 1893; Foucher, *Les scènes figurées de la légende du Bouddha*, in *Bibliothèque de l'École des hautes-études, sciences religieuses*, t. 7, 1896).

The Acts and connected literature do not include all the current traditions regarding the voyage of St. Thomas to the Indies; other legends, equally founded upon exact information, were also in circulation. The apocryphal writing, *De Transitu Mariæ*, which is considered one of the most ancient Christian works,⁶ with surprising accuracy briefly alludes to one of these episodes.⁷ St. Thomas, who has been brought by a miracle to the Blessed Virgin in her last [35] moments, converses with the apostles: "I was traversing the country of the Indies and, by the grace of Christ, I proclaimed the gospel there; the son of the sister of the king, called Labdanes,⁸ was on the point of receiving baptism, when the Holy Spirit said to me . . ." The nephew of Gondophares does not appear in the Acts; they name only Gad, brother of the king,⁹ but coins have shewn us the nephew. The bilingual legends on the coins of Abdagases declare his royal relationship: *νδελφρα αδελφιδεωσ* on one side, and *gandaphara-bhrata-patrasa* on the reverse.¹⁰ Abdagases, it is true, is the son of a brother of Gondophares; Labdanes is the son of a sister of the king; but, in spite of this slight divergence, it is difficult to separate the two personages, and even the two names. The initial lambda of Labdanes is perhaps the result of dittography (ΑΙΛΑΔΑΝΗC. Marquart (*Beiträge zur Geschichte und Sage von Erän* in *Z. D. M. G.*, XLIX., 1895, 682) explains Abdagases by "wunder.. schön" [wonderfully beautiful] from *gaš*, "beautiful." The employment of the hypocor. tic form is proved by a certain number of Parthian names.

[36] As so many exact facts and positive notions have been thus preserved in the cycle of the apostle Thomas, we ought to search the real history of India for the king named in the Acts along with Gondophares. Though the date is doubtful, we have a useful mark in the Takht-i-Bahi inscription (Dowson, *J. R. A. S.*, N. S., 7, 376 ff. and 9, 144-46; Senart, *J. A.*, Jan.-June, 1890, 113-163). This inscription, which commemorates a pious foundation, bears as date "the year 26 of the king Guduphara 103 [in letters and figures] of the continuous era (*sambaddha*?), the fifth day of the month Vaiśākha." The reading and meaning of the epithet applied to the era are uncertain, and its starting point is undetermined. But there is no doubt about the identity of the king: on the bilingual coins of Gondophares, Guduphara is one of the Indian forms into which the name is

⁶ Tischendorf, *Apocalypses apocryphæ*, Intr. p. xxxvi: "(librum) non pertinere ad mediæ ævi, sed antiquitatis christiæ monumenta certum est, quanquam ambigi potest utrum sæculo damum quarto an prius prodierit."

⁷ [The apocryphal work on "the Falling Asleep of the Holy Mother of God," here cited as *De Transitu Mariæ*, has been somewhat fully dealt with in the *Indian Antiquary*, 1903, pp. 152, 157, in respect of the proposed identification of Labdanes with Abdagases, which seems to be not so probable as M. Lévi has thought. — W. R. P.]

⁸ *Apocalypses apocryphæ*, p. 131. The Syriac text No. 2 (quoted *ibid.* p. xxxvi, note), in consequence of some confusion, has "The nephew of Ludan, king of India." The *Arabic*, Latin and Syriac No. 2 versions indicate simply that Thomas was in India.

⁹ Gutschmid thought he had recovered the name of Gad, brother of Gondophares, in the legend *βασιλεως οαδα* read by Longpérier on a coin of Gondophares. But Longpérier's reading arose from an error, since rectified by new specimens, and Gutschmid's explanation is thus struck out.

¹⁰ For the coins of Abdagases, besides Cunningham's articles already mentioned, see Hoernle, *Copper-coins of Abdagases*, *J. A. S. Beng.*, 1895, Proceedings, p. 82-91.

transcribed;¹¹ this name only appears in the series called Indo-Parthian, and is there borne by only this one prince. If Gondophares had been reigning twenty-six years in the year 103 of the unknown era, his accession was in the year 77 of the same. An era also undetermined, but certainly pretty near the other, was in constant use among the Kushanas beginning with Kanishka, whose name figures in an inscription of the year 5 (Bühler, *Jaina Inscr. from Mathurā in Epigr. Ind.* 1, 381, No. 1). If we admit [37] hypothetically the identity of the two eras, then Vāsudeva,¹² among [38] the Kushanas, would be a contemporary of Gondophares¹³; the latest actually known dates of Vāsudēva are from 74 to 98. The Sanskrit name Vāsudēva is only found in epigraphic monuments; on coins with Greek legends he is ΒΑΖΟΔΡΟ and ΒΑΖΔΗΟ. No doubt these coins, intended for circulation in a vast dominion, were by preference inscribed with the current form of the royal name. But the name Bazdēo, when it came into Iranian territory, would fall under Mazdean influences, and easily be transformed into Mazdeo. The initial labials M and B were constantly confused; to confine ourselves to India only, we may recall the name Mumbā, transformed by the Portuguese into Bombay, and to go further back, the name Minnagar (*Periplus*, § 40), written Binnagar by Ptolemy.

All the numerous variants of the royal name in the Acts converge towards Mazdeo as the original form: the Greek floats between Misdaioa, Misdeos, Mesdeos, altered into Smidaioa in the Menaea [certain liturgical books of the Greek Church], and into Sminlaioa in Nicephorus; the Latin of the *Miracula* and of the *Passio* gives Mesdeus and Misdeus; the Syriac has [39] Mazdai; the Armenian Mštēh; the Ethiopian Mastius. The name borne by the son of Masdeos suggests an identical solution. The Greek has Ouzanēs,¹⁴ Ouzanēs, Iouzanēs; the Latin Zuzanes and Luzanes; the Syriac Wizan; the Armenian Vizan. Gutschmid, and Marquart¹⁵ after him, saw here the Pahlavi

¹¹ Bühler has recently pointed out a new form "Gudapharna" discovered by O. Franke on coins at Berlin; *W. Z. K. M.* 1893, p. 53, nota. — [See also *Indian Antiquary*, 1896, p. 141. — W. E. P.]

¹² The name of this king, so plainly Indian, comes as a surprise after the still barbarous names of Kanishka and of Hushka. It is true, however, that a Sāśohi inscription (Bühler, *Ep. Ind.* II. 339) gives an intermediate form Vāsushka. The following explanation is suggested as to the origin of the name Vāsudēva. On the oldest coins of the dynasty, we have in Indian characters *Kushana* or *Khushana*, in Greek ΚΟΡCNA (ΚΟΡCANO on the coins of the doubtful Miao or Heraos); and ΚΟΡΑΝΟ. The letters PC correspond to the first attempts to represent a foreign sound in Greek characters, a sound which was reproduced afterwards by P and finally by a new form of P with the staff prolonged upwards. To an Indian ear *κορνα* would have sounded like the name Kriṣṇa, which the Greeks have transcribed by *κορράνης*. (The gloss given by Hesychius: *κορράνης* ὁ Ἑρακλῆς παρ' Ἰνδοῖς, corrects itself.) The name of Kushana, thus understood, might have been translated into Indian language by one of the synonyms of Kriṣṇa. Vāsudēva, one of the most frequent names of the divine hero, could then be substituted for Kushana, as a sort of synonym. The numerous coins struck during several centuries in the name of Vāsudēva would be the coinage of the Indianised Kushana kings. Moreover, if the equivalence of the *rhś*, whether with or without the prolonged staff, with the Indian or Iranian *śh* is incontestable, their identity remains to be established. In view of the names Kanērkeś, Oērkeś = Kanishka, Huviska, we may recall that Herodotus mentions a king of the Śakas named Amorgēs: the formation of these names presents a striking resemblance; the name given by Herodotus to the son of the famous queen Tomyris, Spargapisēs, which recalls so closely the names of several kings classed by numismatists after Gondophares, for instance Spalgadamēs, seems to shew the same onomastic formations in use among the Scythians, contemporary with Christ. The coins of Spalirisēs shew the floating state of the transcription; his name is there sometimes written Sapilirisou, sometimes Spalirisou, and also Rpalirisou. The Scythic sound no doubt required a very strong aspiration. It is not impossible that the *Scythæ Chauranai* of Ptolemy, with the town of Khaurana (VI. 13, 3-4), placed on the northern frontier of India, along the Emōdius (Himālaya), may be the Kushanas. The name in any case is externally identical with the form XOPANO = Kushana of the coins of Kujulakadphāsēs (cf. Vol. XXXII. above, p. 424).

¹³ Von Sallet has already insisted upon the coincidence of the epigraphical dates of Gondophares and Vāsudēva: "If the era is the same, Gondophares comes at the end of the Indo-Scythians, perhaps even after Bazdeo, the last of them. But, from a numismatic point of view, this, in my opinion, is almost impossible, for Bazdeo cannot be far removed from the time of the Sassanides. Gondophares seems earlier. If, however, the eras are the same "in both cases, a difficulty remains to be solved by Indianists. I should put Gondophares after Jesus Christ, but "before the Turushkas" (*Die Nachfolger Alexanders des Grossen in Baktrien und Indien*, 52).

¹⁴ The forms Iouzanēs, Zouzanēs in Greek, Zuzanes and Luzanes in Latin, perhaps preserve the trace of an initial letter, which has disappeared in Ouzanes. Only a slight correction, perhaps only another reading of the manuscript, would be necessary to change *Ἰουζάνης* into *Ρουζάνης*.

¹⁵ Marquart, *Beiträge zur Geschichte und Sage von Iran*, in *Z. D. M. G.* 49 (1895), 628-372. Marquart, in that article, also brings to notice the name of the kings (to the number of 3 or 12), whom tradition points out as contemporaries of Christ in the Iranian world. The king of Bahl (Bactres) is there called Akhpayar bar Sakhbān.

Wijēn, Persian Bijēn; but such a reconstruction would not account for the Greek and Latin forms; it might be admissible, if we located the kingdom of Mesdeos in Iran, but it is inexplicable when India is concerned. The compiler of the Acts knew too much about India to give to an Indian prince the name of a secondary hero of the Iranian epic. The remembrance of this personage, Bezhan, son of Gēv, son of Gudarz, may no doubt have had some influence on the Syriac and Armenian forms of the original name, but the Greek and Latin ones exclude the identity of the two names.

Comparison of all the forms leads us back to an original *ouzan*, or rather *gouzan*; in fact, the transformation of the syllable *vi* into *gu*, which had been definitely settled by the time of the Sassanians, was in [40] progress a little after the Christian era and facilitated the substitution of one syllable for the other. On the borders of India and of Iran, the pronunciation at the same period was unstable, and thus oscillated between initial *u* and *gu*. The name of Gondophares affords a conclusive example of this; while the Takht-i-Babi inscription and the Indian legends of the coins have Guduphara, Gudupharna, Gondophara, the Greek legends hesitate between three transcriptions: Gondapharou, Induphrēn and Undopherrou. Thus it seems that at the time the forms Undopherres and Guduphara were officially equivalent. We may, therefore, suppose Ouzanes and Gusana to be also equivalent. Gusana is the official form of the name of the Kushāṇas in two inscriptions, dated one in the reign of Kanishka,¹⁶ the other in the year 122.¹⁷ The second of these inscriptions, a century later than Kanishka, is only separated by an interval of twenty-four years from the last ascertained date for Vāsudēva-Bazdeo. It mentions a *maharaja* *Gushāṇa*, but without specifying whether this indicates the dynastic or personal name of the king in question. The mahārāja Gushāṇa, who came so soon after the Kushāṇa Vāsudēva, was perhaps identical with the royal prince Ouzanes, son of Masdeos.¹⁸

[41] If Gondophares and Vāsudēva were really contemporaries of St. Thomas, they both reigned about the middle of the first century of the Christian era.¹⁹ With regard to Gondophares, this hypothesis agrees with other data (see P. Gardner, *The Coins of the Greek and Scythic Kings of Bactria and India*, 1886, Introd.). In the Greek legends on coins, Gondophares takes the title *autokrātōr*, as did the Roman emperors beginning with Augustus. The coins of the Parthian kings, natural intermediaries between the Roman world and India, shew us plainly, when this title passed from the west to the east. Omitting the uncertain Sanotrokes, we find that Phraates IV., who reigned 8 to 11 A. D., was the only one who took the title *autokrātōr*. It is also from the time of Phraates IV. that we find the square *omega* substituted for the round one in the Greek legends; the coins of Gondophares shew the change had been made in India by his time. Finally, Cunningham, relying upon the identity of names, considers Abdagases, nephew of Gondophares, [42] to be the grandson of the Parthian Abdagases, who was the ruling spirit at the court of Tiridates, in 36 A. D.; consequently he places the reign of Gondophares between 30 and 60 A. D.²⁰

¹⁶ The Manikyāla inscription has: *gushana-vaśa-samvārdhaka*: Cf. Senart, *Notes d'épigraphie indienne*, VI, in J. A., Jan.-June, 1896, 5-26.

¹⁷ Panjar inscription, published by Cunningham, *Archaeological Survey*, V, 61.

¹⁸ In view of future identifications, it may be useful to place together here the names of the other Indian personages mentioned in the legend of St. Thomas. The general of Mesdeos is called in Greek Siphōr, Suphōr, Sēmphoros; in Latin, Sapor, Siporus, Siforas; in Syriac, Sifūr; in Armenian, Siphor. The chief of the servants of Mesdeos is Charisios (Gk.), Carisius (Lat.), Karish (Syr.); he has for wife Mygdonia, whose nurse is Markia (Narohia, Narka). The queen, wife of Mesdeos, is Tertia or Tertianē; Treptia (Lat.), Tartabania (Ethiop.). The prince Ouzanes (named Maiturnos in Ethiop.) is married to Asinara (Sicarn, Mnēsara); Manashar (Syr.); Marna (Ethiop.). — [See also *Indian Antiquary*, 1903, pp. 7 and 153, where more precise lists are given. The texts hardly seem to justify the description (*chef des serviteurs*) applied to Charisios. — W. R. P.]

¹⁹ The Christians of St. Thomas date the martyrdom of the apostle 21 December, 68 A. D.

²⁰ [Cunningham in 1854, in the paper referred to on p. 10 above, thought it "highly probable that the Indo-Parthian Abdagases was the same as the Parthian chief whose revolt is recorded by Tacitus (Annal. XV. 2) "and Josephus (Antiqua, XXIII. 2)."] At the place named, Tacitus makes no mention of Abdagases or of the revolt. There is nothing elsewhere in Tacitus to lead us to connect his Abdagases with India and Gondophares (see Annals, bk. 6 [A. D. 32-37], ch. 35, 36, 43 and 44). As to Josephus, there are only twenty books in the *Antiquities of the Jews*. Abdagases is only named in bk. 18, ch. 9, sec. 4, and there merely incidentally as one of the generals of Artabanus III. He is not mentioned in connexion with any revolt. — Subsequently, 1890, Cunningham thought it "quite possible" that the Abdagases of the coins was the grandson of the Abdagases of Tacitus, not the same individual (see *Coins of the Indo-Scythians*, London, 1890, p. 17). The reason of the change from grandfather to grandson is not apparent. — W. R. P.]

The dates drawn from Chinese texts lead us also to place the reign of Vāsudēva about the same epoch. If the Kushana dynasty was founded about 50 B. C., Vāsudēva should have reigned about 50 A. D. The ascertained dates of Kanishka run from the year 5 to the year 18, whatever be the starting point of the era; those of his successor, Huvishka, run from 33 to 51; those of Vāsudēva, from 74 to 98. Kanishka's death then falls between 18 and 33; the accession of Vāsudēva between 51 and 74; an interval of eighteen years at the least, of fifty-six years at the most, of thirty-seven years as a mean, separates these two events. If the first conversion of a Chinaman to Buddhism is traced back to the time of Kanishka, the voyage, real or imaginary, of the Apostle Thomas to the Indies must necessarily be fixed in Vāsudēva's time.

NOTE BY THE TRANSLATOR.

Some of the views stated by M. Lévi have been discussed by M. Specht in the *Journal Asiatique*, July-Dec., 1897, pp. 152 ff., in an article entitled *Les Indo-Scythes et l'époque du règne de Kanishka*. But he seems to be not quite fair to M. Lévi. After stating that the date generally taken by scholars for the crowning of Kanishka is 78 A. D., he goes on to say: — "Now M. Lévi, relying principally on the Acts of St. Thomas, thinks he can revise all this chronology, without having previously examined the historical value of the work, which has been placed by the Council of Rome of 494 among the apocryphal books."

We do not read M. Lévi as relying principally upon the Acts of St. Thomas. Our readers may judge from the translations above. The use he makes of the Acts is merely supplementary to what he has drawn from Chinese sources. Having shewn reasons for believing that Kanishka's reign must be dated from about B. C. 5, he comes to the Acts, and suggests — (he hardly does more) — that the Mazdeos mentioned in them is perhaps Vāsudēva.

In view of the literature on the subject quoted by M. Lévi, and the way in which he has treated it, it seems more than unreasonable to state that he did not previously examine the historical value of the work. M. Lévi has not treated the Acts as historical, but, like other scholars, as an ancient legend, which seems to have preserved some fragments of historical value. M. Specht's reference to the "Council of Rome of 494" is singularly out of place. The condemnation of a book in the fifth century, on account of Gnostic or other false doctrine contained in it, is no evidence for or against its historical value for us nowadays.

Apart from this, we have no means of ascertaining if the work condemned with others in the Gelasian Decree, as it is called, to which M. Specht alludes, was really the Acts of St. Thomas, as we now have them. It may have been, or it may have been something like them; but all the information we have is the following words, in a list of 63 works not received by the Church and to be avoided: — "Actus nomine Thomae Apostoli, libri X. apocryphi" (see Migne, *Patrologia lat.*, Vol. 59, Paris, 1847, col. 162). None of the versions of the Acts we now have are divided into ten books.

Further, the true date and history of this decree are not at all settled, though probably the date 494 is not far out (see F. J. Hort, *Notes introductory to the study of the Clementine Recognitions*, 1901, p. 65).

M. Specht goes altogether too far when he adds: — "It is relying upon this datum, so fragile, of 'the identification of Misdeos with Vāsudēva, that M. Lévi thinks he is able to upset all the labours of his predecessors.'" So, also, when he states that M. Lévi takes the date of the martyrdom of St. Thomas as 21 December, A. D. 68. M. Lévi does not do so: he merely mentions in a footnote that the Christians of St. Thomas so date the martyrdom.

AN ABSTRACT ACCOUNT OF THE SEARCH FOR HINDI MANUSCRIPTS
FOR THE YEARS 1900, 1901 AND 1902.

BY SYAM SUNDAR DAS, B.A.

READERS of the *Indian Antiquary* need not be reminded of the fact that it was in 1868 that the Government of India, at the suggestion of the late Pandit Rādhākṛishṇa of Lahore, decided to institute a search for Sanskrit Manuscripts in the different provinces of India; and the results regarding the ancient history and literature of India, which have been obtained by the consequent operations, sufficiently speak of the wise and far-sighted proposal of the Pandit and amply justify the action taken by the Government of India. The importance of this policy impressed itself on the minds of the founders of the **Nāgarī-prachārini Sabhā of Benares** in the very year of its foundation (1893). The Sabhā believed that a good deal of valuable information with regard to the history and literature of India, or at any rate of its northern portion, still lay buried in **Hindi Manuscripts**, which had not seen the light of the day, either through being jealously guarded by their owners or on account of the want of funds on the part of the latter to give the public the benefit of knowing their contents. In short, this Sabhā, realising the difficulty it would have to face in overcoming the prejudices that still kept concealed the treasures of manuscripts, and being conscious that such an arduous undertaking could hardly be carried on without patience and tact, thought that if an attempt were made in Rājputānā, Bundelkhand, and parts of the United Provinces of Agra and Oudh and the Panjāb to catalogue the Hindi Manuscripts that could be found in those parts of India, sufficient data would be forthcoming to justify the carrying on of the operations on an extended scale under the authority and patronage of the Government. But the Sabhā, being then in its incipient stage and but too conscious of its inability to take up so onerous and expensive a work upon itself, addressed a representation to the Government of India and the Asiatic Society of Bengal, praying them to publish a list of such Hindi Manuscripts as could be found in **Sanskrit Libraries**, which were being, or which might in future be, searched and examined. The Asiatic Society expressed a hope to be able to meet the wishes of the Nāgarī-prachārini Sabhā. Later on a similar answer was received from the Government of India as well. The search was commenced by the Asiatic Society in the beginning of 1895, and, in all, some 600 manuscripts were noticed during that year. It is a matter of regret that the Society could not see its way to continue the search next year and to extend it further than Benares. It is a matter of still greater regret that the notices — nay, even a list of these 600 manuscripts — have not as yet been published.

The Government of the United Provinces of Agra and Oudh was also approached by the Sabhā on the subject, and it was pleased to instruct the Director of Public Instruction, United Provinces, to carry on the search of Hindi Manuscripts of historic value and literary merit simultaneously with and by the same agency as that employed in the search for Sanskrit Manuscripts. But these orders of the Government did not bring forth any appreciable results. The Sabhā again approached the Government in March 1899 as to the necessity of doing something substantial towards the search and the cataloguing of valuable Hindi Manuscripts, with the result that it made an annual grant of Rs. 400 to the Sabhā towards carrying on this work and undertook to publish the *Report* which the Sabhā was to submit annually to the Government. The grant was commenced from the financial year 1900 and was increased by Rs. 100 in 1902. The Sabhā asked me to supervise and carry on the search for Hindi Manuscripts, and I have been able to submit three *Annual Reports* to the Government, the first of which is now in course of publication. As it will be sometime before these *Reports* are published, I propose to give in the following pages a tabular account of the work I have been able to notice during the past three years, so as to inform scholars of the work that is being done and to solicit their co-operation and sympathy. I am, further, anxious to give publicity to my conclusions about several points connected with the history and literature of India, so that

they may receive due consideration at the hands of scholars and *savants*. I trust the publication of this paper in the *Indian Antiquary* will serve this purpose.

In the following list the letters A, B, and C, with the number of the notice, indicate that the books were noticed in 1900, 1901, and 1902, respectively. Where the date of the composition of a book could not be ascertained, the approximate date when the author flourished is given in brackets. Incomplete manuscripts are marked with asterisks.

In the *Reports* submitted to the Government I have given a somewhat detailed notice of each of the books (except Nos. 116 C to 302 C). It contains (1) the name of the book, (2) substance on which the MS. is written, (3) size, (4) lines per page, (5) extent, (6) appearance, (7) character in which the MS. is written, (8) place of deposit, (9) a short note in English, (10) extracts from the beginning and the end of the book, (11) subject-matter, and (12) a note in Hindi.

Besides this information, I have dealt with the salient points of each year's work in a short *Report* in English. As the *Reports* are either being printed or under the consideration of the Government, I am sorry I cannot give here any account of the conclusions arrived at by me. But I am sure a perusal of the following statement will give some idea of the work done, and persons interested in it will kindly await the publication of the *Reports*. I shall feel grateful if scholars will communicate to me their suggestions, if any, on this subject and point out any omissions and mistakes on my part that they may meet with while perusing the following statement or my full *Report*:—

| No. of Notice. | Name of Author. | Name of Book. | Date of Composition. | Date of Manuscript. | Remarks. |
|----------------|------------------|---|----------------------|---------------------|--|
| 103 A | Āchārāja ... | Viśāpabhāra bhāṣā ... | 1658 | ... | |
| 65 A | Agnibhu ... | Bhakti-bhaya-hara-stotra.. | ... | 1796 | |
| 77 A | Agra Dāsa ... | Sri Rāma-Dhyāna-man-jarī. | (1575) | 1894 | He was the Gurū of Nābhā Dāsa, the celebrated author of the <i>Bhaktamāla</i> . |
| 15 B | Ajabesa ... | Baghela-vanśa-barṇana ... | 1835 | ... | Probably this is in author's handwriting. |
| 40 C | Ajīta Singha ... | Durgā-pāṭha bhāṣā ... | ... | 1719 | Remained on the Gaddi of Mārwar from 1678 to 1724 A.D. |

A COMPLETE VERBAL CROSS-INDEX TO YULE'S HOBSON-JOBSON OR GLOSSARY OF ANGLO-INDIAN WORDS.

BY CHARLES PARTRIDGE, M.A.

(Continued from p. 483.)

- Faujdari; ann. 1880: *s. v.* Bundobust, 98, i.
 Faujdārī; Foujdarry, 278, ii.
 Faujdārī 'Adālat; *s. v.* Dewauny, 241, i.
 Faujdārī 'Adālat; *s. v.* Adawlut, 4, i.
 Faussebraye; *s. v.* Barbican, 52, i; *s. v.* Rownee (a), 584, i.
 Fausse-braye; *s. v.* Rownee (a), 583, ii.
 Feczizo; *s. v.* Fetish, 267, i.
 Fedea; *s. v.* 266, ii, 798, ii, twice; ann. 1525: *s. v.* Googul, 296, i, *s. v.* Room, 581, i and ii, both twice, *s. v.* Sind, 634, ii, 5 times, *s. v.* Surat, 664, ii; ann. 1535: *s. v.* Pergunnah, 530, i; ann. 1536: *s. v.* Salsette (a), 594, ii, twice; ann. 1543: *s. v.* Mazagong, 432, i; ann. 1554: *s. v.* Bombay, 77, ii, twice.
 Feerandah; ann. 1783: *s. v.* Veranda, 738, i.
 Feitiqarias; ann. 1487: *s. v.* Fetish, 267, i.
 Feiticeiras; ann. 1613: *s. v.* Fetish, 267, ii.
 Feiticeiro; *s. v.* Fetish, 267, i; ann. 1567: *s. v.* Casis, 130, ii.
 Feitiço; *s. v.* Fetish, 267, i; ann. 1553 (3 times), 1613 and 1878 (twice): *s. v.* Fetish, 267, ii.
 Feitiçoas; ann. 1552: *s. v.* Fetish, 267, i.
 Feitor; *s. v.* Factor, 263, i; ann. 1501 and 1653: *s. v.* Factor, 263, i.
 Feitoria; *s. v.* Factor, 263, i; ann. 1500: *s. v.* Factory, 263, ii.
 Feitour; ann. 1653: *s. v.* Congo-bunder, 783, i.
 Felis Caracal; *s. v.* Shoe-goose, 629, i.
 Felis jubata; *s. v.* Cheeta, 143, ii.
 Felis leopardus; *s. v.* Leopard, 392, i.
 Felis pardus; *s. v.* Leopard, 392, i, twice.
 Fellah; *s. v.* Moplah, 448, ii; ann. 1837: *s. v.* Shabunder, 619, i.
 Feranda; ann. 1783: *s. v.* Veranda, 738, i.
 Ferando; ann. 1614: *s. v.* Peking, 526, i.

- Ferash; ann. 1548: *s. v.* Batta (a), 55, i; ann. 1824: *s. v.* Farásh, 266, ii.
 Ferásh; *s. v.* Farásh, 266, ii.
 Feráze; *s. v.* 266, ii.
 Ferdana Mantri; ann. 1612: *s. v.* Orankay, 492, i.
 Feringee; ann. 1794: *s. v.* Firinghee, 270, i.
 Feringhee; ann. 1825 (twice), 1828 and 1861: *s. v.* Firinghee, 270, i.
 Feringhi; *s. v.* Room, 581, i.
 Feringhy; ann. 1792: *s. v.* Banchoot, 42, ii.
 Feringis; *s. v.* Bustee, 102, i.
 Feringy; ann. 1755: *s. v.* Firinghee, 269, ii.
 Ferlec; ann. 1292: *s. v.* Pasei, 517, i.
 Feronia elephantum; *s. v.* Wood-apple, 741, i.
 Ferozshur; *s. v.* Ferozeshuhur, 798, ii.
 Ferozepore; ann. 1583: *s. v.* Course, 785, i.
 Ferozeshuhur; *s. v.* 798, ii.
 Feroz Sháh; *s. v.* Rupee, 585, ii.
 Ferrais; ann. 1300: *s. v.* Farásh, 266, ii, twice.
 Ferro; *s. v.* Narcondam, 473, i.
 Ferseng; ann. 1623: *s. v.* Coss, 203, ii.
 Ferula alliacea; *s. v.* Hing, 318, i.
 Ferula asafoetida; *s. v.* Hing, 318, i.
 Ferula Jaeschkiana; *s. v.* Hing, 318, i.
 Ferula Narthex; *s. v.* Hing, 318, i.
 Fétiches; ann. 1878: *s. v.* Fetish, 267, ii.
 Fetiço; *s. v.* Fetish, 267, i.
 Fetisceroes; ann. 1673: *s. v.* Fetish, 267, ii.
 Fetish; *s. v.* 267, i.
 Fetishism; ann. 1878: *s. v.* Fetish, 267, ii.
 Fetisso; *s. v.* Fetish, 267, i.
 Fettisao; ann. 1600: *s. v.* Fetish, 267, ii.
 Feuerwerk; ann. 1750: *s. v.* Pariah, 514, ii.
 Feuilles entrelacées; *s. v.* Cadjan, 107, ii.
 Feytiço; ann. 1539: *s. v.* Fetish, 267, i; ann. 1606: *s. v.* Fetish, 267, ii.
 Fez; *s. v.* Otto, 494, i; ann. 1573: *s. v.* Arsenal, 27, i, *s. v.* Cameeze, 116, i.
 Ffactor; ann. 1714: *s. v.* Choultry, 779, i.
 Ffactory; ann. 1680: *s. v.* Martaban, 822, ii, twice.
 farazes; ann. 1548: *s. v.* Batta (a), 55, i.
 farcuttee; ann. 1690: *s. v.* Dewaun, 240, i.
 ffort St. George; ann. 1680: *s. v.* Cowle, 785, ii.
 Fico del inferno; *s. v.* Datura, Yellow, 231, ii.
 Ficus; *s. v.* Flying-Fox, 271, ii, *s. v.* Plantain, 541, i.
 Ficus bengalensis; *s. v.* Banyan-Tree, 50, i.
 Ficus benamina; 50, ii, footnote.
 Ficus Indica; *s. v.* Plantain, 541, i.
 Ficus indica; *s. v.* Banyan-Tree, 50, i; ann. 1857: *s. v.* Baroda, 53, i.
 Ficus populifolia; *s. v.* Peepul, 524, i.
 Ficus religiosa; *s. v.* Peepul, 523, ii.
 Fid; *s. v.* Chabee, 139, i.
 Fidalgo; ann. 1552: *s. v.* Mandarin, 421, ii; ann. 1553: *s. v.* Mandarin, 421, ii, *s. v.* Pulá, 557, ii; ann. 1673: *s. v.* Calyan, 114, ii.
 Fidya; *s. v.* Fedes, 266, ii.
 Fig; ann. 1548: *s. v.* Areca, 25, ii; ann. 1563: *s. v.* Banana, 42, ii.
 Figges; ann. 1586: *s. v.* Areca, 25, ii.
 Figo; ann. 1579: *s. v.* Plaintain, 541, ii.
 Fig of India; *s. v.* Plantain, 541, i.
 Fig of Paradise; *s. v.* Plaintain, 541, i.
 Fig-Tree; *s. v.* Banyan-Tree, 50, i.
 Fig-tree; ann. 70: *s. v.* Banyan-Tree, 50, i; ann. 1667: *s. v.* Banyan-Tree, 50, ii.
 Figue; ann. 1610: *s. v.* Banana, 42, ii.
 Filingi; *s. v.* Firinghee, 269, i.
 Fiji; ann. 1586: *s. v.* Suttee, 669, i.
 Fiji Islands; *s. v.* Suttee, 667, ii.
 Fil; *s. v.* Elephant, 794, ii, 797, ii.
 Fil; *s. v.* Elephant, 794, ii, twice.
 Filaria Medinensis; *s. v.* Guinea-worm, 307, ii.
 Fill; *s. v.* Elephant, 794, ii.
 Fillets, long; ann. 1573: *s. v.* Muslin, 459, i.
 Filosofo; *s. v.* Failsoof, 264, ii.
 Filsben; *s. v.* Elephant, 794, ii.
 Finestra; *s. v.* Balcony, 39, ii.
 Firando; *s. v.* Factory, 264, ii; ann. 1617: *s. v.* Satsuma, 602, ii.
 Firanji; *s. v.* Firinghee, 269, i.
 Firáshdanga; ann. 1742: *s. v.* Calcutta, 112, i.
 Fire carriage; *s. v.* Ág-gári, 5, ii.
 Fire-eater; *s. v.* Chickore, 149, i.
 Firefly; *s. v.* 267, ii, twice, 268, i, 798, ii; ann. 1682: *s. v.* 798, ii; ann. 1764 and 1865: *s. v.* 268, i; ann. 1868 and 1880: *s. v.* 268, ii.
 Fire-fly; ann. 1824: *s. v.* Firefly, 268, i.
 Firinghee; *s. v.* 269, i, 799, i.
 Firingbi; *s. v.* Paranghee, 512, ii.
 Firingi; *s. v.* Custard-Apple, 221, i; ann. 1565: *s. v.* Firinghee, 269, ii, *s. v.* Larry-bunder, 388, i; ann. 1634: *s. v.* Gallevat (b), 276, ii.
 Firingi dhatūra; *s. v.* Argemone mexicana, 25, ii.
 Firingies; ann. 1774: *s. v.* Firinghee, 269, ii.
 Firingi-pett; 550, i, footnote.
 Firingy; ann. 1861: *s. v.* Firinghee, 270, i.

- Firma; *s. v.* Firmaun, 270, i; ann. 1615: *s. v.* Buxee, 104, i; ann. 1616: *s. v.* Firmaun, 270, i.
 Firman; ann. 1606: *s. v.* Firmaun, 270, i; ann. 1610: *s. v.* Outcherry, 223, i; ann. 1623: *s. v.* Radaree, 570, i, twice; ann. 1648: *s. v.* Firmaun, 270, i; ann. 1711: *s. v.* Sophy, 649, i.
 Firmão; ann. 1606: *s. v.* Firmaun, 270, i.
 Firmaun; *s. v.* 270, i; ann. 1689: *s. v.* 270, ii.
 Fīroz; ann. 1360: *s. v.* Jowaula mookhee, 354, ii, twice.
 First-chop; *s. v.* Chop, 160, i.

(To be continued.)

MISCELLANEA.

MATRICETA'S MAHARAJAKANIKALEKHA.

To the article on Mātrīceta and the Mahārājakanikalekha, published in Vol. XXXII. above, p. 345 ff., may I be allowed to add the following notes, which it was not practicable to insert in the article itself?

1. In printing the text, I have preferred to follow the blockprint even where it is not quite consistent: thus I have given *rjes . su* or *rjesu*, &c., indifferently.

2. In verses 9 (*kyis*), 19 (*yi*), 23 (*bden*), and 46 (*mes*) the translation follows the reading given in the notes.

3. To Professor L. de la Vallée Poussin, who kindly read the paper in proof, I am indebted for a number of suggestions adopted in the paper, and also for the following:—

(a) Pp. 346-7: Prof. Poussin suggests that the passage from the *Varṇanārhaṇavāṇana* proves not that Mātrīceta had been a heretic, but that he had indulged in vain rhetoric. The further context will, I believe, decide this point.

(b) P. 349: Further references to the simile of the tortoise are to be found in Burnouf's 'Lotus de la bonne Loi,' p. 431; Kern, *Saddharma-piṇḍarīka*, p. 423; Spence Hardy, 'Manual of Buddhism,' p. 442; *Bodhicaryāvatārapañjikā* (Bibl. Ind.), p. 9.9 and IV. 20.

(c) V. 3: Can *gdams . kyī* = 'those who have need of advice'?

(d) V. 4: 'Having purified the quarters by their virtues, great men are nevertheless not ashamed to yield to their hearts, like friends'?

(e) V. 11: *mkhas . pa . dag . bdu . bar . dgyes . pa* = *tiṣṭasantoṣaṇa*; but? We might certainly render *mkhas . pa . dag . bdu . bar* by 'unite the learned.'

(f) V. 12: *dpyad . pa . la . ni*, &c. = 'exercise yourself wisely in reflection'; but?

(g) V. 21: *de . yi . beam . pa*, &c. = 'whose respect is equal to his intelligence and who desires happiness.'

(h) V. 36: upon *bral . bas* depends all that precedes. *Dbye* = *bheda*. [The translation of this verse is highly doubtful: probably *chad . pas . bcad* must mean 'to punish,' and *gañ . duḥān . mi* = *na kadācit*.]

(i) V. 54c: read *ñes . par* 'certainly'?

(k) V. 55d: 'has attained the *naṣṭkarmya* (*mi . bgyi . ba*)'?

4. I may add the following:—

(a) V. 25: *smra . ba* may mean 'speaker' rather than 'speech.'

(b) V. 83b: This line is too short by one syllable.

CALAMINA.

In Vol. XXXII. above, p. 149, some remarks were offered on attempts made by certain authors to localise "Calamina," the place at which St. Thomas the Apostle is alleged, in certain ecclesiastical writings, to have suffered martyrdom; and it was suggested, for reasons there given, that perhaps Carmana (Karmān) in Carmania might be the place really intended. The Right Rev. A. E. Medlicott, however, points out to me that, if there had been any tradition that the first burial-place of the apostle had been within Carmania, such tradition would have certainly been known to the Nestorians, who had churches

there in early times. That they had churches there, is shewn by a letter "ad Simonem episcopum Ravardsciri metropolitam," written by Jesuab, Patriarch of the Nestorians 650-660, a Latin translation of which is given by Assemani, *Bibl. Or. t.* 3, p. 130. The following passages may be quoted : —

"Ubinam ingens Maruanitarum (civitatis Maru "[Merv]) populus qui quum neque gladium neque ignem aut tormenta vidissent, solo medietatis honorum suorum amore capti, velint amentes, "e vestigio in barathrum perfidiae, hoc est, in

"aeternam perniciem ruerunt." The writer goes on to say all denied the faith, except two priests, who, as he remarks, "instar perustarum titonium "ex flamma impietatis evadentibus, etc."

"Ubinam etiam sunt Caramaniae totiusque "Persidis sanctuaria? quae non per adventum "satanae, aut juseu regum terrae, aut mandatis "praesidis provinciarum, excisa corruerunt, sed "exigui unius villissimi daemonis flatu, etc."

NOTES AND QUERIES.

THE CHAUKANDU.

"1. I am told that the custom of *chaukandū* (see *ante*, Vol. XXXI. p. 359) has the following local names in Kālū, though I have never myself heard any of them used : —

| | | |
|-------|-----|----------------------|
| Mandī | ... | <i>banjhārā betā</i> |
| Sarāj | ... | <i>jharā betā</i> |
| Kālū | ... | <i>dagōlū.</i> " |

E. A. JOSEPH, C. S. (Kālū).

2. In Sirmā, if a widow living in her late husband's house, and being possessed of his estate, gives birth to a male child in her deceased husband's house, such child is legitimate and is called *jhatā* or *jhatōgrā*. He succeeds the widow and is regarded as the son of his mother's deceased husband. Even more than one such child is legitimate. This custom prevails amongst the hill-men only and is not recognized in the Nāhan Tahsil and the Dun.

3. In Chambā, the custom of *chaukandū* still exists in the Barmaur and Chaurāh Wizārats. The Barmauris recognize the legitimacy of the

children born of a widow after the demise of her husband, provided the widow continues to reside in her husband's house and that she has worn a red *dōrī* (tape) in the name of her husband's *chuld* (oven) or *darat* (axe). There are widows in the Barmaur Wizārat who have not performed this ceremony, and are still in possession of their husbands' land and property, but the Gaddis consider that their rights are disputable. They can enjoy this privilege only as long as the *bārādarī* do not make any fuss about it. In the Chaurāh Wizārat this practice also obtains, but no formal ceremony is necessary. It is, however, essential that the widow should continue to live in her husband's house and that the child is begotten in his house. In Barmaur such male issue is called *chaukandū* and in the Chaurāh Wizārat *randput* (widow's son) and *rand-dhāt* (widow's daughter) respectively.

BOOK-NOTICE.

CATALOGUS CATALOGORUM, Pt. III.¹

THE second part of Professor Aufrecht's great work appeared in 1896, and the present one carries us forward to July, 1903. At this stage commendation of a book so well-known and so indispensable to all Sanskrit scholars would be superfluous. Suffice it to say that it displays all the clearness and accuracy of its predecessors. Amongst many other entries based on lists of Sanskrit manuscripts which have been published since 1896, this part also includes the names of the works in the following important collections, — the Ashburner and Burnell MSS. of the India Office,

the MSS. of the Indian Institute at Oxford, the Libraries of the Calcutta Sanskrit College and of the Asiatic Society of Bengal (so far as catalogues have been published), the Libraries of the Universities of Edinburgh, Würzburg, Leipzig, and Tübingen (1865 — 1899, including the famous *Paippalāda-sākhā* MS. of the *Atharva-vēda*), and the Tod and Whish Collections of the Royal Asiatic Society. It is therefore of considerable interest in itself apart from its connexion with its valuable predecessors.

G. A. G.

Camberley, 7th Nov. 1903.

¹ *Catalogus Catalogorum. An Alphabetical Register of Sanskrit Works and Authors.* By Theodor Aufrecht. Part III. Printed with the support of the Academies of Göttingen, Leipzig, Munich and Vienna. Leipzig, Otto Harrassowitz, 1903. Pp. iv, 161. 8to. Price, Marks 10, say Rs. 7-8.

EPIGRAPHICAL NOTES.

BY H. LÜDERS, Ph.D.; ROSTOCK.

THE following notes, which I hope to continue from time to time, are a small contribution towards the reading and interpretation of the most ancient epigraphical records of India. For Nos. 6, 14, 22, and 23, I have been able to use a photograph kindly placed at my disposal by Prof. Kielhorn: on the margin is written, in Dr. Fleet's hand: — "Indo-Scythian stones which belonged to Gen. Sir Alexander Cunningham;" and it shows the front sides of the stones which bear the inscriptions mentioned above, and two other stones with inscriptions which will be dealt with later on. Except for that, I have had no fresh materials to work at, such as impressions, rubbings or photographs, but have had to rely on the reproductions published in the *Archæological Survey Reports*, the *Journal of the Royal Asiatic Society*, the *Journal of the Asiatic Society of Bengal*, the *Indian Antiquary* and the *Epigraphia Indica*. It is hardly necessary to point out that these reproductions are of very different value. Whereas the photo-lithographs in the *Epigraphia Indica* may be considered a fairly reliable base for a critical examination of the text, the reproductions published in the older works are of course more or less untrustworthy; and perhaps it will be wondered at that I should have commented at all on inscriptions of which only such imperfect copies were available. If nevertheless I have done so, this is largely due to an external reason. By advice of some friends interested in Indian epigraphy, and in analogy to the lists compiled by Prof. Kielhorn, I am preparing a list of the Indian inscriptions prior to about A. D. 400, which will contain also a short abstract of the contents of each inscription. It was chiefly in order to render this list as free from errors as possible, also with regard to inscriptions of the kind described above, that I have ventured at revising them and publishing the results in the present shape. I am fully aware that by a re-edition of these inscriptions most of my remarks will be superseded. The sooner this will happen, the better it will be, and I can only hope that the authorities of the Indian Museums, to whose care these precious documents of the ancient history of the country are entrusted, will find a way of making them accessible to scholars in a form satisfying modern requirements.

No. 1. — Mathurā Jaina image inscription of Sam. 4;

edited by Bühler, *Ep. Ind.* Vol. II. p. 201, No. 11, and Plate.

The inscription is mutilated. The last words of the first line are transcribed by Bühler *Vajanagarit[ā śā]*. After *śā* another *akshara* is visible on the photo-lithograph, and there can be no doubt that *śā* is to be restored to *śākhātā*, although both the *śā* and the *kha* seem to have somewhat abnormal forms. The editor, however, was certainly wrong in transcribing the third *akshara* of the name of the *tākhā* by *na*. As a comparison with the *na* in *śiśini* in line 2, in *Grahachāfēna* and *Grahaddāsēna* in line 3 will easily show, it is really *na*. The straight vertical at the top of the letter is nothing but the *serif*, whereas the lingual *na* has a slightly bent top-line; see the words *Vāraṇātō gaṇātō* in line 1. The spelling of the word *Vajanagaritō* would thus be quite the same as in another Mathurā inscription edited by Bühler, *Ep. Ind.* Vol. I. p. 387, No. 11.¹ But it is just possible that the actual reading is *Vājanagaritō*; in the photo-lithograph, at any rate, the first *akshara* looks exactly like the first *akshara* after the date which Bühler himself read *vā*, and the stroke below the *ja* can hardly be a second *ja*, as Bühler thought, but seems to be the beginning of a subscript *va*. However, these strokes may after all be merely accidental just as the stroke below the *na*, and an examination of the impression or of the stone itself would be necessary to settle this point.

Nos. 2 and 3. — Mathurā Jaina image inscriptions of Sam. 5 and 13;

edited by Bühler, *Ep. Ind.* Vol. II. p. 201, No. 12, and p. 202, No. 14, and Plates.

The dates of these two inscriptions, which unfortunately are badly mutilated, read according to Bühler: . . . *śya va 5 grī 4 di 5*, and . . . *sha 10 [8] va 2 di 10 l*. Bühler considers the *va*

¹ In a third inscription also, *ibid.* p. 397, No. 34, we find *Vajanāgaritā śākhātā* with the dental nasal.

of the first inscription to be an abbreviation of *varsha*, and remarks in a note that in the second inscription also *sha* perhaps ought to be restored to *varsha*. If these views should prove correct, the two inscriptions would stand quite alone, no other inscription of this period at Mathurā employing the word *varsha* instead of *samvat* or *samvatsara* in the date.

Under these circumstances it would not seem out of place to draw attention to the extreme precariousness of Bühler's readings. If the supposed *sha* of the second inscription is compared with the *sh* and the *s* of the word *Arishṭaṇḍimīya* in line 2 of the same text, it will be seen that in its left portion it far more resembles the *s* than the *sh*. The small horizontal stroke at the lower end of the right vertical, which alone gives the letter the appearance of a *sha*, may be accidental, especially as the engraving of the whole inscription is rather carelessly done.² *Sa*, of course, would stand for *samvatsarē* as in *Ep. Ind.* Vol. I. p. 395, No. 28; Vol. II. p. 201, No. 11; p. 202, No. 13, &c.

In the case of the first inscription Bühler's reading is even more objectionable. In my opinion there can be no doubt whatever that the *akṣhara* immediately before the numeral is *mē*. Before *mē* stands a ligature, the lower portion of which cannot be a subscript *ya*, because in that case the curve would be open to the right, but clearly is *cha*. We thus are led to read . . . *chamē* 5, which entails almost with necessity the restoration [*samvatsarē pañ*]*chamē* 5. However, the upper portion of the ligature does not look much like a *ñ*,³ but it may very well be *pa*, and *pchamē* may be an abbreviation for *pamchamē*, just as *svatsarē* in the inscription, *Ep. Ind.* Vol. I. p. 384, No. 5, is an abbreviation for *samvatsarē*. Other instances of this tachygraphic mode of writing in the Mathurā inscriptions are *Dēvidyā* for *Dēvatidyā*, *Gupta Inscriptions* (Corp. Inser. Ind. Vol. III.), p. 263, No. 63, and *sāha*, *Ep. Ind.* Vol. I. p. 387, No. 9; *sdhi*, *ibid.* p. 392, No. 24; *sdham*,⁴ *ibid.* Vol. II. p. 206, No. 26, for *siddham*.

No. 4. — Mathurā Jaina image inscription of Sam. 5;

edited by Bühler, *Ep. Ind.* Vol. I. p. 381, No. 1, and Plate.

Bühler read this inscription as follows:—

A. 1 dē[va]putrasya Ka[ni]shkasya sam 5 hē 1 di 1 ētasya pūrvv[ā]yañ
Koṭṭiyātō gaṇātō Bahmadāsikā[tō]

2 [ku]lāto [U]johēnāgaritō sākhatō sēthi . iha . . . sya . . . i . . . isēnasya sahachari-
Khudāyē Dē[va] . . .

B. 1 pālasya dhi[ta]

2 Vadhamānasya prati[mā] ||

A glance at the photo-lithograph will show that instead of *sahachari* we have to read *sadhachari*. The same term is found in two other Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 388, No. 11 (*Datisya śiśiniyē Mahanandisya sadhachariyē Balavarmayē Nandayē cha śiśiniyē Akakayē nirvarttanā*), and Vol. II. p. 201, No. 11 (*Puṣyamitrasya śiśini Sathisihāyē śiśini Sihamitrasya sadhachari . . .*), while its masculine counterpart appears in the form of *śraddhachara* or *śadhachara* in the Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 388, No. 4 (*brihaṃtavāchaka cha gaṇina cha Ja . . . mitrasya aryya-Ōghasya śishya-gaṇisya aryya-Pālasya śraddhacharō vāchakasya aryya-Dattasya śishyō vāchako aryya-Sihā tasya nirvarttanā*), p. 391, No. 21 (*vāchakasy=āryya-Hastahastisya śishyō gaṇisya aryya-Māghahastisya śraddhacharō vāchakasya aryya-Dēvasya nirvarttanē*), and Vol. II. p. 203, No. 18 (*vāchakasy=āryya-Ghastuhastisya śishyō gaṇisya=*

² Another instance of a *sa* closely resembling a *sha* is found in *Ep. Ind.* Vol. II. p. 204, No. 19, where Bühler himself read *ētasya*.

³ The letter *ñ* occurs twice at Mathurā, in the inscription edited below, No. 23, and in *Ep. Ind.* Vol. II. p. 210, No. 38, which Bühler refers to the Gupta period.

⁴ Bühler considers the sign which I read *m*, to belong to the next line and transcribes it by *va*, but this, at any rate, is impossible. Compare the *siddham* in *Ep. Ind.* Vol. II. p. 206, No. 27, where the *m* is put below the *āha* in exactly the same manner. For a doubtful case, see Bühler, *ibid.* p. 209, note 7.

dryya-Mahguhasiṣya śaḍhacharō vāchakō aryya-Dēvō tasya⁵ nirvartanā). It will be noticed that in all these passages the *śaḍhachari* and the *śraddhachara* is further specified as the pupil of some monk, and this holds good in the present case also, the photo-lithograph leaving no doubt that the word before *Sēnasya* is to be restored to *śiṣini*. Between *śākhātō* and *śiṣini* there are six *akṣaras*, the first two of which are distinctly *sēthi*. The next two seem to be *niha*, the fifth is quite illegible, and the last is certainly *sya*, so that the whole may be transcribed as *sēthi[niha] . . sya*. For two reasons it appears to me quite impossible that *sēthi* should have any connection with Sanskrit *śrēṣṭhīn* or a derivative of it, as Bühler thought.⁶ Firstly, Sk. *śrēṣṭhīn* cannot possibly become *sēthi* with a dental *th* in any Prakrit dialect. Secondly, a woman who is characterised as the *śiṣini* of some male person and the *śaḍhachari* of another, must have been a nun, as in the Jaina inscriptions at Mathurā these terms are applied to nuns only and never to lay-sisters. Now it goes without saying that a nun cannot be called a *śrēṣṭhīnī*, 'the wife of a banker.' As far as I see, there are two possibilities of explaining the passage. We have to read either *Sēthi[niha] . . sya śiṣini*, in which case *Sēthi[niha] . .* would be the name of Khudā's teacher, or *sēthi[ni Ha] . . sya śiṣini*, in which case *sēthini* would be an epithet of unknown meaning referring to Khudā, while the teacher's name would be *Ha* . .

At the end of A, after *Khudāyē*, Bühler reads *Dēva* . . , and combining this with the beginning of B, *pālasya dhita*, translates: 'by Khudā, daughter of Dēva . . pāla.' Such a statement would be highly improbable by itself, no other Jaina inscription of this class at Mathurā containing a specification of the relationship of a monk or a nun. And on closer inspection it will be seen that the reading *Dēva* . . cannot be upheld. The first *akṣara* is not *dē*, but a *nī*, with the left half of the base-stroke effaced, and the second *akṣara* is not *va*, but clearly *rva*. After *nirva* the photo-lithograph has a distinct *ta*, possibly with a superscript *r*. *Nirva[r]ta*, of course, is to be restored to *nirvartanā*, the last letter in the line having disappeared as in the preceding one.⁷ It thus appears that the donation was made by a lay-woman, the daughter of Pāla, and that the nun Khudā only acted as her spiritual adviser, which in every respect agrees with the usual state of things.

There remain some minor points. The second *akṣara* of the name of the king is a little blurred, but what is still visible of it in the photo-lithograph decidedly points to its having been *nī*, and not *ni*. There is altogether no certain instance of the spelling of the word with the dental nasal at Mathurā. In the two inscriptions edited by Bühler, *Ep. Ind.* Vol. I. p. 391, No. 19, and by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 31, No. 4,⁸ the reading *Kaṣishkasya* is beyond all doubt, and in the one edited by Cunningham, *ibid.* No. 5, the facsimile at any rate shows distinctly the same reading.⁹

In the last line of the inscription Bühler seems to have overlooked the *ā*-stroke in the *vā*, which is quite distinct in the photo-lithograph.¹⁰ On the other hand, I am unable to detect the *ā*-stroke in *mā*.

With these emendations the text will run as follows:—

A. 1¹¹ *Dēvaputrasya Ka[ni]shkasya sa[m] 5 hē 1 di 1 ētasya pūrvv[ā]yam Kottiyātō
gaṇātō Bahmadāsikātō [ku]-
2 lātō [U]chēnāgaritō śākhātō Sēthi[niha] . . sya śi[s]ini Sēnasya śaḍhachari
Khudāyē nirva[r]ta[nā]*

⁵ See below, No. 16.

⁶ In his translation of the inscription he calls Khudā 'consort of alderman (*sēthi*) . . . sēna.'

⁷ There is no reason why the *ku* should have stood at the beginning of line 2, as assumed by Bühler.

⁸ See below, p. 87, No. 6.

⁹ See below, No. 25.

¹⁰ The reading *Vādhamaṇasya* is found also in the inscription, *Ep. Ind.* Vol. I. p. 393, No. 27, though Bühler gives *Vadhamānasya* in his transcript.

¹¹ Bühler wants to restore *siddham* in the beginning of the inscription, but no traces of the word are discernible.

- B. 1 Pālasya dhita ya¹²
 2 Vādhamanasya prati[mā]

"In the year 5 of Dēvaputra Kaṇishka, in the first (*month of*) winter, on the first day, — on that (*date specified as*) above, — an image of Vādhamana (*Vardhamāna*) [was dedicated by] . . . the daughter of Pāla, the daughter-in-law of . . . , at the request of Khuḍā (*Kshudrā*), the *sadhachari* of Sēna, the female pupil of Sēthinīha . . .¹³ out of the Koṭṭiya gaṇa, the Bahmadāsika (*Brahmadāsika*) *kula*, the Uchēnāgari (*Uchchānāgarī*) *sākhā*."

No. 5. — Mathurā Jaina image inscription of Sam. 5;

edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 30, No. 2, and Plate.

Cunningham read this inscription, which is engraved on three sides of the pedestal of a Jaina statue: —

1. — . . Bodila bhedha Vāsu Devā pravi . . Siddhab Sam 5 — He 1 — Di. 12 —
 Asya purvaye koṭ . . Sragihato
 2. — Sarvasatwāhita Sukhaya . . ji-to Brahmadāsika to ubhāna karita . . Sati.

Cunningham added no translation to his transcript, but simply stated that the inscription 'records some gift by a lady named Brahmadāsi.' In his re-examination of the inscription in the *Vienna Or. Journ.* Vol. I. p. 176, Bühler, with the help of a rubbing, corrected the reading of the middle portion of the first line to *siddha = sa 5 hē 1 di 10 2 asyā purvayē Koṭ[iya]*, and justly remarked that the sides had been wrongly numbered, and that the second ought to be the first, the third the second, and the first the third. And in Vol. IV. p. 171 of the same journal he corrected also the middle portion of the second line to *[ku]lātō Brahmadāsikātō Uchānākaritō*. This last correction admits of a little improvement. If Bühler's reading were accepted, the word *kula* would stand before the proper name to which it belongs, whereas in all other inscriptions it invariably follows the proper name. And Bühler himself seems to have been not quite sure of his reading, as he thinks it necessary to observe that the *la* is slightly disfigured on the facsimile. The facsimile, however, shows as plainly as possible a *ṇā*, and not a *lā*, and there can be no doubt that *ṇātō* is to be restored to *gaṇātō*. The word *gaṇātō* must have immediately followed *Koṭ[iya]*, the name of the *gaṇa*, and this proves that Cunningham has wrongly numbered not only the sides, but also the lines on each side. The first line of the first side is followed by the second line of the same side, after which comes the first line of the second side, &c. The whole inscription reads:—¹⁴

- A. 1 Siddha[m] || Sa 5 hē 1 di 10 2 asy[ā] purvv[ā]yē Koṭ[t]i[ya]tō
 2 [ga]ṇātō Brahmadāsikātō Uch[ē]nākā(ka)ritō [sākhātō]
 B. 1 'Sr[i]grihātō sa[m]bhōgātō
 2 . . sa nīda (?)
 C. 1 . . i bōdhilabhē ē Vāsudēvā puvī
 2 . . sarva-sat[vā]nā[m] h[i]ta-sukh[ā]yē .

In this arrangement the general wording of the inscription in no way differs from the usual pattern. After the date follows the statement of the *gaṇa*, *kula* and *sākhā* of the monk at whose request the donation was made, and the phrase that it was made for the benefit of all beings, forms the conclusion. The only peculiarity of this inscription is the omission of the word *kulāto* after *Brahmadāsikātō*, which, undoubtedly, is due to a mere oversight of the engraver. The middle

¹² Restore *sva vadhā*.

¹³ Or, possibly, 'the *sēthinī* (?)', the female pupil of Ha . . .

¹⁴ All signs which do not appear in the facsimile, but may be inferred from a comparison with the numerous similar inscriptions at Mathurā, have been included in brackets. The *ṇā* which Bühler reads in *Uchānākaritō* is not warranted by the facsimile. On the other hand, the facsimile has distinctly *kā*, although, of course, the *k*-stroke may be merely accidental.

portion, which contains the name of the donor, cannot be made out from the facsimile.¹⁵ The rest may be translated as follows:—

"Success! The year 5, the first (*month of*) winter, the twelfth day, on that (*date specified as*) above, [at the request of] out of the Kottiya *gaṇa*, the Brahmadāsika [*kula*], the Uchēnakari (*Uchchānāgari*) śākhā, the Srigriha (*Srigrīha*) *sambhōga*, for the welfare and happiness of all creatures."

No. 6. — Mathurā Jaina image inscription of Saṃ. 9;

edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 31, No. 4, and Plate,

and by Bühler, *Vienna Orient. Journ.* Vol. I. p. 173, No. 2.

Bühler's restoration of this inscription is excellent, and his text only wants a few small corrections. The photograph of the front side of the stone lent to me by Prof. Kielhorn shows that the reading of the king's name actually is *Kaṇishkasya* as in the facsimile, with the lingual *ṇ*. The facsimile, again, has clearly the correct form *gaṇḍtō*, not *gaṇatō*, and . . . *lāta*, which is to be restored to *kulātō*, not *kulatō*. Of more importance is the reading of the name of the *kula*. Bühler transcribed Cunningham's facsimile as *tanibha* . . . , and, misled by the corrupt form *Vāṇijja* of the *Kalpasūtra*, corrected this to *Vāṇiyātō*. The facsimile, however, shows very distinctly a *tha* under the supposed *ta*. We are thus led to read *Tihāṇiyātō*, and although such a form would not be unaccountable in itself, I consider it unlikely, because the name is nowhere else spelt in this way, but exhibits in its beginning either *sth* (*Sthāṇiyātō*, *Ep. Ind.* Vol. I. p. 385, No. 7; p. 391, No. 21; *Sthāṇikīyā*, *ibid.* p. 386, No. 8, *st* (*Sṭāṇikīyātō*, *ibid.* Vol. II. p. 203, No. 18).¹⁶ or *ṭh* (*Ṭhāṇiyātō*, *ibid.* Vol. I. p. 383, No. 3; p. 392, No. 22; *Ṭhāṇiyātō*, *ibid.* p. 395, No. 28; *Ṭhāṇiyātō*, *ibid.* Vol. II. p. 202, No. 15). Under these circumstances I think it more probable that the *t* is merely due to a fault of the designer, and that the real reading was *Sthāṇiyātō*.

No. 7. — Mathurā Jaina image inscription of Saṃ. 25;

edited by Bühler, *Ep. Ind.* Vol. I. p. 384, No. 5, and Plate.

Bühler read the second portion of this inscription, after the statement of the *nirvartana*:—

(I. B. 2) . . . [Nā]dia[ri]ta Jabha[ka]sya vadhu Jaya[bha]ṭṭāsya kuṃtūbinīya Rayaginiye [vu]sya

and translated: "a *vasuṇya* (?) (*was dedicated*) by Rayagini, the daughter-in-law of Jabhaka, from Nāndigiri (?), (and) wife of Jayabhaṭṭa."

The photo-lithograph allows us to correct the first word with absolute certainty. Instead of *ari* the plate shows distinctly *syadhi*. The reading *Nādisya dhita* is quite in accordance with the common practice of these inscriptions to describe the relationship of the donatrix in the order 'daughter of N. N., daughter-in-law of N. N., wife of N. N.'; see, e. g., *Ep. Ind.* Vol. I. p. 392, No. 2; p. 383, No. 4; p. 388, No. 11; Vol. II. p. 207, No. 32; p. 210, No. 37, &c. The town of Nāndigiri therefore is to be struck out from the list of the towns of Ancient India.

Also with regard to the translation of the words *rayaginiye vasuṇya* I differ from Bühler. I think, it will be admitted that *rayagini* has not the appearance of being a proper name, and I would suggest to take it as an appellative in the sense of 'the wife of a *rayaga*,' in analogy to such terms as *vihārasvāminī*, 'the wife of a *vihārasvāmin*' (*Gupta Inscr.*, Corp. Inscr. Ind. Vol. III. p. 263), *mahāśeṇāpatinī*, 'the wife of a *mahāśeṇāpati*' (*Arch. Surv. West. Ind.* Vol. IV. p. 114, No. 16), *sārttavāhinī*, 'the wife of a *sārtthavāha*' (*Ep. Ind.* Vol. I. p. 395, No. 29).¹⁷ *Rayaga* would be the true Prakrit equivalent of Sk. *rajaka*, 'washerman or dyer'.¹⁸ Other members of the artisan class

¹⁵ Perhaps line B. 2 is to be restored to *aya nirva[ri]tā*.

¹⁶ See below, No. 16.

¹⁷ Compare also the similarly formed feminines *śikhinī*, *śikini*, *śisini*, *śisini* (*Ep. Ind.* Vol. I. p. 382, No. 2; p. 384, No. 5; p. 385, No. 7; p. 388, No. 12; Vol. II. p. 206, No. 28, &c.) and *amīśvārikini* (*ibid.* Vol. II. p. 204, No. 21).

¹⁸ The transition of *j* into *y* is found in the Mathurā inscriptions also in *Ṭhāṇiyā* (Sk. *Ṭhāṇiyā*), *Ep. Ind.* Vol. I. p. 383, No. 4.

are found among the donors of images in the Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 391, No. 21; Vol. II. p. 203, No. 18; p. 205, No. 23.¹⁹

If it is admitted that *rayagini* is an appellative noun, it follows that the proper name must be contained in the following word which Bühler read *vusuya*. The ending *-uya* indicates that the word is the gen. sing. of an *ū*-stem, which in these inscriptions generally ends in *-uyé*, and occasionally in *-áyé* or *áya*; compare *vadhuyé*, *Ep. Ind.* Vol. I. p. 387, No. 10; p. 392, No. 24; p. 396, No. 30; Vol. II. p. 207, No. 32; *vadhúyé*, Vol. I. p. 388, No. 11; *vadhúya*, Vol. II. p. 205, No. 22. That the spelling *-uya* is not found hitherto, is certainly merely accidental, as the *ā*- and *i*-stems show the corresponding forms in *-aya*, *-iya* by the side of the common forms in *-áyé*, *-ayé*, *-iyé*, *-iyé*; compare *aya-Saṅgamikaya śiśiniya*, *Ep. Ind.* Vol. I. p. 388, No. 12; *Jitāmitraya*, *ibid.* Vol. II. p. 203, No. 16; *Dēviya*, *ibid.* Vol. II. p. 210, No. 37. More difficult is the settling of the first syllable of the name. It would seem easy enough to correct *Vusuya* into *Vasuya*, especially as the diminutive *Vasulā* actually occurs as a woman's name in the Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 382, No. 2, and p. 388, No. 12, but the photograph does not seem to countenance such an alteration, and for the present it will perhaps be safest to rest satisfied with Bühler's reading.

There is still another point to command attention. Bühler thought *vusuya* to be the last word of the inscription; in my own interpretation one more word would be required to furnish the necessary supplement of the genitive *Vusuya*. Now, the photograph shows distinctly the upper part of the word *dānaṃ* below the syllables *gaṇa* in the beginning of line B. 2.

I therefore propose to read the second portion of the inscription:—

B. 2 Nādiya dhita Jabha[ka]sya vadhu Jaya[bhaṭṭa]sya kuṃṭūbintya²⁰
rayaginiyē²¹ [Vu]suya
3 [dānaṃ]

and translate:—

" . . . the gift of Vusu (?), the wife of a dyer, the daughter of Nādi (*Nandin*), the daughter-in-law of Jabhaka, the wife of Jayabhaṭṭa."

NO. 8. — Mathurā stone inscription of Sam. 28;

edited by Growse, *Ind. Ant.* Vol. VI. p. 217, No. 1, and Plate.

As far as I see, it is generally assumed that Kanishka's reign extended until the year 28 of the era used in the northern inscriptions, and that in the following year he was succeeded by Huvishka. The evidence for these suppositions is chiefly derived from the inscription quoted above. In dealing with the intricate questions of the history of this period the greatest amount of exactness and discretion is indispensable, and it therefore seems to me not superfluous to point out that the assumption of the year 28 being the final year of Kanishka's reign is not only wholly unfounded, but in all probability actually wrong.

The latest reliable date of Kanishka is the year 18 in the Mānikyāla inscription (*Journ. As. Ser. IX. Vol. VII. p. 8*); the first indisputable record referring to Huvishka is a Mathurā inscription dated in Sam. 33 (*Ind. Ant.* Vol. VI. p. 217, No. 2). It is true, there is another inscription at Mathurā (*Ep. Ind.* Vol. II. p. 206, No. 26) mentioning the mahārāja Dēvaputra Huksha as he is called here, and supposed to be dated in the year 29, but the inscription is in a pitifully fragmentary state, and even if the reading *ēkunati[śa]* should prove correct, it would still be quite uncertain whether this word should be taken as referring to the number of the year or, *e. g.*, of the day, so that for historical purposes the record is of no account. Of even less consequence is the Mathurā inscription, *Ep. Ind.* Vol. I. p. 385, No. 6, the date of which reads *mahārāja śhkaśa sam 20 9 hē 2 di 30 asma kshunē*. No trace has been left of the *aksharas* preceding *shkasa*, and these syllables may be restored to [Kaṇi]śhkaśa as well as to [Huvi]śhkaśa. The state

¹⁹ Compare Bühler's remarks, *Vienna Or. Journ.* Vol. IV. p. 334.

²¹ Also the readings *rayagintyē* or *rayagintyē* would be possible.

²⁰ Or, perhaps, *kuṃṭūbiniya*.

of things is very similar in the case of the inscription of Sam. 28. It is only a very short fragment which reads : —

. . . . shkasya rājya-sa[m]vatsarē 20 8 hēmanṭa 3 di . . .

Here, too, there is no reason whatever why *shkasya* should necessarily be restored to [Kasi]shkasya. The restoration [Huvi]shkasya or [Hu]shkasya would suit equally well, to say the least, and there is even one little point to recommend the last-mentioned reading as the most plausible one. Before *shkasya* the photo-lithograph distinctly shows the remains of a letter, consisting of a stroke slightly bent to the right. It cannot possibly be the rest of a *ṣi* or *ṣi*, nor is it likely to be the lower end of the vertical of a *ka*, because this is generally either straight, or, on the contrary, turned to the left. It looks exactly like a subscript *u* and therefore [Hu]shkasya, which closely resembles the *Hukshasya* of the inscription mentioned above, appears to me the most probable reading. Of course, in that case we should have to read [Huvi]shkasya also in the inscription of Sam. 29. But until fresh materials are brought to light, I would myself not attach too much weight to these restorations, and I shall be satisfied with having shown that, as far as our evidence goes at present, we can safely claim only the years 5-18 for Kanishka and 33-60 for Huvishka, though the latter probably was on the throne already in 28.²³

No. 9. — Mathurā Buddhist image inscription of Sam. 33 ;
edited by Growse, *Ind. Ant.* Vol. VI. p. 217, No. 2, and Plate.

Although this inscription seems to be in a fair state of preservation, the editor has not succeeded in making out more of it than the date and the *aksharas bhikshusya . . . kasya . . . takasya Buddhakasya*. He tells us besides that Cunningham took the word ending in *takasya* to be *tripitakasya*. Unfortunately the reproduction of the inscription on the accompanying plate is on so small a scale as to make a complete deciphering of the text almost impossible. As far as I can see, the text runs : —

1 Mahār[ā]jasya dēvaputrasya Huv[i]shkasya sam 30 8 gri 1 di 8 bhikshusya [Maha]-
sya trāpitakasya antēv[ā]s[i]n[i]yē bhikshu[ī]yē trē[pitika]yē Buddha . . . yē

2 bhāginēyīyē bhi[kshu]ṇīyē Dha nīyē Bōdhisat[tv]ō p[r]atithā[p]i[tō]
. sahā mātāpitihi

"In the year 33 of *mahārāja* Dēvaputra Huvishka, in the first (*month of*) summer, on the eighth day, a Bōdhisattva was set up by the nun Dha nt, the sister's daughter²⁴ of the nun Buddha who knew the *tripitaka*, the female pupil of the monk Maha (?) who knew the *tripitaka*, . . . together with her father and mother."

The reading of the *bhikshu's* name, *Mahasya*, is very doubtful. On the other hand the restoration of *trē yē* to *trēpīṭikāyē* seems to me pretty certain, though, of course, it cannot be asserted that this was the exact form of the word.²⁵ The term *trēpīṭaka* or Sk. *trāpīṭaka* is found again in a Kanheri inscription²⁶ and in the Set-Mahet inscription mentioned below, and nuns who were versed in the three *piṭakas* are spoken of also in the *Dīpavamsa*, XVIII. 18 ; 19 ; 33.

This inscription is of considerable importance for the history of Buddhist art. There are comparatively very few ancient Buddhist statues with inscriptions accurately stating the character of the represented person. In his valuable paper on an ancient inscribed Buddhist statue from Srāvastī,²⁷ Dr. Bloch has collected all the cases known to him. He enumerates five inscriptions in which the figure is called an image of *Buddha*, of *Sāsṭri*, of *Bhagavat*, of *Bhagavat Sākyamuni*, or of

²³ I would here acknowledge my indebtedness to Dr. Fleet for some of the above suggestions. He drew my attention to the improbability of the reading [Kasi]shkasya in the inscription of Sam. 28. But he differs from me in the final restoration of the word.

²⁴ Compare the Kuṣā inscription No. 5 (*Cave-Temple Inscriptions*, No. 10 of the brochures of the Archaeological Survey of Western India, p. 6), where a Buddhist nun is described as the *bhāginēyī* of two monks.

²⁵ It may have been also *trēpīṭakāyē*, *trēpīṭakīyē* or *trēpīṭakīnīyē*.

²⁶ *Arch. Surv. Rep. W. Ind.* Vol. V. p. 77, No. 6. ²⁷ *Journ. As. Soc. Beng.* Vol. LXVII. Part I. p. 274 ff.

Bhagavat samyak-sambuddha sva-mat-āviruddha, and two — an inscription from Buddhagayā²⁷ and the Set-Mahet inscription which forms the special subject of the paper — where the statue is described as that of a Bôdhisattva. To the latter class the present inscription is to be added.

A detailed comparison of the three Bôdhisattva statues is impossible for the present, as no photographs or drawings are available either of the Set-Mahet or of the Mathurā image, and Mr. Growse's remarks, moreover, are rather brief, yet I should like to draw attention to the following points. According to the statements of Growse, Bloch and Cunningham, the three figures are all of the same material. The Mathurā statue is 'in red sandstone,' the Set-Mahet statue is 'made of a sort of reddish sandstone, the same material which the Mathurā sculptures of the Kushāna period are made of,' and the stone of which the Gayā statue is made is 'a sandstone like that of Mathurā, and not from a local quarry.' In size also the three figures seem to be similar. The seated Gayā figure is 3' 9" high by 3' 1" in breadth across the knees; the standing Set-Mahet figure is 11' 8" in height; for the Mathurā figure no exact measurements are given, but Mr. Growse speaks of a 'large' figure. Besides the three statues apparently agreed in attitude. Of the Mathurā figure only the crossed legs remain, which show — to use Mr. Growse's own words — that 'the left hand of the figure had rested on the left thigh, the right being probably raised in an attitude of admonition.'²⁸ The Gayā figure is a little better preserved. Of the left arm only the upper portion is left, but its direction and remains of the hand, distinctly visible on the phototype, prove that it originally rested on the left thigh. The right arm is entirely gone, but from the absence of any marks on the body or the right thigh it may be safely concluded that it was raised up without touching the body. The Set-Mahet statue also has lost the right arm, but Dr. Bloch remarks that 'we may fairly well conclude from the analogy of similar statues that the missing right arm of the figure was represented lifted up in an attitude which is usually called that of "teaching," while the left hand rested on the hip, holding up the end of the long vestment.' Whether the Mathurā figure also had the right shoulder bare like the other two figures, cannot be decided. There would thus seem to be only one point of difference: the Mathurā and Gayā figures are seated, whereas the Set-Mahet figure is standing.

The close resemblance between the three statues sufficiently shows in my opinion that they are the work of the same school of sculptors, and that they cannot be very widely separated from each other in time. Probably the Set-Mahet figure is the oldest, as Dr. Bloch describes the characters of the inscription as belonging to the Northern Kshatrapa type. The Gayā figure, on the other hand, is certainly the latest of the three, though perhaps not so much later than the others as Dr. Bloch seems to think. At any rate, the advanced form of the *sa* in the Gayā inscription, which he takes as a criterion for its late origin, is found also in the Mathurā inscription; compare *mahārājasya dēvaputrasya* and *saṃ*.²⁹

Considering the scantiness of the evidence, the question which particular Bôdhisattva is represented by the three statues cannot be touched at present. But whether they be meant for Maitrēya or one of the numerous other Bôdhisattvas, they certainly bear witness to the wide spread of the Mahāyānist Bôdhisattva worship during the first century of our era.

No. 10. — Mathurā Jaina elephant capital inscription of Sam. 38;

edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 32, No. 9, and Plates V. and XIV.,

and by Bloch, *Journ. Beng. As. Soc.* Vol. LXVII. Part I. p. 276, note 2.

This inscription is engraved on the base of the large figure of an elephant surmounting the bell capital of a pillar, and records the setting up of a *Nandivīśāla* by the *śrēṣṭhīn* Rudradāsa, the son of the *śrēṣṭhīn* Śivadāsa, for the worship of the Arhats. The last phrase characterises the donor as a member of the Jaina community.

²⁷ Cunningham, *Mohābhidhi*, p. 53, and Plate XXV.

²⁸ Mr. Growse adds that another mutilated figure of similar character, but without inscription, was found on the same spot, and that these were the only specimens he had with the hands in this position, in all the others the hands being crossed over the feet.

²⁹ A more detailed examination of the Gayā inscription I reserve to some future occasion.

The only word in this inscription which presents any difficulty, is *Nandiviśāla*. Cunningham translated it by 'this elephant (or great Nandi);' in Dr. Bloch's opinion it may mean that the pillar was 'as big as Nandin,' or it may be a technical term of unknown meaning. None of these suggestions seems plausible to me. *Nandiviśāla* can hardly be an appellative with the meaning of elephant, nor can it be rendered by 'the great Nandin,' as this would be *viśālō Nandi* in the language of the inscription, and Nandin, moreover, is the name of Śiva's bull and not of an elephant. Against Dr. Bloch's view it may be urged that it would scarcely be appropriate to compare the circumference of a pillar to that of a fabulous bull, and that such a fanciful comparison, at any rate, would be out of place in a record which for the rest is as dry and laconic as possible.

The placing of the inscription immediately below the elephant makes it highly probable, I think, that it has a special reference to that figure, and that *Nandiviśāla* therefore is the proper name of the elephant represented in the sculpture, and not a technical term for a sort of pillars. What makes me believe in the correctness of this interpretation, although I am unable to point out an elephant of that name in Jaina literature, is the fact that *Nandiviśāla* occurs as an animal's name in the Pali canon of the Buddhists. In the *Suttavibhaṅga*, Pāc. II, 1, the Buddha tells a story of a bull at Takkaśilā who could draw a hundred loaded carts, and the name of this extraordinary animal is given as Nandiviśāla. The same story was made up into a *Jātaka* (No. 28), called the Nandiviśāla-jātaka after the name of its hero who is identified here with the Master in a former birth. In the present limited state of our knowledge about the Jaina Nandiviśāla, it would be quite unsafe and useless, of course, to enlarge on his possible relation to his Buddhist namesake. But the name itself is of interest as proving the existence of Śaivism in the fourth century B. C., for it seems to me beyond any doubt that the etymological meaning of the name is 'as big as (Śiva's bull) Nandin,' and not 'Great-Joy,' as translated by Mr. Chalmers.³⁰

AN ABSTRACT ACCOUNT OF THE SEARCH FOR HINDI MANUSCRIPTS FOR THE YEARS 1900, 1901 AND 1902.

BY SYAM SUNDAR DAS, B.A.

(Concluded from p. 27.)

³⁰ *Jātaka*, transl. under the editorship of E. B. Cowell, Vol. I, p. 71. From the appellation Nandiviśāla and the donor's and his father's name in the Mathurā inscription Dr. Bloch draws the conclusion that 'Jainism apparently already in those early times was as much mixed up with Śaivism as its greater rival Buddhism.' Perhaps this assertion goes a little too far. Rudradāsa may have been a convert from Śaivism to Jainism which would satisfactorily account for his name, and if my explanation of Nandiviśāla should be accepted, this name would presuppose the knowledge of Śiva's *vāhana*, but in no way as an integral part of the Jaina religion.

GLIMPSES OF SINGHALESE SOCIAL LIFE.

BY ARTHUR A. PERERA.

(Continued from Vol. XXXII. p. 437.)

(6) Black and White Magic.¹⁷

THE occult practices in the Island can be classified under four heads : (1) minor charms and leechcraft ; (2) the invocation and exorcism of demons ; (3) the worship of demi-gods, tutelary spirits, and local deities ; and (4) the adoration of planets. The influence of Buddhism led to the division of spirits into devils and demi-gods according to their more or less humane qualities, and to the latter were subsequently added the Hindu divinities modified in character.

1.—Minor Magical Practices.

Charms are used for several trifling purposes, and any one who has the patience to learn them by heart dabbles in them. To find out a theft a cocoanut is charmed (*pol-pōh anavā*) and placed where a thief has made his escape ; while the operator holds it with a stick attached to its end he is led along the track to where the thief is ; or the persons suspected of it are made to stand with bared backs round an ash-plantain tree, and as it is struck with a charmed creeper the culprit gets an achy streak on his back.

Love-philtres consist of rubbing a medicine on one's face and showing himself to a girl ; mixing a herbal preparation with her food ; causing a betel to be chewed ; sprinkling oil on her or wearing a thread from her garment.

Some pretend to read the present, past and future by a betel smeared with a vegetable paste (*anjanan eliya*) ; a female elf (*anjanan dēvi*) appears on the leaf and shows what is wanted.

A juggler draws a magic veil over the eyes of his spectators (*esbenduma*) to avoid detection.

Charmed ashes and sand are thrown to kill worms and other insects that destroy crops ; and magical formulæ are used to guard against elephants, crocodiles, dogs, leopards, bears, buffaloes, wild cattle, &c.

This incantation makes a dog take to its heels, if muttered thrice on to the hand and stretched towards it, " *On namō budungē pāvuddē bathēpu ballā jhik. On erin pāsē budunne pāvuddē bat kāpu ballā kikki kukkā nam tō situ. On Buddha namas sake situ.*"

Elephants are kept away by " *On sri jātā hārē bhāvdū arahan situ.*"

As a preventive against possession a thread spun by a virgin (*kanyā nūla*) is charmed over live-coal with resin and turmeric and tied round one's arm, waist or neck ; it has as many knots as the number of times the charm is repeated. Amulets (*yantra*), too, made of five kinds of metal,

viz., gold, silver, copper, brass and iron (*paslô*), and enclosing a mystic piece of *ola*, are used for the same purpose.

The usual remedy for minor complaints is to cut a lime or two with an areca-cutter after an incantation or to mutter it over some water procured from a smithy in which iron has been cooled, or over a little oil, a betel-leaf or chunam and apply it to the affected part.

To cure a sprain, a mother who has had twins is made to secretly trample it every evening for a couple of days; and for whooping cough is given gruel made of seven grains of rice silently collected in a *chunam* receptacle (*killôte*) from seven houses on a Sunday morning. A touch with a cat's tail removes a sty; and a toothache is cured by biting a balsam plant (*kûdalu*) uprooted with the right hand, the face averted.

2. — Invocation of Demons.

Divers diseases or death is inflicted by the **Pilli**, **Angam** and **Huniam** invocations, and to perform the ceremonial there is a special class of professional magicians (*kattadi*) who bind to themselves by the *jivama* rite the demon who is to do their bidding (*yaksabandanaya*).

At dawn, noon or midnight he goes to a lonely spot where three roads meet or to a grave-yard, and, lying on his back, calls on the devil who is to aid him. Near him are (1) a platform made of *gurulla* sticks (*Leea sambucina*) and of the inner bark of the *beli patlâ* shrub (*hibiscus hiliacus*) with nine kinds of flowers, powdered rosin, betel, a *kanya nûl* coloured with turmeric and a copper coin — all on a plantain-leaf (*mal-bulat tattuva*); (2) another with five kinds of roasted seed, seven kinds of curries, boiled rice, fried grain, a roasted egg and a cock (*pideni tattuva*); (3) an earthen incense-pan with live-coals, and a fire made of the wood of five kinds of lemon (*pas-pengiri*). The demon invoked tries at first to frighten the *kattadiyâ*, and if he succeeds, takes away the other's life as a forfeit.

A **Pilli** causes immediate death and is rarely practised. The *kattadiyâ* procures a whole corpse or only the skull, teeth, bones, nails, or hair of a man, woman, or child (a first-born is preferred) and takes it to the *jivama* ceremony. In the course of it the demon assumes the form of a boy, girl, animal, bird, reptile or insect, is given the name of the intended victim and ordered by the magician to inflict the fatal wound: to stab, strangle, bite or sting him.

On the devil's return the magician lays him by sprinkling some water; only if the victim be himself a sorcerer can he ward off a **Pilli**; for by a counter-charm he can direct the operator to be killed instead.

An **Angama** affects within seven hours and causes throwing up of blood through the nose and mouth. The *kattadiyâ* takes some article that the victim had possessed or touched — a flower, a cocoanut-leaflet, a betel, a stick, &c.; performs the *jivama* and touches him with it or fans him, or stretches it towards him or keeps it in the hand and looks at his face or blows so that the breath may fall on him or leaves it in some place that it may be picked up by him.

A **Huniam** takes effect within intervals varying from a day to several years. The *kattadiyâ* procures a lock of hair, a nail-paring, or a thread of the garment of the person to be injured. An image is next made to represent him, nails made of five metals are thrust at each joint and his name written on a leaf and inserted in its body. All these are buried after the *jivama*, where the victim has generally to pass; and when he does so, he falls ill with swelling, or stiffness of joints, or burning sensation in the body or disfigurement of the mouth, legs, and arms.

3. — Exorcism of Demons.

Spirits who, of their own accord or with leave of superior spirits like their king **Wesamunu Rajâ** or by the aid of **Huniam** and **Angam** charms, have afflicted human beings are exorcised by

a devil-dance, which is almost the same in every case, but the charms, the masks, and the images used depend on the afflicting devil, and the elaborateness of the ceremony on the means of the patient and the gravity of the disease. The first duty of the *kattadiyā* is to find out which particular devil has caused the illness, and Knox gives a quaint account of how this is done (page 76): "With any little stick they make a bow, and on the string thereof they hang a thing they have to cut betel-nuts, somewhat like a pair of scissors; then holding the stick or bow by both ends they repeat the names of all, both gods and devils; and when they come to him who hath afflicted them, the iron on the bow-string will swing." A clay image of this demon is next made, and in the compound near the patient's house an octagonal figure (*atamagala*) of 20 or 30 sq. ft. is marked with ashes, and bounded with sticks of five different kinds of lemon or the stems of plantain-trees, which are connected with a thread, spanned with areca arches, decorated with palm-leaflets and cocoanut-shells containing oil and lighted wicks. At the corners of the enclosure are drawn figures of the *triśūla*; on one side are erected *mal bulat* and *pideni* sheds and, between them, a platform about 4 ft. high on which is placed the figure of the afflicting devil, or, in cases of special female diseases, a new earthen pot with an areca or cocoanut blossom. Split reeds are arranged at the centre of the mystic circle in different diagrams on which the *kattadiyā*, with his attendants dressed in red and white jackets, masked and with *gurulla* leaves round the waist and head, go through a series of dances, drawling out a mournful chant and keeping time with their hands and bell-attached feet to the music of the tom-tom beaters.

The dance commences a little before midnight, and as it goes on, the magician raises the torch, which he carries in his right hand, to a flame by throwing in powdered rosin, or approaches the patient seated about 7 or 8 ft. from the circle, facing the clay image, with a white cloth covering from head to foot, rubs turmeric, water and oil on his head, makes some mesmeric passes, and all but suffocates him with the smoke of a potful of narcotics. A couple of hours after, the *kattadiyā* retires to an ante-shed, sometimes carrying the patient with him; a short interval and he returns after a bath and a change of costume, but still masked. Dancing and music recommence, and towards dawn seven limes are placed between the patient's feet and the circle and cut one by one and thrown into a chatty full of water; as the magician cuts each lime he repeats a charm and the patient places his foot near the other. When this is over, the sick man is carried within the circle and seated facing the north with a rice-pounder, paddy, and a cocoanut by him. A coil of creepers is next put round his neck, shoulders and ankles and slit with an areca-cutter. The sacrifices (*dola*) due to the exorcised devil follow, and a pumpkin gourd (*puhul* or *labu gediya*) is kept on the breast of the *kattadiyā* lying on his back and cut in two with a knife by the patient; the parts are thrown into the sea or a piece of water. Lastly, the earthen pot is broken or the clay figure carried with loud shouts to the haunt of the devil and left there with offerings.

Maha Sohona transforms himself into **Lē Sohona** and **Amu Sohona** and afflicts with cholera and dysentery; is 122 feet tall, has the head of a bear, with a pike in his left hand, and in his right an elephant whose blood he squeezes out to drink; presides over graveyards and where three roads meet. **Biri Yaksayā** causes a flux of blood, and is present at the death-bed; has a monkey-face, carries in one hand a cock and a club in the other, with a corpse in the mouth; and generally haunts fields. **Kalu Kumāra Dēvatāwa** or **Kalu Yaksayā** destroys conception, delays childbirth and causes puerperal madness; is a young man of a dark colour, and is always exorcised by breaking a new earthen pitcher. **Sannu Yaka** transforms himself into **Oddi Takā** and **Huniam Takā**; causes different forms of coma; has cobras twisting round his body with a pot of fire about him; holds a rosary (*lakveliya*) in his hand, rides on a horse, and is exorcised with the most elaborate of devil dances. **Mandana Yaksani** is a she-demon, causes sensuality and resides near rivers and waterfalls. **Balakiri Yaksaniyō** are the she-demons who afflict children.

Ayimaha Yaksayā or **Mōlan Garavvā**, **Dala Rākshayā**, **Yama Rākshayā**, **Pūrnika**, **Ratna Kūtayā**, **Nila Giri**, **Nanda Giri**, **Chandra Kawa**, **Mārakā**, **Asurayā**, **Nāta Giri** and

Pei Madulla are the twelve **Garā Yakku** who haunt every nook and corner and destroy crops, make trees barren, new houses inauspicious, send pests of flies and insects, and reduce families to abject poverty. They are propitiated by a special dance called **Garā Yakuma** described above (*ante*, Vol. XXXII. p. 434).

Disembodied spirits who love the things they have left behind hover on earth and make their presence known by emitting different smells or by contaminating food (*perētayā*), by destroying the plates and furniture of a house (*gevalayā*), by apparitions (*avatūra*), or by pelting stones and creating other strange sounds (*holman*); they are afraid of iron and lime, and when over-boisterous a *kattadiyā* rids them from a house by nailing them to a tree or enclosing them in a small receptacle and throwing it into the sea; they are imprisoned till some one unwittingly sets them free, when they again commence their tricks with double force.

A woman who dies in parturition and is buried without removing the child becomes a **Bōdirimar**; she is short and fat and rolls like a cask and kills men whenever she can; the females chase her away with threats of beating her with an *ikle*-broom.

Nurses hush children by calling on the kidnapping goblin, indiscriminately named **Billā**, **Gōnibillā**, **Gurubāliya**, and **Guruhāmi**.

4. — *Worship of local deities.*

The chief local deities are worshipped at their respective *dēwālas*, where the incumbent (*kapurāla*), after his morning ablutions, attends to the wants of the god: he lights a taper three times a day on the altar of the sanctuary, offers him food, performs some mystic rites, rings a bell and sprinkles water on the sacred vessels; the aid and protection of the tutelary spirits of the field, hill, wood, cave, tree or river are implored at their special haunts by lighting tapers, burning incense and offering flowers on temporary platforms or on raised granite slabs of rock. Annual festivals are held in the honour of the former, at all the *dēwālas*, between July and August; those at Kandy, Dondra and Kateragama are the most known.

Vishnu, a candidate for Buddhahood, is identified with the third of the Hindu Trimurti, and is the guardian angel of the island. Vows made to him at some anxious moment are always fulfilled by offering presents at his shrine.

Kateragama deviyō is the son of the god of war who assisted Rama in his great war with Ravana. It is not uncommon to find an accused person or a chaste wife swear to his innocence or her fidelity before his image; they stand on the steps of the *dēwāla*, take the usual oath, cry out "*deyyō sākki*" (god be witness) a dozen times, retire to a lonely hut by a river and remain there three days awaiting the consequences. He is also implored by husbands to cure their wives of sterility; they roll on the dust along the road, their feet tied and carrying a cocoanut in their hands clasped above the head, and as they reach the entrance of the *dēwāla*, dash the cocoanut to pieces. The owner of a garden sometimes dedicates his trees to this god by tying cocoanut leaflets round them and promises to offer him a share of the nuts; no one steals them fearing the avenging displeasure of the deity.

Before one starts on a journey he entrusts himself to the guardian deities of the four quarters (*kalara varan deviyō*).

Nātha is to be the future **Maitri Buddha** and is now biding his time in the *tusita* heaven; **Saman** or **Lakshman** is the half-brother of Rāma and the guardian angel of Adam's Peak; and **Alut Yakinni** has attributes similar to *Pārvati*.

Pattini is the goddess of chastity, and when incensed inflicts small-pox and other epidemics; to avert her displeasure and ensure protection to the inhabitants, a *kapurāla* or her special priest

(*pattinikāmi*) either travels, accompanied by a couple of musicians, from village to village, with a pot containing margosa oil and a cocoanut flower on his head, or presides over the ceremonies known as **Porapolgahanava, An Edima and Ganmaduva.**

In the first the villagers divide themselves into their hereditary factions: **Yatipila** (lower party) favoured by **Pattini** and **Udupila** (upper party) by her husband. The two leaders place themselves at a distance of 30 feet, and after a preliminary invocation by the officiating priest, the upper one bowls a ripe husked cocoanut (*pot*) at his adversary who meets it with another in his hand. This goes on till the receiver's nut is broken, when he begins to bowl. One side is declared winner when the stock of nuts of the other party is exhausted.

For the next religious game an open space of ground is selected and the trunk of a tree is buried at the centre of it. At the distance of a few yards is placed the log of a cocoanut tree, about 20 feet high, in a deep hole large enough for it to move backwards and forwards; and to the top of it thick ropes are fastened. The opposing parties bind two horns (*an*) together artfully, and, tying one to the base of the trunk and the other to that of the log, pull away at the ropes with all their might till one of them breaks. During the game the priest chants sacred hymns and burns incense in a shed close by.

At the end of both these ceremonies the conquering party goes in procession round the village, and the defeated side has to undergo a lot of abuse and insult which are said to remove the bad effects of their defeat.

The **Gan-Maduva** generally follows either of the above and lasts for a period of seven days. A temporary building, nicely decorated with flowers and fruits, is erected, in which an altar is placed containing the armlets (*halamba*) of the goddess. A branch of the jack-tree is cut with great ceremony by the incumbent and is carried into it by his assistants (*eduro*) and kept on the east side with a little boiled rice, a cocoanut flower, two cocoanuts and a lamp. A *pandal* is next erected in front decorated with leaves and flags; and at the appointed hour the officiating priest carries to it the sacred insignia with music, and as he lays them there all present make obeisance. Water mixed with turmeric is sprinkled on the floor, resin is burnt and a series of dances mimicking village social life continues the whole night, varied by the priest walking on heaps of live-coals. The rites terminate with the ceremony of boiling milk, followed by a miniature representation of horn-pulling and sometimes by breaking the sacred earthen vessel at the nearest stream.

Pattini participates in the sacrifices made to her with **Devol Yakka** and **Mangara Deviyō**. The last-named is the twin-brother of **Gopalu Yaksaya**, who torments cattle at night and inflicts them with murrain.

Wesamunu Raja is the devil-ruling god. **Mahasen** is a deified king of Ceylon (B. C. 277-304) and worshipped as an incarnation of **Kateragama Deviyō**. **Wira Munda Deviyō** has an annual sacrifice ten or fifteen days before the Singhalese New Year. **Hena Kanda Bisō Bandāra** was born of a wood-apple (*beli*) and is invoked as the incarnation of **Skanda Kumāraya's** queen. **Wahala Bandāra Deviyō** and **Malwattē Bandāra** are the ministers of Vishnu and implored to cure possession. **Kalu Bandāra** is the god of the chase propitiated by hunters when entering into a strange district. **Sundara Bandāra** protects them who invoke him before sleeping. **Malala** or **Gala Bandāra** haunts precipices. **Bahirawa Yaksaya** lives on a hill and guards the metals and gems in the earth; a girl was formerly sacrificed to him every year.

The **Kohomba Yakun** steal the crops of a field and are propitiated by agricultural ceremonies. The **Wali Yakun** are three heroes, one the offspring of Vishnu, the other sprung from a lotus, and the third from grass. **Baddrakali** is sought for winning law-suits and subduing rivals; and **Ganēsa** is invoked by children before reciting the alphabet for the first time.

5. — Adoration of Planets.

Sickness is not only caused by the displeasure of gods and demons but as well by the malignant influence of the stars; an astrologer for a handful of betel, *bulat hurulla*, and a few coins reads one's *ola* horoscope (*handakana*), and finds out which planet is the cause of the complaint. To counteract the evil, a **Bali** ceremony is performed or a stone sacred to the baleful planet is worn: a sapphire for Saturn, a topaz for Jupiter, a coral for Mars, a diamond for Venus, an emerald for Mercury, a moonstone for the waxing moon, a pearl for the full moon, a cat's eye for the waning moon, and a ruby for the sun.

For the **Bali** rite the seven planets are represented by painted clay images on a large platform of split bamboo — measuring altogether 10 or 12 square feet. The tom-tom beaters stand behind and play their drums, while in front the astrologer and his assistants — all of the Beravâyâ caste — with torches in their hands, dance and recite some propitiatory stanzas. The patient sits the whole time opposite the images, holding in his hand a lime connected by a thread with the chief idol; near him are strewn limes, flowers, betel, and dried paddy, and a stander-by throws portions of an areca-flower broken off at the end of each verse into a basin of water.

(To be continued.)

MISCELLANEA.

THE NAVAGRAHA OR NINE PLANETS,
AND THEIR NAMES.

The *Navagrahah* or "nine planets" of the Hindus are the five planets, properly so called, the sun and moon, with *Râhu* and *Kêtu* — the moon's ascending and descending nodes. The worship of these appears to have originated in judicial astrology and in the belief that the planets had a great influence over personal destinies. Hence they are divided into *śubha-grahâh* or *śad-grahâh*, — auspicious, and *krâra-grahâh* or *pâpa-grahâh*, — those that are inauspicious. The first includes *Brihaspati*, *Sukra*, *Budha*, and *Sôma* when in the second *paksha* or fortnight; the second includes *Sani*, *Maṅgala*, *Râhu*, and *Kêtu*.

The seven heavenly bodies are arranged, as by the Greeks, in the order — (1) Saturn, (2) Jupiter, (3) Mars, (4) the Sun, (5) Venus, (6) Mercury, and (7) the Moon. The hours of the day were dedicated to these in succession, so that the 1st, 8th, 15th and 22nd hours of each day always fell to the same planet who also presided over the whole day: thus, on Saturday, Saturn presided over the whole day and over these four hours specially, Jupiter over the 23rd, and Mars over the 24th hour. Hence the 25th hour or first of

the next day has the sun — *Sûrya* — for its lord and so again the 49th hour gives *Sôma* — the moon, as president of Monday, and thus *Maṅgala* presides over Tuesday, and so on. Sunday — as with western nations — is always regarded as the first day of the week.

Associated with these planets are their presiding divinities or lords. These are represented on paintings or carvings known as *Râsichakras* or zodiacs, of which three examples have been published: the first in Sir Wm. Jones's paper on the Indian Zodiac (*Asiat. Res.* Vol. II., at p. 303);¹ the second in Moor's *Hindu Pantheon* (1810), plate 88; and the third in the *Transactions of the B. Asiatic Society*, Vol. III.

Jones's plate has Mount *Sumêru* in the centre, with cities, &c., round it, and bordered by a narrow strip denoting an ocean; the upper side is marked *pûrvadik*, — east, the right *dakshinadik*, the left *uttara-dik*, and the lower *pâschimadik*. Round this, beginning from the east and going round by the north, are representations of the *Navagrahah* in circles, each bearing the name in *Nâgarî* characters: — (1) *Sûryah*, (2) *Vrihaspatiḥ*, (3) *Râhuh*, (4) *Budhaḥ*, (5) *Ohandraḥ*, (6) *Suniḥ*, (7) *Kêtaḥ*, (8) *Bhaumaḥ*, and (9) *Sukrah*.² Surrounding the whole are the *Râsis* or twelve

¹ Ideler, *Handbuch d. Math. u. tech. Chronologie*, Bd. I., Ss. 178 f.; cf. *Ind. Ant.* Vol. XIV. p. 322.

² This plate has been reproduced in *Brennand's Hindu Astronomy*, 1893, p. 14, but without a word of explanation or comment.

³ In the original plate, the first aksharas in the sixth and ninth names are of unusual and inaccurate forms.

zodiacal signs, in ellipses, beginning on the left of the top with Aries (Mâsha) and going round to the left, — each labelled in Nâgarî letters.

Moor's plate, from the collection of Colonel Stuart, differs in important details. In the central circle — in a cloud of glory — is Sûrya in his car driven by Aruna with a team of nine richly caparisoned horses; they are described as green, with black manes and red legs (p. 284). Round this is the circle of the planetary deities, divided into eight segments. These are named in Persian characters, and as the zodiacal signs are represented in the reverse order of the Jones's plate, we may also reverse the order of the *grahas* and read from right to left by the lower side of the circle. Thus, beginning on the right side under the horizontal diameter and opposite the signs Pisces and Aries, we have in succession (1) Chandra, (2) Mangala, (3) Budha, (4) Râhu, (5) Kêtu, (6) Bṛhaspati, (7) Sukra, and (8) Sani. It would thus appear that the *grahas* are here arranged in the order of the days of the week, but in such a position that Râhu and Kêtu fall *behind* the car of Sûrya.

The drawing of Moor's plate (which he supposed came from Jaypur) is more like Hindu work than Jones's, where the dress is more Moghul. The *vâhanas* or vehicles of the divinities also differ, and will be noticed below: perhaps in the first plate the names of Budha and Sani should be transposed, for Budha is there mounted on a vulture, which is the appropriate vehicle of Sani.

The plate in the *Transactions of the R. Asiatic Society*, Vol. III. at p. 30, represents a "Hindu Zodiac: from a choultry in the Southern part of the Carnatic." This contains a central square divided into nine smaller ones containing figures of the *Navagrahas*, and is surrounded by a double border of compartments, — the inner of twelve squares, with figures of the *Râsis* or zodiacal signs, and the outer of twenty-eight squares with the *Nakshatras* or lunar mansions, — each represented as an animal, and beginning with Aśvinî as a horse, — Bharaṇî, a male elephant, — Kṛittikâ, a she-goat (?), — Rôhîṇî, a cobra, &c.

The *Navagrahas*, occupying the central area, are all represented in cars of the same design, each with a driver and four horses, and within outline figures of various forms. The central *graha* is enclosed in a circle, and only one wheel appears on the near side of the car, whilst in all

the other cases there are two: this can hardly be other than Sûrya. In the square to the right the car is in an equilateral triangle, and the figure is probably meant for Sôma; the figure to the left, or in front of Sûrya, is placed in an oblong, whilst the *dêva* in the car has a smaller *mukuta* than the preceding. In the upper row, the first is enclosed in a figure like a *pippala* leaf; the second in what would be a star of six points, were not the lower point cut away to give a base line; and the third is in an oblong, nearly square. In the lower row, the divinities in the first and third squares have boars' heads, like Varâha — possibly representing Râhu and Kêtu — and the first is enclosed in a flag of the burgee shape; the second figure is placed in what seems meant for a bent bow; and the third, in a somewhat similar area. The divinities themselves are drawn on too small a scale to be separately identified.

The outer circles, in the first two plates referred to, contain representations of the twelve zodiacal signs which are clearly of western origin and possibly derived from the same sources as the figures on Jahângir's coins.

Had we more representations of these planetary figures, from different parts of India, they would be of considerable interest. Over a door in the *Wâd* or great well at Adâla in Gujarât, the nine *grahas* are represented, all as standing figures, except the third, where a representation of Buddha has been carved in place of Budha, but the figures are too much abraded to afford information respecting their proper adjuncts: only the seventh (Sani) has a bull couched at his foot. In the Jaina temples the *Navagrahâḥ* are usually represented by nine small figures at the base of the *âsana* or throne of the image.

The lords of the seven planetary bodies have numerous epithets, which in turn give a variety of names to each day of the week, and occur in inscriptions and poetical compositions. These, so far as I have been able to collect them, are given below in the order of the days of the week over which they preside.

1. The Sun, — Ravi or Sûrya, is represented, separately in temples as standing, facing the east, his head surrounded with rays, usually with two arms holding a lotus in each, or — occasionally — a lotus and *chakra*, and — often underneath — are the foreparts of the seven horses that draw his chariot. Sometimes the horses are four, but often one which has four or seven heads. He is also represented as seated on a *padmâsana* or lotus-

throne, his body of a deep golden colour, and occasionally with four hands, — holding the *śankha* in the upper right hand, and the front or lower left lying open with the palm upward.* His car is sometimes said to have only one wheel and to be drawn by a Nāga: it is often represented, however, with two or four wheels.† According to the *Śabdakalpādruma*, Sūrya is of the Kshatriya caste and Kāśyapa *gotra*, belongs to the Kalinga country, and has for his *vdhana* seven horses. Siva is the first presiding divinity, and water the second.‡

His names are very numerous: Hemachandra has given seventy-two of them in his *Abhidhāna-Chintāmaṇi* (verses 95-99); and in the *Mahābhārata* (iii., 146-157) a hundred and eight names are enumerated. These have been supplemented from other sources, in the following list: —

Aja; Amśu, Amśudhara, Amśupati, Amśubhartṛi, Amśumat, Amśumālin, Amśuvāna, Amśuhasta;

Abjabāndhava, Abjahasta, Abjinpāti; Aruṇa, Aruṇasārathi, Aruṇārchis; Arka, Aryaman; Aśitakara or Aśitaruṇa, Aśitamārici; Aśvattha; Aharbāndhava, Aharmāṇi, Aharpati, Ahapṭi, Abaskara; Aditya; Inas;

Ushṇakara, Ushṇagu, Ushṇadidhiti, Ushṇarāsmi, Ushṇaruchi, Ushṇāmśu;

Karmasāksbin; Kapila, Kāmada, Kālachakrā, Kālādhyakṣa, Kāśyapāya;

Kirāṇa, Kirāṇamālin; Kṛitāntajanaka; Kṛishṇa;

Khakhōlka, Khaga, Khachara, Khadyōta or Khadyōtana, Khamāṇi; Kharāmśu;

Gaganadhvaṇa, Gaganavihārin, Gaganādhvaga; Gabhasti, Gabhastipāṇi, Gabhastimat, Gabhas-tibasta; Gōpati; Grahapati or Grahārāja, Grahapushpa, Grahēsa; Gharmaśmi, Gharāmśu;

Chakrabāndhava; Chandakirāṇa, Chandadidhiti, Chandamarichi, Chandāmśu, Chandarāsmi; Chitrabhānu;

Jagachchakṣus, Jagatsāksin, Jagaddīpa; Jivana, Jiviteśa; Jyōtishmat;

Tapatāmpati, Tāpāna; Tamisrahan, Tamōnud or Tamōnuda, Tamōpaha; Tarāṇi; Tāpāna; Tāpāna;

Tigmakara, Tigmadidhiti, Tigmarāsmi, Tigmaruṇa, Tigāmśu; Timiranud, Timiraripu, Timirāri;

Tējahpuṇja; Trayītanu; Tvashtṛi; Tvishāmīśa or Tvishāmpati;

Dinakara, Dinakarṭṛi or Dinakṛit, Dinapati, Dinapraṇi, Dinabandhu, Dinamāṇi, Dinaratna, Dinādhiśa, Dinēsa or Dinēśvara; Diptāmśu;

Divākara, Divāpushta, Divāmaṇi, Divasakara or Divasakṛit, Divasanātha, Divasabhartṛi, Divasēśvara; Dehakarṭṛi;

Dyupati, Dyumaṇi; Dvādaśātman or Dvādaśāt-maka; Dhātar; Dharmadhvajās; Dhvānta-śātrava, Dhvāntārāti;

Nabhaśchakṣus, Nabhōmaṇi;

Pachata, Pacchēlima; Pataga or Patariga; Padmakara, Padmagarbha, Padmapāṇi, Padma-bandhu, Padmalāchhana, Padmāsana, Padmini-kānta, Padminivallabha;

Papī; Pāvaka; Piṅgaḷa; Pūshan; Prajadh-yakṣa, Prajadvāra; Pratibhāvat; Pradyōtana; Prabhākara;

Bradhna or Vradhna; Bhaga; Bhātāraka; Bhākōśa, Bhānēmi, Bhānu, Bhānukēśara, Bhā-numat; Bhāskara; Bhāsvat;

Manimat; Marichimat, Marichimālin, Mārtāṇḍa and Mārtāṇḍa; Mitra; Mihira; Mokṣadvāra; Mṛitāṇḍa, Mṛitāṇḍa;

Yamunājanaka;

Ravi;

Lalāṭamṭapa; Lōkachakṣus;

Varuṇa; Vikartana; Vibhākara, Vibhāvan, Vibhāvasu; Viyanmaṇi; Virōchana; Vivasvat; Viśvakarman, Viśvachakṣus, Viśvapā; Viṣṇu;

Suchi; Sushṇa; Saptasapti or Saptāśva; Sam-vatsarakara; Savitar, Savitṛi; Sarvatōmukha; Sahasrakirāṇa, Sahasramārici, Sahasrarāsmi, Sahasrāmśu, Sahasrārchis, Surōttama; Sūrya; Sūra; Svargadvāra;

Haṁsa, Hari; Haridaśva; and Hēli (*Hēlios).

According to the *Mahābhārata* (I. 2599) his wife is Tvāstri, and Savarchalā (XIII. 6751); his sister Sureṇu the wife of Mārtāṇḍa; and his daughter Suprajā.

2. The Moon. — Chandra or Sōma, is represented as white, with two arms holding a club and a lotus; but sometimes with four hands — one of the right in the attitude of blessing. He is seated in a car with three wheels, drawn by ten horses as white as jasmine — five on each side of the yoke, and a deer in his lap; but sometimes it

* There is a white marble representation of Sūrya seated in his chariot, drawn by seven horses, in the Royal Museum at Berlin, brought from Bengal by the late Dr. F. Jagor.

† Cf. *Archaeol. Surv. W. India*, Vol. IX, pp. 73, 74, 77, 103, and pll. lvi. and lxxviii.; Wilson, *Viṣṇu Purāṇa*, Vol. II, pp. 27, 284-285 (Hall's ed.).

‡ For this and subsequent references to the *Śabdakalpādruma*, I am indebted to the kindness of Mr. H. Consens of the Archaeological Survey, who has procured them for me.

is drawn by a spotted antelope; or he is riding one. The *Saddakalpadrūma* adds, — that he was born of the ocean, and is of the Vaiśya caste; that his right hand is in the *varadamudrā*, i. e., bestowing blessing, and the left holds a *gadd* or club; that he sits on a white lotus, and has ten white horses to his *vāhana*; and he is clothed in white; Umā is the first presiding divinity, and water the second. He gives name to the second day of the week — Sôma-vāra, Chandravāra, &c.

The names of Chandra are also numerous — many of course being synonyms :—

Atridrigja, Atrinētraja, Atrinētraprasāta, Atrinētraprabhava, Atrinētrabhū, Atrinētrasūta; Abjas; Abdhinavantaka;

Amritadidhiti, Amritadyuti, Amritasū;
Indu;
Uḍupa, Uḍupati, Udurāj;
Ēnabhrit, Ēnatilaka;
Oshadhigarbha, Oshadhināthā, Oshadhipati, Oshadhīśa;
Kalānidhi, Kalāpati, Kalāpini,⁷ Kalāpūrṇa, Kalābhrit, Kalāvat;

Kumudapati, Kumudapriya, Kumudabandhu, Kumudabāndhava, Kumudāsuhrid, Kumudēśa; Kumudinīnātha, Kumudinīnāyaka, Kumudinīpati, Kumudīpati;

Kairavin; Kshapākara, Kshapānātha;
Glan;
Chanda;
Chandra, Chandramas;
Ohhāyābhrit, Ohhāyāmrigadhara, Ohhāyānka;
Jaiyātrika;
Tamōghna, Tamōnud, Tamōnuda, Tamōpaha, Tamōpara;

Tārādhipa, Tārādhipati, Tārāpati, Tārāpida;
Tithiprāṇi;
Tuhinakirāṇa, Tuhinagu, Tuhinadyuti, Tuhinaraśmi, Tuhinārōṣu;

Dakshajāpati and Dākshāyiniṣpati;
Dāsavājīn, Dāsēva, Dāsēvēta;
Dvijapati, Dvijarāja;
Nakshatranātha, Nakshatrāpa, Nakshatrarāja, Nakshatraīśa;

Nisākara, Nisākētu, Nisādhitā, Nisānātha, Nisāpati, Nisāprāṇēśvara, Nisāmaṇi, Nisaratna, Nisēśa, Nisāthinnātha;

Piyūshanidhi, Piyushamahaa, Piyusharuchi;
Pūrvvadi; Prāleyarāśmi, Prāleyārōṣu;
Bhagnātman;
Māsa; Mrigadhara, Mrigarāja, Mrigalāñchhana, Mrigalōchana, Mrigānka; Mrigarāja-dhārin (P), Mrigalakshman;

Yāminipati;

Rajanikara, Rajanīcharanātha, Rajanipati, Rajanīramana; Rājan, Rājarāja; Rātrikara, Rātrinātha, Rātrimaṇi; Rōhinīkānta, Rōhinīpati, Rōhinīpriya, Rōhinīramana, Rōhinīvallabha, Rōhinīśa;

Lakshmisahaja;

Vidhu;

Sāsadhara, Sāsabhrit, Sāsalakshmana, Sāsālāñchhana, Sāsavindu, Sāsanka; Sāsīn;
Sitagu, Sitadidhiti, Sitabhānu, Sitamayūkha, Sitamarichi, Sitarāśmi, Sitaruchi, Sitamēṣu;

Sivasēkhara;

Suchi, Suchirōchis; Subraraśmi, Subrāmēṣu;
Svētādāman, Svētadyuti, Svētārōchis, Svētāvājīn, Svētāvāhana;

Sitakara; Sudhāmēṣu, Sudhākara, Suddhānga, Sudhādhāra, Sudhānidhi, Sudhābhrit, Sudhāvāsa, Sudhāsūti; Sōma;

Srisabōdara;

Hari; Harinakalānka, Haripadhāman, Haripānka;

Hima, Himakara, Himagu, Himadidhiti, Himadyuti, Himabhāsa, Himaraśmi, Himārōṣu.

3. *Mars*, — the Hindu Māngala or Bhauma, is the celestial war-god; that he is to be identified with Kārttikēya is an assumption that might not be found strictly accurate. He is said to be of red or flame colour, seated on a ram, or in a car drawn by a red ram, and with four arms holding spear, lotus, trisūla and club. The *Saddakalpadrūma* says he holds in the upper right hand a *takti* or spear, the lower being in the *varadamudrā*, the upper left is in the *abhayamudrā* (offering protection), and in the lower left he has a *gadd* or mace; adding that he is of the Kshatriya caste and Bharadvāja *gōtra*, and that Skanda is the first presiding divinity, and the earth the second. Moor's plate gives him only two arms — with lotus-bud and rod or club; Jones's mounts him on a horse with a sword in his right hand; and Ward says he holds in one hand a *takti* (spear or pike), with another he is giving a blessing, with a third forbidding fear, and in the fourth a club. His names are —

Angāra, Angāraka;
Āra (Gr. 'Aρρς); Āvanēya; Āshādhabhava, Āshādhabhū;
Riṇāntaka;
Kuja; Kshitisuta;
Khōlmuka; Gaganōlmuka;
Ohaṇḍēśvara; Ohara;
Jīṇa;

⁷ Noteworthy as a feminine appellation.

Dharātmaja, Dhāraputra, Dhārasānu;
Navadīdhitī, Navārchis;
Bhūsta; Bhūmija, Bhūmiputra; Bhauma;
Maṅgala; Mahisuta;
Raktāṅga; Rudhira;
Lōhita, Lōhitaka, Lōhitāṅga;
Sivagharmaja.

4. **Mercury**, — Budha, is of a greenish-yellow colour, holding a club or sceptre and a lotus; or with four hands, having in the upper left hand a shield, in the lower a club, and in the lower right hand a sword, with the fourth — in the *varadamudrā* — he is bestowing blessing. The *Saddakalpadruma* adds that he is of the Vaiśya caste and Atri gōtra, and of the Magadha country; he faces the sun, sits on a lion, and has a yellow garment; Nārāyaṇa is the first presiding divinity, and Vishnu is the second. Sometimes he is represented riding on a winged lion,* at others seated on a carpet or *gaddi*, or in a car drawn by four lions, with sword, shield, club and bow.

His names are —

Ekādēha, Ekāṅga;
Jūa;
Tūṅga;
Pañchārchis; Praharaba, Praharashula;
Budha; Bōdhana;
Rājaputra; Rōdhana; Rōhinībhaṇa, Rōhinisuta;
Rauhinēya;
Sraviṣṭhāja, Sraviṣṭhābhū; Syāmāṅga;
Sōmaja, Sōmābhū; Saumya;
Himna, Hēmnā ('Εμφης).

5. **Jupiter**, — Brihaspati, the preceptor or Guru of the gods, sits in a car called Nītighōṣa, drawn by eight pale horses. He is of a yellow or golden colour, dressed in white, with four arms, — in his upper right hand he holds a *rudrākṣa-mālā* or rosary, in the upper left a water-pot (*karakā*), in the lower left hand is a rod (*daṇḍa*), and, with the fourth in the *varadamudrā*, he is giving a blessing; other accounts give the rosary, a lotus, and a sceptre. Sometimes, also, he is represented as seated on a *gaddi* (as in Moor's plate), on a lotus, or on a horse.† The *Saddakalpadruma* adds that he is a Brāhman by caste, of the Āṅgīrasa gōtra, belongs to the Sindhu country, wears a yellow robe, and sits on a lotus in a chariot drawn by a yellow horse (or horses); Brahmā is the first presiding deity, and Indra is the second.

His names are as follows: —

Animishāchārya; Āṅgīrasa;
Ijya; Indrējya.
Giriśa; Girpati or Gishpati; Guru; Graha-
rāja;
Chakshus; Chitraśikhaudija;
Jiva;
Dīdivi; Dvādaśa-kara, Dvādasāmsu, Dvādaś-
ārchis; Dhishana;
Phālgunībhaṇa;
Brihatkīrtti, Brihaspati; Brahmanaspati;
Vākpati, Vachasāmpati, Vāchasāmpati, Vā-
chaspati;
Suraguru, Surapriya, Surāchārya, Surējya.

6. **Venus**, — or Sukra, the son of Bhṛigu and priest of the Daityas, is represented as of a white or bright appearance, blind of an eye, seated on a lotus, in a car drawn by a white horse (or horses), with four hands, and with the same symbols as Brihaspati; but Ool. Delamaine ascribes to him a horse as *vāhana*, and holding a rod, rosary, lotus, and bow and arrows. On Moor's plate he rides an animal somewhat like a lynx, with rod and lotus-bud in his hands; on Jones's he is on a camel, and holds a large ring or hoop. The *Saddakalpadruma* states that he is a Brāhman by caste, of the Bhārgava gōtra, of the town of Bhōjakata; sits on a lotus; faces the sun; has four hands with the same symbols as Brihaspati. Sakra or Indra is the first presiding divinity, and Sachī, Indra's wife, is the second divinity.

The names of Sukra or Uśanas are as follows: —

Asurāchārya; Āsphujit (Gr. Ἀσφοδίτη); Uśanas;
Kavi; Kāvya;
Daitya-guru, Daityaparōdhas, Daityaparōhita,
Daityapōjya, Daityāchārya, Daityējya, Daityēn-
drapōjya; Dhishnya;
Bhārgava, Bhṛiguja, Bhṛigutanaya, Bhṛigunā-
dana, Brihguputra, Bhṛigusuta, Bhṛigusānu;
Maghābhava or Maghābhū;
Sakra, Sukrāchārya; Svēta, Svētaratha;
Shōḍaśāmsu, Shōḍaśārchis.

7. **Saturn**, — Sani, Kopa or Kroda (Greek Κρόνος), as a divinity, is represented as black and in black clothing, old and ugly, with long hair and nails, four-armed — carrying a sword, two daggers, and an arrow, with a blue vulture for his vehicle (*ślagridhrā-vāhana*). On Sir W. Jones's plate he is mounted on an elephant, and Budha on

* Such as are represented at Hāshī; cf. Grünwedel, *Buddhist Art in India* (Eng. ed.), p. 24, fig. 10.

† On Sir W. Jones's plate it is hard to say whether the *vāhana* is intended for a horse or not.

a vulture; but possibly these should be transposed. According to the *Śabdakalpādruma*, Sani is a Sudra by caste, of the *Kāśyapa gōtra*, belonging to *Surāshira*, and born of the Sun; he sits on a vulture, holding an arrow in the upper right hand, the lower in the *varadamudra*, a *śāla* or trident in the upper left hand and a bow in the lower. Yama is the first presiding divinity, and *Prājāpati* the second. Sani is a planet of ill-omen.

His names are given as, —

Asita; Āra;
Koṇa; Krūrāpīś, Krūrālōchana, Krūrātman;
Kroda;
Grahānāyaka;
Chhāyā-tanaya, Chhāyātmeja, Chhāyāsuta;
Nīlavasana, Nīlavāsa, Nīlāmbara;
Paṅgu; Pātāṅgi;
Brahmanya or Brāhmaṇya;
Manda, Mandaga;
Rēvatibhava;
Sani, Sanaischāra; Sauri;
Saptāṇupūṅgava, Saptārchis, Saura, Sauri,
Saurika.¹⁰

8. The ascending node, Rāhu, is painted black, with four arms, holding a sword, a spear, a shield, and bestowing a blessing, and the body ending in a tail; the *Viṣṇu-Purāṇa* says eight black horses draw his dusky car, and, once harnessed, are attached to it for ever. Other representations give him a black lion, a tortoise, or

a flying dragon as his vehicle. On Moor's plate he is represented as a headless man with two hands, holding a club and a lily and riding on an owl with a human face (? a female *Kinnara*); and on Jones's plate it is an animal like a lynx. He is of *Sādra* caste and of the *Paithina gōtra*, according to the *Śabdakalpādruma*, and born of the *Malaya* mountain, black in colour and wearing a black garment, sitting on a lion, and having four hands, — in the upper right he holds a sword, in the lower a *rada*, in the upper left a *śāla*, and in the lower a shield. *Kālā* is the first presiding deity, and *Sarpa* the second.

His names are these —

Abhṛapīśācha; Graha; Kabandha; Kayāna;
Tamas; Bhaṇībhū; Rāhu; Vidhūmitada; Saimhika or Saimhikēya; and Svarbhānu.

9. The descending node is Kētu, who is represented as a head, painted green and placed on a frog or against the cushion of a *gaddi*. He is of the *Sādra* caste and *Jaimini gōtra*, and from the (?) *Krauñchadvīpa* country, of the colour of smoke, wears a smoke-coloured garment, and sits on a vulture; one of his hands is in the *varadamudra*, and the other holds a mace. *Chitragupta* is the first presiding deity, and *Brahma* is the second. He is called—

Akacha; Aślēśābhava or Aślēśābhū; Kētu; and Muṇḍa.

J. BURGESS.

NOTES AND QUERIES.

SOME DISAPPEARING PREJUDICES OF THE PARSIS.

CONSIDERING the position that the energetic Parsis now hold in the very front of all Indian peoples in regard to education, progress and social freedom, the following extracts from some reminiscences of one of the pioneers of reform among the Parsis will be of interest to those who would mark down old customs and superstitions before they disappear. Mr. K. N. Kobraji is the writer, and he writes of "Fifty years ago."

1. — Medical Education.

What a wonderful change has been effected in the popular sentiment with regard to higher education, in the course of fifty years! In these days the Grant Medical College is overflowing with

students of all communities. But when it was established in 1845, so intense was the prejudice of the natives against what they regarded as the contamination of dead bodies and human bones, that for a time it was very much feared that the public endowment fund, amounting to Rs. 1,25,000, for the institution had been simply thrown away. Inducements were therefore held out to students in order to set the institution going. Not only were they admitted free, but every one was given a stipend of Rs. 10 per month.

Some of the boys attended it in opposition to the wishes of their parents, who were gravely offended and deeply scandalized by their sons' violation, as they fancied, of the canons of their religion. I myself was a victim to this superstition. My father wanted me to go to the College;

¹⁰ Hēmaachandra (*Abhidhāna-Chintāmaṇi*, fol. 116-121) gives a list of the names of the planetary divinities, — which has been enlarged in the above. In fol. 121-22 he adds six names of Rāhu and four of Kētu.

but my mother would not, for a moment, entertain the idea of her son committing the grave sin of touching dead bodies. The first doctors were mostly Parsis and they employed Parsi compounders, because in those days the community had an inveterate prejudice against taking food or water touched by a "heathen." The first patients of these medical men were also chiefly Parsis, as the popular prejudice against European treatment was exceedingly strong amongst Hindus and Mussalmans. Even at the present day the ignorant masses prefer to die at the hands of a *hakim* rather than be saved by Western methods of treatment. Again, in maternity cases the doctors had to bathe in the patient's house and change their clothes before leaving. After a time one or two medical men protested against the objectionable custom, which died out sometime ago.

2. — Lying-in Customs.

I wish I could say the same of the barbarous custom of consigning women, at a most critical period of their lives, to dark, damp, and noisome rooms on the ground floor of the house for forty days together. If there is no close room available in which to shut them out so long from heaven's light and air, then a huge curtain, often made up of old rags, is put up, forming a dark and dismal enclosure for the unfortunate woman. Here she is doomed, in the name of religion, to live or die, as the Fates may direct; and although she may be very weak and ill, it is that same religion which absolutely forbids her better and healthier surroundings. Although this custom is not yet quite dead, it is dying fast enough and will have perished altogether before another fifty years have elapsed. The Parsi Lying-in Asylum has contributed largely towards the accomplishment of this beneficent reform.

As if these hardships contrived by superstition were not enough, delicate women were subjected to other trials at the risk of their lives. Sometimes, parents took a vow to leave their daughters after delivery without food and water for a whole week. The *Rasi Gofar*, assisted by the able pen of the late Dr. C. F. Khory, led a crusade against this senseless practice and succeeded in abolishing it. Among other superstitious rites performed on the occasion was one called *chokhiar*, in which, as the name implies, rice formed the principal element. It was usually performed as a last resort when a woman felt dangerously ill and her recovery by means of human skill was despaired of. The children of neighbours and relatives were invited; they were washed and arranged in clean linen, and were

treated to a dinner consisting of rice, milk, and pulse curry. A lamp, fed by *ghf*, was kept alight near the spot, and water-pots, cocoanuts, fruits, and flowers were placed near it, to which the friends and relatives of the patient made *pâjû*. If any one's children did not live to grow up, there was another ceremony for the invocation of divine grace on the unfortunate mother. It would take long to describe the various rites performed on such occasions. Suffice it to say that they have nearly all ceased to exist.

3. — The First English Doctors.

In the old days doctors went about in palanquins, which made a great impression on many of their patients. The early doctors, being the first in the field, had extensive practice, although at the commencement they had to contend against the prejudices of the people against Western methods of treatment. The people were mortally afraid of the application of a blister and regarded even the harmless mustard poultice with grave misgivings. Indeed, it was believed that the doctor applied a blister only in extreme cases, when all his resources had failed and when there were few chances of the life of his patient being saved. When this remedy was resorted to, there was mourning and lamentation in the house.

4. — The Importation of Ice.

Ice is now a blessing in many cases of sickness; but people looked askance at it when it first began to be imported from America.

In September, 1834, the first consignment of ice was sent from America to the firm of Jehanghir Nusserwanjee Wadia in Bombay. It was sold at 4 annas per pound. The native looked upon it as a great curiosity, and it was sometime before it made its appearance at the table of the rich. The first Sir Jamssetjee Jejeebhoy introduced ice at a dinner given to some friends, and a few days afterwards it was gravely reported in the *Bombay Samâchâr* that both the host and his guests had fallen ill with cold. They had had the temerity to use an unknown foreign substance, and had to pay the penalty.

I was once taken by my father to the ice-house — the globular building next to the Great Western Hotel — and brought home a piece with me, and I remember the ladies viewed it as a strange substance with great wonder and curiosity. Aërated waters, too, were a novelty in the old days. When a soda-water bottle was first brought to my father's house, on opening it, the cork flew up with a loud report, the ladies ran away affrighted, and they would not drink

the "smoking water" themselves, nor would they allow me to touch it.

5. — Social Reform.

Most unenviable was the lot of Parsi women fifty years ago. They could not freely walk forth in the street. They could not appear in public. If they went out in a *rekla*, all the curtains were down, that bold bad eyes might not look at them. I remember that the community was deeply scandalized when the late Ardesheer Hormasjee Wadia began to drive out in an open carriage with his wife.

Those were days when boots and stockings were not worn by women. Many a bitter controversy has raged round the vexed question of shoe-leather. The first wearers of boots and stockings were malignantly reviled and abused. Nay, in the good old days of country shoes, it required no little courage on the part even for men to change them for English boots, nor was it considered proper to wear socks with country shoes. I remember that some gentlemen began wearing socks on the plea of ill-health, before they ventured to adopt them as a regular part of their dress. Now that English boots and stockings are so common among both sexes of the Parsi community, it seems quite a far off age when the wearing of them provoked such rancour and resentment.

6. — Freedom for Parsi Women.

It was not without a tough and prolonged struggle that rational freedom was obtained for Parsi women. Places of amusement were absolutely forbidden to them. When at last it was thought that it would be no crime to let them see a play or a circus, the performances were held exclusively for women. I remember one of such performances given by Romanin's Circus forty-five years ago, when the male members of every family waited outside the tent till it was over at midnight. Not a few of them were wealthy Shethiás, who complaisantly loafed about or enjoyed a comfortable doze in their carriages, awaiting the return of the ladies of their household. And what precautions and safeguards were then considered necessary, even in the case of such rigidly exclusive gatherings, at MacCallum's Circus forty years ago. The tickets were sold by means of a private circular confined to families of known respectability, and the names of intending visitors were recorded in a special list in order that no persons of doubtful repute might smuggle in. All the preliminaries in connection with MacCallum's Circus were

carried out by the late Ardesheer Moos and Nanabhai Ranina, and the assemblage of ladies in their multi-coloured dresses and dazzling ornaments was so splendid and magnificent that the circus proprietor, new to such sights, exclaimed, "Ah! if I could get up such a spectacle in London, my fortune is made!" Not that women were then too ignorant to appreciate the happiness of freedom. In my early days, I have often heard women, even old ones, say, on beholding Europeans of both sexes driving together in open carriages, "Alas, that it should not be our lot to be as happy as they are!"

7. — Early Mixed Gatherings.

Many more years elapsed before mixed gatherings became common among the Parsis. The first* notable gathering of Parsi ladies and gentlemen was witnessed on the occasion of the festivities attending the birth of the late Prince Albert Victor. An entertainment to the school children of the town was given on the Esplanade, when a number of respectable Parsis appeared with their wives and walked arm-in-arm with them. The sight created quite a sensation. The movement in this behalf was led by the late Maneckjee Cursetjee, a sturdy old veteran in the cause of social reform. He was among the very first of those who freely went about with their wives and daughters arrayed in boots and stockings, and he manfully braved the vile scandals and oburgations to which he was subjected for years by the foolish majority of his community.

Theatrical performances were ordinarily held for men only. When a special performance was advertised for families, it was carefully stipulated beforehand that no men unaccompanied by their female relatives would be allowed admission. As the promoter of theatrical companies in former days, I myself framed some strict rules in this behalf.

MUHAMMADAN WORSHIP OF FIRE.

DR. (now SIR DISTRICT) BRANDER, when at Gorakhpur 30 or 40 years ago, visited a certain Miyán Sâhib who kept a fire going as a religious duty—apparently a quasi worship of fire. He owned a *sâl* forest: and this supplied fuel for his fire. He was a most interesting man and charmed his visitor: a man of liberal and loyal spirit, for he protected Christians in the Mutiny, and he subscribed to the schools attached to the local Mission, of which the Rev. Mr. Stern was the head. The memory of such a man should be preserved. I wonder if it still lives in Gorakhpur.

W. COLDESTREAN.

JANGNAMAH OF SAYYAD 'ALIM 'ALĪ KHAN, A HINDI
POEM BY SŪDISHT.

BY WILLIAM IRVINE, LATE OF THE BENGAL CIVIL SERVICE.

(Concluded from p. 9.)

- 345 Yakāyak dhundhūkār paidā hū,ā,
Niṣāmān kā laṣhkar huwedā hū,ā.
Hū,ī hānk laṣhkar moṇ obāroṇ kadhān,
Zamīn thartharī aur larzā gagan.
Kharā ho-ke jagbī senā nikāl,
350 Kiyā joṣh moṇ a-ke rukhiyā ko lāl:
"Napaṭ kar-ke shokhī, wah chal ā,ē haiṇ,
"Mūjhe kyā, magar mom kā pā,ē haiṇ,
"Zamīn dhas-ke gar ghār ho jāegā,
"Gagan tūt-kar sar pab ā-jāegā,
355 "Larūn yā marūn kār-i-faujān chalā,o,
"Tū, 'Alim 'Alī, lohū kī nadiyān bahā,o,
"Ba-ḥaqq-i-khudāwand-i-parwardigār,
"Jab lak jū tan moṇ, karūn kārzār."

Harāwal kiyā Mutahavvar Khān koṇ,
360 Diyā sang Salīm Khān, Mathī Khān koṇ,
Dalel Mahamdī Beg, Mirzā 'Alī,
Jahān talag the sardār jodbā, balī.
Kahā: "Tūm harāwal ke sabh sāth jāo,
"Harāwal ko un sāth begī milāo."
365 Amin Khān ko bole, kih: "Sun to tehu
bāt,
"Tūmeṇ fauj kāmīl le apne sanghāt,
"Chalo mihrbānī soṇ siddhī faraf,
"Tūmhārī shujā'at moṇ nahīn kuchh haraf,
"Tūmeṇ mard-i-Dakhīn moṇ ho be-migāl,
370 "Yihī bāt taḥqīq be-qil-o-qāl,
"Kharē ho-ke rahne moṇ dastā khālāl,
"Gayā dūr harāwal hamārā nikāl,
"Madad jo ā,ē ho, to kuchh kar dikhāo,
"Ho be-shak āpās dīl moṇ, khāndā bajāo,
375 "Talo-ge, to sabh fauj tal jāegī,
"Balā mūjh akele ke sar ā,ēgī,
"Wahī howegā jo hai Rabb kī raṣā,
"Main hūn sab 'azīzān soṇ sabh ṣafā."
Kahā 'Umr Khān koṇ: "Raho dast-i-chap,
380 "Marḥattān kī faujān koṇ le sāth sab,
"Tūmhārī merī kuchh judā,ī nahīn,
"Tūmeṇ khwesh ho, kuchh aipāhī nahīn,
"Tūmhārī merī sharm sabh ek hai,
"Karoge wahī jis moṇ jo nek hai,

All at once a dust arose,
The Niṣām's army was desoried.
There were shouts in the army on all sides,
The earth shook and the heavens trembled.
He arose and brought forth a raging army,
By his ardour his face was reddened:
"Full of insolence he has advanced,
"What care I, for he has feet of wax,
"The earth will give way, a hollow will form,
"The skies will melt and descend on his head.
"Let me fight or die, let the armies engage,
"Thou, 'Alim 'Alī, cause bloody rivers to flow,
"By help of the Lord, who is the Cherisher,
"So long as I breathe, shall I prolong the
battle."
He placed Mutahavvar Khān in the vanguard,
Sent with him Salīm Khān and Mathī Khān,
Dalel Muhamdī Beg, and Mirzā 'Alī,
Whatever leaders he had, brave and bold.
He said: "Follow all of you the leader of the van,
"Delay not, quickly engage with their vanguard."
To Amin Khān he said: "Hark to my word,

"Take out a full force of your troops,
"Be pleased to move to the right wing,
"Against your valour no word can be said,
"You among Dakhīnis have not your equal,
"This fact is admitted without contestation,
"Mere standing idle brings ruin on the squadron,
"My vanguard has advanced and is far off,
"You came to help, so show what you can do,
"Cast out doubt from your heart, ply your sword,
"If you yield ground, the whole army gives way,
"The calamity will fall on my friendless head,
"Whatever happens it is the Lord's will,
"I have no grievance against any of my friends."
He said to 'Umr Khān: "Take place on the left,
"Make all the Mahrattahs follow you,
"You and I can never have separate aims,
"You are a relation not a mere trooper,
"You and I shall be one in any reverse,
"You will perform whatever is right,

385 "Duniyā do pahar ke yah jyūn jahānōn hai,

"Janam lag kise kā nah abh thānōn hai.

"Agar hai sharm, to yah jiwānā bhulā,

"Wagarnah zahr khā-ke, marnā bhalā;

"Khabardār ho, dil moṇ kūchh dar nah lāo,

390 "Jyūn hai shart, tyūn khūb bāthān chālā,o."

Līyā sāth apne rahā so haṣm,

Chale khūsh ho āhistaḥ yak yak qadam.

So ise moṇ ā-kar kahā ko suwār :

"Harāwal-pai Sāhib ke hai rozgār,

395 "Rahī fauj jahūn ke tahān sab haṭak,

"Chale haṇ jidhar ke ūdhar sab thaṭak,

"Parā ghor jodhā barā par thaṭhak."

Sūnā aur chilāyā jaisī bijli karak;

Jo hote agar Rustam, Afrasyāb,

400 To hargiz nah karte wah aisā shitāb.

Parā tūt jazbi so aisā karak,

Kis-se mānjā jo sambhāle dharak ?

Uṭhā fauj, lashkar moṇ gard, ghabār,

Kih jānōn qiyāmat hū,ā sehkār.

405 Hū,ā ghor o ghul ghulghulā fauj moṇ,

Sayādat ke daryā yak mauj moṇ,

Maqābal hū,ā, ur kahā hānk mār :

"Waṭn hai sipāhi kā khānde ki dhār,

"'Ajab din, 'ajab waqt hai, āj kā,

410 "Bhale mard ke qadr-i-mī'rāj kā."

Kabā : "Kahān hai sardār is fauj kā,

"Jo dekhe tamāghā meri mauj kā,

"Milēn ham o tum ham ko armān hai,

"Talo mat, yah mardon kā maidān hai,

415 "Mūjhe bān goli soṇ tūm mat darā,o ;

"Nishā hai to haudaj son haudaj milā,o."

Lagā mārneṇ tīr kar-koṇ pe ā,

Diyā fauj yakkārgī sabh halā ;

Chalāne lagā tīr par tīr koṇ.

420 Hazār āfrin mard-i-randhīr koṇ !

Guzar jā,ē chillah, sur baktar koṇ phoṛ.

Zirah ki kariyān, qhāl ke phūl toṛ ;

Jaisī tīr marī karo moṇ milā,ē,

Sakat kiyā ūso jodh phir sar ūṭhā,ē.

"This world is for a few hours, it seems more like hell,

"No one has any power to cling to life.

"If we come to shame this life is a mere fraud,

"In that case to take poison and to die is better;

"Be on the alert, let no fear enter into your heart,

"As duty demands, strike oft and hard."

He took with him all his state and following,

He advanced rejoicing, slowly, step by step.

At this point there came a horseman and said :

"My lord's vanguard is engaged,

"The men on all sides were driven back,

"They have fled hither and thither in disorder,

"Confusion reigns, the fighters are all at a stand-still."

He heard and roared like a clap of thunder;

If Rustam and Afrasyāb had been there,

Never could they have been so quick.

The order of this great army had fallen to pieces,

Who was there to rally it after the crash ?

From the army rose dust in clouds,

It seemed as if Judgment Day had dawned.

Then arose shouts and cries from the army,

That wave of the sea of Lordship

Advanced to the attack, and said shouting :

"The home of the soldier is the sword's sharp edge,

"A chosen day, a choice time is this,

"To brave men it is as the ascent to heaven."

He said : "Where is the lord of this army,

"That he may see the vision of my wave-like ranks,

"Our meeting, you and I, is what I ardently long for,

"Evade me not, this is the battle-plain of heroes,

"Think not to daunt me with rocket or bullet.

"If assured, then range our haudaḥ side by side."

He began to shoot arrows, moving his hands,

With a sudden shout, he urged on the charge :

His arrows flew one after the other.

A thousand bravos for the man of battle, the hero !

His bow-string wore out, his armour was rent,

The links of his mail, the bosses of his shield all broken,

As an arrow struck, he added it to its ring,

Ever he fought on, raised his head once more.

425 Hū,ā do ghaṭi lak hazāron kadhal,

Chaleṭ fauj mūṭh par taip sārī nikal,
Jo haudeṭ thī mūṭh par soṇ sabh tal ga,e,
Phirā piṭh yakbārāgi chal ga,e.
Kahīn the, 'azizāq, yah 'Ālim 'Alī !

430 Magar āj hāzīr hū,ā hai 'Alī.

Ilāhī ! yūh kis nūr kā nūr hai,
Jawānī, shujā'at so ma 'mūr hai !
Kiyā tab hukm : " Beg naubat bajā,o,
" Rakho dil qavvī aur ghoṛe chalā,o.

435 Raho jyūṭ the tyūṭ, ho khare thār thār,

Hathī urbadī kul piyāde, suwār,
Chaliyā koī maḡriq, chaliyā koī janūb,
Chaliyā ko ḡhamāl, aur gayā ko ḡharūb.
Bulāneṭ lage fauj koṇ : " Ā,o, re !

440 Fath hai, fath, koi mat jā,o, re !

" Phiro, re, phiro, nang soṇ dūr hai,
" Namak khā-ke bhāge, so maḡhūr hai !"
Yah sun-kar kahā Sayyad-i-pāk-bāz ;

" Ayā, bas hai hamānā madad-i-kārsāz ;

445 " Jo bhāgā, so kyā ūske bhar ās hai,
" Yah marnā ḡshādat mūjhe khāṣ hai."
Kharā ran moṇ Sayyad āpas gāt soṇ,
Gaī fauj sārī nikal bāth soṇ.
Mahāwat ko bolā kih : " Hāthī chalā,o."

450 Kahā tab ḡhālīb 'Alī Khān soṇ yahi yūṭ
bulā,o :

" Main is fauj koṇ āzmāyā nahīn,
" Kapaṭ in ke dil kā main pāyā nahīn,
" Dagḡhā de-ke mūjhe ko nikālā shūtāb,

" Qiyāmat moṇ kyā denge Haqq kā juwāb ?

455 " Muḡabbat ke kūchh kis mane yās nahīq,

" Dekho, dostāṇ ko mere pās nahīn,
" Ba-har-hāl, dunyā yah guzarāṇ hai !
" Haṭūn kyā main ! Ab kyā merā shān
hai !"

ḡhālīb Khān yūn bolā : " Aī Sayyad ! Imām !

460 " Nako kūchh karo dil moṇ ab fikr-i-khām !
" Jab lak tan moṇ hai dam, lareṇ jān-nisār,

" Bahegā yah 'ālam mane yādgar."

Nāṣir Khān, Ghori, soṇ bole Nawāb :

" Mile mil ga,e sabh ih khānah-kharāb ;

For full forty minutes there were a thousand efforts,

The army all fled from before his face,
The canopied elephants all retreated,
They turned tail and all at once made off.
Say, O friends, was this then 'Ālim 'Alī !
Was it not rather 'Alī himself ?

O God ! what perfect effulgence is this,
Full of youth, complete in valour !
Then he gave order : " Quickly beat the drums,
" Be bold of heart and urge your horses on."

They stuck where they were : they stood in groups,

Horse and foot, all were in a flurry,
Some went east, some went south,
Some to the north, others to the west.

He began to rally his men : " Come on ! Hie !

" It is a victory, a victory, let no one retire ! Hie !

" Turn, I say, turn, this is fatal to honour !

" He who eats salt, then flees, is accursed !"

Having shouted this, said the pure-hearted Sayyad :

" The help of the Helper remains to me ;

" What sort of hope can there be from fugitives,
" To die thus is a favoured martyrdom."

The Sayyad stood solitary in the battle-field,

His army had gone, was all out of hand,

He said to the elephant man : " Urge on the elephant."

Then turning to ḡhālīb 'Alī Khān he spoke on this wise :

" I had never put these troops to the test,

" Their falseness of heart I had not found out,

" They have deceived me, and at once thrown me over !

" At the Resurrection what will they say to the Judge ?

" They have no affection, nothing can be expected of them,

" See, there are no friends left around me,

" Be it so, this world is only a passing show !

" I will never budge ! What would then be my reputation !

ḡhālīb Khān spoke thus : " O Lord and Priest !

" Do not let your mind take up wrong ideas,

" So long as breath remains, we fight and give our lives,

" In this world we shall be ever remembered."

To Nāṣir Khān, the Ghori, spoke the Nawāb :

" They are traitors, all these scoundrels ;

465. "Azizān! jo kūchh hai, so taqdīr son,
 "Mitā nā sake kei tadbīr son."
 Kiyā Shekh Faiṣū ne ā-kar 'arṣ,
 Jo jānā kih marnā hū, ā hai farṣ :
 "Nawāb! ab rahā shahr kā dekhnā,
- 470 "Larā, i nahīn, yah hū, ā sekhnā."
 The is guftgūe mon, o thā yah bichār,
 Phiri fauj-i-Sayyad, pare gul ekbār,
 Parā ma'rkā tīr aur bān kā,
 Machā raṇ-kadhaṇ phir pareghān kā,
 475 Kiyā qaṣḍ ik dil kā ahl-i-gharūr,
 Kih chadhe jūn ā-ke daryā kā pūr.
 Hazār āfrīn tūjh koṇ, 'Alīm 'Alī!
 Kahūn sūryā, bīr, jodhā, balī!
 Barā chhot āsan son mahāwat nikāl,
- 480 Lagā pānw hāthi dhakāya akal.
 Ghyās Khān koṇ itne mon golā lagā,
 Lagā sūjh hāthi ūpar son dhakā,
 Parā morehhal hāth son chhuṭ-kar,
 Rahā dekh Sayyad to ho khūṭ-kar.
 485 Take the kam-o-besh kul san jawān,
 Hote karo Sayyad ke sabh khūn-fishān.
 Hāthi thā, wa thā āp, yā thā Khudā,
 Hū, i sāth son sabh sanghātī judā.
 Do tarkash le ise mon khālī kiyā,
 490 Sakal tan ko zakhmāp son jālī kiyā.
 Lagī tīr bhar le ūsi tīr koṇ,
 Chalāwe bharā kar baḍī dhīr son,
 Lagā kar chille koṇ bhī ainchī kamān,
 Lagāwe jis-se sūr hī Alā mān.
 495 Yakāyak lagī mūṇh par ā, pānch tīr,
 Hū, i pār gāliyān ke, pardān ko chīr,
 Liyā ainch kar aur kiyā khūb zor,
 Rahā so saṭā pānch kādha maror.
 Lagā tīr phir anyā goṣh koṇ;
 500 Saṭā kādh bhī is koṇ, ā hoṣh mon.
 Nazik ā-ke ūs fauj kā ko amīr,
 Lagāyā peshānī mo angekht-i-tīr,
 Nikāle, to bargiz nikaltā nahīn,
 Kiyā zor, pun zor chaltā nahīn..
 505 Saṭā chūr aur bhār kar wahān kā wahān,
 Diyā juwāb ūs tīr kā dar zamān;
 Parā āge ghoye son jab wah amīr,
 Kahā: "Kyā jawān-mard hai, be-negīr!"
 So itī mon ko aur haudaj-suwār
 510 Hū, ā sāmhne, dil koṇ kar istwār;

"My friends! whatever happens is the work of Fate,
 "It cannot be wiped away by any device."
 Shekh Faiṣū came and made his statement,
 He who knew that to die was strict duty:
 "Nawāb! Now has come the time to repair to the city,
 "This is not a fight, it is a lesson."
 Talk was going on, plans being discussed,
 When the Sayyad's troops returned, there was sudden outcry,
 A battle with arrows and rockets began.
 Fierce fighting was renewed by the fugitives,
 Men of repute resolved with one intent
 To ride on into the midst of the battle-flood.
 A thousand bravos to thee, O 'Alīm 'Alī!
 I call thee hero, champion, fighter, valorous!
 He knocked the driver from his seat with a mighty blow,
 Began to kick the elephant vigorously.
 Soon Ghyās Khān received a bullet,
 He lay stretched on his elephant motionless,
 His peacock fan fell from his hand,
 He gazed at the Sayyad, then lay like a log.
 More or less, a hundred men stood fast,
 They all gave their life-blood for the Sayyad.
 One elephant, and himself! What else but God!
 All his followers had quitted his company.
 Two full quivers he took then and emptied,
 His whole body was pierced like a sieve.
 Whatever arrow struck, he drew out and returned it,
 He advanced shooting with great coolness,
 He seized his bow-string, he drew his bow,
 He shot as if he were the hero Alah.
 Of a sudden five arrows struck his face,
 They pierced his cheeks and cut his eyelids,
 He drew them out, making great effort,
 As all were in a clump, the five came out by one twist.
 Once more a sharp arrow hit him on the ear;
 Coming to his senses he pulled it also out.
 Drawing near, some noble from the other army,
 Hit him on the forehead by shooting an arrow,
 No effort succeeded in drawing it,
 He tried hard, but force did not avail.
 He applied dust, and filled it there and then,
 Answered by another arrow as soon as he could.
 As he fell from his horse that noble
 Exclaimed: "How brave he is, without rival!"
 Meanwhile someone drew near riding an elephant
 And faced him, bracing up his heart;

- Lagāyā use tīr aisā shītāb,
 Jo de nā sakā pher ūskā jawāb.
 Yabī ise moṇ ā kol, nezā sambhāl,
 Gharūrī soṇ Sayyad pah de de nikāl.
 515 Jo dekhā ūse tīr mārīā ūchhal;
 Paṛā niche ghoṛe ūpar teṇ nikāl,
 Dikhā mūṇh jhokāwe, nigaron phir ā,e.
 Hathī ko ishārat soṇ āge chalā,e.
 So ise moṇ ko pīrādah, faqīr,
 520 Napaṭ bānk, paṭe moṇ thā be-nagīr,
 Hathī hūl ā-ke hū,ā rū-ba-rū,
 Kib jānoṇ Nizām-ul-mulk hū-bah-hū.
 Yakāyak ūse tīr aisā jaryā
 Jo haudaj meṇ be-hosh ho wah paṛyā;
 525 Zakhm par zakhm jab lage pech-o-tāb,
 Hū,ā suat tuk Sayyad-i-'alā-janāb.
 Prān ā-pare, mār talwār ke,
 Baḍe zor ke, aur baḍe thār ke;
 'Azīzān ga,e chhūṭ, sāre nikāl,
 530 Nah sīdhi baghl ko, nah dāṇwī baghl;
 Jidhar dekhā hai, ūdhar "Mār! Mār!"
 Kahā: "Jo raṣā-i-pāk-i-parwardigār!"
 Saṭā hāth himmat soṇ shamsher par,
 Neohar-kar lagāwe jis haudaj ūpar,
 535 Saṭe dhāl, haudaj kī dandiyāṇ ko kāt,
 Lage jahāṇ tabāṇ khol de chankiyāṭ.
 Liyā ā-ke jodhāṇ ne haudaj koṇ gher;
 Rakhā jīwanā bahut bīyā dil daler,
 Do hāthāṇ soṇ shamsher bāzī kiyā;
 540 Magar Karbalā bhar-ke tāzī kiyā.
 To ise moṇ ā ek goli lagī,
 Wah goli nahīṇ, balkih haulī lagī.
 Kahā: "Ko nafr hai, to pāṇī pilāo,
 "Kabāṇ āb-bardār hai, leo, bulā,o!"
 545 Nah pāṇī athā wahāṇ, nah kol āb-dār.
 Lagā ronheṇ jo laṛne ke tān be-yās mār;
 Jase tīr mārī, karī chūr chūr,
 Jab lak tan moṇ jīū thā, o tab lak shu,ūr;
 Ankhiyā par teṇ lohū chal-āyā be-ghumār,
 550 Lagā pūnchhan apne rūmāl kār,
 Bandhī mūṇh pai jālī lohū ke tamām,
 Rabā dekhne soṇ wah Sayyad, Imām.
 Sūnwāe 'azīzān-i-roshan-samīr,
 Lagī ekale tan pai chhatīe tīr,
 555 The nau wār neze o talwār ke,
 Wahm nahīṇ kiya kūchh is azār ke,
 Nawāre lubhū ke ūchhal ban lage,
 Nikāl bhār haudaj soṇ chalan lage.
 Yah thā ek tan, wah hazārāṇ ke ghol,
 560 Hū,ā ma'rke moṇ judā sar soṇ khol,

He shot him, too, with an arrow so quickly,
 That he had no time to give it an answer.
 On this came someone grasping a spear,
 With boldness advanced to attack the Sayyad.
 Seeing this he sprang up and shot an arrow;
 The man fell from his horse to the ground,
 He reeled, showed his face, his eyes turned.
 With a touch he urged on his elephant.
 Thereupon one of a saintly line, a mendicant,
 Absolutely peerless with bent dagger and rapier,
 Driving his elephant came face to face,
 You might take him for Nizām-ul-Mulk himself.
 Of a sudden this man so struck him with an arrow
 That he fell down on his seat and fainted:
 From wound after wound he twisted and turned,
 He was a little weakened, was the lofty Lord.
 Coming to his senses, he used his sword,
 With great force, with the greatest skill;
 His friends had left him, all had bolted,
 None was on the right hand, none on the left;
 Wherever you look, there came "Strike, Strike."
 He said: "The pure will of the Cherisher be done!"
 He laid hand with courage on his sword.
 When, stooping, he brought it down on a haudah,
 It pierced the shield and cut the haudah's frame,
 Wherever it fell, the woodwork broke to pieces.
 The fighters came and stood round the haudah:
 He held his breath, hardened his heart,
 With both hands he wielded his sword;
 Nay, he played out Karbalā in full.
 On this there came a bullet and hit him,
 It was not a ball, it was Fate itself.
 He said: "Is there no one, give me water,
 "Where is the butler, bring him, call!"
 No water was there, no butler to be found.
 He fell to weeping, all hope of fighting o'er;
 He had shot on, cut them into little bits,
 So long as breath was left, and any sense;
 From his eye much blood did flow,
 He began wiping it, taking his handkerchief,
 His face was all covered with streaks of blood,
 That Sayyad and Priest could see no longer.
 Friends have told us, clear of mind,
 That on his single body were thirty-six wounds,
 Nine were gashes of spear and sabre,
 He paid no heed to these hurts.
 Fountains of blood began to spurt,
 Came out of the haudah and flowed onward.
 This was one man, they a crowd of thousands,
 In battle-field the head was severed from its case,

- Lagā jab sete ā-ke golā nadān,
Nikal rūḥ tan taiṇ, kiya tab udān,
- Jigar tūt, lohū jab āya haluk,
Chale, haif! tan par taiṇ lagan dhaluk.
- 565 Mughal ā chadhe tūt haudaj ūpar,
Mū, e par lage mārṇ phir khaṇjar.
Nah jiū thā, nah kūchh rūḥ kā thā nishān,
Nah dam thā, nah kis kār hāthā na jān,
Diyā dāl haudaj tale Khān koṇ,
- 570 So ūs koṇ bhare la'i-i-be-jān koṇ;
Thī tārikh navvī jo Shawwāl kī.
Hū, e shahr moṇ khabar is hāl kī,
Maḥal moṇ diyā jā kahē yah khabar
Kih tal ūpar hai āj sūrā shahr,
- 575 Kahte haiṇ jo 'Ālim 'Alī Khān koṇ,
Sayādat ke masnad ke Sultān koṇ,
Liyā mār lashkar awārā hūwā.
Imāmat ke ghar moṇ andhārā hūwā,
Chhipā jag sete wah mubārik-badan,
- 580 'Alī ke khizānah kā khāṣā ratn.
Lejāne kī begī, shītābī kiya,

Le jā-kar, dekho, kharābī kiya.
Hū, ā ghulelā gul maḥal moṇ tamām,
- Jo khānā o pānī hū, ā sabh harām,
585 Ūthī māṇ afsos kar, āh mār,
Kare ghul soṇ be jān-ke kahān, be-chār!
Zamīn sakht hai, āsmān dūr hai,
Dard māṇ dekho Khān kī hūr hai!
Kahī mā: "Ai farzand mere, nau-nihāl,
- 590 "Hū, ā dekhnā mujh-koṇ terā maḥal!
"Kahān hai tū, farzand, 'Ālim 'Alī!
"Terī gham soṇ sar paṇw lag main jāī!
"Falak-i-be-mihr ne kyā kiya sitam!
"Ganeō āyā mere dhakdhakī kā padam!
- 595 "Ūjālā mere ghar ke iwān kā!
"Falak badr pūr-i-nūr āsmān kā!
"Mere zeb o zinat kā thā gul, gulāb,
"Toṇā-kar kiya sabh chaman koṇ kharāb.
"Hū, ā 'aish o ārām moṇ kyā khālā,
600 "Qiyāmat lagōṇ tab rahga yah maḥal —
- "Hazār arzū anr armān soṇ
"Main pālā thā 'Ālim 'Alī Khān koṇ,
"Kahān wab, kahān ūs kī jawānī gaī?
"Sakal khāk moṇ ūs kī jawānī gaī.

When there came a ball of a sudden.
His soul fled from his body, he gave up vital
breath,
His liver burst, and when blood came lightly
It began, alas! to run down from the body.
A Mughal climbed violently on to the haudah,
Began once more to strike the face with his hanger.
There was no life, nor any sign of breath,
He breathed not, he had no movement of life.
The Khān was thrown down from the haudah,
Thus they dealt with that life-bereft jewel;
It was the 9th of the month of Shawwāl.
News was brought to the city of this thing,
They went into the women's rooms to tell them
That to-day all the city is in confusion,
It is said that 'Ālim 'Alī Khān,
King of the throne of the Sayyads,
Has been killed by an invading army.
Darkness has fallen on the Priestly house,
That blessed body is hidden from the world,
That choice jewel of the treasure house of 'Alī.
In taking his army forth he was too quick and
hasty,
Having taken it, see what harm has been done.
There was weeping and wailing throughout the
palace,
All eating and drinking were forsaken.
His mother arose, with sadness and sighing,
She wailed, knowing not where she was, poor soul!
The earth is hard, the heavens far away,
Behold the woe of the Khān's mother, O Hourī!
His mother sobbed: "O son of mine in youthful
beauty!
"To see thee once more is not allowed me!
"Where art thou, O son, my 'Ālim 'Alī!
"For grief of thee I burn from head to foot!
"Oh cruel heavens, what violence have you done!
"Lost is my necklet's most lovely jewel!
"Cast down the gateway-pillar of my house!
"My moon of heaven in a sky of light!
"Of all adornments he was the rose of roses,
"By pulling it the whole flower-bed is ravaged.
"O how are my ease and delight destroyed,
"To Resurrection Day this will stand an
example—
"With a thousand desires and longings
"I have tended my 'Ālim 'Alī Khān,
"Whither is he fled, where has his youth
vanished?
"Under the earth has his whole youth vanished,

- 605 "Kahūn kya, jo pūchhenge mūjh ko Nawāb:
 "Kahān hai wah farzand, mubārīk-naqāb ?
 "Apas hāth soṅ kyūn ganwāyā ūseṅ
 "Nanhan 'umr meṅ kyūn khapāyā ūseṅ,
 "Manā nā kiya kyūn tum is bāt koṅ,
 610 "Ganwāyā bahādūr mere sāth soṅ !"
 Nah khāwa, nah piwe, achhe zār zār,
 Machhi jyun taraphti hai, tyūn be-qarār,
 Ho be-khūd kahe tal milā hānk mār ;
 "Ai Hāfīz ! Ai Nāsir ! Ai Parwardigār !
 615 "Pakar hāth sompā thā, yā Rabb, tūjhe !

- "Sabab kyā jo phir nā dikhāyā mūjhe !
 "Thi umed yaht dīl moṅ didār kī,
 "Meri fauj, lashkar ke sardār kī ;
 "Kahte the : 'Fatī pā par ke jab āwenge,
 620 "Yaht sūrat navin sar tain dikhā denga."
 "Phir āwan kī khabarān meṅ khairāt kī,
 "Khabar kūchh nah thi mūjh koṅ is bāt kī.
 "Are ! Koī is gham kā dārū batāo,
 "Mūjheṅ is ghadryān soṅ begī chhodāo."
 625 Ho be-sudh parī, hosh, sudh, budh ghawāo :
 Ankhīyān tain ankhū dhal jhote jawāo,

- Maḥal ke jite log zer-o-zabar,
 Pare haif khā khā-ke, sabh be-khabar,
 Kahen kyūn, maḥal moṅ andhārā diṛe ;
 630 Khudā bāj ko nahīn kahīn ab kise,
 Na faryād koṅ ko, na kafr dayād koṅ.

- Gae har tarah Daulatābād koṅ ;
 Shahr, mulk thā, jin ke farman moṅ,
 So yūn jā pere, koh-i-wairān moṅ.
 635 Nah thā kis koṅ zahrah, na kis koṅ majāl,
 Sake mār dam, yā kare kūchh suwāl,
 Ohhachāwe le-jā pal moṅ aḥāk par,
 Sate pal mane khāk kā khāk kar.
 Tulā Rām, diwān, Kāyath, qadīm,
 640 Ithā sāth ūs hādīshah meṅ khadīm.

- Parinde ko tāqat nah pankh mārne,
 Nah yārāe athā, kis koṅ dam kārne ;
 Jase pādārī, so nā-yāb hai,
 Yah dunyā, dekho, sar-ba-sar khwāb hai.
 645 Gyā lūt moṅ māl, asbāb sab,
 Yah qīqash nahīn, hai hikāyat-i-'ajab ;
 Jo boleṅ bachan sūjh dastūr thā,
 Karm rāt-dīn jin kā maghūr thā,
 Kahān wah damāme, naqāre, nishān,
 650 Kahān wah 'arābah, kahān top, bān,

"What shall I say when the Nawāb asks me :
 "Where is that blessed son, O veiled one ?
 "From your hand why allow him to be lost,
 "In youthful years why made you away with him,
 "Wherefore did you not forbid his action,
 "You have lost for me that brave one !"
 She ate not, she drank not, wept without ceasing,
 Ever restless like a fish in its death-throes,
 Out of her senses, tossing about, calling aloud ;
 "O Guarder ! O Helper ! O Cherisher !
 "Taking his hand I made him over, O Lord, to
 Thee !
 "Why have you not restored him to my sight !
 "This hope I cherished in my heart, to see him,
 "This leader of my army and forces ;
 "He said : 'After the victory I will return,
 "This form I will display to you anew.'
 "For news of his return I bestowed much alms,
 "Of this event I had not the least knowledge.
 "Alas ! Tell me the physic for this sorrow,
 "Someone rescue me at once from this oppression."
 They lay senseless, all understanding eclipsed :
 From the eyes of the young and lovely fell
 torrents of tears,
 All those dwelling in the palace were lost in grief,
 With sobbing and sighing lying senseless,
 What can I say, darkness fell on the palace ;
 Except it be God, who else is there now,
 No one to complain to, no one to provide
 a winding-sheet.
 Somehow or another they reached Daulatābād ;
 She under whose orders had been city and country
 Went out thus, camped among the lonely hills.
 No one had the spirit, nor was it feasible —
 No one could say a word, or ask a question,
 He was carried off in a moment to the skies,
 Hurriedly, in one moment, he returned to dust.
 Tulā Rām, his diwān, a Kāyath, of long service,
 Did his duty and followed him in this sudden
 calamity.
 A bird had not the power to flap its wings,
 No one had the power to breathe a word ;
 Lasting fame no one can attain,
 This world, behold, is nothing but a dream.
 Lost by plunder was all his baggage,
 It is not an idle tale, it is a strange true story ;
 He whose custom it was to speak truth,
 He whose constant generosity was notorious,
 Where are his big drums, kettle-drums, standards,
 Where are his guns, where his cannon and rockets,

Hazārān the ghore, hāthī be-shumār,
Hazārān jharī dār the jinke duwār,
Sadr masnadān jā-ba-jā, thār thār,
Agēn haуз-i-lab-rez ur gul-i-bahār,

- 655 Kahān ṣalābat, kahān wah hukm,
Kahān fauj, laḥkar, kahān wah ḥashm;
Hazārān so baḥshish karen the madām,
Sakal bādshāhī moṇ 'izzat-i-tamām.

- Sūdishtā! yah kyā kiyā sitām! Hāe! hāe!
660 Yah dunyā hai aise koṇ, kiya koi na pāe,
Kahān hai wah dāulat, kahān wah ḥāl,
'Ajab qudratān teriyān, guḷ-jalāl!
Kahe mil apas moṇ apan ahl-i-rāz,
Sayādat kā nā-ḥaq dubāyā jahāz,
665 Nabwat kī angushtari kā nagīn,

- Jigar goshaḥ-i-Fāṭimah biḷ-yaqīn,
Parā gard lohū mane lāl ho,
Girā ekalā ran moṇ be-ḥāl ho;
Yah gham jag moṇ jab aḥkārā hū,ā
670 Jigar tūt 'ālam kā, parā hū,ā.
Hazār āh, afsos, ai dostān!
Chhipā, ḥaif!, dunyā taiṇ wahū nau-jawān!

- 'Ajab Sayyad, 'ālā-nisbat, khān thā,
Farāsāt ke daftar kā Sulṭān thā,
675 Kahān dhūndhiyān ab, kaho, Khān koṇ,
Risālat kī motī pareshān koṇ?
Nanhe 'umr moṇ kyūṇ khapāyā ūse?
Le jā-kar, dekho, dūkh dikhāyā ūse.
Nah āram dil koṇ, nah khāṭir qarār,
680 Jigar jal dharaktā hai, jaisā angār,
Jī, e lag nah ab kis taiṇ yārī karen,
Yah gham dil moṇ rakh, burd-bārī karen;

- Dunyā hai daghā-bāz, fānī-maqām,
Hai dil bāndhuāṇ is soṇ biḷ-kull ḥarām.
685 Qila'h kā qila'h-dār-i-'ālā-qadr
Sayādat ke nāte pe rakh kar naṣr,
Liyā qila'h moṇ, ur kahā aḥkār;
'Main momin, musulmān, dīndār,
'Tumbāre mere lāj ik lāj hai.
690 'Merā qaul tūmanā sete āj hai,
'Rafāqat tūmhārī jī ke sanghāt,
'Main jagir, manṣab taiṇ dhowen haiṇ hāth,
'Jo kūchh ho thārā karegā so ho,
'Main baithā hūn, sab bāt soṇ hāth dho,

Thousands of horses, uncounted elephants,
With their abundance of jerks and whirls,
Seats of authority spread out in rows,
Before him full fountains and the blossoms of
spring.

Where is all that show, where all that splendour,
Where army and camp, where all that array;
For ever gave he thousands of gifts,
Throughout the Empire had he completest
honour.

O Sūdisht! what crime is this? Alas! woe is me!
Such is this world, no one gets his due,
Where is that wealth, where that position,
Strange are Thy judgments, O Omnipotent!
Those in the secret say, gathered together,
The ship of the priestly line is wrecked,
The central stone in the signet ring of the
Prophet's house,

The heart in the bosom of Fāṭimah, the veritable,
He fell in the dust reddened with his blood,
He fell in single combat all exhausted;
When this grief became known to the world
Everybody's heart broke and fell in pieces.
Alas! a thousand times alas! O friends!
Vanished from the world, O woe! is that comely
youth!

A wonderful Lord of high degree, a Khān was he,
King in the council of the sagacious.
Where now shall we seek, tell me, for that Khān,
That scattered pearl of heavenly mission?
In tender age why have you destroyed him?
He was taken, you see, and beheld sorrow.
No peace for my mind, the heart never at rest,
My liver on fire, blazing like a hot coal,
All my life long no further friend have I,
Hiding this grief in my heart I will silently
suffer;

The world is but a deceiver, a passing show,
Attachment to it is altogether wrong.
The fort-commander of high degree
Looked with favour on the Prophet's descendant,
Took her into the fort and said openly:
'I am orthodox, a believer, a religious man,
'Your desires and mine are one and the same.
'This day I pledge you my word,
'I take your side with heart and soul,
'I wash my hands of rank and lands,
'Come what come may,
'Here I sit, having washed my hands of every-
thing,

- 695 "Rakho dil-jama', aur khātir qarār,
"Laṛūngā, jo chal āvenge lak suwār."
- Dilāsā diyā, aur kahāyā salām,
Diyā khūb rahne koṃ, khāṣā maqām.
Mubārīk terā naṃwā tūjh par achho !
- 700 Yah niyat terā tūjh rahbar achho !
Shujā'at ke taure meṃ tūṃ mard hai,
Bahādūr, shujā', ṣāhib-i-dard hai,
Marātīb soṃ mardī ke hai be naṣīr,
Muḥammad se nit ūchho dastgīr !
- 705 Jo bolā bachan so rakhā bar qarār,
Achho shāh mardān kā tis din adhār,
Dū jag meṃ naṭījah baḍā pāega.
Dunya sahal hai, nā tūṃ rah jāegā.
Hū, ā ba'd-az-ān ghul Hindūstān meṃ,
- 710 Hūwā jang Mughal ur Miyān Khān soṃ,
- Shahādāt kare Khān taṃ ikhtiyār,
Kare maghfarat Khān koṃ Parwardīgār !
Hū, jāb khābar jā yah Nawāb koṃ,
Risālat ke mīmbar kī mīhrāb koṃ,
- 715 Kīh 'Alīm 'Alī, Sayyad bā-khair,
Kīyā 'ālame ma'navī par safar,
Sūnā ur parā gham ke jā āg meṃ,
So 'Alīm 'Alī Khān ke bairāg meṃ.
Kahā : "Khod dārūn Dakhīn kī zamīn,
- 720 "Yah kyā bāt hamānā pah āwe kamīn,
"Ba ḥaqq-i-Khudāwand-i-gun-o-makān
"Nah Mughalāṃ koṃ chhoḍūṃ nah Mughale
kā nāṃ."
- Mangā topkhānā baḍe dāb kā,
Bangālā, Pūrab, aur Panjāb kā,
- 725 Mangāe kahak bān sabh Hind ke,
Dillī, Āgrah, aur Sahrind ke,
Jazāīl, shutarnāl, kā, e hazār ;
Kī, e ṣāf dho-dhā-ke sabh ko tayār,
Ghilāṅg kī, e sabh koṃ bānūt ke,
- 730 Surkh, sabz, aur zard ke bhāūt ke.
Hazārāṃ jawān-mard, shamsher-zan,
Mile ā-ke Bārhe soṃ, saṭ de waṭan,
Līyā sāth aḥshām chaṃṣaṭh hazār,
Apas the shujā'at meṃ ik nāmdār.
- 735 Ūthe bol : "Agar hai mere tan meṃ jān,
"Lagā kar Lankā lag karūngā ūdān."
Kahā jazab soṃ : "Ai Khudāwandīgār !
"Nizāmāṃ soṃ mujh ko milā ek bār !
"Agar mujh-ko dushman merā pāe to,
- 740 "Nikal jāweṃ, jo sāmhnē ā, e to."
- "Make yourself easy, set your heart firmly,
"Fight I will, should thousands of horsemen
arrive."
- He reassured her, sent his compliments,
He made over to her excellent quarters.
Fortunate be thy name to thee !
May this thy purpose lead thee aright !
In the ranks of the brave you are a true man,
Valorous, bold, of compassionate heart,
In the ranks of the valiant unequalled,
May Muḥammad ever protect thee !
The word he had spoken he acted up to,
On the day when salvation is granted to brave men,
In both worlds he will obtain great reward.
This world is an illusion, nor shalt thou endure.
After this began an outcry in Hindūstān,
There had been fighting between the Mughal and
the Miyān,
The Khān had elected for martyrdom,
May the Cherisher give the Khān pardon of sins !
When this report was brought to the Nawāb,
This chief place in the pulpit of religious effort,
That 'Alīm 'Alī, the Sayyad of lucky fate,
Had journeyed to the Eternal Mansions,
He heard, and with grief was set on fire
At being separated from 'Alīm 'Alī.
He said : "I will dig up all the Dakhīn lands,
"What thing is this done to me in ambush,
"I swear by the Ruler of Heaven and Earth
"Not one Mughal, nor shall any Mughal's name
be left."
- He sent for artillery of the heaviest calibre,
From Bengal and the East and the Panjāb,
Sent for the screeching rockets of all Hind,
From Dillī and Āgrah and Sahrind,
Of wall-pieces, camel-guns, many thousands ;
They were cleaned and washed out, all made-ready,
For all he made covers of broad cloth,
Scarlet, green, and yellow-coloured.
Thousands of strong fighters, wielders of swords,
Came and joined the Bārha, leaving their homes,
Bringing a gathering of sixty-four thousand,
Among themselves one and all renowned for
valour.
- He spoke aloud : "If life be left in my body
"I will work down to Lankā and give it as a gift."
He said with rage : "O Lord Most High !
"Bring me but once in face of the Nizām !
"If ever my enemy should be found by me,
"He will be wiped out, should he confront me."

- Zamīn dandnāne lage, khauf khā,
 Paṛā dhāk mulke-mulk, jā-ba-jā,
 Amīrān-mīrā fauj sab sāth le
 Chālā hai Dakhīn par, damāne ko de.
- 745 Chale the do manzil Dakin ke kadhan
 Hū, ā ūs moṇ taqdīr kā ek fann,
 Daghā se liyā mār Nawāb koṇ
 Liyā lūt sāmān wa asbāb koṇ.
 'Azīzān ! Jo kuchh hai so taqdīr hai,
- 750 Ba-ghair az reṣā kuchh na tadbīr hai,
 Yah dunyā daghā-būz wa makkār hai,
 Wahī būjhtā hai jo hoṣhīyār hai ;
 Wahm be-khabar, 'aql hairān hai,
 Dekho, dostān, kyā yah tūfān hai !
- 755 Dunyā ki muḥabbat hai bi, kull kharāb,
 Yah jīwanā hai pānī pah jāisā ḥabāb,
 Agar māl, dhan lākh dar lākh hai
 Samajh dekh, akhīr waṭn khāk hai !
- Yah jīwanā khatam hai, nah dāulat khatam.
- 760 Are ! Jāg soyā hai, kiyā be-wahm ;
 Jaise kuchh samajh būjh adrāk hai.
- Dunyā ke alāish soṇ wah pāk hai !
 Maregā, maregā, re, mar jāegā !
 Jo kuchh yahān kiyā hai, so wabān pāegā ;
- 765 Agar būdshāh hai, agar hai amīr,
 Ajall ke panjōṇ meṇ haiṇ sāre asīr.
 Kahān ga,e, kahān ga,e, kahān hai, batā ?
- Athā māl, dhan jin-kā lā-intihā.
 Nah ghar kām āwē, nah khar chār rabe,
- 770 Nah nrān-bāp, bhāi, nah ko yār rabe :
 Jo āyā hai jag moṇ, so mihmān hai,
 Yah jīwanā, so jyon phūl aur pān hai.
- The earth began to quake from fear,
 Clouds covered the kingdoms from place to place,
 The Noble of Nobles, taking all his army,
 Has set out for the Dakhin, his big drums
 beating.
 He had gone two stages on the Dakhin road,
 Then came to pass one of Fate's scurvy tricks,
 By treachery the Nawāb was struck down,
 All his goods and equipage carried off.
 My friends ! whatever comes is decreed,
 Against God's will no plan prevails,
 This world is a traitor and a deceiver,
 He understands it who is on his guard ;
 Imagination faints, and reason reels,
 Behold, beloved, what a whirlwind it is !
 Love of this world is out-and-out sinful,
 This life is but a bubble on the water,
 If wealth and goods amount to lakhs upon lakhs
 Overlook not this truth ; — our last home is the
 grave !
 This life has an end, but wealth remains behind.
 Ah ! we woke, we went to sleep, we doubted not ;
 We ought to have weighed things, ought to have
 perceived.
 By the world's stains he is unpolluted !
 All die, all die, woe is me, we all must die !
 What we have done here, we there must receive ;
 Whether it be an Emperor, or a great noble,
 In the claws of death we are all captive.
 Where went he, where went he, where is he now,
 O tell me ?
 He whose wealth and pelf were beyond compare.
 No house avails nor is a demon of any help,
 Nor parent, nor brother, nor friend is left :
 Whoever enters this world is only a guest,
 This life here, no more than a flower or a leaf.

Notes.

Line 2. — Nizāmu-l-mulk crossed the Narbadā early in May 1720, and defeated the Sayyads' officer, Dilāwar 'Alī Khān, to the east of Burhānpūr on the 19th June 1720. The person addressed is Sayyad 'Alim 'Alī Khān, Bārbah, a young man of twenty years of age, nephew and adopted son of Farrukhshiyar's Wazīr, Sayyad 'Abdullah Khān, Qutbu-l-mulk. He had been left at Aurangābād as deputy governor of the six Dakhin provinces, on the departure of his other uncle, Sayyad Husain 'Alī Khān, for Dihli (Dec. 1718). Line 139. — The 12th Rajab 1132 H. (19th May 1720) is rather too early a date for 'Alim 'Alī Khān to receive orders to take the field, since the news that Nizāmu-l-mulk had left Mālwah for the Dakhin did not reach Dihli until the 16th May 1720. But the date is not impossible ; instructions may have been sent to 'Alim 'Alī Khān in anticipation of Nizāmu-l-mulk's movement. Line 220. — The pass referred to is that of Fardāpūr between Aurangābād and Burhānpur. It was crossed early in July 1720. Line 257. — The river meant is the Purnā ; it was crossed by Nizāmu-l-mulk about the 20th July 1720. Line 271. — The

date for the battle, the 6th Shawwāl 1132 H. (10th August 1720), is right according to the authorities, but my tables make it a Saturday instead of a Sunday. Line 273. — According to the *Berar Gazetteer*, p. 163, the site of the battle lies between the villages of Kolhari and Pimpri Gauli, close to Bālapur town (Akola District), Lat. 75° 59', Long. 20° 40'. Line 274. — *Mirrīh* or Mars is unpropitious, and known as *Jallād-i-falak*, or Headsman of the Skies. Line 276. — Saturn (*Zuhāl*) is also an unlucky planet. Line 312. — The word, which I read *chhine*, has completely puzzled me. Line 494. — Alah is meant for the Chandel hero of the ballad of Alhā and Udāl. Line 632. — Khāfī Khan, II., 896, tells us that the Sayyad's family took refuge in Daulatābād. Line 725. — The obscure expression *kahak bān* is also found, as Mr. H. Beveridge has pointed out to me, in the *Akbarnāmah* (Lucknow edition, iii, 19, line 9). I take it to be some kind of noisy rocket named from *kuhuk*, the cry or scream of the peacock. Line 747. — Sayyad Husain 'Alī Khān, Amīru-l-umārā, was assassinated on the 8th October 1720, at the entrance of the Imperial camp, when it was between Jiund and Biund, about two *kos* to the east of Todah Bhīm, a place now in Jaipur territory, about 75 miles south-west of Agra and about 60 miles east of Jaipur.

THE KHAROSHTRI WRITING AND ITS CRADLE.

BY SYLVAIN LÉVI.

*Translated, with the author's permission and under his direction, from the "Bulletin de l'École Française de l'Extrême Orient," Vol. II., 1902, pp. 246 to 253,
by CHRISTIAN A. CAMERON.*

[In the north-west of India, and in some neighbouring territories, there was in use, in ancient times, an alphabet, — best known perhaps from its occurrence in some of the records of Aśoka and on certain coins, — the characters of which were written from right to left, instead of from left to right as was the case with its contemporaneous Indian script, and to which there has been attached the name Kharōṣṭhī. There has been a divergence of opinion regarding the original home of this alphabet, and the exact form and meaning of its name. And a discussion of these points was started by M. Sylvain Lévi's article of which a translation is given below. It is intended to follow up this translation by translations of certain articles published by other scholars, whose views in this matter differ from those of M. Lévi. And the discussion will then be summarised and reviewed by M. Lévi, who now has some important new matter to adduce from both Chinese and Sanskrit sources in support of his own conclusions. — EDITOR.]

THE name of the Kharōṣṭhī or Kharōṣṭrī writing was early familiar to Indianists from being placed second, immediately after the Brāhmī, in the list of 64 forms of writing in the *Lalitavistara*; but nothing definite was known about it. In 1886, M. Terrien de Lacouperie¹ pointed out a passage in the *Fa-yuan-shu-lin* in which the Kharōṣṭhī (°ṣṭrī), a form of writing reading from right to left, is contrasted with the Brāhmī writing which reads from left to right. Savants, relying on this information, applied the name Kharōṣṭhī writing to the alphabet "employed in the Gandhāra country from the 3rd century B. C. to the 3rd century A. D." Specialists for some time hesitated between the two forms: *Kharōṣṭrī* and *Kharōṣṭhī*. Bühler, who had used and popularised the name, finally decided in favour of *Kharōṣṭhī*; and, on the authority of his *Indische Palaeographie*, the name *Kharōṣṭhī* has the likelihood of henceforth obtruding itself as the accepted form.

The traditional interpretation, preserved by the Chinese compilations and commentaries, where *Kharōṣṭhī* is always translated "ass-lip" (Sansk. *khara-ōṣṭha*; *khārōṣṭha*) seemed to justify this preference. In support of this etymology, Chinese tradition traces the invention of the Kharōṣṭhī

¹ *Babylonian and Oriental Record*, Vol. I. p. 59.

to a Rishi called Kharōshṭha. The name is certainly not flattering, but there are analogies among the names of saints.² On the other hand, European savants have made ingenious comparisons to Kharōshṭra, particularly with such names as Zardusht, Zarathushtra.³

Other information, also of Chinese origin, seems to open up fresh theories as to the source of the name Kharōshṭhi. This is independent of the schools of the Siddham, where the Sanskrit characters were studied with regard to their mystic value. It is not offered in support of any theory, but as [247] an independent fact, so that critics may accept it without any doubt as to its honesty and correctness.

I borrow from the *Sin-yi Ta-fang-kuang Fo-hua-yen-king yin-yi* of Hwei-yuan. This is one of the texts, which have fortunately been preserved in the Korean collection, and which, in the excellent Japanese edition of the Tripiṭaka, are now at the service of science. The author, Hwei-yuan, according to the catalogue, lived under the T'ang Dynasty.⁴ The biographical dictionary of celebrated monks, which I brought from Japan, confounds him with the priest Huan-yuan, also called Fa-yuan and Hwei-yuan, whose biography may be found in the *Siu-kao-seng-ch'ao*, ch. xxviii.; but this priest flourished in the Cheng-kuan period (627-649) and lived in the Monastery of P'u-kuang, whilst the author of the *Yin-yi* resided at the Monastery of Tsing-fa; besides, the *Yin-yi* is, as its complete title indicates, an explanation of the difficult words of "the new translation of the *Avatamsakasūtra*," by Śikṣhānanda, 695-699. The work cannot be earlier than the 8th century.

In the 45th chapter of the new translation of the *Avatamsaka* (Jap. ed. I. fasc. 3, p. 22^b), which corresponds to the 29th chapter (Jap. ed. I. fasc. 8, p. 46^b) of the old translation by the Indian monk Buddhahadra, of the family of the Sākya (between 399 and 421), the Buddha enumerates the localities predestined to serve for all time as residences for the Bōdhisattvas, and the Bōdhisattvas destined for all time to preach the law in each of these localities.

The list opens with a series of imaginary mountains, situated at the cardinal points, at the intermediate points, and also in the sea; then comes the real world.

To the South of *Pi-che-li* (Vaiśālī) is a place called Good Resting-place (Susthāna?); from earliest antiquity the Bōdhisattvas live there.

In the town of *Pa-lien-fu* (Pāṭaliputra) is a place named the Seng-kia-lan of the Lamp of Gold (Suvarṇa-dīpa-saṃghāṛāma); from earliest antiquity, &c.⁵

In the town of *Mo-t'u-lo* (Mathurā; Buddhahadra writes *Mo-yu-lo*: Mayūra) is a place named the Grotto of Abundance (*Man-tu-k'u*; Buddhahadra says: "the Merit of the Upkeep which yields Increase," *Ch'ang-yang-kong-tō*); from earliest, &c.

In the town of *Kiu-chen-na* (Buddh.: *Kiu-chen-na-ya*, Kuṇḍina) is a place named the Seat of the Law (Dharmāsana); from earliest, &c.

² Bühler, *Wiener Zeitschr. f. d. Kunde des Morg.* Bd. IX., S. 63. ³ Cf. Weber, *Ind. Streifen*, Bd. III., S. 8-9.

⁴ M. Lévi has here added a note, as follows:—I have since ascertained that the edition of the Ming contains still another recension of the same work; it is entered under No. 1606 in Nanjio's Catalogue. The author's name, written Hwui-wān by Nanjio, figures in Appendix III. of the same Catalogue, under No. 32: "Hwui-wān, a priest who in about A. D. 700 compiled 1 work, viz., No. 1606." The *Sung-kao-seng ch'ao*, compiled in A. D. 988, gives a biographical notice of that person (Japanese ed. XXXV. 4, 94^b): it does not contain any precise date; but it is inserted between two biographies, of which one refers itself to A. D. 766 and the other to A. D. 782. We might thus be tempted to place Hwei-yuan about that same period. But he is certainly earlier, because his name and his book are mentioned in the *K'ai-yuen shi-kiao lu* (Japanese ed. XXVIII. 4, 83^a), a catalogue compiled in A. D. 730. Hwei-yuan is there shown after I-tsing and Bōdhiruchi, — of whom the former died in A. D. 713 and the latter in A. D. 727, — and immediately before Tcheryen and Vajrabōdhi, of whom the former began to translate in A. D. 721 and the latter in A. D. 723. Hwei-yuan, then, composed his work in the first quarter of the eighth century.

⁵ This is wanting in the translation of Śikṣhānanda.

In the town of *Tsing-ting-pei-ngan* (Pure-Pure this border?) is a place named the Grotto (Buddhabhadra says: "the Merit")⁸ of *Mu-che-lin-to* (Muchilinda); from earliest, &c.

In the kingdom of *Mo-lan-to* (?; Buddhabhadra says: in the Land of the Wind) is a place named the Institution of the King of the Dragons without Obstacle (*apratigha*); from earliest, &c.

In the kingdom of *Kan-pu-che* (Kambōja) is a place [248] named Supreme Benevolence (*Uttama-maitrī*?); from earliest, &c.

In the kingdom of *Chen-t'an* (China-sthāna) is a place named the Grotto of *Na-lo-yen* (Buddhabhadra writes: the Mountain of *Na-lo-yen*: *Nārāyaṇa-parvata*); from earliest, &c.

In the kingdom of *Shu-le* (Buddhabhadra says: of the Neighbouring Barbarians: *Pien-yi*) is a place named Head of the Cow (*Gōśirsha*); from earliest, &c.

In the kingdom of *K'ia-she-mi-lo* (Kāśmīra; Buddhabhadra: of *Ki-pin*) is a place named the Series (Buddhabhadra: the Mountain *Wu-ti-shi*; *Uddōśa*); from earliest, &c.

In the town of Intense Joy (Buddhabhadra: *Nan-ti-po-tan-na*, *Nandipattana*) is a lake named the Grotto of the Honourable (Buddhabhadra: *Ti-lo-feu-ho*); from earliest, &c.

In the kingdom of *Ngan-feu-li-mo* is a place named the Splendour of a Hundred-thousand Treasures (*Yi-tsang-kuang-ming*; Buddhabhadra says: Straight and Oblique); from earliest, &c.

In the kingdom of *Kien-t'o-lo* (Gandhāra) is a place named the Grotto of *Shen-po-lo* (Jambhala; Buddhabhadra says: of the Pure Retreat); from earliest, &c.⁹

Huei-yuan's *Yin-yi* gives very few comments on this passage: among so many interesting names, he glosses only: *Vaiśālī*, *Mathurā*, *Kuṇḍina*, *Chīna*, *Nārāyaṇa*, *Shu-le*, *Ngan-feu-li-mo*, and *Gandhāra*. We learn nothing from him, except with regard to *Shu-le*. "The correct form," he says, "of the name *Shu-le* is *K'ia-lu-shu-tan-le*.⁸ We have for a long time accepted the abbreviated *Shu-le*: and it has become customary to substitute the sound *shū* for the sound *shü*." This is the name of a mountain of this kingdom, whence it is derived. It is said also to mean 'Evil Nature,' and to refer to the temperament of the inhabitants."

This gloss is found word for word in the commentary on the *Avataṃsaka-sūtra*, composed at the end of the 8th century by Ch'eng-kuan, the fourth patriarch of the Avataṃsaka school, who died at over seventy years of age, between 806 and 820. He has copied his predecessor's work, without the slightest alteration, in the 47th chapter of his commentary, the *Ta-fang-kuang Fo-hua-yen-king-shu* (Nanjio, No. 1589; Jap. ed. XXVIII. fasc. 4, p. 8^b). In his enormous sub-commentary to the

⁸ In this as in the preceding case Buddhabhadra seems to have read the last term of the phrase *gūṇa*, whereas *Sikshānanda* read *guhā*.

⁹ M. Lévi has here added a note, as follows: — I have found another list, analogous and almost parallel, in the collection entitled *Mahā-saṃnipāta-sūtra* (Ta-tai king; Japanese ed. III. 3, 52-53), a section of the *Sūrya-garbha-sūtra*: —

At *Vaiśālī* is the residence of the holy man *Shen-chou* (good-stay) *men-ni* (*muni*); . . . in *Magadha*, that of the holy man *Pi-pu-lo peng-kia men-ni* (? *Vipulāpāṅga muni*); . . . at *Mathurā*, that of the holy man *Ngai-yu-yen* (loves-mist-fire); . . . in *Kōśala*, that of the holy man *She-ye sheou-t'o men-ni* (? *Jayaśuddha muni*); . . . at *Su-po-la-ka-sa-che-men-chi-lin-to-lo* (sic: *Supāraka* [*Sōpāra*; evidently corresponds to *Tsing-ting-pei-ngan*, 'pure bank,' *su-pāra*]) *sacha* (?) *Muchilinda* that of the holy man *Hiang* (perfume); . . . in *Gandhāra*, that of the holy man *Ta-li-she-na jou-mo-lo men-ni* (*Darsanajñānala muni*); . . . in *Kipin* (*Kapiśa* or *Kāśmīra*), that of the holy man *Kong* [*kong*] *mo-ni-k'ia men-ni* (? *Kuṅkuma . . . muni*); . . . in *Ngan-feu-li-mo*, that of the holy man *Yi-ts'ang-yen men-ni* (myriad-depot-flame); . . . in *Chen-t'an*, that of the holy man *Na-lo-ye-na fo-lo-po-so men-ni* (*Nārāyaṇa . . . muni*); . . . at *Yu-t'ien* [*Khotan*], on the mountainous bluff of the river near the mountain *Meu-t'eu* (cow-head; *Gōśirsha*), that of the holy man *Kiu-mo-po-(or so)-lo hiang* (? *Gōma-sāra-gandha*).

In this list *Khotan* (*Yu-t'ien*) replaces *Kashgar* (*Shu-le*); but this last town is mentioned a little further on, in another exposition.

The Chinese translation of the *Sūrya-garbha-sūtra* has for its author *Narēndrayaśas*, and for its date between A. D. 589 and 618.

⁸ The text of the Japanese edition presents by mistake *yi* for *k'ia*; but a comparison with following texts allows us to restore *k'ia* with confidence.

Sūtra, the *Ta-fang . . . shu-yen-yi-ch'ao* (Nanjio, No. 1590; Jap. ed. XXVII. fasc. 9, p. 84^a, chap. 77) he again speaks of *Shu-le* and *K'ia-lu-shu-tan-le* as being equivalent. The same gloss on the name *Shu-le*, à propos of the same passage, is found in the excellent *Yi-tai-king yin-yi* (chap. 22) of Hwei-lin, a contemporary of Ch'eng-kuan, who also died in the Yuan-ho period (806-820), aged eighty-four years; this colossal compilation, which was not included in the Chinese canon, forms part of the Korean collection, and it is again to the editors of the Japanese Tripitaka that Western science owes this precious document. Hwei-lin was a native of Kashgar; it was there, [249] without doubt, that he acquired the knowledge of Sanskrit, which he has utilised in his *Yin-yi*; in identifying *Shu-le* and *K'ia-lu-shu-tan-le*, and in tracing the traditional interpretation of the name, he seems to recognize and prove the value of it (Jap. ed. XXXIX. fasc. 8, p. 144^a).

Hi-lin, author of the *Siu-yi-tai-king yin-yi*, who continued Hwei-lin's work, repeats exactly the notice of his predecessor, with regard to *Shu-le*, in the itinerary of Wu-k'ong (Jap. ed. XXXIX. fasc. 8, p. 11^a). I do not know the precise date of Hi-lin, but it can easily be inferred. Hi-lin represents his work as a supplement to the *Yin-yi* of Hwei-lin, and the last of the texts which he glosses is the *Ta-fang cheng-yuan siu k'ai-yuan she-kiao lu* or Supplementary Catalogue edited by Yuan-chao who flourished in 778. The *Siu . . . yin-yi* of Hi-lin therefore belongs to the first half of the 9th century, and is immediately posterior to the *Yin-yi* of Hwei-lin.

Thus the identity of *Shu-le* and *K'ia-lu-shu-tan-le* was accepted and taught in the Buddhist schools of China, during the 9th century. The transcription *K'ia-lu-shu-tan-le* leads directly back to an original *Kharōshtra*. The use of *shu* in this case exactly corresponds to the only example which Stan. Julien gives in his *Méthode* (No. 1622). In the transcription "Pushpa: *Pu-shu-pa*," as in that of "Kharōshtra, *K'ia-lu-shu-tan-le*," *shu* serves to represent the cerebral sibilant immediately followed by a consonant, and placed after a syllable with a labial vowel: *u* in the one case, *ō* (= *a* + *u*) in the other.

The value of *Shu-le* itself is well known. It is the name which has been regularly employed since the time of the first Han Dynasty to denote the town of Kashgar. The *Kharōshtra* is therefore the country of Kashgar, and the *Kharōshtrī* is very probably the writing of this country.

A few years ago this hypothesis would have seemed a very rash one. In his *Indische Palaeographie*, 1896, p. 19, Bühler wrote: "The *Kharōshtrī*, as at present known, is an ephemeral "alphabet, almost purely epigraphic, of the North-West of India. Its proper domain lies between "69° and 73° 30' E. long. and 33°—35° N. lat." The *Kharōshtrī* manuscript of the *Dhammapada*, discovered in the environs of Khotan, and acquired partly by the mission of Dutrenil de Rhins, partly by M. Petrovski, at once confuted these two assertions; the *Kharōshtrī* was a writing of scribes and copyists, and was employed, exactly as the Brāhmī was, to reproduce literary or religious texts; and the limits of its domain extended at one leap to 77° E. long. and 37° N. lat. The districts of Khotan and Kashgar have continued ever since then to supply new documents. In a recent communication, M. Stein, who has explored the region of Takla Makan, announced that, on the old banks of the Niya River, 37° N. lat. and 82° 20' E. long., he had found five hundred inscriptions on tablets of wood in *Kharōshtrī* characters. It appears more and more evident that the *Kharōshtrī* was the writing of Central Asia, [250] of the country of *Kharōshtra*. Henceforth it would be wise to abandon the incorrect form *Kharōshtrī* and to return to the authentic form *Kharōshtrī*, set aside by mistake.

Can this name *Kharōshtra* be explained? The Chinese interpretation, which renders it "evil-nature," recalls the interpretation of the name *Ki-pin*, also supplied by Chinese tradition. *Ki-pin* would signify "miserable race." On all sides there is the same tendency to give a contemptuous etymology to names of barbarian countries. The name *Kapīśā* naturally evoked the Sanskrit *kapīśa*, "monkey colour," and *kapi* "monkey": the temptation to apply such an etymology to barbarians was too grateful to be resisted. *Kharōshtra* could also be analysed in Sanskrit: *khara*, "ass," + *ushtra*, "camel." The facetious monks, who came from India, would spread this false etymology, and the

Chinese admitted that the name of the country was explained by "the natural perverse temperament of the inhabitants."

The first term indeed of the name may be "Kara," which enters into the composition of so many geographical names in Turki countries. From this point of view it may be interesting to notice that according to the *Sūrya-garbha-sūtra* (*Je-tsang-king*; Nanjio, No. 62; Jap. ed. III. fasc. 3, p. 53*) the name of Khotan (*Yu-t'ien*) under Kāśyapa Buddha, — that is to say the most ancient known name of Khotan, — was *Kia-lo-sha-mo*, where the element *Kara* again seems to appear. Because of its singular assonance, I again recall the name of the Prince Royal "Kharastā Yuvarāja," son of Mahachhatrava Rajula, and brother of Chhatrava Sudasa, whose name is on the famous lion-pillar of Mathurā. Is it possible that the name of this Yuvarāja is a souvenir of the origin of this family with foreign names, which, coming into the heart of India with the Scythian conquest, was elevated to the dignity of Satraps?

The name of the country, Kharōshtra, met with in the Chinese texts, sheds an unexpected light on a long description by Ktesias. The résumé of the Greek Doctor, incorporated in the Bibliotheca of Photius, gives a long description of the singularities of an Indian population called the *Kalystrioī*, which is equivalent to the Greek *Kynokephaloī*, otherwise the "Dog-heads." The *Kalystrioī* live in the mountains, in which the Hyparkhos (or Hypobares) has its source. This river flows from the north to the Eastern Ocean; its name means "the bearer of all good things" (*pherōn panta ta agatha*). The form and the meaning recall the Suvāstu of Sanskrit geography, designated by the pilgrim Hiuan-tsang by the name Subhavastu (*sic*) which becomes the Svāt of modern geography. Buddhist tradition places the abode of the Nāga Apalāla, one of the most popular and important of the Nāgas, at the source of the Svāt. The Eastern Ocean, which receives the waters of the Hyparkhos, means for Ktesias nothing more definite than the seas to the east of Persia. Whether we have to do with the Svāt or another stream, the country of the *Kalystrioī* is to be found in the Hindu Kush, as their mountains "extend to the Indus." The Greek *Kalystrioī* leads directly to a [251] Sanskrit Kalushtra; from Kalushtra to Kharōshtra the path is too simple for us to refuse to accept it, especially when one considers the route that this name must have traversed to reach Ktesias.

Greek tradition, it is true, does not take any notice of the real or supposed elements in the Sanskrit word Kharōshtra; but the Chinese interpretation on the other hand is not more literal. The generic parentage of the two glosses is evident. "Dog-heads" or "evil-natures" indicate the disagreeable tendency to depreciate one's neighbour; the "natural coarseness" which the Chinese commentators lay to the credit of the Kharōshtras to justify their name, is a counterpart of the wild roughness of the *Kalystrioī* of Ktesias. But there is no need to search far from the country of the *Kalystrioī* or Kharōshtras to meet "Dog-heads" in the classic geography of India. The astronomer Varāha-Mihira (6th century), in his description of India (*Bṛhat-Saṃhitā*, xvi. 28), places the Turagānanas, "Horse-faces," and the Svamukhas, "Dog-heads," in the North, in the region of the Himālayas, between Trigarta (Jalandhar) and Takshaśilā (the town of Taxilā). These two peoples are found together in a modern work, derived from an original Persian, the *Rōmakasiddhānta* (Cat. MSS. Oxon. 340*, 16); after them come the Kinnara-mukhas, "Kinnara-faced," other monsters with horse-heads who are usually placed on the borders of China. Lastly, the "Dog-heads" are again mentioned in a long list of populations of Central Asia which I intend to publish shortly: there, also, they are classed near the "Horse-headed," between the people of Khotan and Nepal, that is, in the Tibetan Himālayas. The Tibetan populations have exactly the traits of the *Kalystrioī* mentioned by Ktesias: mountaineers, hunters, eaters of meat, herdsmen, rich in sheep, above all dirty, with a dirtiness which is rendered still more striking by contrast with the regular and frequent ablutions of the Hindus. Their physiognomy, and their harsh language, bristling with monosyllables, also correspond with the description of the *Kalystrioī*.

Separated by an interval of a thousand years, the Greek and the Chinese evidence by their agreement show that the name Kharōshtra was used, from the 5th century B. C., to denote the

barbarian peoples, Turks or Tibetans, who lived on the North-North-West confines of India, scattered among the Hindu Kush and the Himalayas, and on the slopes of the Pamirs. Having thus established the antiquity of the term, the antiquity of the name applied to the writing would seem to follow: the Kharōshtrī must have received this name at a time when the name of Kharōshtra was in ordinary use. Ktesias' passage proves that this name was known in the Iranian world, in the Persia of the Achemenides, four hundred years before the Christian era.

I think it will be useful to reproduce the notice of Ktesias here. The precise and natural details, while contrasting advantageously with his usual love for the marvellous and fabulous, are a warrant of the truthfulness of his evidence as to the *Kalystrioī*, which is not to be despised:—

[252] (20) "On these mountains, he writes, live men having the heads of dogs, wearing the skins of wild beasts, and using no articulate language; they communicate with each other by barking like dogs. Their teeth are larger than the teeth of dogs, and their claws resemble those of dogs, but are larger and rounder. They live in the mountains, and are found as far as the Indus. They are swarthy, and, like all other Indians, very erect. They can communicate with the Indians, for, though they cannot answer in words, they understand what they say; and by barking, and making signs with their heads and fingers, like deaf-mutes, they make themselves understood. The Indians call them *Kalystrioī*, which means in Greek *Kynocephaloī* (that is, "Dog-headed"). They live on raw meat. The whole tribe includes no less than 120,000 men."

(22) "The *Kynocephaloī*, dwelling in the mountains, practise no art, and live on the products of the chase. They kill their prey, and roast the flesh in the sun. But they rear sheep, goats, and asses, in great numbers. They drink the milk of sheep, and the whey which is made from it. They eat also the sweet fruit of the *siptakhora*, the tree which produces amber. They dry this fruit, and pack it in baskets, as the Greeks do the grape. They construct boats, load them with baskets, as well as with the blossoms of the purple flower, after having cleaned it, and with a weight of 260 talents of amber and an equal weight of the pigment which dyes purple, and 1,000 talents more of amber. They send all this cargo, which is the product of the season, annually, as tribute to the King of the Indians. They also take quantities of these same products to sell to the Indians, from whom they receive in exchange, bread, flour, and material made from a substance which grows on a tree (cotton). They sell swords similar to those which they use for hunting wild beasts, also bows and javelins, in the use of which they are expert. They cannot be conquered, owing to their mountains being rugged and without roads; the king also sends them, once in six years, as presents, 300,000 arrows, as well as javelins, 120,000 shields and 50,000 swords."

(23) "These *Kynocephaloī* have no houses, but live in caves. They hunt wild animals with the bow and boar-spear, and run so quickly that they can catch them. Their women bathe only once a month, at their periods. The men do not bathe at all, but simply wash their hands. Three times a month, however, they anoint themselves with an oil which they extract from milk, and dry themselves with skins. Dressed skins are the costume of the men and women. Rich men, however, who are few, wear cotton clothing. They have no beds, and sleep on litters of straw and leaves. Sheep constitute the only wealth, and the richest man is he [253] who possesses the greatest number of them. The men and women have a tail behind like dogs, but it is larger and more hairy. They copulate like quadrupeds, after the manner of dogs, and any other mode is considered shameful. They are erect, and live longer than any other men, attaining the age of 170 and sometimes of 200 years." — Cf. also fragm. XXI. (Tzetzes, *Chil.* vii., v., 716); XXII. (Pliny, *Hist. Nat.* vii. 2); XXIII. (Ælian, iv. 46).²

² [See, also, *Ind. Ant.* Vol. X., 1881, p. 310 ff.]

SOME ANGLO-INDIAN TERMS FROM A XVIITH CENTURY MS.

BY SIR RICHARD C. TEMPLE, BART.

(Continued from Vol. XXXII. p. 470.)

GUDGE.

Fol. 94. They measure timber, planks brick or Stone walls, Callicoes, Silks &c p^r the Guz: each Guz doth containe 27 inches.

See Yule, *s. v.* Gudge, with hardly any quotations.

GUNDA.

Fol. 94. One Gunda is 4 Cowries . . . 5 Gundas is one burrie or 20: Cowries.

Not in Yule. [*Vide ante*, Vol. XXVII. p. 171 ff., for the system of counting by *gaṇḍās* or quartettes. See also Vol. XXVII. p. 266.]

GUNJA.

Fol. 39. but they find means to besott themselves Enough wth Bangha and Gangah.

Fol. 40. Gangah is brought from y^e Island Sumatra and is oftentimes Sold here [Metchlipatam] at Very high rates. It is a thinge y^e resembleth hemp Seed and groweth after y^e same manner . . . Gangah beinge of a more pleasant Operation . . . They Study many ways to Use it, but not One of them y^e faileth to intoxicate them to admiration.

See Yule, *s. v.* Gunja, who, however, gives no history of the word.

HALALCORE.

Fol. 8. See that this very party is a most Scandalous person and accompted but a Hololcore untill he hath regained his cast.

See Yule, *s. v.* Halalcore: a very low-caste man, a "sweeper," scavenger.

HARAPORE.

Fol. 59. from Point Conjaguaree to Palmeris y^e River is called Haraspoore.

Not in Yule: a very early Factory and the first landing-place of the English in the Bay of Bengal: but see Yule, *s. v.* Factory, where he gives it doubtfully as Arzapore, on the Eastern or Coromandel Coast. [There is, however, no doubt about it: Haraspur or Harsapur was perhaps the earliest Factory in the "Bay": earlier even than Balasor and Pipli. See Wilson, *Early Annals of Bengal*, Vol. I. p. 1 ff. The quotation above is very valuable.]

HAUT.

Fol. 94. They measure . . . Callicoes, Silks &c . . . by y^e Covet w^{ch} con^t 18 inches and is called hawt.

See Yule, *s. v.* Haut, who gives, however, no quotations.

HINDOSTAN.

Fol. 25. Naiques (for see y^e Hindoo Governours are Entitled).

Fol. 59. Severall Radjas who before (y^e Mahometan Conquest of y^e Hindoos) possessed this Kingdome.

Fol. 71. always kept in his Court Sharpe witted fellows, y^e made it theire businesse to pry into y^e Estates of y^e Hindoo Merchants.

See Yule, *s. v.* Hindoo.

HINDOSTAN.

Fol. 61. Bengala: It is one of y^e largest and most Potent Kingdoms of Hindostan . . . Chah Jehan (then Emperour of Hindostan . . . The great Emperour of Hindostan . . . In the Throne of y^e Vast Empire (of Hindostan).

Fol. 62. wth Soon after caused bloody Civil wars in Hindostan.

Fol. 63. Moh-barock-bad, Hazarot, Salamet, El-hamd-ul-illah, viz: God Save your Majestie, you have Obtained the Victorie, why Stay y^e longer Upon your Elephant, in y^e name of God come downe, he hath made y^e the great Kings of Hindostan [! !].

Fol. 77. The Elephants of Ceylone are best Esteemed here and all Hindostan over.

Fol. 84. Most Mahometans &c: of accompt in Hindostan Vse them [Gonges] at theire doors in y^e Street where they have generally a Porch built . . . The English and Dutch have them at y^e Gates of all there inland ffactories: in this Kingdome and Others in Hindostan: Verifieinge y^e Old Proverbe: Cum fueris Romæ, &c:

Fol. 97. Pattana: A Very large and potent Kingdome, but longe Since become tributarie to y^e Emperours of Hindostan (or great Mogol).

See Yule, s. v. Hindostan. [Yule's earliest quotation in the restricted sense of the text is 1803.]

HINDOSTANEE.

Fol. 35. y^e Hindostan ore Moores Languadge.

Fol. 41. fancyinge himsele to be at y^e Gates of the Pallace at Agra, Singeing to that purpose in y^e Hindostan Languadge.

See Yule, s. v. Hindostanee.

HOBSON-JOBSON.

Fol. 54. Of a great Giant called Jansa Bainsa . . . They place him in a great Chaire made for y^e Same purpose runninge Vpon 4 Wheels for y^e Easier drawinge of him through y^e towne, he is called Jansa Bainsah: made of pasteboard leather &c: Stuffed wth Straw and Other Combustible ingredients; covered wth blew cloth, his head and face painted with Redd and White, Severall Resbutes and Others danceinge Round him with great drawne Swords, after y^e manner of fenceinge, callinge Vpon him by his Name, wth many torches flaggs, Pipes and drums, and in this Posture he is drawne through the Principall Streets of y^e towne [Golcondah], They burne him to dust in the Open Street about y^e 12th hours in y^e night.

See Yule, s. v. Hobson-Jobson. [There is, however, a doubt as to the ceremony in the text relating really to the much corrupted ceremony of the Muharram, though it might well be so.]

HOOGLY.

Fol. 73. he wold Every yeare Send downe to y^e Merchants in Hugly.

Fol. 74. One of y^e most admirable of wth arms [of the Ganges] is y^e Hugly riuer . . . This Riuer is soe named from y^e great towne of Hugly Scituated Vpon y^e banks of it neare 150 miles up from y^e Braces or Shoals that lye at y^e Entrance thereof . . . The English ffactory here in Hugly is y^e head or Chiefe ffactory in the 3 beforementioned Kingdoms and the residence of y^e Chiefe in Place.

Fol. 75. in y^e very place where y^e Dutch ffactory stood wee ride with our Ships and Vessels in noe lesse then depth 16 fathoms and it is called Hugly hole.

See Yule, s. v. Hoogly. [The quotations are valuable, and the Hugly Hole, though it exists, is not mentioned in Yule.]

HOOKA.

Fol. 45. Often Smoakeinge their Hooears as they call [them] of tobacco.

Fol. 46. Hooear or hubble-bubble.

See Yule, s. v. Hooka, where earliest quotation is, however, 1768.

HOOLAK.

Fol. 77. My Purser M^r Clem^t Jordan was just then come downe with a Small Olocko.

Fol. 99. This is called an Olocko: they row Some wth 4: Some wth 6 Owers and ply for a faire as wherries doe in y^e Thames.

See Yule, *s. v.* Woolock.

HUBBLE-BUBBLE.

Fol. 46. Hoocars: commonly called hubble-bubble.

See Yule, *s. v.* Hubble-bubble. See *ante*, Vol. XXIX. p. 60.

JACKAL.

Fol. 96. Infinite Number of Wild hogge in this countrey as alsoe a creature called a Jackall, resemblinge both dogge and fox, and are as large as good ordinary hounds in England.

See Yule, *s. v.* Jackal.

JAGGERY.

Fol. 40. another Sort from y^e Jagaree or Very Course Sugar.

See Yule, *s. v.* Jaggery.

JAFNA.

Fol. 77. They are bought [in Ceylone] from y^e Dutch . . . in Gala or Colomba or Japh-napatam.

See Yule, *s. v.* Jafna, in the north of Ceylon. [Yule's quotations stop at 1566. *N. and E.* p. 47, has Japnapatam, for 1680.]

JAMBEE.

Fol. 159. There are Severall Radjas Vpon Sumatra . . . Especially those of Jambee.

Not in Yule. [Jambi is a Malay State on the North-East of Sumatra.]

JAN PERDO.

Fol. 76. now beinge got into y^e reach called Jn^r Perdo.

Not in Yule. The Island "Jan Perdo" in the Hughly River has now disappeared. See Yule, *Diary of Wilkiam Hedges*, Vol. III. p. 212 f.

JAVA.

Fol. 97. Y^e Elephant is not found wild there nor dare y^e tame ones frequent the Woods [for fear of the Rhinocerots] As for instance Pattana: Bengala: & Iava Major.

Fol. 157. Many Ships and Vessels doe . . . arrive in this Port [Achin] from . . . Iava Major.

Fol. 159. This Citty (Achin) is y^e fairest and most populous of any that Ever I saw or heard of that is inhabited by Malayars or Iavas.

See Yule, *s. v.* Java. [The use of the word for the people as well as the country is remarkable.]

JESSORE.

Fol. 78. he wold Every yeare Send down to y^e Merchants in . . . Jessore.

Not in Yule. [A town in Lower Bengal, still well known under the same name and spelling.]

JOHORE.

Fol. 142. but doe rather wish they were Served see in . . . Johore.

Fol. 143. as in Achin Johor &c: Malay Countries.

Fol. 145. Hee hath always been a great peacemaker amonge y^e Neighbouringe [to Queda] Kings Viz^t Pattany & Johore.

Not in Yule. [A well-known Malay State in the neighbourhood of Singapore.]

JUGGURNAUT.

Fol. 4. these they often bow to in representation of their God Jn^f Gernaet, beinge as he is Vpon Some festivals carried about in a large triumphant Chariot.

Fol. 7. Of all y^e false gods these idolatrous people worship (save John Gernaet) a Cow is held in greatest reverence.

Fol. 8. must take his travaile to y^e great Pagod Jn^f Gernaet: y^e remotest part of y^e Golcondah Kingdome North Eastwards from ffort S^t Georges; neare 1000: English miles.

Fol. 9. In this theire Cathedral Pagod.

Fol. 11. In that great and Sumptuous Diabolicall Pagod, there Standeth theire greatest God Jn^f Gernaet, whence y^e Pagod receiued its name alsoe.

Fol. 12. to behold their graven God Jn^f Gernaet In y^e Middle of that great Diabolicall Chariot is placed theire great Patron Jn^f Gernaet.

Fol. 13. he beinge very rich had Vowed to bestow liberally on y^e Pagod Jn^f Gernaet.

See Yule, *s. v.* Juggurnaut. [This is the most interesting variant I have come across of this much-corrupted name. The word is Jagan-nâth, by metathesis such as is common in India, Janga-nâth; hence, of course, John Gernaet. See *ante*, Vol. XXX, p. 352.]

JUNK.

Fol. 78. y^e Danes: who might have ruined all theire fforaigne Commerce with their owne Ships or Junks.

See Yule, *s. v.* Junk. See *ante*, Vol. XXX, p. 160.

JUNK-CEYLON.

Fol. 131. Oedjange-Salange commonly called Janselone Is an Island that lyeth to the Southward of all the Jsles of Tanassaree; nearest midway betweene y^e and Queda: y^e North End of it lyeth in Lat^t North 08^o 50^o: y^e South End in 07^o 35^o: Lat^t North. It is almost in y^e forme of y^e Island Ceylone but not more then a Sixth part soe large.

Fol. 131. The Saleeters are absolute Piratts, and often cruiseinge about Ianselone & Pullo Sambelon &c Jsles neare this Shore.

Fol. 133. When I was in Ianselone, Employed by M^r William Jearsey an Eminent English Merchant att ffort s^t Georges.

Fol. 139. Soe longe as they were Vnder y^e Radjs of Janselone's protection killed two of y^e Ianseloners.

Fol. 148. The tallest and best Sett Elephant y^e ever I beheld was in Ianselone.

See Yule, *s. v.* Junk-Ceylon, the European name for an Island off the West Coast of the Malay Peninsula. [The quotations are valuable as showing the origin of the name, which is a corruption of Ujang Salang, or Salang Head, the most prominent point on Salang, the real name of the Island.]

KIRMAN.

Fol. 97. Pattana is a Countray of Very great Trafficke & Commerce . . . into most parts of India: Viz^t from y^e Northerne Kingdoms or Empires (by land) namely Persia: Carmania: Georgia: Tartaria: &c:

Not in Yule. [The portion of Persia nearest to India.]

KISTNA, RIVER.

Fol. 51. famous for y^e River **Kishna**.

Not in Yule.

KITTY SOL.

Fol. 42. **Sambareros** or **Catysols**, are here very Usefull and necessarie for y^e Same purpose, w^{ch} are carried 3 or 4 foot or more above a mans head and Shade a great matter, beinge rather more Convenient then y^e Other [roundel] but not soe fashionable or Honourable.

See Yule, *s. v.* Kitty sol. [An umbrella, especially the Chinese variety of paper with a bamboo handle. See *ante*, Vol. XXX. p. 847.]

KORAN.

Fol. 45. The **Alcoron** w^{ch} cont^{ys} y^e Scope of theire jrreligious Religion [Ramazan] is Observed annually in Celebration of y^e **Alcoron**.

Yule has no entry for Koran.

LAO.

Fol. 56. with infinite quantities of butter and **Lacca**.

Fol. 61. affordinge great plenty of . . . **Lacca**.

See Yule, *s. v.* Lac. [Orawford, *Dict. of the Indian Archipel.*, *s. v.*, says the term is used for a red-wood used in dyeing: and it may be important to note this for the history of the word in old writers.]

LACK.

Fol. 67. his revenue came to a lack **Viz** 100000 rupees p^r diem w^{ch} is 12 thousand 500 pounds Sterlinge he Sent the Emperour 80 lacks of rupees.

Fol. 70. The Nabob (Smileinge Vpon him) demandeth wth all Speed one lack of rupees i e: 100000.

Fol. 71. now thought he had another Opportunitie fallen into his hand of acquireinge one lack or two of rup^t demanded noe lesse then 2 lack of Rupees as a present.

See Yule, *s. v.* Lack. [It is to be noted that about 1675 one lack = £12,500: nowadays it = £6650.]

LADAS, ISLANDE.

Fol. 149. Vpon an Island about 80 or 40 English miles in circuit called **Pullo Ladda**: viz^t Pepper Jeland **Pullo** in y^e Malay tongue Signifieth Jaland and **Ladda** pepper, it is 8 leags to y^e NW: of Queda River's mouth.

Not in Yule.

LANDOCK.

Fol. 158. y^e Diamonds of **Landock** (upon Borneo) are accompted y^e best in y^e World.

Not in Yule. [Landak is on the western side of Borneo.]

LAXIMANA.

Fol. 143. next to whom [the Sultan] are y^e **Laximana**.

Fol. 161. y^e **Laximana** the Lord Generall.

See Yule, *s. v.* Laximana: no quotation after 1553. [The word is usually translated by "admiral" in the old books.]

(To be continued.)

THE TULĀ-KĀVERI-MAHATMYA.

BY G. R. SUBRAMIAH PANTULU.

(Continued from Vol. XXXI. p. 446.)

CHAPTER III.

O King ! I shall narrate to you in detail the glory of the Tulā Kāvērī, which be pleased to hear with wrapt attention. Those who bathe in its waters will be purged of all sin and would attain riches of all sorts. Those who commit matricide, patricide, cow-killing, abortion, adultery with a *guru's* wife and other similar horrible deeds, those who do not study the *Vedas*, those who do not pursue a time-honored correct custom, liquor-drinkers, eaters of food not consecrated to the deity or used by guests, non-performers of *agnihōtra*, *aupāsana*, *vaisvadeva* and other similar sacrificial rites, and other doers of various sorts of sinful deeds, would be adored in the Brahmalōka by bathing but once in the sacred waters of the Kāvērī. Those who cannot bathe in its icy-cold waters, can do so at least by boiling it. And those who cannot do even that must at least hear the *Tulā-Kāvērī-Māhātmya*. He who cannot do even that must amply remunerate the reader. If poor, he must with a good heart extol the reader and make others reward him. As women, Sūdras, boys, and lower orders have no Vedic rites, they must rise very early in the morning and must do a *thūshnim* bath. He will be blessed with long life who, after bathing at dawn in the Kāvērī, offers libations to the *dēvas*, *rishis* and *pitris* with sesamum seeds and rice. Sūras, Naras, Urugas, Yakshas, Kimpurushas, Rudras, Ādityas, Maruts and others would be well pleased with him. Everyone must hear the *Kāvērī Māhātmya* as far as he is able, after prostrating to Sūrya, the sun-god, the witness of all the worlds. He would become Vāchaspati, at whose house a manuscript of the *Māhātmya* is kept and worshipped. If a *Māhātmya kōśa* is reserved for a man (Brāhman) of letters, he would be rid of all sin and would attain Vaikuntha.

O King ! I shall narrate the charities that can be offered in the month. Whoever with a good heart offers libations to men, *dēvas*, *rishis* and *pitris*, and feeds Brāhmanas with things of the season, will enjoy all temporal happiness and will be adored in Brahmalōka. Whoever in the month of Tulā keeps lights of *ghī* or oil before Hari and Hara will go to Sūryalōka and thence come back to the world as a *jānī*. Whoever offers a cloth to a poor Brāhman will be blessed with long life and prosperity, and finally attain Chandralōka. Whoever, while bathing in the Kāvērī in the month of Tulā, bestows on a poverty-stricken, wayfaring, intelligent Brāhman with a large family, a gift of a plot of ground or a house, will enjoy all sorts of terrestrial comforts and then the comforts of Brahmalōka, and then come back to earth as a king. Whoever gives money or grain to the poor will become the friend of Kubēra, and will be blessed with long life. He who gives honey in the month of Tulā will have plenty of children, though he be barren at present. Whoever gives a pair of oxen to a poor Brāhman agriculturist will enjoy all the pleasures of Gōlōka, and will regenerate on earth as king. Whoever gives a cow with a calf, will be blessed with children, will become great, will be rid of the three sorts of loans, will reach the world of *pitris*, and his family will live long. A giver of a buffalo has no reason to fear untimely death and his family will live for one hundred years. A giver of grain to a poor Brāhman, will live in peace and plenty and be blessed with offspring. He would then live with an excellent woman for the period of fourteen Indras, and then become a land-owner on the Earth. Kālī will not live in the house of a man who offers rice to a poor man. Rambhā's (an angelic woman) breasts will be sucked by the man who gives Rambhāphala (plantain-fruits) as charity ; and her lips by the bestower of cocoanuts and *pānupāri*. The giver of camphor, sandal, musk and other scents to a Brāhman, will enjoy the company of *apsarasas* in *Searga* and then regenerate on earth as lord paramount. The bestower of cow's milk, cow's *ghī*, cow's curd will have cattle and children in plenty, and will be blessed with long life. The offerer of myrabolan powder will become a metaphysician and an excellent theist. Whoever in the month of Tulā gives sesamum to a Brāhman as an oblation to the *pitris*, will attain the same position as one

who performs *śrāddha* at Gaya. He who gives to a poor cold-stricken family man a cot, a soft cushion, a mat, a pillow, &c., will enjoy the sweet soft embrace of a lovely woman. An umbrella-giver will live in a storied house. Whoever offers lotuses and other flowers of the season for the adoration of Viṣṇu with *bhakti* will enjoy all the pleasures of this life, live for a length of time in Brahmaloṅka, and thence return to earth as a wealthy Viṣṇu *bhakta* with plenty of children. The giver of a pair of *yagnôpavīts* (sacerdotal threads) will regenerate ten times as a Vedic seer. O king ! whoever offers deer's skin (*maunji*) to a bachelor will be rid of disease of any sort or kind, and will become a great intellect ; and one who gives cotton for the preparation of the sacerdotal thread will not be attacked with leprosy, &c. He who gives the best *tulasī* to a Viṣṇu *bhakta* will live in the best possible way in all the worlds, and eventually become a *śāroḇhauma*. The giver of sacrificial sticks (*pāḍās*, &c.) will become an intelligent performer of sacrifices. Whoever feeds sumptuously with various sorts of vegetables, *dāl*, fruits, sweet-scented viands, will undoubtedly attain god-head. The gift of Bengal gram, honey, oil, pepper and other pungents, jaggery, sugar, *ghṛ*, &c., as far as practicable, will lead one not only to heaven, but will make him a resident of the other happy worlds in succession. Even Hari is unable to say the value of bathing in the Kāvērī in the month of Tūlā in the presence of the god Runganātha. In days of yore an unchaste Brāhman woman rode sublime upon the seraph wings of ecstasy, and saw the living throne by bathing in the sacred waters of the Kāvērī. O greatest of kings ! the three millions and a half of *śrīthas*, with the Ganges in front, commingle with the Kāvērī in the month of Tūlā by Kēsava's orders. Whoever maintains the bath in the Ganges as a strict religious observance for one hundred years, it is only he who would be able to bathe in the Kāvērī in the month of Tūlā. The world-purifying Ganges went to Brahmā and wept bitterly and asked how best she would be rid of the sins which have been transferred from her bathers. To which Brahmā replied, that the best solution of the question is by bathing in the waters of the Kāvērī, which is accordingly done down to the present day.

Sins for seven generations will be removed by bathing in the Kāvērī like a pestle ; and by doing so with a settled mind one million families will prosper. A bath in the month of Tūlā will feed the body and annihilate the soul. Who in the three worlds is equal to the task of extolling the glories of the Kāvērī ? Is there anyone better than Śeṣha to speak about it or to hear it ? Whereupon Hariśchandra said, "O Agastya ! who was that Brāhman woman ? Whose wife ? How did she become a prostitute ? How did she, who should have gone to the regions of hell, enjoy the kingdom of Heaven ? I prostrate before you. O greatest of Rishis ! be pleased to narrate all these in detail. The chief of Rishis of your stamp, who bless the world, being swayed by purely altruistic motives, will teach the greatest secrets to disciples like me. I request, therefore, that you will have mercy on me." Whereupon Agastya said, "O King, you have asked me excellently, being intent on hearing a good story. I shall tell you the glory of Kāvērī and the Brāhman prostitute reaching heaven. On the borders of the Vṛishabha mountains and on the banks of Kṛitamālā river was the large beautiful city of Mathurā, filled in with charioteers, elephant drivers, cavalry and infantry, hemmed in on all sides with lofty parapets, with storied houses of Brāhman, Kshatriyas, Vaisyas and Sūdras, with ramparts, towers, porticos, shops, busy centres, bowers, &c. In the city was a Brāhman, Vēdarāsī by name, deeply learned in the *Vedas* and *Vedāṅgrās*, a subduer of Indrias (senses), external and internal, the friend of everybody, far above the agitation of pairs of opposites — cold and heat, weal and woe, profit and loss, victory and defeat — unenvious, a Viṣṇu *bhakta*, a *yōgi*, an incessant adorer of guests, a bather at the early moon, an observer of the five sacrifices and the foremost of the wise. He had a pure chaste wife, Chandrakāntā by name, with the face resembling the moon, breasts like the frontal lobes of fattened elephants, the body of a golden hue, the tone of the fattened swan, the pace of the fattened elephant, slight laugh, red lips, musk-mark, pearl necklace, diamond ornaments, the body smeared all over with sweet-scented sandal paste. This lady, intent on attaining eternal bliss, was doing the greatest amount of good service to her dearly-cherished lord. Close by was Vidyāvati, a Brāhman woman, who slew her husband. She was the most abject, fickle-minded, the spoiler of feminine chastity. This prostitute, intent on schooling the lady in her ways of life, approached her, and said,

'My dear Chandrakāntā, my mother, O lotus-eyed, I am your best friend. If you have any secrets, you can freely communicate them to me. Does your husband obey your orders? The may of feminine life is ephemeral. So are time and place. Do you enjoy sexual happiness independently? If not, I shall put you in the way of your doing so.' The lady, hearing the poisoned horrible words of the woman, was overcome by shame and said, 'How dare you talk such trash before me with an evil heart? If I do not reply to you, you will ruin me by spreading all sorts of fabricated rumours against me.' Thinking thus, and fearing the consequences of silence, she replied, 'The best period for copulation is from the fifth day after menstruation till the sixteenth, and my husband, well versed in *śrutis* and *smṛitis*, will cohabit with me during these twelve days, exclusive of the days unenjoined by law. We are enjoying temporal felicity as ordained by the *śāstras*, and are paving the way for celestial bliss. The wise say that if conception is formed on a good day of copulation, the son that will issue forth from such an act, will be intelligent, live long, and be rich; while those born at other times will be short-lived and sickly, and will be a source of woe to the parents. The following days are excluded for copulation: the sixth, eighth, eleventh, twelfth, fourteenth, new moon, full moon, the passage of the sun into the various signs of the zodiac, the annual ceremony (*śrāddha*) days for parents, the star of birth, star by the name of *Śravaṇa*, *vṛata* period, morning, twilight, &c. During the abovementioned period, the person that shaves, copulates, anoints or cleans his teeth, though he be well versed in all the four *Vedas*, will assuredly become an outcaste. Thus have I briefly told you the ordinances enjoined for a *gṛihastā* (a family man)." To which Vidyāvati, intent on bringing Chandrakāntā to her own level, replied, "O madcap, you have spoiled all your happiness. Hear my word, therefore. As this sickly coil is dear to all animate existences, why do you waste your flush of womanhood? Why not enjoy sexual happiness? In old age the constitution will be shattered by disordered breasts, and abstinence will bring on its attendant evils — premature old age and disease. You are practically unaware of the humbug of your husband. He is keeping himself engaged with the maid-servant from morn to night. You are too plain, unhyprocritical and pure-hearted, whereas your husband is a firebrand and pretends to be a good man externally. I heard too well of his misdeeds from an intimate prostitute-friend of mine. I have told you all this as I am a sharer in all your joys and sorrows." After hearing the sinful words of Vidyāvati, Chandrakāntā said, "A husband is a god to women, be he a mischievous, hot-tempered, sickly, irreful, vile, pudding-headed fellow. Apart from the adoration of the husband, there are no observances or free-will offerings of any sort or kind enjoined by the *Vedas*. To those women who aspire after *Svarga*, a husband is the greatest of gods. The woman who abuses her lord will be born a dog." The vile wretch of a Vidyāvati, determined on outraging the chastity of Chandrakāntā, replied, "O mad fool! Have not *Urvāśī*, *Mēnakā*, *Bambhā*, *Gṛitāchī*, *Panjikasthālā* and other angelic women acted independently and cohabited with innumerable hosts of men, and yet have been coveted by the greatest of *Rishis*, and but for all that remained happy? The wise, considering the ephemerality of this mortal coil, enjoy happiness, terrestrial and celestial. All must covet felicity. Who has seen heaven or hell? Whatever we actually enjoy is heaven. I am aware of the truth of happiness and misery. Independence is happiness. I became independent and rid myself of all fear by murdering my husband. The free man is the happiest being. He alone is filled with *tapas*. He alone is fortunate. Is there any happiness for a servile wretch?" With illustrations like these which would abuse the mind and make it as fickle as possible, with thoughts hard as adamant which would lead one to hell-gate in no time, with breasts resembling the frontal lobes of fattened elephants, Chandrakāntā set at naught all hereditary *āchāras* and remained a prostitute in private for a month, owing to the strange irony of fate, feminine fickleness, mental unrest and a hankering after perceptible happiness, being overcome by the finely-pointed darts of Cupid. Then her lord found out by her questionable reputation, conduct in life, foul tongue, &c., that she was immoral, ejected her out of the house, was wonder-struck at what happened even to his wife, made gifts of cattle, money, grain, houses, &c., to the deserving, was sore dismayed for illicit intercourse with a prostitute-wife, and, as an expiation for the sin committed, went and reached the banks of the *Kāvērī*.

(To be continued.)

A COMPLETE VERBAL CROSS-INDEX TO YULE'S HOBSON-JOBSON
OR GLOSSARY OF ANGLO-INDIAN WORDS.

BY CHARLES PARTBRIDGE, M.A.

MISCELLANEA.

FAMILY GODLINGS AS INDICATORS OF
TRIBAL MIGRATIONS.

It is an accepted principle that local godlings were from time to time introduced to the family altar as divine fathers, mothers, protectors, or deified faithful servants. The following remarks show that family godlings may also indicate the migrations of the tribe to which the family belongs.

In one family of the Prabhus of Thāna, near Bombay, there is a godling Mārtand *alias* Khandêrāv. He is shown riding a horse, and attended by a dog, his faithful companion, and represents the sun. Sir Thomas Wardle traces its seat in Kashmir.¹ Another godling is Bhairav or Bahiri, also on horse-back (the Kāl-bhairav of Ujjain); a third is Ekvira of the Western Ghāts near Poona; a fourth, the Bāpdēv (from *bāp* = father, and *dēv* = god) of Cuddapa, on the slopes of the same mountain range at the southern end of what is known as the Madras Deccan, or that part of the Deccan plateau which is under the jurisdiction of the Madras Government; a fifth is a "group" of goddesses called the Parshik-karnis, or residents of the Parshik Hill near Thāna, 21 miles from Bombay. There was besides one attendant sub-godling with a human body and equine head, which stood in front of the altar with folded hands, but is said to have been thrown into the sea by one of the ancestors of the family five generations ago, whose *pāduka* (foot-prints) are still placed before the altar on the *Kuladharmā* day, once a year. The family is called Guptē, and belongs to the Chāndrasēni subdivision of the Prabhus.

As the name Guptē is derived from *gup* = a cave, vale, or valley, or *gup* to protect, and *pati*, ruler or lord, the above facts seem to show that the Guptēs came from some mountainous valley or were its protectors. They are Chāndrasēni Prabhus, and this seems to show that they came from the valley of the river Chandra,² now known as the Chenāb in the Punjab, the suffix *sēni* being possibly derived from Sanskrit *śreni*, a clan, tribe.

The Guptēs have, further, a tradition³ that they were defeated and disarmed by the ubiquitous

conqueror Paraśurāma, but Puruṣi is also a name of the river⁴ Rāvi, and as the Chenāb and the Rāvi are both the affluents of the Indus, and form a *dādā* or enclosed tract, it is more probable that the tradition preserves a recollection of the fact that the Rāva, or people of the Rāvi Valley, and the Chāndras, or people of the Chandra or Chenāb Valley, lived in constant warfare, and that the latter were ultimately defeated and driven out. This conjecture is supported by the fact of the establishment of a Rāmnagar on the banks of the latter, just as "Alexandria" towns were established along the route of the great Greek conqueror. From the valley of the Chenāb to that of the Ghariā or Hyphasis, into which it flows, would be a natural line of flight. Thence southwards to the Abu mountains and the Chambal Valley was possibly a further progress, as these people have a tradition that their forefathers performed an *āsvamedha*,⁵ or horse sacrifice, in that tract. Wandering along the Chambal Valley they may have established themselves at Ujjain on the Shhiprā, where Vikramāditya, the last of the Guptas, established the Samvat Era. Here they would naturally have acquired, as a godling, Kāl-bhairav,⁶ to whom they still make vows when taken ill, having shortened his name into Bhairav. In the Bhānpura District of the Indore State, there is a god Guptēśwar, and at Māndugadh, or fort of Māndu, in the Dhār State, there are traces of their ascendancy (*vide* Enthoven's *Monograph*). Further south at Mandālēśwar, on the banks of the Narbadā, there is another god Guptēśwar. Further wanderings southwards would seem to be marked by the godlings Ekvira and Mārtand of the Deccan, and the southernmost point of the migration by Bāpdēv, or father-god of Cuddapa. Then there seems to have been a return northwards towards Thāna or Thānēśwar, a name the wanderers carried in their heads from the great Thānēśwar temple of the north. The flourishing condition of Sōpāra,⁷ the Ophir of ancient trade as Sir James Campbell believes from the valuable relics he found there, followed by the more modern trade due to the connection of that coast with the Portuguese and the British, seems to have finally settled the Guptē clan in and near Bombay with one

¹ *The Luck Post*, Saturday, June 13, 1908. (Second letter from Sir Thomas Wardle.)

² Elliot's *History*, but there are many Chāndrasēni Rājputās.

³ *Vide Rēnukā Mahātmya, Skandh-Purāṇa.*

⁴ Hewitt's *Ruling Races of Prehistoric Times*, p. 113.

⁵ Enthoven's *Monograph on the Prabhus.*

⁶ It may be noted that Enthoven mentions Vināśī, another mountain-mother of the Vindhyaśāhal, by which route a portion of the Prabhu tribe may have come to the Deccan via Benares, another eminent seat of Kāl-bhairav, the God of Death.

⁷ Sir J. Campbell's *Sopara Relics.*

offshoot at Māval near Poona, and another at Damān, also on the Western coast. The Parshik-karni goddesses were introduced within the memory of the oldest living representative of the clan. Thus, the father of the present head of the family was the son of a woman from a village at the foot of the Parshik Hill, and she induced him only 60 years ago to admit these goddesses, the family deities of her mother, a Pradhān, into that of her son, a Guptē, a resident of Thāna, only three miles from the hill.

These facts and speculations show that local godlings may supply valuable links of evidence when taken with the traditional history of a clan, and the results of British archaeological researches in the East.

The horseman godling Mārtand, worshipped with his horse and dog, recalls in this case the Turkish horsemen or cavalry mentioned at page 307 of Hewitt's *Ruling Races of Prehistoric Times*, and the ancient system carried on to quite modern times of burying⁹ alive the servants and favourite animals of the chiefs, involving the deification of the animals so sacrificed, accompanied by their transformation into mythological beings, "half man, half beast," such as Garuḍa (the eagle), Hanumān (the monkey), and even Muhammad's mare.

The worship of the mother-mountain by the Northern Races is described at p. xxxii in Mr. Hewitt's preface, and thus the name Parshik as a sacred hill of the Prabhus, whence godlings come, may throw light on the history of the race. Parshik may possibly mean Persian, if Parsika be taken to mean "belonging to or occupied by the Persians." The Prabhus are fairer than the generality of the local residents. MacCrindle's *Ancient India*, p. 46, mentions the marriage of a Gupta chief with the Macedonian bride that Alexander gave him, and further possibility of the absorption of foreign blood on the coast is mentioned in Vol. II., p. 27, of Ratzel's *History of Mankind*, and "girl traffic" at p. 438 of Vol. I. The Macedonian colonies of Koh-Daman,¹⁰ and the existence of a Daman on the Western coast, with Davanē or Damnē Prabhus as its residents at the present day; the mention of the Prabhus among the pre-historic Ruling Races by Mr. Hewitt (p. 310); Dr. Hove's description of a "Parvoo"¹¹ (misspelt for Prabhu) caste at Rājāpur, near Limri

in Gujarāt; Ratzel's¹² mention of bride-slaves as a favourite commodity, his description of their treatment as poor¹³ relations; Hove's colony of "remarkably fair" slaves from¹⁴ Mghilta (Mahikā) at "Jahauna," only 5 days' voyage from Bombay; Mr. Edwardes' mention of "handsome young women of Hellas"¹⁵ destined to attend on the kings of the country and carry *chauris* in his court"; Ratzel's mention of "women"¹⁶ as merchandise and of "the tendency to accumulate it," as also his description of the desire for owning slaves as "insatiable";¹⁷ his mention of "women willing prizes of whoever can catch them"; Mr. Edwardes' description¹⁷ of the early Jews who "brought (to Bombay) a living freight of women," and the existence of the Pārsis in that locality, — taken with the name of the hill Parsik, may all indicate the infusion of Western blood into the more powerful of the Bombay coast tribes, including the Prabhus (*i.e.*, Lords, Masters), in the days when inter-marriages were freely allowed between different races, and the hard and fast rules of caste had not yet been conceived.

Again, coming from the Indo-Aryan tract in the North, under the name Chāndrasēni, and perhaps marrying fair Western maids purchased at high prices, the Prabhus may have also acquired a tinge of the local Dravidian blood from Southern tracts like Cuddapa, and this would account for their forming a caste midway between the accepted types of the Indo-Aryan and Scytho-Dravidian races, and their present average cephalic index 79.9 (medium), average nasal index 75.8 (medium), and average orbito-nasal index 113.4, and also their "hereditary dexterity"¹⁸ and intelligence. These qualities proved to be of value to Sivājī, the founder of the Marāṭhā Empire, as he found among the Prabhus a material at once literary, martial, and loyal, and made the best use of it. So also has the British Government found in them a people, whom Sir James Campbell describes thus in his Thana and Poona volumes of the *Bombay Gazetteer*:—"As a class the men are middle-sized, and slightly built, fair with regular features and handsome, intelligent faces. Their women are refined and graceful. Sivājī on one occasion dismissed all the Brāhmins, who held financial posts, and engaged (Chāndrasēni) Prabhus in their places. In reply to the complaints of Mōropant

Pinglé and Nilopant, his two Bráhmán advisers, he reminded them, that while all Musalmán places of trust held by Bráhmans had been given up without a struggle, those held by Prábhús had been most difficult to take, and that one of them, Rájpúr, had not yet been taken. They are generally richly and most carefully and neatly dressed. They are hardworking, hospitable,

orderly and loyal, but extravagant and fond of show. They send their children to school and hold their own in spite of the competition of Bráhmans and other non-writer classes."

Valuable, therefore, to ethnographers may be a study of the family godlings, who have clung to the family altars of the Hindus through generations and through many stages of evolution.

NOTES AND QUERIES.

NICK-NAMES OF VILLAGES AND FAMILIES IN KURRAM, GIVING DOUBTFUL TRACES OF TOTEMISM.

Among the Tári and Bangash Tribes there are several septs which derive their names from some act or incident, of which somewhat puerile accounts are often given. Such are the Magak Khél or Rat Sept in Dôparzái, so called because their first ancestor was once sitting in a *jirga*, and seeing a rat (*magak*) running about he killed it. The Gídar Khél, whose ancestor killed a jackal (*gidar*). The Lówá Kól or 'Wolf Family' of the Musthu Khél, whose ancestor once killed a wolf with his stick. The Kunriak Kól or 'Ant Family' in Paiwar, so named because their beds contained many of those insects when a guest was once stopping at their house. The Parkharí family in Zeran, so called because their ancestor once shot at a bird, and, though he missed it, boasted that he had knocked some of its feathers out. The Spagan Kól or 'Lice family,' so nick-named because their beds were full of those insects. The Sôian Kól, so called because their ancestor once declared that he had seen 100 hares when out shooting, but meeting with no credence he reduced the number to 50 and finally to one, and so his descendants are called the 'Hare Sept' to this day. The Span Khél of Maláná, so named because a man of a poor family once killed a dog belonging to a rich one, whereupon the rich family demanded a damsel from the poor one in compensation, and her descendants are still called the 'Dog Sept.' The Dagh Kalai hamlet of Shingak Village, so named because its founder only gave the workmen rice with very little *ghí* in it when he built the hamlet. The Urkháirí Kalai, so called because its founder only gave his workmen *urkhórt* (a kind of vegetable) when he built it.

A village in Shingak is called Tarwo Kalai because its inhabitants used to mix *tarwí* with the food given to their guests: *tarwí* is water mixed with curds (called *dohí* in Urdu), and the

food made from this mixture is called *ldst* or *tarwí* in Pashtu. A family in Paiwár had many sparrows' nests in their house and so their descendants are now called Chanchanrí Kól: *chanchanrd* in Pashtu means a sparrow. A village in Shingak is called Khowaro Kalai because the villagers did not feast their guests there one night: *khowar* means poor. A village near Kunj Abzai is called Shibi Kalai: *shiba* means a shower: during the Afghán rule the Mughals used to attack the Tári villages, and this village, being the first in their way, was so constantly besieged that it became known as Shibi from the attacks 'showered' on it.

A woman of a family in Shalozán¹ once made a shirt for her child from cloth which was then used by Hindus only: a Hindu in Kurram is always called *cháchá*, and so the family is now called Cháchá Kól. Another family in Shalozán, from their constant quarrels, is called Shaukh Kól: *shaukh* means bad-tempered. A third family in Shalozán is called Pát Kól: *pát* means one who does not do things thoroughly: the founder of the family was a big *malik*, but any dispute referred to him by the people was never properly settled and so he was called Pát and his family Pát Kól.

A village is called Ghalo Kalai: *ghal*² means 'thief,' because its inhabitants were all thieves during the period of the Afghán rule.

A family in Kaj Kina is called Kharporán Kól: *kharporán* means 'donkey-like': the founder of the family once got a nail stuck in the sole of his foot, but instead of taking it out he walked home and there showed it to his wife; she found that he had a big nail stuck in his foot and so called him donkey: since then the family is called Kharporán Kól.

These derivations are specimens of Pathán humour rather than attempts to account for relics of totemism.

H. A. ROSE.

Simla, 6th August 1903.

¹ When a little *ghí* is boiled and put into rice, broth, &c., it is called *dagh*.

² Shalozán is a very ancient place, and was once called Sankurán apparently.

EPIGRAPHICAL NOTES.

BY H. LÜDERS, Ph.D.; ROSTOCK.

(Continued from page 41.)

No. 11. — Mathurā Buddhist inscription on base of pillar of Sam. 47;
 edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX, Part I. p. 127, No. 1, and Plate;
 by Dowson, *Journ. Roy. As. Soc. New Ser.* Vol. V. p. 182, No. 1, and Plate;
 by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 33, No. 12, and Plate.

CUNNINGHAM'S transcript of this inscription, which is engraved round the base of a pillar, is on the whole correct. It differs, however, from the facsimiles in reading *Dēvapūtrasya Hūvishkasya* and *sukham*, for which the facsimiles distinctly show *Dēvapūtrasya, Hūvishkasya* and *sūkha[m]*. The form of the king's name with the long vowel is found also in the Bombay University Library inscription edited by D. R. Bhandarkar in the *Journ. Bo. Br. Roy. As. Soc.* Vol. XX. p. 269.

Another difference between the transcript and the facsimiles occurs in the description of the donor. Cunningham, following Dowson, read *bhikshusya Jivakasya Udeganakasya*,³¹ but if there is any trust to be placed in the facsimiles, the last word is really *Ōḍiyanakasya*. As *Jivaka* is said to have been a monk, *Ōḍiyanaka* cannot be a term denoting a caste or profession, but most probably is the name of some nation or tribe and corresponds to a true Sk. *Auḍiyanaka*, a derivative of *Uḍiyanā*. I am unable to point out such a name in the earlier Sanskrit or Prakrit literature. But perhaps it is connected with *Uḍḍiyanā*, mentioned after *Sindhu*, *Saurāshṭra* and *Pāñchāla* in a list of different countries in the *Srīshardḍyāna*, a portion of the *Rōmakasiddhānta*.³²

With these corrections and some changes in the transliteration Cunningham's text runs as follows.³³ —

Sam 40 7 gri 4 di 4 mahārājasya rājātirājasya Dēvapūtrasya Hūvishkasya viharē dānam
 bhikshusya Jivakasya Ōḍiyanakasya ku[m]bhako 20 5 sarvva-satva-hita-sūkha[m] bhavatu
 sa[m]ghē ch[ā]turdīśē.³⁴

"In the year 47, the fourth (*month of*) summer, the fourth day. Gift of the monk *Jivaka*, the *Ōḍiyanaka* (*native of Uḍiyanā* ?), to the *vihāra* of *mahārāja rājātirāja* *Dēvaputra Hūvishka*. Base of pillar 25. May welfare and happiness of all beings prevail in the community belonging to the four quarters.³⁵"

No. 12. — Mathurā Buddhist inscription on base of pillar of Sam. 47;
 edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I. p. 130, No. 18, and Plate.

Of this inscription Rajendralala Mitra offered the following text: —

Datana ra sara (44?) divasa 5 prabu(?)ddhāya dānam bhikshusya Dhammadattasya.

Unsatisfactory as the facsimile is, it makes it pretty certain that the true reading is: —

Samvatsarē 40 7 va . divasē 5 asya purvayē dānam bhikshusya Dharmmadēvasya.³⁶

"In the year 47, in the . . . (*month*) of the rainy season, on the fifth day, — on that (*date specified as*) above — the gift of the monk *Dharmmadēva*."

³¹ Rajendralala Mitra read *bhikshu Jivakasya Ōḍiyanakasya* in the text and 'the mendicant (*Bhikshu*) *Jivaka* *Uḍiyanaka*' in the translation.

³² Aufrecht, *Cat. Cod. Sanscr. Bibl. Bodl.* p. 340.

³³ The bracketed letters are not visible in the facsimiles. The third *ā* in *rājātirājasya* is distinct in Dowson's facsimile.

³⁴ Cunningham read *chaturdiśē*.

³⁵ With regard to this term compare the remarks of Mr. Senart, *Ep. Ind.* Vol. VII. p. 59 f.

³⁶ The *va* of the last word looks more like *sa*, but this is the case also in the preceding inscription where the reading undoubtedly is *Dharmmadēvasya*.

With the exception of the date of the month, this text would be identical with that of the Mathurā pillar inscription edited by Rajendralala Mitra, *ibid.* No. 17, by Dowson, *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 183, No. 5, and by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 33, No. 11. It reads according to Cunningham's facsimile: —

Saṁvatsarē 40 7 grī 3 divas[ā] 5 asya purvvaṃ dānam bhikṣusya Dharmadēvasya.

It cannot be denied that the close agreement of the two inscriptions is rather suspicious and apt to lead to the supposition that the *va* in Rajendralala Mitra's facsimile is merely a mistaken *grī*, and the whole facsimile nothing but a second copy of Cunningham's No. 11 and his own No. 17. On the other hand, Rajendralala Mitra expressly states that the originals of both inscriptions were deposited in the Museum of the Asiatic Society, and it is not impossible, after all, that Dharmadēva presented more than one pillar and at different times.

No. 13. — Mathurā inscription on base of pillar of Sam. 47;

edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I. p. 127, No. 2, and Plate;
by Dowson, *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 183, No. 2, and Plate;
by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 34, No. 13, and Plate.

Rajendralala Mitra's transcript of this inscription reads: —

Dānam Dēvilasya Dadhikarṇadēvikulikasya sam 59 divasa 80.

Dowson reads: —

Dānam Devilasya Dadhikarṇa-devi-kulikasya Sam 40 7 grī 4 Divasa 20 5.

Cunningham reads: —

Dānam Devilasya Dadhikundi . . Devikulikasya, Sam. 47, — Gr. — 4, Divase 25.

To judge from the facsimiles published together with the three editions, the actual reading appears to be: —

Dānam Dēvilasya Dadhikarṇadēvikulikasya sam 40 7 grī 4 divasē 20 9.

There is some doubt attached to the last figure of the date which, as Dowson remarks, is partly defaced. The *i* of the *akshara vi* in 'dēvikulikasya' is quite distinct in the facsimiles of Rajendralala Mitra and Cunningham, but wanting in that given by Dowson. As, however, the latter also reads *vi* in his transcript, I think it almost certain that it is really found in the text.

With regard to the purport of the inscription my three predecessors substantially agree in considering it to record 'the gift of Devila of the race (or of the family) of Dadhikarṇadēvi.' There are two objections to this translation. Firstly, Dadhikarṇadēvi would be a name unparalleled in the Mathurā inscriptions, and secondly, there is no other instance of a man being described in this way as belonging to the family of some woman. In my opinion Dadhikarṇadēvikulika means 'the servant (or priest) at the shrine of Dadhikarṇa.' Dadhikarṇa is the name of some Nāga, and we know from an inscription edited by Bühler, *Ep. Ind.* Vol. I. p. 390, No. 18, that there was a shrine or temple dedicated to him at Mathurā. That inscription records the setting up of a stone slab 'bhagavatō nāgēndrasya Dadhikarṇasya stānē,' and although Bühler translated this 'in the place sacred to the divine lord of snakes Dadhikarṇa,' he added himself that *stāna*, which stands for Sk. *sthāna*, might also mean 'temple.' The word *dēvikulika* is derived from *dēvakula*, and in correct Sanskrit ought to show *vriḍḍhi*-strengthening of the first syllable. The *i* of the second syllable is striking, but an exact parallel is furnished by the Mathurā inscription edited by Bhagvanlal Indraji in the *Actes du Sixième Congrès International des Orientalistes à Leide*, Part III. p. 143, where the drawing plainly shows the words *drakātā dēvikulā*, 'a shrine for the Arhāts.' Similar instances of the transposition of *a* into *i* will be found in Prof. Pischel's *Grammatik der Prakrit-Sprachen*, par. 101-103.

I translate the whole inscription: —

"The gift of Dēvila, the servant (or priest) at the shrine of Dadhikarṇa in the year 47, in the fourth (month of) summer, on the twenty-ninth day."

This and the inscription mentioned above are valuable evidence of the great antiquity of serpent-worship in India, although unfortunately neither of them contains any hint as to the creed which the worshippers of Dadhikarṇa at Mathurā professed. That Dadhikarṇa is invoked in the *āhnikā mantra* of the *Harivamśa*, was pointed out already by Bühler, *loc. cit.* p. 381. It may be added that his name is also found in a list of Nāgas quoted by Hēmachandra in his own commentary on the *Abhidhānāchintāmaṇi*, verse 1311.

No. 14. — Mathurā Jaina stone inscription of Sam. 48;
edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 34, No. 15, and Plate.

Cunningham read this short fragment: —

- 1 Mahārājasya Huvishkasya Sam. 48 — He. 4 — Di. 5
- 2 Bama Dāsyaakula ukonāsaya Siviya dharā.

The photograph of the stone belonging to Prof. Kielhorn shows that the true reading is: —

- 1 Mahārājasya Huvishkasya sa 40 8 hē 4 di 5
- 2 Bramadāsīyē kul[ē] U[ch]ēnāgarīya śākhaya³⁷ Dhar. . .

The only difficult letter is the ninth of the second line. There can be little doubt that it is meant for *chē*, and that the tail at the base is merely accidental, but it is easy to see how Cunningham came to read *kē*. The Brahmadāsika *kula* and the Uchchānāgarī *śākhā* are mentioned together in numerous Mathurā inscriptions; see, *s. g.*, *Ep. Ind.* Vol. I. p. 381, No. 1; p. 383, No. 4; p. 384, No. 5; p. 389, No. 14, &c.

No. 15. — Mathurā Jaina image inscription of Sam. 40;³⁸
edited by Bühler, *Ep. Ind.* Vol. I. p. 387, No. 11, and Plate.

Bühler read in line C.1 *āryya-Haṭṭīyātō kulatō*, but the second *akshara* of the name is wrong. It cannot be *ṭi*, because the curve denoting medial *i* is always open to the left, whereas this sign, on the contrary, shows a curve open to the right. The *akshara* is therefore to be read *ṭa*, and, leaving aside the short vowel of the first syllable, the spelling *Haṭṭakīya* agrees with that of two other Mathurā inscriptions edited by Bühler, *Ep. Ind.* Vol. II. p. 201, No. 11 (*ārya-Haṭṭakīyātō³⁹ kulatō*), and Vol. I. p. 397, No. 34 (*ārya-Haṭṭīyē kulō*).

The last three lines, which contain the description of the donatrix and her gift, are transcribed by Bühler as follows: —

- A. 3 — [sya] dhītu grami[ka]-Jayadēvasya vadhūyē
- B. 3 — mikō Jayanāgasya dharmmapatniyē Sihadatā[yē]
- C. 3 — [lathambh]ō danam.

The reading *Sihadatāyē* is impossible. What is still visible of the last *akshara* of the line is the left portion of a *sa*,⁴⁰ and the correct reading apparently is *Sihadatasya*. This word must have been followed originally by *mātu*, which probably stood at the beginning of line C.3. The description of a female donor in her fourfold character as daughter, daughter-in-law, wife and mother is exactly the same as in the inscription, *Ep. Ind.* Vol. I. p. 382, No. 2, and probably also in two others edited *ibid.* Vol. I. p. 395, No. 28, and Vol. II. p. 208, No. 34.

The *aksharas* *lathambhō* Bühler wants to restore to *śālāthambhō*, which would be a very peculiar term for the object which it is meant for. The inscription is incised on the four faces of the pedestal of a quadruple image consisting of four erect naked standing Jinas, placed back to back, and in all other instances (*Ep. Ind.* Vol. I. p. 382, No. 2; Vol. II. p. 202, No. 13; p. 203, No. 16; p. 210.

³⁷ Compare for the locative, *Ep. Ind.* Vol. I. p. 397, No. 34: *ārya-Haṭṭīyē kulō Vajanāgarīyā śākhāyā*.

³⁸ The unit of the date is illegible.

³⁹ Possibly *ārya-Haṭṭakīyātō*, the 4-stroke being not clear in the photo-lithograph.

⁴⁰ Compare the same letter in *Jayadēvasya* in line A. 3.

No. 37) statues of this sort are termed *pratimā sarvatōḍhadrikā* in the inscriptions.⁴¹ Bühler's reading is therefore *a priori* improbable. But quite apart from this consideration, I own that I do not see how these letters can possibly be read *lathambhō*, even assuming, as Bühler did, that the last two consonants are only half formed. The last sign can hardly be anything but *ya*, which would seem to indicate that the word is the name of the donatrix, but unfortunately neither the vowel-sign above the *ya* nor the preceding letters are distinct enough in the photo-lithograph to allow any positive reading on this authority alone.

Nos. 16 and 17. — Mathurā Jaina image inscriptions of Sam. 52 and 54 ;
edited by Bühler, *Ep. Ind.* Vol. II. p. 203, No. 18, and Vol. I. p. 391, No. 21, and Plates.

Bühler's transcripts of these two inscriptions, placed side by side, read as follows :—

| | |
|---|---|
| Siddha saṃvatsara dvāpanā 50 2 hēmaṃta- | ... dham sava 50 ⁴² 4 hēmaṃta- |
| [mā]sa pratha . . divasa pañchaviśa 20 5 | māsē chaturthē 4 divasē 10 |
| asma kṣuṇḇē K[o]ṭṭiyātō gaṇāt[ō] ⁴³ Vērātō | asya purvvāyām Koṭṭiyātō [ga]ṇātō Sthāni- |
| śakhatō Sthānikiyātō kulāt[ō] Srigrihatō | [y]ātō kulātō Vairātō śakhātō Srigrib[ā]tō |
| saṃbhōgātō vāchakasy=āryya-Ghastubastisya | saṃbhōgātō vāchakasy=āryya-[Ha]stahastisya |
| śishyō gaṇisy=āryya-Maṃguhastisya śaḍha- | śishyō gaṇisya ayya-Māghahastisya śraddha- |
| charō vāchakō ayya-Divitasya nirvartanā | charō vāchakasya ayya-Divitasya nirvartanē |
| Sūrasya Sramaṇakaputrasya Goṭṭikasya lōhikā- | Gōvasya Siba-putrasya lōhika- |
| kārakasya dānaṃ sarvasatvānaṃ hita-sukhāy= | kārakasya dānaṃ sarvasatvānaṃ hita-sukhā |
| astu । | ēka-Sarasvatī pratishṭhāvitā avatālē raṅgāna- |
| | [rttan]ō mē [u] |

The two records so closely agree with each other as to leave no doubt about the identity of the persons mentioned in the first portion. *Ghastuhasti* and *Hastahasti*, *Maṃguhasti* and *Māghahasti*, are nothing but various spellings of the same names. A very similar case occurs in two other Mathurā inscriptions, *Vienna. Or. Journ.* Vol. I. p. 172, and *Ep. Ind.* Vol. II. p. 204, No. 19. They contain the name of a preacher which in the former is spelt *Kakasaghasta*, while in the latter it reads *Karkuhastha*. However, I am not quite sure that Bühler was right in reading *Maṃguhastisya*. The *anusvāra* is very indistinct in the photo-lithograph, and the true reading may be *Māguhastisya*, which would come nearer to the form used in the other inscription.

Bühler's reading °*Divitasya* in the first inscription cannot be upheld. Neither the first nor the second vowel-sign can be *i*, as the *i*-sign is much more rounded in this alphabet, and Bühler appears to have been aware of it himself, as in a note he quotes °*Dēvētasya* as a possible reading. The correct reading undoubtedly is *āryya-Dēvō tasya*, and I think I can discern the traces of the second *ō*-stroke in the photo-lithograph. The spelling of the name therefore is the same in both inscriptions. As for the construction compare the inscriptions, *Ep. Ind.* Vol. I. p. 382, No. 3 (*āryya-Mātridīnāḥ tasya nirvartanā*), p. 383, No. 4 (*vāchakō ayya-Sihā tasya nirvartanā*), Vol. II., p. 204, No. 19 (*Grakabalō ātapikō tasya nirvartanā*), p. 209, No. 37 (*āryya-Kshērakō vāchakō tasya nirvartana*), &c.

In the second portion of the first inscription Bühler translated the words *Sūrasya Sramaṇakaputrasya Goṭṭikasya lōhikākārakasya dānaṃ* by 'the gift of the worker in metal Goṭṭika, the Sāra, the son of Sramaṇaka,' taking the word *Sāra* as the name of Goṭṭika's family or clan. But from the parallel description of the donor in the second inscription as *Gōvasya Sīhaputrasya lōhikākārakasya* it is evident that, on the contrary, *Sāra* is the real name and Goṭṭika a qualifying epithet. The meaning of this word is difficult to ascertain. It may be a proper name characterising *Sāra* as the

⁴¹ Compare the analogous term *sarvatōḍhadra*, applied to a *śiḥā* the single *akṣaras* of which, if written twice on the squares of a chessboard, yield the same text from whatever side they may be read. For examples, see *Kirātārjunīya* XV. 25 ; *Sisupālavadha* XIX. 27, &c.

⁴² The figure is quite distinct.

⁴³ The bracketed signs of the last two words are distinct in the photo-lithograph.

member of some tribe or as the native of some country or town, but no such name is known to us, and I venture to suggest a different explanation. Bühler has shown⁴⁴ that in the dialect of these inscriptions the aspiration of conjunct hard aspirates is frequently neglected; in the present inscription also the photo-lithograph shows *Stānikiyātā*⁴⁵ instead of *Sthānikiyātā*, as transcribed by Bühler. *Goffika* may therefore possibly stand for *goffhika*, the Prakrit equivalent of Sk. *gōṣṭhika*, which means the member of a Pañch or committee entrusted with the management of religious endowments and in this sense occurs, e. g., in the Pehevā inscription from the temple of Garibnāth.⁴⁶

With regard to the last words of the second inscription I am unable to offer any explanation, though it will be readily admitted, I think, that neither Bühler's reading nor his translation of them are satisfactory. The date also of this inscription has been called in question, but, as it seems to me, without sufficient reason. Bühler originally took the date of the year to be 34,⁴⁷ but changed it into 54 on comparing Growse's inscription No. 5,⁴⁸ where the date 57 is given both in words and figures. Lately Mr. V. A. Smith, in his monograph on '*The Jain Stūpa and Other Antiquities of Mathurā*,'⁴⁹ has asserted that the plate clearly reads 44. I own that I cannot discover any resemblance between the first figure of the date and the numeral sign for 40, whereas, on the other hand, I do not see how that figure differs from the signs for 50 occurring in the Mathurā inscriptions, *Ind. Ant.* Vol. VI. p. 219, No. 11; *Ep. Ind.* Vol. II. p. 203, Nos. 17 and 18. And the date Sam. 54 is also in perfect keeping with the facts to be derived from the first inscription. If Dēva was acting as the spiritual adviser of a member of the *lōhikakāraka* caste in Sam. 52, it is quite natural to find him in exactly the same capacity in Sam. 54.

No. 18. — Mathurā Jaina inscription of Sam. 60;

edited by Bühler, *Ep. Ind.* Vol. I. p. 386, No. 8, and Plate.

Bühler read the numeral sign indicating the year of this inscription as 40, adding 60 in brackets and with a note of interrogation, but from his remark in *Ep. Ind.* Vol. II. p. 204, note 61, it may be gathered that he would have adopted the second alternative himself, if he had had an opportunity of reverting to this inscription. As to the rest, I only want to point out that instead of *ayya-Vēriyāṇa śākhāyā* in line 1, the plate clearly reads *aryya-Vēriyāṇa śākhāyā*.

Vṛiddhahasti, the *vāchaka* in the Kottiya *gāṇa*, the Sthānikiya *kula* and the *śākhā* of the venerable Vēriyas, mentioned in this inscription, is probably identical with the person of the same name and vocation referred to in the Mathurā inscription of Sam. 79, *Ep. Ind.* Vol. II. p. 204, No. 20.

No. 19. — Mathurā Jaina image inscription of Sam. 62;

edited by Cunningham, *Arch. Surv. Rep.* Vol. XX. p. 37, and Plate V. No. 6,

and by Bühler, *Vienna Or. Journ.* Vol. I. p. 172.

This inscription appears to record the dedication of a statue by the Jaina lay-woman Vaiṣikā at the request of some ascetic. The phrase containing the latter statement was first read by Bühler *Rārakasya Aryakakasaghastasya śiṣhyā Ātapikōgahabaryasya nirvartana*, and translated '(this being) the nirvartana of Ātapikōgahabarya, the pupil of Arya-Kakasaghasta (*Ārya-Karkaśaghar-shīta*), a native of Rārā (*Rādhd*). But when he had got another Jaina inscription from Mathurā, dated in the same year and recording some donation *vāchakasya āya-Karkuhasṭha[sa] Vāraṇaṇi-*

⁴⁴ *Ep. Ind.* Vol. I. p. 376.

⁴⁵ Compare *śitā* in the Gīrnār version of the Aśoka edicts, VI. 4; also *dhammānusāsīya* III. 3; *°sastīyā* IV. 5; *°sastī* VIII. 4; *°sastīn* XIII. 9; *tiṣṭantā* IV. 9; *tiṣṭya* VI. 18; *dhammānustānāya* V. 4; *stetā* IV. 10; *Risika* V. 5, and below, No. 31.

⁴⁶ *Ep. Ind.* Vol. I. pp. 186, 188, 190, note 50. See also *gōṭhī* in the Bhattiprolu inscriptions Nos. 3, 5 and 9, *ibid.* Vol. II. p. 327 ff.

⁴⁷ *Vienna Or. Journ.* Vol. III. p. 239.

⁴⁸ *Ind. Ant.* Vol. VI. p. 218, and Plate; *Ep. Ind.* Vol. II. p. 210, No. 38, and Plate.

⁴⁹ *Arch. Surv. of Ind.* New Imp. Ser. Vol. XX. p. 53 f. Mr. Smith also thinks that the number of the day, according to the plate, is rather 11 or 12 than 10, and in this he may be right.

yasa śishô Grahabalô ātapikô tsa nirvartanâ,⁵⁰ he recognised at once that the persons referred to in the two inscriptions were identical, and that *Ātapikôgahabaryasya* was to be altered into *ātapikô Grahabalasya*.⁵¹ Another correction seems to be equally certain. The facsimile makes it quite sure that the second *akshara* of the word read by Bühler *Rārakasya* cannot be *ra*. What appears in the facsimile, evidently is nothing but the right and lower portion of a *cha*, and as Kakasaghasta or Karkuhastha is called a *vāchaka* in the inscription quoted above, I have no doubt that also the supposed *rā* of the word is simply a mistake for *vā*. With these emendations the phrase reads: *vāchakasya arya-Kakasaghastasya śishyâ ātapikô Grahabalasya*⁵² *nirvartanâ*, 'at the request of the *ātapika* Grahabala, the pupil of the preacher, the venerable Kakasaghasta.' The epigraphical evidence for a country of the name of Rārā thus falls to the ground. As to the rest of Bühler's transcript, Cunningham's facsimile suggests some minor alterations, such as *ārakshātānā* for *arakhātānā*, *siddhānā* for *siddhāna*, but, of course, these are not certain.

No. 20. — Mathurā stone-slab inscription of Sam. 74;

edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I. p. 129, No. 15, and Plate;

by Dowson, *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 188, No. 4, and Plate;

and by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 32, No. 8, and Plate.

The upper right corner of the slab which bears this inscription, is broken off, so that the first two lines of the text are mutilated. But the next three lines are complete, and a transcript of what is actually preserved of the first five lines would therefore read as follows⁵³ :—

- 1 Mahār[ā]jasya r[ā]
- 2 sya Dēvaputrasya Vāsu
- 3 samvatsarē 70⁵⁴ 4 varsha-nā-
- 4 sē prathamē divasē
- 5 tri[m]ś[ā] 30 asya purvayē.

The three editors agree in restoring the first lines as

- 1 Mahārājasya rā[jātirāja]-
- 2 sya Dēvaputrasya Vāsu[dēvasya].

However, if one takes the trouble to measure the available space, it will appear that the restoration of the second line is highly improbable. There is room for two *aksharas* at the most, especially as the letters are cut pretty carefully and of uniform size. Under these circumstances we are forced, I think, to restore the name of the king to *Vāsu[shkasya]*, and this is exactly the name that is to be expected for the time to which the inscription belongs.

The last epigraphical date of Huvishka is the year 60 (*Ep. Ind.* Vol. I. p. 386, No. 8; see above, p. 105). The inscriptions which refer to the reign of Vāsudēva are dated in the years 80 (*Ep. Ind.* Vol. I. p. 392, No. 24), 88 (*Arch. Surv. Rep.* Vol. III. p. 34, No. 16, and below, No. 21), 87 (*ibid.* p. 35, No. 18, and below, No. 22), and 98 (*ibid.* No. 20, and below, No. 23). From the period between 60 and 80 we have only two records mentioning a king's name, besides the present one, a Mathurā inscription dated in 76⁵⁵ and recording repairs in the reign of Vāsumhka, and another from Sāñchi,⁵⁶ dated [*mahārāja*] *syā rājātirājasya* [*Dēva*] *putrasya Shāh[i]* *Vāsumhka* *sam* [70] 8 hē 1 [di 5] [ē] *tasya* [āh] [p] *u* [ru] *p* [āyānā].

One is accustomed to look upon Vāsumhka as a mere variant of the name of Vāsudēva, because the inscriptions dated in his reign seemed to be mixed up with inscriptions referring to the reign of

⁵⁰ *Ep. Ind.* Vol. II. p. 204, No. 19.

⁵¹ *Vienna Or. Journ.* Vol. V. p. 63.

⁵² The correct reading, however, is possibly *ātapikô Grahabalô tasyâ*.

⁵³ Of the next lines I can make as little as the former editors.

⁵⁴ The first figure of the date was originally read 40, but Cunningham corrected it to 70; see *Num. Chron. Ser.* III. Vol. XII. p. 50, note 6. Compare the sign for 70 in the Mathurā inscription, *Ep. Ind.* Vol. II. p. 199, No. 2, and in the Kāman inscription, *ibid.* p. 212, No. 42.

⁵⁵ Bühler, *Progress Report, 1895-96*; according to V. A. Smith, *Journ. Roy. As. Soc.* 1903, p. 13.

⁵⁶ *Ep. Ind.* Vol. II. p. 309; compare also Bühler's note 10, *ibid.*

Vāsudēva. From the facts collected above it will appear that this is not the case, and I see no reason whatever why Vāsushka should not be treated as an individual name and different from Vāsudēva. In that case we should have four Kushapa rulers at Mathurā, whose dates would be according to the inscriptions: Kanishka 5-18, Huvishka 33-60,⁵⁷ Vāsushka 74-78, Vāsudēva 80-98. But even those who should prefer to adhere to the belief in the identity of Vāsushka and Vāsudēva, will probably admit that the difference in the use of the two names cannot be due to mere chance, and they will have to assume that about the year 79 Vāsushka, in order to please his Hindu subjects, adopted the name of one of their national heroes.⁵⁸

No. 21. — Mathurā Jaina image inscription of Sam. 83;

edited by Dowson, *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 184, No. 6, and Plate,
and by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 34, No. 16, and Plate.

Cunningham's transcript of this inscription is a great improvement on Dowson's tentative reading, and taking no account of the inaccuracies of his transliteration, his reading of the first line may be called correct. The second line he transcribes: —

. . tridattasya vagrayevya . cha . sya gad-dhikasya . . vichitiye Jina-dāsiya protima.

Bühler has already suggested (*Vienna Or. Journ.* Vol. IV. p. 324) to alter *gaddhikasya* into *gandhikasya*, and from Cunningham's facsimile it appears that we have to read *tu* instead of *tri*, and *pra* instead of *pro*, which perhaps is only a misprint. Before the *tu* in the beginning of the line there are traces of another *akshara* which cannot be anything but *dhi*. The *gra* looks rather queer, and I have no doubt that in reality it is *dhu*. Finally, I am convinced that the word between *gandhikasya* and *Jinadāsiya* is to be read *kuṭumbiniyē*. The *tu* is quite distinct, and that the next sign in fact is *mbi* and not *vichi*, is proved by Dowson's facsimile which in this case is the more accurate of the two. Besides, the latter facsimile has some letters omitted in Cunningham's drawing. On the right, almost between the first and the second line, it shows a *dha*, and on the left, at the beginning of the first line *ānam*, which certainly is to be restored to *dānam*. Of course, the text cannot have commenced with this word. Apparently the inscription runs in a circle round the pedestal of the statue, and [*d*] *ānam* is to be read at the end of the first line. And this also cannot have been its proper place, but it was probably placed there only for want of space in the second line. A similar disarrangement of the words of the text is found in the inscription, *Ep. Ind.* Vol. II. p. 202, No. 15. The *dha* which I take to belong to the second line I would hesitatingly restore to *dharma* and connect with [*d*] *ānam*. With these corrections the whole text reads: —

1 Siddham mahārājasya Vāsudēvasya⁵⁹ sam 80 3 gri 2 di 10 6 ētasya pūrvayā
Sēnasya

2 [dhi]tu Dattasya vadhuyē Vya . . cha . . sya⁶⁰ gandhikasya kuṭumbiniyē Jina-
dāsiya pratimā dha[rmad]ānam.⁶¹

"Success! In the year 83 of *mahārāja* Vāsudēva, in the second (*month of*) summer, on the sixteenth day, — on that (*date specified as*) above, — an image, the pious gift of Jinadāsi (*Jinadāsi*), the daughter of Sēna, the daughter-in-law of Datta, the wife of the perfumer Vya . . cha . . ."

The description of the donatrix agrees with that of the inscriptions quoted above, p. 37.

⁵⁷ Probably Huvishka was already on the throne in 28; see above, p. 39.

⁵⁸ I would state that it was Dr. Fleet who first expressed his doubts about the identity of Vāsushka and Vāsudēva in a letter to me, but his arrangement of the list of the Kushapa kings is different from mine. I should like to add that these notes were written before Dr. Fleet's paper on the subject had appeared in the *Journ. Roy. As. Soc.* for 1903, p. 325 ff.

⁵⁹ According to Dowson's facsimile the reading would rather be *Varudēvasya*.

⁶⁰ Dowson's facsimile seems to read *Vridacatasya*, which cannot be correct.

⁶¹ The last two syllables stand at the end of line 1.

No. 22. — Mathurā Jaina image inscription of Sam. 87;
edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 35, No. 18, and Plate.

The photograph of this stone which Prof. Kielhorn possesses, enables us to supplement and to correct Cunningham's reading of the date, though, unfortunately, it is not sufficient to restore the rest of the inscription. The first lines read: —

- 1 Siddham ; ⁶² Mahārājasya rājātīrājasya Shāhir-Vāsudēvasya
- 2 sam 80 7 hē 2 di 30 ētasyā purvāyā . . . ⁶³

"Success! In the year 87 of *mahārāja rājātīrāja* Shāhi Vāsudēva, in the second (*month of*) winter, on the thirtieth day, — on that (*date specified as*) above . . . "

No. 23. — Mathurā Jaina image inscription of Sam. 98;
edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 35, No. 20, and Plate,
and by Bühler, *Vienna Or. Journ.* Vol. I. p. 177, No. 8.

In his paper on this inscription Bühler first gave a revised transcript of Cunningham's facsimile, and then tried to emend the first two lines in accordance with the statements of the *Kalpasūtra*. I have compared his corrected text with the photograph of the front of the stone in the possession of Professor Kielhorn. It is not large and distinct enough to allow a thorough reading of the inscription, but it is sufficient to show that not all of Bühler's emendations can be accepted. The facsimile reads as follows: —

- 1 Siddha ô namô arabatô Mahāvīrāsya dēvanāsasya ; rājña Vāsudēvasya sam-
vatsarē 90 8 varsha-māsē 4 divasē 10 1 ētasyā
- 2 purvayā aryya-Dēhinīyātō⁶⁴ gāna . . Puridha . . kā kulava Pētaputrikātē
sākhātō gānasya aryya-Dēvadata . ya⁶⁵ na
- 3 ryya-Kshēmasya
- 4 prakagiriṇam(?)⁶⁶
- 5 kihadiyē praja
- 6 tasya Pravarakasya dhitu Varanasya gandhakasya⁶⁷ ma . uya Mitrasa
. . . datta gā
- 7 yē vatō maha

In the first line Bühler corrected *siddha ô* to *siddham*, but the photograph shows that the supposed *ô* or *m* is the peculiar stop mentioned above, No. 22, followed here by two vertical strokes. Above the *ddha*, I think, I can discover the sign of an *anusvāra*. The word *dēvanāsasya* was taken by Bühler as an epithet of *Mahāvīrasya* in the sense of 'destroyer of the gods,' but he had grave doubts about the correctness of the word. On the photograph the *dē* is faintly visible, whereas no trace is recognisable of the second and third *aksharas*. The last *akshara* is distinctly *ya*, and the last but one may be *grā* or *śra*, only the subscript *r* being quite certain. Under these circumstances I fail to see which word can possibly be meant here.⁶⁸

⁶² The stop is expressed by a curve open to the left with a horizontal bar in the centre, which sign is found also in the Mathurā inscription, *Ep. Ind.* Vol. I. p. 387, No. 9, and in the Kāman inscription, *ibid.* Vol. II. p. 212, No. 42; see Bühler's note on the latter passage.

⁶³ Three *aksharas* after *purvāyā* are uncertain.

⁶⁴ Bühler: "Dēvadata . va .

⁶⁵ Bühler: *prakagiriṇē*.

⁶⁶ Bühler: "Rēhinīyātō.

⁶⁷ Bühler: *gatvakasya*.

⁶⁸ The restoration *Dē[va]put[rasya]*, which at first sight would seem natural, becomes improbable by the one, or perhaps even two, horizontal strokes after the word, which apparently are meant as a sign of punctuation.

Of greater importance are the names of the *gaṇa*, the *kula*, and the *śākhā*. Instead of *aryya-Dēhīniyātō* Bühler read *Aryya-Rēhīniyātō* which he at first proposed to correct to *Aryya-Rōhaniyātō* and afterwards⁶⁹ to *Aryyōdēhīkiyātō* or *Aryyadēhīkiyātō*. The photograph proves that he was right in his last conjecture, though which of the two forms is to be accepted, is here just as doubtful as in the other inscription which contains the name of this *gaṇa*, *Ep. Ind.* Vol. I. p. 391, No. 19. The words *Paridhā . . . kula* were corrected by Bühler to *Paridhāsakakulatō*, but the photograph has *Paridh[ā]sikātō⁷⁰ kulātō*. The form *Paridhāsika* shows that the *Paridhāsaya* of the *Kalpasūtra* must be rendered in Sanskrit by *Pāridhāsaka*, and not by *Paridhāsaka* as done in the *Sacred Books of the East*, Vol. XXII. p. 290. We next come to the name of the *śākhā*, which Bühler altered from *Pētāputrikātō* to *Pōnapatrikātō* in order to conform it to the *Pūrnapatrikā* of the *Kalpasūtra*. But the reading *Pētāputrikātō* is beyond all doubt in the photograph, and the various readings of the *Kalpasūtra*, *Puṇṇa⁷¹*, *Panna⁷²*, *Sunna⁷³* or *Suṇṇapattiyā*, must be considered corruptions. Such distorted names are by no means rare in the 'List of the Sthaviras,' other examples being *Chāraṇa* for *Vāraṇa*, *Vāṇijja* for *Thāṇijja*, *Pīdhammiya* for *Pīvammiya*, &c., and the fact and even the reason thereof was known already to the Jaina theologians of the fourteenth century. Thus Jinaprabhamuni says in his *Samdēhaviśeṣadharmā*: *bahavō 'tra vāchanābhēdā lēkhakavaigunīyāj jātāḥ ; tattatstha-virāṇāṁ cha śākhāḥ kulāni cha prāyaḥ sāmpratāṁ nānuvartantē nāmāntaratirōhitāni vā bhaviṣhyanti ; atō nirṇayaḥ kartuṁ na pāryatē pāthēṣu.*⁷⁴

Bühler's corrections of *Mahāvīrasyē* to *Mahāvīrasya*, of *purvayā* to *purvdyē*, and of *ganasya* to *ganīsyā* are confirmed by the photograph. In line 6 the photograph has *Varuṇasya gandhikasya vadhūyē* and in line 7 *bhagavatō Mahā[vira]sya*, as conjectured by Bühler. With these emendations the text will run as follows:—

- 1 Siddhha[m]||⁷⁵ Namō arahatō Mahāvīrasya dē rasya ; rājña Vāsudēvasya saṁvatsarē 90 8 varsha-māsē 4 divasē 10 1 ētasyā
- 2 purvdyē aryya-Dēhīkiyātō⁷⁶ ga[pātō] Paridh[ā]sikātō kulātō Pētāputrikātō śākhātō ganīsyā aryya-Dēvadatta[s]ya na-
- 3 ryya-Kshēmasya⁷⁷
- 4 prakagiriṇaṁ(?)
- 5 kihadiyē praja
- 6 . . tasya⁷⁸ Pravarakasya dhīta Varuṇasya gandhikasya vadhūyē Mitrasa datta gā(?)
- 7 yē bhagavatō⁷⁹ Mahā[vira]sya.

"Success! Adoration to the Arhat Mahāvira (*Mahāvīra*) the ! In the year 98 of *rājan* Vāsudēva, in the fourth month of the rainy season, on the eleventh day, — on that (*date specified as*) above, [at the request of] . . . the *ganī* (*ganin*) the venerable Dēvadatta (*Dēvadatta*) out of the venerable Dēhīkiya (*Dēhīkiya*)⁷⁸ *gaṇa*, the Paridhāsika *kula*, the Pētāputrikā (*Paitāputrikā*) *śākhā*, [the gift of] of the venerable Kshēma . . . the daughter of Pravaraśa, the daughter-in-law of the perfumer Varuṇa, . . . Mitrasa [Adoration] to the holy Mahāvira (*Mahāvīra*)!"

⁶⁹ Vienna Or. Journ. Vol. II. p. 144.

⁷⁰ The supposed *w*-stroke in the first syllable of this word seems to be a flaw in the stone. The *d*-stroke of the third syllable is not quite certain.

⁷¹ *Kalpasūtra*, ed. by Jacobi, p. 119.

⁷² *Pētāputrikā* seems to be equivalent to Sanskrit *Paitāputrikā*. In the *Kalpasūtra* it is preceded by the name of *Maipattiyā* which is rendered by *Matipatrikā*, but in analogy to *Pētāputrikā* one feels tempted to correct it to *Māyāputtiyā*, Sansk. *Māyāputrikā*.

⁷³ Regarding the sign of punctuation see above.

⁷⁴ Lines 3-5 are quite unintelligible.

⁷⁵ Probably *namō* is to be restored before *bhagavatō*.

⁷⁶ Or, possibly, *aryyōdēhīkiyātō*.

⁷⁷ Before *tasya* traces of an *akṣara* are visible in the photograph.

⁷⁸ Or *Uddhikiya* (*Uddhikiya*).

FURTHER NOTES ON THE INDO-SCYTHIANS.

BY SYLVAIN LÉVI.

*Extracted and rendered into English, with the author's permission,
by W. R. PHILIPPS.*

THE articles which were written and published by M. Lévi under the express title of "Notes on the Indo-Scythians" have been presented to the readers of this Journal in Vol. XXXII. above, pp. 381 and 417, and at p. 1 ff. of the current volume, with a few supplementary notes and remarks. The present article brings together, under a title which has been adopted to mark the connection prominently, some more contributions on the same subject, found in other articles written by M. Lévi, which could not be conveniently incorporated in the "Notes on the Indo-Scythians."

A. — The relations between China and Kanishka.

From the "Journal Asiatique," July-Dec., 1897, pp. 526 ff.

The *Fa-yuen-tchou-lin* [already mentioned in Vol. XXXII. above, p. 420] enables us to complete and correct one of the data furnished by Hiouen-tsang as to the relations between China and Kanishka. The compiler took his information from an official collection, the *Si-yu-tchi*, "Memoirs on the Western Countries," drawn up in A. D. 666 by the Emperor's orders, and divided into two sections, the text in 60 chapters, and the illustrations (maps, &c.) in 40.

The *Si-yu-tchi* says: — "In the kingdom of Ki-pin (Kapiśa) the doctrine of the Buddha is very wide-spread. In the interior of the capital there is a monastery (*vihāra*) called *Han-sou* (monastery of the Han). Formerly an envoy of the Han, yielding to his own inclination, erected a *Feou-t'ou* (Buddha, pagoda). He made it of stones laid together, a hundred *tch'eu* (feet) high. The practices of worship there differ from the ordinary. In the monastery there is a bone of the skull of the Buddha and there is a hair of the Buddha: the colour of it is deep blue, and it is twisted like a shell. They have deposited them in the seven jewels, and they have placed them in a casket of gold. To the north-west of the capital there is the monastery of the king. In the monastery there is a milk-tooth of the infant Sākya Bōdhisattva. It is an inch long. On going from there to the south-west, one finds the monastery of the king's wife. In the monastery there is a *Feou-t'ou* of copper, a hundred *tch'eu* high: in this *Feou-t'ou* there are relics. Every six days, it diffuses during the night a luminous effulgence; the brightness spreads all around from the base to the cupola; it re-enters the interior when the dawn appears."¹

Hiouen-tsang (*Mémoires*, I, 58) describes the monasteries mentioned in this passage. He gives to the convent which possessed the milk-tooth the same name and the same location; but, according to him, the convent which had the skull-bone and hair was called the "convent of the ancient king."

The Itinerary of Ou-k'ong (*J. A.*, July-Dec., 1895, p. 857) also points out this monastery "which has as relic a bone of the skull of Sākya the Tathāgata." He calls it the "monastery of Yen-ti-li of the king Ki-ni-tch'a." It is therefore certain that the person styled "the ancient king" is Kanishka. Under the enigmatical name *Yen-ti-li* is perhaps hidden the solution of the problem set by the text of the *Si-yu-tchi*; perhaps the name in some way refers to the Chinese envoy who came to Kanishka's court. To this, however, M. Lévi, in revising this abstract, has now added a remark, as follows: — Compare, now, Marquart, *Erānshahr nach der Geographie des Ps. Moses Xorenaci*, Berlin, 1901, p. 282. We must read *Yen-ti chai*, instead of *Yen-ti-li*. The character *chai* transcribes exactly the title which the Sanskrit denotes by *Sāhi*, and which the kings of Kapiśa bore regularly from the time of Kanishka. The reference therefore is to "the monastery of Yen-ti *sāhi* of the king Kanishka."

¹ [For a later translation, presumably a revised one, see farther on, p. 112 f. — W. R. P.]

Moreover, while the *Si-yu-tchi* places this convent inside the capital, Hienun-tsang seems to put it outside. The disagreement of the two texts makes one think that the "monastery of the Han" of the *Si-yu-tchi* really corresponds to the convent which Hienun-tsang calls by the enigmatical name *Jin-kia-lan*, "the monastery of the men," which had been founded by Chinese hostages in the time of Kanishka (*Mémoires*, 1, 42). The *Si-yu-tchi* version recalls in a striking manner the history of King-lou or King-hien already discussed (Vol. XXXII. above, p. 419). It confirms the coming of an envoy (*cheu*) from the Han to the country of the Indo-Scythians; and, as the foundation of the convent goes back to Kanishka's time, the Chinese envoy, who is said to have founded it, must have come to Ki-pin during the reign of Kanishka. This is one reason more for believing that King-lou's mission belongs to Kanishka's reign, and that this reign must be placed about the beginning of the Christian era.

On the identity of Ki-pin and Kapiśa, M. Lévi has an interesting footnote, and refers to the *Journal Asiatique*, July-Dec., 1895, 371-384, and Jan.-June, 1896, 161. The passage in Hienun-tsang (*Mémoires*, 1, 41 ff.), corresponding to the one in the *Si-yu-tchi* quoted above, is another testimony to the identity. Moreover, the political state of Kapiśa in the time of Ou-k'ong was still as it had been described by Hienun-tsang.

In the time of H.uen-tsang, Gandhāra had already "fallen under the domination of the kingdom of Kapiśa" (*Mémoires*, 1, 104), and the capital of Gandhāra, *Ou-ta-kia-han-tch'a* (Udabhatta: cf. Stein, *Zur Geschichte der Gāhā von Kabul*) was one of the residences of the king of Kapiśa (*Vie*, 268). Nagarahara (*Mém.* 96), Lampaka (*Mém.* 95), &c., a total of a dozen kingdoms, belonged to Kapiśa (*Mém.* 41). The city of Takshaśilā had passed recently from Kapiśa to Kashmir (*Mém.* 152).

As the identification is now well established, the name of Kapiśa becomes of great historical importance, and we may ask if the names of the Scythian princes given on coins as "Kujala-Kapaś" and "Hima-Kapiśa" do not contain the name of their capital city.

It is of interest to note that the Chinese character used to transcribe the first syllable of Kapiśa is employed to designate hair-cloths which came from *Si-hou*, i. e. from the western barbarians. According to Couvreur's dictionary the word has that value in *The History of the First Han*.

A note appended to the *Nu-sien-king* (Miliinda-prāśna) in the Ming edition, says:—*Ki-pin* is a *fan*, i. e. Indian, word, meaning "a race without value."

The name Kapiśa, though so rarely mentioned by western authors, is found unexpectedly in the Midrasch, *Vayikra Rabba*, ch. 5, where Kapiśa is represented as the most distant country (Neubauer, *Géographie du Talmud*). There a commentator on Isaiah 22, verse 18, "he will toss thee like a ball into a large country: there shalt thou die," says of the "large country":—"It is Kapiśa." The *Vayikra Rabba* is a Palestinian work of the 7th century.

B. — The missions of Wang Hienun-ts'e in India.

From the "*Journal Asiatique*," Jan.-June, 1900, pp. 297-341, and 401-468.

Wang Hienun-ts'e was a contemporary of Hienun-tsang. He had been prefect of Hoang-choei in the district of Young. Afterwards he was attached as second to the mission of Li I-piao, who started for India in the third month of 643 with an escort of twenty-two men. The object of the mission was to escort back to India a brahman, an official guest of the empire, or to convey to the king Harsha-Silāditya a reply from the emperor. The brahman no doubt was an ambassador of this king. After a journey of nine months, the mission arrived at Magadha in the twelfth month of 643. It remained some time in India. In 645, at the end of the first month, it was at Rājagṛīha; it ascended Gridhrakūṭa, and left an inscription there. Fifteen days after, it was at Mahābōdhi, and there also left an inscription. In going to or returning from India, it passed through Nepal, where the king Narāṇḍradēva treated Li I-piao with honour.

Wang Hien-ts'e was soon again sent to India. In 646 apparently, he received the title "chief of the guard and archivist," and was sent again to Magadha, with Tsiang Cheu-jenn as second, and an escort of 30 horsemen. While the mission was on its way, the king Harsha-Silāditya died. His minister Na-fon-ti O-lo-na-choen had usurped the throne, and he received Wang Hien-ts'e as an enemy. His escort was murdered; but he and his assistant escaped into Nepal, where Narēndradēva was still reigning. The king of Tibet, Srong-tsan Gam-po, was an ally of China, and in 641 had married a princess of the imperial family. These two kings gave Wang Hien-ts'e their aid. With 1,200 Tibetans and 7,000 Nepalese horsemen, he fell upon Magadha, took the capital, and carried off the king to China, where he arrived in 648, the fifth month, on the day *keng tseu*. Wang Hien-ts'e was promoted to the dignity of *tch'ao-san-ta-fou*. Afterwards, when the mausoleum of the emperor T'ai-t'soung, who died 649, was built, the statue of O-lo-na-choen was placed in the avenue leading to the tomb, along with the statues of Srong-tsan Gam-po, and of the kings of Kou-tche, Kao-tchang, &c.

In 657, Wang Hien-ts'e with the title of *wei-tch'ang-cheu* was sent again by imperial order to the western countries. This time, it was to offer a *kashāya* at the holy places. The object of the mission was also to bring back to China a certain Hien-tchao, whom Wang Hien-ts'e had previously met in India, and whose eminent virtue he had pointed out in his report. We know some of the stages of this journey. The mission passed through Nepal in 657: in 659 it was in the kingdom of Fo-li-che: in 660 it was at the convent of Mahābōdhi, which it left on the first day of the tenth month; and in 661 it was at Kapiśa, returning to China. Vaiśālī had also been visited on the way, and a grand entertainment had been there given by the emperor of India in honour of Wang Hien-ts'e.

We know no more of the life of Wang Hien-ts'e, but he must have written his memoirs regarding his journey before 666.

The memoirs written by Wang Hien-ts'e have been lost. Some fragments have been preserved in the *Fa-yuen-tchou-lin*, the famous encyclopædia of Buddhism, compiled by Tao-cheu and finished 668. The memoirs of Wang Hien-ts'e and of Hien-tsang served also as a basis for the official compilation, the *Si-yu-tchi* (or *Si-kouo-tchi*), written in 666.

M. Lévi, in the present article, has given a translation of all the fragments contained in the *Fa-yuen-tchou-lin*, together with much connected information. He has also given several extracts from the *Si-yu-tchi*, which are of interest to Indologists. The entire article seems well worth their attention, but here we are necessarily only concerned with what may serve to complete or correct M. Lévi's Notes on the Indo-Scythians, *vis.*, with the 5th and 11th fragments given by him from the *Fa-yuen-tchou-lin*.

The 5th fragment is from Chap. 29, p. 93 b, col. 10, where the compiler, summing up the journey of Hien-tsang, mentions the convent of the Ancient King in Kapiśa (*cf.* Hien-tsang, *Mém.* 1, 53). "At this very time, at the beginning of the spring of the first year 'Loung-so (661) of the Great T'ang, the envoy Wang Hien-ts'e returning from the kingdoms 'of the West, officially makes offerings there."

The 11th fragment is from Chap. 38, p. 62 a, col. 9: — "The *Si-yu-tchi* says: — In the 'kingdom of Ki-pin (Kapiśa) the doctrine of the Buddha is very wide-spread. In the interior 'of the capital there is a monastery called the convent of the Han. Formerly an envoy of the 'Han came into this country and erected there a *Feou-t'ou* (stūpa); he made it of stones 'heaped up a hundred *tch'eu* (feet) high. The practices of the worship there differ from 'all the other rites. In the convent, there is a bone of the skull of the Buddha, and also a 'hair of the Buddha which is deep blue and twisted round in the manner of a shell. They 'have deposited it with the seven jewels, and they have inclosed it in a little casket of gold.

"To the north-west of the capital there is the convent of the king. In this convent there 'is a milk-tooth of the infant Sākya Bōdhisattva; it is an inch long.

"On going from there to the south-west, one finds the convent of the king's wife. In this convent there is a *Feou-t'ou* of copper, a hundred *ts'eu* high. In this *Feou-t'ou* there are relics. On the six days of abstinence it diffuses in the night a luminous effulgence; the brightness spreads all round it from the base to the cupola, then re-enters the interior at the break of dawn."

On pp. 447-468, under the sub-heading *Les monastères du Kapiça — Les Han et les Yue-tchi*, M. Lévi comments upon these passages.

The monastery of the Ancient King, where Wang Hien-ts'e was in 661, is mentioned by Hienou-tsang (*Mém.* 1, 53). The other monasteries named in the *Si-yu-tchi* are also described by Hienou-tsang; the pilgrim Ou-k'ong, who visited the same region between 760 and 764, gives the names of several monasteries; but these names are not Sanskrit: they are probably Turki. The convent of the Ancient King is the monastery of the king Yen-t'i-li (read Yen-ti chai; see page 110 above) of Ou-k'ong (*J. A.*, July-Dec., 1895, 357). The convent of the king with the milk-tooth of the Buddha is described under the same name by Hienou-tsang (1, 53). The convent of the wife of the king (*ibid.*) is the convent Pin-tche of Ou-k'ong (*loc. cit.* 356), a designation which recalls the title of Pin-tcheon given to the queen of the Kingdom of the Women, Niu-Wang (History of the T'ang, quoted by Bushell, *Early History of Tibet*, in *J. R. A. S.*, 1880, N. S., 12, 532).

There remains the monastery of the Han. The relics deposited there, according to the *Si-yu-tchi*, are exactly those which Hienou-tsang saw in the convent of the Ancient King. But the origin which is here attributed to it, closely recalls the tradition related by Hienou-tsang, regarding a convent enigmatically designated in the Memoirs by the name *Jin-kia-lan* (1, 42), and *Cha-lo-kia* in the Biography (1, 71 and 75). Neither of these names can be reduced to Sanskrit originals.²

It is probable that the name "Monastery of the Han" given in the *Si-yu-tchi*, corresponds to the *T'chen-tan-hou-li* of Ou-k'ong. "Hou-li" seems to be the Tartar translation of "vihāra" (*J. A.*, July-Dec., 1895, 389). As to *Tchen-t'an*, M. Lévi has shewn (*Mélanges de Harlez*, 182 seq.) that it corresponds to *China-sihāna*, *Chin(a)ttān(a)*, "China," and subsidiarily to the title *dēvaputra*, "Son of Heaven" [see also Vol. XXXII. above, p. 421]. In fact, the Chinese origin of the monastery is hardly doubtful: the disagreement between Hienou-tsang and the *Si-yu-tchi* does not even imply two divergent traditions. The official compilers of the *Si-yu-tchi* would have had a repugnance to relate the history of a Chinese prince kept as a hostage by the Yue-tchi, and would have transformed the prisoner into an official envoy. Perhaps also they borrowed from Wang Hien-ts'e, or some other traveller, the tradition they adopted.

Founded among the Yue-tchi, whether by a Chinese hostage or by a Chinese envoy, the monastery of the Han links together the Indo-Scythians and the Chinese. It brings forcibly to mind the journey of that enigmatical "King," who passes as the first propagator of Buddhist texts in China. M. Lévi's discussion of this tradition has been given above (Vol. XXXII. p. 419). M. Specht, in the *J. A.*, July-Dec., 1897, p. 166, disapproved of his translation and interpretation; and M. Lévi here meets these criticisms, and publishes new texts which he has since collected.

The dispute is essentially about a passage in the *Wei-liao*, "Abridged History of the Wei," quoted in an annotation in the *San-kouo-tchi* and other compilations. The text, as it has come down to us, is full of uncertainties and obscurities. Its author, in dealing with the introduction of Buddhism into China, relates that a person named King entered into communication with a king of the Yue-tchi in 2 B. C. But did this Chinaman receive Buddhist sūtras from the Yue-tchi, or did they from him? The question may seem idle: it is really of

² On the convent of *Cha-lo-kia*, compare, now, also Marquart, *op. cit.* (page 110 above), p. 283. — S. L.

great importance. The conversion of the Yue-tchi is involved, and this conversion dominates the history of Buddhism. It marks a new phase.

To solve the difficulties of the text, M. Specht called to his aid the redaction given in three works later than the *San-kouo-tchi*, and dated respectively in the 9th, 10th, and 12th century. M. Lévi has discovered four new citations in works of the 7th century. Their testimony is weighty, as they are not far from the epoch when the existence of the *Wei-liao* was still attested; the annotations of the *San-kouo-tchi* belong in fact to the 5th century. The original still existed, or the tradition regarding it was still solid and precise.

The four new citations given by M. Lévi are from : —

1. The *Koang-houng-ming-tai* by Tao-suen (founder of the Vinaya school in China), compiled 650-667 (K).

2. The *Tai-cha-men-pou-ing-pai-siu-tang-cheu* by Yen-ts'oung, in 662 (T).

3 and 4. The *Pien-tcheng-loen* by Fa-lin, between 624 and 640 (T and P').

These four citations, K, T, P and P', all differ from the *San-kouo-tchi*. They also differ among themselves.

The following translation shews the variations: — "The abridgment of the Wei, in the chapter on the Countries of the West, says : — The king of *Lin-i* had no son. He therefore sacrificed to the Buddha. His wife *Mo-ye* (*Māyā*) saw a white elephant in a dream and became pregnant. And a son was born to her. He came out from her right side, and came to the world spontaneously. He had a roll of hair [chignon] at the top of the head; shaking the earth he was able to walk seven paces. As he had the appearance of a Buddha, and as he had been obtained thanks to a sacrifice to the Buddha, they gave to the prince the name of Buddha. In the kingdom (of *Lin-i*: T, P', K) there was a holy man named *Cha-liu*. (Here is what they tell of him: P', K.) Being very aged, he had white hair and resembled *Lao-tzeu*. Constantly he instructed the people (the men: T, P', K) on the subject of the Buddha. If heaven sent a calamity on men, if for example they had not sons, he bound them to practise the penances and the observances of the Buddha, and to part with what they possessed in order to redeem their faults. It is not long ago, the Yellow-Caps, on seeing that he had an entirely white face, have substituted for this *Cha-liu* the designation of *Lao-tan*; they have been able in security to cheat and deceive China. In the time of *Ngai-ti* of the First Han (in the period *Yuen-cheou*: T), *Ts'in King* went (was sent: T, P', K) to the kingdom of the Yue-tchi. Their king ordered his son, the heir presumptive, to communicate (so in the four texts, not "receive") orally the holy books of Buddha (to King: T, P', K). On returning into China, that which he reported of Buddha was in sum altogether in accordance with the books of the Tao. (And it is thus that the doctrine of the books of the Buddha came early among the First Han: T, P', K)."

In order to fix the text of this important passage, the redaction cited in the *San-kouo-tchi* is also given. The following is a translation from the French : —

"Kingdom of *Lin-eul*. The sacred books of the Buddha say: — The king of this kingdom begot the Buddha. The Buddha was heir presumptive. His father was called *Sie-t'ou* (*Suddhōdana*); his mother *Mo-ye* (*Māyā*). The Buddha had the body and the garment of yellow colour, the roll of hair [chignon] blue like blue silk, the breast blue, the hair [of the body] red like copper. First *Māyā* saw in a dream a white elephant and she became pregnant; afterwards she brought forth a child. He came out in being born from the right side of his mother and he had a knot. Shaking the earth, he was able to walk seven paces. This kingdom is in India; the capital is the centre of India.

"Moreover, there is a holy man named *Cha-liu*. Formerly, the first year of the period *Iouen-cheou* of *Ngai-ti* of the Han, *King-lou*, titular student of the imperial college, was sent on a mission among the Great Yue-tchi; having received them orally, he preserved

"sacred books of the Buddha, which said: — 'The second founder, it is this man.' In the "sacred books which he brought, *lin pou se (?) sang men pe wenn chou wenn pe chou wenn pi-k'iu cheng men*, are all the titles of the disciples. The books of the Buddha which he brought, "agree completely with the Chinese books of Lao-tzeu."

Compared with the others, the text annexed to the *San-kouo-tchi* appears clearly as altered and truncated. It has preserved some details which are wanting elsewhere regarding the person of the Buddha, the name of his adepts, the precise year of King-lou's journey, and the alleged situation of Kapilavastu at the centre of India. But it omits the information, curious but nevertheless correct in the main, regarding the worship of the Buddhas before the Buddha Sākyamuni, the propitiatory sacrifice offered by Buddhōdana, and the origin of the name of the Buddha. It preserves the mention of *Cha-liu*, but omits the curious episode which justifies such mention, and which attaches the remembrance of this person to the history of the internal dissensions of China in the 2nd century. The passage telling of the relations between King(lou) and the Yue-tchi is so obscure, that it apparently lends itself to contradictory interpretations. The disorder seems to increase gradually, and towards the end is very obvious.

The kingdom *Lin-eul* (= *Lin-ni*), or *Lin-i* by a slight modification of the second Chinese character, has its name from the garden of Lumbini, where the Buddha was born. M. Lévi here makes some observations on the Chinese forms of the name (*Loung-pi-ni*, *La-fa-ni*, *Lin-pi-ni*, *Lin-pi*), and afterwards remarks that the author of the *Wei-leas* seems to have mistaken the name of the garden for the name of the kingdom (Kapilavastu).

M. Lévi has already shewn (see Vol. XXXII. above, p. 425) that *Cha-liu* may be the common translation of Sāriputra (Prākṛit Sariyut). Here he adds that, according to Fa-hien (ch. 16), the Buddhist monks of India, wherever they established themselves, put up towers in honour of Sāriputra, Maudgalyāyana and Ānanda, and parallelly in honour of the Abhidharma, the Vinaya and the Sūtras. Sāriputra and the Abhidharma, which corresponds to him, are put in the first rank. As to the use, in the name *Cha-liu*, of the Chinese character *cha* to represent an Indian non-cerebral sibilant, compare *p'ing-cha* for the name of the king Bimbisāra in a translation by Tchi just at the time of the Wei (223-258). The traditional forms *cha-men*, *pi-cha-men* for "śramaṇa," "Vaiśravaṇa," shew also the same character used in the same way before the time of scholarly transcriptions. It happens also that in these various examples the *cha* uniformly represents sibilant + *ar*, the *r* being moveable within the Sanskrit syllable cf. *saṃpares* with *śramaṇa*, *dhrama* and *dharma*, &c.).

The different titles of the disciples of the Buddha given in the text can only in part be brought back to Sanskrit originals. *Pi-k'iu* and *cheng-men* and *sang-men*, are the ordinary transcriptions of "bhikṣu" and "śramaṇa." The expressions containing the word *wenn* "to hear" (*pe-wenn*, *pe-chou-wenn*) probably equal "śrāvaka" (the hearer).

M. Lévi adds some further information he has collected about the Yue-tchi.

The *I-tsie-king-in-i* of Hieneng, composed about 649, in the notes upon the *Mi-tsi-king-kang-li-chou-king* (sūtra on the Malla [or Licchavi] Guhya-pada-vajra [?])³ has the following note: — "Yue-tchi. It is the kingdom of *Pou-kia-lo*; it is situated to the north-west of the mountain "of the Snows (Himālaya)."

Pou-kia-lo is clearly *Pukhalavati*, Pushkaravati (Πευκελα of the Greeks), mentioned as capital of the Yue-tchi in the passages quoted in *J. A.*, Jan.-June, 1897, pp. 9 and 42 (see Vol. XXXII. above, p. 423). The compiler Hieneng no doubt reproduced a gloss in the translation, but we do not know when the sūtra was translated, or what sūtra it was. The

³ I have since established that this sūtra is in fact the third sūtra of the Ratnakūṭa, Japanese edition, II, 1, 47^b. The corresponding Sanskrit title is Tathāgata-guhyā-nirdēśa (Nanjio, 23, 3). — S. L.

Li-cheu-king, annotated by Hiouen-ing, was in five chapters, and referred to the Yue-tchi, and also to Yn-tien (Khotan) and K'ia-tai (Kontche). There is nothing of the sort in the *Li-cheu-king* of our collections.*

The *Kia-che-loun-soung-chou*, commentary on the *Abhidharma-kôśa*, mentions in its historical introduction, the name of Kanishka (*Kia-ni-tcha-kia*), and cites the interpretation given by Hœi-hœi, a learned commentator at the end of the 12th century. Hœi-hœi explains the name by *tsing kin che*, "colour of pure gold." It is curious to note that this translation adapts itself equally to the Sanskrit form, and to the Chinese. *Kanishka* might easily be from *kanaka*, "gold," while the Chinese words [*tsing*] *kin-che*, "colour of [pure] gold," sound like an echo of Kanishka.

* * * * *

M. Lévi's concluding observations are to the following effect.

The texts he has collected seem to him to leave no doubt that the Buddhist authors or compilers of the 7th century reproduced the information about the Buddha and about King's journey contained in the *Wei-leao*, without borrowing it from the extract inserted in the annotations of the *San-kouo-tchi*. We have there an independent translation, direct or indirect as it may be. Whether taken immediately from the *Wei-leao* or borrowed from intermediaries, our citations suppose the existence of at least two recensions, near enough, and also different enough at the same time, to serve to control each other. The comparison of these recensions enables us to definitely solve the problem of the enigmatical King. Thus: — In 2 B. C. a Chinaman went to the country of the Yue-tchi: the king of the Yue-tchi caused some of the Buddhist texts to be communicated to him by his own son, the prince, his heir; the Chinaman, having returned to his country, made them known there. The comparison of the different redactions leaves no place at all for any other interpretation.

After having established the fact, we can follow the gradual modifications of the tradition.

The *Chen-kia-fang-tchi* of Tao-siuen (650 A. D.) and the *Fa-yuen-tohou-lin* (608) mention in identical terms the journey of King-hien (*J. A.*, Jan.-June, 1897, pp. 19-20; see Vol. XXXII., above, p. 420). So does the *Po-sie-loun*, by Fa-lin (624-640). But by the end of the 7th century the recension of the *San-kouo-tchi* tends to prevail. Hinen-i, just about 700, in the *Tchenn-tcheng-loen* has the very text preserved in the *San-kouo-tchi*, and he understands it, not as M. Specht, but as M. Lévi does, for he adds: — "It is to start from this moment that the law of the Buddha began gradually to spread itself towards the east," i. e. towards China. Moreover, before relating the journey of King-(hien) he says: — "One began to learn the existence of the doctrine of the Buddha under Ngai-ti."

Thus Hinen-i, who adopts the same text as that used by M. Specht, and also Fa-lin, Tao-siuen and Tao-chou, all make King a Chinaman, who went on a journey or mission among the Yue-tchi, and brought back from their country the Buddhist doctrine.

From the 8th century the *San-kouo-tchi* recension alone seems to be found, to the exclusion of the others. M. Specht has pointed out three compilations, of the 9th, 10th, and 12th centuries, which reproduce it. The author of the *Soung-kao-seng-tch'oen*, composed in 988, while averring the resemblance between the teachings of the Buddha and of Lao-tzeu, expressly refers to the *San-kouo-tchi* (ch. 3, p. 81 b).

To sum up: — Whatever be the recension adopted as a basis, criticism and tradition allow only one interpretation: — In 3 B. C. the king of the Yue-tchi was a Buddhist, and his zeal laboured to propagate the religion in the direction of China. The consequences which M. Lévi has thought can be drawn from this fact, remain intact.

* In reality, this *sūtra* was translated by Tohou Fa-hou under the Western Tsin, between 265 and 316 A. D. — S. L.

FEMALE TATTOOING AT VINDHYACHAL, NEAR MIRZAPUR,
UNITED PROVINCES.

BY B. A. GUPTE, F.Z.S.

As **Vindhyāchal** is an ancient rock-temple of the primitive type, which is said to have been the "place-name" of a goddess worshipped by some of the families of the Chāndrāsenti-Kāyasth Prabhus of Bombay and Poona, I was requested by the Poona Club of that Society to avail myself of the opportunity of examining this place on a journey to Calcutta. The temple has been separately described for the monograph of the Provincial Superintendent of Ethnography, but a few notes on the local tattooing collected simultaneously are given here : —

A **Kahār woman**, who said that her people serve as domestics or menials, had the *ludid* or curry-pestle or stone-hammer marked on her left arm thus . On the right arm were four fish, , showing that she was originally of the fisher-caste, as the Kahārs are. She had also

Sītā's *rasōi*  or hearth. These women, as domestic servants, have to pound the curry-stuff and to help generally in cooking operations by cleaning the domestic hearth, the cooking pots, &c. The profession and caste of the woman were therefore both shown in her tattoo marks.

A **Govalā or Cow-herd woman** examined was also a domestic servant, but instead of the fish of the Kahār woman she had a group of five dots "...", which she called "the five milk-maids of Kṛishṇa." The *lōdd* or *ludid*, curry-stone, was there all the same. On the dorsum of her hand she had a figure of the *yōnī*, which she did not like to name, .

But her great ambition, a faithful husband, was shown in the Rām's *māchid*, , or cot. That Rām was so faithful to his wife as to be called , or one who 'slept on one bed only,' is a well-known tradition, and every woman naturally considers him a model-husband. The proximity of Oudh, the birth-place of Rām, seems to have influenced the religion of the half-cultured tribes of Vindhyāchal to a marked degree, because a **Raidās woman** and three **Ahīr women**, examined on the same day, all had the Rām's bed and Sītā's hearth tattooed on their arms, although they differed in shape in each case. The following reproductions will show the variations :—

Rām's faithful bed and Sītā's tabooed hearth seem to be the greatest ambition of these women. One of the Ahīr women refused to admit that she had anything like a name on her arm, but in the midst of a blurred and confused design, scarcely visible, was the distinct name  in an incomplete state as given here. Three local priests, who were sitting with me, were asked to read the legend, and they all agreed that it was the name of Rām.

One great peculiarity in all the specimens seen here was, that about two inches below the elbow-joint was a row of confused designs resembling bangles in some shape or other. This belt ended just where the last of the bangles reached the arm from the wrist-joint. Even a **Gadaria or shepherd woman** examined, who had no other symbol, had a broad band running round her arm in fantastic curves, zig-zags, lines, and dots.

The most important point to be noted was the statement "that no girl in this locality is tattooed before marriage, and that the operation is performed as soon after marriage as possible." This statement was corroborated by the local priests.

MISCELLANEA.

SOME CONTRIBUTIONS TOWARDS A GLOSSARY OF RELIGIOUS AND OTHER TERMS USED IN THE PANJAB.

[The "Proposals for a Glossary of Indian Religious Phraseology" (*Ind. Ant.* 1903, pp. 278-80) have so far been justified by results, as the following contributions are only a part of the material already collected, and it is certain that in the remoter parts of the Panjāb a large number of words relating to local customs, beliefs and practices, and local words relating to orthodox beliefs, &c., will be found to exist.]

I am indebted for many useful contributions to L. Chela Rām, Revenue Assistant in the Dera Ghāzi Khān District, in which Western Panjābi is the dialect of the Hindū population. For this dialect reference may be made to Juke's *Dictionary of Western Panjābi* (Kegan Paul, Trench and Trübner, 1900). In the South-West Panjāb the customs of the people differ markedly from those in the rest of the Province, and many of the words now given relate to customs as yet undescribed.

It is hoped that in a subsequent note much fuller and more interesting contributions will be given, including some of the many words to be found in Temple's *Legends of the Panjāb* and other works.

It remains to notice the wide meaning given by many of my contributors to the term 'religious.' It is characteristic of India that it is taken to include social observances and much else. — H. A. Ross.]

Achhār, achhārā. — See *tichhār*.

Āgā. — Songs sung by Hindu women at weddings and similar occasions. (Derā Ghāzi Khān.)

Aqāmat. — The words recited in the ear of a new-born child. (Derā Ghāzi Khān.)

Arpan, offering; — *karnā*, to offer (Sansk.).

Arthi. — A coffin.

Ankut. — A Hindu holiday in which the Govardhan mountain is worshipped, and rice, pulse, and sweetmeat distributed. (Derā Ghāzi Khān.)

Āyā, period of life (Sansk.).

Bāu. — Equivalent to *haldāt*, *q. v.*

Bēl. — The money passed round the head of a religious leader or deity and given to a priest: *karnā*, to perform the above ceremony. Also called *nanchhāwar*.

Bhājī. — Anything distributed by Hindus among brethren in a marriage or other ceremony. The word literally means cooked vegetables or lentils, but some Hindus by it denote meat or flesh. (Derā Ghāzi Khān.) Cf. *Panjābi Dictionary*, p. 118.

Bhāt. — Money or things offered to a deity. Also called *bhāt pūjā*.

Bhiṭ. — *Lit.*, 'a door,' in Pētōhārī, acc. to the *Panjābi Dictionary*, p. 138. In Derā Ghāzi Khān it means 'the abstention from touching others for several days after a birth or death.'

Bhiṭṭī. — From *bhitan*, to touch or to be touched. A woman in her menses is so termed because she is supposed to have been touched by a low-caste woman.

Bhōg. — (1) Any good eatable thing offered to a deity. (2) Sexual intercourse.

Bhōrā. — Equivalent to *kanjī*, *q. v.*

Biwān. — *Lit.*, 'air-car.' The Hindus believe that the spirits of good ancestors are carried to heaven in *biwāns*. Therefore, when a Hindu, man or woman, dies at a very advanced age, having grandsons or great-grandsons, the death is regarded as an occasion for rejoicing. The body is placed in a *sirhī*, or board adorned with paper-flowers, etc., and made in the form of a boat, and the whole structure, which is covered with silk-cloth, is called the *biwān*. A feast is given to all the relatives, and the women of the family, dance and sing as if at a wedding. (Ferozepur.)

Bār. — Equivalent to *saga*, *q. v.*

Busri. — See under *kuprī*.

Būṭī. — *Lit.*, a plant. Also a woman who believes in spirits. The followers of a shrine or religious institutions are also called *būṭī*. (Derā Ghāzi Khān.)

Chauki. — The case enclosing a *rakh*, *q. v.* Equivalent to *takhtī*, *q. v.*

Chēla, s. m., fem. chēlī, fem. dim. chēlīṭī. Ex., a little girl is the *chēlīṭī* or young disciple of a *gūrī*. In Derā Ghāzi Khān *chēla* means a believer in the existence of evil-spirits, and *chēlīṭī*, a woman possessed by an evil-spirit.

Chhattē, pl. -e. — The hairs kept by Hindus after the *jhand* ceremony.

Chhattī. — The hair of a child which is kept after the *jhand* (*q. v.*) or first shaving.

Chhūhanra. — *Lit.*, dried dates. Also the ceremony of sending the barber or *parāhit* of the girl's parents to those of the boy, with a present of seven dates, a rupee and a lump of *gur*. The boy's parents collect their relatives and friends to witness the betrothal and the messenger receives a cloth as a present. Also called *shagan*.

Chōla. — The ceremony of clothing a child for the first time, among Hindus. (Derā Ghāzi Khān.)

Chung. — *Lit.*, a handful. The ceremony of grinding corn at a marriage among Hindus. Also dues paid to village menials and beggars. (Derā Ghāzi Khān.) Cf. *jindrōṭī*.

Churēl. — The malignant evil spirit of a woman who has died in childbirth.

- Dakni.** — A female evil-spirit. Also called *churd*.
- Dalel.** — Scented articles sprinkled on a corpse before burial, by Muhammadans.
- Déo-kāj.** — Re-marriage with the wife after the birth of the first son of the marriage.
- Déwān Dhamāi.** — Ancestor-worship, among Hindus, at a wedding, to implore their protection of bride and bridegroom. (Derā Ghāzi Khān.) Cf. *dhamā*.
- Dhagā.** — A thread of black wool tied round a limb near a sore, after it has been breathed upon by a man who also recites a secret charm over it.
- Dhamā.** — A feast given to Brāhmins in the name of deceased ancestors. (Derā Ghāzi Khān.)
- Dhawānā.** — The bathing on the 3rd day after a death among Muhammadans, performed by the deceased's family. (Derā Ghāzi Khān.)
- Dhūni.** — See *dhunrd*. *Dhūni* also means the things, such as chillies, burnt before a person possessed by an evil-spirit, to expel that spirit. Also a place where fire is kept burning night and day. *Sādhs* and *faqirs* keep a fire burning at a fixed spot in order to extort charity.
- Dhunrā.** — A heap of ashes. Certain orders of *faqirs* accustom themselves to remain near a fire as a penance. This fire is called in Panjābi *dhand* or *dhūni*, and the followers of a *faqir* are said to belong to his *dhand*.
- Dhūriā.** — The playing in the dust on the last day of the Holi.
- Fatīlā.** — The popular inverted form of *pattā*, q. v. in *Multan Glossary*, p. 50.
- Gandā.** — An enchanted thread worn round the neck or waist to remove disease or other evil.
- Gandhā.** — *Lit.*, knotted. Dealings at marriages and other ceremonies. (Derā Ghāzi Khān.)
- Gaudhūr.** — The dust thrown up by the passage of cows at the Gōpashtami festival. It is considered sacred by Hindus. (Derā Ghāzi Khān.)
- Ghōri.** — *Lit.*, mare. During the night of the wedding the boy must ride a mare. He then becomes a bridegroom. This is called the *ghōri ki rasm* or mare's custom.
- Haldai.** — The ceremony of cleansing the body of the bride or bridegroom with *haldī* or turmeric. (P from *haldī* and *hāth*, hand.) Also called *hān*.
- Hāq.** — Equivalent to *haldai*, q. v.
- Handa.** — Bread given to a Brāhman.
- Hom.** — Cooked rice and milk offered to *Dēvī*. Also a ceremony for propitiating the gods. (Derā Ghāzi Khān.)
- Hiwāu.** — A coffin of extraordinary size.
- Jadū.** — A spell. Also called *hartāt*.
- Janā'uni.** — See *sund'uni*.
- Jhand.** — The ceremony or rite of shaving a child's head for the first time. It is usually performed at a shrine or temple with various observances.
- Jindrōri.** — The ceremony of grinding wheat at marriages, among Hindus. Cf. *chung*.
- Jōgt, s. m., fem. jōgan.** The form *jōgt* (fem.) expresses abhorrence or anger, and it also means a goddess, countless evils, such as sickness and evil-fortune, being termed *jōgt*.
- Junj.** — Eatables distributed among the brotherhood and to the poor at a wedding, by Hindus. (Derā Ghāzi Khān.)
- Kāj.** — (1) A feast given to Brāhmins and members of the caste on the death of an aged member of the family. Also called *karni* and in villages *māla*. (2) A wedding, cf. *déo-kāj*.
- Kāj-ginytra.** — The fixing by the brotherhood of the dates for the various rites at a wedding, among Hindus. (Derā Ghāzi Khān.)
- Kanjī.** — A ceremony performed in the 7th or 9th month of the first pregnancy. Also called *bhōrd*. (Derā Ghāzi Khān.)
- Karni.** — (1) See under *kāj*. (2) An assembly of the brotherhood on the 13th day after death, when water is thrown on a cow's tail. (Derā Ghāzi Khān.)
- Kartūt.** — A spell. Equivalent to *lāg*, q. v., and *jādū*, q. v.
- Kupri.** — A sweet kind of bread given to a daughter soon after her marriage, among Hindus. It is called *burst* by Muhammadans. (Derā Ghāzi Khān.)
- Lāg.** — Something given to an enemy to eat which causes his sickness or death. Also called *hartāt*.
- Lapan.** — Sweetmeats and clothes given by women to brotherhood at weddings, among Hindus. (Derā Ghāzi Khān.)
- Lōlā.** — A small, thick loaf, fried in *ghī*, made on certain festivals. (Derā Ghāzi Khān.)
- Lōhri.** — Worshipping of fire on the last evening of the month of Pōh. (Derā Ghāzi Khān.)
- Mahā Nandī.** — A Hindu festival. (Derā Ghāzi Khān.)
- Man.** — Coarse bread, cooked on a fire of dry cowdung and made of *ātā*, *gur* and *ghī*. It is used at Hindu festivals. (Derā Ghāzi Khān.)
- Mandhā.** — The ceremony of hanging a piece of cloth over the place where the marriage ceremony is to take place. (Cf. *mandhā*, to cover.)
- Mashki.** — *Lit.*, a water-carrier. Also food given to a cow on the 13th day after a death, and on the date of the death according to the moon in each month, among Hindus. (Derā Ghāzi Khān.)
- Māla.** — See under *kāj*.
- Mōkh.** — *Lit.*, price. During the funeral ceremonies the deceased's heirs should give furniture and clothes to an Achāryā Brāhman to convey to the dead person in the next world, but when the donors are too poor or stingy, the Achāryā supplies all the articles for a small sum, *mōkh*, agreed upon, on hire, to make it appear that the articles have been actually purchased and given to him.
- Mundan.** — The ceremony of cutting a child's hair for the first time. Equivalent to *piryōjan*, q. v.
- Mūth.** — *Mūth mārd* is 'to send an evil-spirit to kill an enemy.'

- Nānpaṭri.** — The *shrādhā* ceremony performed by a daughter's son of a sonless man for the benefit of his soul on the first day of the *naurātrā* after the *shrādhā*. (Derā Ghāzi Khān.) Cf. *paṭri*.
- Nanchhāwar.** — Equivalent to *bēl*, *q. v.*
- Naqsh.** — An amulet. Also called *tāwiz*.
- Nāndar.** — Equivalent to *tambōl*. (Derā Ghāzi Khān.)
- Panj Bhikmā.** — A fast observed by girls in honour of Dēvī, for five days, food being eaten once a day only and lamps lighted in a Dēvī temple. (Derā Ghāzi Khān.)
- Panjelā.** — A fast observed for five days, usually in the dark half of the lunar month of Kātik, from the Ikādashī (11th) to the Pūranmāshī, during which no food, except the *panj garbhī*, is taken. (Derā Ghāzi Khān.)
- Parichh.** — Delicacies given to Brāhmans for the benefit of departed souls. (Derā Ghāzi Khān.)
- Parnā.** — Marriage. (Derā Ghāzi Khān.)
- Paṭrā.** — A plank of wood or a stone on which a corpse is washed. (Derā Ghāzi Khān.)
- Paṭri.** — The flowers, rice and a *ḍandwan*, or stick for cleaning the mouth and teeth, placed in front of the house on the *shrādhā* day by Hindus. (Derā Ghāzi Khān.)
- Phul pankhṛī**, an insignificant offering.
- Piryōjan.** — Equivalent to *mundan*, *q. v.*
- Pishkāṛā.** — The worship and recitation of *mantrās* by the Brāhmans of both parties when the bridegroom arrives at his father-in-law's house. (Derā Ghāzi Khān.)
- Prān.** — Soul (Sanskrit).
- Prānī.** — A corpse. (Derā Ghāzi Khān.)
- Purā.** — Sugar sent among Hindus by the husband's family to his wife in the fifth month of pregnancy. Also sweet bread roasted in *ghī*. (Derā Ghāzi Khān.)
- Pūran.** — Burial, among Muhammadans.
- Rakh.** — A piece of paper on which figures or words are written in small squares by *gurus* or spiritual guides to ward off evil, among Hindus. Almost every child has a *rakh* enclosed in a copper, silver, or gold case, *chankī* or *takhtī*, usually worn round the neck.
- Rit.** — The ceremony of cutting the hair of a child for the first time. It is considered sinful to cut it before this ceremonial cutting. Some families do it on the completion of the child's fifth year, but the time varies. If a second child be born before the *rit* of the first has been performed, then the *rit* of both is performed before they are five years old.
- Ritān.** — Pl. of *rit*, custom. The first or *chhōṭī ritān* is held in the fifth month of pregnancy, when salt food (*pakaurā*) is placed in the woman's lap (*jhōṭī*) and distributed to the brotherhood and relations. The second or *barī ritān* in the seventh month, when sweetened rice is similarly distributed.
- Rōpnā.** — Betrothal. Cf. *sagāt*.
- Rōṭi kaurā vaṭṭā.** — Food given among Muhammadans by the brotherhood to the family of a deceased on the day of the death. (Derā Ghāzi Khān.)
- Rōṭi sijh karāk.** — Bread given among Muhammadans after sunset, by the deceased's relatives, for the benefit of his soul for forty days after death.
- Sagā.** — A piece of cloth given by spiritual guides to followers as a charm. Hindus also call it *bār*.
- Sagāi.** — Betrothal. Also called *rōpnā*, *vishat*, *sang-bandh*.
- Sang-bandh.** — Betrothal. Cf. *sagāt*.
- Sathī.** — Equivalent to *chhattī*, *q. v.*
- Shagan.** — (1) Omen. (2) Equivalent to *chhāḥānra*, *q. v.*
- Sirhī.** — See *biwān*.
- Sukhrīān.** — Sweetmeats and clothes given to those from whom *tambōl* is received at a wedding, among Hindus.
- Sunā'ūnī.** — *Lit.*, a thing heard. The news of a death, on hearing which the women gather together to perform the *siāpā*, or 'mourning,' and the men sit apart together on a blanket. Relatives and friends are expected to pay a visit of condolence, but must be dismissed after a short time to make way for others. Also *janā'ūnī*.
- Sūtrā.** — A string worn on the wrist by Hindu women: a kind of silver bracelet. (Derā Ghāzi Khān.)
- Takhtī.** — The case in which a *rakh* (*q. v.*) is enclosed. Equivalent to *chankī*, *q. v.*
- Tarājwān.** — The third visit of the bride to her father-in-law's house. (Said to be connected with *tre*, 'three.')
- Tawiz.** — See *naqsh*.
- Thān.** — A place where evil-spirits are supposed to play. (Hindus.)
- Thandri.** — *Lit.*, cold. A festival held in Bhāḍōn. Hindu women prepare cakes, sweets, and salt bread the day before, and on this day, taking a small quantity of these things, go to worship Sītā Mātā in a *mandar* or Brāhman's house. Only stale food is eaten on this day, nothing fresh being cooked. This is believed to protect children from small-pox. (Ferozepur.)
- Tal-wetrā.** — A ceremony at marriage, when salt is placed in the hands of bridegroom and bride. (Derā Ghāzi Khān.)
- Tōtkā.** — A rite to get rid of a disease or other evil, or to cause it to an enemy. *E. g.*, if a man has fever, he rises very early and goes to a *pīpal* tree, which he embraces. By so doing he transfers the fever to the tree.
- Uchhār.** — A cover or quilt. The covering put on the *Granth Sāhib* by the Sikhs. A connected word is *achhārd*, or *achhār*, the cloth spread over the body of a Muhammadan when carried to the grave. It is usually given to the grave-digger as his wage.
- Vishat.** — Cf. *sagāt*.

MUNDAS AND DRAVIDAS.

BY STEN KONOW, OF THE UNIVERSITY OF CHRISTIANIA, NORWAY.

IT is now an established fact that the various tribes known as Kols, Mundās, Santals, and so forth, do not differ in anthropological features from the Dravidians. Mundās and Dravidās belong to the same race. Mr. Risley has called the type represented by those tribes Dravidian.

The languages spoken by the Dravidian race fall into two distinct groups, Dravidian and Mundā. The Dravidian languages have been the vehicles of an old civilisation, and the most important of them are known from an early period. Our knowledge of the various Mundā dialects, on the other hand, only dates back to the middle of the nineteenth century.

Some notes on the language of the Hos of Singbhum were published in the Journal of the Asiatic Society of Bengal as early as 1840. The author was the well-known Colonel Tickell. The indefatigable Hodgson also extended his investigations to the Mundā dialects. In his paper on the Aborigines of Central India in the Bengal Journal for 1848, he communicated vocabularies of Bhumij, Mundāri, Ho, and Santālī. He considered those dialects as Tamulian, and, together with Kurukh, as "dialects of the great Kol language."

Mr. J. R. Logan, in the Journal of the Indian Archipelago for 1852 and 1853, also considered the Mundā dialects as Dravidian. He says:—

"The Kol is Dravidian considerably modified by ultra Indo-Gangetic, particularly in its glossary, and very slightly by Tibetan. The latter element is so small as to render it certain that the Kol was originally a pure Dravidian language, which was deeply influenced by the ancient Mon-Gangetic. The phonetic basis of the language and many particles and words are Dravidian, but the pronouns, several of the numerals, and a large portion of the words, are Mon-Anam."

The first who clearly distinguished between the Mundā and Dravidian languages was Prof. Max Müller in his *Letter to Chevalier Bunsen on the Classification of the Turanian Languages*. He states that he is unable to see any coincidences between Santālī, Mundāri, Bhumij, and Ho on one side and the Dravidian dialects on the other. In the former dialects he sees "traces of a language spoken in India before the Tamulian conquest." That old language he calls Mundā, and I have retained that denomination, because it will be adopted in the Linguistic Survey, and is far more suitable than the phantastical Kolarian proposed by Sir George Campbell.¹

Max Müller's view that the Mundā and Dravidian languages belong to different philological families has been adopted by most scholars in Europe. The Revd. Ferd. Hahn, on the other hand, in his *Kurukh Grammar*, Calcutta, 1900, tried to show "that the Mundāri grammar bears a genuine Dravidian stamp on its brow." Mundāri is a typical Mundā language, and if Mr. Hahn's view is correct, we must infer that the Mundā and Dravidian languages are related to each other. The question is of some importance, and I have therefore thought it worth while to examine Mr. Hahn's arguments.

In the first place, he gives a list of words which are common to Mundāri and Kurukh. The list contains several Aryan loan-words, and also some comparisons which do not correctly represent the real state of affairs. Thus Mundāri *eṅga*, mother, is compared with Kurukh *iṅgyó*. The latter word, however, means "my mother," and *iṅ* is the personal pronoun of the

¹ The Rev. L. Skrefsrud has proposed to call the family Kherwarian, and that name has been adopted by Prof. Thomsen of Copenhagen. Kherwar is used in the traditional tales of the Santals as a common designation of the Santals, Mundās, Hos, Bhumij, and Birhor. It does not, however, include the western and southern tribes such as Korkú, Juáng, Khariá, Savara, and Gadaba, and I cannot therefore see the advantage of adopting it for the whole family. — S. K.

first person singular. Moreover, a comparison of the vocabularies of Muṇḍārī and Kurukh cannot prove anything whatever, because it is a well-known fact that the former has largely influenced the latter. The comparison would have to be extended to other languages of both families, and even in that case it would not prove much. Dravidas and Muṇḍās must have had early intercourse with each other, as well as with the Aryans; and coincidences between them in vocabulary cannot prove any philological connexion, just as we do not class the Aryan dialects with the Dravidians on account of their having several words in common.

Mr. Hahn himself does not appear to attach much importance to the correspondence in vocabulary, and I therefore pass at once to his principal arguments which are based on an assumed correspondence in grammar. It will, however, not be sufficient to confine ourselves to those features which have been discussed by Mr. Hahn. It will be necessary to extend the comparison of Muṇḍā and Dravidian grammar so as to comprise the most characteristic features of both.

Phonology. — The phonetical system of both families differs in many important characteristics. It is much more complicated in the Muṇḍā languages than in Dravidian.

The vowels are mainly the same in both, though the Muṇḍās possess some shades of pronunciation which do not appear to exist in Dravidian. Thus the short *a* in Dravidian is pronounced as the *u* in English 'but.' The Muṇḍā *a* is usually the short sound corresponding to the *a* in 'father.' It also has, however, another sound, which is much more indistinct. It can be compared with the short indistinct *e* in French *quatre-vingt*, but is pronounced much farther back.

The Dravidian *e* has only one sound, that of *e* in English 'ember.' Santālī *e*, on the other hand, has two, or rather four, different sounds. It is sometimes pronounced as the *a* in English 'hat,' and sometimes as the short sound corresponding to the *e* in German 'Segen.' There are, besides, two neutral vowels corresponding to the two full *e*-sounds.

Similar remarks can be made with regard to *o*, and so forth.

The vowels of consecutive syllables in Santālī are made to agree with each other according to a well-defined law. If one syllable contains an open sound, the vowel of the other syllables must also be open, and *vice versa*. Thus, *sān-āḥ*, go; but *hoy-ok*, become. In those instances *ā* denotes the open *e*-sound of *a* in "hat," and *ā* the open sound of *o* in "hot."

E and *o* are changed to *i* and *u*, respectively, when the following syllable contains an *i*. Thus, *koṛa*, boy; *kuri*, girl; *bheda*, a ram; *bhidi*, a ewe.

It will be seen that these changes are quite different from the interchange between *i* and *u* in some Telugu and Canarese suffixes.

With regard to consonants, it should be noted that the Muṇḍā languages possess complete sets of soft and hard consonants, with and without aspiration. Thus Santālī has *k*, *kʰ*, *g*, *gʰ*, and corresponding series of palatals, cerebrals, dentals, and labials. The Dravidian languages, on the other hand, are mostly devoid of aspirates, and even the unaspirated sounds are not freely used, but interchange according to fixed rules.

Moreover, the Muṇḍā languages possess another set of consonants, or rather semi-consonants, which are usually written *k'*, *ch'*, *t'*, and *p'*.

"These sounds are not pronounced like other consonants by successively 'closing and opening,' and allowing the breath to touch the respective organs at their reopening, but by partly inhaling the breath and simultaneously closing the throat and the respective organs, and not allowing the breath to touch them at their reopening, but letting it pass unarrested out of the throat: thus an abrupt half consonant is produced." (Skrefarud.)

The semi-consonants can accordingly be described as checked consonants without the off-glide.

Those sounds are almost exclusively used at the end of words. It will be seen that their existence is in thorough disagreement with the phonetical laws prevailing in Dravidian. In those latter forms of speech the common tendency is to protract the off-glide of final consonants so that it becomes a short indistinct vowel.

The phonetical systems of the Muṇḍā and Dravidian forms of speech differ also in other respects. Thus the semi-vowels *y* and *w* are in the Muṇḍā languages only used in order to avoid the hiatus between concurrent vowels, and there is nothing to correspond to the many cerebral *r* and *l* sounds of the Dravidian languages. There is only one cerebral *r* in addition to the ordinary *r*, and one *l*-sound.

The difference in phonetical system is of some importance, because we often find that even languages which have nothing to do with each other agree phonetically when they are spoken in the same neighbourhood.

Formation of words. — The Muṇḍā languages, like the Dravidian ones, make use of suffixes in order to form new words from already existing bases. The Muṇḍā suffixes are, however, almost exclusively pronominal, and the Muṇḍā languages do not, so far as I can see, possess anything which corresponds to the various formative additions of the Dravidian forms of speech. On the other hand, the infixes which play so great a rôle in the formation of Muṇḍā words, are not a feature of Dravidian grammar. The Mon-khmér languages, on the other hand, and the dialects spoken by the aboriginal tribes of the Malay Peninsula, in this respect agree with Muṇḍā.

Nouns. — Dravidian nouns can be divided into two classes, those that denote rational beings, and those that denote irrational beings respectively. These classes differ in the formation of the plural, and partly also in the declension of the singular. Moreover, such nouns as denote rational beings often have different forms to denote male and female individuals, respectively. Compare Tamil *magan*, son; *magaḷ*, daughter. There is, however, some uncertainty as to whether this latter feature is originally Dravidian. The facts are as follows.

Tamil, Malayāḷam, and Canarese, have different forms for the masculine and feminine singular of such nouns as denote rational beings, the so-called high-caste nouns. In the plural, on the other hand, both genders have the same form, but differ from such nouns as denote irrational beings and things. The latter class of nouns I shall hereafter call *nenter*. The suffixes of the masculine and feminine singular are *an* and *aḷ*, respectively.

Brāhūi does not distinguish the genders, even in the case of rational beings. Most other languages of the family, Kurukh, Malto, Kui, Gôṇḍi, Kôlāmi, and Telugu, have no feminine singular, but use the *nenter* form instead. Kui and Gôṇḍi also use the *nenter* gender in the feminine plural of high-caste nouns.

There are, however, several indications which make it probable that a separate feminine singular is an old feature of the Dravidian languages.

Kumārila Bhaṭṭa (probably 7th century A. D.) mentions *ḍi* as a *stri-pratyaya*, i. e., feminine suffix. Bishop Caldwell further compares the Tamil suffix *aḷ* with the termination in Telugu *kôḍalu*, daughter-in-law; Kui *kudli*, a Kui woman, and also with Telugu *āḍu*, female. Compare, however, Kurukh *ḍi*, woman. Traces of a feminine suffix *ḍi* or *ār* are also occasionally met with in Gôṇḍi verbal forms such as *mandāl*, she, or it, is; *kīār*, she, or it, does. Telugu forms such as *ābide* and *āme*, she; *okate*, one woman, also point to the conclusion that the distinction of the masculine and feminine genders is not an innovation of Tamil and Canarese.

The state of affairs in Muṇḍā is quite different. Here we find the difference of nouns denoting animate beings and inanimate objects, quite a different system of classification, pervading the whole grammatical system. The plural, however, is formed by means of the same suffixes in both classes. There are no different forms used to denote the masculine and feminine genders. Couplets such as *koṛa*, boy; *kuri*, girl, are formed under Aryan influence.

Dravidian languages have two numbers, the singular and the plural. In Muṇḍā there is, in addition to those two, also a dual.

The cases are formed according to widely different principles in both classes. The Dravidian languages possess an accusative and a dative, as the cases of the direct and indirect object. In the Muṇḍā languages, on the other hand, there are no such cases. The direct and indirect objects are expressed by means of pronominal infixes in the verb. Mr. Hahn, it is true, states that the dative-suffix is practically the same in Muṇḍāri and Kurukh, viz., *ké* and *gé*, respectively. Now there are in fact some corrupt forms of Muṇḍāri in which the Aryan suffix *ké* is used to denote the dative and the accusative. That is, however, only the case where the language has come so much under Aryan influence that it begins to abandon the most characteristic Muṇḍā features. Mr. Hahn was probably not aware of this fact. His study of Muṇḍā dialects has apparently been limited to Nottrott's Muṇḍāri grammar, which is very far from giving a reliable account of the language. Even a philologist might have been mistaken under such circumstances.

Mr. Hahn further compares the ablative suffixes Kurukh *tí* and Muṇḍāri *te*. The comparison does not, of course, prove anything whatever. The similarity is probably accidental. The Kurukh suffix has two forms *tí* and *ní*, and the latter is probably the original one. Compare Tamil *indrū*, Kōravā *inde*, Canarese *inda*, &c.

The case suffixes are, in Dravidian languages, commonly added to a modified base, the so-called oblique base, in the singular. The oblique base has various forms, and we can, with some right, distinguish different declensions according to the different additions used in order to form it. There is no such thing as an oblique base in the Muṇḍā languages, and all nouns are treated in exactly the same way.

Adjectives. — Mr. Hahn remarks that adjectives are of the same character in Kurukh and Muṇḍāri. True, but the same is for instance the case in Indo-Aryan and Tibeto-Burman languages. Most agglutinating languages form their adjectives in the same way, and correspondence in that respect cannot seriously be urged as a test of philological connexion.

Numerals. — There is no connexion between the numerals in both families. Mr. Hahn, it is true, compares Muṇḍā *miṭ'*, *moyat'*, one, with Kurukh *mundit*, first. Compare Tamil *mudal*, Telugu *modaḷa*, first. The comparison is, however, based on insufficient knowledge of the nature of the Muṇḍā semi-consonants. It is of course quite possible that some word for "first," "beginning," might be common to Dravidas and Muṇḍās. Even in that case, however, it would be rash to infer a common origin for the languages of both. They must have had intercourse with each other from a very ancient date, and must certainly have borrowed from each other.

Higher numbers are formed in a different way in both families. The Dravidas count in tens; the Muṇḍās in twenties.

Pronouns. — Also the pronouns differ in most points. Attention has often been drawn to the fact that both families possess a double set of the plural of the personal pronoun of the first person, one including, and one excluding the party addressed. I have already pointed out in another paper (see above, Vol. XXXII. p. 458) that the state of affairs in Dravidian languages points to the conclusion that the Dravidas may have adopted this grammatical feature from without, i. e., probably from the Muṇḍās. Even if the double set originally belongs to both

families, that cannot prove much. The same peculiarity is found in many other languages. The forms in actual use among Munda and Dravidian are, moreover, quite different. Mr. Hahn, it is true, compares Kurukh *én*, oblique *eng* with Munda *in*, I; Kurukh *éká*, with Munda *oko*, who? He forgets, however, that a comparison of other dialects shows that the Dravidian base of the pronoun "I" is *é* or *né*, while the characteristic element of the Munda form is *n*; the base of the Dravidian interrogative pronoun is *yá* or *é*, but the corresponding Munda form is *áká*.

No sane philologist would, of course, draw any conclusion from the fact that the Munda languages, like the Dravidian ones, have no relative pronoun. The same is the case in so many quite different families of languages that it can almost be represented as the rule, the development of a real relative pronoun being considered as the exception.

Verbs. — Every trace of analogy between the Munda and Dravidian families disappears when we proceed to consider the verbs. Mr. Hahn, it is true, compares quite a series of suffixes in Munda and Kurukh. It is not, however, necessary to show in detail all the mistakes he has made in those comparisons. None of them would have been possible if he had really known Munda. I shall take two typical examples.

The suffix of the present tense in Kurukh is *da*; thus, *én es-da-n*, I break. The final *n* of *es-da-n* is the pronominal suffix of the first person singular. Mr. Hahn, however, does not hesitate to compare *dan*, the tense suffix *plus* the personal termination, with the Munda copula *tan*, which corresponds to Santali *kan*, and is used to form a present, not, however, as a tense suffix but as an auxiliary.

Mr. Hahn further compares what he calls the perfect suffixes Munda *jan-d*, Kurukh *jan*. Munda *jan-d* contains the tense suffix *jan* and the so-called categorical *a*. We need only consider the former. *Jan* corresponds to Santali *en* and is the suffix of the simple past passive. The final *n* is kept through all persons and numbers. Kurukh *jan* is the suffix of the first person singular feminine of the past tense. It is apparently only used in such verbs as end in *n*. The initial *j* has developed from a *ch*, and the final *n* is the personal termination.

I hope that it is not necessary to show in detail that Mr. Hahn's remaining comparisons are just as superficial.

On the other hand, the whole conjugational system is quite different in the Dravidian and Munda languages. The Dravidian system, is very simple, only comprising two or three tenses; in Munda, on the other hand, we find an almost bewildering muster of conjugational forms. The Dravidian verb can be characterised as a noun of agency; the Munda verb and its various tense bases are indefinite forms which can be used as nouns, adjectives, and verbs. The most characteristic features of the Munda verb, the categorical *a* and the incorporation of the direct and indirect object in the verb, are in entire disagreement with Dravidian principles. The Munda languages, on the other hand, do not possess anything to correspond to the Dravidian negative conjugation.

I hope that the preceding remarks will have shown that Mr. Hahn's arguments for the hypothesis of a common origin of the Munda and Dravidian families are quite insufficient. The analogies which can be said to exist between both families are of a general kind, and such as can be traced between most languages of the earth.

Mr. Hahn is of opinion that there can be no doubt about the classing of Munda as belonging to the Dravidian family. I think it would be easy to show, with just as good arguments, that Munda is a Negro language, or a Indo-Chinese form of speech, or what not. It is time to protest energetically against the tendency, which appears to be gaining ascendancy, of combining different languages on the score of accidental similarity in unessential features.

RAMABHADRA-DIKSHITA AND THE SOUTHERN POETS OF HIS TIME.

BY T. S. KUPPUSWAMI SASTRI; TANJORE.

RĀMABHADRA-DĪKSHITA is well known to students of Sanskrit literature as the author of the *Jānakīpariṇaya*, the first drama read by the majority of students in the indigenous Sanskrit schools of Southern India. This drama has repeatedly been printed in Telugu and in Grantha characters at Madras and in Dēvanāgarī at Bombay. It is known also among those who do not read Sanskrit through its translations into Tamil, Malayālam, Marāṭhi and other vernacular languages. Even its translations in some of the South-Indian vernaculars have been more than once prescribed as text-books for University examinations in the Madras Presidency. But like most other Indian publications this work never issued from the press with any account of its author. I therefore wrote a short Sanskrit memoir of Rāmabhadra-Dīkshita as a preface to his *Putāñjalīcharita* when I despatched a Nāgarī transcript of it for publication in the *Kāvya-mālā* in 1894. This account was based on facts collected from written records, which, though few, could be safely relied on. The present paper is little more than a reproduction in English of what I have already published in Sanskrit.

Rāmabhadra-Dīkshita, the author of the *Jānakīpariṇaya-nāṭaka*, was a great South-Indian poet and grammarian. He was born in the family of Chaturvēda-Yajvan in the village of Kaṇḍaramāṇikyam near Kumbhakōṇam in the Tanjore district, as testified to by the subjoined verse of the *Śṛīṅḍratilakabhāṇa* composed by the poet :—

यश्चतुर्वेदयज्वेन्द्रवंशवारिधिकौस्तुभः ।

यस्य कण्डरमाणिक्यग्रामो भवति जन्मभूः ॥ ६ ॥

This village, which is now almost in ruins, had once a very high reputation as the birth-place of distinguished Sanskrit scholars. Of these were : (1) Dharmarājādharindira, the author of the *Vēdāntaparibhāṣā* and *Tarkachūḍamāṇi*; (2) his son Rāmakṛishṇa, the author of the *Vēdāntasīkhāmaṇi* and *Nyāyasīkhāmaṇi*; (3) Vaidyanātha-Dīkshita, the author of the *Smṛitimuktīphala* and of the *Dīpikā*, a commentary on the *Rāmāyaṇa*; (4) his son Sivarāma-Dīkshita, the author of a compendium of the *Smṛitimuktīphala* called *Āhnika*, from which the following verse is taken :—

निजधर्मनिरूढमानसानां

स्मृतिमुक्ताफलवीक्षणेऽलसानाम् ।

शिवराममखी हिताह्निकाग्र्यं

कुरुतेऽसौ भिषगीशयज्वसूनुः ॥

(5) the pious Chokkanātha-Dīkshita, the author of the *Sabdakaumudī* and *Bhāṣyaratnāvalī* mentioned in the sequel as the preceptor and father-in-law of Rāmabhadra; (6) Raṅganātha-Yajvan, a kinsman of Rāmabhadra-Dīkshita and the author of the *Mañjarīmakaranda*, a commentary on Haradattamiśra's *Padamañjarī*; (7) Nallā-Dīkshita, the author of the beautiful drama *Subhadrāpariṇaya*, the *Śṛīṅḍrasarvasvabhāṇa* and the *Parimala*, a commentary on his own *Advaitarasamañjarī*.

*Upagranthadīpa.*¹

Rāmabhadra-Dikshita was a Rīgvēdi Brāhmaṇa of the Kauṇḍīnya gōtra and Āśvalāyana sūtra. This follows from the drama *Rāghavābhyaśya* by Bhagavantarāya, a contemporary of Rāmabhadra-Dikshita and the youngest brother of Narasimha, the minister of Ekōji of the Marāṭha dynasty of Tanjore.

पारिपार्थिकः—विद्यमानेषु प्राचामभिरूपकेषु कथं नूतनप्रणीते तस्मिन्नेवं परिषदो
बहुमानः ।

¹ For further information about this Śrinivāsa, see extracts from his son's *Upagranthabhāṣya* below.

 श्रथयति भगवन्तस्त्र्यम्बकार्यानुजन्मा ॥

Bhagavantarāya's *Rāghavābhyaśayandīka*.

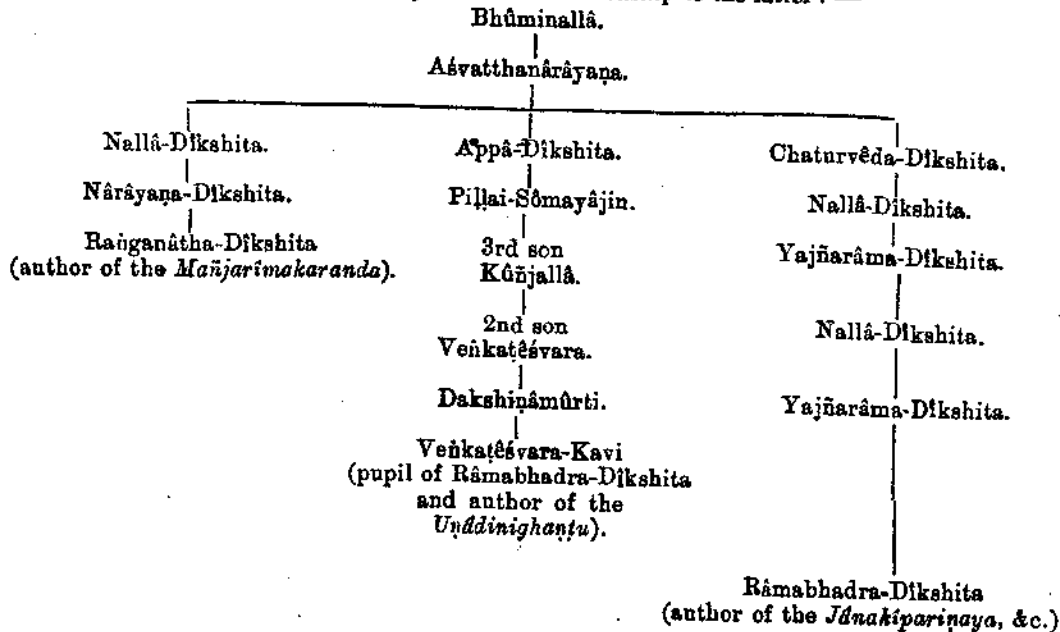

Again, in the land-grant of Sāhajirājapuram for the support of learned pandits by Sāhaji I., a description of Rāmabhadra-Dīkshita is given in the following terms in Marāṭhi: — "Four shares were given to Rāmabhadra-Dīkshita, a Rīgvēdi Brāhmaṇa of the Kauṇḍinya gōtra and Āśvalāyana sūtra, son of Yajñarāma-Dīkshita and grandson of Nallā-Dīkshita."

Rāmabhadra-Dīkshita was the eldest of the four sons of Yajñarāma-Dīkshita and a kinsman of Rāganātha-Yajvan, already mentioned as a native of Kaṇḍaramāṇikyam.

 अस्मात्पितृपितृव्यश्च वन्दे तद्धरणाम्बुजम् ॥

Mañjarīmakarandā.

The following pedigree clearly shows his relationship to the latter: —

There is no descendant in the male line of Rāmabhadra-Dīkshita, as his son Vaidyanātha-Dīkshita died childless. His vernacular was Tamil. His father was a man of moderate circumstances. His preceptor, Chokkanātha-Dīkshita, who was better circumstanced, brought him up from a boy and bestowed great care on his education. In due time he became an adept in all the six *dāśanās*. He made a critical study of the whole of the *Mahābhāṣya* under his preceptor, as is known by the following passages :—

फणिप्रामाणिवाग्मुष्ममाणनाडयदुक्तये ।

कलये शब्दकौमुद्याः कवये गुरवे नमः ॥

Rāmabhadra-Dīkshita's *Shāddarśanisiddhāntasaṃgraha*.

विश्राणनोपकृतिनिस्तुलितानुकम्पम् ।

शेनं द्वितीयमिव शान्दिकसार्वभौमं

श्रीचोक्कनाथमखिनं गुरुमानतोऽस्मि ॥

Rāmabhadra-Dīkshita's commentary on the *Paribhāṣhāvṛtti*.²

The subjoined extract from Rāmabhadra-Dīkshita's *Sṛīṅḍratilakabhāṣya* shows that Chokkanātha not only taught him Sanskrit grammar thoroughly, but also gave his eldest daughter to him in marriage.

स एवायं यस्मै किल निखिलविद्वज्जनभाषनीयवैदुष्यशालिनो वदावदशि-
ष्यसहस्रविभाव्यमाननिजप्रभावाः श्रौतधर्मा इव मूर्तिमन्तस्तत्प्रभवन्तश्चोक्क-
नाथमखिप्रवरा वितीर्णवन्तोऽपि प्रथमामात्मकन्यामन्यामिव पुनरपि स्नेहेन
निरवद्यां वितरन्ति स्म पदविद्याम् ।

His proficiency in *Vyākaraṇa* was exceptionally high and he was often called *Pratyagra-Patañjali*, i. e. 'the modern Patañjali,' by his contemporaries.³

Chokkanātha-Dīkshita, the poet's father-in-law, was a pious Chhāndōga Brāhmaṇa of the Saunaka *gōtra* and Drāhyāyana *sūtra*. His father was Dvādaśāyaji Nārāyaṇa-Dīkshita and his mother Gaṇapati. This sounds rather strange as the name of a woman. But that she actually bore the name Gaṇapati is evident from the subjoined passages.

धातारं सूत्रकारं शिवनुतिसुहितं पाणिनिं वाक्यकारं

विष्णुं कात्यायनं तं गिरिशमहिवराधीश्वरं भाष्यकारम् ।

तातं नारायणं श्रीगणपतिमपि तां मातरं सादरं ता-

नाचार्यान् सर्वतन्त्रप्रणयननिपुणानानमेः कर्म कुर्मः ॥

नमः श्रीद्वादशाहादियाजिने सोमयाजिने ।

महाभाष्यमहाम्भोधिसेतवे गुरवे नमः ॥

Bhāṣyaratnāvali by Chokkanātha-Dīkshita.

² See also the passage from his pupil Venkaṭśvara-Kavi's commentary on *Patañjalīśarita*, quoted below.

³ Compare the speech of the *Sūtradhāra* quoted on p. 128 above from Bhagavantarāya's *Adghavādbhyudaya-nāṭaka*.

शिवं गणपतिं चाम्बां द्वादशाहादियाजिनम् ।
सातं नारायणं नक्वा धातुपाठं समारभे ॥

* * * *

इति संचारिभाष्यश्रीद्वादशाहादियाजिनः ।
पुत्रेण चोक्कनाथेनादादिः पदैरलंकृतः ॥
धातुरत्नावलिरियं चोक्कनाथविपश्चिता ।
रचिता धार्यते येन स सर्वत्र विजेजिते ॥

Dhāturatnāvalī by Chokkanātha-Dīkshita.

Nor is this the only instance of this name being given to a woman in that family. Even to this day instances can be quoted from families connected with Chokkanātha's descendants. Chokkanātha-Dīkshita, the author of the *Kāntimatipariṇayanātaka* and of the *Rasavildābhāṣa*, should not be mistaken for the poet's father-in-law. As will be seen from the following extracts, the author of the *Kāntimatipariṇayanātaka* lived at a much later period. He was the fifth son of Tippā-Dīkshita, one of the donees of *sarvamēnya* lands, i. e., lands free of all taxes, in the village of Sahajimahārājapuram *alias* Tiruviśainallūr, and the youngest brother of Kuppā-Dīkshita, who was likewise a donee of that village.

Kāntimatipariṇayanātaka.

Further, the author of the *Kāntimatipariṇayanātaka* was a Brāhmaṇa of the Bhāradvāja gōtra and Āśvalāyana sūtra and a student of the Rīgvēda. He was a Telugu Brāhmaṇa, as may be seen from his mother's name Narasāmbā — a name to be met with only among the women of that community in the South. His pedigree is as follows :—

The subjoined passage from his *Śrīṅḍratilakabhāṣa* shows that Rāmabhadra-Dikshita was also the pupil of Nīlakaṇṭha-Dikshita, well known for his simple, lucid style of composition and for his most popular works, *Nīlakaṇṭhaviṇaya*, *Kalividambana*, *Nalacharita-nḍika* and several others.

* * नीलकण्ठमखिनां सदसि सकृत्प्रविष्टस्यापि समुल्लसति सरसपदस-

Gaṅgāvataraṇakāvya by Nilakaṇṭha-Dīkṣita.

Rāmabhadra-Dīkṣita was a pupil of Bālakṛiṣṇa-Bhagavatpāda in the Vēdānta philosophy.

यस्यानुग्रहदृष्टिर्पश्यति च श्रीबालकृष्णो गुरुः
 सोऽयं दीव्यति चोक्तनाममखिनामक्रीतदासः कविः ।

Jānakīpariṇayanātaka.

Though Rāmabhadra-Dīkṣita was born in the village of Kaṇḍaramāṇikyam, he afterwards removed from that village and became permanently settled in Sahajirājapuram alias Tiruvibainallūr in A. D. 1693. It was after he took his permanent residence in this village that he wrote his commentary on the *Paribhāṣhāvṛitti* entitled *Paribhāṣhāvṛittivyākhyāna*.

सतां तेनापिते राजा शाहराजपुराभिधे ।
 अग्रहारे स्थितिमता रामभद्रेण यज्वना ॥
 पाणिनेः परिभाषाणां वृत्तिर्व्याख्यायतेऽधुना ।
 इदं शृण्वन्तु करुणां विधायास्मिन्विपश्चितः ॥

Rāmabhadra-Dīkṣita's Paribhāṣhāvṛittivyākhyāna.

A beautiful description of this village, which is situated on the banks of the river Kāvēri at a distance of about four miles from Kumbhakōṇam, is given in the *Dharmavijaya*, a *Champūkāvya* by Bhūminātha-Kavi, a pupil of Rāmabhadra-Dīkṣita.

Dharmavijayachampūkāvya by Bhūminātha-Kavi.

Dr. Burnell, in identifying this village with the town of Tanjore in his *Tanjore Catalogue*, p. 21a, has evidently fallen into a mistake. He had not perhaps facilities for knowing that the benevolent Rāja Sāhaji I. caused a Brāhmanical village to be founded on the banks of the river Kāvērī, on a site best fitted for the performance of the religious ceremonies of the Brāhmanas, and called it after his own name Sāhajirājapuram. The boundaries of the village on all its four sides have been thus mentioned in the gift-deed by the Rāja: — Vēppattūr on the east, Tribhuvanam on the south, Mapāñjēri on the west, and Anakkudī on the north. Further, Tanjore does not appear to have been known by any secondary name at any time. An indirect proof of this fact is furnished by the following passages: —

तल तञ्जापुरं नाम राजस्थानमनुत्तमम् ।

राजानः प्रथितास्तल भोसलीयान्ववायजाः ॥

Hiranyakēśīyasūtravyākhyāna, composed
in A. D. 1815 by Vāñchhēśvara.

Sāhityaratnākarakāvya by Yajñanārāyaṇa-Dikshita,
son of Gōvinda-Dikshita, the prime-minister of
Achyuta-Nāyaka and of his son Raghunātha-
Nāyaka of Tanjore.

Again, in attributing the authorship of the *Jānakīparināyanātaka* to Chokkanātha, Dr. Burnell is far from correct. Probably he misconstrued the following line which is found in it, 'सोऽयं शिष्यानि चोक्तायनखितनामक्रीतसः कविः' meaning, "he — the son-in-law of Chōkkanātha-Dikshita — is the famous author of this work." He seems to have mistaken अक्रीत for अकृत

⁵ See also verse 3 of the extract from *Vēṅkaṭēśvara-Kavi's Uṇḍimighanta* quoted below.

and चोक्कनायमखिना for चोक्कनायमखिना. Such mistakes are not of uncommon occurrence in Dr. Burnell's Tanjore Catalogue, and I take advantage of this opportunity to note a few of them : —

(1) P. 55, *Kasikarajini*, a *ṭikā*, "by the author of the text, Appayadikshita" for "by Gaṅgādharaḍhvarin on Appaya-Dikshita's *Kuvalēyaṇanda*."

(2) P. 172, *Vidyāpariṇayandīka* by Ānandarāyamakhin, "son of Nārāyaṇa" for "son of Nṛsiṃhādhvarin."

(3) P. 170, *Mallikādmāruta*, a *prakaraṇa* "by Raṅganātha of Lāṭapura" for "by Uddanda, son of Raṅganātha of Lāṭapura."

(4) P. 174, *Sabhāpatiṭilāsa*, a *nāṭaka* in 5 *aṅkas* "by Dharmarāja" for "by Venkaṭēśvara, son of Dharmarāja."

(5) P. 163, "*Harivaṃśasādracharita* by Appayadikshita" for "*Harivaṃśasādracharita-vidyākhyāna* by Appaya-Dikshita."

(6) P. 158, *Tripuravijayachampū* "by a son of Nārāyaṇadikshita" for "by Nṛsiṃha-Dikshita."

(7) P. 171, *Raghunāthavilāsa*, a modern play in 5 *aṅkas*, "founded on the *Rāmāyaṇa* by Yajñānārāyaṇa" for "founded on the exploits of Raghunātha-Nāyaka, one of the (Nāyaka) rulers of Tanjore, &c."

(8) P. 173, *Śṛīṅgārasarvasabhāṇa*, a *bhāṇa* "by Kauśika Nallābudha, son of Nallābudha, son of Rāmachandra" for "by Kauśika-Nallābudha, son of Bālachandra."

(9) P. 158, *Dharmavijaya*. "Anon." for "by Bhūminātha-Kavi."

(10) P. 58, *Sāhityaratnākara*. "Examples illustrating the rules of poetry in ten *sargas*. This work is called a *Mahākāvya*, but there does not appear to be any continuous story in it." Dr. Burnell is totally incorrect. *Sāhityaratnākara* by Yajñānārāyaṇa-Dikshita is a *Mahākāvya* and is about Raghunātha-Nāyaka of the Tanjore Nāyaka dynasty.

(11) P. 57, "*Rasārṇava*, a similar treatise, by Siṃhamahīpati. The nominal author is said to have been a Tanjore prince of the last century. The work does not seem to have been ever finished, and it is certainly not a matter for regret that such is the case." Here, again, Dr. Burnell is unfortunately wrong. The name Siṃhamahīpati or Siṅgabhūpāla, as he is otherwise called, does not occur in the lists of the Nāyakas or the Marāṭha Rājas of Tanjore. The name Siṅgabhūpāla and his work *Rasārṇava* are often quoted already by Kumārasvāmin, son of Mallinātha, in his *Ratnāṇa*, a commentary on the *Pratāparudrayaśōbhushaṇa*.

(12) P. 162, *Sarabharājavilāsa*, "a history of Sarabhōjirāja of Tanjore (1796-1833) by Jagannātha" for "a history of Sarabhōji I. of Tanjore, composed in A. D. 1722 by Jagannātha."

The work begins: — अखिललोकमनोवशीकरणप्रगुणैरात्मगुणैः सर्वस्मिन्नुर्वीचलये

(16) P. 170, *Maratakavallīparinaya*, a *ndīśaka* in 5 *aṅkas*, by Srinivāsadāsa, son of Dēva-
rājārya of the Bhāradvāja family. As far as I can make out the passage, he is of the same
family as a Mādhava who wrote commentaries "on the Upanishads" for "on the Dramiḍō-
panishads."

Introduction to the *Maratakavallīparinayandīśaka* :—

तदिह इमिडोपनिषद्विवरणपरमगुरुमाधवाचार्यवंशसुक्तामणेर्भारद्वाजकुलजलधि-
कौस्तुभस्य श्रीदेवराजार्यस्य तनयेन श्रीनिवासकविना विरचितेन मरतकवल्लीपरिण्या-
भिधानेनाभिनवेन नाटकेन भवतः परितोषयामि तदनुगृह्यन्तु ।

(17) P. 170, "*Madanabhūṣaṇa*, a *bhāṇa* by — ? The author is said to have lived at
Kilayanūr, which must be in the neighbourhood of Madras" for "*Madanabhūṣaṇa*, a *bhāṇa*
by Appādhvarin. The author is said to have lived at Killayūr in the neighbourhood of
Māyūram (Māyavaram, in the Tanjore District)."

In religion, Rāmabhadra-Dikshita was a Smārta Brāhmaṇa and a votary of Rāma. His
works, poetical or philosophical, always begin with an invocation to Rāma, or have Rāma for their
subject. In his *Sringāratilakabhāṇa*, we come across the following sentence, put into the mouth of
the Pāripārsvika — "कथमस्य रघुवीरचरणादिन्दस्मरणनिरन्तरप्रवणचेतसो भाषनिर्माणेऽपि प्रवृत्तं हृदयम्" —
meaning "how is it he (Rāmabhadra-Dikshita) whose thoughts are ever bent on meditating
on Rāma, has undertaken to write a *bhāṇa* ?" The following verse addressed to Kṛishṇa
and believed to have been composed by the author one night in his dream, occurs in his
Rāmākarnārasāyana and clearly shows his unshaken attachment to Rāma and Rāma alone.

मौलौ निधेहि मकुटं त्यज बर्हिबर्हं
बाणं गृहाण धनुषा सह मुखं वेणुम् ।
शाखामृगैर्विहर संत्यज गोपबाला-
नामो यदूह भव स्वमथाश्रये स्वाम् ॥

meaning "Remove the peacock's feathers and wear the crown on thy head; drop the flute and
grasp the bow with arrows; abandon the cowherd boys and associate with monkeys; O, the
brightest of the Yadus, transform thyself into Rāma and then will I be attached to thee."
The following note is added after the verse in the manuscript—स्वप्नदृष्टोऽयं श्लोकः— i. e., "the
verse which he composed in his dream."

I now turn to Rāmabhadra-Dikshita's works. The following is a list of them so far as
they are known to me: (1) *Jānakīparinayandīśaka*, (2) *Sringāratilakabhāṇa*, (3) *Paribhāṣādvīti-
vyākhyāna*, (4) *Shaddarśanāsiddhāntasāṃgraha*, (5) *Patañjaliśāharitakāvya*, (6) *Bāṇastava*,
(7) *Chāpastava*, (8) *Tūṇīrastava*, (9) *Prasādistava*, (10) *Viśvagarbhaslava*, (11) *Rāmastavakarnāra-
sāyana*, (12) *Aṣṭapradā*, and (13) *Āchāryastavarājabhāṣaṇa* (a review of "*Āchāryastava-
rāja*," a work by Brahmanāṇdamuni in praise of his preceptor Kṛishṇāṇdamuni). A critical

study of them would convince any reader that they were all written by the same author. As regards the first four, the author himself, in the introductory portion, gives his name and some details of his life. The next two are pronounced to be the works of Rāmahadra-Dikshita by his pupil Veṅkaṭāvara-Kavi in his commentary on the *Patañjalīcharitakāvya*. Besides, there is sufficient internal evidence in these six works to show that they were composed by the same author. Similarity of style and sentiments, recurrence of the same words and phrases, and occasionally even of a couplet or a verse with a slight change, prove clearly that they are the works of the same person. I shall here quote some instances:—

(1) किमिदं प्रभातप्राया रजनी संवृत्ता । यदिदानीं * * ।

(To be continued.)

GLIMPSES OF SINGHALESE SOCIAL LIFE.

BY ARTHUR A. PERERA.

(Continued from p. 61.)

(7) Relationship and Rights of Property.¹⁸

Seven generations of family descent is a matter of pride, and each link of the chain has a name of its own: (1) *appā*, (2) *atā*, *siyia* or *muttā*, (3) *mī-muttā*, (4) *nattā*, (5) *panattā*, (6) *kittā*, and (7) *kirikittā* (father, grandfather, &c.); these terms are used for the direct as well as collateral ancestors.

The next-of-kin to a father (*appā*) or mother (*ammā*) and brother (*sahōdarayā*) or sister (*sahōdari*)¹⁹ are the father's brothers and mother's sisters, and mother's brothers and father's sisters; of these the first pair has a paternal rank and is called 'father' (*appā*) or mother (*ammā*), qualified by the words big (*loka*), intermediate (*madduma*), or little (*punchi*, *kuddā* or *bāla*), according as 'he' or 'she' is older or younger than one's parents; their children are brothers (*sahōdarayā*) and sisters (*sahōdari*), who are, in their turn, styled 'father' and 'mother' by the speaker's children. The second pair becomes 'uncle' (*māmā*) or aunt (*nēndā*); and their children male cousins (*massinā*) and female cousins (*nēndā*), who are themselves addressed 'uncles' and 'aunts' by the next generation.

These are not confined to the relationships mentioned, but are used to friends and elders as expressions of endearment, familiarity or respect, and also to denote other forms of kinship. *Appā*, qualified as before, is applied to a mother's sister's husband or a step-father; *ammā* to a father's brother's wife or a step-mother; *māmā* to a father's sister's husband or a father-in-law; *nēndā* to a mother's brother's wife or a mother-in-law; *sahōdarayā* to a wife's or husband's brother-in-law or a maternal cousin's husband; *sahōdari* to a wife's or husband's sister-in-law or a maternal cousin's wife; *massinā* to a brother-in-law or a paternal cousin's husband; *nēndā* to a sister-in-law or a paternal cousin's wife.

Those who are related as 'brothers' and 'sisters' rarely marry; and a husband's uncles, aunts, and cousins of the one class are to his wife uncles, aunts, and cousins of the other. The terms son, nephew, grandson, and great-grandson, with their female equivalents, also stand for several forms of kindred. A son (*pūtā*) is one's own son, the son of a 'brother' (male speaking) or of a 'sister' (female speaking). A daughter (*duva*) is one's own daughter, the daughter of a 'brother' (m. s.) or of a 'sister' (f. s.). A nephew (*bēndā*) is a son-in-law, the son of a 'sister' (m. s.) or of a 'brother' (f. s.). A niece (*lēfā*) is a daughter-in-law, the daughter of a 'sister' (m. s.) or of a 'brother' (f. s.). A grandson (*munupurā*) and granddaughter (*minipiri*) are a 'son's' or 'daughter's' or a 'nephew's' or 'niece's' children; their sons and daughters are great-grandsons (*mī-munupurā*) and great-granddaughters (*mī-minipiri*).

The ancestral holding of a field and garden devolves, according to the old Singhalese Law, which is still in force, with modifications, in the inner provinces of the island, on the sons, unless ordained as Buddhist priests, or adopted out of the family, and on those daughters who are unmarried or have not moved from their parents after marriage. Matrimony is of two kinds: *diga* when the husband takes the wife to his own home, or *binna* when he settles down at her father's house. To keep a plot of ground intact the males have had recourse to polyandry.

(1884) p. 217, and Vol. II. (1885) p. 64.(e) *Ceylon North Central Province Manual* (1899), p. 166.¹⁹ Elder brother is *siyā*. Elder sister is *siyā*. Younger brother is *malayā*. Younger sister is *nangī*.

The co-owners work together (*hawolata*) and share the produce or divide the property into their respective lots (*betma* or *pangu*) before cultivation, or hold it on the following complicated system called **Tattumaru** (alternate). A field belongs to A and B in equal shares and is possessed in alternate years. If on their death two sons of A and three of B inherit it, then their possession for 14 years is A-1, B-1, A-2, B-2, A-1, B-3, A-2, B-1, A-1, B-2, A-2, B-3, A-1, B-1. In case of A-1 surviving, A-2 leaving two sons, B-1 three sons, B-2 four sons, and B-3 five sons, the tenure for 30 years is A-1, B-1a, A-2a, B-2a, A-1, B-3a, A-2b, B-1b, A-1, B-2b, A-2a, B-3b, A-1, B-1a, A-2b, B-2c, A-1, B-3c, A-2a, B-1a, A-1, B-2d, A-2b, B-3d, A-1, B-1b, A-2a, B-2a, A-1, B-3e.

When there is no male in a family or the proprietor is old or employed elsewhere, the fields are **rented out** for cultivation for half the crop (*andé*), or for a portion equal to one and a half or double the extent sown — about $\frac{1}{8}$ of the produce (*otu*).

A cultivator who converts, with the owner's consent, a temporarily abandoned highland or waste ground (*hēna*), into a field or garden becomes entitled to it and pays a small rent (*aswedduma* or *panduru mila*), or has his trouble and expense made good, before the possession of the land is resumed, as his **improvement right**.

Lands are acquired by inheritance, paternal (*pav urumē*) or **maternal** (*map urumē*), **by bequests** (*thēgi*) made orally or in writing, **by purchase** (*milata*) or by prescription (*buttiya*). **The mother is the heiress of an intestate child** (*daru urumē*), and failing her the father becomes entitled to the property (*jātaka urumē*), but they cannot dispose of it. **The rule of succession** is children, parents, brothers and sisters, nephews and nieces, uncles and aunts and children of uncles and aunts; only on failure of the whole-blood descendants, do the half-blood succeed.

Deeds of gift, which generally had an imprecation against all future claimants, were revocable by the grantor except those to temples (*pidanili*) and to public officers in lieu of a fee; and an **usurpation** was valid if the proprietor did not recover possession within twelve months.

Service property held by hereditary tenants reverted to the landlord by abandonment (*pālu*), by failure of heirs (*mala-pālu*), or by forfeiture due to non-performance of personal services (*nīla-pālu*).

Children who are ungrateful to parents or have been cruel to them or have brought disgrace on the clan by contracting inferior marriages are **disinherited**; the father, in presence of witnesses, declared his child disinherited, struck a hatchet against a tree or a rock, and gave to his other heir an *ola*, blank, or written with the disinheritance formula. There is no prescribed form for the **adoption** of a child, but it is necessary that he is of the same caste as the foster-parent and that he is publicly declared to the relatives as the adopted son and heir of the estate.

Minor differences about property were settled or compromised in the **village councils** (*Gansabbhāva*) held in the *ambalama* or under the village tree. Appeals from them and the more important disputes were heard in the court of the provincial governor (*Dissāva Maduva* or *Ratē Sabbhāva*) who was assisted by his high officials acting as assessors. He was empowered to give *olas* as titles to lands (*sittu*) and direct anyone but those who had Royal grants (*sannas*) to quit possession. The Final Court of Appeal was presided over by the king or one of his ministers (*Adikārama*) and its decisions were final. The three ancient tribunals are now represented by the village assembly of the Chief of a district, by the Appellate Court of the Agent of a province, and by the Governor in Council. If a *Dissāva* or an *Adigar* found after inquiring into the evidence — no relatives were competent witnesses — that the issue was doubtful, he ordered a **trial by oath or ordeal**. The villages were summoned to the spot (*dinapela*) by showing them a cloth tied in three knots and they were bound to be present.

The oaths were either a mere asseveration (*sattaka venadē*) or swearing upon one's eyes (*esidekapā*) or on one's mother (*ammapā*) or by striking the ground (*polavē atagadē*), or by throwing up a handful of sand (*vēli udadamā*) or by lifting the hand towards the sun (*irata ata nagā*) or by

touching a pebble (*keto allā*) or by the image of Vishnu or some other deity, or by the sacred scriptures (*bana*) or by Buddha's *mandopla* (*tirisāraya*). In all the above, punishment followed in this life itself, except where the Great Master was concerned, when the perjured person suffered in a future existence. There were five common forms of ordeal; that by hot oil required the adversaries to put their middle finger in boiling oil and water mixed with cowdung, and if neither or both were burnt the land was equally divided. The other four modes consisted of the disputants partaking of some rice boiled from the paddy of the land in question; breaking an earthen vessel and eating a cocoanut that were placed on the portion claimed; removing the rushes laid along the boundary; or striking each other with the mud of the disputed field; the claim was decided by any misfortune which fell to either party or his relatives within seven or fourteen days. There were two other forms which had fallen into disuse even in ancient times owing to the severity of the tests, viz., carrying a red-hot iron (*ripolla*) seven paces without being burnt and picking some coins out of a vessel containing a cobra (*nayā*) without being bitten.

(8) Industries.

The several occupations in which the people are engaged have already been hinted at; agriculture and fishing require more detailed reference, as well as hunting, which is followed both to protect the crops from the depredation of wild animals, and as a means of sustenance in districts where cultivation is not possible.

Rice is sown three times a year — for the Maha crop in July, for the Yala in January, and for the Medakanna in October — in fields irrigated by tanks, or by rivers dammed up near their mouths: a row of piles is fixed in the bed of the stream and mats made of grass tied to them with jungle creepers: sufficient sand silts up against the framework for a dam. Each owner surrounds his claim of the communal tract of fields with an embankment (*niyara*), mounds it with buffaloes (*madavanarā*), removes the surplus water with a long wooden ladle (*gotumāna*) hung up on a cross beam at the edge of the field, and sows it with seed-paddy (*bittara ri*) which had been soaked in water till they had germinated. From a cadjan-shed (*pela*), erected on four trestles, the *gamarala* watches his field by night and day. The neighbours assist each other in reaping the grain (*goyan kapanarā*), tying the sheaves, threshing (*goyan pāganarā*), fanning the chaff in winnowing baskets (*kulld*) and stacking the straw; and are entertained with a mid-day meal. The harvest time is eagerly looked forward to by the villagers, those employed in towns taking leave of their masters to participate in these rural joys. When water fails, yams and fine grains are cultivated in terraces along hill-slopes, in beds of dried-up tanks, or in clearings (*hén*) of the communal forests which surround each village: a village consists of a group of hamlets (*gan*).

The capture of elephants (*ali*) is effected either by pitfalls, female decoys, noosing or by large stockades (*etgāl*);²⁰ leopards (*koti*) are taken "in traps and pitfalls, and occasionally in spring cages formed of poles driven firmly into the ground, within which a kid is generally fastened as a bait; the door being held open by a sapling bent down by the united force of several men, and so arranged as to act as a spring, to which a noose is ingeniously attached, formed of plaited deer's hide. The cries of the kid attract the leopard, which, being tempted to enter, is enclosed by the liberation of the spring, and grasped firmly round the body by the noose."²¹

Bears (*valassu*) are very greedy of honey, and this is taken advantage of by woodmen, who "suspend a heavy wooden mallet before the mouth of the fissure in which the hive is built, and a cross-bar to the trunk below at such a distance that when the bear sits on it the end of the mallet will be on a level with his head. Should, as is expected, the bear climb the tree, he makes himself comfortable on the seat provided for him, but no sooner has he done so then he finds the mallet in his way and he pushes it away, when the next moment it comes back and cracks him over the head.

²⁰ There is quite a literature on the subject; consult Modder's *Hand Book to the Elephant Kraal* (1902).

²¹ Tennant's *Natural History of Ceylon* (1831), p. 27.

This irritates him of course, and he pushes the mallet with greater force but only with the effect of increasing the weight of the returning blow. The bear never thinks of changing his position, and as blow after blow, each succeeding one severer than the other, follows his attempts to thrust the offending log aside, the end soon comes, when, stunned by a blow stronger than the rest, he drops into the pitfall or is impaled on the stakes planted to receive him."²²

Porcupines (*ittévo*) are caught by setting up in an opening "a framework of sticks about 3 ft. square, one side of which rests on the ground, and the other is held up at an angle of about 45° by a cord attached to a stick bent down and intended to act like a spring. The frame is weighted with heavy stones, and underneath it, right in the way of the animal, is a trigger the slightest touch against which releases the spring and brings down the weighted frame with crushing effect."²³

Buffaloes (*miharak*) keep in herds in their rutting season (December and January) and are caught with "a stout elk-hide rope, with a running noose at one end and a piece of elk-horn with the frontlet tine at the other. Several nooses of this kind are suspended from bushes on the path of the buffaloes and the herd is driven from its feeding grounds with shouts and the clanging of sticks. The animals in their rush generally thrust their heads into the nooses and run away with the rope until pulled up by the elk-horn catching against a root. Here the animal is left struggling for a day or two, when it becomes sufficiently subdued to be yoked to a tame one and driven off to the kraal or pond prepared for the purpose."²⁴

Hunters either surround a herd of deer, prevent them from feeding and knock them down when they are unfit to run away by sucking in a large quantity of air; or lie in ambush by a pool, a tank or along a deer-path, and when the animals approach sharply break off a twig from a tree, and as the sound brings them to a halt, shoot down the fattest of the herd. Hunting at night to shoot wild hogs, elk, deer and leopards is called *yakmini atulla*. "The expedition consists of two men, one carrying a gun, the other a chatty of live-coals on his head, and a hatchet with a bell attached to the handle. The former carries in addition powdered rosin in a bag with which he produces a blaze on the chatty on the companion's head."²⁵ The bell and chatty are sometimes attached to the neck and sides of a sporting buffalo, and the sportsmen follow in the dark and bring down the animals attracted by the light.

The Singhaless generally angle in streams with a rod 12 ft. long, made of the dried mid-rib of the leaf of the *Caryota urens* (*kitul*); but in the rainy season he traps by placing long baskets (*keman*) in the crevices between stones and rocks where fish enter and are caught. In the dry season, when a piece of water is very shallow, fishing is done with a funnel-shaped basket opened at both ends (*karak*), which the fishermen, to quote Knox (p. 27), "jibb down, and the end sticks in the mud, which often happens upon a fish; which, when they feel beating itself against the sides, they put in their hands and take it out, and drive a ratan through their gills, and so let them drag after them."

Sluggish rivers are "fenced with strong stakes, diagonally to which are attached bamboo tats or screens. At certain distances, square chambers (*jākotu*), made of the same material, are attached to the fence, having an open end opposed to the stream, and the interior is so constructed that a fish once entering cannot find its way out again. This mode of fishing is not practicable in large rivers owing to the strong currents which carry away the stakes."²⁶ In some seasons of the year, at night, fishes spring up out of the water as they ascend the river, and to catch leaping fish the fishermen "place two poles upright in a boat at some distance from each other, spreading a net between them. One man, seating himself at the stern of the boat, paddles it from one side of the river to the other; the fishes as they spring out of the water strike against the net and fall into the cavity of the boat."²⁶

²⁴ Ibid. p. 230.

²⁵ Ibid. p. 19.

²⁶ The Ceylon Friend (1879), Vol. IV, p. 120.

Fishing in the open sea is carried on by three kinds of outrigger canoes: the small boat (*kudā oru*) keeping close in shore, the single-masted larger one (*rupal oru*) venturing further out, and the largest (*yātrā oru*) constructed for stormy weather and carrying an oblong sail on two masts. The nets used vary from a drift net (*mādelā*) to one with meshes so small that only a darning-needle-sized twig can pass through (*kudādela*).

(To be continued.)

MISCELLANEA.

FEMALE TATTOOING AMONGST
GHILZAIS.

BY GANGA SAHAI,

Assistant Settlement Officer, Kohat.

THE following notes were taken from the members of a family of Tarakki Ghilzais, whose camp was visited by me at Chichina. Their story was as follows:—

The great Ghilzai tribe formed two-thirds of the population of Afghanistan, the remaining one-third being Tajik. Their ancestral homelay on the other side of the Shutargardan Range and extended as far as Khurāsān. They were also called Kūchis, probably owing to their migrations to British territory in winter. As a rule they are a well-to-do class of people and trade in *ghis*, carpets, sheep and horses. They live in *kishdais* or small tents made of blankets and carry their goods about on camels. In winter they settle in groups of families in British territory in villages, where by old custom they are allowed to graze their cattle on payment of a fixed tax. Some of the tribesmen look after the cattle on the hills, while others use the camels in selling wood and the carrying of salt trade. They intermarry among themselves at mature age, between 20 and 25, and alliances with Pathāns in British territory are rare occurrences and even then only due to poverty or love. They have the reputation of being a set of well-behaved people with a good moral character.

Of the various sections of the Ghilzai Tribe, some have a fancy for picturesque tattooing, others like only one dot on the forehead, while the rest did not tattoo at all. My informant gave the following detail:—

Tarakkis,
Badni Khel,
Hamrān Khel,
Suleimān Khel.
(partly known
as Katwaz),
Barik Khel,
Jamāl Khel,
Wurdag,
Andar,

who live about Kandahār
and Kalāt, and practise
picturesque tattooing.

Nāsir,
Shinwārī
and Mallā Khel,
Niāzi,

who live about Hazāristān
and use only one dot.
[Some of the Mallā Khels,
however, have told me
that they were originally
Sayyids and that tattoo-
ing did not prevail
amongst them.]

The Bahrām Khel, who live about Hazāristān,
and the Taghar Ghilzais, who live about Lōgar,
have no taste for tattooing.

The object in view is purely attraction. The operation is done when the girl is between 12 and 14. Three or four needles are taken and pricked into the flesh, and then collyrium (*ranja*) and soot collected by burning the gum of a kind of tree called *mauz* are rubbed over it.

The tattooing is done on the chin, forehead, cheeks, and backs of the hands. The following forms were common among the women of the family I visited:—

Between
the
eye-brows.

Chin.

Cheeks.

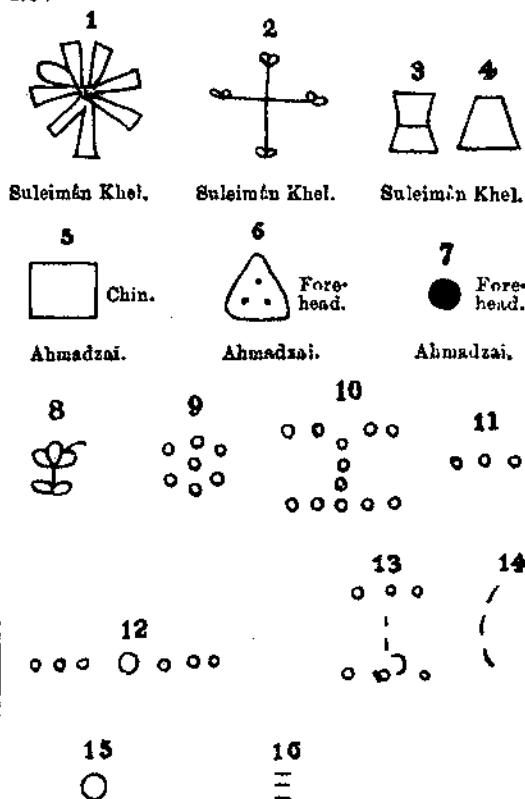

While I was drawing the specimens on paper the Ghilzais, men and women, were astonished at the resemblance of the copy to the original and were amused at my interesting myself in the matter. They asked me the object of the inquiry, and I explained to them that efforts were being made to trace how far forms of tattooing adopted by people scattered over the surface of different countries resembled each other, and to what extent the aims and the origin of this practice were common to different tribes. But they did not seem to realise the importance of the affinity of races, and thought that I was wasting their time as well as mine.

I also noticed that although black or grey was the favorite colour with the Ghilzais, the women of the family I visited wore clothing of a red colour — a colour assigned to Hindûs on the Frontier.

I was also told that tattooing was also considered good for curing pain in the joints. One of the Ghilzais showed me a dot on the left wrist and a circle of dots on the right knee cut into the flesh to rid him of trouble in the parts affected, but most likely the cure was due to faith rather than to the treatment.

Other forms of tattooing stated to be in vogue by some of the Ghilzais passing

through Ibrahim-zai on their way home are : —

NOTE.

By H. A. Rose.

The fact that tattooing is prohibited in the *Qordn* makes its survival among the Ghilzais, who are, as far as I am aware, orthodox Sunni Muhammadans, of some interest. As strict Musalmâns, the Sayyid sects, it will be observed, do not practise tattooing. The pictures do not appear to be those commonly used in the Panjâb (*ante*, Vol. XXXI. pp. 293 *et seqq.*), though No. 2 of the Suleimân Khel is like the world-sign figured on p. 294 in the left-hand bottom corner of the drawing above quoted.

The Ghilzais are a peculiarly interesting race. Though now Pathâns or Afghâns, they claim to be descended from Bibi Mâto, the daughter of Shekh Bait (Qais-i-Abdu'r-Rashid), by her paramour (and subsequently husband) Shâh Hussain, a Shansâbâni Tâjik of Ghor, so that they are half Afghân and half Tâjik by origin.

I take this opportunity of correcting an error in the article referred to above. The note on female tattooing on pp. 297-8 was by Mr. Gupta, except the last 5 lines on p. 298.

EPIGRAPHICAL NOTES.

BY H. LÜDEES, PH.D.; ROSTOCK.

(Continued from p. 109.)

No. 24. — Mathurā stone-slab inscription of the time of svāmin mahākshatrapa Sôḍāsa; edited by Dowson, *Journ. Roy. As. Soc. New Ser.* Vol. V. p. 188, No. 29, and Plate; and by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 80, No. 1, and Plate.

Dowson read this inscription :—

... svāmīsyā mahā-kshatrapasya Śāudāsasya Gajavarena Brahmanena Sangrava-sagotrēna.
... rani. Imā jāyamada pushkaranainām paschimā pushkaranīm udapāno āramo stambhah.

Cunningham differs from Dowson only in reading *Saudāsasya*, *Brāhmanena Segrava Sagotrena*, and *Ima kshāyamada pushkaranainām paschima*.

Fortunately the two facsimiles⁷⁹ allow us to improve these transcripts to some extent, and to add the third line entirely left out by the two editors. The facsimiles read as follows :—

1 ... svāmīsyā mahākshatrapasya Sôḍāsasya ... ja Virēṇa brāhmaṇēna Sēgrava-sagôtrēṇa ...
2 ... raṇi imā shāyamada pushkaraṇīm paschimā pushkaraṇi udapāno āramo stambha i ...
3 ... bilāpaṭṭā cha |

The slab is damaged on both sides, and it is impossible to say how much of the text may be lost on either side. The name of the *mahākshatrapa* was read correctly already by Bühler, who also proposed to restore the ... ja after the name to *raṇi*, 'during the reign.'⁸⁰ The reading *Sēgrava* is quite distinct in both facsimiles, but I am unable to point out a *gôtra* of that name in Brahmanical literature. Nor can I offer any explanation of the term *shāyamada*, provided that it be not the name of the tanks. In the last line *bilāpaṭṭā* certainly is a mistake for *śilāpaṭṭā*. The erection of *śilāpaṭṭas* is recorded also in the Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 390, No. 18, and *Actes du Congrès des Orientalistes à Leide*, Part III. p. 143.⁸¹

The fragment is to be translated :—

"During the reign of svāmi (svāmin) mahākshatrapa Sôḍāsa, the following (*things*), the hindmost tank of the *shāyamada* (?) tanks, a reservoir, a grove, a pillar, and stone-slabs (*were dedicated*) by the brāhmaṇa Virā, who belonged to the Sēgrava *gôtra*."

No. 25. — Mathurā image inscription of the time of mahārājātirāja Kanishka; edited by Cunningham, *Arch. Surv. Rep.* Vol. III. p. 81, No. 5, and Plate.

This inscription is so much obliterated that it is impossible to make out any continuous sense. Cunningham transcribed it :—

1 ghoshaka parahasālika vairakasapāta vataḥ
2 (ma)hārājātirājasya Kanishkasya Samvatsa(re)

The facsimile is rather in favour of the following reading :—

1 . . . gitagē . . . lōtūsamē . . . ghēshakaparahasālōkavikkakasapētavatuḥ radatu . .
2 [ma]h[ā]rājātir[ā]jasya Kanishkasya samvatsa[rē]

⁷⁹ Dowson's facsimile seems to be the better of the two.

⁸⁰ *Vienna Or. Journ.* Vol. V. p. 177.

⁸¹ Perhaps *śilāpaṭṭā* is here the nom. sing. of a feminine noun; compare the last-mentioned inscription and *Ep. Ind.* Vol. I. p. 397, No. 35, where the same ambiguity exists with respect to *śilāpaṭṭā* and *śyāgapaṭṭā*.

As long as no trustworthy reproduction of the inscription is obtainable, I consider it rather hopeless to attempt any restoration of the first line. But I wish to draw attention to another point. In the *Journ. Beng. As. Soc.* Vol. XXXIX, Part I. p. 129, No. 16, Rajendralala Mitra has brought to notice a Mathurā inscription engraved on the pedestal of a seated figure and consisting of two lines, the first of which is said to be illegible, while in the second he reads the words *mahārājasya rajādīrajasya Dēvaputrasya Vasu . . .* The last two syllables he wants to restore to *Vāsudēvasya*. A look at the facsimile added to the Babu's paper, however, reveals a 'curious fact'. The first line of his inscription is exactly the same as the first line of Cunningham's inscription No. 5 given above, while in the second line the facsimile indeed agrees with the transcript. The identity of the first lines makes it quite sure, of course, that the two facsimiles are meant to reproduce the same original, and we are therefore forced to decide the question which of the two deserves the greater credit. I do not hesitate for a moment to declare myself in favour of Cunningham's facsimile. Rajendralala Mitra tells⁵² us that his facsimiles 'are taken from General Cunningham's transcripts, with such corrections and emendations as a careful examination of the original and comparison with Mr. Bayley's transcripts would warrant, leaving all doubtful letters as they were read by the General.' How little these words are in accordance with the facts, has been shown long ago by General Cunningham himself.⁵³ The total want of care and criticism displayed by Rajendralala Mitra here, as in every other work of his pen, fully justifies my opinion that in this inscription also the reference to Vāsudēva is nothing but a product of his own imagination.

No. 26. — Mathurā Buddhist stone inscription;

edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX, Part I. p. 129, No. 14, and Plate;
and by Dowson, *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 183, No. 3, and Plate.

This inscription originally ran round the margin of an oblong slab, but when the stone was utilised for a new purpose, the edges on the two smaller sides of the slab were cut away together with a portion of the inscription. Dowson has recognised 'the initial letters of the word *Samvatsara* (year), the word *divase*, followed by the numeral 10, and the words *asya purvaye, dānam bhikshusya buddha sarvasa*;' Rajendralala Mitra's transcript is more complete, but his readings are for the most part wrong. I read the inscription from Dowson's facsimile:—

- 1 Sam diva-
- 2 sē 10 asyā pūrvayē dānam bhikshusya Buddhanandi[s]ya . . .
- 3
- 4 sarvasatv[ā]n[ām] suk[ā]r[tha]m[ā] bhavatu.⁵⁴

The year, the tenth day, on that (*date specified as*) above, the gift of the monk Buddhanandi (*Buddhanandin*) May it be for the . . . welfare of all beings."

No. 27. — Mathurā Jaina tablet inscription;

edited by Bühler, *Ep. Ind.* Vol. I. p. 397, No. 35.

Bühler transcribed this inscription:—

- 1 [Tā] rusanāndikasa putrēna Nāndighōshēna [Tē]vapikēna a ta . .
alē
- 2 pūnam bhamdirē [ā]yāgapatā pratithāpit[ā]

The photo-lithograph enables us to make a few corrections. Instead of *Nāndikasa* and *Nāndighōshēna* in line 1 and *pūnam* in line 2 the plate distinctly shows *Nāndikasa, Nāndighōshēna*, and *pūnam*. With the first two words compare such spellings as *āntērāsisa* in *Ep. Ind.* Vol. II. p. 198, No. 1, and *āntērāsiniyē*, *ibid.* p. 199, No. 4. *Tēvapika* was considered by Bühler to be a derivative

⁵² *Loc. cit.* p. 129.

⁵³ *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 194.

⁵⁴ There are two aksharas before *sarvasa*² and two before *sukhārtham* which I cannot make out.

from the name of a nation or country called *Trivarṇa* or *Trivarna*. From the mentioning of a *Tēvaṇṣputra* in the Pabbhāsā inscription No. 2⁶⁶ I think it highly probable that there really once existed a country of that name, but I cannot admit that there is any allusion to it in the present inscription. The reading of the plate is unmistakably *sōvaṇikēna*, corresponding to Sk. *sauvaṇikēna*. The synonym *hāiranyaka* is found, e. g., in the Mathurā inscription, *Ep. Ind.* Vol. II. p. 205, No. 23. A difficult term is the word which Bühler transcribes as *bhāṇḍirē*. A comparison of the second *akṣara* with the *di* in *Nāṇḍikasa* and *Nāṇḍighōshēna* will show at once that Bühler's reading cannot be upheld. The correct reading is *bhāṇḍirē*, but whether this means 'at the *bhāṇḍira* tree,' or possibly stands for Sk. *bhāṇḍārē*, 'at the storehouse,' I do not venture to decide at present. I read and translate the whole text as follows:—

1 rusa⁶⁶ Nāṇḍikasa putrēna Nāṇḍighōshēna sōvaṇikēna a ta .
alē

2 nānām bhāṇḍirē āyāgapatā pratihāpitā pita⁶⁷

"By the goldsmith Nāṇḍighōsha (*Nandighōsha*), the son of the Nāṇḍika (*Nandika*), tablets of homage⁶⁸ were set up at the *bhāṇḍira* of the"

No. 28.—Mathurā stone inscription;

edited by Growse, *Ind. Ant.* Vol. VI. p. 218, No. 4, and Plate.

Of this inscription, which is engraved on a slab found at the Kaṅkālī Tila, Mr. Growse published a tolerably good reproduction, but his reading is confined to a single word which he inaccurately transcribed as *Mugali-putas*. Unfortunately the left portion of the stone, which contained the beginning of the inscription, is lost. The characters are of the archaic type, and the language is not the usual mixed dialect of the Mathurā inscriptions, but pure Prakrit. My reading is as follows:—

1 yē Mogaliputasa Pūphakasa bhayāyē

2 Asāyē pasādō.

"The gift of Asā (*Asvā*?), the wife of Pūphaka (*Pushpaka*), the son of Mogalī (*a Maudgali mother*)"

My rendering of the last word calls for a few remarks. At first sight, one might feel inclined to alter *pasādō* into *pāsādō* and to translate, with an implicit understanding of some word like *dānam* or *patihāpitō* or *kāritō*: 'a temple, (the gift of, or erected or caused to be built) by Asā, the wife of Pūphaka.' But I think, that such an alteration is unnecessary, and that we may rest satisfied with the text as it stands. It is well known that in classical Sanskrit *prasāda* is used in the sense of 'present,' especially in the very common term *prasādīkarōti*; the *Sabḍakalpadrūma* gives it the special meaning of *dēva-nivēdita-dravyam*.⁶⁹ We are justified, therefore, to take also the *pasādō* of the inscription as a synonym of the more usual *dānam*. In this case the object of the donation would be the slab which bears the inscription, and which probably was a so-called *āyāgapatā*.

About the name of Asā's husband I feel not quite sure. The second syllable may possibly be read *pha*.

Although this inscription is not dated, it may be safely assigned to the period before Kaṁishka on the strength of its language and characters, and from the fact that it comes from the Kaṅkālī Tila it may be further inferred that it is a Jaina record. Why Mogaliputa should be a distinctly Buddhist appellation, as Mr. Growse thinks, I am unable to see.

⁶⁶ *Ep. Ind.* Vol. II. p. 243.

⁶⁷ I am unable to make out any of the *akṣaras* before *rusa*, but I believe that the word ending in *rusa* was the genitive of a stem in *u*, qualifying *Nāṇḍikasa*.

⁶⁸ These two *akṣaras* are pretty clear in the photo-lithograph.

⁶⁹ Possibly, however, *āyāgapatā* is the nom. sing. of a feminine noun; compare the remarks, above, p. 149, note 81.

⁷⁰ See the *Petersb. Dict.* where numerous examples are quoted.

No. 29. — Mathurā Buddhist rail inscription ;
edited by Growse, *Ind. Ant.* Vol. VI. p. 219, No. 6, and Plate.

Of this archaic-looking inscription, which is between two bas-reliefs on a broken Buddhist rail from the Chaubāra mounds, Mr. Growse deciphered only the last word *dānaṁ*. I tentatively read the whole : —

Abhyañtirōpa ayakasa Kaṭhikasa dānaṁ.

Below the first sign of *ayakasa* there is a circle, which, at first sight, makes the word look like *śṭhayakasa*, but a closer examination and comparison of the upper sign with the *sa* of *Kaṭhikasa* will show that it cannot be *sa*. The circle therefore seems to be accidental or to form part of the sculpture below.⁹⁰ As to the meaning of the inscription, I own that I can make nothing of the first word. The rest may be translated by 'the gift of the venerable⁹¹ Kaṭhika.'

No. 30. — Mathurā Jaina inscription on sculptured slab ;
edited by Bhagvanlal Indraji, *Actes du Sixième Congrès International des Orientalistes*
à Leide, Part. III. p. 148, and Plate.

This inscription was read and translated by the Pandit as follows : —

- 1 Namō arahatō Vadhamānasa Dāmdāyē gaṇikā-
- 2 yē lēṇasābhikāyē dhitu śamaṇasa nikāyē
- 3 Nādāyē gaṇikāyē vāsāyē ārahatādēvakulā
- 4 āyagasabhāprapāsīlāpaṭā pratisthāpitam nigamā-
- 5 nā arahatāyatanē saha mātārē bhaginiyē dhitarē putrēṇa
- 6 savina cha pariṇauṇa arahatapujāyē.

"Salutation to the Arhant Vardhamāna. The courtesan Nandā, daughter of the courtesan Daṇḍā, built in the Ārhat temple of merchants for the residence of the assemblage of Śramaṇas and for the worship of Arhant a small Ārhat temple, seats for *ācāryas*, a reservoir and a slab of stone, with (the merit of the building to be enjoyed with) mother, sister, daughter, son and all relations."

The anomaly of the construction in the first portion of this sentence apparently did not escape the attention of the Pandit, who remarks that the syntax of the record is not smooth, and adds in a note : 'The original has *nikāyē*, but unless it be read *nikāyasa*, the inscription does not make good sense.' However, such an alteration seems to me very bold, without removing the difficulties. If the genitive *nikāyasa* were dependent on *vāsāyē*, the insertion of the words *Nādāyē gaṇikāyē* between *nikāyasa* and *vāsāyē* would be quite unaccountable, their proper place, of course, being after *dhitu*. Secondly, it is true that in Sanskrit and Prakrit the singular of a noun is often employed to denote the *jāti* even in cases where the plural would be required by the usage of other languages, but I doubt that a singular of this kind could ever be used in connection with a collective noun, such as *nikāya*. Considering all these difficulties, I feel quite sure that the Pandit has misread the passage, and that the correct reading is *śamaṇasāvīkayē*, corresponding to Sk. *śramaṇasāvrīkayā*, 'by the lay-pupil of the ascetics.' Precisely the same term occurs in two other Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 390, No. 17 (*śramaṇasāvrīkayē*) and Vol. II. p. 199, No. 2 (*śama[na*]sāvīkayē*), while in a third inscription, *ibid.* Vol. I. p. 395, No. 28, the shorter expression *śrāvīkā* is used. That *sāvīkā* should appear here with the dental *s* by the side of *śamaṇa* with the palatal sibilant, will not be surprising to anybody familiar with the total want of regularity in the spelling of the Mathurā inscriptions. An exact parallel is offered by the inscription, *Ep. Ind.* Vol. I. p. 396, No. 30, where we find *savakasya* = Sk. *śrāvakaśya* by the side of *śisasya* = Sk. *śiṣyaśya*. The correctness of my reading is partly confirmed also by the drawing accompanying the Pandit's edition, for although the fifth *akṣara* looks more like *ni* than like *ri*, the fourth *akṣara* is distinctly *sā*, not *sa*.

⁹⁰ A second circle appears to stand below the ya.

⁹¹ *Ayakasa* = Sanskrit *āryakasya*.

After what has been said above, it will be obvious, I think, that *vāsāyē* cannot possibly mean 'for the residence.' I take it to be an inaccurate spelling for *Vāśāyē* and look upon it as a surname of the donatrix standing in apposition to *Nāḍāyē gaṇikāyē* just as *Lēṇasāśbhikāyē* stands in apposition to *Daṇḍāyē gaṇikāyē*.

Also with regard to the following words I differ from the Pandit's interpretation. I have pointed out already above, p. 102, that instead of *ārahatāddēvakulē* the drawing has *ārahatā dēvikulā*, and that this is a nom. sing. corresponding to Sk. *ārhatasā dēvakulam*.⁵² With the feminine *dēvikulā* compare the term *dēvakulikā* frequently found in the meaning of 'shrine' in later Jaina inscriptions.⁵³ As to *āyagasabhā*, which the Pandit renders by *āyagasabhā* in Sanskrit and by 'seats for *āchāryas*' in English, I am inclined to adopt Bühler's view,⁵⁴ who thought the first member of the compound to be possibly identical with *dyāga* occurring several times in the term *dyāgapāṭa* in the Jaina inscriptions at Mathurā.⁵⁵ As *dyāgapāṭa* means 'a tablet of homage,' a slab put up in honour of the Arhats, *dy[ā]gasabhā* also would be an appropriate term for some hall erected in honour of the Arhats. The *dyāgapāṭas* themselves are mentioned here in the list of gifts under the name of *śilāpāṭa*.⁵⁶

The drawing again suggests some minor corrections. In line 1 it reads *ārahatō Vadhamānasa*; compare *ārahatō Mahāvīrasya*, *Vienna Or. Journ.* Vol. X. p. 172; *ārhatō Parivārya*, *Ep. Ind.* Vol. II. p. 207, No. 29; *ārahantapujāyē*, *ibid.* No. 30, and, according to the photo-lithograph, also *ārakantapratimā*, *ibid.* p. 203, No. 16. In line 4 the drawing shows *patisthāpitam*, and in line 5 *sa[h]ā*, which form is found also above, p. 39, No. 9; *Ep. Ind.* Vol. II. p. 199, No. 2; p. 201, No. 11; *Journ. As. S.* VIII. Vol. XV. p. 119, &c.

With these emendations the text reads:—

- 1 Namō ārahatō Vadhamānasa Daṇḍāyē gaṇikā-
- 2 yē Lēṇasāśbhikāyē dhita śamanassāvikāyē
- 3 Nāḍāyē gaṇikāyē Vāśāyē ārahatā dēvikulā
- 4 āyagasabhā prapā śilāpāṭā patisthāpitam⁵⁷ nigamā-
- 5 nā arahatāyatanē sa[h]ā mātārē bhaginiyē dhitarē putrēṇa
- 6 savina cha parijauṇa arahatapujāyē.

"Adoration to the Arhat Vadhamāna (*Vardhamāna*)! By the lay-pupil of the ascetica, the courtesan Nāḍā, the Vāśā, the daughter of the courtesan Daṇḍā, the Lēṇasāśbhikā (or the adorer of caves), a shrine for the Arhats, a hall of homage, a reservoir, and stone-slabs⁵⁸ were set up in the Arhat temple of the merchants, together with her mother, her sister, her daughter, her son, and all her retinue, for the worship of the Arhats."

No. 31. — Mathurā Jaina inscription on sculptured tōraṇa;
edited by Bühler, *Ep. Ind.* Vol. I. p. 390, No. 17, and Plate.

At the end of the second line of this inscription Bühler read *prati[śhāpī]*. The photo-lithograph, however, has very distinctly *pratiśā[pi]*, which is to be restored to *pratiśāpitam*. This is not the only instance in the Mathurā inscriptions of the occurrence of the dental sibilant in combination with a lingual mute. I have already pointed out above, p. 105, that in the inscription, *Ep. Ind.* Vol. II. p. 203, No. 18, we have to read *Śāṇikīyātō* instead of *Sihānikīyātō* as transcribed by Bühler, and in another inscription edited above, No. 30, we find *patisthāpitam*.⁵⁹

⁵² The Pandit translated it by *ārhatō dēvakulē* in his Sanskrit version and by 'a small Arhat temple' in English, so that it is impossible to say what he really meant.

⁵³ See, e. g., the Satruṇjaya inscriptions, *Ep. Ind.* Vol. II. p. 48 ff., Nos. 4, 6, 7, 8, 9, &c.

⁵⁴ *Ep. Ind.* Vol. II. p. 814, note 7.

⁵⁵ *Ep. Ind.* Vol. I. p. 396, No. 33 (*dyāgapāṭa*); p. 397, No. 35; Vol. II. p. 200, Nos. 5 and 8; p. 207, Nos. 30 (*dyāgapāṭa*) and 32.

⁵⁶ Perhaps *śilāpāṭa* is the nom. sg. of a feminine noun; comp. the remarks above, p. 149, note 81.

⁵⁷ Read *patisthāpitā*.

⁵⁸ Or, possibly, 'a stone-slab.'
⁵⁹ Compare also the forms quoted from the Girnār Aśoka edicts, above, p. 105, note 45.

In the third line Bühler twice read *saḥa*, whereas the photograph leaves no doubt that in both cases the correct reading is *saḥā*. This spelling of the word is not uncommon in the Mathurā inscriptions; see above, p. 153.

No. 32. — Mathurā Jaina image inscription;
edited by Bühler, *Ep. Ind.* Vol. I. p. 389, No. 15, and Plate.

This inscription is only a short fragment transcribed by Bühler as:—

... śē āta[syām] pūrvāyām Koṭṭiyātō gaṇātō ...

The reading *śē* is badly warranted by the photo-lithograph, the *ē*-stroke and the cross-bar of the *mātrikā* being hardly discernible, while the right down-stroke of the *mātrikā* is much longer than it ought to be. In a note Bühler adds that *śē* must be the remnant of either *vinśē* or *trinśē*, but this again is not supported by the photo-lithograph. What is still visible of the sign preceding the supposed *śē* cannot possibly have formed part of either *vi* or *tri*, but looks exactly like the right half of the figure 10. In that case the next sign also must be a figure, and I think, there can be little doubt that it is 7; compare this figure in the Mathurā inscriptions, *Ep. Ind.* Vol. I. p. 383, No. 4; p. 387, No. 10; p. 391, No. 19; p. 396, No. 30, and especially p. 391, No. 20. I therefore read the fragment:—

... 10 7 āta[syām] pūrvāyām Koṭṭiyātō gaṇātō ...

and take the 17 to be the number of the day.

No. 33. — Mathurā Jaina image inscription;
edited by Growse, *Ind. Ant.* Vol. VI. p. 219, No. 8, and Plate.

According to Rajendralala Mitra, on whose authority Mr. Growse relied, this short fragment reads:—

Siddhajivikasya datta-bhikshusya vihārasya

and means: "Of the monastery of Dattabhikshu, who had accomplished the object of existence." The real purport of the record has been recognised long ago by Bühler, who referred to it, *Ep. Ind.* Vol. I. p. 383, note 60, but his transcript is not quite accurate. The inscription reads:—

Siddha[m] || Vāchakasya Dattaśiṣhyasya Siḥasya ni ...

The last word is to be restored to *nivartana*, and the meaning of the words is: "Success! At the request of the preacher Siḥa (*Simha*), the pupil of Datta." Bühler has already noticed that this Siḥa is mentioned again as the spiritual adviser of a lay-woman in a Mathurā inscription probably dated in Sam. 20 (*Ep. Ind.* Vol. I. p. 383, No. 4). The present inscription therefore is to be referred to about the same time.

Nos. 34, 35, and 36. — Mathurā pillar inscriptions;
edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I.
p. 128, Nos. 5^a, 5^b, 6, and Plate; and by Dowson, *Journ. Roy. As. Soc.*
New Ser. Vol. V. p. 186, Nos. 12 and 13.

The first and second of these inscriptions are on the base and plinth of a pillar, and the third is on the base of another pillar. If any trust can be put in Rajendralala Mitra's facsimiles, they are, for palaeographical reasons, to be placed in the time of the Kushana rule at Mathurā. As Rajendralala Mitra's and Dowson's transcripts differ in many respects, and the facsimiles are very poor, all that can be said is that the first inscription refers to the son of a certain Vasumihira, while the second and third mention a person who was the son of Simha, and whose own name ended in *-mihira* and probably was Vasumihira as given by Dowson. At the end of the second inscription Rajendralala Mitra read *mēna dēvīdharmāya ri trīnē*, Dowson *imenu devīddharma parityā*, and at the end of the third Rajendralala Mitra *dharmabhikshuda*, Dowson *deva dharma pu*. There cannot be the slightest doubt that in both cases the correct reading is *imēna dēyadharmā-parityāgēna*, and that these words are to be completed in analogy to a phrase used in another Buddhist inscription from Mathurā:

*anēna dēyadharmma-parityāgēna sarvśśhaṁ prañāṭikānaṁ ārōgyadakhīṇāyē bhavatu.*¹⁰⁰ The facsimile, as far as it goes, conforms with the reading suggested.

Nos. 37, 38, and 39. — Mathurā Buddhist inscriptions on bases of pillars;

edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I.

p. 128, Nos. 8 and 9, and Plate; and by Dowson, *Journ. Roy. As. Soc.*

New Ser. Vol. V. pp. 186, 187, Nos. 15, 16, and 21.

Of these three inscriptions only the beginnings seem to be legible. Dowson's No. 21 is transcribed by him as *dānam Sangha-sihavirasya Bhadatta*, which, of course, is to be corrected to *dānam saṅgha-sihavirasya bhadanta* . . . , "The gift of the elder of the congregation, the venerable . . ."

Dowson's No. 16 corresponds to Rajendralala Mitra's No. 9. According to the former it reads *dānam Sanghapravirasya pu* . . . , while Rajendralala Mitra renders it by *danam Sanghapravirasya*¹ . . . I have no doubt that here again the correct reading is *dānam saṅgha-sihavirasya*² . . . , and that the *pra* in the facsimile results from leaving out the small curve to the left of the *sa* and not closing the circle and omitting the dot of the *tha*.

Very little has been left of the third inscription. Dowson (No. 15) reads *dānam Sangha* . . . , Rajendralala Mitra (No. 8) *dānam Sagha*³ *putra*, but *putra* is not warranted by the facsimile, and I think it highly probable that this inscription also began with the words *dānam saṅgha-sihavirasya*.

Owing to the paucity of the distinct *aksharas* and the miserable condition of the facsimiles, it is difficult to pronounce a judgment on the characters of the inscriptions, but it seems that they are of the Kushana type.

No. 40. — Mathurā Buddhist inscription on base of pillar;

edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I. p. 130, No. 19, and Plate.

Rajendralala Mitra read this fragment: *dānam bhikshusya Buddhabhīmasya mabhikshusya* . . . , but there exists neither such a name as *Buddhabhīma* nor such a designation as *mabhikshu*, 'the unworthy *bhikshu*.' From the facsimile it appears that the inscription commenced :—

d[ā]na[m] bhikshusya Buddha[ra]k[sh]itasya cha bh[i]kshusya Saṅgha

The monk *Buddharakshita* mentioned here is undoubtedly identical with the person of the same name and title referred to as the donor of pillars in two other fragments from Mathurā, the first⁴ of which begins like the present one: *dānam bhikshusya Buddharakshitasya*⁵ *cha*⁶ *bhikshusya* . . . , while the second⁷ reads: *dānam bhikshusya*⁸ *Buddharakshitasya Sakyabhikshusya Sa* The characters of the three inscriptions are of the Kushana type.

No. 41. — Mathurā Buddhist image inscription;

edited by Growse, *Ind. Ant.* Vol. VI. p. 219, No. 7, and Plate.

This inscription is engraved on the base of a seated Buddha, and is much worn, because the stone has long been used by the *dhōbis* as a washing-stone. Mr. Growse read the words *daya-*

¹⁰⁰ *Journ. Bo. Br. Roy. As. Soc.* Vol. XX. p. 269, note 2. Mr. Bhandarkar reads *parityāgēna* and *sarvśśhaṁ*, but the long *i* in the former word is just as distinct as in *Suriyasya* and *prañāṭikānaṁ*, and though the reading *sarvśśhaṁ* perhaps is not impossible, I should prefer *sarvśśhaṁ* which is in accordance with the spellings *bhikshunam* and *prañāṭikānaṁ*. The words *anēna dēyadharmma-parityāgēna* are found also in the Mathurā Buddhist pillar inscription, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I. p. 130, No. 20, where Rajendralala Mitra reads . . . *dēya-dharmma parata śatata*.

¹ Or, properly, *Saṁdha*, which, however, is a misprint.

² The facsimile distinctly has *saṅgha*, not *saṅgha*.

³ Properly *Sadha*.

⁴ Rajendralala Mitra, *ibid.* p. 128, No. 10, and Plate; Dowson, *Journ. Roy. As. Soc.* New Ser. Vol. V. p. 187, No. 17.

⁵ According to the facsimile the reading is perhaps *bhikshusya Buddharakshitasya*.

⁶ This is Dowson's reading, which certainly is correct, though the facsimile has *ma*.

⁷ Rajendralala Mitra, *ibid.* No. 7; Dowson, *ibid.* p. 186, No. 14.

⁸ Here also the facsimile seems to read *bhikshusya*.

dharma and *Buddha* in the first line, and *sarva* and again *Buddha* at the end of the second. A few more syllables can be made out with the help of the photo-lithograph, though a deciphering of the whole seems to be out of the question. I read:—

- 1 Dēyadharmō-yam Sa kutum[bi]nyā Buddha va[śri]yāyā
- 2 dā(?)va [sa]rva-satvānā[m] Buddha-
tvāya !

To judge from these fragments, the inscription appears to have been entirely in Sanskrit and to have recorded the gift of a Buddhist lay-woman. From the analogy of numerous similar Buddhist inscriptions the last sentence may be restored with tolerable certainty: [*yad=atra puṇyam tad= bhavatu sa[rva]-satvānā[m] Buddhātvāya*; 'whatever religious merit (*there is*) in this (*act*), let it be for (*the attainment of*) the condition of a Buddha by all sentient beings.' The few traces of letters which are still visible on the plate, would conform to this reading. The alphabet is of a later type than that used in the majority of the Mathurā inscriptions. The characters closely resemble those found in a Buddhist image inscription from Mathurā dated in 135,⁹ which date by common consent is referred to the Gupta era; compare especially the *ma*.¹⁰ In my opinion the present inscription must belong to approximately the same time.

Nos. 42, 43, and 44. — Mathurā Buddhist inscriptions on the pedestals of statues;
edited by Rajendralala Mitra, *Journ. Beng. As. Soc.* Vol. XXXIX. Part I. pp. 128, 129,
Nos. 11 and 12, and Plate; and by Dowson, *Journ. Roy. As. Soc.* New Ser.
Vol. V. pp. 187, 188, Nos. 18, 19, and 24, and Plate.

The general purport of these three inscriptions, all of which are in pure Sanskrit, has been recognised by the two editors, but with the help of the facsimiles and in analogy to the dedicatory phrases of similar inscriptions their transcripts can be considerably corrected. I read and translate these inscriptions as follows:—

Dowson, No. 24:

- 1 Dēyadharmō-yam Sākyabhikṣhōḥ Saṃgharakahi-
- 2 tasya [n*] Yad=atra puṇya[m] tat=sarva-[sa]t[t*]v[ānā]m [n*]

"This (*is*) the votive offering of the Sākya mendicant Saṃgharakṣita. Whatever religious merit (*there is*) in this (*act*), it (*belongs*) to all sentient beings."

Rajendralala Mitra, No. 12; Dowson, No. 19:—

- 1 Dēyadharmō-yam Sākyabhikṣhōḥ-Dharmadāsasya [n*] Ya-
- 2 d=atra puṇya[m] ta]n-mātā-[pi]trō[ḥ] sarva-sat[t*]vānā[m] cha [n*]

"This (*is*) the votive offering of the Sākya mendicant Dharmadāsa. Whatever religious merit (*there is*) in this (*act*), it (*belongs*) to (*his*) parents and all sentient beings."

Rajendralala Mitra, No. 11; Dowson, No. 18:—

- Dēyadharmō-yam Sākyabhikṣhōḥ-bhādanta-Brahmasōmasya [n*] Yad=atra puṇyam
- tad=bbhavatu sarva-sat[t*]vānām anuttara-jñān-āptayē ||

"This (*is*) the votive offering of the Sākya mendicant, the venerable Brahmasōma. Whatever religious merit (*there is*) in this (*act*), let it be for the attainment of supreme knowledge by all sentient beings."

The form of the letters, especially of the *ma* and *na*, point to the period of the Gupta rule at Mathurā as the time of the engraving of these inscriptions.

⁹ Gupta Inscriptions, Corp. Inser. Ind. Vol. III., p. 263, No. 63.

¹⁰ I admit, however, that a similar *ma*, by the side of an older *ma*, is found already in a Mathurā inscription dated in Sam. 33 of mahārāja Dēvaputra Huvishka; see above, p. 39, No. 9.

SOME ANGLO-INDIAN TERMS FROM A XVIITH CENTURY MS.

BY SIR RICHARD C. TEMPLE, BART.

(Continued from p. 89.)

LONGCLOTH.

Fol. 31. Very Considerable quantities of these followinge Commodities are here [Pettipolee] wrought and Sold to fforaiga Merchants vizt Longcloth.

Fol. 134. The most Proper and beneficiall Commodities w^h are for this place [Janselone] : be blew Callicoee Vizt Longcloth.

Fol. 158. ffrom y^e Coast of India and Choromandell are brought hitber . . . Longcloth Salampore's, white and blew.

See Yule, *s. v.* Longcloth.

[*N. and E.* p. 17, for 6th May 1680 : — "8000 Pagodas in Long Cloth and Salampores for England." P. 24 for 19th June 1680 : — "Long cloth, ordinary ; Long Cloth, fine."]

LOONGHEES.

Fol. 31. Very Considerable quantities of these followinge Commodities are here [Pettipolee] wrought and Sold to fforaiga Merchants vizt Lungees.

Fol. 49. This part of y^e Countrey [Narsapore] affordeth plenty of Lungees.

Fol. 91. The Gurias . . . are very poore, weare noe better habit then a Lungee, or a white cloth made fast about theire waste.

Fol. 172. w^h a Sharpe Knife cutteth a hole in his drawers or lungee.

See Yule, *s. v.* Loonghee. [This word is worth pursuing much further. In Burma it is now a woman's petticoat, as well as man's dress. In the Army it means a *turban* : "50 Blue Lungis a/c Rs. 2-4-0 each : Rs. 112-8-0" — in a bill of the Port Blair Military Police for 30th Sept. 1900.]

LUPPOONE.

Fol. 131. There are 3 Sea Ports Vpon this Island [Janselone] vizt Lупpoone.

Fol. 132. our answers are all written downe in the King's booke, as alsoe y^e Commander's name, and is Sent Vp to Lупpoone (y^e place of y^e Radja's Residence) Which is y^e Chiefe towne and in y^e very middle of y^e Jsland).

Fol. 133. When wee come Vp to Lупpoone, y^e King's Servants that are appointed to waite upon us carry us to a house y^e is indeed their temple of Jdols.

Fol. 135. Once when I was up att Lупpoone.

Not in Yule. [I have not been able to trace the place in modern maps.]

MACAO.

Fol. 144. A Portuguees Shipp bound from Goa to Macau In China.

See Yule, *s. v.* Macao.

MACASSAR.

Fol. 158. The Borneo and Macassar Prows, for y^e most part bringe Slaves both men, women, and Children.

See Yule, *s. v.* Macassar.

MACE.

Fol. 53. The Mase of Achin 5 fanams 20 cash or 0016. 016. 03½.

Fol. 152. (In Queda) 4 Copans is one mace : 16 mace is one Taile.

Fol. 158. Some Commodities from England : . . . most Especially good Spanish dollars Stamped [600] they passe Current at 5 masse p^r dollar Some times 5 : & $\frac{1}{2}$.

Fol. 173. and if he wanted a mace or two at any time he wold Supply his wants.

See Yule, *s. v.* Mace. See *ante*, Vol. XXVII. p. 37 ff.

MADAPOLLAM.

Fol. 47. The English East India Company have a Very good ffactory [at Narsapore] called Madapollum from y^e name of y^e Villadge adjoyninge to it.

See Yule, *s. v.* Madapollam. [This quotation is valuable.]

MALABAR.

Fol. 157. Many Ships and Vessels doe att all Seasons of the yeare arrive in this Port from Severall places, namely Suratt : Malabar Coast or Coast of India : ffort S^t Georg's : . . .

See Yule, *s. v.* Malabar. [This quotation is very valuable.]

MALABAR.

Fol. 8. The Natiue inhabitants are for y^e most part . . . and Mallabars, many of w^{ch} live within y^e Outermost walls of this place called ffort S^t Georg's.

Fol. 23. A poor Sort of heathens call'd Mallabars . . . for y^e most part of a very black colour not Vnlike in that to y^e Ethiopians, but much comlier.

Fol. 26. The Mallabars . . . doth much very both in Customes of Idolatry Language and what else, . . . besides they are a more dull headed people, few of them ingenious in any art whatever, vizt. : y^e Mallabars that reside Vpon this [Cheromandel] Coast, but those Naturall Mallabars y^e inhabit Vpon y^e Mallabar Coast (commonly called y^e Coast of India) are a very briske, ingenious folke, but too bloody minded, . . . but of no gentile Occupations, neither are they admitted into y^e Society of y^e Banjans or Gentues.

See Yule, *s. v.* Malabar. [These quotations are valuable for the history of the term Malabar, as applied to the inhabitants of both the East and West Coasts of Southern India.]

MALACCA.

Fol. 144. but they (the portugueeses) did not longe remaine in Slavery before they tooke a fitt Opportunitie to make their Escape, in a Prow well fitted : they tooke her in y^e night & ranne away to Malacca a Dutck Garrison Vpon y^e South Side of this Coast.

See Yule, *s. v.* Malacca.

MALAY.

Fol. 131. but downe att y^e Sea Ports most of y^e Inhabitants are Malayars, a very roguish Sullen ill natured people . . . Villanies, when I my Selfe have knowne it to be y^e Malayars themselves that dwell here, namely in Banquala . . . have many cunninge places to hide themselves . . . (Vpon y^e Maine of y^e Malay Shore).

Fol. 138. Whereupon y^e Malay inhabitants (a Very resolute people) stood up for y^e Achiners . . . for y^e Malayars overpowred them.

Fol. 143. Queda : A Kingdome (soe called) Vpon y^e Malay Coast . . . as in Achin Johor &c: Malay Countries.

Fol. 152. Pattanee . . . lyinge on y^e East Side of this great Neck of Land called y^e Malay Coast.

Fol. 157. with infinite Numbers of Prows from y^e Malay Shore.

See Yule, *s. v.* Malay. [The quotations above given are useful as showing that the "Malay y^e Coast" extended on both East and West sides of the Malay Peninsula.]

MALDIVES.

Fol. 49. Cayre . . . y^e best Sort of w^h is brought from the **Maldiva Isles** . . . Cayre of y^e **Maldiva** grows Vpon a very brackish Soyle.

Fol. 77. y^e rest 6 or 7 yearly goe to y^e 12000: Islands called **Maldiva**.

Fol. 79. Hee found 5 Saile of Bengala Ships in y^e roade newly arrived from Ceylone and **Maldivae Ins^e**.

Fol. 86. Cowries . . . are Small Shells brought from y^e Islands of **Maldiva**.

Fol. 94. [Cowries] seldome rise or fall more then 2 Pone in one Rupee and y^e onely in Ballasore at y^e arrivall of the Ships from Ins: **Maldivae**.

Fol. 95. neare y^e mouth of y^e Ganges, vpon my returne of a Voyadge to y^e **Maldivae** I lost 3 men by theire [tygers] Salvagenesse.

See Yule, *s. v.* **Maldives**.

MANGO.

Fol. 29. y^e Groves consistinge of **Mangoe** and . . . The **Mangoe** is a very laire and pleasant fruite.

Fol. 69. [Cuttack] adorned with . . . delicate Groves of **Mango** . . .

Fol. 82. They (Portugals) make many Sorts of Sweetmeats viz: **Mangoe** . . . Several Sorts of Achar as **Mangoe**.

Fol. 150. They have Several Sorts of very good fruit in the Countrey [Queda] . . . **Mangoes**.

See Yule, *s. v.* **Mango**.

MANGOSTEEN.

Fol. 175. This Countrey [Achin] affordeth Several Excellent good fruites, Namely . . . **Mangastinos**.

See Yule, *s. v.* **Mangosteen**.

MANIKPATAM.

Fol. 56. beinge a Very Secure Coast to harbour in, namely in . . . **Manichapatam**.

Not in Yule. [On the Coromandel Coast.]

MANILLA.

Fol. 3. great Stores are transported and Vended into most places of note in India, Persia, Arabia, China, and y^e South Seas [Indian Archipelago], more Especialy to **Moneela** one of y^e **Molucca Isles**, belonginge to y^e Kinge of Spaine.

Not in Yule.

MANNISON.

Fol. 153. they carry hence . . . **Mannison** (a Sort of honey).

Not in Yule. [The Malay word is *manisan*.]

MARTABAN JAR.

Fol. 41. y^e Other terrified w^h feare did runne his head into a great **Mortavan Jarre**.

Fol. 93. wee had Several **Mortavan Iarres** on board.

Fol. 158. from Pegu . . . **Motavan Jarra**.

See Yule, *s. v.* **Martaban**. See also *ante*, Vol. XXII. p. 364.

MASULIPATAM.

Fol. 24. in my journey Anno Domⁱ: 1672 from Fort S^t Georg's toward **Metchlipatan** overland.

Fol. 35. **Metchlipatam** Soe called from y^e Hindostan ore Moors Language word Metchli signifieinge fish and patam or Patanam a towne, first giuen to it by reason of y^e Abundance of fish caught here for y^e Supply of many countrey Cities and inland towns, for y^e w^{ch} it Still doth retaine y^e Said name, but of late years much increased by Merchandize, soe that y^e fishing trade is Very inconsiderable and not at all followed, more then by y^e poore Mallabars or Gentues, whoe doe as yet in great plenty Supply this place and all y^e Ships that frequent y^e Roade.

Fol. 38. Our ffactory here [Metchlipatam] is but a Subordinate One to ffort S^t Georg's: As that of y^e Dutch is to Pullicat.

Fol. 49. **Metchlipatam** . . . beinge a great market place and indeed y^e Great Bazar of these parts, for above 100 miles in Circuit.

See Yule, *s. v.* Masulipatam. [The quotations are curious as exhibiting the false etymology of the name from "fish." See *ante*, Vol. XXX. pp. 354, 397 f., for some of the many forms this place-name has assumed.]

MATT.

Fol. 94. They alsoe Coyne Rupees here . . . called Gold Moors . . . beinge gold of y^e highest **Matt**.

See Yule, *s. v.* Matt. *Matt* meant the "touch of gold." *N. and E.* has (p. 17) a good quotation for 6th May 1680: — "The payment or receipt of Batta or Vatum upon the exchange of Pollicat for Madras Pagodas prohibited, both coines being of one and the same Matt and weight, upon pain of forfeiture of 24 Pagodas for every offence together with loss of the Batta." For *Batta*, see *ante*, Vol. XXIX. p. 340.]

MAUND.

Fol. 53. The Vsual Weights on this Coast [Choromandel] are . . . the Maund
A Maund Cont: 3 Veece 1/3: or 025 Idem [pounds].

Fol. 82. 6: 7: and sometimes 8 maund of rice for one Rupee [at Hugly].

Fol. 94. They weigh p^r y^e Maund . . . but theire weight in most places of accompt differ, although not in name yet in quantitie. The Ballasore Maund cont 75 pound weight. The Hugly Maund cont but 70 pound w^t. Cosumbazar maund cont but 68 pound w^t. Graine, butter, Oyle, or any liquid thinge all the Riuer of Hugly over allows but 68 p^r to y^e maund. The Maund bigg or little is Equally diuided into 40 Equall parts.

Fol. 98. Patellas, each of them will bringe downe 4: 5: 6000: Bengala maunds.

See Yule, *s. v.* Maund. [The quotations above are valuable for descriptions and weights of some of the old varieties of the *maund*.]

MECCA.

Fol. 51. y^e last queen Mother that deceased, whose Bones after 7 years interred, were taken Vp and Sent to Mecha, there againe interred in y^e Land of their Vngodlie Patron.

Not in Yule.

MEER RAJA.

Fol. 161. The Men in Office y^t (Vnder their Queene) governe this Kingdome (Achin) are Entitled as followeth: The Meer Raja: y^e Lord Treasurer.

Not in Yule. Compare Meer Moonahoe, also not in Yule.

MERCALL.

Fol. 53. Measures: . . . The Para cont [?] Markalla The Markall cont [?] [on the Choromandel Coast].

See Yule, *s. v.* Mercall. [It is a great pity that the text is incomplete here. The *Mercall* as a Madras measure of capacity varied a good deal.]

(To be continued.)

THE PHILOSOPHY OF THE KAUPĪNA PANCHAKA OF SRĪ SANKARĀCHĀRYA.

BY G. R. SUBRAMIAH PANTULU.

I. — Text.

*Vedānta vākyēshu sādā ramanthēh, bhikṣhāna mārēṇa chathuskti mantāh,
Visakamantāh karanōramantāh, kaupīnavantāh khalubhāgyavantāh.*

Sense.

Those that are earnestly occupied in examining the deeper recesses of the *Upanishads* are satisfied with begging. As they are not pestered in this mortal penfold, their minds are ever engaged with things nobler and extra-mundane. They are therefore completely free from all cares and inquietudes. Such unalloyed freedom has become the monopoly of these men and could not possibly be attained by those who are given up to the weaknesses of the flesh and the peculiar temptations of puberty.

Note.

The term *kaupina*, though in common parlance used to mean 'a piece of cloth which covers the genital organs,' is here used in the sense of a terrestrial being who understands the *ātman* thoroughly. Cf. the saying of the *Nirvāṇopaniṣad*: "*Uddāsīna kaupīnam*," and the saying of the *Gītā*: "*Brāhṇa bhōktum bhāikṣha nāpiha lōkai*."

II. — Text.

*Mālantharōh kēvala mārāyantāh, pāṇḍasyam bhōktu māntrāyantāh,
Briyanscha kantiāmiva kuthsāyantāh, kaupīnavantāh khalubhāgyavantāh.*

Sense.

They are rich, who, wholly void of desire of any sort or kind, follow the path of *nirādmirari*, care not for any temporal wealth and spread themselves up under the umbrageous branches of trees.

It is within everybody's experience that the sordid lust of self emanates from the imperious sensations of hunger and sex. And people who have risen 'far above the madding crowd's ignoble strife' cease to be enamoured of these brittle and transient joys, which the world can neither give nor take away.

Notes.

(1) Cf. *Mundakōpanishad*: "*Samāna vrikṣi puruṣhānimagnā antīyā lōchāṭi muhyamāṇāḥ
juskṭam yadāpasyathyanya mīṣa masya mahimāna mīṭhi vṛkṣa sokāḥ*."

(2) "Let none admire that riches grow in Hell,
That soil may most deserve the precious bane."—*Paradise Lost*, Book I.

(3) "This man is freed from servile bands,
Of hope to rise, or fear to fall.
Lord of himself, though not of lands,
Having nothing yet hath all."—Sir Henry Wotton's *Happy Life*.

III. — Text.

*Dēhāṭhi bhāvam parimārjāyantāh, ātmānamātmā nyavēlōka yantāh,
Nāntaṁnamādhyam nabāhi smarantāh, kaupīna vāntāh khalubhāgyavantāh.*

Sense.

He is called a *jñāni* (wise man), who has completely purged his mind of egoism and who identifies his internal self with the beginningless, endless, causeless Reality (i. e., *Parabrahma*).

Note.

Cf. the saying : "*Sarvamkhalvidam brahma. Aham brahmāsmi.*"

IV. — Text.

*Svānanda bhāve parithushti mantāḥ, saśānta sarvēndriyathruptimantāḥ,
Aharniśam brahmaṇi yiramantāḥ, kaupīnavantāḥ khalubhāgyavantāḥ.*

Sense.

They are rich who feel and realize eternal bliss in a state of *laya* (introspective analysis), who know full well how much the pleasures of this life deceive and betray their unhappy votaries, and who therefore "week in, week out, from morn to night," concentrate their thought on *Parabrahma*.

Note.

"As men who climb a hill behold
The plain beneath them all unrolled,
And thence with searching eye survey
The clouds that pass along the way,
So those on Wisdom's mount who stand
A lofty vantage-ground command :
They thence can scan the world below,
Immersed in error, sin, and woe,
Can ask how mortals vainly grieve,
The true reject, the false receive,
The good forsake, the bad embrace,
The substance flee, and shadows chase ;
But none who have not gained that height,
Can good and ill discern aright."—Sir Monier Monier-Williams'
Indian Wisdom.

V. — Text.

*Panchāksharam pāvana muṣṭhāntāḥ, pathin pa'sānāṃ hrūṭhi bhāva yantāḥ.
Bhikṣaśano thikṣhu paribhramantāḥ, kaupīna vantāḥ khalubhāgyavantāḥ.*

Sense.

They are *jñānis* (wise men), who pervade the universe, who with an unalloyed mind rivet their attention for ever and a day on that Grand Master of all animate existences from protoplasm to man, — on *Īśvara*, who eke out their livelihood by begging.

Note.

Cf. "*Aḍvaita bhāvanā bhāikṣa nabhaktiḥyām gauri bhāvanam, guru sātīrōkṣa bhāvēna bhik-
shōrbhāikṣyam vidhiyatai.*" — *Maitrāyopaniṣad.*

ON SOME TERMS EMPLOYED IN THE INSCRIPTIONS OF THE KSHATRAPAS.

BY SYLVAIN LÉVI.

*Translated, with the author's permission and revision,
from the "Journal Asiatique," 1902, I., pp. 95 to 125,
under the direction of J. BURGESS, C.I.E.*

[The question as to the period when Sanskrit came to supersede the Prākṛits for secular purposes, and as to the influences under which that happened, is one of considerable interest, from the historical as well as the literary point of view. Amongst the epigraphic records of India, the earliest known composition of appreciable length in pure literary Sanskrit is the Gīrnār inscription of A. D. 150 of the king Rudradāman, a member of a dynasty, ruling in Kāthiāwār and neighbouring parts, which is conveniently known as that of the Kshatrapas. In its leading characteristics, that inscription is unique, even amongst the records of that dynasty. But other records of the Kshatrapas, and some of the legends on their coins, exhibit a tendency in the direction of the employment of Sanskrit. On the other hand, in the records of other dynasties contemporaneous with the earlier Kshatrapas, Sanskrit exhibits itself in only isolated expressions of a religious or a ceremonious nature; for the same period, it is elsewhere met with only in short votive inscriptions of private individuals, which similarly belong to the religious category, and even in them in only a hesitating and uncertain form: and it is only when we come to the Imperial Gupta period, from A. D. 320 onwards, that we find Sanskrit of the well-established literary type in general use for public purposes. The conclusions are, that, curious as it may seem, the development of literary Sanskrit, and the supersession of the Prākṛits by Sanskrit for official and other purposes, were brought about, not by indigenous Indian rulers, but by foreign invaders, the Kshatrapas; and that the explanation is to be found in a liberal-mindedness in matters of religion, which led those invaders to support a popular movement in the direction of utilising for general purposes a language which previously had been held so sacred that it could be employed only in connection with religion. This is the theme of the article by M. Sylvain Lévi, of which a translation is now offered. In revising the translation, M. Lévi has made a few additions to his original remarks. And, with these additions, the article may be regarded as an up-to-date exposition of a topic which is of very leading importance in connection with the early history of India. — Editor.]

THE Kshatrapa kings who ruled over Kāthiāwār and the country beyond, from the year 78 to the end of the IVth century A. D., employ singular titles in their epigraphic protocol which demand attention. Beginning with Nahapāna, the founder of the dynasty (inscription of the minister Ayama at Junnar), they regularly take and receive the title of *svāmī* in epigraphic documents, which title, however, figures in the legends on their coins only after Yaśōdāman (254 of the Kshatrapa era). The inscription of Rudradāman at Gīrnār (72 Ksh.), in mentioning the name of Svāmī-Chashtana, grandfather of the reigning prince, adds thereto the epithet *sugrihita-nāman*. And the Jasdan inscription (127 Ksh.), stating the genealogy of rāja mahākshatrapa svāmī Rudrasēna, joins to the name of each of his royal ancestors (Chashtana, Jayadāman, Rudradāman, Rudrasimha) the epithet *bhādrāmukha*. With the exception of the Mahākūṭa inscription, mentioned further on, I do not know another instance, elsewhere in Indian epigraphy, in which any of these three titles [98] is applied to a royal personage. But all three are found in a special category of literary productions where, on the contrary, their use is absolutely definite.

Bharata, the legislator of the theatre and everything pertaining to the same, treating of those appellations in use in dramatic language, prescribes:

*svāmī tu yuvarājas tu kumārō bhartṛidārakaḥ |
saumya bhādrāmukhēty ēvaṁ hēpūrvam vādhamaṁ vadēt ||*

[*Nāṭya-sāstra*, xvii. p. 75.]

But this text, borrowed from the Nirṇaya-sāgar edition (Kāvya-mālā collection), is almost inexplicable. The *Daśa-rūpa*, which follows and sums up Bharata, says:—

dēvaḥ svāmīti nṛpatir bhṛityair bhāṭṭēti chādhamaiḥ । [ii. 64.]

And the *Sāhitya-darpaṇa*, § 431:—

svāmīti yuvarājas tu kumārō bhartṛidārakaḥ
saumya bhāḍramukhēty ēvaṁ adhamais tu kumārakaḥ
rājā svāmīti dēvēti bhṛityair bhāṭṭēti chādhamaiḥ ।

The comparison of the texts enables us to obtain some clear sense. Evidently the reading *svāmīti* of the *Sāhitya-darpaṇa* must be substituted for Bharata's inadmissible *svāmī tu*, and the obscure precept "*hēpurvaṁ vādhamam vadēt*" must be interpreted by the aid of the words: "*adhamais tu kumārakaḥ*" supplied by the *Sāhitya-darpaṇa*. From this we arrive at the following rule:—

"The crown-prince must be addressed as *svāmin*, a prince of the [97] royal family as *saumya* or *bhāḍramukha*; with the addition of *hē*, one may also in the same way address a personage of inferior rank" (Bh.). But the *Sāh-D.* modifies the latter precept: "People of inferior rank may also address children in this manner." The English translation of the *Sāhitya-darpaṇa* gives a different interpretation to the latter part of this line: "A prince is addressed by low men — 'Saumya' (gentle sir) or 'Bhāḍramukha' (you of benign face);" and I have followed this interpretation in my *Théâtre Indien* (p. 129). It was at that time impossible to refer to the then unpublished text of Bharata; but in fact, in this interpretation, the word *kumārakaḥ* became superfluous and unjustifiable; it repeated the *kumārō* of the first half line, with the addition of a suffix of which no notice was taken. The modification introduced by the *Sāhitya-darpaṇa* into Bharata's traditional text, as attested by manuscripts of various origin, is doubtless founded on the use of the words *saumya* and *bhāḍramukha* in certain passages in dramas, e. g., *Mṛicchhakatikā*, Act X. p. 160, l. 14 (Stenzler's ed.), where the vidūshaka, addressing the little Rōhasēna, says to him: *tuvaradu tuvaradu bhāḍdamuhō*. *Pidā dē mōridum nādī*. On the other hand, Bharata's precept is applicable to a use equally attested by the *Mṛicchhakatikā*, and in the same passage (p. 161, l. ult.): the vidūshaka addresses himself this time to the Chāṇḍālas who are conducting Chārudatta to torture: *bhō bhāḍdamuhā muñchēdha piavaasam*. We [98] here obtain a clear idea of the processes of minute and persistent observation which serve as a basis to the general formulæ of the theorists of Hindū literature.

The *Daśa-rūpa*, slavishly followed by the *Sāhitya-darpaṇa*, gives yet another use of the appellation *svāmin* which Bharata appears to have ignored. According to this, courtiers should employ it in addressing the king.

If we follow the more important indications of Bharata, the two titles of *svāmin* and *bhāḍramukha* are confined to personages who come immediately after the king in rank, i. e. the crown prince and royal princes. The extension of the latter title to persons of inferior rank, and the application of it to children by people of inferior rank, are casualities which threaten titles of high nobility in all societies and in all times; the people sneer at them, turn them into ridicule till the moment when, deprived of their primitive dignity, they become definitively degraded. It is enough to recall in classic language what happens in the case of the word *Aère*, "Herr," and in popular dialect the value of the expressions: "My Prince!" and "My Emperor!" Without leaving India, the history of the word *dēvānāmpriya* which I have already had occasion to study, constitutes a notable precedent; the majestic title which sufficiently designated the powerful Aśoka, master of the whole of India, has, in classic Sanskrit, taken the sense of "silly fellow, imbecile."

[99] In neither of the editions of the Petersburg dictionary, is there a single passage quoted from dramatic literature in which the appellations *svāmin* and *bhādrāmukha* are employed in their proper sense as defined by Bharata. It does not even mention the particular function of the vocative *svāmin*. As for *bhādrāmukha* used as an apostrophe, the first edition refers: 1st, to the scholiast on Pāṇini, vi. 2, 167, who certainly, in support of the rule laid down for the accentuation of *mukha* in compounds, cites the word *bhādrāmukha*; but Pāṇini does not mention this word himself, and the *Mahābhāṣya* passes the sūtra over in silence; — 2ndly, in the *Mārkaṇḍeya-Purāṇa*, 15, 57, where it is a king who uses this expression in addressing a messenger of death (Yama-purusha), with the probable intention of neutralising by an euphemism the unfortunate character of this funeral personage: — 3rdly, in *Sakuntalā*, 103, 10 and 17 (and add 104, 15); the old anchorite, who accompanies the little Bharata, salutes the king Duṣhyanta with this word, but without knowing whom she is addressing, and taking him for a casual guest. The word *bhādrāmukha* has equally the value of a formula of common politeness in the passages of the *Dāsa-kumāra*, 74, 20, = ed. Nirṇaya-sāgar, 64, 1, and of the *Kādambarī*, 2, 100, 5; 127, 21; 128, 24 = Peterson's ed., 328, 13; 354, 10; 355, 13, which the second edition of the Petersburg dictionary quotes; the translation given by M. Böhtlingk: "dear friend, dear friends," is sufficiently exact. We may cite also the *Divyāvadāna* (ed. Cowell and Neil), p. 431, where the king Aśoka, near death, fallen and powerless, and having at his disposal nothing more than half a myrobalan fruit, calls a man of low rank (*puruṣa*) in order to ask him to take that last present to the Kukkutārāma: — *Bhādrāmukha* pūrvaguṇānūrāgād bhrashtaiśvaryaśyāpi mama imam tāvad apaschimam vyāpāram kuru. And the index of the *Divyāvadāna*, presenting the word *bhādrāmukha* as "a vocative addressed to any inferior," gives a variety of other references for its use in that way in that work.

The title *sugrihita-nāman*, applied in the [100] Girnār inscription to Chashtana, there forms the counterpart to the formula: "*guruḥkir=abhyastanāman*," applied to Rudradāman himself, and which has the advantage of rhyming with the name of the king. Bühler (*Die Indischen Inschriften und das Alter der Indischen Kunstpoesie*, p. 53) translates the latter expression by: "the venerable ones pronounce his name (in praying for salvation)." The expression seems to imply a still more precise sense. The verb *abhyas* evokes in a certain way the study of the Vēdas; cf., e. g., Manu, iv. 147; vi. 95; Yājñavalkya, iii. 204. And the mention of the *gurus* determines the sense still more certainly; the name of the Kshatrapa Rudradāman is for holy personages like another Vēda which demands assiduous study, absolute veneration, and which assures the most precious results. The idea, thus disengaged, harmonizes as we shall see with the general data of our inscriptions. As for *sugrihita-nāman*, Bühler translates it as a general term by "the utterance of his name brings salvation," agreeing with Böhtlingk's interpretation of this word (P. D.): — "the simple utterance of his name brings happiness."

Sugrihita-nāman, like *svāmin* and *bhādrāmukha*, belongs to the formulary of the theatre and things relating to it. As a matter of fact, the definition of the word is not found in the actual text of Bharata; but the *Dāsa-rūpa* [101] and the *Sāhitya-darpaṇa* mention this expression and agree as to the interpretation: —

rathī sūtēna chāyushman pūjyāḥ śishyātmañānujāḥ

vatsēti tātaḥ pūjyō'pi sugrihitābhīdhas tu taiḥ ||

apiśabdāt pūjyēna śishyātmañānujās tātēti vāchyāḥ | sō'pi tais tātēti sugrihitānāma chēti

[*Dāsa-rūpa*, ii. 63.]

sugrihitābhīdhas pūjyāḥ śishyādyair vinigadyatē

[*Sāhitya-darpaṇa*, § 431.]

"*Sugrihita-nāman* is an expression used by a disciple, a son, or a younger brother to designate a person to whom he owes respect," consequently to name respectively the master, the father, the elder.

The first edition of the Petersburg dictionary cites a very different definition of the same word borrowed from the *Trikāṇḍa-śeṣha*, ii. 7, 27: —

yah prātaḥ smaryatē śubhakāmyayā | sa sugrīhitanāmā ayāt.

"The *sugrīhitanāman* is a person whom one recalls in the morning with a kindly intention." But examination of the examples which I am about to cite, proves beyond doubt that the text of the *Trikāṇḍa-śeṣha* is faulty, whoever may be responsible for the fault, and that it must be corrected thus: —

yah prātaḥ smaryatē

"The *sugrīhitanāman* is a deceased person whom one remembers with favour."

The interpretation given by the *Daśa-rūpa* and the *Sāhitya-darpana* on the one hand, and by the *Trikāṇḍa-śeṣha* on the other, are both [102] justified in literature. The author of the *Mṛichchhakatikā* adopts the first. In Act ii., p. 28, l. 33. Stenzler's ed., the courtesan Vasantasenā demands from her servant Madanikā the name of a person whom she has met: Madanikā replies: —

sō kkhū ajjuē sugahidaṇāmahēō ajjachārudattō nāma.

"His name is Chārudatta," accompanying the mention of this name by the word *sugrīhitanāmadhēya* as a title of respect. We find it used again in the same manner in Act ix., by the mother of Vasantasenā when the judge asks her the name of the friend of the courtesan: —

Sāradattassa tanaō sugahidaṇāmahēō ajja Chārudattō (142, 10).

"It is the son of Sāgaradatta, the noble Chārudatta *sugrīhitanāmadhēya*."

The author of the *Mudrā-rākṣasa*, who is inspired by the *Mṛichchhakatikā*, has borrowed this title from him with the same import. Telang's ed., Bomb. Ser. p. 85; the disciple of Chāṇakya, who has been asked the name of the master of the house, replies: —

asmākam upādhyāyasya *sugrīhitanāmna* ārya Chāṇakyaśya.

"It is our master, the noble Chāṇakya *sugrīhitanāman*."

And. p. 111. the chamberlain, in proclaiming the royal command, expresses himself thus: —

sugrīhitanāmā dēvaś Chandraguptō vaḥ samājñāpayati.

"His majesty Chandragupta *sugrīhitanāman* desires it."

[103] The authentic works of Bāṇa show a preference for the (so to say) funereal meaning of the title.

Kādambarī, Peterson's ed., Bomb. Ser. 35, 12: —

ēvam uparatē 'pi *sugrīhitanāmni* tātē yad aham . . . prāṇimi |

"If I breathe when my father *sugrīhitanāman* is dead."

And p. 309, 18 and 22, Mahāśvētā, recalling twice her dead husband, designates him by these words: —

dēvasya *sugrīhitanāmnaḥ* Puṇḍarikasya (smarantī) dēvaḥ *sugrīhitanāmā* Puṇḍarikah.

In the *Harsha-charita*, Rājyavardhana, citing to his brother, as an example, their father's conduct at the death of their grandfather, expresses himself thus: —

tātēnaiva . . . *sugrīhitanāmni* tatrabhavatī parāsutām gatē pitari kiṃ nākāri rājyam.

(Nirṇaya-sāgar ed., 200, 1.)

"And our father [*tāta*, in conformity with the prescriptions of Bharata], did he not take the government in hand on the death of his father [*pitara*] *sugrīhitanāman*."

In the present instance, the use of the word *sugrīhitanāman* coincides exactly with its function in the inscription of Rudradāman. In both cases it is a question of designating honourably a grandfather who has possessed royal power.

So, also, the king Harsha himself, remembering his deceased brother-in-law, in the same way attaches the epithet to his name :—

tatrabhavataḥ *suḡṛihitanāmanāḥ* svargatasya Grahavarmanāḥ bālamitram (p. 261, bottom).

"The boy friend of the dead Grahavarman *suḡṛihitanāman*."

And epigraphy gives, for the period of Bāṇa, an instance precisely parallel with that of its function in the inscription of Rudradāman. In the Mahākūṭa pillar inscription of A. D. 602, the genealogy of Maṅgalēśa, the reigning king, allots the title to his grandfather Raṇarāga, and to him only :—*suḡṛihitanāmadhēyō* Raṇarāgākhyāṇipah; see *Ind. Ant.* Vol XIX, p. 16, text line 3.

Meanwhile, the *Harsha-charita* offers some examples of the [104] same word, used simply in the honorific sense without any funereal idea :—

mām api tasya dēvasya *suḡṛihitanāmanāḥ* Saryātasyājñākāriṇam . . . avadhārayatu bhavati (80, 6)

"Know that I am the servant of the king *suḡṛihita-nāman* Saryāta."

So, again, Bāṇa connects the title with Harsha himself, when his hearers press him to relate the history of that king :—

asya *suḡṛihitanāmanāḥ* punyārāśēḥ . . . charitam icchhāmāḥ śrōturṁ (p. 101)

"We wish to hear the achievements . . . of this *suḡṛihitanāman*, rich in merit."

And he does the same in the speech of Rājyaśrī, when she is on the point of mounting the funeral pile, in introducing the unexpected arrival of Harsha :—

Kuraṅgikē kēna *suḡṛihitanāmanō* nāma ḡṛihitam amṛitamayam āryasya (p. 278)

"O Kuraṅgikā! who is it that has uttered the ambrosial name of our lord, *suḡṛihitanāman*?"

The poet of the *Rāja-taraṅgiṇī* couples the title *suḡṛihita-nāman* with the name of a king (Lalitāditya), who has just died, in a passage where the author does not speak in his own name but where he quotes the words of the prime minister of the dead king. Chaṅkuna assembles all the subjects and proclaims to them (iv. 362) :—

suḡṛihitābhīdhō rājā gataḥ sa sukṛitī divam.

"The king, *suḡṛihitābhīdha*, the beneficent, has gone to heaven."

The exact sense of this expression, too often rendered by rather vague formulæ ('of auspicious name, auspiciously named,' &c.), seems capable of being more clearly expressed. The verb *gṛah*, which generally signifies "to take," signifies when associated with words such as *nāman*, &c.: "to use, mention, cite." We have one instance of that usage in the last passage quoted above from the *Harsha-charita*. And in the *Uttara-Rāmacharita* of Bhavabhūti. Rāma, who has just resolved to put away Sītā, invokes the Earth, Janaka, Sugrīva, the gods, the heroes, and adds :—

tē hi manyē mahātmanāḥ kṛitaghnēna durātmanā ।

mayā *ḡṛihitanāmanāḥ* spṛiśyanta iva pāpmanā ॥ (Act I., near the end)

"But indeed I think that those great ones are contaminated by having their names mentioned by me so ungrateful and wicked."

The idea attaching to the "mention of the name" is clearly manifested by a prescription of Manu, viii. 271 : "An iron nail, ten inches long and red-hot, must be driven into the mouth of him who mentions insultingly the names and castes of the twice-born." (For example, say the [105] commentators, if the culprit has said : *rō Yajñadatta*!, or again : You are the outcast of the Brāhmanas !)

nāma-jāti-graham tv eṣhām abhidhōḥya kurvataḥ.

The *sugrahaṇa* is the contrary custom; it is to mention the name of a person, more especially a dead person, accompanied with qualifications which bring good fortune and which, thanks to their value as omens, may have a happy influence on the posthumous destiny of the deceased or on the future destiny of the living.

The official value of the expression *bhadramukha*, as a title addressed to royal princes, seems to assign respectable antecedents to this common formula. In fact it appears difficult to separate this appeal to the "propitious face" from an analogous title illustrated by a famous example. *Bhadramukha* is without doubt only another form of the idea expressed by the word *Priyadarśin*, Prākṛit *Piyadassi*, that is to say "he who shews himself amiable, who has an amiable aspect." While the Kshatrapas are granted the epithet of *bhadramukha*, the king Śātakarṇi Gōtamīputra, the contemporary, neighbour, rival, and conqueror of the Kshatrapas, receives in a posthumous panegyric the epithet, still surviving, of *piyadasana* (Skr. *priyadarśana*) [Nāsik Prasasti, l. 4]. The formula *dēvānāmpriya piyadasi lāja* of the Aśōka inscriptions would then be solely made up of general designations assumed in the protocol, without a word relating individually [106] to the author of the inscriptions, and there would be no more cause, in spite of custom, to speak of a king Piyadasi than of a king Dēvānāmpriya. Aśōka, whatever may have been his motives, must have intentionally avoided inserting his own name in the text of his inscriptions.

Besides the three terms which I have just noticed, the inscriptions of the Kshatrapas contain yet another characteristic expression which has passed into the dramatic and literary language. Rudradāman, recalling the origin of the reservoir which he has had repaired, attributes its foundation to Pushyagupta, the *rāshṭriya* of Chandragupta the Maurya. The *rāshṭriya* is cited by the *Mahā-Bhārata*, xii., 3205 and 3269, among the high functionaries who assist the king. The dictionary of Amara, however, does not consider this word as a term in actual use; he defines it as a title of the king's brother-in-law, in dramatic language: —

[nātyōktau] rājasāyālas tu *rāshṭriyaḥ* [I., 1, vii., 14].

Hemachandra repeats this definition: —

rāshṭriyō nṛpatēḥ śyālakaḥ (v. 833).

In fact the word *rāshṭriya* is found, with the sense indicated, in the *Sakuntalā* and in the *Mṛichchhakatikā*. In Act vi. of *Sakuntalā* the king's brother-in-law appears in the prologue with two policemen who are his subordinates. The stage directions simply [107] bear: *tataḥ pravṛtati nāgarīkaḥ śyālakaḥ . . .* When the police speak to him, they give him the title of *āpūta* which is, in dramatic terminology, equivalent to *bhaginī-pati*, "the husband of the sister" (of the king). But, in the scene following, when the two servants of the palace mention him in their conversation (Böhtlingk, 79, 2), he is designated as *Mittāvasu rāshṭriya*, "the *rāshṭriya* Mitrāvasu." In the *Mṛichchhakatikā* also, where the śākara is mentioned either with honour or contempt, he is designated as the *rāshṭriya* (Stenzler's ed., 66, 23; 154, 11; 175, 5). After the downfall of king Pālaka, the men who drag the śākara before Chārudatta to receive his punishment, combine *rāshṭriya* and *śyālaka* in addressing him: —

arō rē rāshṭriya-śyālaka i śhy ēhi i svasyāvinayasya phalam anubhava (175, 10).

There are then, these four words: *svāmin*, *bhadramukha*, *sugrihita-nāman*, *rāshṭriya*, which, by the formal avowal of the legislators of the Sanskrit literature and language, are classed in the particular category of words foreign to current custom and maintained solely in the formulae accepted by dramatic and romantic etiquette; and, with the exception of the use of *sugrihitānāmādhēya* in the Mahākūta inscription, these four words are met with, set apart to an actual positive use, in the Sanskrit inscriptions of the Kshatrapas, and of the Kshatrapas only. The title of *svāmin*, it is true, is to be found in another series of epigraphical documents; besides the inscriptions where it is [108] sporadically joined to the name of the princes of another dynasty of Mahā-kshatrapas, those of Mathurā (Mora, *Arch. Survey*, Vol. XX. p. 48; *mahākshatrapasa Rajubulasa putra svāmiva . . .*; Mathurā, *Epigr. Ind.* Vol. II. p. 199; *svāmisa mahākshatrapasa Sōdāsasa*): it is joined to the names of the

Sātakarnis from Gōtamiputa onwards: svāmi Gōtamiputa siri Sadakapi, Nāsik 11; sūmi siri Pulumāya, Nāsik 12, Karli 17; *Amarāvati*, pl. lvi. 1; svāmi Vāsīthiputa, Nāsik 15; sūmi siri Yaṇa, Nāsik 16, Kanhēri 4 and 15; Maḍhariputa svāmi Sakasēna, Kanhēri 14, 19. But from Gōtamiputa onwards, the Sātakarnis are in close relation with the Kshatrapas; I have already pointed this out and I shall return to it. The simultaneous use of the same title in the edicts of the two dynasties, far from weakening the conclusions which I hope to establish, confirms the same. Before becoming fixed, with the stiffness of dead forms, in the vocabulary of theatrical and literary conventions, these titles have, of necessity, done duty in actual life. The first writers who transported them into the domain of fiction, did not invent them, thanks to the miracle of a chance coincidence; nor did they go and exhume them out of the past, with an archæological care which India has never known; they borrowed them from current language and bequeathed them to their successors who have preserved them with pious fidelity, whilst political events were transforming the official protocol around them.¹

[109] But the literary language of politeness is, in Sanskrit at least, inseparable from literary language itself; they are one; the same inflexible code rules both. The dramatic forms which gathered and perpetuated these appellations must therefore have been established at the time when these appellations themselves were in force in official etiquette. It is in the time of the Kshatrapas, and at the court of the Kshatrapas, that we acknowledge their simultaneous existence; it must therefore have been in the time and at the court of the Kshatrapas that the vocabulary, the technique and the first examples of the Sanskrit drama and everything connected with it were established; or, in other words, those of the really literary Sanskrit literature.

The facts which I have stated, even if my interpretation of them be correct, are in danger of appearing insufficient as a foundation for conclusions of so large extent. But a group of important signs tends, on the other hand, to equally assign the foundation of literary Sanskrit to the epoch and court of the Kshatrapas. All Indianists know that the first inscription in literary Sanskrit is precisely the inscription of the mahā-kshatrapa Rudradāman at Gīrnār, of which I have several times made mention in the course of this article; it is dated in the year 72 of the Kshatrapa era, = 150 A. D. The inscription of Ushavadāta, son-in-law of the kshatrapa Nahapāna, which is earlier than the year 46 Ksh. (= 124 A. D.) contains, it is true, a long panegyric by way of introduction, in which the gifts and pious [110] works previously due to the zeal of Ushavadāta (Nāsik, 5), are celebrated in Sanskrit; but on arriving at the precise announcement of the new gift commemorated by this inscription, the language changes: Sanskrit disappears and is replaced by Prākṛit. The other inscriptions of the time of Nahapāna, those of Ushavadāta at Nāsik, 7, 8, 9, dated 42 Ksh. (= 120 A. D.) and 45 Ksh. (= 123 A. D.), those of Dakṣamitrā, wife of Ushavadāta and daughter of Nahapāna (Nāsik, 10), that of Ayama, minister of Nahapāna (Junnar, 11), are all in Prākṛit. After Rudradāman the known inscriptions of the Kshatrapas are all in Sanskrit: those of Rudrasīmha at Gunda, 102 or 103 Ksh. (= 180 or 181 A. D.), and at Jūnagaḍh, and of Rudrasēna at Jasdan, 127 Ksh. (= 205 A. D.) and in Ōkhamandal, 122 ? Ksh. (= 200 A. D.).

¹ If I am reproached with extending to all the literature conclusions based on the employment of certain words which the Sanskrit lexicons class under the language of the theatre, I content myself with referring to Śivārāma, the commentator of the *Dāsa-kumāra-charita*, who, meeting in Daṇḍin's text (*nechhivāsa* I., ed. Nirṇaya-rāgar, pp. 30, 178) with the word *vāsū*, remarks as follows:—

bālā syād vāsūḥ | ity Amaraḥ | yat tv aśya nāṭya ēva prayōga uচিতं nāṭyavargapāthāt tau na !
tātrānyayōgavyavachohhādakatvāt | nāṭya ētēhām ēva prayōgō nāṭyēhām iti | ata ēva 'kāvyā'pi nāṭya-
vargasthān dēvyādisadbhān prāyūktā Kālidāsaḥ

brāhmō mahurtō kila tasya dēvi

kumārakalpatī sushuvō kumāram iti ||

"It may perhaps be said that the word *vāsū* is reserved for the language of the theatre, since Amara classes it in the section treating of the dramatic art. But that would be a mistake. Amara only betokens by that that the words of that category ought to be employed in the theatre, to the exclusion of others. Thus we see that Kālidāsa employs in poetry (*kāvya*) such words as *dēvi*, &c., which with Amara figure in the section treating of the dramatic art."

By a striking contrast and one which gives cause for reflection, the dynasty of the Sātakarṇis, so closely mixed up with the history of the Kshatrapas, their neighbours and rivals, has all its epigraphy inscribed in Prākṛit. From the inscriptions of Nānāghāt, which date back to the beginning of the Christian era or further still, down to the last princes of the dynasty, Sīri Yaṇa Gōtamiputa, Māḍhariputa, Sakasēna, Hāritiputa, towards the third century A. D., Prākṛit is the only language admitted into the epigraphic documents of the Sātakarṇis. There is only one exception, but it is significant: an inscription of Kaṇheri (11) is written in excellent Sanskrit; it is due to the minister of a [111] princess married to Vāsisthīputra Sātakarṇi, and daughter of a mahākshatrapa, probably the mahā-kshatrapa Rudradāman whom I have named so often already ([Vā]sisthīputrasya śrisāta[karṇ]iśya dēyādhī Kārdāmakarājā-vaiśaprabhāvāyā mahākshatra[pā]Ru. putryāh . . . śya . . . v[i]śvasyaśya amātyasya śatī-rakasya pāntyaśhōjanān dēyadharm[m]a[h]). It is the intervention of a daughter of a Kshatrapa, introduced by a political marriage into the family of the Sātakarṇis, which makes in their epigraphy an opening for Sanskrit which immediately closes again.

The linguistic opposition between the two dynasties is still further established by their literary role. Rudradāman, in his inscription, praises himself, or lets himself be praised, for his ability to compose, in prose as in verse, works which satisfy all the exigencies of rhetoric (*spṛuṭa-laghu-madhurachitra-kānta-śabda-samayōdārālanīkṛita-gadya-padya . . .*); and the evidence of the inscription itself leads us to believe that Sanskrit compositions are referred to. The Sātakarṇis, on the contrary, are the traditional patrons of Prākṛit literature. Hāla or Sātavāhana, one of the kings of the dynasty, is believed to have compiled the polite anthology in seven 'hundreds' which has preserved for us the charming remains of ancient Mahārāshṭrī poetry. It is a minister of Sātavāhana, Guṇādhyā, who is supposed to be the author of the original *Bṛīhalkathā*, written in paśācī Prākṛit. Another minister of the same prince, it is true, is said to have composed one of the classical Sanskrit grammars, the *Kātantra*; [112] but the details of the legend seem to represent the historical reality with tolerable exactness. King Sātavāhana, playing with his wives, is spoken to by one of them in Sanskrit; not knowing this language, he makes a mistake which occasions humiliating laughter; mortified, he demands of his ministers a Sanskrit grammar less difficult to study than Pāpini; and Sarvavarman, to please him, composes the *Kātantra*. This anecdote, shewing the king ignorant of Sanskrit and the queen speaking this language, recalls the anomaly observed between the Sanskrit inscription due to the minister of the princess married to Vāsisthīputra and the Prākṛit inscriptions of king Vāsisthīputra himself. The name of the king Sātavāhana is, as it were, a sort of symbol, adopted and consecrated by tradition to sum up the whole dynasty of the Sātakarṇis.

The pretended ignorance of Sātavāhana is an arbitrary invention of the legend. If they did not personally cultivate Sanskrit, it was easy for the Sātakarṇis to attract to their court of Pratishṭhāna, men of letters practised in the use of the Brahmanic language; there was no lack of Brahmins around a dynasty which paid them the magnificent salaries registered in the great inscription at Nānāghāt; the scribes who wrote in Prākṛit the royal panegyrics such as the inscription of Gōtami at Nāsik, needed but a small effort to turn their praises into Sanskrit; they touch so closely upon Sanskrit that they seem rather to guard against it than [113] to try to write it; but they resolutely avoid overstepping the precise limit which separates their Prākṛit from classical Sanskrit. The first infraction upon this reserve is found outside the real domain of the Sātakarṇis, among the Pallavas, settled immediately to the south of the Sātakarṇis. The early Pallavas, Sivaskandavarman and Vijayabuddhavarman, used Prākṛit in their epigraphs; but Sivaskandavarman, who rivals in Brahmanic zeal the Sātakarṇis of the Nānāghāt inscription, and who, like them, flatters himself with having offered the great āśvamedha-sacrifice, admits at the end of his Prākṛit charter a formula in Sanskrit: *Soasti gō-brāhmaṇa-vāchaka-trīṣṭribhya itī* (*Epigr. Ind. Vol. I. p. 3; Vol. II. p. 482*). The accuracy of it is irreproachable; the peculiar character of it is evident; this benediction pronounced over Brāhmins and cows, &c., has a religious character which contrasts with the real

object of the gift. Vijayabuddhavarman, at the end of a donation, equally set forth in Prākṛit (*Ind. Antiq.* Vol. IX. p. 101), inserts two verses in Sanskrit and concludes with a Prākṛit formula; these two verses are those so often met with under the name of Vyāsa in all succeeding epigraphy; *Bahubhir vasudhā . . . and Svadattāṃ paradattāṃ va.* Here again, the authority of Vyāsa gives these two verses a religious character, independent of the context. And more recent contributions to epigraphy only confirm my conclusions. In the Koṇḍamṇi plates (*Epigr. Ind.* Vol. VI. p. 315) of the prince Jayavarman, a contemporary of Sivaskandavarman, the charter is in Prākṛit, but the names of the god Mahēśvara and of the brahmanical gōtra Bṛihatphalāyana are in pure Sanskrit and so also is the legend on the seal: — Bṛihatphalāyana-sagōtrasya mahārāja-śrī-Jayavarmanāḥ. And, like his Hiraṇyagalli plates, the Mayidavōlu plates of Sivaskandavarman (*Epigr. Ind.* Vol. VI. p. 84) are in Prākṛit, and the name of the king is written Sivakha[m]davammō; but the seal presents Sivaska . . . , which suffices to establish the purely Sanskrit character of its legend. It is as a religious language that Sanskrit makes its appearance in the official epigraphy, apart from the epigraphy of the Kshatrapas. It is met with also, but hesitating, uncertain and [114] very brief, in the votive inscriptions of the time of the Kushanas and the Kshatrapas of Mathurā: but these inscriptions, of Buddhist and Jaina inspiration, emanating from private individuals, reduce themselves to brief formulæ, and when, by accident, they happen to be correct, they only succeed by dint of their extreme brevity and their entire commonplaceness.

The presence of phrases and formulæ in correct Sanskrit, inserted in Prākṛit inscriptions or added to them, expressly contradicts the interpretation given by the legend to the linguistic preferences of the Sātakarnis. Even when confined to their own direct testimony without recourse to any outside control, the documents of the Kshatrapas suffice to prove it in error. Whereas, by a revolutionary innovation, their inscriptions are set forth in literary Sanskrit, the legends of their numerous coins are uniformly written in Prākṛit, as in the case of the Sātakarnis. It is only when we come down to the Gupta emperors, in the IVth century A. D., that we meet with the first legends on coins in authentic Sanskrit (e. g., *Kāchō gām avajitya kar-mabhir uttamair jayati*). One only of the Kshatrapas, in advance of the time, coined money in Sanskrit, about the beginning of the second century of the Kshatrapa era, at the end of the second century A. D.; the legend reads: *rājñō [ma]hākshatra[pa]sya Dāmajadairiya[h] putrasya rājñō kshatrapasya Satyadāmna[h]*. The only inaccuracy bears upon the application of an euphonic law: [115] *rājñō kshatrapasya* instead of *rājñāḥ*. But the innovation, which however does not appear very daring in a dynasty which regularly uses Sanskrit in its epigraphy, does not seem to have been a success; it called forth no imitations, and, whereas the coins of the Kshatrapas are generally rather numerous, that of Satyadāman is known by but one specimen (Rapson, *J. R. A. S.* 1899, p. 379). Without the formal testimony of epigraphy, one would be tempted to recognize in the numismatic usage of the Kshatrapas the same tendency to Sanskrit that has been observed in the inscriptions of Mathurā. Two centuries after Satyadāman, in 304 Ksh. (= 382 A. D.), the coinage of Simhasēna, known by several specimens, bears a legend where Sanskrit and Prākṛit alternate curiously in the same inscription: *Mahārāja-kshatrapa-svāmi-Rudrasēna-svairiya[sya] rājñō mahākshatrapasa svāmi-Simhasēnasya* (Rapson, *ib.* p. 398-400). And besides, the simultaneous occurrence of Prākṛit genitives in °sa and the Sanskrit forms *rājñō* and *kshatrapa* in the whole monetary series of the Kshatrapas without exception, the sporadic appearance of the most delicate inflexions of Sanskrit in certain proper names (e. g., *Rudradāmnaḥ* parallel with *Rudradāmasa*, *Dāmajadairiyaḥ* parallel with *Dāmajadāsa*), still place under different aspects the pressing problem of the real relation between Sanskrit and Prākṛit, — or, in other words, the positive commencements of literary Sanskrit.

The religious element which dominates all the phenomena [116] of Hindu life seems to suffice to settle all these apparent contradictions. The opposition observed in linguistic usage between the Kshatrapas and the Sātakarnis reappears in the religious attitude of the two dynasties. There can be no question, assuredly, in ancient India, of determined, absolute,

uncompromising convictions; the avowed and officially proclaimed predilection does not amount to a passion, still less to intolerance. Although they profess themselves fervent worshippers of Bhagavat, of Mahēśvara, of Sugata, &c. (*parama-bhāgavata*, *p^o-māhēśvara* *p^o-saugata*), the Gupta kings, those of Valabhi, the race of Harsha, and many other royal families, distribute none the less their eclectic favours among all the clergy and all confessions (see, e. g., my *Donations religieuses des rois de Valabhi*, in the *Mémoires de la section des Sciences religieuses*, 1896, pp. 75-100). Without refusing to Buddhism the freedom of circumstance, the Śātakarṇis proclaim their pretensions to Brahmanical orthodoxy. Their epigraphy opens at Nānāghāt with a long nomenclature of grand Vedic sacrifices and magnificent salaries paid to Brāhmaṇas by a prince of their family. From Gōtamiputa onwards, at least, each of the kings is careful to affirm his relationship to the great Brahmanic clans: Gōtamiputra, Vāsishṭhīputra, &c. Gōtamiputa, the hero of the Nāsik prāśasti, is exalted as "the Brāhmaṇ par excellence" (*ēka-bamhana*); he has increased the prosperity [117] of the families of the Brāhmaṇas (*dijā-vara-kutuba-vivadhana*); he has accomplished the fundamental and essential work of Brahmanism, by putting a stop to confusion among the castes which is the abomination of desolation in society governed by Brahmanic law (*vinivātita-chātuvāṇa-sakara*); the models which he recalls are the heroes of the Brahmanic epic: Rāma, Kēśava, Arjuna, Bhīmasēna, Janamōjaya, Sagara, Yayāti, Nahusha. The *Purāṇas* also have faithfully enrolled the list of Śātakarṇi kings in the succession of the dynasties which represent across the dislocation of Indian history the orthodox transmission of sovereign power.

The Kshatrapas, on the contrary, are strangers, chance-masters imposed by the conquest; of Scythian origin confounded with the Greeks, with whom tradition continually associates them (*Saka-Yavana*), they have introduced into India the great religious indifference which characterises their race, which manifests itself in the Hellenic-Irano-Indian pantheon of the coins of the Kushāṇas as well as in the universal religiosity of the Mogul Akbar. It is not upon them that the Brāhmaṇs must count for the restoration of their influence; their mere presence in power is an insult to orthodoxy. Buddhism, on the other hand, greets and welcomes with favour these curious and childish barbarians, always ready to adopt a new faith without abandoning their ancient gods, happy and flattered to naturalize their families and their gods in the classic soil of fabulous riches and of the [118] all-powerful magi; it satisfies therewith its thirst for propagation, its ardour for apostleship; it preaches its holy truths to them, its ideal of gentleness and charity. Rudradāman flatters himself to have "kept his promise to respect human life, except in combat" (*puruṣa-vadha-nivṛtti-kṛta-satyā-pratijñēna anyā(tra) saṃgrāmēṣu*). The immortal glory of Kanishka, still spread over all oriental Asia, attests at what price the Church knew how to pay for the adherence of these barbarians.

Sanskrit has remained for the Hindu of the present day a sacred language, of magic power, powerful by its syllables, its sounds and its particles; it is a superhuman language which commands the forces of nature. Buddhism itself has in time placed itself at the service of this superstition. The priests who still study the rudiments of Sanskrit in Tibet, China, and Japan, believe the combinations of the alphabet to possess mysterious forces. An object decorated with the Sanskrit character is sacred; to use it outside of religious observance is to commit sacrilege. The Sakas must have found the same prejudice in force when they penetrated into India; but, exploited by the Brāhmaṇs for their own profit, the prejudice must have had for adversaries the other rival confessions of Brahmanism, such as Buddhism and Jainism, which keep their canonical and traditional scriptures in Prākṛit editions. Two or three centuries earlier, [119] Aśōka doubtless had not so much as thought of borrowing Sanskrit from the Brahmanic schools to use in his inscriptions; but India, unchangeable only in appearance, had changed since then; continued relations with the Hellenic world had introduced new ideas; the invasion of the Sakas and the Turushkas had established barbarian dynasties in the very heart of the country, at Mathurā, at Ujjayinī. Buddhists and Jains aspired to appropriate the language of which the Brāhmaṇs had kept the official monopoly.

Protected by the benevolent neutrality of the Kshatrapas of the North (Śuḍāsa, &c.) and the Kushāṇas, but held either by the remains of superstitious scruple or by imitations of the consecrated forms of their canonical dialects, they combined Sanskrit and Prākṛit in their private inscriptions.

More audacious and happier than their neighbours of the North, the Kshatrapas of Surāshṭra and Mālava took up the direction of the movement which displayed itself in favour of literary Sanskrit. Local circumstances favoured it; carried by invasion to the confines of the Dekhan, the dynasty of the Sakas was soon isolated from its parent tribes which occupied the North-west of India; the Kharōshṭri writing, an expressive indication of a political orientation towards central Asia, disappears from the Kshatrapa coins immediately after the second of their princes Chashtapa; the only trace of foreign influence which remains is the presence of the Greek or [120] quasi-Greek characters, the interpretation of which remains more or less an enigma. The Indian legend, which is the counterpart of it, is traced in Brahmanic writing, the real Hindu script. Its language is, as I have said, Prākṛit; and the purposed, deliberate, and obstinate retention of this numismatic dialect, parallel with epigraphic Sanskrit, seems to me to define clearly the problem of the two languages. If the Kshatrapas who engraved Sanskrit on the rocks and columns, have excluded it from their coins, without being led away by the example set by one of themselves, Satyadāman, it is because the two categories of documents had a very distinct destination: the royal inscription, on rock and column, borrowed from its origin a sort of sacred character; the almost divine majesty of the kings reflected its glory directly upon them; it was still a sort of hymn to the grandeur of a god (*dēva*, the official designation of the king in learned literature). The money had a vulgar function; mixed with the most trivial and ordinary practices of daily life, it passed from hand to hand, without respect of birth or caste, exposed to the most impure contact; the Greek, the Prākṛit, accommodated themselves to it without difficulty; the Sanskrit would have given offence, and the political sagacity of the Kshatrapas, proved by their long standing, understood how to spare the strong scruples of the conquered Hindus. The Sanskrit, just descended from the heights of heaven, was averse to treading altogether on the earth. The distribution of dramatic parlance, as [121] fixed by the theorists of the theatre and as practised with docility by its writers, seems to correspond with this phase of unsettled equilibrium between the invading Sanskrit and the Prākṛits in a state of possession. The convention which has introduced and maintained upon the scene the usage of four languages concurrently with one another, is a fact not so simple as to explain itself; it would be difficult to find outside of India another theatre where the language regularly and necessarily changes in its vocabulary and grammatical forms, with each category of personages. The hypothesis which would attempt to justify this singularity as an exact reproduction and voluntary imitation of the social condition, would be in contradiction to the essential genius of Hindu art in all its manifestations; Hindu art keeps away, on principle, from the real, which contaminates and spoils the creations of fancy and the pleasures of imagination. Besides, it is sufficient to observe, in order to do away with this supposition, that in all other kinds of literature, unity of language is an absolute rule; in the tales, as in the learned epics, kings and valets, Brahmins and Pariahs, speak the same language. But, in the theatre, Sanskrit is reserved for the gods, kings, monks, great people; others share divers languages according to a minute technique. From this it appears, — and it is the conclusion to which we have been led by the study of the words with which we commenced — that the Sanskrit theatre must have been constituted at [122] that epoch when Sanskrit, secularised, was not yet vulgarised, under the auspices of these Kshatrapas who realised for a moment in the history of India the particularities of language and protocol which dramatic conventions afterwards perpetuated. Situated behind the port of Bharukachchha (Broach, on the Narmadā, the classical *Baryaza*), which Hellenic commerce had adopted as an entrepôt since the discovery of the periodical monsoons, Ujjayini commanded the three highways required for importation and exportation: in the North, the Mathurā (*Mathura*) road, where there reigned over the Sūrasēnas (*Sourasenoi*) a dynasty related to the Kshatrapas (Śuḍāsa, &c.); in the

North-East, the road to Pāṭaliputra (Παλαιοβοῦρα), the old capital of Magadha and the central market of the Ganges; in the South, the Dekhan (Δεσποδοῖς) route, and that of Pratishthāna (Παρθάνα), the capital of the Sātakarṇi princes of Mahārāṣṭra. The three great literary Prakṛits, Saurasēni, Māgadhi, Mahārāṣṭri, radiate like a fan round Ujjayinī, the capital of Mālava, where Sanskrit had for a long time tended to emerge. The style of the edicts of Piyadasi engraved on the rocks of Girnar, side by side with the first inscription in Sanskrit of Rudradāma, distinguishes itself among all other parallel writings by its tendency to Sanskrit. In a now old work on the Indian theatre I have called attention to the Sakāra, the illegitimate step-brother of the king, and to the Sākāri parlance, which has fallen to him as to all the Sakas, [123] his congeners. Among a people so indifferent to the memory of their past as the Hindus are, the Sakāra and Sākāri can only be explained as a sacred legacy inspired by tradition. The Sakāra and the Sākāri come into existence either with a prince hostile to the Sakas, or immediately after the fall of the Sakas, while the memory of the personage and his language still lived among his contemporaries. The *Mricchhakatikā*, if it did not borrow from several of its forerunners, now lost, must date back still further than the rest of the Hindu theatre. Must we return to the theory of Wilson, who thought that the political events described in the piece were not pure fiction, and that Pālaka, by his inclination towards Buddhist doctrines and his disdain for Brahmanic privileges, had actually raised the rebellion related by the drama and which ends in a change of dynasty upon the throne of Ujjayinī? (*Theatre*, ed. Roost, Vol. I. p. 158). The tradition contained in the prologue to the drama, attributing the authorship of the drama to king Sūdraka, may have its origin in actual facts, but tangled and confused. A group of legends studied by Bhanu Daji, Mandlik, and Jacobi, represent king Sūdraka as the adversary of Sātavāhana and of his dynasty; to avenge an insult received, he allies himself with the son of the king of Ujjayinī whom Sātavāhana had dethroned; he conquers the son of Sātavāhana, takes Pratishthāna and Kollāpura, but spares the inhabitants. We seem to hear an echo of these combats between the [124] Kshatrapas and the Sātakarṇis: the ruin of Nahapāna and of his race, exterminated by Gōtamiputa, then the revenge of Rudradāma who triumphed twice over Pulumayī, son of Gōtamiputa, reconquered the lost territories, and won glory by sparing the vanquished. The more we study the tradition in the light of historical documents, the more we feel the bonds tighten, which unite legend and history. Great names and great facts, imprinted on the imagination of the people and preserved also in documents, in inscriptions and on coins, which did not cease suddenly, between one day and the next, to be legible and intelligible, have been altered and transformed in the course of time without entirely disappearing.

If the Sanskrit theatre came into existence at the court of the Kshatrapas, the theory of Greek influence seems to gain probability. The country of the Kshatrapas was doubtless the most Hellenised of India, because of its being the most important market for Hellenic commerce. But there is nothing to lead us to believe that Greek influence could have extended to literature: the Greek characters engraven on the coins of the Kshatrapas still resist all attempts at interpretation and seem to prove that the Hellenisation remained very superficial.

The sum of the facts I have gathered here, leads me to admit that the Kshatrapa-Sakas played a decisive role in the final constitution of Sanskrit literature; these rough Scythian invaders, carriers of civilisation through the world, [125] precipitated by their sudden intrusion the slow development of India. Varnished, through the chances of their adventurous existence, by Iranism, Hellenism, Brahmanism and Buddhism, they burst the bonds of the Brahmanic organisation, still too rigid, in introducing themselves within them; these barbarian conquerors, condemned by orthodoxy, prepared the unity of India. In wresting from the schools and liturgy of the Brahmans their mysterious language, they raised up against the confused variety of local Prakṛits an adversary which alone was capable of triumphing over it. India, in guarding faithfully the era of the Sakas as its own era, has been, without knowing it, grateful and just. Their accession opens a new and lasting epoch. The conquered Sanskrit gives to India a common literature, in default of a national literature.

DEPOSIT OF SUTRAS IN STUPAS.

BY VINCENT A. SMITH, M.A., I.C.S. (RETD.).

WHEN Dr. Hoey and I described the find of inscribed bricks, as yet unique, at Gōpālpur in the Gōrākhpur District (*Proc. A. S. B.* 1896, p. 100) we failed to understand the nature of the ruined building in which they were enshrined. The bricks were inscribed with the *sūtra* of the 'Twelve Nidānas,' or the 'Chain of Causation,' and had been deposited on a brick stand or platform in "a small chamber, about eight feet square and about eight feet below the surface, which was built of huge bricks, about a foot and a half long, and some three inches thick On a ledge in the chamber Dr. Hoey himself found a small earthenware saucer containing eleven copper coins, which had evidently been undisturbed since they were deposited." Ten of the coins belonged to the Kūshān kings, Kadphises II. (Hima), Kanishka, and Huvishka, while one was a specimen of the 'Cock and Bull' series of Ajodhya, with the name Ayu, or, as Mr. Rapson reads it, Ayya (for Ārya), Mitra.

Apparently, therefore, the deposit was made in the reign of Huvishka, the latest of the four kings represented. Possibly the number of coins, eleven, may be intended to signify the years of his reign. If so, the date, according to my chronology, which assumes the Kūshān inscriptions to be dated in the Laukika era, would be A.D. 164. Even if my theory of the early use of the Laukika era should not be sustained, and it should be proved that the great Kūshān kings employed a special 'era of Kanishka,' the date named would still, I am convinced, be approximately correct. The reasons for placing both Kanishka and Huvishka in the second century A. D. seem to me to be overwhelming.

A passage in I-tsing's work, *Records of the Buddhist Religion* (transl. Takakusu, p. 150), proves clearly that the chamber at Gōpālpur opened by Dr. Hoey was the relic-chamber of a stūpa. "The priests and the laymen in India," I-tsing observes, "make *chaityas* or images with earth, or impress the Buddha's image on silk or paper, and worship it with offerings wherever they go. Sometimes they build *stūpas* of the Buddha by making a pile and surrounding it with bricks. They sometimes form these *stūpas* in lonely fields, and leave them to fall in ruins. Anyone may thus employ himself in making the objects for worship. Again, when the people make images and *chaityas* which consist of gold, silver, copper, iron, earth, lacquer, bricks, and stone, or when they heap up the snowy sand (*lit.*, sand-snow), they put in the images or *chaityas* two kinds of *śarīras* [relics]: (1) the relics of the Great Teacher; (2) the *Gāthā* of the Chain of Causation. The *Gāthā* is as follows:—

"All things (*Dharmas*) arise from a cause.

The Tathāgata has explained the cause.

This cause of things has been finally destroyed;

Such is the teaching of the Great Sramāṇa (the Buddha)."

If we put these two in the images or *chaityas*, the blessings derived from them are abundant."

In a note Mr. Takakusu cites Professors Oldenberg and Rhys Davids as remarking that this famous stanza, the so-called 'Buddhist creed,' doubtless alludes to the formula of the twelve Nidānas, which explains the origination and cessation of what are called here '*dhammakhetuppa bhava*.' Instances may be quoted of this stanza having been either enshrined in a *stūpa*, or incised upon the building, but as yet the full *sūtra* of the twelve Nidānas has not been found in any *stūpa*, except that at Gōpālpur.¹

¹ Compare the late Mr. Carileyle's discoveries in the great mound near Kasī in the Gōrākhpur District, which was for a long time erroneously believed to be the site of Kūśinagara. He writes:—"This sitting figure of Buddha . . . was actually found inside and in the centre of the base of a small brick votive *stūpa*." In clearing away another similar, but ruinous, little *stūpa*, he found in the centre of its base a fragment of sculpture exhibiting a female figure, apparently broken off from a group. "This placing of religious sculptures, or small statues," Mr. Carileyle observes, "inside small brick votive *stūpas* was something new to me; and I thought this circumstance to be very curious and worthy of record." In a deep excavation in front of the temple of the Oying Buddha, he obtained a small plate of copper, about four and a half inches in length by an inch in width, inscribed with the usual *Gāthā*, *Ye dharmā*, &c. The script was judged to be of the fifth century A. D. I have no doubt that this plate also had been used as the sanctifying deposit placed inside either an image or votive *stūpa*. (Cunningham, *Reports*, XVIII. 79.)

I may add that Dr. Hoernle has for long entertained the intention of publishing a complete edition of the Gōpālpur inscribed bricks, but has not yet found an opportunity of doing so. A small scale photograph of one side of one of them is given in Prof. Rhys Davids' latest book, *Buddhist India* (p. 123, fig. 27). The fact is also worth noting that bricks of huge dimensions were still used as late as the second century A. D.; but it is possible that they were taken from an earlier building. Bricks of such size are commonly associated with buildings of greater antiquity.

RAMABHADRA-DIKSHITA AND THE SOUTHERN POETS OF HIS TIME.

BY T. S. KUPPUSWAMI SASTRI, TANJORE.

(Concluded from p. 142.)

Pupils of Rāmabhadra-Dīkṣita were also eminent scholars. They all acknowledge him as preceptor in very respectful terms in their works. They were (1) Srinivāsa-Dīkṣita, the author of the *Svarasiddhāntachandrikā*, a well-known work on Sanskrit grammar.

व्याकृतिनिर्माणचणान्प्रणमामि श्रीन्मुनीन्प्रगङ्गान् ।

Paribhāṣāpūrtividyākhyāna by Rāmabhadra-Dikṣhita.

Ānandarāyamakhin continued as minister and general during the reigns of Sarabhōji I. and Tukṣōji. He defeated in A. D. 1725 the combined forces of the Nāyaka of Madura and the Tondaman of Pudukkōttai, both of whom espoused the cause of Tandatēvan, a claimant for the Marava Chiefship of Rāmnād in opposition to Bhavānīśankara. This fact is borne out by the subjoined extract from the *Tanjore District Manual*, p. 771 f., paragraph 14:—
 "In 1725, on the death of Vijayaraghunātha, the adopted son of the infamous 'Kilavan' (old man) who persecuted and brutally murdered the Portuguese Jesuit Missionary, John D. Britto (1693), the right of succession to the Maravan Chiefship became the subject of violent contest, attended with bloodshed; between two rival claimants, Tandatevan, a descendant in a collateral branch of a former Chief, and Bhavanīśankara, an illegitimate son of Kilavan. The latter's cause was espoused by the Rajah of Tanjore, while the Nāyak at Madura and the Tondaman of Pudukkottai (Poodocottah) supported the former. The troops of Madura and Pudukkottai, however, were put to flight by the Tanjore general, Ānanda Rāo Peshva, who having seized and slain Tanda, put Bhavanīśankara in possession of the country."

Ānandarāyamakhin died probably in the latter part of Tukṣōji's reign and was succeeded by Ghanaśyāmapāṇḍita, generally known as Chandaśāpant. The *Jivānandanandāka* was composed during the reign of Sāhajī I. (1684-1711).

व्याचष्टे सुखबोधनाय विदुषामानन्दरायाध्वरी ॥

Vidyāparinayandṭakavyākhyāna by Ānandarāyamakhin.

Certainly Vēdakavi must have lived during the reign of Śarabhōji I. if he wrote the *Vidyāparinayandṭaka*. Mahāmahōpādhyāya Paṇḍit Durgāprasad, in identifying Śāhaji with Śarabhōji, in his edition of the *Jivānandanandṭaka*, p. 108, has evidently made a mistake. Likewise Dr. Burnell's supposition in his *Tanjore Catalogue*, p. 172, that the *Vidyāparinayandṭaka* was composed about A. D. 1750 is not free from error. Another work by, or rather attributed to, Ānandarāyamakhin is the *Āvalāyanagrihyasūtravṛtti*.

आनन्दराययज्वेन्दुरक्षरस्वरसानुगाम् ।

आश्वलायनसूत्रस्य वृत्तिं वितनुते सुधीः ॥ १२ ॥

Āvalāyanagrihyasūtravṛtti by Ānandarāyamakhin.

That Ānandarāyamakhin was dead, when Pratāpasimha (Pratapasing) ascended the throne in 1741, is beyond all doubt, as the name of the former is mentioned among the benevolent men of the past in the subjoined verse of the *Mahishasataka*, which was composed at that time by Vāñchhēśvara.

नानाजिप्रभुचन्द्रभानुशहजीन्द्रानन्दरायादयो

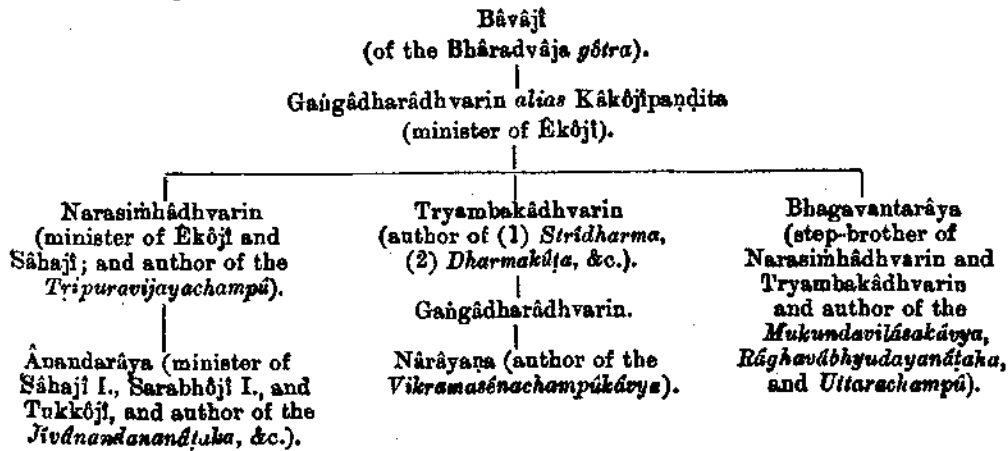

विद्वांसः प्रभवो गताः श्रितसुधीसन्दोहजीवातवः ।

विद्यायां विषद्वयो हि वृषलाः सभ्यास्त्विदानीतनाः

किं कुर्वेऽथ कृषे ब्रजामि शरणं त्वामेव विश्वावनीम् ॥

Therefore, the *Āvalāyanagrikyaśūtravṛtti* by Ānandarāyamakhin could certainly not have been written so late as 1770 A. D. as Dr. Burnell supposes (see his *Tanjore Catalogue*, p. 13).

The following pedigree of Ānandarāyamakhin is based on the extracts quoted below it :—

Subbādhini.

Mahādēvavājapēyin was the father of Vāsudēva-Dīkshita, the author of the *Bāḷamanōramā* and *Adhvaramimāṃsāśūhālavṛtti*. His commentary on the *Siddhāntakaumudī* is called the *Bāḷamanōramā* in contrast with the *Praudhāmanōramā* of Bhaṭṭōji-Dīkshita, the author of the text. According to the colophon, the *Bāḷamanōramā* was composed during the reign of (the Marāṭha king) Tukṛōji of Tanjore. Tukṛōji ascended the throne in A. D. 1729. Therefore this commentary must have been written between that date and 1736, the last year of his reign. Vāsudēva-Dīkshita was the pupil of his elder brother Viśvēśvara-Dīkshita. This Viśvēśvara-Dīkshita's grandson, Bālā-Dīkshita alias Yajñēśvara-Dīkshita, wrote the *Bōdhāyanamahāgnichayanaprayōga*, *Srautaparibhāṣhāsamgrahavṛtti*, *Sāvitṛachayanaprayōga*, *Āgrahāyanaprayōga*, *Darśapūrṇamāsaprayōga*, and several other works on *Bōdhāyanasūtra*.

The subjoined pedigree shows the descent of Mahādēvavajapēyin and his relationship to Bālā-Dikshita :—

(7) Śrīdharaveṅkaṭṭha, known as Ayyā Aṇai throughout Southern India and celebrated for his piety and devotion, was the author of several religious lyrics. The following are his works :— (1) *Akhyāṣhaṣṭī*, (2) *Dayāśataka*, (3) *Mātrībhāṣaśataka*, (4) *Stutipaddhati*, (5) *Sivabhaktikalpalatikā*, (6) *Sivabhaktalukṣhaṇa*, (7) *Tārācalistōtra*, (8) *Ārtihorastōtra*, (9) *Kulirāṣhaka*, (10) *Dōḍṇavaratnamālikā*, &c., published in one volume in Grantha character in the Srīvidyā Press, *Kumbhakōyam*, (11) *Sāhāndravildakāvya* in 8 cantos describing the exploits of his patron Sāhaji of Tanjore. The following events referred to in it are of historical interest. Ekōji, the founder of the Marāṭha dynasty of Tanjore, came on an excursion to the south accompanied by a large body of cavalry and his eldest son Sāhaji I., the hero of the poem. On his way he overthrew many chiefs that were hostile to him and left in power those that were well-disposed towards him. On reaching the banks of the Kāvēri, his second son Surphōji was born. The then ruler of the Chōḷa country in great apprehension sent an army against him; but it was completely defeated and Ekōji easily took possession of the country. After some time, he got his son Sāhaji crowned as sovereign of Tanjore. In the reign of Sāhaji, the Nāyakas of Madura made frequent encroachments upon the territories of the Sētopati of Rāmnāḍ who had declared himself a feudatory of Tanjore. The army sent to help the latter defeated the Nāyakas of Madura and strengthened the position of the Sētopati. Rājārām, the illegitimate son of Sivāji the Great and therefore a cousin of Sāhaji I., was at this time the regent of the Marāṭha dominions in the North on account of the minority of Shāhu and seems to have been on very friendly terms with him. In 1690 Shāhu was taken prisoner by the Muhammadans and Rājārām escaped to Gingī in South Arcot, where he was besieged. Sāhaji despatched an army from Tanjore, which compelled the Muhammadan troops to raise the siege for a time. But the fort was eventually taken by Zulfikar Khān, who allowed

Râjarâm to escape. The details of Ekôjî's accession to power in Tanjore have not been fully stated in this work.

Upagranthabhāṣya.

Another contemporary of Rāmabhadra-Dikshita was Appā Dikshita or Appādhvarin of Māyavaram,* who wrote his *Āchāranavanīta* between A. D. 1696-1704, in the reign of Sāhajī I. Other works by the same author are the *Mādanabhūṣaṇabhāṣya* and the *Gaurimdyūrachampū*. He belonged to the Srivatsa gōtra and his father's name was Chidambara-Dikshita of Killayūr. In A. D. 1696, in the Cyclic year Dhātri, during the reign of Sāhajī, he went to Tanjore to attend the *yāga* (sacrifice) performed by Tryambakāmātya-Dikshita (i. e. Tryambakarao Peshva). The latter was then officiating as minister in place of his elder brother's son Ānandarāyamakhin (Ānandarao Peshva), who was still a youth. After the sacrificial ceremonies were over, the king detained Appā Dikshita at Tanjore for about three months in order to hear him recite the *Mahābhārata*. On his departure after three months, he was desired by the king to write a digest on the law, religion, and customs of the country. He, accordingly, began the *Āchāranavanīta* in A. D. 1696, and together with his son completed it after a lapse of eight years in A. D. 1704.

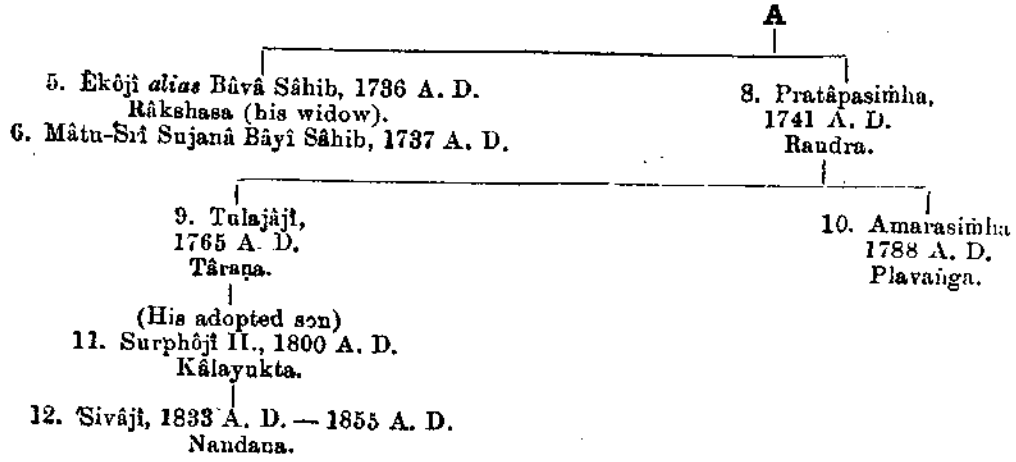

It begins as follows :—

Bālabōdhiṇī by Śēshabhaṭṭa.

BOOK-NOTICE.

ON THE INDIAN SECT OF THE JAINAS. By J. GEORGE BÜHLER, C.I.E., LL.D., PH.D. Translated from the German. Edited, with an Outline of Jaina Mythology, by JAS. BURGESS, C.I.E., LL.D., F.R.S.E. (London: Luzac & Co., 1903.)

THE Jainas of India are not a very large community; but there are several points of interest connected with them. We are glad to receive the translation by Dr. James Burgess of a valuable paper read by the late Dr. Bühler at a meeting of the Imperial Academy of Sciences at Vienna, in May 1887. It extends to 79 pages.

Dr. Bühler was a very careful and accurate scholar; and it is very satisfactory to have this subject discussed up to date. The translation has been carefully executed and runs in simple

natural English. Some useful footnotes have been added by the translator.

The relations of Jainism to Buddhism have not always been properly understood even by professed Orientalists. There are singular resemblances and singular differences between the two systems; and there are approximations of Jainism to Brahmanical doctrine. More than any other creed the Jaina is opposed to the taking of animal life. The Jainas have not taken to agriculture, but mainly to commerce; the former would have involved the death of living creatures. They have built the most splendid temples in India; and they have largely cultivated literature both Sanskrit and popular. Like Buddhism, Jainism is decidedly atheistic.

J. M. M.

^१ Compare also verse 4 quoted on p. 180 above from Venkatakṛishṇa-Dikshita's *Uttarachampā*, where Tulaja is called Tukkojī.

NOTES ON INDIAN HISTORY AND GEOGRAPHY.

BY J. F. FLEET, I.C.S. (Retd.), Ph.D., C.I.E.

Amoghavarsha I. as a patron of literature.

FROM some time in A. D. 814 or 815, to about A. D. 877-78, there reigned in Western India a king, of the great *Rashtrakūṭa* dynasty, whose proper name has not yet come to light,¹ and who is best known, by his principle *biruda* or secondary appellation, as *Amoghavarsha I.* That he began to reign in A. D. 814 or 815, is shewn by the *Sirār* inscription of A. D. 866, as explained in *Ep. Ind.* Vol. VII. p. 204 f. His latest known record is the Kanheri inscription which is dated, without any further details, in the Saka year 799 (expired), = A. D. 877-78.² And a literary statement, noticed on page 199 below, indicates, — if it is applicable to him, as most probably it is, — that he brought his long reign to an end by *abdicating*.

Other *birudas* of *Amoghavarsha I.*, established by records of his own time, were *Atisayadhavala*, *Lakshmivallabha*, *Mahārājāsarva*, *Nripatuṅga*, and *Prithvivallabha*.³ Subsequent similar records present for him the *birudas* of *Mahārājashanḍa*, *Srīvallabha*, and *Vīranārāyaṇa*, and apparently *Durlabha*.⁴ And a literary work entitled *Kavirājamārga*, which was composed during his reign and under his patronage, and which is the subject of my next Note, puts forward for him the further *birudas* of *Kṛitakṛityamālā*, *Naralōkachandra*, *Nitinirantara*, and *Nityamallavallabha*.

There are literary references to a *Nripatuṅga*, which most probably allude to *Amoghavarsha I.*, though that same *biruda* belonged to also his successors *Gōvinda IV.* and *Kakka II.* Thus, the Kanarese writer *Nāgavarma*, — the second author of that name, who, as has been shewn by Mr. R. Narasimhachar, flourished about A. D. 1150,⁵ — has presented, in illustration of *sūtra* 74 of his *Kāvyaśāloka*, a stanza in the Kanda metre which, with the reading *Nripatuṅgaṃ* in preference to the various reading *nripa-putraṃ*, runs :⁶ — *Kari-vōl bhadra-guṇaṃ kēsari-vōl nirvyāja-śauryaṇa=ambhōnidhi-vōl śaraṇ-āgata-rakṣaṇa-paṭu giri-vōl nishkāmpa-chittan=a Nripatuṅgaṃ* : — “Possessed of auspicious good qualities like an elephant (*of the bhadraraja class*) ; possessed of unfeigned courage like a lion ; capable like the ocean of protecting those who sought refuge with him ; and immovable as a mountain in his intentions ; (*such was*) that (*well-known or famous*) *Nripatuṅga*.” So, also, the Kanarese writer *Kēśirāja*, — who has been placed by Mr. Rice about A. D. 1225,⁷ — has presented in his grammar entitled *Saddamanidarpaṇa*, as an illustration to *sūtra* 140, part of a stanza in the same metre which runs :⁸ — *Vīraṇ=udāraṇ śūchi gaṇbhīraṇ naya-śālī kaidu-vottara dēvaṇ=ār=eragar Nripatuṅgaṇge* : — “Who will not make obeisance to *Nripatuṅga*, who was brave and generous and pure and profoundly sagacious and conversant with polity, and was a very god among those who carry weapons ?” And another Kanarese writer, *Bhaṭṭakalāṅka*, in his grammar entitled *Karṇāṭakāśabdānuśāsana*, which with its gloss named *Bhāṣāmañjarī* and the commentary thereon named *Mañjarīmakaranda* he finished in A. D. 1604,⁹ has put forward, in

¹ Regarding some indications that we may expect to find that it either was *Nārāyaṇa*, or else was a name beginning with *Vishnu*, see *Ep. Ind.* Vol. VI. p. 100.

² Vol. XIII. above, p. 185, No. 43 A.

³ See *Ep. Ind.* Vol. VI. p. 174 f.

⁴ See *ibid.* p. 175.

⁵ On the points that there were two Kanarese writers named *Nāgavarma*, that the first of them, the author of the *Ohhaṇḍambudhī* and probably of also the Kanarese *Kādambarī*, is to be placed about the close of the tenth century A. D., and that the second of them, the author of the *Kāvyaśāloka*, the *Karṇāṭakabhāṣābhāṣaṇa*, and the *Vastukāśa*, flourished about the middle of the twelfth century, see Mr. R. Narasimhachar's remarks in his *Nāgavarma's Kāvyaśālokanam and Karṇāṭakabhāṣābhāṣaṇam*, Bangalore, 1903, *Introd.* pp. 1 to 7.

⁶ See the *Kāvyaśālokanam*, mentioned in the preceding note, p. 55, verse 339.

⁷ *Karṇāṭakāśabdānuśāsanaṃ* (see note 9 below), *Introd.* p. 35.

⁸ The Rev. Dr. Kittel's *Saddamanidarpaṇa*, Mangalore, 1872, p. 121.

⁹ The full details of the date, — which seems to apply strictly to the completion of the *Mañjarīmakaranda*, — as given in Mr. Rice's *Karṇāṭakāśabdānuśāsanaṃ*, Bangalore, 1890, pp. 290, 291, are the *Śōbhakṛit saṃvatsara*, *Śālivahana-Śaka-varsha* 1528 (current), *Māgha* śukla 5, *Guruvāra*, the *Rēvatī nakṣatra*, the *Kumbha tīgna*, and the rising of *Śukra* (Venus). And these details are correct for Thursday, 26th January, A. D. 1604. On that day, the given *tithī* ended at about 9 hrs. 55 min. after mean sunrise (for Ujjain) ; and, according to all the three systems of the *nakṣatras*, the moon was in *Rēvatī* at sunrise and up to about 12 hrs. 19 min. after mean sunrise.

illustration of sūtra 352, a stanza in the same metre which runs:¹⁰ — *Irmmaḍi Balige Dadhichige mūrmmaḍi Jimūtavāhanaṅgaṃ bageyaḥ nūrmmaḍi Sibigaṃ diṭṭa sāsirmmaḍi migil=ilḷe chāgadoḥ Nripatuṅgaḥ* : — “*Nripatuṅga* excelled Bali twice, and Dadhichi three times, and, when you think it over, even Jimūtavāhana a hundred times, and Sibi certainly a thousand times, in liberality in the world.”

The three allusions quoted above do not in any way indicate that the *Nripatuṅga* who was the subject of them was an author. One of them simply praises him for his liberality. And the other two merely eulogise him for various other qualities, amongst which literary attainments are not mentioned. But another passage in the *Karṇāṭakaśabdānuśāsana* does plainly indicate a *Nripatuṅga* who was, or was believed to have been, an author. It is found in Bhaṭṭākalaṅka's commentary on sūtra 288, where, in referring to a certain point of difference between the northern and the southern poets, he has said : — *Dakṣhiṇ-ōttara-mārga-bhēda-bhūma-prayōga-chāturi-prapañchō Nripatuṅga-granthē drashṭavyaḥ* :¹¹ — “A clever disquisition on the different usages of the varying styles of the south and the north, is to be seen in the book of *Nripatuṅga*.” The bearing of this allusion will be explained further on.

We thus have four literary passages, all presenting the name *Nripatuṅga*, and one of them tending to indicate its *Nripatuṅga* as an author. Two of them, — those which are contained in the *Karṇāṭakaśabdānuśāsana*, — are probably to be quite correctly taken as referring to one and the same person. And we may, without prejudice, take the other two also, — those which are contained in the *Kāvyāvalōkana* and the *Sabdamaṇidarpaṇa*, — as most likely referring to that same person. But there is nothing in any of them to shew explicitly who that person was. From the second of them, however, — the passage in the *Sabdamaṇidarpaṇa*, — we may infer that he was a king. And we know that the appellation *Nripatuṅga* was a *śirūḍa* of a king, namely Amōghavarsha I., who had reigned for a long time in that part of the country to which the works themselves, from which these passages have been quoted, belong. Also, we know, as will be shewn in my next Note, that that king had been represented as patronising and being personally versed in a certain line of study, to such an extent that a particular work came, and not unreasonably, to be spoken of, in much later times, as “the book of *Nripatuṅga*” in one of the passages quoted from the *Karṇāṭakaśabdānuśāsana*. And there is, therefore, no objection to assuming that the *Nripatuṅga* of all these four passages is that king, namely, the Rāshṭrakūṭa king Amōghavarsha I. In this, we agree, partially at least, with Mr. Rice, who has already, in 1890, identified with Amōghavarsha I. the *Nripatuṅga* who is mentioned in the two passages quoted from the work of Bhaṭṭākalaṅka,¹² without, however, assigning any reasons for the identification. And there is at any rate this to be said; namely, that the identification cannot apparently do any harm, inasmuch as it does not entail anything opposed to what we know about the history, both political and literary, of the periods to which belonged Amōghavarsha I. and the authors of the *Kāvyāvalōkana*, the *Sabdamaṇidarpaṇa*, and the *Karṇāṭakaśabdānuśāsana*.

Evidence that Amōghavarsha I. was, or was believed to have been, an author, has been found in the following fact. There is a small Sanskrit tract, of about thirty verses, consisting of questions and answers on moral subjects, and entitled *Batnamālikā* or *Prasṇōttaramālā*.¹³ Among the Brāhmins, some claim that the author of it was Saṅkarāchārya; while others assign

¹⁰ *Karṇāṭakaśabdānuśāsanaṃ* (see the preceding note), p. 194. — This verse helps to illustrate further my remarks on the title *Mūvaḍi-Chōḷa* and similar appellations; see *Ep. Ind.* Vol. VI. p. 51, note 4.

¹¹ *Karṇāṭakaśabdānuśāsanaṃ*, p. 161. The word *Nripatuṅga* is there printed in italics. I presume that that was done either to emphasise it, or to mark it as a proper name, and not to indicate that it is in any way a doubtful reading.

¹² *Karṇāṭakaśabdānuśāsanaṃ*, Introd. p. 7.

¹³ For the matter stated in this paragraph, — except in respect of the fuller reference to the Tibetan translation, for the basis of which I am indebted to Mr. F. W. Thomas, — see Vol. XII. above, p. 218, and Vol. XIX. p. 378 ff., and Dr. Bhandarkar's Report on Sanskrit MSS. for the year 1883-84, Notes, p. 2, and his *Early History of the Dekkan*, in the *Gazetteer of the Bombay Presidency*, Vol. I. Part II., p. 290 f.

it to a certain Śaṃkaraguru. And the Svētāmbara Jains attribute it to Vimala, by presenting in their recension of it a verse which runs: — *Rachitā sitapaṭa-gurūṇā vimalā Vimalēna ratna-māl-ēva Praśnōttaramāl-ēyaṃ kaṇṭha-gatā kiṃ na bhūṣhayati*: — “This pellucid *Praśnōttaramālā*, or string of questions and answers, has been composed by Vimala, a preceptor who wore the white garment;¹⁴ when it is in the throat (*for recitation*), does it not adorn a man, just like a string of jewels placed on the throat?” On the other hand, the Digāmbara Jain recension of the work presents, at the end, a verse which runs: — *Vivēkāt-tyakta-rājyēna rājū-ēyaṃ Ratnamālikā rachit-Amōghavarshēna su-dhiyāṃ sad-alamkṛtiḥ*: — “This *Ratnamālikā*, or string of jewels, an excellent ornament for the learned, has been composed by king Amōghavarsha, who laid aside the sovereignty through discrimination,” or, as Dr. Bhandarkar has translated, “through the growth of the religious sentiment,” or “in consequence of the growth of the ascetic spirit in him.” Now, the appellation Amōghavarsha belonged, among the Rāshtrakūṭas, to also Vaddiga, a great-grandson of Amōghavarsha I., and, amongst others of his descendants, to a member of the family who is known only as Amōghavarsha II., and to Kakka II. And it was not confined to the Rāshtrakūṭas; it was, for instance, also another name of the Paramāra king Vākpati-Muñja.¹⁵ However, Amōghavarsha II. did not reign at all. Kakka II. did reign; but he did not abdicate; he was overthrown by the Western Chālukya Taila II. We do not know of any grounds for thinking that Vaddiga terminated his reign by abdicating. And Vākpati-Muñja was killed in fighting against Taila II.¹⁶ But Amōghavarsha I. may well have brought his long reign voluntarily to an end, in order to obtain, in his old age, peace and quiet in religious retirement; as was done, just about a century later, though after only a comparatively short period of rule and with the object of apparently at once securing a refuge from all worldly troubles in death, by the great Western Gaṅga prince Mārasimha II.¹⁷ And, in these circumstances, we may understand that it was the Rāshtrakūṭa king Amōghavarsha I., to whom the Digāmbara Jains sought to point as the author, in their opinion, of the *Ratnamālikā* or *Praśnōttaramālā*. It is to be added that there is a Tibetan translation of this tract. This translation has been mentioned on previous occasions, in connection with Amōghavarsha I. And the essential point in it may as well be now stated more fully and definitely. The Tibetan translation exists in two versions. Dr. Schiefner edited one version in 1858. And in his remarks on it he gave a translation of a final verse which stands in only the other version. His German translation of that verse, rendered into English, runs thus: — “This jewel-wreath, made by Amōghōdaya, of the king who abandoned his duly established sovereignties, is the best ornament of the wise.” In respect of this, Mr. F. W. Thomas has explained to me that the name of the author is expressed by the words *don-yod-hchar*, in which *don-yod* is a well-established equivalent of the Sanskrit *amōgha*, and *hchar* means the Sanskrit *udaya*. From this it follows that Dr. Schiefner was quite justified in restoring the name as Amōghōdaya: that name was distinctly suggested by the text; and, at that time, the Sanskrit original of the work had not been made known, and little, if anything, was known about any Amōghavarsha. Mr. Thomas, however, has kindly examined a block-print of that Tibetan version, which is in the Library of the India Office. He remarks that, with the Sanskrit original to guide us, the actual reading *hchar*, = *udaya*, may be reasonably corrected into *char*, ‘rain,’ = *varsha*, *varshā*, which gives at once the name Amōghavarsha. He also finds that, with one or two other equally slight and justifiable emendations, the Tibetan verse reproduces exactly the whole meaning of the original Sanskrit verse of the Digāmbara recension. And he has further shewn me that both the Tibetan versions include a colophon, wherein the author is again mentioned as *don-yod-hchar*, for *don-yod-char*, = Amōghavarsha, and is described in terms which represent the Sanskrit *Mahārāja*, *Kaivara*, and *Mahāchārya*. Thus we may safely and finally substitute the name Amōghavarsha for Dr. Schiefner’s Amōghōdaya. It must, however, be remarked, though it should hardly be necessary, that even the understanding that the Tibetan translation also indicates an Amōghavarsha as the author of the work.

¹⁴ The text, however, might possibly be taken to mean “by the pure preceptor Sitapaṭa.”

¹⁵ See Prof. Kielhorn’s List of the Inscriptions of Northern India, in *Ep. Ind.* Vol. V., Appendix, p. 8, No. 46.

¹⁶ See Vol. XXI. above, p. 168.

¹⁷ See *Ep. Ind.* Vol. V. p. 152.

does not add anything to the value of the Sanskrit verse. The Tibetan translation, being a translation of the Digambara recension, has naturally repeated the assertion made in that recension. It does not prove the assertion, any more than it would have disproved it if it had happened to present another name through being a translation of, for instance, the Svâtâmbara recension. And all that we can say, is, that, according to the Digambaras the work was composed by an Amôghavarsha, and he was most probably Amôghavarsha I., but other sects attribute the work to other authors. We may, however, accept the Digambara recension as indicating that Amôghavarsha I., most probably, was remembered as having ended his reign by abdicating.

So far, we have been dealing only with possibilities. We now come to something definite, which does not, indeed, shew that the Râshtrakûta king Amôghavarsha I. was himself an author, but which does exhibit him as interested in a certain line of study, and as a patron of literature in connection with it.

There is a Kanarese metrical work entitled *Kavirâjamarga*, which deals with *alamkâra* or the art of ornate poetical expression. This work forms the subject of my next Note. The composition of this work has been attributed to Amôghavarsha I. That attribution, however, is a mistake. The author of the work was a person who has made himself known to us by the name of *Kavisvara*. But Amôghavarsha I. was his patron. The author of the work has made that point quite clear. But, further, he has credited his patron with inspiring at least part of the work, and has also represented himself as expressing his patron's views more or less throughout the whole work. And what we gather from it, is, that Amôghavarsha I. took, or was credited with taking, a special interest in the subject of *alamkâra*, and directed, or was credited with directing, the composition of this work. This is the work which Bhaṭṭakalanka, in the seventeenth century, came to mention, in the passage in his *Karṇâṭakaśabdânusâsana* which has been given on page 198 above and will be referred to again in my next Note, as *Nripatuṅgagrantha*, "the book of Nripatuṅga;" being, no doubt, led to do so from recognising the meaning of the real author of the work, and from noticing the prominent place given in the colophons to the name Nripatuṅga, which is further mentioned so conspicuously in the opening verse in addition to being introduced in various other passages.

SOME ANGLO-INDIAN TERMS FROM A XVIITH CENTURY MS.

BY SIR RICHARD C. TEMPLE, BART.

(Continued from p. 160.)

METCHLI.

Fol. 35. Metchlipatam, See called from y^e Hindostan ore Moors Languadge word Metchli signifieinge fish and patam or Patanam a towne.

Not in Yule. [The word is for Hindostani *machhli*.]

MOCHA.

Fol. 48. built for y^e trade to Mocho in y^e Red Sea.

Fol. 98. I saw a horne of about 13: or 14: inches longe, in y^e Very forme and Shape y^e wee picture or carve a Vnicorn's horne it was of a very darke gray colour, I happened accidentally both to See and handle y^e Same. web gaue me more Satisfaction as to y^e Vnicorne then I had before, web Shall be spoken of more at large in y^e accompt of Mocho in the Red Sea [unfortunately there is no such "accompt" in the MS.].

Not in Yule [This is a pity, because there is a Moca in Sumatra, easily to be mixed up with it in reading the old books.]

MOGUL.

Fol. 140. The Kinge of Syam . . . Sent a New Radja (a Mogol bred and borne) [to Janselone].

See Yule, *s. v.* Mogul. [An Indian Muhammadan of the ruling class.]

MOGUL, GREAT.

Fol. 8. all . . . these mighty Kingdoms . . . brought Tributary to the Great Mogol.

Fol. 25. and condescendinge Obedience to y^e Mogol.

Fol. 50. y^e Ancestors of y^e familie of this present Kinge revolted from y^e Mogoll.

Fol. 57. As for theire Idolatrous way of worship, they Enjoy it as fully as in any Other place in y^e Empire of the Grand Mogoll (or territories of Golcondah).

Fol. 59. Orixa: This Kingdoms . . . Subject to y^e Great Mogoll for y^e most part but not altogether.

Fol. 66. however y^e Mogoll was Extraordinary kind to him [Emir Jemla's Son] in all Other respects.

Fol. 97. Pattana . . . longe Since become tributaries to y^e Emperours of Hindostan (or great Mogol).

See Yule, *s. v.* Mogul, the Great.

MOHUR, GOLD.

Fol. 68. he laded 60 Patellas with Silver and by credible report tenne wth Gold Moors.

Fol. 72. Where-Vpon he gave in his present of . . . Some Gold Moors.

Fol. 94. They alsoe Coyne Rupees here of y^e finest refined Gold wth are called gold Moors, they are of y^e same Stampe, magnitude and weight the Silver ones are . . . they passe very currant at 15½ and 15 : ½ rupees each . . . The Gold Moore is Valued att 01 lb 14s 10½d.

See Yule, *s. v.* Mohur, Gold.

MOLUCCAS.

Fol. 3. great Stores are transported and Vended into most places of note in . . . y^e South Seas, more Especially to Moneela one of y^e Molucca Isles.

See Yule, *s. v.* Moluccas. [Quotation valuable as the earliest yet made of the modern spelling.]

MONSOON.

Fol. 31. most Chiefely y^e East India Company's goods that were to be Sent that Monsoone for England.

Fol. 38. but at Some time of y^e Monzoone I have knowne them to be at Sea one month.

Fol. 75. y^e great raines y^e fall here Sometime before y^e breakeinge up of the Monzoone.

Fol. 81. & then (the Monsoone beinge shifted) to goe away with theire Ship and Sloope where they pleased.

See Yule, *s. v.* Monsoon. For a full discussion of this word in all its senses, see *ante*, Vol. XXX, p. 393 ff.

MONSOON PLUMS.

Fol. 175. This Country [Achin] affordeth Severall Excellent good fruites Namely . . . Monsoone Plums.

Not in Yule. [*masdna*, *mansdna*, Malay, through Portuguese *mação*, is the *zyziphus jujuba* or Indian plum, the commonest North Indian term for which is *bér*.]

MONTAPOLY.

Fol. 81. Salt peeter, Iron, Steele, w^{ch} is brought downe from y^e high land Over this place w^{ch} is called Montapolee.

Not in Yule. [But see his *Marco Polo*, Vol. II. p. 297. It is on the Madras Coast near Masulipatam.]

MONTHLY PAY.

Fol. 41. I have knowne Some persons keep above 300 [punes] in constant Sallary, w^{ch} is Ordinarily 2 rupees every Moone.

Not in Yule. [A valuable reference to the old Indian custom of payment by the month, still obtaining for every kind of servant, from highest to lowest; official, commercial, and private.]

MOOLLAH.

Fol. 171. those taken aline were put to death every man Save One who Vpon his Examination was found to be a Mola : or Mahometan Priest.

Fol. 172. att w^{ch} one Mola or Other Vttereth 2 or 3 Sentences.

See Yule, *s. v.* Moollah.

MOOR.

Fol. 8. these mighty Kingdoms were in a Short Space wholly Subdned by y^e Moors
. . . all of them now in generall wholly Submittinge to y^e Mahometan yoke.

Fol. 29. y^e ffrench who in y^e yeare 1672 tooke y^e Citty S^t Thomæ from y^e Moor's forces.

Fol. 36. The ffrench had a ffactory in this place [Metchlipatam] not many years agoe, but Since these troubles of S^t Thomæ, A Citty 3 English miles Southward of fort S^t Georg's (they beinge Ambitious of honour & Conquest in these Easterne parts of y^e World) tooke that Citty from a Small handfull of Moors they tooke S^t Thomæ wth much Ease, and kept it but 3 yeare and with much trouble and losse.

Fol. 37. The ffrench Chiefe Resident in Metchlipatam was killed by y^e Moors, what more of them there made their Escape by Sea.

Fol. 39. Most Eminent Men that inhabit Metchlipatam and Guddorah are Mahometans vizt Moors and Persians.

Fol. 41. The Governour of Metchlipatam is a Moore.

Fol. 44. The Moors have wth in a Very few years put many grievous Affronts, both Vpon y^e English and Dutch.

Fol. 49. there are many Moors, beinge y^e Retinue of y^e Governour.

Fol. 56. Some ffortifications alsoe but all Vnder y^e Government of y^e Moors.

Fol. 59. Orixa . . . Subject to y^e Great Mogoll for y^e most part but not altogether by reason of Severall Radjas who before (y^e Mahometan Conquest of y^e Hindoos) possessed this Kingdome some of w^{ch} are not as yet Subdned and brought Vnder y^e Moorish Yoke.

Fol. 73. y^e Moors Governours haveinge Strict Orders to see them finished with all Speed and gunned and well manned.

Fol. 80. The Commadore mentioned y^e treaty of Peace, att w^{ch} y^e Moors Governour Seemed to be Struck wth an admiration.

See Yule, *s. v.* Moor, an Indian Muhammadan. [See *ante*, Vol. XXX. p. 396 f.]

MOOREES.

Fol. 31. Very Considerable quantities of these followinge Commodities are here [Pettipolee] wrought and Sold to fforeign Merchants vizt Murrees.

See Yule, *s. v.* Piece-Goods, ed. 1903. [N. and E. p. 18, for 13th April 1680, — has "Moorees ordinary : Moorees fine. ? a loin-cloth.]

MOORS.

Fol. 35. Metchlipatam, See called from y^e Hindostan ore Moors Language word Metchli signifieinge fish and patam or Patanam a towne.

See Yule, *s. v.* Moors, the Hindustani Language. [The above quotation is a century earlier than any of Yule's.]

MOSQUE.

Fol. 8. the Mosques or Tombs of y^e Mahometans.

Fol. 45. They Congregate y^e people to their Mosques 4 times a day by Voice of man.

Fol. 51. y^e Mosques and Tombs of y^e deceased Kings and Queens.

Fol. 174. all that piece of land whereon Standeth the Pallace y^e great Mosque.

See Yule, *s. v.* Mosque = *Maajid*. [N. and E. p. 14, for 28th March 1680,—"was a Mussleman and built a Musseet in the Towne to be buried in." With reference to this quotation it is interesting to note that it relates to the death of the great Broker "Cassa Verona" [Kāśī Viruṇṇa] and the dispute among the Natives as to whether he was a Hindu or a Musselman: a dispute that has arisen over other well-known personages, *e.g.*, Kabir, the reformer.]

MUCOA.

Fol. 27. fishermen or y^e like, those are called Moquaes.

See Yule, *s. v.* Mucua, a fisherman on the Malabar and Coromandel Coasts. [N. and E. often refers to them. P. 3 for 9th Feb. 1680: "The 7 Muckwars or Mussulamen (whereof one since dead) that have been imprisoned ever since July last about a man then drowned were now discharged of their imprisonment." P. 37 for 27th Oct. 1680: "the Muckwas, Cattamaran-men and Cooleys had left the Town privately upon a combination." P. 39 for 26th Nov. 1680: "25 Muchwas captured by the peons at St Thoma." P. 40 for 7th Dec. 1680: "The Chief men of the Muckwaes being captured and committed to prison, all the rest came in and submitted themselves." The "Mussulamen" above means Mussoola-boatmen.]

MULMUL.

Fol. 158. from Bengala Mulmuls.

See Yule, *s. v.* Mulmull, muslin.

MULTAN.

Fol. 62. to the Eldest Dara he gave Cabul and Multan.

Not in Yule.

MUSK.

Fol. 61. This Kingdome [Bengala] most plentifully doth abound with . . . Muske in Codd and out of it.

Fol. 101. with a Considerable investment of each Nation in Coddie Muske, w^{ch} is here [in Pattana] found to be very good, it is in generall taken from a Small deere of about 2 foot high, of w^{ch} this Countrey doth mightilie abound . . . a muske deere . . . Great quantities of Muske brought from Cochin-China and China it selfe.

See Yule, *s. v.* Musk. [The quotations above are useful.]

MUSLIN.

Fol. 3. provideinge great quantities of Muxlinge Callicoes &c.

Fol. 56. great Store of Calicos are made here most Especially beteeelis (w^{ch} wee call Muzlin).

Fol. 101. from Dacca: The Chiefe Commodities brought are fine Cossas, commonly called Muxlinge.

Fol. 162. And there wee pay for y^e Chopp 2 pieces of very fine callicos or **Muzlinge**.

See Yule, *s. v.* Muslin. [All the above quotations are useful for the history of this word. See *ante*, Vol. XXVIII. p. 196.]

MUSSOOLA.

Fol. 27. The boats they doe lade and Vnlade Ships or Vessels with are called **Massoolas**.

See Yule, *s. v.* Mussoola. [*N. and E.* p. 3, for 9th Feb. 1680, has "**Muckwars or Mussula-men**."]]

MUSSULMAN.

Fol. 39. Mahometans viz^t Moors and Persians, a Sort of most Insolent men, Entitleinge themselves **Mussleman** viz^t true believers although very Eroniously.

Fol. 57. little or noe justice is to be acquired where y^e Mahometans are Lords Over them, for if complaint be made to y^e high Court of Iustice, y^e **Mussleman** as they call themselves, Shall Certainly carry it (if he appeare in Person). Onely wth this one Saying Ka **Mussleman** jute bolta : Will a true believer lye.

Fol. 65. it is against y^e laws of God and his Prophet Mahomet he not beinge a **Mussleman**, ergo begged of him to desist such his desires.

Fol. 81. And now the Moors come Vpon them for Satisfaction for a great Number of **Musslemen** they had killed and taken Prisoners.

See Yule, *s. v.* Mussulman. [The last quotation is an interesting early example of a mistake still sometimes made. See *ante*, Vol. XXII. p. 112.]

MYLAPORE.

Fol. 25. A Naique that liued neare **Mylapore** viz^t **S^t. Thomae**.

Not in Yule. [It is now a part of Madras itself.]

MYROBALAN.

Fol. 82. They [Portugals] make many Sorts of Sweetmeats viz^t **mirabolins**.

Fol. 175. This Countrey [Achin] affordeth Severall Excellent good frutes, Namely **Mirablinae**.

See Yule, *s. v.* Myrobalan. [A variously spelt and pronounced term for astringent dried fruits of several species.]

NABOB.

Fol. 65. Emir Jemla : hath now y^e Government of Bengala Orix and Pattana firmly by Phyrmand Setled Vpon him with an absolute Power and title of **Nabob**.

Fol. 66. they lost the best of **Nabobs** [in Emir Jemla].

Fol. 69. The Governour hereof [Cuttack] is y^e next in place to the Prince himselfe and hath y^e title of **Nabob**. Hee is put into place by y^e Prince of Bengala and his councill I remember in y^e yeare 1674 a new **Nabob** was Sent from Dacca to Settle in Cuttack.

Fol. 70. he passed y^e Vsual Ceremonie holding Vp both hand and downe Vpon his heels Sayinge **Nabob** Salamat : viz^t Liue O Prince.

Fol. 71. The Old **Nabob** of Cattack beinge Sent for to the Court at Dacca.

Fol. 73. Some few days afterwards the **Nabob** rode through y^e towne of Ballasore in his greatest State mounted upon a Very large Elephant and thus proceeded towards the Citty Cattack.

See Yule, *s. v.* Nabob; a Muhammadan Viceroy.

NAIK.

Fol. 25. The richer Sort more Especially those in Office, as **Naiques** (for soe y^e Hindoo Governours are Entitled) A **Naique** that lined neare Mylapore where y^e Countrey is Governed by y^e Gentue **Naiques**.

See Yule, *s. v.* Naik, in its sense of a nobleman.

NARSAPORE.

Fol. 37. and there [the french] Sent 4 or 5 men On Shore for Spies to **Narsapore**, who were very Suddenly Surprized in y^e English ffactory where y^e Moors cut off their heads Vpon y^e doore thrashold [May 1672].

Fol. 46. **Narsapore**: Is y^e lowest [most Northerly] towne of any Vpon this Coast, it lieth Some 40: or 45 miles below [i. e. to the North of] **Metchlipatam**, haveinge the benefit of an Excellent Riuer, w^{ch} addeth much to the benefit of the place, and is called **Narsapore river**.

Not in Yule. [An important Factory in the early days of the European trade. See *ante*, Vol. III. p. 354 f.]

NEGAPATAM.

Fol. 142. y^e Southermost parts of y^e Choromandell Coast: Vizt . . . **Negapatam**.
See Yule, *s. v.* Negapatam.

NIPA.

Fol. 40. another Sort there is y^e distilled from **Neep toddy** and y^e is commonly called **Nipa de Goa**.

See Yule, *s. v.* Nipa. [The thatching palm of the estuaries East of the Hugli River, and the liquor distilled from it. It is now known as the **Dhani** [**Dhunnie**] palm.]

OMRAH.

Fol. 25. and condescendinge Obedience to y^e Mogol and his **Omrahs**.

Fol. 62. **Anrege-Zebe** y^e Emperour's 3^d Son haveinge y^e best ffriends att Court namely of y^e **Omrahs** and Emperours Councell.

Fol. 67. he kept him at his owne Court, made him one of his Chiefest **Omrahs** and associates.

See Yule, *s. v.* Omrah. [It is the plural *umard* of *amir* (ameer, emir), and signifies a high official, a court grandee.]

OORIYA.

Fol. 59. These inhabitants [of Orixas] are called **Ourias**, and be a very poore Idolatrous people.

Fol. 85. y^e Sufferers y^e Ignorant Gentues and **Orixas** of all Jdolaters in India y^e **Orixas** are most jgnorant.

Fol. 86. much frequented w^{ch} wilde beasts, vizt Tygers: Bears: Rhinocerots: &c: w^{ch} alsoe dreadeth y^e poore **Orixas** Cowries (all y^e moneys knowne to y^e jgnorant **Ourias**) . . . The **Ourias** are a Very Strange Sort of Phisicians to their Sick people.

Fol. 87. and thus all y^e **Ouria** Sicke folke are served . . . the **Orixas** bury not their dead, nor burne them as y^e Gentues doe, but heave them naked into y^e Riuers.

See Yule, *s. v.* Oriya, who however gives no quotations. [An inhabitant of Orissa.]

OPIUM.

Fol. 61. This Kingdome [Bengala] most plentifully doth abound with **Opium** (the best in India).

Fol. 77. In Exchange for **Opium**.

Fol. 170. 600 warre Elephants diligently attended and Opium 3 times a day given them to animate them in y^e highest degree.

See Yule, *s. v.* Opium.

ORAMMALL.

Fol. 101. ffrom Hugly and Ballasore Orammalls.

Fol. 158. ffrom Bengala Oromals.

Not in Yule. [? for *rāmāl*, a kerchief; or cloth for a kerchief.]

ORANKAY.

Fol. 143. next to whom [the Sultan] are y^e Leximana : Orongkays : and Shabandars.

Fol. 146. y^e Cape Merchant when he cometh Vp to towne visiteth y^e Orang-kay.

Fol. 161. y^e great Orongkay is Lord Chiefe Justice, there are other Oronkays &c: under this the great Oronkay or Some of y^e Others doe come into y^e Pallace and declare theire businesse who applyeth himselfe to y^e Great Orongkay.

Fol. 162. he must goe and pay his respects to y^e Orongkay and wth noe Small reverence, first Observinge to pull off his Shoos (although never soe cleane) and leave them att y^e doore or in y^e Court Yard Here must he waite an hour or two before y^e Orongkay will appeare Here y^e Orongkay must be presented with one piece of Baftos to y^e Value of 2 tailes.

Fol. 165. they Straight ways gins y^e Orongkay Notice of it but for what is given to the Orongkay there is little lost by it and the Orongkay &c: Officers accompany us taketh leave of y^e Orongkay, beinge the chiefe man concerned in all y^e Affaires of Shippes and Commerce.

Fol. 173. carried him (and his purchase) before y^e great Orongkay and in y^e presence of y^e Orongkay.

See Yule, *s. v.* Orankay. [A personage, noble, high official among the Malays.]

ORISSA.

Fol. 3. The Kingdom of Orixa.

Fol. 59. Orixa: This Kingdome is of noe great Extent, but is an indifferent pleasant Countrey.

See Yule, *s. v.* Orissa. [He gives very few quotations and never the direct Portuguese form above.]

PADRE.

Fol. 29. y^e Portugal Patrees whose dependance is meerly upon tellinge faire tailes.

See Yule, *s. v.* Padre, a Christian priest.

[*N. and E.* p. 13, for March 19th, 1680, has "would now be buried by the French Padrys." And *N. and E.* p. 37, for 28th Oct., shows that the still existing difference between international courtesies as understood by the English and Continental nations is an old story:—"It is observed that, whereas at the Dedication of a New Church by the French Padrys and Portugey in 1675 guns had been fired from the Fort in honour thereof, neither Padry nor Portugey appeared at the Dedication of our church nor so much as gave the Governor a visit afterwards to give him joy of it."]

(To be continued.)

GLIMPSES OF SINGHALESE SOCIAL LIFE.

BY ARTHUR A. PERERA.

(Continued from p. 147.)

(9) Amusements and Pleasures.²⁷

DURING the New Year and other festive days strolling players (men and women) amuse themselves at open places in the village: they skilfully twirl metal-plates (*neti*) or small tambourines (*raban*) on their fingers or pointed stakes; they keep time to a merry dance by striking together sticks (*likeliya*), by tossing pitchers up in the air and catching them (*kalagedi netima*), or by thudding their arms against the sides (*dingi gahanavā*); and they enlogize the hamlet and its people in extempore verses (*viridu kiyanavā*) with the meaningless refrain, "*Tana tanamda tănēnd, tād, tāmā tănēnd, tana tanamda, tana tanamda, tana tanamda, tănēnd.*"

The people also enjoy themselves on the merry-go-round (*katuru onchillāva*) — a large revolving wheel on a tall wooden superstructure with seats attached; at theatrical representations called *kōlan netum*, *rūkada netum*, and *nādagam*; and at divers forms of out-door games.

Kōlan netuma is a series of dances of a ludicrous character by actors dressed like animals and demons, wearing masks and sometimes perched on high stilts; and the *rūkada netuma* is a marionette show of village life.

The *nādagama* is the drama, and for its performance a circular stage is erected with an umbrella-shaped tent over it (*karalia*); booths are erected all round for the audience, who, though admitted free, willingly contribute something into the collection-box brought by the clown (*kōnangiya*) at the end of the play. Before the drama begins, each of the actors, in tinselled costume, walks round the stage singing a song appropriate to his character, and the subject usually represented is either the landing of Vijaya, the Conqueror of Ceylon, or the tragic and insane deeds which led to the deposition of the last of the Royal line.

Buhukeliya (playing at ball, a kind of stump cricket) is a popular out-door game; the youngsters take sides, choose their captains, and each party places at a distance of 20 or 30 yards a piece of stick on two cocoanut-shells; a member of one team bowls an unripe *citrus decumana* (*jambolaya*) to knock down the opposite wicket and the opponents try to catch the ball, above the knee-cap, as it comes past the wicket; if the bowler knocks the wicket over, one of the other side has to retire, while the bowler himself goes out if the ball is caught; this goes on alternately till one or other of the teams is all dismissed, and the victory is celebrated with a pleasant mixture of railery and wit.

For the game of *muffé* (rounders) a post is erected as a goal, and one of the players stands by it and has a preliminary conversation with the others:—

Q. — *Kēkēiyō.*

A. — *Muddarē.*

Q. — *Dehikatuvaḍa batukatuvaḍa* — Is it a lime-thorn or a brinjal-thorn?

A. — *Batukatuva* — Brinjal-thorn.

Q. — *Man endada umba enlāda* — Should I come or would you come?

A. — *Umbamava, en* — You yourself had better come.

As soon as the last word is uttered, he gives chase, and they dodge him and try to reach the post without being caught; the one who first gets out succeeds the pursuer.

²⁷ For other out-door and in-door games not described in this article, vide Ceylon Asiatic Society's Journal, Vol. V. No. 18 (1873), p. 17.

Hālmelē is somewhat different ; there is no saving post, and the area that the players have to run about is circumscribed ; the pursuer hops on one leg and is relieved by the person that first leaves the circle or is first touched. Before starting he cries out — *Hālmelē*. A. — *Kanakabarē*. Q. — *Enda hondē ?* (May I come ?). A. — *Bohoma hondayi* (All right).

In *hāvan paninavā* (the hare's jump) the players hold their hands together forming a line, and one of them (*hāvan* or hare) comes running from a distance and tries to break through it.

To play *mahasop paninavā* (Mahason's leap) a figure in the shape of  is drawn ; a player guards each line and the others have to jump across them and return without being touched ; it is optional to leap over the middle line and is only attempted by the best players, as the demon *Mahason* (*Mahēśāsura*) himself is supposed to guard it.

The children, in addition to their tops (*bombāra*), bamboo pop-guns (*bata tuwakku*), cut-water (*rōmpetta*), bow *dunu*, and water-squirts (*watura vedilla*), have their own nursery games ; when wearied, hide and seek (*hengin mullān*) they sit in a circle and play at less tiring amusements. They hold the backs of each other's palms with their thumb and forefinger, move them up and down singing "*kaputu kāk kāk kāk, goraka dēn dēn dēn, amutu vāv vāv, dorakada gahē puvak puvak, batapandurē bulat bulat, usi kaputā usi*," and let go each other's hold at the end of the jingle, which probably means that "crows swinging on a gamboge-tree (*goraka*) take to their wings when chased away (*usi, usi*), and there are nuts in the areca-tree by the house and betel-creepers in the bamboo-grove." Or they close their fists and keep them one over the other, pretending to form a cocoanut-tree ; the eldest takes hold of each hand in turn, asks its owner, "*Achchiyē āchchiyē honda pol gediyak tiyanavā kadannada ?*" (grandmother, grandmother, there is a good cocoanut, shall I pluck it ?) ; and, when answered "Oh, certainly" (*bohoma hondayi*), brings it down. A sham performance of husking the nuts, breaking them, throwing out the water, scraping the pulp and cooking some eatable follows this. Or they twist the fingers of the left-hand, clasp them with the right, leaving only the finger-tips visible and get each other to pick out the middle finger (*mēda engilla*).

Or they keep their hands one over the other, the palm downwards, and the leader strokes each hand saying, "*Aturu muturu, demita muturu Rājakapuru hetiiyā aluta gend manamdti hāl atak gerald, hiyalā geṭat beddā pahala geṭat beddā, us us daramiti pēliyai, miti miti daramiti pēliyai, kukalā kapalā dora pilē, kikili kapalā veta mullē, sangan pallā*" (*Aturu muturu demita muturu* ; the new bride that the merchant, *Rājakapuru*, brought, having taken a handful of rice, cleansed it and divided it to the upper and lower house ; a row of tall faggots ; a row of short faggots ; the cock that is killed is on the threshold ; the hen that is killed is near the fence ; *sangan pallā*) ; one hand is next kept on the owner's forehead and the other at the stomach and the following dialogue ensues : —

Q. — *Nalalē monavāda* — What is on the forehead ?

A. — *Lē* — Blood.

Q. — *Elwaturen hēduvāda* — Did you wash it in cold water ?

A. — *Ov* — Yes.

Q. — *Giyāda* — Did it come off ?

A. — *Nē* — No.

Q. — *Kireñ hēduvāda* — Did you wash it in milk ?

A. — *Ov* — Yes.

Q. — *Giyāda* — Did it come off ?

A. — *Ov* — Yes.

(The hand on the forehead is now taken down)

- Q. — *Badé inne mokada* — What is at your stomach?
 A. — *Lamayá* — A child.
 Q. — *Eyi andanné* — Why is it crying?
 A. — *Kiri batuyi netuva* — For want of milk and rice.
 Q. — *Kô man dunna kiri batuyi* — Where is the milk and rice I gave?
 A. — *Ballayi belali kéd* — The dog and the cat ate it.
 Q. — *Kô ballayi belali* — Where is the dog and the cat?
 A. — *Lindé vetuna* — They fell into the well.
 Q. — *Kô linda* — Where is the well?
 A. — *Goda keruvá* — It was filled up.
 Q. — *Kô goda* — Where is the spot?
 A. — *Ándiyá péla kittuvá* — There *ándiyá* plants were planted.
 Q. — *Kô ándiyá péla* — Where are the *ándiyá* plants?
 A. — *Dévd* — They were burnt.
 Q. — *Kô alu* — Where are the ashes?
 A. — *Tampalá vattata issá* — They were thrown into the *tampalá* (*nothosæruva brochata*) garden.

Then the leader pinches the other's cheek and jerks his head backward and forward singing "*Tampalá kápu hossa genen* (give me the mouth that ate the *tampalá*),

Or they solve in rivalry intricate riddles, e. g. —

- Q. — *Tan-tan-gánná tóra evápan,*
Tin-tin-gánná tóra evápan,
Maga-veli-pisinná tóra evápan,
Degambada rajá tóra evápan.

"Tell me who it is that makes a *tan-tan* sound, who it is that makes a *tin-tin* sound, who it is that scratches the sand in the road, and who it is that is king on both banks of a river."

- A. — *Tan-tan-gánná góná nevédé,*
Tin-tin-gánná léndá nevédé,
Majaveli pisinná kukulá nevédé,
Degambada rajá kimbulá nevédé.

"Is it not the elk that makes a *tan-tan* sound; the squirrel a *tin-tin* sound; the cock that scratches the sand in the road, and the crocodile that is king on both banks of the river."

The Singhalese are musical and always inclined for a song. Their popular music is now confined to the *rabána* played by ear, and to the violin and its accompaniment the hand tam-bourine, which have replaced the stringed *vináva* formed of a polished cocoanut-shell, a guana skin, and a long handle, and the *udakkea*, an hour-glass-shaped drum covered with deer-skin. The ancient war music is at present used for temple processions, and the instruments consist of the *dawula*, a cylindrical drum beaten only on one side with a stick; the *beraya*, a longer drum beaten with the hands; the *tammattama*, a kettle-drum beaten with two sticks curved at the end; the *taliya* or cymbals, the *horanéva*, a clarinet with seven holes, resembling the bagpipe in tone, and the *hakgediya*, a conch-shell trumpet.

As regards songs, the farmer labouring on the field or watching his crop at night, the driver as he goes with his heavy-laden cart, the idle cow-boy at even, the toddy-drawer engaged in his morning occupation, the boat-man busy at his oars in the moonlight—all sing some primitive versicle to lighten their labour, *e. g.*—

"*Pun sanda sēma pāyālā rata mēddē,
Ran kendi sēma pīrālā pita mēddē,
Māra senaga vata karagana yama yuddē,
Levkē metindu ada taniyama vela mēddē.*"

"Like full-orb'd moon his glory shone, its radiance filled the world,
His loosen'd hair-knot falling free, in smoothest threads of gold;
Māra's host beset him—no thought was there to yield;
To-day Lord Levkē's body still holds the lonely field."²⁸

(To be continued.)

A COMPLETE VERBAL CROSS-INDEX TO YULE'S HOBSON-JOBSON OR GLOSSARY OF ANGLO-INDIAN WORDS.

BY CHARLES PARTBRIDGE, M.A.

NOTES AND QUERIES.

LADAKHI STONE-IMPLEMENTS.

To my article on 'A Collection of Stone-
 implements from Ladakh,' *ante*, Vol. XXXII.,
 p. 389 ff., I wish to add the following:—

1. I have since received two sharp-edged
 stone-axes of a different shape from those illus-
 trated on Plate I., Fig. 2, Nos. 8 and 9. The
 shape of the new kind is triangular,
 thus: The material is a hard kind
 of slate.

2. A short time ago, Dr. F. E. Shawe, of the
 British Charitable Hospital at Leh, discovered a
 new type of stone-implement in one of the houses
 there, which is still in use, so the owner said.
 This *kalam*-like implement is used for stamping
 down the clay between a mould made of boards
 in use for the erection of rough mud-walls.

3. In my paper there is no mention of the use
 of stone-hammers in Ladakh; because, though
 iron-hammers have hardly been introduced as yet,
 the Ladakhis have not yet attempted to make
 real stone-hammers. Ordinary stones are used
 instead. But Thar-nyed Choe-aphel, a native
 of Trashi-lunpo (now a Christian evangelist),
 informs me that stone-hammers with a wooden
 handle are largely in use at his native place.

A. H. FRANCKE.

HOBSON-JOBSON.

HERE is a valuable quotation for this Anglo-
 Indianism.

1632. There are certain Customs or Ceremonies
 used here (Agra) as also in other parts of India
 viz Shawsen, Hooly, Dewally. Shawsen by
 the Moores in memory of one Shawsen a great
 Warrior slain by the Hindoos at the first con-
 quering this country. So that they do not only
 solemnize his funerals, by making representative
 Tombs in every place, but as it were promise to
 revenge his Death, with their drawn Swords:
 their hair about their Ears; leaping and dancing
 in a frantic manner with postures of fighting,
 always crying Shawsen, Shawsen: Others
 answering the same words with the like gestures:
 it is dangerous then for Hindoos to stir abroad;
 this they do 9 or 10 Days; and then he is as it
 were carried to burial.—*Relation Of Agra what
 notable there, and thereabouts. 1632. MS. Travels
 of Peter Munday. Extracted from the copy at
 the India Office Library.*

R. C. TEMPLE.

18th April 1904.

THE MOST SOUTHERN HOARD OF BACTRIAN COINS IN INDIA.

BY VINCENT A. SMITH, M.A., I.C.S. (Retd.).

ALTHOUGH it is rather late in the day to describe a discovery made more than twenty-five years ago, yet, inasmuch as no detailed account of it has ever been published, a description of the contents of a small hoard of Bactrian coins unearthed in Bundelkhand in 1877, and brought to notice by the local officials in 1878, may still be of interest.

A Chamār labourer, while digging for *dhāk* roots in a gram-field belonging to Rāmratn Singh, nephew of the *lambardār*, or headman, of the village of Pachkhura Buzurg in Pargana Sumērpur of the Hamīrpur District, to the south of the Jamnā, disclosed a pot full of silver coins at a short depth below the surface. The vessel was probably an earthen pitcher, but, according to some accounts, it was of brass. The coins recovered in 1878, through the agency of the police, were as follows:—

Eukratides.

Circular, hemidrachmæ, bilingual —

Obv. — Bust of king, helmeted, to r. ΒΑΣΙΛΕΥΣ ΜΕΤΑΛΛΟΥ ΕΥΚΡΑΤΙΔΟΥ.

Rev. — The Dioskouroi, standing to front with lances. Kharōshthī legend, which I read at the time as *rajasa maharajasa Eukratidasa*, but is given by Von Sallet (*Nachfolger*, p. 99) as *maharajasa mahatakasa evukratidasa*.

Three specimens only were found, of which two had an incomplete border line outside the legend on obv., and mon. The third had no border line, and a different mon. (Gardner, *B. M. Catal. Supplement*, p. 165, pl. xxx., 9). Prof. Gardner notes that "on a coin of this class in Gen. Court's collection, the inscription begins *rajasa* (Von Sallet in *Zeit. f. Num.* 10, p. 157)." I presume, therefore, that I read the legend correctly. I did not obtain a specimen of this rare type.

Apollodotos Sōtēr.

I. — Hemidrachmæ, circular. 4 specimens —

Obv. — Elephant to r. ΒΑΣΙΛΕΥΣ ΑΠΟΛΛΟΔΟΤΟΥ ΣΩΤΗΡΟΣ.

Rev. — Indian bull to r. Kharōshthī legend, *Mahārajasa Apaladotasa tratarasa*. (Gardner, p. 34, pl. ix., 8.)

II. — Hemidrachmæ, square. 29½ specimens. Devices and legends as on the circular coins. Five specimens had no mon.; the others had various mon.; as in Gardner, p. 34, pl. ix., 9. I obtained a specimen of the circular variety, which is now in the cabinet of the Bibliothèque Nationale, Paris.

Menander.

I. — Hemidrachmæ, circular —

Var. 1. Obv. — Bust of king, helmeted, to r. 5 specimens. ΒΑΣΙΛΕΥΣ ΣΩΤΗΡΟΣ ΜΕΝΑΝΔΡΟΥ.

Rev. — Pallas, standing l., with ægis in r., and thunderbolt in l. hand uplifted. Kharōshthī legend, *Maharajasa tratarasa Minadrasa*. Mon., as in Gardner, No. 10, p. 44.

Var. 2. — As above, but king bare-headed. 14 specimens. I obtained an example.

Var. 3. — As var. 2, but king to r. 12 specimens.

II. — Didrachmæ, circular —

Var. 1. *Obv.* — Bust of king, helmeted. 1 specimen.

Var. 2. *Obv.* — Bust of king, bare-headed. 8 specimens.

Legends and reverse device as on hemidrachmæ. (*Gardner*, p. 44.) These didrachmæ are very rare. I secured a specimen of the bare-headed variety, which is now, with all the choice coins of my small collection, in Paris.

Antimachos Nikephoros.

Hemidrachmæ, circular. 20½ specimens —

Obv. — Nikē to l.; holds palm and wreath. ΒΑΣΙΛΕΥΣ ΝΙΚΗΦΟΡΟΥ ΑΝΤΙΜΑΧΟΥ.

Rev. — King, helmeted, on horseback, to r. Kharōshthī legend, *Mahārāja jayadhakasa Antimākhaśa*. (*Gardner*, p. 55, pl. xiii., 3.)

Summary.

| | | | | | | | | |
|--------------------------|-----|-----|-----|-----|-----|-----|-----|----------|
| 1. Eukratides | ... | ... | ... | ... | ... | ... | ... | 3 |
| 2. Apollodotos Sōtēr | ... | ... | ... | ... | ... | ... | ... | 33½ (34) |

| 4. Antimachos Nikephoros | ... | ... | ... | ... | ... | ... | ... | 20½ (21) |

Total ... 98

It is, of course, possible that the number of coins found may have been larger than the number recovered. The hoard was divided, under orders of Government, among the cabinets of various public institutions and private collectors.

Eukratides was undoubtedly the earliest of the four kings whose coins are represented, and, in my opinion, the date of his accession may be assumed as B. C. 175. He reigned about twenty years, when he was murdered by one of his sons, while returning from a successful struggle with Demetrios, "king of the Indians." I agree with the view ably supported by Cunningham (*Num. Chron.* 1869, pp. 241—243) that Apollodotos was the parricide, and further agree with him in regarding Apollodotos Sōtēr and Apollodotos Philopator as one person. The British Museum Catalogue distinguishes them as two separate kings, although many of the coin legends include both titles. The murder of Eukratides, and the accession of Apollodotos to independent power in the Indian borderland, may be dated in B. C. 156.

Menander was king of Kābul. His invasion of India may be dated with a near approach to accuracy in the years B. C. 155—153, during the reign of Pushyamitra Śunga.

The position of Antimachos Nikephoros is uncertain, and there is nothing definite to show whether he lived earlier or later than Menander.

Sufficiently good evidence warrants the belief that in the course of his invasion Menander besieged both Madhyamikā (now Nāgarī) in Rājputāna and Sāketa in Southern Oudh, and that he threatened Pāṭaliputra.¹ If Antimachos Nikephoros was earlier in date than Menander, it is possible that the Pachkhura hoard may have been brought into the interior by some member of Menander's army. Bactrian coins have never been discovered to the south of the Jamnā on any other occasion. The coins of all the four kings were in good condition, and many of the specimens were fine.

¹ The authorities for the invasion of Menander will be discussed in my forthcoming work, *The Early History of India*, which will be published by the Clarendon Press in October.

TATTOOING IN CENTRAL INDIA.

BY CAPTAIN C. E. LUARD, M.A.,
Superintendent of Ethnography in Central India.

INTRODUCTORY REMARKS.

I am afraid that the information I am at present able to give on this subject is somewhat sketchy, but I hope to be able to communicate further details when the work of the Ethnographic Survey is taken up in the States of this Agency. I have decided, however, to publish such notes as I have collected, in the hope that they may be of use for comparative purposes. Before actually turning to the subject-matter, I would remark that we can roughly divide Central India into three groups :—

- I. — **The Bundelkhand, or Eastern Section.** — Tattooing is restricted to females, and the breast and abdomen are not tattooed.
- II. — **The Mālāvā, or Western Section.** — Tattooing is less restricted to females, and the breast is almost invariably adorned, the abdomen only occasionally.
- III. — **The Wild-tribe Section.** — In this group men are often tattooed, though with fewer devices than the women, the breast, abdomen, thighs and even back being adorned.

Origin of the Custom. — There is, so far as I am aware, no mention of the custom of tattooing in the *Sāstras*, and there are no definite legends as to its origin, though it is said generally to be an invention of the “Dvāpar (Third) Age.” I am inclined to think that it is here primarily nothing more than a form of decoration, and is used to increase the attractiveness of the female in the eyes of the other sex, a common use for it among savage tribes in all parts of the world.¹ A few instances of its use for talismanic purposes have come to light, but they seem to me to be modern inventions. One thing is certain, and that is that the wearers of these devices only look upon them as ornamental and decorative devices, with no deeper significance. The only legend I have gathered is a modern one, which states that Kṛishṇa once disguised himself as a Nāṭī in order to tattoo Rādhā. In this connection there is a verse advocating the tattooing of Kṛishṇa's names on the body :—

1. दे लिखवाहन मे ब्रजचंद्र गोल कपोल कुंजबिहारी ॥
2. त्यों पदमाकर याही हीये हरि गोसे गोविंद गरे गिरधारी ॥
3. या बिधसे नखसे सिखलो लिख नाम अनंत भव भै व्यारी ॥
4. इयामरेकी रंग गोद दे गात हे गुदनानकी गोदनहारी ॥

1. Write on arms Brajchandra² (and) on round cheeks Kunjibihārī.³
2. Padamākara⁴ says, likewise inscribe (on) the bosom Hari⁵ (and on other particular parts) Gobinda⁶ (and on the neck) Girdhārī.⁷

¹ See Chapter IX. in Westermarck's *History of Human Marriage*.

² *Lit.*, moon of Brajmaṇḍal (present Mathurā district), or light of Braj, a name of Śrī Kṛishṇa.

³ *Lit.*, one who disported in the groves.

⁴ A poet who wrote much about the Central India people.

⁵ A common name of Viṣṇu, and hence applicable to Śrī Kṛishṇa, who was an incarnation of Viṣṇu.

⁶ A name of Śrī Kṛishṇa. This name was used by Indra in addressing him when apologising for his conduct in pouring the tremendous rain-storm over Brajmaṇḍal. See Chapter XXVI. of Captain Holling's translation of *Premāṅgar*.

⁷ *Lit.*, lifter of the mountains, from his lifting of the Govardhan hill on his little finger.

3. In this way from head to foot write^s out, O dear one, the innumerable names known in the world.

4. Oh Tattooer! get my body tattooed (with) the dark blue colour of Sri Krishna.

Classes that Tattoo. — Tattooing is practically confined to Hindus and the jungle tribes; the lower classes of the former and all the latter decorating themselves profusely in this manner. The higher classes of Hindus are employing tattooing more and more sparingly I am told, and the designs are not only less numerous but also drawn on a smaller scale.

As regards the sexes, men are practically never tattooed in Bundelkhand, the Eastern Section; it is less uncommon in Mālavā; and quite common among the wild tribes. But even when men are tattooed, they are less profusely adorned with marks than women are. I am told that the Gahlōt Rājputs (of Bhōpāl) have a clan device, but I have been unable to verify this.

I have come across no instance of the use of tattooing to mark male puberty, nor have I been able to trace the least connection between this custom and religion, although it is supposed that women are better fitted to do acts of worship when they have certain marks upon them. The habit is certainly not declining, and new marks are still devised, as, for instance, the "Engine" used by Railway employes.

Methods of Tattooing. — (a) *General.* — Tattooing amongst Hindus is done by the females of the wandering tribes, such as Naṭs, Dhōds, Kanjars, Banjāras, &c., who make regular cold weather tours. In Bundelkhand Basōrs and Bhangis are tattooed by Parkis, a degraded caste who can feed with them. Although tattooing is usually done by these tribes, others are by no means prohibited from doing it, but as a rule the skill is lacking.

Among the jungle tribes it is done by any old woman of the tribe. In no case is tattooing ever done by men. These professional tattooers on entering a village have a regular cry — "Ohē! Ohē! a lovely scorpion, or beautiful peacock, for a pice, Ohē!" The women-folk at once gather round and trade begins.

(b) *Process.* — The instrument used is a bundle of four (or six) needles tied together in the middle, or made into a kind of comb. The jungle tribes often use Bābūl (*Acacia arabica*) thorns instead. The operator, on arrival, shews all her designs, drawing them in lamp-black on the part of the body where they will be stamped. When a design is approved of, it is at once executed. I may mention that it is usual for a young girl to have one device copied from among those her mother wears, but there is no rule whatever as to this, nor does any special significance attach to such a copy. The design selected, the operator seats herself before the patient and draws the device in lamp-black in the proper place. She then seizes the skin under the design with the left hand and stretches it, and, while doing so, strikes the needles sharply along the lines of the device, dipping them in the pigment each time, and then rubbing more pigment in with her hand.

In Bundelkhand, when the design is finished, the operator, in order to avert the evil-eye, takes a handful of flour (gram) mixed with salt and casts it into the fire. In these parts it is also considered a good thing that the patient should make her blood circulate briskly; it is said to "settle" the design. Poor women are set to grind for half an hour or so, while the rich carry pots of water about. Dieting is not common. I have noted its use in a few individual cases.

(c) *Pigments.* — Various pigments are used, but it may be remarked that only two colours are employed in Central India, blue-black and green; the latter is commonest in Mālavā. The dark-black seen in the United Provinces is not met with in Central India.

(1) Dharba (*Poa cynosuroides*) grass juice and turmeric; gives a dark-green colour.

^s Lit., from nails to hair on the head.

(2) The bark of the Biyān tree (?) soaked in the water from a *hukka* and mixed with turmeric and lamp-black; gives a green colour.

(3) Bark of the Sisam (*Dalbergia sisoo*) tree soaked in water with turmeric; gives a green colour.

(4) Cow's milk mixed with the juice of the Karila plant (*Capparis aphylla*); this is used only by Mālavī Mhārs.

(5) The juice of Nim-tree (*Melia azadirachta*) leaves mixed with lamp-black; gives a green colour.

(6) In Bundelkhand a "blue-black" is produced by mixing lamp-black with the bark solution of the Biyān tree.

(7) The juice of Māhuā (*Bassia latifolia*) and lamp-black; gives a green colour.

(8) Juice of the Karila mixed with that of Balur² (?); gives a green colour.

Age of Tattooing. — The process of tattooing commences at about five or six years of age, the designs being added to gradually. In Bundelkhand unmarried girls are as a rule only tattooed on the hands, other parts being done after marriage. Tattooing thus becomes a sign of marriage, but not of puberty. The Sarwariyā Brahmans, however, tattoo their married girls only. Widows are only tattooed in the lower classes where widow remarriage is allowed, and then only on re-marriage.

Tattoo marks and their meanings. — On this point the reader must refer to the attached diagrams. Generally it is the parts exposed to view that are dealt with, the practice within certain limits varying in the three groups into which I have divided Central India. I have come across no special devices.

We may arrange the parts adorned thus: — **Decorated by all three groups** — (1) Forehead, between the eyes. (2) Arms — upper; fore. (3) Hands — back; palms, rare; fingers; wrists. (4) Feet and ankles. (6) Calves. (7) Neck.

In the Mālavā group add, —

(a) Breast, usual. (b) Abdomen, rare.

In the jungle-tribe group add, —

(a) Breast. (b) Abdomen, usual. (c) Thighs. (d) Back, rare.

As to what the signs mean I have been able to discover little; all that the people could tell me was what the sign was intended to represent. I could nowhere discover that any deep meaning was supposed to be attached to the symbols; increase of attractiveness was, as I have already said, the principal reason assigned for undergoing the process. The designs, moreover, are the same practically among high and low, probably because the operators in each case are the same people, the only difference being that of quantity, which varies inversely with social position. Symmetry there is none, nor are marks hereditary, though a daughter as a rule adopts some one of the designs her mother has worn. As a rule, any part of the body may be done first, except in the case of unmarried girls in Bundelkhand, and a few others which will be found under the particular instances which I have given. The devices representing bracelets, necklaces, &c., are designed to give the wearer the wherewithal to appear in the next world; these jewels she is supposed to be able to take with her.

The following *Dohā* refers to this: —

Dohā. दोहा.

चतुरनार वहनो घडो सुगड लियो अपने अंग ॥
उतारे से उतरे नहीं सो गयो जीवके संग ॥

² Balor (?) is a vegetable, I am informed.

which may be translated as follows :—

“ An intelligent woman executed (some) ornaments, which a decent one put on her person.
(They are such) ornaments as cannot be put off, but which will accompany the soul
(to the other world).

I know of no case of tattooing idols or cattle.

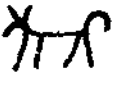

THE TATTOO MARKS.

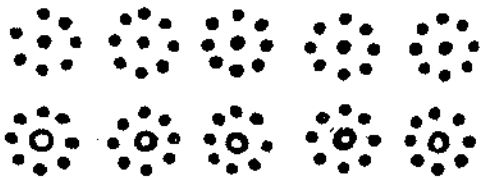

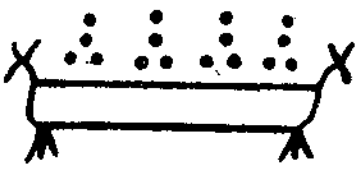

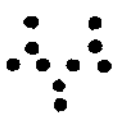

I will now proceed to discuss a series of marks actually taken down off people. Many are repeated — indeed, the actual number of designs is not really large, but the variation in the forms is considerable, and I will therefore give the whole collection as it stands. It has not been everywhere possible to give an English equivalent.

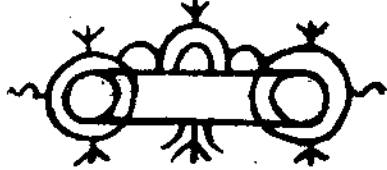

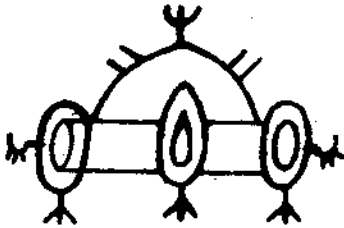

I.

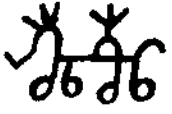

THE BUNDELKHAND OR EASTERN SECTION.

(Collected by Rai Saheb Kashi Prasad.)

| No. | Designs or marks. | Names of designs. | English names. |

| 55 |  | वरा | Varā (an article of ornament). |
| 56 |  | नाहर... .. | Nāhar (tiger). |

Description of the positions of the marks.

| Names of marks or designs. | Names of the parts of body where marks are made |
|--|---|
| No. 1. Māchhi | On the back of the finger of the left hand, above and below the second joints, and also on the back of the thumb. |
| No. 2, Purēn kā phūl; No. 3, Chahū; No. 4, Javā; No. 5, Ghinōchi; No. 6, Hinnā; and No. 8, Bichhū. | On the back of the palm of the left hand. |
| No. 9, Chapēṭā | On the palm of the left hand. |

| Names of marks or designs. | Names of the parts of body where marks are made. |
|--|--|
| No. 10, Pīṛī; No. 11, Lauṅg; No. 12, Churiyā; No. 13, Mōr; No. 14, Papīrā; No. 15, Batāsā; No. 16, Baṭuvā; No. 17, Jhūmar; No. 18, Bhaiyā kī Chhāñh; No. 51, Kakaī; No. 52, Kakvā; and No. 53, Makarī. | On the middle of the front and back of the fore- arm of the left hand. |
| No. 55, Barā | On the front of the elbows of both arms — about an inch down towards the fore-arm. |
| No. 19, Hinnā, Hinnī; No. 20, Sakhi; No. 21, Pāñch Paṇḍavā. | On the middle of the outer and inner surfaces of the left arm. |
| No. 24, Sāñkh-jhālar | On the back of the third finger of the right hand, below the first joint. |
| No. 25, Sīt | On the front of the wrist of the right hand. (Note. — Some are of opinion in connection with this "Sīt," that a woman wearing it is able to touch her husband's elder brother's clothes, &c., which, as a rule, she cannot touch.) |
| No. 3, Chalnī; No. 4, Javā; No. 7, Mathānī kā phūl; No. 5, Ghinōchī. | On the back of the palm of the right hand. |
| No. 26, Sītā kī rasūiyā; No. 27, Charan; No. 28, Mukāṭ; No. 15, Batāsā; No. 29, Jhāñsi kī nakal; No. 30, Chakaī-Chakwā; No. 32, Kāglā; No. 54, Chakantī. | On the middle of the front and back of the fore- arm of the right hand. |
| No. 33, Kanhiyājū; No. 34, Gōpi; No. 35, Guvāl; No. 36, Hathī; No. 37, Rām Lachhman kī jōṛī. | On the middle of the outer and inner surfaces of the right arm. |
| No. 38, Buṇḍā or Tukli | Between the eye-brows on the forehead. |
| No. 39, Bēsar | Close to the hole of the nose-ring on the left side. |
| No. 41, Galchumā | At the centre of the right cheek. |
| No. 40, Buṇḍā | Just above the centre of the chin under the lower lip. |
| No. 42, Dhaibunḍā | On the side of the body over the middle of the lower ribs of the right side. |
| No. 43, Putarainyā | On the calves of both legs. |
| No. 13, Mōr; No. 56, Nāhar | Instead of No. 43 on the calves of both legs. |
| No. 45, Mahāwar kā phūl | Over the centre of the top of both feet. |
| No. 44, Vijaurē | Scattered around No. 45. |
| No. 46, Sātiyā | On the big or first toes of both feet. |
| No. 47, Buṇḍā | On the fifth toe of both feet. |
| No. 12, Churiyā; No. 15, Batāsā; No. 16, Baṭuvā; No. 18, Bhaiyā kī Chhāñh; No. 31, Orchhā kā Guṇḍā; No. 48, Māi kī bhōṇṭ; No. 49, Suvā. | Can be made on the middle of the front and back of the fore-arm of either arm (right or left) as desired by the person to be tattooed. |
| No. 23, Sarman kī kañwar; No. 22, Bēl; No. 17, Jhūmar; No. 12, Churiyā; No. 50, Savār. | Can be made on the middle of the outer and inner surfaces of either arm (right or left) as desired by the person to be tattooed. |

GLIMPSES OF SINGHALESE SOCIAL LIFE.

BY ARTHUR A. PERERA.

(Concluded from p. 210.)(10) Folk-Tales and Legends.²²

THE Island's folklore consists of nature myths, place-legends, and other traditions; riddles, proverbs, and verses; and nursery tales which tell of speaking animals and of some village anecdote or rural character of the good old communal days.

The Story of the Sky.

Once upon a time the sky was very close to the earth and the stars served as lamps to the people. A woman who was sweeping her compound was so much troubled by the clouds touching her that she gave them a blow with her *ikle* broom (*idala*), saying, get away, get away (*pala, pala*). The sky instantly flew away far out of the reach of man.

The Sun and Moon and their Eclipse.

A poor widow had three sons, who, one day, attended a wedding, leaving their mother at home; they returned late and she enquired what they had brought for her to eat. The eldest angrily replied that he had brought nothing, and the second threw at her the torch which had lighted them on the way. But the third asked for his mother's rice-pot (*hattiga*) and put into it ten grains of rice which he had brought concealed under his ten nails. The few grains miraculously filled the vessel, and the mother, in return, blessed him and cursed the other two, consequently the youngest became the pleasant and cool moon, the second the fierce burning sun, and the eldest the dragon-plant (*Rāhu*) who tries to destroy his brothers by swallowing them and causing their eclipse.

Origin of Earthquakes.

The goddess of the earth (*Mihiket*) supports the world on one of her thumbs, and, when weary, shifts it on to the other, causing an earthquake.

The Horse and the Ox.

In the olden times the horse had horns but no teeth in his upper jaw, while the ox had no horns but teeth in both its jaws. Each coveted the other's possession and effected an exchange; the ox has the horns now and the horse the two rows of teeth.

The Cheetah and the Cat.

The cheetah was taught by the cat to climb up a tree but not to come down. In revenge he always kills his master, but is grateful enough to keep the body on an elevation and worship it, instead of making a meal.

The Cheetah, the Lizard, and the Crocodile.

Once upon a time three brothers, who were shepherds, became skilled in necromancy; as the animals they were after refused to yield milk, the eldest transformed himself into a leopard, the evil nature of the beast came upon him and he began to destroy the flock. The youngest took refuge on a tree and became a lizard, and the other, who had the magical books, jumped into a river and was turned into a crocodile. These three have, ever since, lived in friendship, and a person who escapes one becomes a prey to the other. The crocodile's victim can free himself by tickling its stomach and trying to take thence its books.

The Crocodile, the Crab, and the Jackal.

A jackal once deceived a crocodile by promising him to get a wife, and got himself carried across a river for several days till he had consumed the carcass of an elephant on the other banks. The crocodile vainly tried to take revenge, when a crab undertook to assist him. The latter prepared a feast and invited the jackal; after the meal, the host who had purposely not kept a supply of water, proposed to go to the river for a drink. The jackal consented, but managed to see his old enemy lying in wait for him. The crab was killed for his treachery, and this feud is still kept up between jackals and the crabs.

The Jackals and the Wild Fowls.

The jackals, assisted by the denizens of the forest, long, long ago, waged war against the wild fowls (*velikukulô*), who called to their aid a party of men, and one of them seized the king of the jackals and dashed him on a rock and broke his jaw. As the animal received the blow, he raised the shout "*Apoi mayê hakka, hakka hakka*" (Oh! my jaw, my jaw, my jaw). This cry and the enmity between the jackals and wild fowls are still preserved.

The Crow and the Drongo.

In a previous birth, it is said —

(a) The king-crow or drongo (*karudu panikkiya* or *kaputu bēnd*) was a barber and it now pecks its dishonest customer the crow.

(b) The crow and the drongo were uncle and nephew; and they laid a wager as to who would fly the highest, each carrying a weight with him. The winner was to knock the loser on the head. The crow selected some cotton, and his nephew a bag of salt as he noticed the clouds were heavy with rain. On their way up a shower came and made the crow's weight heavier and impeded his flight, while it diminished the other's burden, who won the day.

The Scar on the Cock-sparrow.

Once upon a time a house, where a pair of sparrows (*yêkurullô*) had built their nest, caught fire. The hen flew away, but the male-bird tried to save his young and scorched his throat. This scar can still be seen.

The Water-fowl, the Geese, and the Woodpecker.

The water-fowl once went to his uncle's and got areca-nuts to sell. He engaged some geese to carry them to the water-side and hired a woodpecker's boat to ferry them over. The boat capsized and the cargo was lost. The geese deformed their necks by carrying the heavy bags, the woodpecker (*kérralâ*) is in search of wood to make another boat, and the water-fowl (*korawakâ*) still complains of the nuts he had lost.

The Peacock and the Brachyura Pitta.

The peacock once fell in love with the swan king's daughter (*hansa rājyâ*), and, when going to solicit her hand, borrowed the *pitta* or *avichchiya*'s beautiful tail. He succeeded in winning her,

but refused to give up the plumes to the owner, who always is crying "*avichchi mavichchi*" (I shall complain when he (Maitri Buddha) comes). The peahen, angry at her mate's deception, pecks at her train during the pairing season. Another story says that the peacock stole the plumes while the *pitta* was bathing, and that the latter's cry is "*ayittam, ayittam*" (my garment, my garment). A third legend makes the *pitta* a sorrow-stricken prince mourning for his beautiful bride, Ayittā.

The Spotted Dove.

A woman put out to dry some flowers of the *Bassia longifolia* (*mīmal*) and asked her little son to watch them; when they got dry they stuck to the ground and could not be seen. The mother found them missing and killed the child for his negligence. A shower of rain just then showed to her the parched herbs, and in remorse she killed herself and was born a spotted dove (*alukobeyiyā*) who now laments, "*mīmal latin daru nolatin pubbaru putē pūpā*" (I got back my *mī*-flowers but not my child; O my young son, my young son).

The Devil Bird.

A husband who suspected the fidelity of his wife killed his child and made a curry of its flesh and gave it to the mother. As she was eating of it, she accidentally found the finger of her infant; she flew into the forest, where she killed herself and was born the ominous and death-presaging devil-bird (*ulumā*).

The Viper and the Cobra.

During a certain hot season a child was playing inside a tub full of water and a cobra drank of it without hurting the child. A viper (*polongā*) met him on his way home and was told where he had quenched his thirst, on the condition that the infant was not to be injured. As he was drinking, the little child playfully struck him with his hand and was bitten to death. The cobra killed the *polongā* for breaking its promise, and this hatred is maintained to this day.

The Coconut and Areca Tree.

An astrologer of the Beravāyā caste once told a king that a particular day and hour was so auspicious that anything planted then would become a useful tree. Thereupon the king directed the astrologer's head to be severed and planted, and this grew into the crooked cocoanut-tree. The king was so pleased with it that he got his own head also planted and it became the straight areca-tree.

The Jack-fruit.

That this fruit may be eaten by the people, Sakkarayā (Indra) came to earth as a Brahman, plucked a fruit and asked a woman to cook it without tasting. The smell was so tempting that she stealthily ate of it and was called *Heralia* (*Hera*, thief, + *liya*, woman) by the stranger. Hence the fruit is also named *Heraliya*.

The Club Moss.

A king directed a jeweller to work in gold a design similar to the club-moss. The goldsmith found this so hard that he went mad, and the moss is now styled *badal vanassa* (*badal*, jeweller, + *vanassa*, curse).

Proverbs.

There are very many proverbs in daily use, and the following are a few specimens:—

(1) *Donnā demallangē sanduva bathēliya pehenakan vitarayi* — The quarrel between husband and wife lasts only till the rice-pot is boiled.

(2) *Eka pansalē inna mahanunnānselāti kudamiti haravā gannavālu* — Even priests that live in the same monastery turn their umbrellas at each other.

(3) *Rajek ambu ganitnam dugiyek kâta pavasayi* — When the king takes the wife to whom is the poor man to complain.

(4) *Kandata ballâ biruvata kanda mitivêda* — Though a dog barks at a hill will it grow less.

(5) *Kesbêvi bittara siyagananak lã kisi sabdayak nokaratal kikili eka bittarê lã gam kipêkata ehenta sabdakaranavâlu* — Though the tortoise lays a hundred eggs and makes no noise, the hen crows over her one egg for several villages to hear.

(6) *Atisârêta amuda gehuvâvagey* — It is like wearing a crupper to cure dysentery.

(7) *Gaha uda miya dèkald engili levakanavâ-vagey* — It is like licking your finger on seeing a beehive on a tree.

(8) *Ketê muvô kévâta gedara tibuna gôna hamata tadibêvâ vagey* — It is like flogging the elk-skin at home to avenge on the deer who trespassed in the fields at night.

(9) *Angurak kiren sôdd sudu karanta berilu* — It is not possible to make a charcoal white by washing it in milk.

(10) *Puhul horê karen dèneyi* — Who steals ash-pumpkins will be known from his shoulder.

*The Hare and the Jackal.*³⁰

Once upon a time a hare and a jackal were sweeping a compound (*midula*) and they found two pumpkin-seeds (*labueta*); these they planted, but only one grew, as the jackal nourished his with his urine, while the hare did so with pure well-water. The hare agreed to kindly share the pumpkin with his friend, and the jackal proposed a ruse to obtain the other requisites for preparing their meal, viz., firewood, cocoanut, salt, rice, and earthen utensils. The hare laid himself on the high road as if dead, and when any *pingo*-bearer carrying what they wanted appeared, the jackal cried out, "keep the *pingo* down and kindly take away that dead hare." As the foolish peasant did as he was requested, the jackal carried away his *pingo* and the hare scampered away. After the meal was kept on the fire, the wily jackal asked the hare to procure for him some stalkless *Macaranga tomentosa* leaves (*kenda kola*) and stones with roots. The hare wandered far and wide to find them without success; he returned home late, tired, and asked for his share of the meal. He was directed to the rice-pot, but he only found there a few grains of rice. The insatiate jackal asked for half of that, too; and then ordered the hare to stroke his back. The hare noticed a cocoanut husk (*polmuduva*) acting as a stopper underneath his tail, and, at the jackal's request, pulled it out and was besmeared with his excretion. He ran to a neighbouring mead, rolled himself well on the grass and came back "as white as wool," determined to revenge himself on the jackal, who wanted to know how he was so clean. The hare told him that the *dhobi* washed him, and the jackal, for once foolish, ran to the river-side and requested the washerman to wash him. The *dhobi* took him by his hind-legs and thrwacked him, till he died, on the washing-stone, saying, "This is the jackal who ate my fowls."

*The Story of Hokkâ.*³¹

Once upon a time there was a Gamarâla who had contracted such an abhorrence to the expression "*Aniccan dukkhan*" (this is a phrase in every-day use among the Singhalese; it means literally "sorrow is not eternal," and is used to express surprise or astonishment) that he formed a resolution to cut off the nose of any person, no matter who, that would dare utter it in his hearing. In

³⁰ This is the first tale told to a child, who is never tired of hearing it repeated.

³¹ From the *Orientalist*, Vol. I. (1884), Part VI. p. 181. This is an entertaining specimen of a Ceylon folk-story. The range of Singhalese tales is not yet fully explored.

order to carry out this extraordinary resolve, he always had in his pouch a sharp knife, and, as soon as ever he heard the words in question fall from anybody's lips, he would rush madly upon him, seize him by the throat and cut his nose completely off. Many of his servants, and others, too, with whom he had to do, had their noses cut off, for no other fault than for uttering these words in his hearing. Some did so through ignorance of his resolution, others by not having a sufficient guard over the door of their lips.

The story goes on to say that, not far from the Gamarāla's village, there lived two brothers, the elder of whom was a dullard — obtuse and foolish — while the younger was sharp as a needle, and had all his wits about him. The elder brother set out one day in search of work, and, happening to come to the Gamarāla's house, was lucky enough to be taken into his service. He worked away hard as he could, and the Gamarāla was so pleased with him that he treated him more kindly than he ever did any of his other servants. One day, however, being astonished at some strange behaviour on the part of a fellow-servant, the man let the words "*Aniccan dukkan*" escape his lips in the hearing of the Gamarāla, who immediately rushed upon him with frantic rage, seized him by the throat, and mercilessly cut off his nose. No sooner was he out of the clutches of the eccentric Gamarāla than he made off as fast as he could, and reaching home, covered all over with blood, related to his brother the sad and strange adventure which had befallen him. Hokkā (for that was the name of the younger brother) was sensibly affected by the recital of the story, and he made up his mind to pay off the Gamarāla in his own fashion. So he said to his brother, "Be not sad, my brother, at the misfortune that has overtaken you, as the fruit of your actions in a former birth. Stay at home till I go, in my turn, and earn some livelihood for us." So saying he consoled his brother, dressed his wound, and set out for the house of this very Gamarāla, who, after a few preliminary inquiries, took him readily into his service, telling him at the same time, that, if he conducted himself well and performed his duties satisfactorily, he might rely on being handsomely rewarded.

Hokkā then reverently approached him, and said to him, "Will your honor be pleased to set apart some special work for me, so that I may give it my undivided attention." "Go then and look after my cattle" (*shenan gohin magē harak bald piya*) replied the Gamarāla. These words mean literally, "Go then and look at my cattle." Pretending to take the cattle for pasture, Hokkā drove them to the wood, tied them to some trees in such a way that they could not graze, and, sitting down at a place from which he could have a sight of them, he kept on gazing at them all day long. This he did for several days, and during all the time the poor cattle had neither grass to eat nor water to drink.

It was customary with the Gamarāla to examine his cattle periodically. So one morning he ordered Hokkā to bring them up for inspection. The famished beasts were loosened from the trees by Hokkā, but not having strength to move, they fell down at the foot of the trees, and lay there more dead than alive. Thereupon Hokkā hastened into the presence of the Gamarāla and said to him, "The cattle refuse to come or even to rise, so may it please your honor to accompany me to the wood." When the Gamarāla got there, he found, to his great horror, that the poor animals were about to expire. Turning round, his whole frame quivering with rage, he said to Hokkā, "Did I not bid you to look after (literally look at) the cattle." "And does your honor mean to say that I did not look at them?" replied Hokkā. "I was looking at them incessantly; meal-time and night along excepted." The Gamarāla very naturally concluded that the man was dull as a beetle and took the words "look at" in their literal sense, and was thus the innocent cause of the destruction of his cattle. He therefore did not wish to turn him out, but retained him in his service, resolving, however, to be very precise, for the future, in the orders he would give him.

Some days after, the Gamarāla found that his large house (for he had two, one large and the other small) required to be thatched. So he said to Hokkā, "*Mahāgē, pidurusakapiya*." The word

"*mahāgé*" means "the large house," and also "the old woman." Hence the order may mean, "cover the large house with straw," or "cover the old woman with straw."

This was sufficient for Hokkā. As soon as the Gamarāla left home on his daily business, Hokkā collected a large heap of straw near the house, and carrying thither the Gamarāla's mother, laid her prostrate on the ground and covered her with the whole heap, so that she was suffocated to death. "Now lie there comfortably, you old hag," said he, and went away to attend to his ordinary work. When the Gamarāla returned home in the evening, he found only a heap of straw near the house, and the house itself unthatched. So he said to Hokkā, "How is it, you vagabond, that you have not obeyed my orders?" "Not obeyed your orders?" said Hokkā, "why, what makes you think so? Come and see whether the old lady is not under the straw as snug as ever." So saying he removed the straw, when the Gamarāla to his great horror beheld the corpse of his poor mother. On this occasion, too, the Gamarāla forgave the man, for he attributed the mistake to his natural deficiency of intellect, and was, moreover, unwilling to part with so hardworking a servant.

Some time after this sad occurrence, the Gamarāla received the mournful intelligence of the death of his son-in-law, who was living in a village about a day's journey from the Gamarāla's house. So he made up his mind to pay his widowed daughter a visit of condolence, and ordered Hokkā to hold himself ready for the journey. At dawn, the next morning, the Gamarāla and his man left home, after taking a hearty meal, and continued their march till noon, when, finding themselves weary and hungry, they sat down to rest under the shade of a large tree. Having nothing with them in the shape of food, the Gamarāla handed some money to Hokkā, and bade him go and buy something for them to eat. After going a great distance, Hokkā found a bunch of ripe plantains exposed for sale in a hut, and bought sixteen plantains with the money. He then reflected thus: "If I take these sixteen plantains to my master he will assuredly give me half the number, contenting himself with the other half. I do not see, therefore, any reason why I should wait until he gives me my share. I may as well eat it here at once." So he ate up eight plantains and started afresh with the remainder to get to his master. After proceeding a short distance, he was sure that the Gamarāla would give him half of the eight remaining plantains, and he therefore ate four more of the number. After going a little further, he ate two more, and still a little further he swallowed one more, reasoning on each occasion as he had done before. There was only one plantain left for the Gamarāla, which Hokkā, on his return, respectfully offered to him. "Is it only one single plantain," said the Gamarāla, "that you have been able to buy for so much money, you big ass" (literally, "you big bullock," *ali gonō*). "No, your honor," answered Hokkā. "I bought sixteen plantains with your money." "Where then are the other fifteen?" rejoined the Gamarāla. "I ate them" was the innocent reply. "How did you dare eat them, you dog?" (literally, "How did you eat them, you dog?") said the famished Gamarāla. Upon this Hokkā held the plantain in his left hand, peeled it with the right, and suiting the action to the words, he said, "This is the way I ate the plantains, your honor," and slipped the plantain down his throat.

The Gamarāla now suspected, and with good reason too, that the man was more a knave than a fool, although he looked very innocent, but suspended his judgment till further experience would enable him to get at the truth. He was very weary and hungry, and having no more money with him, was altogether in a sad plight. Resolving, therefore, to continue his journey, he went on and found himself towards evening within a few yards of his daughter's house. As customary with the Singhalese, he sent Hokkā beforehand to inform his daughter of his arrival. On reaching the house Hokkā said to her, "Your father is come to pay you a visit of condolence, and is already within a few yards of your house. He is under medical treatment, and the physician has desired him to eat nothing else but seven-years-old *kudu*" (the dust of the paddy found between the husk and the seed). So saying Hokkā returned to the place where he had left the Gamarāla, and, in the meantime, the

Gamarāla's daughter set about collecting *kudu*, as old as she could get from her neighbours, and prepared a kind of pulp with it. The Gamarāla was soon at his daughter's house. After the exchange of the customary salutations the *kudu* pulp was served up. The surprised Gamarāla could not guess at the cause of all this, for he had given no offence to his daughter to deserve such treatment at her hands. He felt exceedingly slighted and insulted, but concealing his feelings, he ate the pulp merely because he had nothing else to satisfy his hunger with, and resolved on quitting the house without a word to his daughter.

When the night wore on, the Gamarāla set out with Hokkā to return home. He trudged on as well as he could, and on the following evening he was within a few yards of his own house. Here he sat down on the stump of a tree, and sent Hokkā forward to inform his wife of his return and of the miserable situation he was in. Hokkā ran up to the house, and, rushing into the presence of his mistress, said to her, "Your husband is back almost exhausted with hunger and fatigue. To show your sympathy with him in his present unhappy condition, you had better put on sooty rags and meet him on the *edanda* (a small narrow bridge over a canal or stream, constructed with single logs) sitting on the middle of it, like a half-starved dog (*belli*)."
He then returned to the Gamarāla and led him over the *edanda*, and coming up to the spot where the Gamarāla's wife was seated, kicked her down into the deep stream below saying, "Get away you filthy dog (*belli*), what business have you here?" Of course, the poor creature tumbled down into the canal and met with a watery grave. The Gamarāla knew nothing about it, as it was dark, but he went on (poor wretch) fully believing that what Hokkā pushed out of the way was really a dog (*belli*).

Not finding his wife at home when he got there, he thought she had gone on a visit somewhere. He then ordered Hokkā to prepare a tepid bath for him, but Hokkā made the water as hot as possible, and, taking the Gamarāla to the bath, poured on him a pot of the boiling water, which so scalded him as to make him scream out pitifully. Being now fully convinced that Hokkā was not the innocent greenhorn he had always taken him to be, the Gamarāla involuntarily gave vent to his surprise by exclaiming, "*Aniccan dukkan mu mata karana ēvāyē hēti*" (dear me, see what this fellow is doing to me). Scarcely were the words "*Aniccan dukkan*" out of the Gamarāla's mouth, when Hokkā seized him by the throat in the same manner as he had heard he had seized his brother, and drawing out of his pouch a sharp knife with which he had provided himself before he left home to seek employment at the Gamarāla's, he cut the Gamarāla's nose clean off, so that not a vestige of it remained on his face. Without losing a single moment he ran as fast as his legs would carry him, with the Gamarāla's nose safe between his fingers, and got home quite out of breath. Finding his brother squatted at the hearth and warming himself, he gave him such a kick on the hind part of the head, as brought his face in contact with the *lig-gala* (hearth-stone) and made the wound in his face bleed. He then made his brother rise, and taking the Gamarāla's nose, he fixed it on the spot where his brother's own nose stood before, in such a way as to make it fit the place exactly. He then bandaged it, after applying to it the juice of a plant which has the power of healing cuts. In a short time the Gamarāla's nose became a part of his brother's face, and he was able to breathe through it freely and to perform with it all the functions of a nose just as he had done before the Gamarāla had chopped his nose off.

National Tradition.

In simple faith, from sire to son, are handed down two national traditions that a Lion and a lascivious Royal Princess were the progenitors of the Singhalese race (*singha*, lion, + *la*, blood); and that there will be born among the people a great emperor, Diya Sēna by name, who will free them from their bondage, extend his sway over the continent of India, and enable them to perform their ceremonies and festivals once again under the shadow of their own flag.

There is reason to believe that the Singhalese are a highly mixed race, and it may be stated as a working hypothesis that the several castes, except the predominating Govi or Grahapati caste, formed tribes of a pre-historic settlement in Ceylon, intermarrying with an earlier people the autochthonic Veddas; that they were displaced by the Govi race, the Singhalese proper, who, while imposing on them the Aryan language and Buddhism, adopted and developed the existing animistic ideas and the rude social organization. Of course, their blood freely intermingled, though not by regular marriages, and, at a later date, the frequent intercourse with the South Indian kingdoms led to the incorporation of Dravidian captives and emigrants with the thinly populated castes and to a further development in their beliefs and practices.

CORRESPONDENCE.

NAVAGRAHA.

SIR, — In connexion with Mr. Burgess' Article on the Navagraha, *ante*, p. 61 ff., I wish to invite attention to the Singhalese representations of the heavenly bodies and their presiding divinities in Upham's *History and Doctrine of Buddhism*, published with coloured plates in 1828. The

Sun rides on a horse, Mercury on an ox, Mars on a peacock, Rāhu on an ass, Saturn on a crow, Venus on a buffalo, Kētu on a swan, Jupiter on a lion, and the Moon on an elephant.

ARTHUR A. PERERA.

Flower Road, Colombo,
17th May 1904.

NOTES AND QUERIES.

HOBSON-JOBSON.

IGNORANCE in English writers of common Indian things takes a lot of killing; witness the latest literary contribution to Hobson-Jobson. It is from the *Daily Mail* of Saturday, April 2, 1904, and contains about the usual number of complete errors made whenever that annual feast is discussed in the Press.

Hobson-Jobson, Hindoo Religious Festival.

During the past few days the Hindoo workers on the various vessels in the London docks have been celebrating their annual religious festival, commonly known in Western countries as Hobson-Jobson.

The last four days of March are always set apart (!) by the Hindoos (!) for the observance of one of their principal religious rites. This year, however, there were not many vessels in the Royal Albert and Victoria Docks (London), and consequently the celebration was shorn of some of its pomp and ceremony.

To the uninitiated the outward "show" appears a ridiculous farce, but apparently the Hindoo regards it as a most solemn festival. It would be almost impossible to describe the dresses and adornments of the principal characters taking part in the ceremony.

The procession was preceded by a crude representation of a horse. To make up this a Hindoo

was encased in a wooden skeleton of a horse with a movable head, which was held under control by reins.

No little consternation was caused among the crowd assembled to witness the celebration when this strange creature charged into them. Following the horse were several gaudily dressed Hindoos, bearing aloft strange devices. Behind these came several tom-tom players, and musicians discoursing on whistles, accordions, and cornets. Following these were dancers, persons who appeared to be engaged in a scuffling match. Some were padded abnormally; whilst others were made up to represent bears and dogs.

Then came the "well-conducted" Hindoos, walking in a steady manner, reciting various prayers and exhortations. Even these had gone to the trouble to decorate themselves for the occasion with ear and nose rings. Last of all came the temple, which was carried on the shoulders of four stalwart Hindoos. It resembled a large doll's house, and was decorated with gaudy ribbons.

This procession has marched several times round both the Albert and Victoria Docks, a distance of several miles, and at the close of the festival the temple was burned, the Hindoos present making a great display as the last vestiges of the construction were destroyed.

R. C. TEMPLE.

4th April 1904.

TATTOOING IN CENTRAL INDIA.

BY CAPTAIN C. E. LUARD, M.A.,
Superintendent of Ethnography in Central India.

(Continued from p. 228.)

II.

THE MĀLAVĀ OR WESTERN SECTION.

1. Tattooing among Mōchīs in Mālavā.

(Collected by Mr. D. F. Vakil of Railām.)

TATTOOING is confined to the female sex. The following parts of the body are tattooed:— The forehead, the part between the eye-brows, the left side of the nose, the breast or chest, the upper arms, the forearms between the elbow and the wrist, the backs of the hands and the calves of the legs. Tattooing is generally commenced at the sixth or seventh year of age, and may be done at various periods, sometimes even after the twentieth year. The designs are generally ornamental, and little or no significance is attached to them. Only one of two colours, black or green, is employed.

The designs.

(a) On the back of the hand a figure called Sāthia —

(b) On the fingers of the right hand —

(c) Between the wrist and elbow of the right arm —

(d) On the right arm a pair of peacocks —

(e) On the left hand (just below the elbow) —

(f) On the left arm the figure of a Barā or armlet —

Also the Dehli Darwājā, as it is called —

(g) On the breast or chest a pair of peacocks and a cuckoo below them —

(h) On the left side of the nose spots —

(i) On the chin a spot —

2. Tattooing among Labhānās in Mālavā.

(Collected by Mr. D. F. Vakil of Ratlām.)

Among Labhānās males and females are both tattooed. Among Banjārās tattooing is confined to the female sex only. In the case of Labhānā males, it is confined to the part between the elbow and the wrist, hands, chest, thighs and feet. The marks are found more commonly on the face and the hands. Tattooing is generally commenced before marriage between the eighth and fifteenth year of age.

Men tattoo on their hands a dagger —

Women tattoo on the back of their hands —

Between the wrist and elbow a Svāstika —

On the cheeks a circle —

On the chin a dot —

Between the two eye-brows —

Round the neck —

3. Tattooing among Bhils in Mālavā.

(Collected by Mr. D. F. Vakil of Ratlām.)

Tattooing may be said to be wholly confined to the female sex, the males being tattooed in rare cases only, the custom differing from that in Bhōpāwar. The forehead, the backs of the hands, and the legs are generally tattooed. The marks are found most commonly on the legs. Tattooing is commenced at the age of nine or ten, and it is done at once and not at various periods. No ceremony is connected with it. No professional tattooers are employed; the women tattoo their own relatives or friends. On the back of the hand a flower or the figure of a woman with a water-pot on her head, and on the calf of the leg a mango-tree, are the usual designs. Black is the only colour used.

On the forehead a spot —

On the hands spots or flowers —

On the calf of the leg a mango-tree —

A Paniāri, i.e., a female with a water-pot on her head —

4. Tattooing among Mhārs of Mālavā.

(Collected by Mr. D. F. Vakil of Ratlām.)

Tattooing is invariably confined to the female sex. Males are never known to tattoo. It is confined to forehead, chin, cheeks, and the part between the wrist and elbow. These parts are most exposed to view, and as the main object of tattooing is decoration, parts which are covered by garments are generally not tattooed. It is commenced at the age of seven or eight years and always before the marriage ceremony takes place. The designs employed are figures of the Tulsī, the lotus-flower, the ornamental border of Sītā's sārī, the crescent, &c. Sometimes the words राम नाम, Rām-nām, and श्रीनाम, Śrī-nām, are pricked on the hand. The forehead is generally tattooed first. The Mhār women here do not get themselves tattooed on the breast or abdomen.

On the forehead the crescent with wheat-grains above and below —

Spots on the chin and cheeks —

Between the wrist and the elbow, flowers, trees, words, border of Sitā's sari, &c. —

PAṢI

JHĀṢI

रामनाम आनाम

Names.

Fringe of Sitā's sari.

5. - Tattooing among Mālavā Brāhmanas, Ohhānyatis, Sarvariya, &c.

(Collected by Mr. D. F. Vakil of Ratlām.)

Tattooing is confined to the female sex only. Tattoo marks are generally made on the following parts of the body: — Forehead, nose, chin, hands, arms, breast, legs and feet. Among the local Sarvariya Brāhmanas, who are a branch of the Kanyākubja Brāhmanas, a girl is tattooed immediately after her marriage. Virgins are not tattooed. Among the other Brāhmanas tattooing is commenced at about the seventh or the eighth year, irrespective of whether the girls are married or unmarried. No ceremony is connected with it, but molasses and sweets are distributed among the women present. Among Sarvariya Brāhmanas Nāṇis (female acrobats) are employed, but among others the elderly female members of the family tattoo the young girl. Only one colour is employed — green. The marks are chiefly made on hands, chin, cheeks and forehead.

On the back of the palm —

On the fingers —

On the feet —

On the hand

, and the figure of Sitā cooking —

On the cheeks —

On the lower lip —

On the chin —

On the forehead —

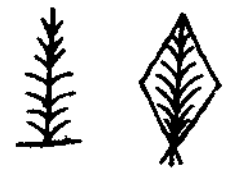

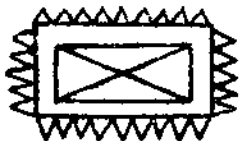

6. Tattoo Marks from the Dhār State.

(Partly Mālavā, partly Jungle Section.)

(Collected by Mr. W. T. Kapse of Dhār.)

Males.

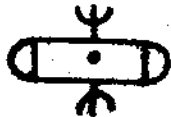

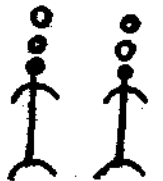

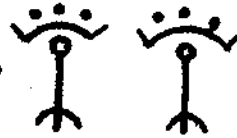

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|----------------------------------|---|--------------------|--|
| 1 | On both the temples ... |  | Ākhyā, आख्या .. | The temples. |
| 2 | On the chest ... |  | Ghōḍā, घोड़ा ... | Horse. |
| | |  | Mōra, मोर .. | Peacock. |
| | |  | Bichhū, बिचू .. | Scorpion. |
| 3 | On the shoulders ... |  | Āmba, आम .. | Mango-tree. |
| 4 | On the arms ... |  | Kaṭyār, कट्यार ... | Dagger. |
| 5 | Between the elbow and the wrist. |  | Phūl, फूल .. | Flower. |
| | |  | Chaupāta, चौपट... | A piece of cloth on which the game of सोंगटी, Sōngaṭī, is played with two or three dice. |
| | |  | | |

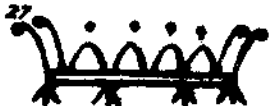

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|--------------------|---|-----------------------|---|
| 6 | On the wrist ... |  | Javaurdānō, जवचोराने. | Barley grains. |
| | |  | Chauk, चौक ... | A square (in marriages thread investitures, &c.) formed with wheat, rice, &c., spread on a cloth which covers a stool (pāṭ) prepared as a seat for the boy or girl. |

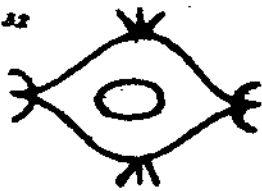

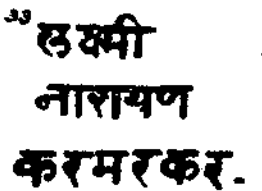

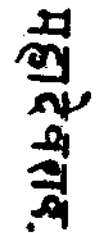

Females.

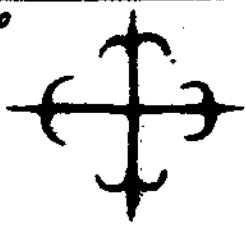

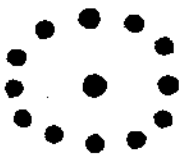

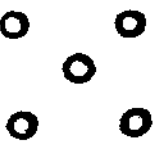

| | | | | |
|----|-------------------------------------|---|---------------------------------------|---|
| 7 | Between the eye-brows... |  | Chandrakōr, चंद्रकोर | The new moon. |
| 8 | On the left side of the nose |  | Āngārā, अंगारा ... | A talismanic mark to avert the influence of the evil eye. |
| | |  | Chandrakōra āngārā, चंद्रकोर व अंगार. | The new moon, with the ornamental mark. |
| 9 | On the right cheek ... |  | Ṭipkā or Dāpā, टिपका-दापा. | Dot. |
| 10 | On the lower lip ... |  | Do. do. | Do. |
| 11 | On the chin ... |  | Do. do. | Do. |
| 12 | Between the shoulder and the wrist. |  | Sīta kā hāta, सीताका हात. | The hand of Sītā. |
| | |  | Nisarṇī, निसरणी ... | Ladder. |
| | |  | Bāvalyā, बावल्या ... | The bābūl tree (<i>Acacia arabica</i>). |

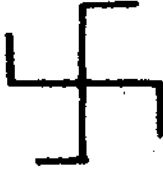

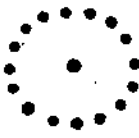

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|--|---|--|---|
| 12 | Between the shoulder and the wrist—(contd.). |  | Chānd, चाँद ... | The moon. |
| | |  | Sūraja, सूरज ... | The sun. |
| | |  | Rāmnām, रामनाम... | The name of Rāma. |
| | |  | Panayārav, पनयारव. | Women fetching water-pots. |
| | |  | Pāñche, पाँचे ... | Five square coloured pieces made of lac for girls to play with. |
| | |  | Chakra, चक्र .. | A discus. |
| | |  | Gadā, गदा ... | A mace. |
| | |  | Chālani, चालनी ... | A sieve. |
| | |  | Putlī, पुतली ... | A pair of dolls. |
| | |  | Sitā Mātā ki Rān-dhapi. सीतामाताकी रांधनी. | Sitā's kitchen. |
| 13 | |  | Sitā Mātā ki Rān-dhapi, सीतामाताकी रांधनी. | Sitā's kitchen. |

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|--|---|--|---|
| 12 | Between the shoulder and the wrist—(contd.). |  | Bāvalyā, बावलया... | The bābūl tree (<i>Acacia arabica</i>). |
| | |  | Tulsī Kayārī, तुलसी कयारी. | Tulsī plant in a pot. |
| | |  | Gōrbasnyā, गोरबस-न्या. | The throne of Gaurī or Pārvatī. |
| | |  | Rāmnāma ... | The name of Rāma. |
| | |  | The Gavaṇṇī, गवळणी. | Milkmaids. |
| | |  | Rāma Lakhsman kī Jōḍī, रामलक्ष्मणकी जोड़ी. | Rāma and his brother Lakshmana together. |
| | |  | Bēḍō, बेड़ी | Water-pots. |
| | |  | Paltāna, पलटन ... | Infantry. |
| | |  | Sātyā or Svāstika, सात्या. | Svastika. |

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|--|---|--|---|
| 12 | Between the shoulder and the wrist—(contd.). |  | Kanhayyā kā Mu- guṭ, कन्हैयाका मुगुट | Kanhayya (Kṛish- ṇa's crown). |
| | |  | Chhā dāṇē, छे दाने. | Six dots. |
| | |  | Tulsi Kayārā, तु- लसी क्यारा | Bed of Tulsi plants. |
| | |  | Mōra | ... A peacock. |
| | |  | Chudiyā or Bāju- bāṇḍa, चुड़ीया बाजुबंद. | An ornament on the arm or bangles. |
| | |  | Hiraṇ ki Jōḍī, हिरणकी जोड़ी | A couple of deer. |
| | |  | Chaupat, चौपट ... | Cloth on which the game of Sōṅgaṭi is played. |
| | |  | Hāthī, हाथी | ... An elephant. |
| | |  | Bāvaḍī, बावड़ी | ... A well with steps. |

| No | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|----|--|---|---|--|
| 12 | Between the shoulder and the wrist—(contd.). |  | Sitā Mātā ki Ka- dhai, सीतामाताकी कढ़ई. | Sitā's frying-pan. |
| | |  | Lakshmi ... Nārāyaṇ ... Karmarkar ... | The name of the woman, her husband and his surname. |
| | |  | Mahādev Rāv ... | |
| | |  | | |
| 13 | On the wrist ... |  | Jāva, जव ... | Barley grain. |
| | |  | Pīyar ki Vāt, पीयार की वाट. | The way to a mother's house (i.e., the way of love). (This is always more pleasant than the one which leads to the mother-in-law's house! Hence its name.) |
| | |  | Sankha, संख ... | A conch-shell. |

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|--------------------------|---|----------------------------|---|
| 13 | On the wrist—(contd.)... |  | Trisūla, त्रिशूल ... | Tridents. |
| | |  | Gōrbasnyā, गोरब- सन्धा. | A throne of the goddess Gaurī or Pārvatī. |
| | |  | Chālnī, चालनी ... | Another variety of sieve. |
| | |  | Phūl, फूल .. | Another variety of flower. |
| | |  | Kūī, कुई ... | A well. |
| 14 | On the fingers .. |  | Dāṇā, दाणा ... | A dot. |
| | |  | Chānd, चांद .. | Moon. |
| | |  | Java, जव .. | Barley. |
| | |  | Lavaṅgō, लवंग .. | A clove. |

| No. | Parts of the body. | Design. | Name of Design. | Meaning of Design. |
|-----|--------------------|---|---------------------------|--------------------|
| 15 | On the abdomen ... |  | Tarājvā, तराजवा ... | A balance, scale. |
| | |  | Satyā, सत्य, or Svastika. | Svastika. |
| | |  | Phūl | A flower. |
| 16 | On the legs ... |  | Jhāḍa, झाड़ ... | A tree. |
| | |  | Phūl, फूल ... | A flower. |
| 17 | On the feet |  | Dāṇē, दाने ... | Dots. |

(To be continued.)

SOME ANGLO-INDIAN TERMS FROM A XVIITH CENTURY MS.

BY SIR RICHARD C. TEMPLE, BART.

(Continued from p. 206.)

PAGODA.

Fol. 4. theire Chiefe God of all is in forme of a man Somethinge deformed, & is Set up in theire great Pagoda, or temples, . . . wth many Others Set up in theire Pagod Courts.

Fol. 9. In this theire Cathedral Pagod.

Fol. 57. they have . . . large ffabricks of Stone called Pagods . . . theire most holy and Esteemable Pagod Jn^e Gernaet.

Fol. 84. The Bengala's (viz^t y^e Jdolatrous people of y^e countrey) have very Strange ways of worshippinge their Gods (or rather Devils) they Set up in their Pagods, as alsoe in theire owne houses.

Fol. 87. Dureinge y^e time of Sicknesse y^e Brachmans, some of them are very diligent to sitt by them and pray, Seldom leavinge off Vntill y^e Party be quite dead, Especially to put y^e party in mind of y^e Pagod, to leave to it accordinge to his abilitie.

See Yule, *s. v.* Pagoda: also *ante*, Vol. XXII. p. 27.

PAGODA.

Fol. 20. Noe man is admitted to marry Vlesse he can purchase moneys to y^e Value of 20 or 25 pagods a coine very Current here [Choromandel].

Fol. 31. much moneys 10 or 20: thousand Pagodes, (each Value 9^t).

Fol. 32. this very Commoditie Salt draweth into y^e King's Exchequer two Millions of Old Pagodos yearly.

Fol. 51. y^e Merchant giueinge 8: 10: 20 thousand Pagodos for a Small Spot of land [containing diamonds].

Fol. 53. Currant Coynes in this Kingdome [Golcondah]. ffort S^t Georg's, viz^t New Pagods here coyned passe all y^e Kingdome over att y^e Rate of 00^{lb} 08^s 00^d. Pallicatt The Pagod Valueth 00 08 06. Golcondah. The Old Pagod Valueth 00 12 00. Porto Novo & Trincombar. The Pagod there Coyned Valueth but 00 06 00.

See Yule, *s. v.* Pagoda. [The quotations in the text are valuable.]

PAINTINGS.

Fol. 31. Very Considerable quantities of these followinge Commodities are here [Pettipolee] wrought and Sold to fforaige Merchants viz^t . . . Painted Callicoes of diuers Sorts.

Fol. 49. This part of y^e Countrey [Narsapore] affordeth plenty of . . . Paintings.

Fol. 51. This Kingdome [Golcondah] . . . affordeth . . . paintings.

Fol. 157. Th Chiefe Commodities brought hither from Saratt: are . . . course Paintings.

[This useful word is not, though it should have been, in Yule. He quotes Fryer for 1678, *s. v.* palempore, thus: "Calicuts white & painted." See also *s. v.* Pintado. It meant what are now known as "prints" and "printed calicoes." *N. and E.* p. 85, for 5th Oct. 1680: "Advice received from Conjeveram that Lingapa had given leave for Paintings and Bantam goods to be brought into Town." P. 87, 27th Oct.: "Upon the discovery being made that

Pedda Yenkatadry's relatives, the Pedda Naigue, the Chief Painter with other painters . . . had left the Town privately." P. 42, 23rd Dec.: "The Malabar painters Tasherift.")

PALANKEEN.

Fol. 13. his retinue were as followeth . . . Six Palanchinos.

Fol. 20. the Bridegroom and bride are carried in a Palanchino.

Fol. 41. his Retinue of Attendants and Menial Servants are in great number, he keeps Severall Palanchinoes.

Fol. 43. A Palanchino is of y^e forme above described [drawing], beinge a longe Square frame about 6 foot in length and 8 or 3½ foot broad, very neatly inlaid wth Ivory and Turtle Shell of Excellent Workman ship plated with Silver . . . with a large Bamboe of about 15 or 16 foot longe, crooked in y^e middle for y^e conveniencie of sittinge Vpright, or may ly downe and Sleep in it.

Fol. 68. his lumber of travailinge Necessaries vizt Tents, Palanchinoes, Servants Souldiery &c.

Fol. 80. and thus with many faire wheedles, and comeinge downe (in person) to y^e barre with Store of Elephants, Palanchinoes &c pretendinge to waite for y^e kissinge of y^e Com-madore's hand.

Fol. 83. a Gentue in Hugly died and was brought downe to ye Riuer Side, his Widdow was brought downe in a Palanchino with very great attendance after their manner.

See Yule, *s. v.* Palankeen. [The quotations are good for the form of the word. *N. and E.* p. 25, for 28th June 1680, affords a valuable quotation here: "In consequence of a duty of Dustoor or Baratta having been exacted without authority by the Governour's Fallenkeen Boocys from all the coolies that carry Fallenkeens, it is resolved to let this right to receive the said Dustoor for one year for the sum of 20 Pagodas." See *ante*, Vol. XXX. p. 398 f.]

PALEMPORES.

Fol. 37. Metchlipatam. Affordeth many very good and fine Commodities, vizt all Sorts of fine Callicoes plaine and coloured, more Especially fine Pallampores for Quilts.

Fol. 49. This part of y^e Countrey [Narsapore] affordeth plenty of _____ Pallampores.

See Yule, *s. v.* Palempore. [A chintz bed-spread.]

PALMITO.

Fol. 29. y^e Groves consistinge of . . . Palmito . . . y^e Palmito is noe more then a rough Sort of Wood . . . they beare Some bunches of fruite very luscious, but noe way pleasant beinge noe better then wild dates, they afford liquor alsoe y^t drop from y^e top of it vizt from y^e younge branches and is called date Toddy.

Fol. 69. [Cuttack] adorned with . . . delicate Groves of . . . Palmito.

Not in Yule, though he quotes *s. v.* Toddy: "1611. Palmiti Wine, which they call Toddy." [In the text the *palmito* is the date-palm in contradistinction to the *palmyra* or toddy-palm.]

PALMYRA.

Fol. 18. they write Vpon y^e leaves of Palmero trees & wth a Sharpe pointed iron (for the penne) an antient (yea I suppose of y^e greatest antiquitie) custome, whence I doe Suppose wee had that Vsual word a leafe of paper.

Fol. 23. when they are younge (yea in their infancie) they have Small Ones [rings] made of palmero leafe thrust in [their ears].

Fol. 25. throwinge on much more combustible things, to wit dried palmero leaves or the like.

Fol. 29. y^e Groves consistinge of . . . Palmero . . . the Palmero tree affordeth that rare liquor formerly termed *Palme-Wine*, now vulgarly called *Toddy*.

Fol. 69. [Cutlack] adorned with . . . delicate Groves of . . . Palmero.

See Yule, *s. v.* Palmyra. [The quotations above are nearly all valuable.]

PALMYRA, POINT.

Fol. 59. Point Palmeris y^e Entrance into y^e Bay of Bengala a very wild Open bay that Extendeth it selfe from Point Conjaqueres to Palmeris.

Fol. 61. the Sea or Gulph of Bengala : viz^t between Point Palmeris (the Entrance thereof).

See Yule, *s. v.* Palmyra, Point. [The quotations above are valuable.]

PARA.

Fol. 53. Measures [on Choromandel Coast] . . . The Para cont: (?) Markalls.

Not in Yule. [*N. and E.*, p. 23, for 3rd June, 1680, has a very valuable quotation here: "Eight small measures make one Tomb [= Mercall], Five Tombs make one Parra, eighty Parras make one Garce." It is a pity that the text has a blank just here.]

PARIAH.

Fol. 27. there are another Sort of inhabitants about this [Choromandel] Coast that are y^e Offscum of all y^e rest they are called Parjars, they are of noe Cast whatever.

See Yule, *s. v.* Pariah. [*N. and E.*, p. 34, for 21st Sept., 1680, has "every village has a Cancooly [clerk] and a Paryar [servant] who are employed in this office which goes from Father to Son."]

PATAM.

Fol. 35. Metchlipatam : Soe called from y^e Hindostan ore Moors Language word Metchli signifiinge fish and patam or Patanam a towne.

Not in Yule.

PATANI.

Fol. 145. Hee hath always been a great peace maker amonge y^e Neighbouringe [to Queda] Kings Viz^t Pattany & Johore.

Fol. 152. Pattanie, a Kingdome that is near neighbour to this [Queda] lyinge on y^e East Side of this great Neck of Land called y^e Malay Coast.

Not in Yule.

PATNA.

Fol. 64. y^e Government of the 3 kingdoms (namely) Orixa : Bengala : & Pattana : was Established Vpon Emir Jemla.

Fol. 67. In y^e yeare 1673 : the Emperour's Son he senda him into y^e Kingdome of Pattana.

Fol. 68. Many of the Grandees of these 3 Kingdomes mett their Prince at Pattana and the rest at Radja Mehal.

Fol. 97. Pattana : A Very large and potent Kingdome this is a Countrey of very great Trafficke & Commerce & is really y^e great Gate y^t Openeth into Bengala and Orixa The Chiefe Citty called Pattana : a very large and Spacious one indeed and is Scituate neare to the River of Ganges : many miles up.

Fol. 98. The English East India Company have a ffactory in Pattana, adjoyneinge to the Citty . . . The English Chiefe (by name) Job : Chanock : hath lived here many years.

See Yule, *s. v.* Patna.

PATTELLO.

Fol. 68. he laded 60 Patellas with Silver and by credible report tenne wth Gold Moors, each Patella not carryinge lesse one with another . . . then 25 or 30 tunns of Plate.

Fol. 98. great flatt bottomed Vessels, of an Exceedinge Strength wth are called Patellas, each of them will bringe downe 4 : 5 : 6000 : Bengala Maunds . . . Many Patellas come downe yearly laden wth Wheat and Other graine and goe Vp laden with Salt and bees wax y^e Kings onely commodities.

Fol. 101. Patella: The boats that come downe from Pattana wth Saltprester or Other goods built of an Exceedinge Strength and are Very flatt and burthensome.

See Yule, *s. v.* Pattello. [The quotations are valuable.]

PAWN.

Fol. 45. often chawinge Betelee Areca wth they call Pauns.

See Yule, *s. v.* Pawn.

PECUL.

Fol. 171. they carried away above 100 Picoul of fine Gold out of y^e Treasury.

See Yule, *s. v.* Pecul. [The Malay *ext.*] See also *ante*, Vol. XXVIII. 37 ff.]

PEGU.

Fol. 81. [Gong] made of fine Gans of Pegu.

Fol. 148. y^e Kinge of Syam . . . haveinge a warre of greater consequence in hand namely wth y^e Kinge of Pegu.

Fol. 157. Many Ships and Vessels doe . . . arrive in this Port [Achin] from . . . Pegu.

See Yule, *s. v.* Pegu.

PEON.

Fol. 41. his Retinue of Attendants and Menial Servants are in great number . . . 2 or 3 hundred Punes . . . Punes are noe Other then waiteinge men . . . they runne by his Palanchino or Elephant as foot boys.

Fol. 91. to Suppress y^e Leachery of him and his Punes.

See Yule, *s. v.* Peon. [The "boy" in "foot-boys" above is probably also an Anglo-Indianism: see Yule, *s. v.* Boy.]

PERAK.

Fol. 153. about 30 or 40 Prows they have y^e belonge to Queda y^e constantly trade to Dangaree : Ianselone : and Pera, some few to Achin.

Fol. 158. ffrom . . . Pera &c : on y^e Malay Coast little Save Tinne.

Not in Yule. [Perak is a Malay State having about 100 miles of coast line on the west of the Malay Peninsula.]

PESHGUSH.

Fol. 71. She a most mannish woman of these ages courageously sends him word she owed him nothings, nor had she ever rec^d any Piscoash from him whereby to make retaliation.

Fol. 72. Accordinge to his Expectation y^e English and Dutch Agents and their counceils went out in State to waite vpon him carryinge considerable **Piscashes** with them to present him with.

Fol. 73. see that they were forced to **Piscash** them accordinge to their owne demands.

Fol. 184. Two of y^e Grandees of his Councill must alsoe be **Piscashed** wth 6 pieces of fine Callicoes or Ohint each of them :

Fol. 146. y^e English Merchant presenteth him wth a piscash not Valuinge lesse then 50 pound Sterlinge When y^e Said Merchant cometh downe to Queda he **Piscasheth** y^e younge Kinge alsoe wth almost see much [in Value] as he did y^e Old one.

See Yule, *s. v.* *Peshoush*. [An obligatory gift to a high official.]

PETTAPOLY.

Fol. 31. y^e Next English ffactorie wee have is **Pettipolee** it lyeth to the S Ward of Point Due in a Sandy bay called **Pettipolee bay**, y^e English and Dutch have Each of them a ffactory in y^e towne.

Fol. 31. Great Abundance of White Salt is made in y^e Vallies of **Pettipolee**.

Fol. 32. Anno Domⁱ : 1672 I stroke downe to **Pettipolee** in a journey I tooke Overland from S^t Georg's to Metchlipatam.

Not in Yule.

PICAN.

Fol. 53. in Narsapore & y^e Villages 20 or 30 miles off they have a Small Sort of moneye made of lead like Swan Shot and are called **Picans** many hundreds of them passe for One Rupee.

Not in Yule.

PINE, PINE APPLE.

Fol. 150. They have Severall Sorts of very good fruit in the Countrey [Queda] **Pines**, of w^{ch} last they have in great abundance more then in any Other Countrey y^t Ever I was in y^e Figure of y^e **Pine Apple** as followeth [illustration].

Yule has no quotations for Pine-Apple, but see those *s. v.* *Ananas*.

PINJREE.

Fol. 43. With a Scarlet or broadcloth coveringe (called a **Pingaroo**) Stretched out Square [over a Palanchino].

Not in Yule. [*Pinjra*, *pinjra*, is ordinary Hindustani for a cage.]

PINTADO.

Fol. 7. alsoe very ingenuous in workinge Cotton Cloth or Silks, **pantados**.

See Yule, *s. v.* *Pintado*. [The Portuguese form of "paintings" (*q. v.*) or prints.]

PIPLY.

Fol. 73. he wold Every yeare Send downe to y^e Merchants in . . . **Piplo**.

Fol. 77. The Nabob and Some Merchants here and in Ballasore & **Piplo**.

Fol. 100. These Vse for the most part between Hugly & **Pyplo** & Ballasore.

Not in Yule, though it certainly should be. [One of the earliest Factories in Bengal.]

PLANTAIN.

Fol. 38. Each of these huge Annimals [elephants], must have at y^e least 70 : plantan trees laid in for his provender they never let them drinke any water at Sea, a **Plantan** tree beinge a Very liquorish thing Naturally and will not dry up much in lesse then 2 months.

Fol. 134. doth often Send us . . . plantans . . . all the fruite this countrey [Janselone] affordeth is Cocoanut Plantan . . . but noe fruit see plenty here as the Plantan.

Fol. 147. haveinge y^e tame E'ephants by them, and gool Store of victuals, as plantrees [contemporary form of "plano-trees"], younge bamboos and y^e like.

See Yule, *s. v.* Plantain [The last quotation is valuable.]

POLLICULL.

Fol. 49. The Dutch have a factorie 4 English miles above ours, & is called Pollicull: after y^e name of a Village there unto adjoyneinge.

Not in Yule. [Near Madapollam or Narsapore (*q. v.*).]

POMMELO.

Fol. 175. This Countrey [Achin] affordeth Severall Excellent good fruites, Namely . . . Pumple Mooses &c: and y^e trees beare fruite both green and ripe all y^e years alonge.

See Yule, *s. v.* Pommelo: the largest variety of orange.

PONDICHERRY.

Fol. 142. y^e Southermost parts of y^e Choromandell Coast, Vizt . . . Pullicherrie.

See Yule, *s. v.* Pondicherry. [The above is a most valuable quotation for the history of this name. *N. and E.* has, p. 20, for 23rd May, 1680, Puddicherry, and p. 25, for 28th June, Puddicherree.]

PONE.

Fol. 94. 4 burries make 1 Pone or 80: Cowries. 16 Pone make 1 Cawne or 1280: Cowries . . . They seldome rise or fall more then 2 Pone in one Rupee.

Not in Yule. [It is for *pāṇ*; see *ante*, Vol. XXVII. p. 170.]

POONDY.

Fol. 56. beinge a Very Secure Coast to harbour in namely in . . . Pondi.

Not in Yule. [Near Vizagapatam: see *ante*, Vol. XXX. p. 356.]

PORE.

Fol. 83. when he hath Struckon Seven: he then Striketh 1: vizt One Pore . . . and then Striketh 2 vizt 2 Pore: vizt midday or midnight, as 9 in y^e mornseinge Is one Pore, 12 att Noone is 2 Pore, 3 in y^e afternoone 3 Pore, O Settinge 4 Pore and soe of y^e night.

[For *pahrd*, a watch.] See Yule, *s. v.* Puhur, Ghurry, and Gong.

PORGO.

Fol. 100. A Purgoo: These Vse for the most part between Hugly & Pyplo and Ballasore: with these boats they carry goods into y^e Roads On board English & Dutch &c: Ships, they will lye a longe time in y^e Sea: being brought to anchor by y^e Sterne, as theire Vsual way is.

See Yule, *s. v.* Porgo: but see also *ante*, Vol. XXX. p. 160.

PORTO NOVO.

Fol. 41. y^e Kinge of Golcondah, Sole Lord and Kinge of all this Coast saveinge to y^e Southward of Porto Novo.

Fol. 53. Porto Novo & Tricombar.

Fol. 142. y^e Southernmost parts of y^e Choromandell Coast, Vizt Porto Novo.

See Yule, *s. v.* Porto Novo; who does not, however, trace the history of the place. [The following quotations from *N. and E.* are very valuable in this connection. P. 13, 20th March 1680:

"Intelligence received from Porto Novo that the Dutch have leave to settle a Factory there." P. 44, 6th January 1681: "Accordingly it is resolved to supply to the Soobidar of Seavage's Country of Chengy for a Cowle to settle Factories at Oooraboer and Coonemerro and also at Porto Novo, if desired, the Company's Merchants engaging to deliver cloth there at the same rates as here."]

PORTUGUESE.

Fol. 82. A great Multitude of Portugals inhabit y^e Kingdome of Bengala, Especialy in Hugly and Some Other Creeks or Rivolets of y^e Riuer thereof, many of them are filias de Lisboa (as they call them selves) viz? European's borne, but many more of them are filias de Indies The Portugals are admitted to live in any part of the Kingdome [of Bengala], with freedom Enough, but not soe much as Some of their richest men, fidalgas, as they call them viz? Gentlemen doe Expect.

Fol. 83. The Portuguesees haveing collected a good Sum of moneys to y^e End they might build a very large & decent Church.

Not in Yule. [By Portugals and Portuguesees were meant Portuguese half-breeds and also Roman-Catholic converts, often pure Natives of the country. *N. and E.* p. 33, for 1st November 1680, has a valuable quotation here: "It is resolved to Entertain about 100 Topasses or Black Portuges, the better to guard the washers."]

PROW.

Fol. 131. Piratts have many cunnige places to hide themselves and their men of warre Prows in.

Fol. 138. A great prow of about 40 tunns in burthen had gott in privately and traded for tinne . . . the Dutch . . . by order of their Chief Merchant there Seized y^e Prow . . . therefore that Prow and her goods were their lawfull Prize tooke y^e Prow and her goods by Violence out of y^e hands of y^e Dutch.

Fol. 139. each of the 3 Sea Ports Shold build and fitt out to Sea 2 men of warre Prows, each to carry 10 gunns and Pattereros, & well manned and fitted with Small arms.

Fol. 144. they Sent away y^e Other Seamen in a Prow bound for Achin.

Fol. 144. but they [the Portuguesees] did not longe remaine in Slavery before they tooke a fitt Opportunitie to make their Escape in a Prow.

Fol. 153. 5 or 6 great Prows yearly from Borneo, and about 30 or 40 Prows they have y^e belongs to Queda.

Fol. 157. with infinite Numbers of Prows from y^e Malay Shore.

Fol. 161. there is Sent off from y^e Custome-house a Small flyinge Prow . . . y^e Prow goeth on Shore again.

See Yule, *s. v.* Prow, and *ante*, Vol. XXX. p. 160. [Yule's information requires much supplementing.]

PRYAMAN.

Fol. 159. There are Severall Radjas Vpon Sumatra Especially those of Pryaman.

Not in Yule.

PULICAT.

Fol. 81. Some twenty or twenty two miles to y^e Northward of fort S^t Georg's the Dut[c]h have a towne and Garrison called Pullicatt.

See Yule, *s. v.* Pulicat, and *ante*, Vol. XXX. p. 355.

PULO.

Fol. 149. **Pullo** in y^e Malay tongue Signifieth Island.

Not in Yule.

PULO GOMUS.

Fol. 157. [Achin Road] almost land locked wth y^e head of Sumatra: **Pullo Way**: and **Pullo Gomus**: and 2 or 3 Small Jslands and rocks, y^e land is all Mountaneous and woody Save where y^e Citty Standeth: more Especially the 2 Jslands **Way** and **Gomus**, haveinge noe low land about them, nor are they inhabited more then wth Some banished Cripples Sent from y^e Citty.

Not in Yule, but see his quotation *s. v.* Penang.

PULO SAMBELONG.

Fol. 131. The Saleeters are absolute Piratts, and often cruiseinge about Janselone & **Pullo Sambelon** &c Jsles neare this Shore.

Not in Yule. [Off the South-West Coast of the Malay Peninsula.]

PULO WAY.

Fol. 157. [Achin Road] almost land locked wth y^e head of Sumatra **Pullo Way**: and **Pullo Gomus**. . . . Especially the 2 Jslands **Way** and **Gomus**, haveinge noe low land about them, nor are they inhabited more then wth Some banished Cripples Sent from y^e Citty.

Not in Yule.

PUTTA.

Fol. 132. They have noe Sort of Coyned monies here [Janselone] save what is made of tinne, w^{ch} is melted into Small lumps One Small lumps or **Putta** valueth here 3^d Ength One great **Putta** is 2¹/₂ Small ones Val: 7¹/₂ penny Ength w^{ch} is their Currant moneys and noe Other when a Small parcell then for soe many Viece: or soe many great or Small **puttas**: 4 great **puttas** make a Viece 10 Small ones is a Viece.

Not in Yule.

QUALA.

Fol. 161. brought to **Quala** (vizt) y^e barre att y^e Riuer's mouth by one of y^e Queen's [of Achin] Eunuchs.

Not in Yule: the estuary of a large river. See also Yule, *s. v.* Calay.

QUEDDA.

Fol. 77. The Elephants of Ceylone are best Esteemed of here then those of T^{he} **Queda**: or Syam.

Fol. 143. **Queda**: A Kingdome (soe called) Vpon y^e Malay Coast, the Chief Riuer called of y^e Same from the Chiefe towne or Citty thereof. It is y^e largest and most Navigable Riuer in this Kingdome and Navigable att any time up to y^e towne of **Queda**: w^{ch} is not lesse then 60 English miles above y^e barre thereof.

Fol. 144. But many regues lye Sculkinge about y^e Jslands of **Queda** and about y^e Riuer of **Old Queda** came boldly Vp to **Queda** and Sold the goods to Sarajah Cawn: a Chulyar & chiefe Shabandar of **Quedah**.

Fol. 145. This Kingdome hath liued Vnder a happy Goverment in peace many years with all Nations Save y^e Hollander, whoe have warre wth **Queda** (through their owne Seekinge).

Fol. 146. feasteth them very Nobly, (& Royally accordinge to y^e Custome of **Queda**).

Fol. 148. The King of Queda is Tributary to him of Syam, although y^e tribute he payeth be but inconsiderable in it Selfe, beinge noe more then annually a gold flowre, not Exceedinge 20 pieces of 8 in Value, yet he must Send or incurre his displeasure, y^e like all y^e Kings Vpon y^e Malay Coast must doe.

Fol. 153. This River of Queda is a Very good Riuer and soe is that of Old Queda y^e lyeth to y^e Southward of this.

See Yule, *s. v.* Quedda. [The quotations are good.]

(To be continued.)

NOTES ON INDIAN HISTORY AND GEOGRAPHY.

BY J. F. FLEET, I.C.S. (RETD.), PH.D., C.I.E.

Kavīśvara's Kavirājamārga.¹

THERE is a Kanarese metrical work, entitled *Kavirājamārga*, — or, by slightly free translation, "the Path of Poets Laureate," — which deals with *alanākāra* or the art of ornate poetical expression. It appears to have been first brought to notice in 1890,² in *Karṇāṭakaśābaddhānuśāsanam*, Introd. pp. 7, 23, by Mr. Rice, who wrongly attributed the composition of it to the Rāshtrakūṭa king Nripatūṅga-Amōghavarsha I. It has been "edited" by Mr. K. B. Pathak, B.A., in the capacity of "Assistant to the Director of Archaeological Researches in Mysore," as a volume of the *Bibliotheca Carnatica*, entitled "*Nripatūṅga's Kavirājamārgga*," published in 1898 at Bangalore under the "direction" of Mr. Rice. And, in the opening words of the editor's Introduction, — which, it may be remarked, has been also issued, without its last four or five paragraphs, as an article in the *Jour. Bo. Br. R. As. Soc.* Vol. XX. pp. 22 to 39, — it is indicated as the oldest Kanarese work that has as yet been discovered. It may well be such; though it is not by any means the earliest specimen of the Kanarese language, as we have Kanarese records of the Western Chalukya kings, of the Rāshtrakūṭa kings, and of the Western Gaṅga princes of Mysore, which are of earlier times. And it is also of interest in having a bearing upon the date of the Sanskrit writer Daṇḍin, whose treatment of the same topic has been, partially at any rate, followed, whether by direct adaptation or by second-hand borrowing, in it. And it is, therefore, worth while to consider carefully what the period and circumstances of the composition of this work really were. The work is not dated. But it contains statements and allusions, by means of which the points in question can be determined.

As may be gathered even from the title given by him to his volume, the editor of this so-called *Nripatūṅga's Kavirājamārga* has followed Mr. Rice in assigning the composition of it to the Rāshtrakūṭa king Nripatūṅga-Amōghavarsha I. He has primarily based

¹ It may be thought that this Note, which is practically a review of a book that was published in 1898, makes a rather late appearance. And so it does. But, for a long time after the book in question reached me, in 1899, I was unable to write about it, partly through being very much engaged in more important work, and partly because of the difficulty of obtaining in England some other Kanarese books which it was necessary to examine and quote. And now, for more than a year, the Note has lain among my papers, finished except for the final reading that was of course necessary before sending it out, but a constant pressure of affairs has prevented me from giving it that final reading. I do not, however, regret the delay; because recent receipt of Mr. R. Narasimachar's edition of the *Kūṇḍavaliṅga* (see note 5 on page 197 above), — one of the other works which I particularly wanted to see, — has enabled me to make some very appropriate improvements, especially in connection with the fact that there were two Kanarese writers, and not simply one, named Nāgavarma. — J. F. F.; November, 1903.

² The editor of the *Kavirājamārga* has said, almost at the beginning of his Introduction, that the *Kavirājamārga* "was first introduced to Oriental Scholars by Mr. Rice in a paper contributed to the Journal of the Royal Asiatic Society." And to this remark he has attached the footnote "For July 1883," without specifying any page. I have had occasion to read, more than once, Mr. Rice's article on "Early Kannaḍa Authors" in the *Jour. R. As. Soc.*, N. S., Vol. XV., 1883, pp. 295 to 314. With nothing to guide me beyond the vague and slovenly reference given by the editor of the *Kavirājamārga*, I can only say that, in that article by Mr. Rice, I cannot find any mention of the work in question, or detect anything that can be recognised as an allusion to it.

that conclusion upon three expressions in the work itself, which he has quoted on page 2 of his Introduction. According to the text of the book, those expressions are, in chapter 3, verse 98, — *Nṛpatuṅga-dēva-matadinde*, — “by the opinion of *Nṛpatuṅga-dēva*,” in chapter 3, verse 11, — *Atiśayadhavaḷa-dharādhipa-matadinde*, — “by the opinion of the king *Atiśayadhavaḷa*,” and in chapter 3, verse 1, — *akhila-dharā-vallabha*. . . . *Amōghavarshsha-nṛpēndra*, — “the great king *Amōghavarshsha*, the favourite of the whole earth.” The editor, — who, it may here be remarked once for all, has for the most part abstained from presenting translations of passages relied on by him or even indicating the meaning of them, and so has avoided facilitating an understanding of the matter by those who do not know Kanarese, — has not said anything about the context of these expressions, which he has thus detached from their surroundings. Nor has he attempted to shew how these three separate expressions are to be combined with each other. But, from the simple citation of them, he has proceeded to say: — “From these expressions it is manifest that *Nṛpatuṅga* composed the *Kavirājamārga*, that he had the titles of *Amōghavarshsha* and *Atiśayadhavaḷa*, and that he was a paramount sovereign. And since he writes in *Kannaḍa*, it may be further inferred that the *Karnāṭaka* formed part of his dominions. Two verses” — (a footnote specifies chapter 1, verse 90, and chapter 3, verse 18), — “which praise *Jina*, reflect the religious opinions of the author. These facts enable us to identify him with the *Rāshṭrakūṭa* emperor *Nṛpatuṅga* or *Amōghavarshsha* I.” A more feeble way of asserting a result, without any attempt at explanation or argument, could hardly be conceived. But that is not all. Having started by enunciating that result, the editor has proceeded to tell us (Introd. p. 2) that there are “one or two expressions,” in the colophons and elsewhere in the work, which are “apt” to lead us into a belief opposed to it. He has then explained away, to his own satisfaction, in a manner which will be exhibited further on, the obstacle raised by the colophons. He has not attempted to explain away the obstacle presented by another passage (chapter 2, verse 53), mentioning the name of *Atiśayadhavaḷa* but not of *Nṛpatuṅga*, which, he has admitted, “cannot be so satisfactorily explained,” and “is calculated to give one the impression that the writer of the work was different from *Nṛpatuṅga*.” But, stamping it as a solitary instance, he has proceeded (Introd. p. 3) to set off against it four other passages (chapter 1, verses 24, 147, chapter 2, verse 27, and chapter 3, verse 1), in respect of which it is sufficient to say, here, that neither does any one of them, nor does the context of any one of them, mention the name of *Nṛpatuṅga*; they mention only the names *Atiśayadhavaḷa* and *Amōghavarshsha*. He has then cited two passages which do not mention either of the two names which are mentioned in those four passages. Of these two passages, one (chapter 3, verse 225) simply compares some person, who the editor says is *Nṛpatuṅga*, and whom we may take to be *Nṛpatuṅga* though his name is not mentioned in it, to “a flight of steps leading to the sacred waters of *Sarasvatī*.” And the other (chapter 3, verse 230) says, according to the editor’s rendering of it, that “knowledge contained in *Nṛpa-tuṅga-dēva-mārgga* or *Kavirāja-mārgga* is a ship which safely carries a high-souled person across the ocean of *Kannaḍa* poetry.” We need not lay any stress upon the fact that the original of this passage does not contain anything answering to the words “or *Kavirāja-mārgga*” and “*Kaunāḍa*,” which are gratuitous insertions by the editor. The editor has then proceeded to tell us that “these facts” — (namely, the six passages thus presented by him) — “prove that *Nṛpatuṅga* composed the present work.” He has then cited two verses, which, he has said, tell us that “*Nṛpatuṅga-dēva-mārgga* means the path indicated by the great *Nṛpatuṅga*.” Of these, one is verse 105 of chapter 2, from which he has quoted the words, — *mahā-Nṛpatuṅga-dēvan-ādaradoḷe pēḷḍa mārgga*, — which would mean literally “the path very kindly (or encouragingly) declared by the great *Nṛpatuṅga-dēva*,” the other is verse 106 of chapter 3, which does not mention the name of *Nṛpatuṅga*, and from which he has quoted the words, — *Atiśayadhavaḷa-ōpadēśa-mārgga*, — which mean literally “the path of the teaching of *Atiśayadhavaḷa*.” And he has arrived at the conclusion (Introd. p. 3) that the title of the work, *Kavirājamārga*, is thus “easily explained” as meaning “the path indicated by the king of poets who is no other than *Nṛpatuṅga* himself.”

Having thus followed the editor through a series of mere assertions which do not present anything in the way of discriminative reasoning, we may now proceed to deal with the matter in a methodical manner. As, unfortunately, so often happens in correcting a wrong assertion, the misleading result propounded by the editor in respect of the author of the work cannot be replaced by the correct result by an equally brief process. But the longer inquiry has this advantage, that it leads us ultimately to some interesting points which the editor has overlooked altogether, — the name of the real author of the work, the name of the earlier authority whom he followed, and the way in which he proceeded in composing his work.

In trying to discover the person by whom any particular ancient work has been composed, we most naturally look, in the first place, to any colophon which that work may have. And we, therefore, turn first to the colophons of the *Kavirājamārga*, of which there are three, one at the end of each of its three *parichchhēdas* or chapters.

The colophon of the first chapter runs:³ — *Gadya || Idu parama-śrī-Nṛipatuṅgadēv-ānumatam=appa Kavirājamārggadol dōshādōsh-ānuvarṇṇana-nirṇayaṁ prathama-parichchhēdam.*

The colophon of the second chapter runs: — *Idu śrī-Nṛipatuṅgadēv-ānumatam=appa Kavirājamārggadol śabdālamkāra-varṇṇanā-nirṇayaṁ dvitiya-parichchhēdam sampūrṇam.*

And the colophon of the third chapter runs: — *Idu parama-Sarasvatī-tīrthavatāra-Nṛipatuṅgadēv-ānumatam=appa Kavirājamārggadol=artthālamkāram tṛtīya-parichchhēdam || Kavirājamārgg-ālamkāram samāptam ||*

For the information of Sanskritists who may not know Kanarese, it is to be explained that the word *Kavirājamārggadol* is the locative singular, and that *appa* is a form of the relative present participle of *āgu*, 'to become,' and has the effect of placing the word which precedes it in apposition with that locative.⁴ The exactly corresponding Sanskrit expression, for the colophon of the first chapter, would be *parama . . . ānumatē Kavirājamārggē*. And the literal translation of that colophon is: — "Ornate prose. This is the first chapter, (entitled) the description of those things which are faults and those which are not faults, in the *Kavirājamārga* which is approved of (or concurred in) by the most glorious Nṛipatuṅgadēva." The colophons of the second and third chapters, which deal with embellishment of sound and embellishment of sense, have exactly the same purport in respect of the point under consideration.

It seems almost absurd, to have to point out that, if there had been an intention to indicate actual composition of the work by the Nṛipatuṅga who is thus mentioned in the colophons, there would have been used, instead of *anumata*, 'assented to, concurred in,' some such word as *rachita* or *virachita*, 'composed,' or *kṛita*, 'made.' Nothing could be plainer than the fact that the colophons distinctly shew that the *Kavirājamārga* was not composed by Nṛipatuṅga, and that it was composed by some other person who represented himself as simply putting forward views concurred in by Nṛipatuṅga. The editor, however, while admitting (Intro. p. 2) that the colophons are some of "one or two expressions occurring in the present work, which are apt to

³ I have felt some doubt as to the best way of presenting those passages of the original which I quote. The editor's transliterated text does certainly not represent the original exactly as it stands. And there is no guarantee that his Kanarese text does so. I have taken the latter as my guide. But I have replaced the *anusvāras* by the proper nasals, wherever the use of the latter is more correct. And I have followed a frequent custom of Native books, in omitting to shew *sandhi* between a word ending with *r*, *l*, or *ḷ*, and a following word commencing with a consonant.

⁴ We may compare in this detail, and contrast in the use of *virachita* instead of *anumata*, the latter part of the colophon of, for instance, the first canto of the *Pampa-Rāmdyana*, a work to which we have to refer for other purposes further on: — *Idu parama-Jina-samaya-kumudini-kāra-chandra-Bāla-chandramuni-indra-charapa-nakha-kirapa-chandrikā-chakōram Bhāratī-karṇapūram śrīmad-Abhinava-Pampa-virachitam=appa Rāma-chandra-charita-purāṇadol pūhikā-prakarapaṁ pratham-śīrṣam.*

"lead one into the belief that Nripatunga may not have been the real author of the work," has had the assurance to follow up that admission by the assertion that "the word 'anumatam' is obviously intended to express the author's approval" — (that is, according to his representation of the matter, the approval of Nripatunga-Amoghavarsha I.) — "of those views of his predecessors, which are summarised in the present work." That assertion is nothing but a gratuitous misrepresentation of the meaning of the colophons, which do not contain any allusion of any kind to views of predecessors. And there is not anything in the body of the work, which could justify any such tampering with the plain meaning of the colophons.

The next most natural step is to turn to the opening verses of the work. The first two verses run as follows : —

Sri taṭṭ=uradoḥ kaustubha-
jāta-dyuti balasi kāṇḍapatad=ant-ire sam- |
prītiyin=āvanau=agalaḥ
Nitinirantarān=udāran=ā Nripatungaṃ || 1, 1.
Kṛitakṛityamallah=apṛati-
hata-vikraman=osedu Viranārāyaṇan=a- |
pp=Atisayadhavalam namag=ig=
starkkitōpasthita-pratāp-ōdayamaṃ || 1, 2.

Translation : — (Verse 1) "Let Fortune, — clinging to (*his*) breast, with the lustre, born from the *kaustubha*-jewel, lying round (*her*) like a screen surrounding a tent, — not abandon with (*her*) affection him (literally, whom?) ; (*namely*) the noble Nitinirantara ("he who never ceases to display statesmanship"), that (*famous, or well-known*) Nripatunga!" — (Verse 2) "Let Atisayadhavala, — who is Kṛitakṛityamalla ("the wrestler, or the most excellent, of those who have done their duty"), and who, possessing prowess which has not been checked (*just as the god Viṣṇu-Nārāyaṇa* had *three* strides which were not obstructed), has pleasingly become Viranārāyaṇa, — give to us a development of power that comes quite unexpectedly!"

In respect of the next two verses, it is sufficient to state that, in them, the author has given utterance, in expanded terms, to the prayers : — "Let the goddess Sarasvatī lovingly take up her abode in my thoughts!" and : — "Let those supreme great poets, from whose jaws compositions, properly adorned by the most excellent embellishments, have made their appearance, be our aid in this work!"

The real nature of the first and second verses is quite unmistakable. In the first of them, the author of the work prays that good fortune may never desert a person, Nripatunga, whom the expressions employed by him mark as a person of exalted rank. In the second, he asks Atisayadhavala, — whom, in this stage of the inquiry, we might, or might not, be inclined to identify with the Nripatunga who is mentioned in the preceding verse, — to inspire him with a power, in dealing with the subject lying before him, which he himself, unaided, could not hope to display. And the true nature of the second verse, at any rate, was rightly understood by Mr. Rice, when he said : — "Commencing with reverence to Atisaya-dhavala, *i. e.* his father 'Gōvinda or Prabhūta-varsha, 'to whose court only learned and skilful poets were admitted,' 'Nripatunga goes on to mention,' &c.⁵ That exposition of the verse, indeed, involved the mistakes of taking Nripatunga-Amoghavarsha I. to be the author of the work, and of taking Atisayadhavala to be his father Prabhūtavarsha-Gōvinda III., though it had been made known from the Sirūr inscription, published seven years before that sentence was issued, that Atisayadhavala was Nripatunga-Amoghavarsha I.⁶ But Mr. Rice was so far correct, in that he properly understood this verse as containing a prayer or request addressed by the author of the work to Atisayadhavala. On the other hand, the editor of the *Kavirājamārga* could not, and did not, ignore the fact that

⁵ *Kavirājamārga*, Intro. p. 23.

⁶ See Vol. XII. above, p. 215. For a revised edition of this record, see *Ep. Ind.* Vol. VII. p. 202.

Atisayadhavala was Nripatuṅga-Amôghavarsha I. But, in order to uphold the assertion that Nripatuṅga-Amôghavarsha I. was the author of the work, he was obliged to misrepresent the real nature of these two verses. And he has asserted (Introd. p. 3) that "Kannāḍa authors sometimes "transfer their own titles to the god whose aid they invoke in their works;" and, for some reason or other omitting at this point the appellation Atisayadhavala, he has followed up this assertion by the amazing statement that "it is therefore not surprising to find that the god who is praised in "the opening verses of the Kavirājamārga is called Nripatuṅga, Nitinirantara, Kṛitakṛitya-malla "and Vira-Nārāyaṇa." This statement, which simply means that Nripatuṅga-Amôghavarsha I., as the (alleged) author of the work, invented a god, and invested him with four of his own appellations, merely in order to invoke him in the opening verses of his work, cannot be characterised, mildly, as anything but a most indecorous attempt by the editor to abuse the confidence of his readers.

In support of his general assertion that Kanarese authors sometimes transferred their own titles to gods whose aid they invoked in their works, the editor has put forward only one alleged specific case. He has said (Introd. p. 3): — "Abhinava-Pampa may be cited as an "instance in point." And for this he has given, in a footnote, the hopelessly vague reference "Pampa-Rāmāyaṇa, edited by Mr. Rice." It would be a large order, to peruse the whole of the Pampa-Rāmāyaṇa on the strength of such an assertion and reference. And it is, really, unnecessary to attempt the task; because, whatever might have been done by Abhinava-Pampa or any other writers, it would not upset the plain meaning of the references to the author's patron, and not to any god, as Nitinirantara, Nripatuṅga, Atisayadhavala, Kṛitakṛityamalla, and Vira-nārāyaṇa, in the first two verses of the *Kavirājamārga*. But this much may be said, as the result of an examination of those parts of the *Pampa-Rāmāyaṇa* or *Rāmachandracarita-purāṇa*, according to the revised edition, published as a volume of the Bibliotheca Carnatica at Bangalore in 1892,⁷ in which we might hope to find anything tending to support or excuse the assertion made by the editor of the *Kavirājamārga*. The author of the *Pampa-Rāmāyaṇa* has not invoked any god at all in the introductory stanzas of his work, namely, verses 1 to 41 of the first *śvāśa* or canto. Nor has he invoked any god in the colophons, of which there are sixteen, one to each canto; his only allusion to a god there (see, for instance, note 4 on page 260 above) is in his description of his preceptor, Bālachandra, as "the autumn moon of the group of water-lilies that was the doctrine of the supreme Jina." He has presented his own personal name, Nāgachandra, in the two concluding stanzas of the work, verses 97, 98 of canto 16: but he has not there alluded to any god named after himself; in those two verses, he has simply sounded his own praises, asserting⁸ that he was the only real poet upon whom Sarasvatī had conferred the boon of being able to do justice to the story of Rāma, and that no poets, past or contemporaneous, had dealt with it so ably.⁹ In each of the sixteen colophons, he has described the work as "composed (*virachita*) by Bhāratīkarnapūra, the famous

⁷ The title-page marks this volume as edited by Mr. Rice. But on page 13 of the Introduction we are told that his Senior Pandit, Mr. Baradagupṭe Srinivas Ayyangar, corrected this revised edition throughout, and "may "be considered its editor." — I had to obtain this book, in order to investigate the assertion made in connection with it. And it took a long time to procure a copy. Eventually, a copy reached me in June, 1902.

⁸ See, more fully, the abstract translation of these two verses on page 96 of the Introduction to the *Pampa-Rāmāyaṇa*. In the text given there in a footnote, the word *Jaina-katheyaṇi*, in the last line of verse 97 (= 98), does not agree with the Kanarese text of the work itself, which presents *Rāma-katheyaṇi*.

⁹ These two verses illustrate a habit which various Kanarese authors had, of singing their own praises on every possible occasion, and sometimes in very high-flying language. The following other samples of these "not unfrequent but strange verses," as Dr. Kittel has termed them, may be brought together here.

In the third of the concluding verses of his *Saddamanidarpana*, Kēśirāja has declared that, recognising the abundance of charms in it, all learned people will do honour to his work as a tasteful ornament to Śrī and a second lute to Sarasvatī.

In verse 10 of the first canto of his *Pampa-Bhārata* or *Vikramārjunavijaya*, the original Pampa has proclaimed himself pre-eminent in poetry just as his patron Gaṇārṇava-Aṛikēśarin II. was pre-eminent in virtue; and, in verse 59 of the last canto, he has asserted that his *Bhārata* and *Ādipurāṇa* had thrust down and trampled on all previous poems.

And, in his *Chhandāmbudhi* or *Chhandāmbudhī*, the earlier Nāgavarma has "gone one better still:" in the first verse, speaking of himself as *Kavirājahansa*, he has announced that his extensive command of the choice of words

Abhinava-Pampa;¹⁰ and he has thus shewn that he had the secondary appellations of Abhinava-Pampa, by which he seems to have been best known, and of Bhāratikarnapūra. He has introduced the appellation Abhinava-Pampa in the first verse of each canto after the first. He has introduced the appellation Bhāratikarnapūra in the last verse of each of cantos 2, 3, 7 and 8. And he has similarly introduced an appellation Kavitāmanōhara in the last verse of each of cantos 1, 10, and 12 to 15, and an appellation Sāhityavidyādhara in the last verse of each of cantos 4 to 6, 9, and 11; whereby he has established for himself the further appellations Kavitāmanōhara and Sāhityavidyādhara. In all these passages, however, the author has distinctly alluded to himself, and not to any god named after himself. The real nature of these allusions by the poet to himself, was properly recognised by the editor of the *Pampa-Rāmāyaṇa*, who, on page 19 of his Introduction to the work, has, in his analysis of the poem, summarised verse 1 of canto 2 as "invocation praising himself;" to which he has attached the footnote: — "It is a peculiarity of the poem that the concluding and "opening stanza of each *āvāṇa*, in continuing the action described in the narrative, introduces the "author's name in place of the hero's." But, as a sample of what the poet actually did, we will examine the passages which first introduce the appellations Kavitāmanōhara and Sāhityavidyādhara. Verses 122 to 130 of canto 4 take the narrative to the point at which Janaka, mounted on the magic horse, — actually, on a Vidyādhara (see the prose after verse 102) who had assumed the guise of a horse for the purpose, — arrived at the town of Rathanūpurachakravāla, and found, in a grove near it, a very charming temple of Jina; then comes a prose sentence, which says: — "Having seen this most excellent temple of Jina, and having circumambulated it;" then comes verse 131, which says, in expanded terms, that Sāhityavidyādhara entered the Jain temple in order to sing a hymn of praise to the Jina; then verse 1 of canto 5 says, similarly in expanded terms that Abhinava-Pampa entered the temple of Jina; and then the action is carried on by a prose sentence, which says: — "Thus having entered, and having adorned the central hall with the rays of light from the water-lilies that were his feet, and having faced the lord of the three worlds, bringing his hands together like a water-lily closing a bud;" and so there is introduced the prayer, beginning in verse 2, addressed by Janaka to the god. Here, the name Sāhityavidyādhara plainly denotes, from one point of view, Janaka, as having in company with him (*sāhitya*) the Vidyādhara in the guise of the horse, and, from the other point of view, Abhinava-Pampa, as being a very demigod or master of learning (*vidyādhara*) in literary composition (*sāhitya*). And thus the author here brought himself distinctly into the action of the narrative, by identifying himself, through the appellation Sāhityavidyādhara, with the hero of this part of it. Again, verse 138 of canto 1 brings an earlier part of the narrative to the point at which, — two sons, Vijayabāhu and Puraṇḍara, having been born to Surēndramanyu, son of Vijayaratha, — the latter, Vijayaratha, having thus "three eyes," had made to bow down to himself all the three worlds, the desires of which, directed towards himself, were multiplied to a three-fold extent; and verse 139 recites that, having given to the Earth the gratification of all her desires, — with the goddess Speech displaying herself as the flamingo on the water-lily that was his mouth, and with his Fame reaching so far and wide as

for what is to be expressed by them, and of the use of qualificative expressions with what is to be qualified by them and of the employment of metaphors, had thrown into the shade even Kālidāsa; in verse 3, he has spoken of himself, again as Kavirājahanusa, as "the only man on earth" who knew how to speak (compose) with elegance and sweetness; and in verse 249, given to illustrate a certain metre, he has mentioned himself as Nāgavarma, and has described himself as matching the gods Brahman, Indra, and Viṣṇu in his possession of surpassingly excellent speech and other attributes, and as not having any match (apart from them).

For some Sanskrit verses of the same class, attributed to Samantabhadra and Akalanika, reference may be made to Dr. Hultzsch's translation of the Śravaṇa-Belgola epitaph of Mallishāna; *Ep. Ind.* Vol. III. p. 199, verses 8, p. 260 f., verses 21 to 23.

We find a tendency towards this southern habit of bombastic self-praise in even the Aihole inscription of A. D. 634-35; Ravikirti, the composer of that record, has therein described himself as having "by his poetic skill" attained to the fame of Kālidāsa and of Bhāravi; see *Ep. Ind.* Vol. VI. p. 12, verse 37.

The habit contrasts remarkably with the modesty of the illustrious poet Kālidāsa himself, who, in the second verse of his *Raghuvamśa*, has intimated that he felt at least considerable doubt whether he could do justice to the great topic that he then had in hand, the history of the Solar Race.

¹⁰ See, for instance, page 230 above, note 4.

to become ornaments over the tusks of the guardian elephants of the distant regions,¹¹ and with the title Jagajjanakapṭhabhūṣaṇa, "ornament of the throats of mankind," having become his own title, descriptive of his attributes, — Vijayaratha shone out as Kavitaṁanōhara; verse 1 of canto 2 says that Abhinava-Pampa became famous, having caused Fortune to abound excessively in liberality, and Speech in the display of gentleness, and Fame in promoting the welfare of the Jain scriptures; and the action is then taken up again by a prose sentence, which says: — "When that same king Vijayaratha was, on a certain day, holding a public darbār; at that time;" and so there is introduced verse 2, which proceeds to narrate that there came in hurriedly a doorkeeper, and so on. Here, from one point of view, the appellation Kavitaṁanōhara certainly means "he who charms the mind with his poetry," and denotes the poet; while, from another point of view, it must in some way or another have such a meaning that it denotes also Vijayaratha.¹² And thus, at this point again, though not in so dramatic a fashion, the author has certainly again introduced himself into the action of the narrative, by identifying himself with the hero of this part of it through the appellation Kavitaṁanōhara.

In these two passages of the *Pampa-Rāmdyana*, and in all the similar ones, the author of that work has distinctly referred to himself, and not to any god named after himself. In not one of them is there to be found, nor can I detect anywhere else, the slightest shadow of a basis in fact for the assertion, made by the editor of the *Kavirājamārga*, that Abhinava-Pampa, in his *Pampa-Rāmdyana*, transferred his own titles to a god whose aid he invoked. And there is not the slightest shadow of a basis in fact for the editor's assertion, or suggestion, that, in the first two verses of the *Kavirājamārga*, Nripatūṅga-Amōghavarsha I., as the (alleged) author of the work, praised a god mentioned, after himself, by the names of Nripatūṅga, Nitinirantara, Kṛitakṛityamalla, Viranārāyaṇa, (and Atisāyadhavala). Those two verses embody requests made by the author of the work. The first of them prays for the welfare of a person, mentioned as Nripatūṅga and Nitinirantara, whom he has marked as a person of high rank and has most distinctly indicated as his patron. In the second of them he has asked a person, whom he has mentioned as Atisāyadhavala, Viranārāyaṇa, and Kṛitakṛityamalla, to inspire him with ability to perform the task lying before him. And, even apart from the colophons, the first of these two verses is sufficient to prove that the author of the work was not Nripatūṅga.

¹¹ The original says, — tanna kirtti diggaja-radanakke kirttimukhav-āge, — "with his own fame becoming a kirttimukha to the tusk(s) of the region-elephant(s)." In dictionaries, I can find the word kirttimukha in only Molesworth and Cundy's Marāṭhī Dictionary, where it is given as meaning 'an ornamental head of a rāḷekhaṇa carved over the doors of temples dedicated to Śiva, Gaṇapati, &c.' But such decorations are not confined to the doors of temples. And the purport of the text seems to be that Vijayaratha's fame became ornaments on the lintels of the doors of the stalls of the elephants, where the elephants were standing with their heads and tusks projecting out through the doors.

In Burgess and Cousens' *Architectural Antiquities of Northern Gujarat* (Archæological Survey of Western India, Vol. IX.), 1903, p. 25 f., it seems to be indicated that the kirttimukha is rather to be found in the lower courses of buildings and on the thresholds of doors; and an instance of the ornament on the threshold of a shrine may in fact be seen in *Archæol. Surv. West. India*, Vol. II. Plate 61, the illustration on the right hand, where it seems to be rather curiously combined with part of the Buddhist triratna-symbol. But Fergusson and Burgess' *Cave Temples of India*, 1880, p. 506 f., describes it as a grinning face in the centre of a śiṛṇa, and so tends to agree with the Marāṭhī Dictionary which places it on the tops of doors.

Burgess and Cousens have referred (*loc. cit.*) to the *Padmapurāṇa*, as purporting to account for the architectural kirttimukha by reciting that Kirtimukha was the name given to a certain demon, created by Śiva, who at the god's command devoured himself, leaving only his head.

¹² It may be said that the various attributes, — the power of satisfying all the desires of the Earth, and the possession of Speech and Fame, — belong both to poets and to kings; and that thus, as a poet is certainly to be styled Kavitaṁanōhara, a king may be spoken of by that same appellation. And, underlying the whole comparison, there seems to be the idea, used in the verse *Rachitā sitapaṭa-gurund*, &c., given on page 199 above, that a necklace is an ornament on the throat, and poetry is an ornament in the throat. But it would seem that we ought to find two distinct meanings for kavita here, as for *śāhitya* in the other case. And I am inclined to think that, in the case of the king, Kavitaṁanōhara may have been intended to mean "he who charms the mind by his state of being Ka, = Kapṭhabhūṣaṇa (in the title Jagajjanakapṭhabhūṣaṇa; see above), and Vi, = Vijayaratha; compare, in the *Kirātārjunīya*, I, 24, *taṇḍābhāṇḍī*, which means from one point of view "at (the mention of) thy name," and from another "at (the mention of the spell with) the names Ta, = Tārakṣya, and Va, = Vāsuki."

We look next to see what other notices there may be, in the body of the work, of the personal appellations presented in the two opening verses, and what may be the purport of any such notices.

There are the following other allusions to **Nripatuṅga**. In chapter 1, verses 44, 146, chapter 2, verses 2, 43, 98, 105, and chapter 3, verses 98, 107, 207, 230, we have references to the method (*krama*), the path or style (*mārga*), and the opinion (*mata*) of **Nripatuṅga**, and statements that such and such things are, or are to be declared or settled, in accordance with that method, &c. Three of these passages have been cited by the editor in his Introduction. Two of these, — verses 98 and 203 of chapter 3, — have been sufficiently noticed on page 259 above. The third is verse 105 of chapter 2, in which we have the words, — *niratisāy-ānubhāva-bhavanappa mahā-Nripatūṅgadēvan-ādarole pāḍa mārgga-gatīyīm*, — “according to the course of style very kindly (or encouragingly) declared by the great **Nripatūṅgadēva**, who stands out with an authority which is unsurpassed.” The others, likewise, are all complimentary to **Nripatuṅga**. Miscellaneous references to **Nripatuṅga** are as follows. In verse 42 of chapter 2, the text of which is given for another purpose on page 272 below, it is said that: — “**Nripatūṅgadēva**, who displays excessively pure fame, (and) to whom the entire mass of (his) enemies has bowed down, has further always borne with grace the possession of a widely spread glory (or good fortune).” And, in verses 219 and 224 of chapter 3, mention is made, by the word *sabhāsada*, of “members of the assembly or court of **Nripatuṅga**.”

There are complimentary allusions to **Nitinirantara** in verse 147 of chapter 1 and verse 99 of chapter 2. And verse 148 of chapter 1 expressly cites, — *Nitinirantara-krama*, — “the method of **Nitinirantara**.”

There are the following other allusions to **Atisayadhavaḷa**. In chapter 1, verse 24, chapter 2, verses 2, 53, 151, and chapter 3, verses 11, 106, we have references to the method (*krama*), the path or style (*mārga*), the opinion (*mata*), and the teaching (*upadēśa*), of **Atisayadhavaḷa**, and statements that such and such things are, or are to be declared or settled, in accordance with that method, &c. Four of these passages have been cited by the editor in his introduction. Two of these, — verses 11 and 106 of chapter 3, — have been sufficiently noticed on page 259 above. The third is in verse 24 of chapter 1, from which we, like the editor, need quote here only the words, — *Atisayadhavaḷ-ōkti-kramade*, — “according to the method declared by **Atisayadhavaḷa**.” And the fourth is in verse 53 of chapter 2, where we have the statement, — *Atisayadhavaḷ-ōkti-kramadin=apuvem*, — “I will make known (a certain matter) according to the method of expression of **Atisayadhavaḷa**.” Other allusions to **Atisayadhavaḷa** are as follows. In verse 5 of chapter 1, mention is made, by the word *sabhāsada*, of “members of the assembly or court of **Atisayadhavaḷa**,” and they are referred to as people who would shew reverence to anyone displaying good intimacy with the usages of the best poets. In verse 147 of chapter 1, mention is made of, — *Atisayadhavaḷ-ōrvvip-ōdit-āḷamkṛiti*, — “the embellishments declared by (or sprung from) king **Atisayadhavaḷa**,” with which expression we have to compare the point that **Atisayadhavaḷa** is spoken of as a king (*dharmādhipa*) in also verse 11 of chapter 3 (see page 259 above). And, in verse 27 of chapter 2, we have the expression, — *endan=Atisayadhavaḷam*, — “**Atisayadhavaḷa** has said (such and such a thing).”

There are the following other allusions to **Kṛitakṛityamallā**, presenting this name, with the ending *vallabha*,¹³ as **Kṛitakṛityamallavallabha**, “the **Vallabha** who is the wrestler, or the most excellent, of those who have done their duty.” Verse 61 of chapter 1 specifies four things as faults in literary composition, — *Kṛitakṛityamallavallabha-matadīm*, — “according to the opinion of **Kṛitakṛityamallavallabha**.” And verse 28 of chapter 2, the text of which is given for another purpose on page 272 below, introduces the subject of *prāsa* or alliteration, and says: — “According to the views of **Kṛitakṛityamallavallabha**, the expansion of it (that is, the treatment of this topic) is in this manner (as follows).” As will be seen when we come to consider this verse in detail,

¹³ See *Ep. Ind.* Vol. VI. p. 189 f.

it was probably from the original of it that there was taken the idea of the appellation *Kṛitakṛityamalla*.

And there is another allusion to *Viranārāyaṇa* in verse 180 of chapter 3, where the *sabdhāgaṇa* or 'yard of the assembly or court' of *Viranārāyaṇa* is likened to the sky, studded with stars, because there were scattered about in it so many pearls from the broken strings of pearls of the enemies who there bowed down before him.

In tracing out the above allusions, we find references of much the same kind to two other names. One is *Naralōkachandra*: in verse 23 of chapter 1, we are introduced to the two things which constitute the substance of poetry, — *Naralōkachandra-matadin*, — "according to the opinion of *Naralōkachandra*;" and, in verse 180 of chapter 3, the *mandira* or 'stable' of *Naralōkachandra* is described as being always in a state of mire from the streams of rut flowing from the captured elephants of hostile kings. And the other is *Nityamallavallabha*; verse 11 of chapter 2 introduces a certain topic, — *Nityamallavallabha-matadin*, — "according to the opinion of *Nityamallavallabha*."

And we find mention made of one other name, *Amōghavarsha*, which is perhaps of more importance than any of the others, except *Atīśayadhavala*. Verse 1 of chapter 3, the title of which is specified in its colophon as *arthālaṃkāra*, runs: — *Srī-vidit-ārtthālaṃkāra-āvaliṇiṃ vividha-bhēla-vibhavaśpadamaṃ bhāviṣi besasidan=akhiḷa-dharā-vallabha=nt=Amōghavarsha-nṛpēṇ-dram*: — "Having thought over the famous and well known series of embellishments of sense, which is a receptacle of the display of various kinds of distinctions, the great king *Amōghavarsha*, the favourite of the whole world, commanded (the treatment of it) thus (as follows)."¹⁴ And verse 217 of the same chapter runs: — *Intu mikka varṇanegaḷ saṃtatam=nd=āgi pēḷḍa kāvyam dbareyoḷ saṃtati keḍade nilkum=a-kalpāntam-baram=Amōghavarsha-yasam-bol*: — "The poetry thus declared, always accompanied by descriptions of surpassing excellence, shall endure in the world to the very end of the æon, without any break of continuity, like the fame of *Amōghavarsha*."

In respect of these passages in the body of the work, there are the following observations to be made. The references to the method, style, opinions, and teaching of the persons or person whose names are mentioned, would, according to western practice, suffice to shew that the work was composed by someone else. They might, however, if there were nothing to the contrary, be otherwise interpreted in accordance with a custom, prevalent among some Hindū authors, of introducing their own names in the third person, not only in introductory passages reciting their pedigrees and in colophons, but also in other parts of their works.¹⁵ And with a particular amount of plausibility might such an interpretation be placed on the expression "*Atīśayadhavala* has said (such and such a thing)," in verse 27 of chapter 2. But it would be difficult, to say the least, to reconcile with such an interpretation the statement, in verse 53 of chapter 2: — "I will make known (a certain matter)

¹⁴ *Bhāviṣi* is from the Sanskrit *bhāva*, with the Kanarese verbal affix *ṣu*. It is given in the Rev. Dr. Kittel's Kannaḍa-English Dictionary as meaning (1) to occur, to appear; (2) to conceive, imagine, fancy, suppose; and to think, consider; to observe, to know; to have in mind, think of, meditate on; to treat with respect. *Besasū* is formed in the same way from *besa*, which is treated as a *taḍbhara*-corruption of *vidha*, like *besana* = *vidhāna*. *Besasū* is explained as meaning — to order, command, tell; to declare, communicate; to request; to grant. In the commentary on *Sabdamandirapāṇa*, sūtra 3, *besasū* is explained by *nirūpiṣu*, 'to order, command, tell; to make known, to tell; to define;' the *ṣi*-*endu* *besasū* of the sūtra is explained by *ḥi*-*endu* *nirūpiṣu*, "on ordering (me) to relate."

¹⁵ There is a rather curious instance of this, if the text is authentic, in the *Chhandāmbudhī* of the earlier *Nāgavarma*, who, by the way, in addition to mentioning himself as *Nāgavarma* in verses 27, 121, 173, 198, 229, 243, and 249, happens to have used the expression *Nāgavarmanana matalin*, "according to the opinion of *Nāgavarman*," in verse 229, and perhaps *Nāgavarmanana matalin* in verse 247. By his opening and concluding verses, *Nāgavarma* has shown that he had also the appellation *Kavirājakaṇṇasa*. And verse 194 claims that the Mallikīmīṣe metre (otherwise known as *Mattakōkila*, see Dr. Kittel's *Introd.* p. 23) was invented by *Kavirājakaṇṇasa*, that is by *Nāgavarma*. But, whereas the *Nāgavarma* in question flourished about the close of the tenth century A. D. (see note 4 on page 197 above), that metre is found in an epigraphic record (*Inscriptions at Sravasa-Belgoḷa*, No. 17, *Bhadra-bāhu-śa-Chandrapuṭa*, &c.) which was engraved very closely about A. D. 800. It is to be presumed that the explanation may be that, like apparently various other verses in the *Chhandāmbudhī*, this verse 194 is an interpolation.

according to the method of expression of Atisayadhavala." This statement is the one in respect of which the editor, who recognised the identity of Atisayadhavala with Nripatuṅga, has said (Introd. p. 2) that it "cannot be so satisfactorily explained" as the colophons, which admittedly "are apt to lead one into the belief that Nripatuṅga may not have been the real author of the work," can, according to him, be explained away. And he has said that this passage "is calculated to give one the impression that the writer of the work was different from Nripatuṅga." In reality, of course, it contains an unmistakable intimation that the author of the work was not Atisayadhavala, but was someone else who was endorsing and presenting views attributed by him to Atisayadhavala. However, all the various allusions to the method, style, opinions, and teaching of Nripatuṅga, Atisayadhavala, &c., have, of course, to be interpreted in accordance with any specific information that we can find elsewhere. And, in the colophons, we have the plainest possible intimation that the author of the work was at any rate not Nripatuṅga. And the colophons explain, in the clearest manner, the real nature of the various references in the body of the work to the method, style, opinions, and teaching of Nripatuṅga, Atisayadhavala, &c.

Not in any of the above-mentioned passages is there any statement that Nripatuṅga, Atisayadhavala, and Amôghavarsha were one and the same person. The similar nature of the complimentary allusions made by the author of the work in connection with the three names, may be suggestive that those allusions all refer to one individual. But it is not conclusive on that point. We note, however, that Nripatuṅga is indicated as a king, by the mention of *sabhdasadar* or 'members of his assembly or court.' We also note that, in addition to being indicated as a king in that same way, Atisayadhavala is expressly marked as a king, by the words *urviṣa* and *dharādhipa*. And we note that Amôghavarsha is expressly marked as a king by the epithets *akṣiladharaṭṭhalha* and *nripēndra*. Now, like various other secondary names, the appellations Nripatuṅga and Amôghavarsha were by no means confined to one person. We know, from the epigraphic records, that they both belonged to Kakka II., the last Rāshtrakūṭa king of Mālkhēḍ. He had also the appellation Viranārāyaṇa. And, if we were guided by simply these three indications, we might select him as the patron of the author of the *Kavirājamārga*. The name, however, which determines the individualisation of the author's patron, is Atisayadhavala. This appellation has been established in connection with only the Rāshtrakūṭa king Amôghavarsha I.; and it is established by, among published records, the Sirūr and Nilgund inscriptions of A. D. 866, without which the identity of the author's patron could not have been determined.¹⁶ These two records of the time of this king himself establish for him the appellations Nripatuṅga, Amôghavarsha, and Atisayadhavala, and also Lakṣmīvallabha. Later records allot to him the appellation Viranārāyaṇa.¹⁷ He had a long and famous reign. And his kingdom included that part of Western India to which belonged the language, Kanarese, in a suitably archaic form of which the *Kavirājamārga* was written. And thus, though the work does not include a date, and though there is not anything in it specifying the dynasty or family to which the author's patron belonged, we do not hesitate to decide, on the basis of the allusions to Atisayadhavala, that the patron of the author of the *Kavirājamārga* was the Rāshtrakūṭa king Nripatuṅga-Atisayadhavala-Amôghavarsha I., and that the work was composed in the period A. D. 814-15 to 877-78. The work shews that Amôghavarsha I. actually had, during his life, the appellation Viranārāyaṇa, which at present has been found connected with him in only records of later times. And it tends to establish for him the other formal appellations of certainly Nītinirantara and Kṛitakṛityamalla, and most probably Naraḷōkachandra and Nityamallavallabha. None of these last four appellations, however, has as yet been found in epigraphic records. And it is practically certain that one of them, Kṛitakṛityamalla, was simply an invention of the author, made in the manner indicated on page 273 below. As such, perhaps it may have been confined, and the others like it, to this particular work.

¹⁶ For the Sirūr record, see Vol. XII. above, p. 318, and the revised version in *Ep. Ind.* Vol. VII. p. 202. For the Nilgund record, see *Ep. Ind.* Vol. VI. p. 102.

¹⁷ On this and the preceding point, see *Ep. Ind.* Vol. VI. p. 174 ff.

So far, we have made it clear that Nripatunga-Amoghavarsha I. was not the author of the Kavirajamarga, but was the patron of the author of it. Unless, however, we are to assume that simply an empty compliment was paid to him by a mere parasite, he did play a part of some kind in the composition of it. The author has done more than simply refer to his views as authoritative on various details. In chapter 1, after the two opening verses which have been explained on page 261 above, and after the prayers in verses 3 and 4 that the goddess Sarasvatī and the great (earlier) poets would help him, and after the reference in verse 5 to the courtiers of Atisayadhavala-(Amoghavarsha I.) as people who would pay honour to anyone well versed in the usages of the best poets, the author has proceeded to indicate the *alankāra* of *kāvya*, or the embellishment of poetical composition, as his topic. After some remarks of a general kind, he has in verse 22 explained that *kāvya* includes the arrangement of discriminative words or sounds, and embellishment by means of the display of various meanings. Then in verse 23 he has said that, "according to the opinion of Naralōkachandra-(Amoghavarsha I.)," the substance of *kāvya* is two-fold, namely, the *śarīra* or bodily form in which it becomes manifest (meaning, as we learn from the Sanskrit original, the *padāvallī*, or 'series of words, the text'), and the *paramlāṅkāra* or choice embellishments with which it is adorned, just as a man has a body and the fine ornaments which decorate it.¹⁸ In verse 24 he has said that, "according to the method declared by Atisayadhavala-(Amoghavarsha I.)," the *śarīra* takes two shapes, namely, *gadya* or 'ornate or rhythmic prose,' and *padya* or 'verse.'¹⁹ He has followed this up by some special remarks about *gadya* in verses 25 to 29, and about *padya* in verses 30 to 35, mentioning certain authors and works in each division, both in Sanskrit (Sanskṛita) and in Kanarese (Kannāḍa). He has then introduced in verses 36 to 42 a short disquisition on the various languages, which he has named Sanskrita and Sakkada, Pāḡada (Prākṛit), and Kannāḍa, mentioning also Pāḷa-Gaṇṇāḍa (Ancient Kanarese) in subsequent verses. And it is thus that, starting with the references to Amoghavarsha I. as Naralōkachandra and Atisayadhavala, i.e. has led up to the special subject of this chapter, the exposition of those things which are faults and those which are not faults, which commences with the statement, in verse 43, that ever so small a fault will spoil the whole of a poetical work, "just as a speck of dirt, which has found a place on it, will spoil a flirting rolling eye." In chapter 2, after a statement in verse 1 that the characteristics which adorn the *śarīra* are the *niratisayālāṅkāras* (= *paramlāṅkāras*), known to the ancient poets, the author has recited in verse 2 that, "in the reckoning of the manner of the method of investigation of the handsome and glorious Nripatunga-(Amoghavarsha I.)," the *paramlāṅkāra* has two divisions, namely, *śabda* or 'sound,' and *artha* or 'sense.' And it is thus that he has introduced his treatment, commencing in verse 3, of the special subject of this chapter, which is *śabdālāṅkāra* or the embellishment of sound. In chapter 3, the subject of which is *arthālāṅkāra* or the embellishment of sense (by poetical figures, &c.), the author has started the topic by saying at the very outset, in verse 1, that "the great king Amoghavarsha thought over the famous and well known series of embellishments of sense, and commanded (the treatment of it)" in the manner which the author then followed. This last statement perhaps indicates a closer connection of Amoghavarsha I. with this chapter, than with the rest of the work. And it might, with but a slight stretching of the meaning of words, be interpreted as implying that Amoghavarsha I. actually dictated this chapter. But it is clear that, whether as a mere compliment or not, the author has sought to represent his patron, not simply as an ordinary patron, or as a mere authority whose views were being cited as a guide, but as the inspirer of the whole work. And it was, no doubt, a recognition of that intention, coupled with a noticing of the prominent place given in the colophons to the name Nripatunga which is mentioned so conspicuously in the opening verse in addition to being introduced in various other passages, that led Bhaṭṭakalaṅka, in the seventeenth century, to speak of the work as *Nripatungagrantha*, "the book of Nripatunga," in the passage, in the *Karṇāṭakaśabdānuśāsana*, which has been given on page 198 above and will be referred to again on page 278 below.

¹⁸ Sanskrit scholars will recognise the ultimate source of all this matter. It is not within the scope of my Note to go into that.

¹⁹ He has omitted the third shape, *mītra*, the dramas, &c., as if it did not exist in Kanarese.

We may pass over pages 4 to 10 of the editor's Introduction to his so-called Nṛpatuṅga's *Kavirājamārga*, where he claims to have "placed before the reader all the information concerning "Nṛpatuṅga, which recent research has made accessible to us." The matter there set out has no connection with the subject of the present Note; and all that is necessary about it, has been said by me elsewhere, in some brief remarks in the *Ep. Ind.* Vol. VI. p. 197, note 6.²⁰ We pass on to points which the editor has missed altogether; namely, the name of the real author of the work, the particular earlier authority which he used as the basis as the basis of his work, and the way in which he proceeded in composing his work.

The author of this *Kavirājamārga* has mentioned and indicated a fairly large number of writers earlier than himself. In verse 26 of chapter 1, he has referred to the *Harshacharita* and *Kādambarī* (of Bāṇa) as being the very heart or core (*hṛidaya*) of good, pure, and even Sanskrit (*sad-amala-sama-Sanskṛita*), in the division of *gadya* or ornate or rhythmic prose. In verse 29, he has mentioned Vimala, Udaya, — (or, possibly, Vimalōdaya), — Nāgārjuna, Jayabandhu, Durvinita, and "others" (not specified by name), as having "in this order (*i kramado!*)" attained fame in *gadya*; meaning, apparently, Kanarese *gadya*. In verse 31, he has mentioned Guṇasūri, Nārāyaṇa, Bhāravi, Kālidāsa, Māgha, and "others" (not specified by name), as having written *mahākāvya*s or great classical poems, in the department of *padya* or verse. And, in verse 33, — under apparently the same department of *padya*, but of Kanarese *padya*, — he has referred to the *ādya-kāvya* or earlier poetry of "the supreme Śrīvijaya, Kaviśvara, — or Śrīvijaya, the Kaviśvara or lord of poets, — Paṇḍitachandra,²¹ Lōkapāla, and others (not specified by name)," and has stated that the aim of it was always the contrivance of an unsurpassed expansion of the topic.

The important point is the reference to *parama-Śrīvijaya*, "the supreme Śrīvijaya." The editor has not omitted to notice this mention of Śrīvijaya (Introd. p. 11). And he has told us that "Śrīvijaya is named by Kēśirāja and Maṅgarasa and is mentioned in an inscription at Sravaṇa-Belgoḷa."²² But in a footnote, in drawing attention to the occurrence of the name Śrīvijaya in also verse 149 of chapter 1, verse 153 of chapter 2, and verse 236 of chapter 3, of the *Kavirājamārga*, he has said that the name "may also be a title of Nṛpatuṅga;" that is, according to his representation, of Amoghavarsha I. as the author of the work. And he has said that "this view is "correct if Durgasiṃha means the Kavirājamārga when he speaks of Śrīvijayara Kavimārgaṃ." These last two words indicate a work known as "the Kavimārga of Śrīvijaya." And, for Durgasiṃha's mention of such a work, the editor has referred us to "Pañchatantra in Kaṇṇāṭaka-kāvya-maṇjari, Nov. 1896." This latter work is not accessible to me; and I am, therefore, not able to say what Durgasiṃha may have said about Śrīvijaya's *Kavimārga*.

In citing this mention by Durgasiṃha of the *Kavirājamārga* of Śrīvijaya, the editor seems to have had the real facts regarding the *Kavirājamārga* within reach. But either he was unable to

²⁰ It must, however, be noted that Mr. B. Narasimhaachar has pointed out (*Kāvyaśālokanam*, Introd. p. 50, note 2) that Mr. K. B. Pathak, in finding in verse 620 of the *Kāvyaśālokanam* a reference to "Dantiga, the Mēra of the Raṭṭas or Rāshtrakūṭas" (*Kavirājamārga*, Introd. p. 4, and *Jour. Bo. Br. R. As. Soc.* Vol. XX. p. 25), made the mistake of taking as a nominative the copulative dative *dantigam* of *danti*, 'an elephant;' and, now that we have the whole verse for reference, we can see that that is certainly the case. Accordingly, the latter part of my note 6 in *Ep. Ind.* Vol. VII. p. 218 has to be cancelled.

This verse 620 of the *Kāvyaśālokanam*, we now find, presents another instance of the name Raṭṭa being written with the Drāviḍian r. Raṭṭa, on which point see *Ep. Ind.* Vol. VII. p. 219.

²¹ But this may be yet another appellation of Śrīvijaya; or it may qualify Lōkapāla.

²² The editor, however, has not told us what Kēśirāja and Maṅgarasa said, in naming Śrīvijaya. — Regarding Kēśirāja, see page 277 below. — Maṅgarasa has been placed by Mr. Rice about A. D. 1240; see *Kaṇṇāṭaka-lasabdānuśāsanam*, Introd. p. 37.

The Sravaṇa-Belgoḷa inscription has been edited, and very fully dealt with, by Dr. Hultzsch. And reference may be made to his translation of verses 45, 46, in *Ep. Ind.* Vol. III. p. 204, for the allusion in it to Śrīvijaya. But it is not at all certain that that Śrīvijaya, whom the record marks as a pontiff and mentions between Vādirāja and Kamalabhadrā, is the one who is spoken of in the *Kavirājamārga*. However, Dr. Hultzsch has remarked (*loc. cit.* p. 185) that the account given in the inscription "is not a connected and complete account, and cannot even be proved to be in strictly chronological order."

follow up the clue, or else he had not sufficient independence to present the results to which it leads. We will do what he ought to have done, namely, exhibit fully the other three passages of the **Kavirājamārga**, in which mention is made of **Srīvijaya**.

Verse 149 of chapter 1, the last verse of that chapter, runs : —

Sakaḷ-āḷapa-kaḷa-kaḷapa-kathita-vyāvṛtṭiyol kūḍi chi-
trakaram-bol para-bhāga-bhāva-viḷasat-varṇa-kram-āvṛtṭiyam |
prakatam-māḍ-ire pōḍa chitra-kṛtīyam vyāvarṇnisuttam kavi-
prakaram **Srīvijaya**-prabhūtamam-idam kai-koḷvud-i māḷkeyim || 1, 149.

Translation : — “Receiving with praise (*this*) vividly descriptive work (literally, picture-work) which (*I have*) declared in such a way, combining a selection of the sayings of the whole art of speech, as to display the use of the series of the letters of the alphabet which gleam by (*their*) nature of superior merit, just as the painter of a picture displays the use of the series of colours which gleam by (*their*) nature of superior merit, the multitude of poets will accept **this product of Srīvijaya in this (new) guise** (literally, by this doing, performance, or manner).”

The last verse, 153, of chapter 2 runs : —

Bhāvisi śabda-tattva-samaya-sthitiyam kuṇṭ=ond=asēsha-bhā-
śhā-vishay-ōktīyam bagedu nōḍi purāṇa-kavi-prabhu-prayō- |
g-āvilasat-guṇ-ōḍayaman=āyḍ=avarim samed=ondu kāvyadiim
Srīvijaya-prabhūta-mudamam tanag=āgisidom **Kaviśvara**m || 2, 153.

Translation : — “Having thought over the established condition of the conventional settlement of the essential nature of sounds, (*and*) having given attention to (*that*) one (*thing*)²³ expression which is the object of all language, (*and*) having considered and seen the development of the good qualities which shine²⁴ in the usage of ancient great poets, (*and*) having culled from them, (*and*) having carried out (*the result*) by (*this*) one poetical composition, **Kaviśvara** has created for himself a joy which took its source from **Srīvijaya**. ”²⁵

And the concluding verse of the whole work, verse 236 of chapter 3, runs : —

Niravady-ānvayan=udgham=uddhata-ma[hā-kṣhi]rābdhi-ḍiṇḍira-pā-
ṇḍuram=ākṛanta-si(su)śaila-sāgara-dhar-āsāchakravāl-āmbaram |
parama-**Srīvijaya**-prabhūti-ja-yaśa[m] strī-bāla-vṛiddh-ābitam
paramānandita-lōkam=oppe nele-goḷg=ā-chandra-tāram-baram || 3, 236.

Translation : — “Let the fame which was born from the source that was the supreme **Srīvijaya**, — which is unlimited (*and*) imperishable (?);²⁶ which is the model (*of what all fame ought to be*); which is white like the bones of the cuttle-fish of the agitated great ocean of milk; (*and*) which has pervaded the beautiful mountains, the seas, the earth, the whole horizon, and the sky, — firmly endure, with the approbation of the supremely happy (*whole*) world, comprising women and children and old men, as long as the moon and stars shall last !”

By these three verses, the author of the work has most distinctly acknowledged that **this Kavirājamārga** was based on an earlier work by an author named **Srīvijaya**. In all three

²³ The exact force of the word *ondu* here is not clear; however, it does not affect the real point of the verse.

²⁴ The word *āvilasat* seems to have been used here for the ordinary word *vilasat* for the sake of the metre.

²⁵ We might render the text as meaning “**Kaviśvara** made to belong to himself the great joy of **Srīvijaya** (that is, the great joy which **Srīvijaya** felt in his own work).” I have preferred to present a translation which assigns to *prabhūta* a meaning which agrees exactly with the meaning that that word plainly has in verse 149 of chapter 1, and also with the meaning that is to be attached to *prabhūti* in verse 236 of chapter 3.

²⁶ There seems to be something wrong with the published text, which presents a nominative or genitive singular masculine of a compound ending with *ānvaya*, instead of a nom. sing. neuter in apposition with *yaśam*. It is difficult to recognise anything appropriate in a description of the fame as *niravady-ānvaya*, “of unblamable lineage,” which would result from obtaining the nom. sing. neuter by simply altering the *n* into *m*. And it hardly seems permissible to take the genitive *niravady-ānvayana*, and understand something like “of (me who am of) unblamable lineage.” I suspect that a better manuscript would shew *niravady-ānvayam*, which I have selected for my translation.

of them, he has very plainly expressed his appreciation of the merits of *Srīvijaya*. And, in the first of them, he has explicitly stated that his own work was simply the work of *Srīvijaya* in a new guise. It can hardly be doubted that the *Srīvijaya* thus referred to is "the supreme *Srīvijaya*" who is mentioned as an earlier poet in verse 33 of chapter 1 (see page 269 above), and that the work thus dealt with was the *Kavimārga* of *Srīvijaya*, which, according to the editor, is mentioned by the writer Durgasimha (see page 269 above), who appears to have been a contemporary of the Western Chālukya king Perma-Jagadēkamalla II. (A. D. 1138-39 to 1149).

For the rest, in verse 153 of chapter 2, the author of this *Kavirājamārga* has distinctly introduced himself to us by the appellation of *Kaviśvara*. This appellation, which simply means 'lord of poets,' was, of course, not his personal name but only a secondary designation. It was plainly adopted in imitation of the earlier *Kaviśvara* who is mentioned in verse 33 of chapter 1. And it seems very probable that it was a secondary appellation of *Srīvijaya* himself, whose work was thus presented in a new guise in the *Kavirājamārga*. The text of the verse mentioned above, — *parama-Srīvijaya-Kaviśvara-Paṇḍitachandra-Lōkapāl-ādigalā*, — fully permits of our understanding *Kaviśvara* as a secondary name of *Srīvijaya*, instead of as the name of a separate individual. And, whereas *Kēśirāja* has in verse 5 of the preface to his *Sabdamanidarpana* mentioned *Srīvijaya* (see page 277 below), but not any *Kaviśvara*, in the list of authors whose good style it was his aim to follow, in sūtra 169 he has spoken of a certain usage as being, — *Kaviśvara-matadim*, — "according to the opinion of *Kaviśvara*."

We come now to the subject of certain passages in the *Kavirājamārga*, which are alleged to have been introduced as quotations in other works. The examination of them is interesting, because they shew the way in which *Kaviśvara* proceeded in presenting the work of *Srīvijaya* in its new guise; namely, not by quoting it wholesale, but by making certain alterations, of which some were trivial, but others are decidedly important and instructive.

The editor has said (Introd. p. 1) that "most of the verses, in which *Nṛipatūṅga* speaks of "prāsa, are quoted in the *Chhandōmbudhi*."²⁷ He has specified (*ibid.* note 2) verses 28 to 43 of chapter 2, and verses 232, 233 — (by mistake for 231, 232) — of chapter 3, of the *Kavirājamārga*. He has made it clear that by the *Chhandōmbudhi* he means the work on Kanarese prosody, entitled *Chhandōmbudhi* and *Chhandōmburāsi* in its colophons, of the earlier *Nāgavarma*, in respect of whom Mr. R. Narasimhachar has shewn that he flourished at the close of the tenth century A. D.²⁸ And he has referred us to pages 17 to 21 of the Rev. Dr. Kittel's edition of that work. This was published at Mangalore, in 1875. And, examining the work in that edition, we find that verses 50 to 65 of it answer, more or less closely, to verses 28, 29, 31 to 33, and 35 to 43, of chapter 2, and verses 231 and 232 of chapter 3, of the *Kavirājamārga*; verses 30 and 34 of chapter 2 of the *Kavirājamārga* are not found there.

Now, it is to be remarked that it is not certain that verses 50 to 65 of the *Chhandōmbudhi* belong to the real version of that work at all. They occur in the treatment of *prāsa* or alliteration, which commences with verse 41 and ends with verse 66. Dr. Kittel arrived at the conclusion that "Nāgavarma did not include the subject of alliterations in his prosody."²⁹ And it is, therefore, doubtful, whether we are dealing with *Nāgavarma* himself, or with someone who made

²⁷ To this he has attached the remark: — "That these verses cannot have been composed by *Nāgavarma* and "that they must have been borrowed from an older author is pretty clear to any one who remembers the fact that "the author of the *Chhandōmbudhi* addresses his verses to his wife." How that conclusion is to be deduced from the stated fact, which is a fact, has not been made evident. But the editor probably had in view the point that, whereas in verse 22 of the *Chhandōmbudhi* the author of that work has represented himself as expounding the subject of prosody to his wife, verse 65, — an illustrative stanza, commencing *arasarō-śā nīh*, which will be referred to again further on, and which stands in a very similar form as verse 232 of chapter 3 of the *Kavirājamārga*, ends with the word *magalē*, "O daughter!"

²⁸ See note 5 on page 197 above.

²⁹ See his *Nāgavarma's Canarese Prosody*, Introd. p. 6.

interpolations in his work. However, the question simply is, whether certain verses which we find in the *Chhandōmbudhi*, whether they are original or interpolated, were taken into that work from the *Kavirājamārga*.

We need not examine verses 29, 31 to 33, and 35 to 41, of chapter 2 of the *Kavirājamārga*. Two of them, namely, *Kavirājamārga*, chapter 2, verses 32, 35, and *Chhandōmbudhi*, verses 53, 55, stand in precisely the same form in the two works, which, however, does not prove that it was from the *Kavirājamārga* that they were taken into the *Chhandōmbudhi*, whether originally or by interpolation; and, while in the others there are differences, greater or less as the case may be, in the actual readings given in the two works, but without affecting the general meaning of the verses, that fact would not necessarily prove that they were not taken into the *Chhandōmbudhi* from the *Kavirājamārga*. Nor need we examine verses 231, 232 of chapter 3 of the *Kavirājamārga*, which stand as verses 64, 65 in the *Chhandōmbudhi*. Here, again, there are certain minor discrepancies, which, however, in this case also, would not necessarily prove that the verses were not taken into the *Chhandōmbudhi* from the *Kavirājamārga*. But, whereas in one direction Dr. Kittel has rendered it at any rate doubtful whether verses 64, 65 belong to the real version of the *Chhandōmbudhi*,³⁰ in another direction Mr. R. Narasimhachar has told us that the corresponding verses, which stand as verses 231 and 232 of chapter 3, and the three verses which stand next after them, do not belong to the *Kavirājamārga* at all.³¹ And neither these two, nor the other verses in respect of which I have said that it is not necessary to examine them, are of any importance, or in any way helpful; because the originals of them did not happen to offer the facilities for adaptation of which Kaviśvara availed himself in forming the three verses which are important and instructive. The important verses are the following ones, which I present side by side for the purpose of easy comparison, marking by thick type those portions of them to which particular attention is to be directed:—

Kavirājamārga of Kaviśvara.

³⁰ See the preceding paragraph.

³¹ See his *Kāvyavalōkanam*, Introd. p. 13, note 2. And it is at any rate obvious — (and it ought to have been so even to the editor of the *Kavirājamārga*) — that, if they do belong to the *Kavirājamārga*, they do not stand in their right place, which would be somewhere in chapter 2. Mr. Narasimhachar has also told us (*ibid.*) that verse 233 is a quotation from the *Līlāvatī* of Nēmicandra, of the twelfth century A. D. And Dr. Kittel has expressed the opinion that verse 65 of the *Chhandōmbudhi*, = *Kavirājamārga*, verse 232 of chapter 3, was taken from verse 20 of chapter 2 of the *Kavijihvābandhana* (see his *Nāgavarma's Canarese Prosody*, p. 21; note 4, and Introd. p. 6) of Jēvarakavi (see *id.* p. 61), whom he has referred to the beginning of the sixteenth century A. D. (*ibid.*), and who, as he had the title Abhinava-Kēśirāja (see Mr. Rice's *Karṇāṭakasābhidānuśānam*, Introd. p. 41), was at any rate later than the original Kēśirāja (about A. D. 1225; see page 197 above).

The editor of the *Kavirājamārga* has said, in respect of verse 65 of the *Chhandōmbudhi*, that “this verse which begins with the words ‘arasaroḷ ela’ is therefore not a later interpolation in the *Chhandōmbudhi*” (see his Introd. p. 1, note 5); namely, because the *Karṇāṭakasābhidānuśāna* cites it and appeals to Nṛipatūṅga as a standard authority on *alamkāra* on these points (see page 278 below). But there is nothing in that; the *Karṇāṭakasābhidānuśāna* mentions Nṛipatūṅga, not in connection with the stanza in question, but in a quite separate passage.

³² It would appear, from a footnote, that one of the three manuscripts used in preparing the text of the *Kavirājamārga*, presents the reading — *Satamakha-sadṛis-ānubhāva-padamaṁ vettam*.

³³ We require *pettam*, to govern *sampattam*; not *bettam* in composition with the word ending in *vibhavaṁ*.

Kavirājamārga of Kavīśvara.

orevem || p. 21. v. 63.

Now, we see at once that the editor's statement, that the above verses of the *Kavirājamārga* were quoted in the *Chhandōmbudhi*, is at any rate not literally accurate. At the best, these three verses were taken from the *Kavirājamārga* into the *Chhandōmbudhi* with alterations. We learn more, however, about the matter, when we examine the details of the discrepancies.

The first of these three verses recites in its first two *pādas*, in both versions, that, in the matter of embellishment of sound, in Kanarese the most important detail is the alliteration. The second two *pādas* say, in the *Kavirājamārga*:—"According to the views of **Kṛitakṛityamallavallabha** ("the Vallabha who is the wrestler, or the most excellent, of those who have done their duty"), the expansion of it (that is, the treatment of this topic) is in this manner (as follows)." In the *Chhandōmbudhi*, the same two *pādas* say:—"According to the views of all people, it (namely, the alliteration) realises the object that is to be attained; when it is faulty, how shall poetry appear to any advantage at all?"

Now, we know that this verse, as given in the *Kavirājamārga*, was certainly not adapted from the *Chhandōmbudhi*. Kavīśvara wrote his *Kavirājamārga* in the period A. D. 814-15 to 877-78. Whereas, the Nāgavarma who wrote the *Chhandōmbudhi* flourished in the period A. D. 975 to 1000.³⁵ And any interpolator of Nāgavarma was, naturally, not earlier than Nāgavarma himself. If there was any interchange of the verse between the *Kavirājamārga* and the *Chhandōmbudhi*, it was, of course, taken from the *Kavirājamārga* into the *Chhandōmbudhi*. But, if that was done, there is not any acceptable reason why Nāgavarma or his interpolator should vary the text, so as to suppress the name of the authority cited by Kavīśvara. On the other hand, if the verse came into both works from another source, it is easy to see how Kavīśvara may have ingeniously altered a portion of an original text, without in any way interfering with the chief part of it, the dictum pronounced in it, so as to introduce an appellation of his patron as the authority on the topic to which the verse refers. And it may be incidentally remarked that it seems very likely that it was this particular verse, in its original form, which suggested the idea of the appellation **Kṛitakṛityamalla** for **Amōghavarsha I.**, established by adaptation of the original verse.

The second of these three verses does not pronounce or lead up to any rule. It is simply a stanza put forward to illustrate final alliteration. As it stands in the *Kavirājamārga*, the meaning of it is:—"Nṛipatuṅgadēva, who displays excessively pure fame, (and) to whom the entire mass of (his) enemies has bowed down, has further always borne with grace the burden of the possession of a widely spread glory (or good fortune)." As it stands in the *Chhandōmbudhi*, it does not specify any individual by name; and it means:—"He who displays excessively pure fame, (and) to whom the entire mass of (his) enemies has bowed down, (and) further who possesses a development of authority similar to that of **Satamakha** (Indra), has obtained the possession of a widely spread glory (or good fortune)." Here, if Nāgavarma or his interpolator took the verse from Kavīśvara, he spoilt a very apt illustration, by substituting something altogether indeterminate in the place of words which introduced an apposite and well-known name. On the other hand, here, again, it is easy to see how very simply Kavīśvara may have adapted a verse, not composed by himself, by altering the last line of it, without in any way spoiling the applicability of it, so as to introduce the name of his patron.

³⁴ This appears to be a conjecture, in the place of *mūrum* or *mōdam*.

³⁵ See note 5 on page 197 above.

The last of these three verses introduces, as explained by Dr. Kittel in his edition of the *Chhandōmbudhi*, "the four kinds of alliteration of the *third* class, occurring along with the ten simple "alliterations (*prāsa*), and the successive (*anuprāsa*) and final one (*antaprāsa*)." As it stands in the *Kavirājamārga*, the last *pāda* asserts that the matter introduced in the verse is "according to the well known method of the splendid *Nripatuṅga*." As it stands in the *Chhandōmbudhi*, the same *pāda* is an address to some lady, and means : — "Listen, O thou who hast splendid long eyes resembling a water-lily ! ; I will declare it." Here, again, there is not any acceptable reason why, if *Nāgavarma* or his interpolator took the verse from *Kaviśvara*, he should have altered the text, so as to suppress the name of *Nripatuṅga*. And, on the other hand, here, again, it is easy to see in how simple a manner *Kaviśvara* may have adapted still another verse, not composed by himself, so as to name his patron as the authority for the matter stated in it.

Taking these three verses together, we can see most plainly that *Nāgavarma* or his interpolator did not either quote or adapt them from *Kaviśvara*; but *Kaviśvara* on the one side, and *Nāgavarma* or his interpolator on the other side, used standard verses which they took independently from some third writer. A simple comparison of the texts given on page 272 f. above is sufficient to shew that the assertion, that the versions of these verses standing in the *Chhandōmbudhi* are quotations from the *Kavirājamārga*, is absolutely opposed to fact. And it is altogether incredible that *Nāgavarma* or his interpolator, adapting verses from the *Kavirājamārga*, should gratuitously, and in the most objectless manner, spoil them by striking out references to an authority made by appellations of which one at least, presented in two of the verses, was a well known and famous one, and by substituting words which add neither force nor beauty to the verses. There was a difference in treatment ; namely, that *Kaviśvara* adapted the original verses of the third writer, whereas *Nāgavarma* or his interpolator quoted them, and probably quoted them with absolute exactness. And those were the two different methods by which the verses standing in the *Kavirājamārga* and the *Chhandōmbudhi* were obtained ; namely, respectively by adaptation and by quotation.

There remains the point as to the source of these verses. From what *Kaviśvara*, the author of the *Kavirājamārga*, has told us, it was certainly from the *Kavimārga* of *Srīvijaya* that he adapted his verses. The earlier *Nāgavarma* or his interpolator may have taken the corresponding verses into the *Chhandōmbudhi* directly from that same work, the *Kavimārga* of *Srīvijaya*, or indirectly by obtaining them from some other writer who had taken them from that work. On this latter point, we can only submit the following remarks for further consideration. In his introductory verse 22, *Nāgavarma* has told us that his *Chhandōmbudhi* or *Chhandōmburāsi* was based to a great extent on a work by *Pīṅgala*, which he seems to mention by the name of *Māṅgalachchanda*. It seems to be uncertain whether he refers to the Sanskrit *Pīṅgala*, or to the so-called *Prākṛit* *Pīṅgala*, or perhaps to both of them.³⁵ But there cannot have been obtained from either of those writers any of the Kanarese characteristics, of which the *prāsa* or alliteration, exhibited in the *Chhandōmbudhi* whether originally or by interpolation, is emphatically one. On the other hand, the *Chhandōmbudhi* does not present any mention of the name of *Srīvijaya*. But verse 252 exhibits an *Aupachchandasika* metre which it describes as, — *Kaviśvar-ōktam*, — "declared by *Kaviśvara*." There is no reason for thinking that this use of the name *Kaviśvara* is a reference by *Nāgavarman* to himself ; his own *śirūda* was not *Kaviśvara* but *Kavirājahama*. And it certainly does not carry any reference to the *Kaviśvara* who wrote the *Kavirājamārga*, which does not deal with metres. But it may easily denote *Srīvijaya* ; for we have seen, on page 269 above, that it is quite possible that he had the appellation *Kaviśvara*.

The editor has further said (Introd. p. 1) that "the *Kavirājamārga* is also alluded to in the "*Kāvyaśālākāṇa*." This work is the *Kāvyaśālākāṇa* of the second *Nāgavarma*, who, as has

³⁵ See Dr. Kittel's *Nāgavarma's Kanarese Prosody*, Introd. p. 7.

been shewn by Mr. R. Narasimhachar in his recently published edition of it, flourished about A. D. 1150.³⁷ The editor of the *Kavirājamārga* has not specified any particular passage in the *Kāvyaśāloka* for this asserted allusion to the *Kavirājamārga*. And, as a matter of fact, it would seem that his authority for his assertion is nothing but an assertion made by Mr. Rice that the *Kavirājamārga* "is cited as a standard authority by Nāgavarmma in his *Kāvyaśāloka*."³⁸ There can, however, be no doubt that the intended reference is to verse 521 of the *Kāvyaśāloka*, which does present the expression *kuvi-rāja-mārggaḍo*. But, as Mr. R. Narasimhachar has told us on p. 16 of his Introduction to the *Kāvyaśāloka*, the context clearly shews that the expression does not denote any particular work, but simply refers to "the path of excellent poets." Beyond that, Mr. R. Narasimhachar has said (*loc. cit.* p. 17 f.) that there are many striking coincidences in the *Kavirājamārga* and the *Kāvyaśāloka*; in respect of which, he considers, it may be presumed that verses in the *Kāvyaśāloka* were suggested by verses in the *Kavirājamārga*, or the explanation may be "the identity of the source from which both the works have derived their ideas." But he has also told us (*loc. cit.* p. 16) that, in the *Kāvyaśāloka*, "strange as it may appear, Nāgavarma "makes no allusion to the earlier work *Kavirājamārga*, nor does he quote a single verse from it."

The editor has further said (Intro. p. 1) that "Kēśirāja quotes three verses from the "Kavirājamārga;" and he has specified those verses (*ibid.* note 4) as 32 and 58 of chapter 1, and 7 of chapter 2. His reference to the other work is to the Kanarese grammar entitled *Sabdamanidarpana* of Kēśirāja, who has been placed by Mr. Rice about A. D. 1225.³⁹ And he has referred us to the Rev. Dr. Kittel's edition of the *Sabdamanidarpana*, which was published at Mangalore in 1872. Here, the facts are as follows:—

In verse 32 of chapter 1 of the *Kavirājamārga*, Kaviśvara has mentioned, in the department of Kanarese *paḍya*, two classes of poetical composition named *chhattāṇa* and *bedāṇḍe*. His verse runs:—

Nuḍig-ellam sallada Kan-
naḍadoḷ chattaṇamum bedāṇḍeyum=end-i-
gaḍina negaṭteya kabbadoḷ=
oḍambaḍam māḍidar=ppurātana-kavigaḷ || 1, 32.

As an illustration to sūtra 93, of his *Sabdamanidarpana*, which teaches the use of the suffix *ar* to form, for instance, the verbal form *māḍidar*, Kēśirāja has presented a stanza (see Dr. Kittel's edition, p. 121) which stands in exactly that same form, syllable for syllable, except in the use of *j* instead of *ch*, in *jattāṇamum* instead of *chattaṇamum*.

In verse 57 of chapter 1 of the *Kavirājamārga*, Kaviśvara has recited that a mixture of Sanskrit and Kanarese in compounds destroys the flavour, "just like mixing drops of buttermilk with boiling milk." In illustration of that, he has given verse 58, which runs:—

Arasu-kumārānan=āyata-
tara-kaḍe-gaṇṇinde nōḍi keḷadi-samētaṁ
parigata-nageyinde=irddem
guru-nāṇ-bharadindam=eragi mukha-tāvareyaṁ || 1, 58.

And, to shew how that verse ought to have been framed in proper language, he has followed it up by verse 59, to the same purport, which commences with *narapati-tanayanan*, where it presents a suitable Sanskrit word for the word *arasu*, and which further puts forward a correct Kanarese expression instead of the hybrid compound *keḷadi-samētaṁ*, and appropriate Sanskrit words, in the other compounds, instead of the Kanarese *kaḍe-gaṇṇinde*, *nageyinde*, *nāṇ*, and *tāvareyaṁ*.

Under sūtra 80 of his *Sabdamanidarpana*, which defines the term *sama-Saṁskṛita* as meaning pure Sanskrit crude nouns which are used in Kanarese without any alteration, Kēśirāja has said that

³⁷ See note 5 on page 127 above.

³⁸ *Kavyaśālokaśālokaśāloka*, Intro. p. 36.

³⁹ *Kavyaśālokaśālokaśāloka*, Intro. p. 24.

such words must not (as a rule) be used in composition with pure Kanarese words; and, as an instance of violation of that rule, he has used that same verse *arasu-kumdranan*, &c., with, however (see Dr. Kittel's edition, p. 98), the differences of *gaḍe* for *kaḍe*, *irḍan* for *irḍen*, and *nḍu-bharadin* for *nḍu-bharadindam*.

In opening the topic of *śabdāśhāḍā* or embellishment of sound by rhymes, &c., *Kaviśvara* has said, in verse 4 of chapter 2 of his *Kavirājamārga*, that soft and flexible words should be used, exactly according to their appropriateness, in order to avoid any such effect as "mixing together rice in its husk and curds;" in verse 5, that, even though the meaning may not be spoilt, the use of unsuitable words would be like "stringing together pearls and pepper-corns;"⁴⁰ and, in verse 6, that the use of ponderous words, pressing upon light ones that precede them, would have the same unhappy effect as "placing a heavy burden on the head of a child." And, as an instance of bad style (*dūshya*), exhibiting faults such as those against which he has warned his readers, he has given verse 7, which runs:—

Barisi kshitipatiyaṁ sa-
yt-irisi priya-kuśala-vārtteyaṁ besa-goṇḍu |
sthiram-irḍḍu prabhu nūḍiye
prarūḍha-mudan=ādan=ātan=embudu dūshyaṁ || 2, 7.

And, to show how the meaning of that verse ought to have been expressed in good style (*mārga*), he has followed it up by verse 8, which commences *kshitipatiyaṁ barisi*, and runs to practically the same purport as verse 7, except that it introduces an epithet *jagan-nuta*, which is not represented in verse 7.

Sūtra 59 of the *Sabdamāṇidarpaṇa*, as explained by Dr. Kittel (see his edition, p. 71, and now also his *Kannada Grammar*, p. 198, § 241, and a remark at the bottom of p. 197), teaches that it is a mistake to treat as *īthila* or slack, that is as not lengthening a preceding short vowel, a double consonant the second component of which is *r*, and also that in writing out verses it is bad to leave no space between the different words unless they come under the rules of *saṁdhi*. And, in illustration of the *sūtra*, *Kēśirāja*, has presented a stanza which runs (see Dr. Kittel's edition, p. 71):⁴¹—

Barisi pradhānaraṁ ku-
||irisi priya-kuśala-vārtteyaṁ nere kēḍu |
sthiram-irḍḍu prabhu nūḍiye
prarūḍha-mudan=ādan=ātan=embud=amārggaṁ ||

Of these three verses thus presented in the *Sabdamāṇidarpaṇa*, the first, *nūḍig-elluṁ*, &c., might certainly be taken as a quotation from the *Kavirājamārga*; the only difference between the two versions is in a quite unimportant detail. And the second of them, *arasu-kumārānan*, &c., might well pass for a quotation, from that same work, with three various readings, in details of no special

⁴⁰ This simile is presented in the words *muttuṁ-meḷasam-gōḍ-ante*. It is presented, in the same words, in another verse which was first brought to notice by Mr. Rice, who, however, chiefly through confusing *gōḍa*, = *kōḍa*, the past relative participle of *kō* (3), 'to string upon a thread,' with *gōḍi*, 'wheat,' failed to understand it; see *Jour. R. As. Soc.*, 1883, p. 296, and *Karnāṭakabhāṣābhāṣana*, Introd. p. 9. That verse is to be found in Dr. Kittel's *Sabdamāṇidarpaṇa*, p. 78, where it is given in illustration of sūtra 65, which teaches the changes of *k* to *g*, &c., in forming compounds. But the text there, using another variant of *meṇasu*, gives *meḷasam*, by mistake for *meḷasam*, which is probably the chief reason why even Dr. Kittel did not recognise the meaning of the simile; see *id.* Introd. p. 17 f. That same text also presents, before *muttuṁ*, the unintelligible reading *jān-eḍe*. The correct reading in that point, — namely, *jān-gēde* (or *jān-gede*), 'on knowledge being destroyed or impaired,' — has been supplied by Dr. Kittel in his *Kannada-English Dictionary*, under *jān*; where, however, with still another variant of *meṇasu*, *meḷasam* is presented, instead of *meḷasam*. That verse means: — "The poetry of (these) wretched poets, who, taking an Old-Kanarese word, and, taking and joining to it a Sanskrit (word), ignorantly express themselves just in the same fashion as if they were stringing together pearls and pepper-coins, — how can it please the hearts of learned people?"

⁴¹ In transcribing Dr. Kittel's text of the verse, I have added the consonants which ought to have been given by repetition after a preceding *r*; that detail has been disregarded in Dr. Kittel's book, throughout.

importance, which could easily be accounted for. But the third verse, *barisi pradhānaram kullirisi*, &c., can hardly be accepted as a quotation of the verse *barisi kshītipatiyam sayt-irisi*, &c. The differences go beyond anything in the way of any ordinary various readings. They alter the sense in certain well marked features. The verse in the *Kavirājamārga* speaks of a "king" being "summoned (literally, caused to come)" and "made to feel at ease;" whereas, the verse in the *Saddamanidarpana* speaks, much more appropriately, of "ministers" being "summoned" and "caused, or allowed, to sit down." It might be said that Kēśirāja, not satisfied with having in this verse already three instances of the combination *pr* after a short vowel, introduced a fourth by adapting the verse of the *Kavirājamārga* by substituting *pradhānaram* for *kshītipatiyam*. But, even so, there was no necessity of any kind for him to substitute *kullirisi*, 'having caused to sit down,' for *sayt-irisi*, 'having caused to feel at ease,' *nera kēśu*, 'having made full inquires,' for *besa-gondu*, 'having demanded or questioned,' and *amārggam*, 'bad style,' for *dūshyam*, 'to be censured.' And, more to the point still, if he so introduced an additional and quite superfluous instance of the combination *pr* after a short vowel, he gratuitously destroyed another instance of bad style, objected to by him, which was to be found in connection with the combination *ksh* after a short vowel. The explanation is to be found in the following facts. It appears that Kēśirāja has not anywhere mentioned the name of any Kaviśvara, or any work called *Kavirājamārga*. He has mentioned Nripatūṅga; but only in the illustrative stanza quoted on page 197 above, which does not attribute to him any literary attainments or any connection with literature, and does not tend in any way to connect him with the *Kavirājamārga*. On the other hand, in verse 5 of the introduction to his *Saddamanidarpana* he has expressly mentioned Śrīvijaya among the writers whose good style was to be kept in view in his own work.⁴³ It can hardly be doubted that Kēśirāja took the verse *barisi pradhānaram*, &c., not from the *Kavirājamārga*, but from Śrīvijaya.⁴⁴ We naturally decide that it was from Śrīvijaya that he took also the verses *nuḍḍi-ellam*, &c., and *arasu-kumḍaranam*, &c., and that these verses, again, were taken by Kaviśvara into his *Kavirājamārga* from Śrīvijaya's work. And it is tolerably certain that Kaviśvara's verse *barisi kshītipatiyam*, &c., was another case of adaptation, which was probably made because Kaviśvara found it easier to compose his next verse with an alliteration of the *t* of *kshītipatiyam*, than with an alliteration of the *dh* of *pradhānaram*.

The editor has further said (Introd. p. 1, note 5) that Īśvarakavi, — a writer referred both by Dr. Kittel⁴⁵ and by Mr. R. Narasimhachar⁴⁶ to the sixteenth century A. D. — has quoted "from Nripatūṅga" verse 232 of chapter 3 of the *Kavirājamārga*, which is a stanza, commencing *arasaru=ela nūḥ*, in illustration of the double *prāsa* or alliteration of the second and third syllables of each *pāda* of a verse. He has, in fact, said that "both Nāgavarmā and Īśvarakavi quote it from "Nripatūṅga." And, as has been indicated on page 272 above, in verse 65 of the *Chhandāmbudhī* we have that same stanza, with certain unimportant differences in detail. As to what form the verse may present in Īśvarakavi's work, I am not able to say anything. But the selection of the verse as an instance of quotation of the *Kavirājamārga* by Nāgavarma and Īśvarakavi, is peculiarly unfortunate. As has already been remarked on page 272 above (see also note 31), Dr. Kittel has rendered it at any rate doubtful whether verse 65 in the *Chhandāmbudhī* belongs to the real version of that work,

⁴³ He has, perhaps, even mentioned Śrīvijaya's *Kavimārga*; namely, in sūtra 193 (Dr. Kittel's edition, p. 231), where he has said that he has to the best of his ability elucidated the subject of compounds as they occur in *kavi-mārga*. The commentary, however, explains this word as meaning *kavigala mārgadalli*, 'in the style or usage of poets.' And so we may have here only an use of *kavi-mārga*, analogous to the mention of *kavi-rāja-mārga* in the *Kāvyaśāstrakāṇḍa*, regarding which see page 275 above.

⁴⁴ The same stanza *barisi pradhānaram*, &c., has been given in precisely that same form by Bhaṭṭālakāṇḍa in the course of his commentary on sūtra 87 of his *Karṇāṭkashāstrābhīnūśāna*; see Mr. Rice's edition of that work, in which, while the transliterated text (p. 60) presents *barasi*, the Kanarese text (p. 53) shows *barisi*. Bhaṭṭālakāṇḍa has introduced the stanza as "used as an example (*udāhṛita*) by him (Kēśava);" meaning "by Kēśirāja," as is shewn by his immediately preceding quotation of sūtra 59 of the *Saddamanidarpana*. And thus, while not helping us by attributing the stanza to Śrīvijaya, — whom, so far as the *Karṇāṭkashāstrābhīnūśāna* goes, he seems not to have known at all, — he has at any rate plainly implied that he knew that it was not composed by Kēśirāja.

⁴⁵ Nāgavarma's *Kanarese Prosody*, Introd. p. 61.

⁴⁶ *Kāvyaśāstrakāṇḍam*, Introd. pp. 19, 38.

and has expressed the opinion that it was taken into it from the *Kavijihvābandhana* of Īśvarakavi; and, in another direction, Mr. R. Narasimhaçhar has told us that the verses which stand as 231 to 235 in chapter 3 of the *Kavirājamārga*, do not belong to that work at all. So far, therefore, from it being the case that Īśvarakavi quoted the said verse 232 from the *Kavirājamārga*, it is tolerably obvious that the verse was introduced into the *Kavirājamārga*, by interpolation, from the work of Īśvarakavi.

Finally, the editor has asserted (Introduct. p. 1) that "the *Śabdānuśāsana* cites one verse" from the *Kavirājamārga*, "and appeals to Nṛpatuṅga as a standard authority on *Alaṅkāra*." We will take first the latter assertion, which is more or less correct. As has been already stated on page 198 above, in his own commentary on sūtra 288 of his *Karṇāṭakasabdānuśāsana*, which he finished in A. D. 1604,⁴⁶ in referring to a certain point of difference between the northern and the southern poets, Bhaṭṭākalāṅka has said that "a clever disquisition on the different usages of the varying styles of the south and the north, is to be seen in the book of Nṛpatuṅga." And there can be no doubt that his allusion is to verses 49 to 108 of chapter 2 of the *Kavirājamārga*, written by Kaviśvara under the patronage of Nṛpatuṅga-Amōghavarsha I., which does there present a disquisition on the differing styles of the northern and the southern poets. As regards the asserted instance of citation, however, the facts are as follows. The verse in question has been specified by the editor (Introduct. p. 1, note 5) as the verse *arasaroḥ=ela nīm, &c.*, which stands as verse 232 of chapter 3 of the *Kavirājamārga* in illustration of the double *prāsa* or alliteration of the second and third syllables of each *pāda* of a verse. And below sūtra 202 of his *Karṇāṭakasabdānuśāsana*, in illustration of his statement that *arasi*, 'a queen,' and other words classed with it, are irregular feminines, Bhaṭṭākalāṅka has presented that same verse, except that, with an unimportant difference, with him it begins *arasaroḥ=elagē*, instead of *arasaroḥ=ela nīm*.⁴⁷ If we knew no better, this, taken in connection with Bhaṭṭākalāṅka's reference to *Nṛpatuṅgagrantha*, "the book of Nṛpatuṅga," might certainly be taken as a quotation from the *Kavirājamārga*. But, as has been said on page 272 above, Mr. R. Narasimhaçhar has told us that the verses which stand as verses 231 to 235 in chapter 3 of the *Kavirājamārga*, do not belong to that work at all. It was, therefore, not from the specified verse 232 of the *Kavirājamārga* that Bhaṭṭākalāṅka took his illustration of the use of the word *arasi*, 'a queen;' unless, of course, the interpolation of the five verses in question into the *Kavirājamārga* had already been accomplished before A. D. 1604: and the probability is that Bhaṭṭākalāṅka obtained the verse from Īśvarakavi.

The conclusions at which we arrive in respect of the composition of the *Kavirājamārga* are plain and simple. The work was written during the period A. D. 814-15 to 877-78. And the author of it was a person who has made himself known to us by the name of Kaviśvara, — a secondary appellation which he must have adopted in imitation of an earlier Kaviśvara who has been mentioned by him. But he wrote his work under the patronage of the Rāshtrakūṭa king Nṛpatuṅga-Amōghavarsha I. And he has credited his patron with inspiring so much of it, and has otherwise introduced his patron's names and quoted his views so often and so prominently, that the work came to be known, in later times, as *Nṛpatuṅgagrantha*, "the book of Nṛpatuṅga." Kaviśvara based his work on the *Kavimārga* of a writer named Śrīvijaya, who was very probably the earlier Kaviśvara himself, in imitation of whom the author adopted the appellation by which he has made himself known to us.⁴⁸ Kaviśvara has distinctly told

⁴⁶ See note 9 on page 197 above.

⁴⁷ See Mr. Rice's *Karṇāṭakasabdānuśāsana*, transliterated text, p. 122, as specified by the editor of the *Kavirājamārga*. The Kanarese text (p. 112) presents *arasaroḥ=ela nīm*; but that has been indicated in the table of corrections as a mistake for *arasaroḥ=elagē*.

⁴⁸ Mr. R. Narasimhaçhar has expressed the opinion that "in spite of the arguments adduced by Mr. Pathak "on p. 8 of his Introduction, there is room for supposing that Śrīvijaya may have written the work in the name of "his royal patron" (*Kāvyāvalokanam*, Introduct. p. 13, note 3). But, if he had gone fully into the matter, he would certainly have arrived at the conclusions reached by me; the specification (see page 269 above) of the writings of Śrīvijaya as *ādya-kāvya*, 'early poetry,' that is, earlier than the time of the writer of this *Kavirājamārga*, is sufficient to shew that Śrīvijaya was not the author of this *Kavirājamārga*.

us that his own work was the work of Srivijaya in a new guise. We can see how, in certain places, he fashioned that new guise, by adapting verses of Srivijaya with the introduction of certain alterations to suit the patronage under which he wrote. And, if Srivijaya's *Kavimārga* is ever recovered, we shall probably find that practically the whole of Kaviśvara's *Kavirājamārga* is simply an adaptation of it, and that it was Srivijaya, and not either Kaviśvara or Amoghavarsha I., who made the translations from the Sanskrit writer Daṇḍin which underlie so much of the *Kavirājamārga*.⁴⁹

The conclusions to be formed regarding the nature of the edition of Kaviśvara's *Kavirājamārga* under the name of Nripatunga's *Kavirājamārga* are neither so simple to arrive at, nor so pleasant to express. The book possesses, indeed, one good feature, in presenting, in addition to the text in Kanarese characters which is of course requisite for Native students, the transliterated text which makes it so much easier for others to investigate its contents without an unprofitable waste of time; and it would be a material enhancement of the value of all the publications of the series in which this book has found a place, if every one of them, without exception, were cast on the same lines in that respect. Also, it gives us, we presume, a reliable version of the text, as far as it could be settled by the manuscripts which were available. Beyond that, however, it does not place before us anything that can be taken as a topic of commendation. The editor has given us but few, if substantially any, of the explanatory and illustrative notes which are an essential part of an up-to-date edition of any ancient work, and particularly of such a work as the one under notice. He has not given us any index, either to the text or even to his own Introduction. He has not furnished any such general account of the scheme of the work and the arrangement of its contents, as would have been of use to anyone wishing to explore any particular part of it. He has not even taken the trouble to mark or arrange the text in such a way as to distinguish between the principal parts of it and those which are simply of the nature of examples. And his aim seems to have been simply to spend a short time on the compilation of the text, which is a brief one, and in the settlement of which only three manuscripts had to be consulted, and then to devote a long time to the elaboration of a treatise, published by way of an Introduction, which advertises him as anxious to try his hand at anything rather than the proper work of an editor. We can hardly attribute to him inability to understand the meaning of the work. Still, it must be remarked that in another essay, in composing which he ought to have been more than usually careful to be correct,⁵⁰ he has shewn himself unable to recognise the real import of a very simple Kanarese verse, which does not say that Śrutakīrti-Traividya composed a *Rāghavapāṇḍavīya* which was to be read both forwards and backwards and would give sense when read in either direction, but does say that he performed the feat of reciting both forwards and backwards an ordinary work of that name (composed by someone else). And thus it is, perhaps, in some similar failure that we may find the reason for which he has dealt in so misleading a manner with the question as to who was the author of the *Kavirājamārga*. But, whatever may be the explanation of that detail, his results are anything but

⁴⁹ On this matter see *Kavirājamārga*, Introd. pp. 18-20. — In connection with the question of the age of Daṇḍin, the editor (Introd. p. 20, and note 1) has cited the riddle *nāsikya-madhyā paritāḥ*, &c., given by Daṇḍin in his *Kāvyaḍḍarśa*, 3, 114; and, rejecting the solution Kāñchi and Chōḍarāja given by the commentator Vijaynanda, has adopted the solution Kāñchi and the kings whose name was Puṇḍraka which is given by the editor of the *Kāvyaḍḍarśa* (Bibliotheca Indica edition, p. 399). But he has not attempted to shew what connection, if any, the Puṇḍrakas ever had with Kāñchi.

By way of an answer to the riddle, an eight-letter word is required, to denote the kings of Kāñchi, if that is the city intended. And the nominative plural *Pallavaḥ* would answer the requirement better than the base *Puṇḍraka*, in addition to connecting with Kāñchi a line of kings who really did rule that city in the time to which Daṇḍin is sometimes referred, the 6th century A. D. But it may be remarked that, if the riddle is *bahirāptā*, and not *antarāptā*, — that is to say, if for the city we are not restricted to Kāñchi by the words *kāñchi-purī* in the verse, — then an equally good answer is *Veṅḡ* and *Chalukyaḥ*. No doubt, other answers also could be found with a little thought. And it would be possible that *nāsikya-madhyā* has a double meaning, and indicates secondarily some town in the Nāśik country.

⁵⁰ Namely, in his article published in the *Jour. Bo. Br. R. As. Soc.* Vol. XXI, pp. 1 to 3, to which he gave the solemn title "On the Jaina Poem *Rāghavapāṇḍavīya*: a Reply to Prof. Max Müller."

ereditable to him in this particular matter, or calculated to inspire confidence in him in other directions. He has misled us in respect of the identity of the author of the *Kavirajamārga*. And, whereas he has on several occasions taken the position of being competent to write with authority on questions of ancient Indian literature, in the settlement of which a great deal depends upon the extent to which authors have quoted one another, now, by his assertions of quotation of the *Kavirajamārga* in other works, and especially in connection with the three verses exhibited side by side on page 272 f. above, he has shewn that he is not able to distinguish between, on the one side, a case in which one author does really quote from another, with or without any slight alteration, and, on the other side, a case in which two authors obtain a passage, or the basis of a passage, independently from a third writer. In the last paragraph but one of his Introduction, the editor has somewhat naively indicated that there might be "a more satisfactory edition of the *Kavirajamārga*." Whatever else may be uncertain, there is no room for any doubt about that.

TATTOOING IN CENTRAL INDIA.

BY CAPTAIN C. E. LUARD, M.A.,

Superintendent of Ethnography in Central India.

(Continued from p. 249.)

7. Tattoo Marks from Maksūdangarh State.

(Collected by Babu Kedar Nath.)

1. A *Sitāphal* tree, Custard apple (*Anona squamosa*) — marked on the legs of a female.

2. Kitchen of Sītāji — marked on the fore-arm.

3. Sahālis (young girls) dancing together — marked on the leg.

4. Scorpions — marked on the wrist...

5. A sieve — on the back of the hand.

6. Barā (armlets) — on the arm ...

7. Chauk—on the leg

8. Peacocks—on the chest

9. Papibā (*Falco nesus*), a bird —
marked on the back of the hand below the
thumb.

10. Pīṛhī (a four-legged stool to sit
on) — on the fore-arm.

11. The lower part of the Aṛī (churn)
— on the fore-arm.

12. Deer — on the fore-arm... ..

13. Buṇḍī — on the right side of the
nose.

14. Buṇḍī — on each temple ...

15. Buṇḍī — on the chin

16. Suvā-kī-pāntī (row of parrots) — on the leg.

17. Mukat (crown) — on the arm.

18. Gujarī (milkmaid) — on the leg...

19. On the temples

20. Sālīyā — on the back of the hand.

21. Dillī Darwāzā — on the forearm.

8. Tattoo Marks on Mēlavi Women.

(Collected at Indore.)

On the right hand (contd.).*On the nose (left side).**On the back of hand.**On the right hand.**On the right arm.**On the left hand.*

N.B.—Designs were sent without any explanation, but it is easy to trace most of them from examples already given.

On the breast.

9. Tattoo Marks on Sūdra Women from the Dakhan.

(Collected at Indore.)

Forehead

MISCELLANEA.

A NOTE ON THE KURUKSHETRA.

THE famous battle-field of Kurukshetra, where the Kauravas and Pândavas fought for eighteen days, is situated on the south side of Thânesar, 39 miles south of Ambâla in the Panjâb, and an account of its antiquities will be found in Cunningham's *Archæological Survey Reports*, Vol. XIV. p. 86. The following note by L. Raghu-nath Das, Superintendent of Ethnography to the Jind State, relates to that part of the Kurukshetra which lies in that State and forms the southern border of the sacred territory, lying west of Pânipat and including Safidôn and Jind, the two ancient towns, which are the most important places in the south, as Thânesar and Pehôâ are in the north, of the Kurukshetra. The details of the various temples, shrines, and places of pilgrimage in this tract do not lend countenance to Cunningham's suspicion that both Kaithal and Jind have been included in the holy circuit in recent times to gratify the Sikh Râjâs of those places. The archæological remains of the southern Kurukshetra do not appear to have ever been examined by an expert, though the whole territory would probably repay systematic exploration.

H. A. ROSE.

July 20th, 1903.

(1) At Baraud in the Safidôn 'ilâqa, and 3½ miles to the north-east of the town of Safidôn, is a temple of Mahâdêva, which is said to date from the Satya-Yuga. It is visited by the people on the *śiva-râtris*, and as there are no *pujâris*, the villagers here perform worship themselves.

(2) At Safidôn itself there are three ancient *tirthas* and temples, supposed to have been built towards the close of the Dvâpara Yuga, namely, Nâgêśvara Mahâdêva, Nâga-damanî Dêvi (or Bhawan Dêvi) and Nâgakshetra. The legend goes that at the end of the Dvâpara Yuga Râjâ Parikshit was bitten by a serpent, Takshaka. To avenge him, his son Râjâ Janamêjaya established the images of Nâgêśvara Mahâdêva and Nâga-damanî Dêvi (the goddess who slaughters serpents) in the temples and invoked them. He then made a *havan védî*, or place of sacred fire, and held a holocaust of the snakes with their *śaktis* (powers).

(i) Nâgêśvara Mahâdêva. — This temple, which lies on a tank, contains an idol of Nâgêśvara Mahâdêva, and fairs are held here on the

13th and 14th of Sâwan and Phâgun in the dark half of the month. The worshipper here is believed to obtain Nâga-lôka.

(ii) The Bhawan Dêvî or Temple of the Goddess. — This temple contains an idol of Nâga-damanî Dêvi. Fairs are held on the 7th and 9th of Asauj and Chet *sudi*. The temple was rebuilt by Râjâ Raghbîr Singh of Jind in Samvat 1943.

(iii) The Nâgakshetra Tirtha. — The tank here was rebuilt by Râjâ Raghbîr Singh in the same year. The *tirtha* of Nâgakshetra is the place where the snakes were slaughtered and hence is called Sarpa-daman. Bathing in it is believed to set one free from the fear of Nâgas (snakes).

(iv) Bîrî-Krishna. — This temple was also erected by Râjâ Raghbîr Singh in the same year. Its fair is held on the 8th of Bhâdôn *badî*.

The administration of the above temples is in the hands of the State authorities, three Gaur Brâhman of the Kausika *gôtra* being nominated as *pujâris* and paid by the State.

(3) Mahâdêva. — There is also a temple of Mahâdêva at Pâjû Kalân in the Safidôn 'ilâqa, 3 miles north-west of Safidôn. It is on the Pârâsara tank, so called because Pârâsara Rishi performed penances here. It also dates from the Satya-Yuga, and its fairs are held on the 13th and 14th of Sâwan and Phâgun *badî*. People also bathe here on every Sunday in Sâwan. It is in charge of a Shâmi Bairâgi of the Râmânandî Order, who must remain celibate.

(4) The Singhi-Rikh Tank at Sanghânâ, 4 miles west of Safidôn, owes its name to Singhi-Rikh, the Rishi who worshipped there. Bathing in it on a *parab* or fête-day is meritorious.

(5) There is also a temple of Mahâdêva at Hât, 6 miles south-west of Safidôn in the same 'ilâqa on the Pancha Nada.¹ It has been in existence since the Satya-Yuga, and to bathe in its tank is equivalent in spiritual efficacy to performing 5 *yajnas*. There are fairs here on the same dates as at Pâjû Kalân, but no regular *pujâris* are appointed, though occasionally a Shâmi (Bairâgi), a Brahmachârî, a Gosâin or a Sâdhu may halt here in his wanderings. Two

¹ Pancha Nada, the place where 5 *tirthas* were connected with 5 channels by Hât Kaish Mahâdêva (Bâwan Purân).

miles from Hāt is the Aranbak Yaksha, one of the four *yakshas* or monsters, who guarded the four corners of the battle-field.

(6) The Sūraj Kund Tank at Kālwa, 9½ miles south-west of Safidōn in the same *ilāqa*, is believed to owe its origin to Sūraj Narain, and bathing in it at any time, but more specially on a Sunday, is held to avert the *sūraj-grah* or evil influence of the Sun-god.

The old temple of Sūraj Bhagavān at Sūraj Kund, the ruins of which are still to be found, having been demolished, a new temple of Kṛishṇa and Rādhikā was built by a Bairāgi of Brij, whose *chēlās* hold it in succession from him.

(7) At Jāmni, 12 miles west of Safidōn, are a temple and tank of Jamsadagni, father of Parāśurāma. People bathe in the tank on Sundays and the *pūrṇamāsī* or 15th of every month. The temple is in the charge of a Śhāmī of the Rāmānandī Order and has a *mudīt* of 80 *bighās* of land attached to it.

(8) At Āsan, which is at a distance of 14 miles in the south-west of Safidōn, is an ancient tank, called Aśvini-Kumāra after the god in whose honour a Rishi did penance there. The legend in the *Vāmāna Purāṇa* goes that an ugly Rishi, being laughed at in the assembly of the sages, did penance and invoked the god Aśvini-Kumāra, who appeared before him, and bestowed on him beauty, saying, "be beautiful after bathing in this tank." Hence bathing in it on Tuesday is believed to enhance one's beauty.

(9) At Barāh Kalān, which is 17 miles south-west of Safidōn, are the tank and temple of Barāhji Bhagwān, commemorating Viṣṇu's *varāha* or boar incarnation.

The fair is held on the 11th and 12th of Bhā-dōr *sudi*. Bathing in the tank and worshipping the god Barāh are believed to secure the highest place in heaven.

(ii) The Chandra-kūpa or Moon-well Tirtha, built in honour of the Moon (Sōmā Dēva), is an ancient cave in which water collects in the rainy season, and in this water the Moon is supposed to have bathed. His evil influence is averted by bathing here on the 11th and 12th of Bhā-dōn *sudi* or on a Monday.

(iii) The Sapta-Rishi Kund or Tank of the Seven Rishis. The legend in the *Tilak Gyan Granth* is that the seven Rishis, Ranbukā, &c., came here after visiting the *tirthas* or tanks of Kurukshētra, and made their *kufī* (resting-place) and *hawan-kund* here. After a time they went to Pindārak (Pindāra). It is of spiritual benefit to bathe in it on the days mentioned above or on any sacred day.

(iv) A Sūraj Kund, bathing in which is as meritorious as performing worship at an eclipse of the sun. The bathing day is Sunday.

(v) A Chandra Kund, to bathe in which is equal to worshipping at an eclipse of the moon. The bathing day is Monday.

(10) At Pindāra, which is 20 miles south-west of Safidōn, is another Sōma Tirtha, with a temple of Sōmēśvara Mahādēva, sacred to the moon and the planet Śukra (Venus). This tank is visited by many thousands of people, often from distant places, at a *sōmāvatī amāwas* or a Monday which falls on the day before a new moon, and a fair is also held on the 13th and 14th *badī* both in Phāgun and Sāwan.

At a *sōmāvatī amāwas* pilgrims offer *piṇḍas*, balls of rice-flour, for the benefit of deceased ancestors, which is as efficacious as a pilgrimage to Gayā. Alms offered on such an occasion are also equal in merit to the performance of a *Rājasūya Yajña*.

(11) The temple of Jayanti Dēvi or Goddess of Victory at Jind, which owes its name to this temple, and which is 22 miles south-west of Safidōn, was built by Yudhishtīra and his brothers, the Pāṇḍavas, before their fight with the Kauravas. A tank called the Sūraj Kund lies in front of the temple and is now filled with canal water. On the tank of Sōmanātha, in the town of Jind, are the temples of Mahādēva, called the Sōmēśvara Śivālaya and Mansā Dēvi. The tank derives its name from the Moon-god, Sōma, and by bathing in it one can reach the moon. On another tank, called the Jawālmāl Isvara, is another Śivālaya of Mahādēva bearing the same name as the tank. Bathing here is believed to free the soul from the door (bonds) of transmigration.

The Asankhya Tirtha is an ancient tank, so called because countless (*asankhya*) *rishis* are

said to have worshipped there. To bathe in it on a sacred day (*parab*) is equivalent to a pilgrimage to Badrī Nāth. Washing in the Afāni Dhārā Tīrtha, also an extremely ancient tank, cleanses from sin if performed on a Thursday.

In Samvat 1903 Rājā Sarūp Singh built the Rāj Rājēsvari or Lord of the State Temple at Jind. The fair is held on the 1st to the 9th of Chait and Asauj *sudi*.

(12) At Barāh-ban² is a temple to Grāhī Dēvi, who was a *yakshani*, of Grāhā Rishi. A fair is held on the 7th and 8th of Chait and Asauj *sudi*. It is believed to avert sins.

This village also contains a very old tank called the Kirt Sauch or place of hand-washing, so called because Narasimha, the lion incarnation of Vishnu, killed the *daitya* or demon Hiranyāksha at this spot and washed his hands and feet in it. It is beneficial to bathe in it on a *parab*, and to do so is equivalent to performing a *pundra yajna*.

Here, too, is an ancient tank called the Pun-punya, so called because Narasimha washed his hands in it a second time after killing Hiranyāksha. Bathing in it is as efficacious as bathing in the Kirt Sauch, while it also makes the bather more prudent.

(13) At Ikas, which is 25 miles off Safidōn in the south-west direction, is the Hamsa, or Swan tank, also called the Dhundū or 'seeking,' because here Kṛishṇa, after escaping from the Gōpts, concealed himself in the guise of a Swan (Hamsa is a symbol for soul), while they sought him in the same shape. It is customary to bathe in it on a Sunday in Sāwan, or on any *parab*. Bathing in it is believed to equal in merit a gift (*punyā*) of 1,000 cows.

(14) Rām Rai, which is at a distance of 28 miles in the south-west direction, is also a village of peculiar sanctity.

It contains:—

(i) A temple to Parāsurāma, adjoining which are the Rām Hrid,³ Sūraj Kund and San Hitha. The Rām Hrid or Temple of Parāsu Rāma marks

the spots where that hero destroyed the Kshatriyas. The legend in the *Mahābhārata* goes that Parāsurāma killed Sahaasra Bāhū (thousand-armed) with all his sons and *sena*, 'army,' and filled five Kunds with blood, bathed himself in them and offered *til-anjali* to his deceased father, Jamadagni, saying, 'It is the blood of those who killed you and took away your *kdamadhēnu* cow.' Then Parāsurāma took up his axe, and began slaughtering Kshatriyas, while the San Hitha is midway between it and Sūraj Kund.

People bathe in these tanks on the 15th *sudi* of Kārtik and Baisākh, after which they worship in the temple which contains images of Parāsurāma and his parents Jamadagni and Rambhā, feed Brāhmanas and give alms to the poor. Also at the eclipse of the sun they bathe in the San Hitha tank and at the eclipse of the moon in the Rām Hrid, by doing so they believe that they will reach Svarga (paradise).

(ii) The temple of Kapila Yaksha is in the south-west of Rām Rāi. The Yaksha was a door-keeper of the Kurukshētra. The temple is worshipped on the same days, and is in the charge of a Kanphatā Jōgi.

(iii) The temple of Anōkhālī Mākhālā Dēvi, who was the *yakshani* of Kapila Yaksha, is in the charge of a Gauṛ Brāhman. A fair is held on the same days.

(15) At Pōhkar Khēri, which is 29 miles south-west of Safidōn, in the south-west of the village is a tank of Pushkarjī, with a temple of Mahādēva. The name Pōhkar is from Pushkara, meaning 'great purifier.' It is related that Parāsurāma collected all the *śaktis* (powers) of gods and influences of all the Tīrthas.

Here Brahmā, Vishnu and Mahēśa worshipped, and there is a special worship of Mahādēva on the 13th and 14th *badi* of Phāgun and Sāwan, while bathing here on 15th *sudi* of Kārtik or Baisākh (each a *sūraj-parab*, or day sacred to the sun) is equivalent to performing an *atvamēdha* or horse-sacrifice.

² Barāh-ban is 24 miles south-west of Safidōn.

³ Rām Hrid is a place where Parāsurāma was pleased to the heart, Rām standing for Parāsurāma, and *hrid* meaning heart.

TATTOOING IN CENTRAL INDIA.

BY CAPTAIN C. E. LUARD, M.A.,

Superintendent of Ethnography in Central India.

(Concluded from p. 289.)

III.

THE JUNGLE SECTION.

1. Tattoo Marks from the Jobat State.

(Collected by Rai Bahadur Vamon Rao Bapuji of Jobat.)

A. — Female Marks.

(1) Worn on calves:—

कोर
Peacock

सुटिया
Stitches

आमख झाड़
Mango-tree

बावरी
Baori (well)

(2) Worn on the wrists:—

पपुआ
Papaya

हाथका बंजा
A claw

सीतामता की रोकनी
Sitā's kitchen

मौडा किरपर कोबेयस कासीके बक
The "Mauḍa"—a high hat worn by the bridegroom at a wedding.

चौक
"Chauk"

सिंगर
Singārā nuts?

सीतामता की रोकनी
Sitā's kitchen

चौक
"Chauk"

(3) Worn on the hands:—

पयसिवापुष्प
Flower of ayaḥyā tree
(Phyllanthus emblica)

सुटिया
Stitches

फूल
Flower

सीतामता की रोकनी
Sitā's granary

(4) Worn on the fingers:—

मकड़ी

मकड़ी

मकड़ी

(5) Worn on the thumbs:—

गोंय
Gōy

(6) Worn on the chin:—

धाने
Grain

धाने
Grain

Women's Marks - (contd.)

(7) Worn on the cheeks:-

(8) Worn at the corners of the eyes:-

(9) Worn between the eyebrows:-

(10) Worn on the toes:-

B. Male Marks.

(1) Worn on the wrists:-

(3) Worn on the fingers:-

(4) Worn on the arms:-

(2) Worn on the hands:-

(5) Worn on the chest:-

जबजो आदमी का नाम
Man's name.

(6) Worn on the corners of the eyes:-

2. Tattoo Marks from Barwānī State.

(Collected by Mr. K. M. Phatak of Barwani.)

(a) Khandesh Bhils.

(Plate VII.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|--------------------|-------------------|-----------------|-------------------|----------|
|  | Khāndēsh Bhils ... | On shoulder ... | Male ... | Chauk, चौक ... | Square. |
|  | Do. ... | Do. ... | Do. ... | Isī, इसी ... | |

(b) Māli Bhils.

(Plate VIII.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|---------------|-------------------|-----------------|---------------------|----------|
|  | Māli Bhil ... | On the shoulder.. | Male ... | Katīyār, कटियार ... | Dagger. |
|  | Do. ... | Near the eye .. | Do. .. | Trisūl, त्रिशूल ... | Trident. |
|  | Do. ... | On cheek ... | Do. ... | Kallā, कल्ला ... | Bangle. |
|  | Do. ... | On forehead ... | Do. ... | Kamāp, कमाण ... | Bow. |

(c) Charans.

(Plate LX.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|------------|-------------------|-----------------|---------------------|----------|
|  | Charan ... | On forehead ... | Male ... | Mālā, माला... .. | Rosary. |
|  | Do. ... | On wrist ... | Do. .. | Katīyār, कटियार ... | Dagger. |
|  | Do. ... | On forehead .. | Do. ... | Hār, हार | Wreath. |

(d) Ningwāls.

(Plate X.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|---------|--------------------------|-----------------|-----------------------|-----------------|
|  | Ningwāl | On forehead or arms. | Male | Ām kā Jhād, आमका झाड़ | Mango-tree. |
|  | Do. | Between wrist and elbow. | Do. | Dānk, दांक... | A sort of drum. |
|  | Do. | Do. | Do. | Kūwā, कुवा... | Well. |

(e) Soliā Bhīls.

(Plate XI.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|------------|-------------------|-----------------|-------------------|---|
|  | Soliā Bhīl | On forehead | Male | Hār, हार | Garland. |
|  | Do. | Near the eye | Do. | Kamāṅ, कामांग | Bow. |
|  | Do. | On the chest | Do. | Ghōḍā, घोड़ा | Horse. |
|  | Do. | Near the eye | Do. | Khaṭā, खटा | A mark placed for beautifying the face. |

(f) Bhilālās.

(Plate XII.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|---------|---|-----------------|-----------------------|-------------|
|  | Bhilālā | On forehead or between wrist and elbow. | Female | Ām ka Jhād, आमका झाड़ | Mango-tree. |
|  | Do. | Near the eye | Do. | Chirliyā, चिरलिया | Feathers. |
|  | Do. | On the chin or on the chest. | Do. | Phūl, फूल | Flower. |
|  | Do. | On any part of the body and by any caste. | Do. | Ṭipkā, टिपका | Spots. |

(f) Bhilālās—(contd.).

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|---------|---|-----------------|-------------------|---------------------------------|
|  | Bhilālā | On the front portion of the leg near the ankle. | Female | Kaṭār, कटार | Dagger. |
|  | Do. | Do. | Do. | Maud, मौड़ | Coronet worn by the bridegroom. |

(g) Kachis.

(Plates XIII. and XIV.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|--------|--|-----------------|--------------------------------|--------------------|
|  | Kāchi | On either side of the portion between elbow and wrist. | Female | Sitā kī Rāṇḍī, सीताकी रान्दनी. | Boiler of Sitā. |
|  | Do. | Do. | Do. | Sitā kā hāth, सीताका हाथ. | Sitā's hand. |
|  | Do. | Do. | Do. | Rām and Lachhman, राम व लछमन. | Rāma and Lachhman. |
|  | Do. | On thumb | Do. | Bichchū, बिच्छू | Scorpion. |
|  | Do. | On fingers | Do. | Java, जव | Barley. |
|  | Do. | On the back of the leg. | Do. | Am kā Jhād, आमका झाड़. | Mango-tree. |

(h) Taḍvī Bhilālās.

(Plate XV.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|--------|--------------------------|-----------------|-------------------|-----------|
|  | Taḍvī | Near the eye | Female | Chirliya, चिरलिया | Feathers. |
|  | Do. | Between wrist and elbow. | Do. | Katīyār, कटियार | Dagger. |

(h) Taḍvī Bhilālās—(contd.).

| Signs. | Caste. | Part of the body | Male or female. | Name of the sign. | Meaning. |
|---|-----------|----------------------------|-----------------|--------------------------------|--|
|  | Taḍvī ... | Between wrist and elbow. | Female ... | Chōūmal, चोमळ ... | A cloth wound round the head for carrying weights. |
|  | Do. ... | Near the eye ... | Do. ... | Chirliyā, चिरलिया ... | Feathers. |
|  | Do. ... | Between wrist and elbow. | Do. ... | Chauk Bakhiyādār, चौकबखियादार. | Square in the form of stitches. |
|  | Do. ... | Do. ... | Do. ... | Chauk, चौक ... | Square. |
|  | Do. ... | On the leg near the ankle. | Do. ... | Mauḍ, मौड ... | A coronet for the bridegroom. |
|  | Do. ... | Near the eye ... | Do. ... | Chirliyā, चिरलिया ... | Feathers. |
|  | Do. ... | On the back of the palm. | Do. ... | Chauk, चौक ... | Square. |
|  | Do. ... | Near the eye ... | Do. ... | Chirliyā, चिरलिया ... | Feathers. |
|  | Do. ... | Between wrist and elbow. | Do. ... | Bakhiyā, बखिया ... | Stitch. |
|  | Do. ... | Do. ... | Do. ... | Chauk, चौक ... | Square. |
|  | Do. ... | On the back of the leg. | Do. ... | Chauk, चौक ... | Do. |
|  | Do. ... | Between wrist and elbow. | Do. ... | Chōūmal, चोमळ ... | A cloth wound round the head for carrying weights. |
|  | Do. ... | On forehead ... | Do. ... | Jhād, झाड ... | Tree. |

(i) Chohān Bhils.

(Plate XVI.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|-----------------|----------------------|-----------------|----------------------|--|
|  | Chohān Bhil ... | On arms or chest ... | Male ... | Ādmi, आदमी | Man. |
|  | Do. ... | On forehead ... | Do. ... | Āmkā Jhād, आमका झाड़ | Mango-tree. |
|  | Do. ... | Near the eye ... | Do. ... | Khatā, खता | A line or mark for beautifying the face. |

(j) Meghwāls.

(Plates XVII., XVIII., and XIX.)

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|-------------|--|-----------------|--------------------------|---------------------|
|  | Meghwāl ... | On the back of hand between wrist and elbow. | Female ... | Kaṭārī, कटारी | Dagger. |
|  | Do. ... | Do. ... | Do. ... | Dānā, दाना | Beads. |
|  | Do. ... | On wrist or elbow ... | Do. ... | Mahadō or Mōdūdū, मोड़डू | A seat for Mahādev. |
|  | Do. ... | Between wrist and elbow. | Do. ... | Mōdūdū, मोड़डू | Do. |
|  | Do. ... | Do. ... | Do. ... | Mōḍ, मोड़ | Wheel. |
|  | Do. ... | Do. ... | Do. ... | Mākhi, माखी | Fly. |
|  | Do. ... | Do. ... | Do. ... | Phūl, फूल | Flower. |

(j) Meghwāls—(contd.).

| Signs. | Caste. | Part of the body. | Male or female. | Name of the sign. | Meaning. |
|---|---------|--|-----------------|-------------------|--|
|  | Meghwāl | On the back of the palm. | Female | Chonbal, चौबल | A cloth wound round the head for lifting weights. |
|  | Do. | On the back of the thumb. | Do. | Bakhiyā, बखिया | Stitch. |
|  | Do. | Do. | Do. | Chonbal, चौबल | A cloth wound round the head for carrying weights. |
|  | Do. | On forehead | Do. | Hār, हार | Garland. |
|  | Do. | On the back of the foot, near the ankle. | Do. | Bāvdī, बावडी | Well. |
|  | Do. | On elbow; neck; between wrist and elbow; on back of hand; or near the ankle. | Do. | Mānas, मानस | Man. |
|  | Do. | On elbow | Do. | Wēpā, वेपा | Water-stand. |
|  | Do. | On wrist | Do. | Kāṭhrut, काथरुट | Flower of Lotus. |
|  | Do. | On fingers of hands or elbows. | Do. | Mākhi, माखी | Fly. |
|  | Do. | Between wrist and elbow; on back of the hand. | Do. | Dēvdī, देवडी | An ornament for the head. |
|  | Do. | On wrist | Do. | Sākal, साकल | Chain. |
|  | Do. | Near the ankle | Do. | Lādvā, लादुवा | Cross. |

HOW THE TEMPORAL POWER OF THE DALAI LAMA WAS FOUNDED.

BY L. DE MILLOUÉ.

Translation of a Lecture at the Musée Guimet, 21st January 1900.¹

It need neither startle us, nor is it an exaggeration to state, that everywhere and always, the priesthood has been led to lay its hand on the temporal power and to subordinate the lay-government to the religion. The most important exception to this assertion is that of Greece, where it has never since historic times played or attempted to play what seems a leading part. But of all the countries of the world, the one where sacerdotal power is most deeply and firmly established is Tibet. No other place in the world could be so favorable to a theocracy, given the profound ignorance of the people, their misery, their eminently religious character, and their inveterate leaning to superstition.

Since its introduction into this country in 630 of our era, under the reign of Sroñ-btsan-sGam-po, to the middle of the 17th century, the existence of the Buddhist clergy has been simply a continued

¹ From *Conférences au Musée Guimet*, 1899—1901, par L. de Milloué, Paris, 1903, pp. 71-88. — J. B.

struggle for supremacy, a struggle from which it arose conqueror, instituting an absolutely theocratic government, which offers curious resemblances to the principles and organisation of the old Roman pontifical government. I am about to try to sketch the various phases of this struggle which are as instructive as they are interesting.

But first, it is necessary to say a word on the Tibetan monk — the Lama, his character, and where it differs from other Buddhist monks.

Buddhism, when it penetrated into Tibet, was very different from the philosophic sect, with atheistic tendencies, without gods, without cult or rites, formerly founded by Buddha Sākyamuni. Not only had it become an actual religion, in consequence of the deification of its master, and of the cult instituted in his honour and the adoration of his relics; not only had it been penetrated by mysticism and blind devotion to the *Yoga* and the *Vedānta*; not only had it invented the eternal Buddha — essence and being of all things — the Adi-Buddha conceived on the model of the Brāhman Svayambhū, the crowd of Buddhas past, present, and future, as well as the Bodhisattvas "of three thousand thousands of worlds," but it had also received into its bosom all the male and female divinities of Brahmanism, especially of the Saiva sect, and, under the unfortunate influence of the Tantric doctrines, had given a predominant place to divination, astrology, sorcery, and magic. Thus exploiting the superstitious ignorance of the Tibetans, and their terror for demons, by which they believed themselves to be surrounded, it was as exorcists and expert magicians, rather than as apostles of a pure morale, that the first fathers of Buddhism are represented, and it was by sorcery rather than the preaching of the Good Law that they conquered and dispossessed their rivals, the Shamans of the indigenous religion or Bonpa, of the confidence of the people.

Lama (in Tibetan *bLa-ma*, "superior") is a title equivalent to the Sanskrit term Gura or Āchārya, which ought to be regularly applied only to a religious person renowned for his knowledge and his sanctity, but which is frequently given by courtesy and respect to all the members of the Tibetan and Mongol clergy (the real titles of the different classes being: *lama*, "superior"; *dGé-slon*, "ordained priest"; *dGé-thsul*, "deacon"; and *dGé-bsnyen*, "novice") as with us that of abbot.

The Lama then, to give him the title by which he is habitually known, differs from the *Bhikshu* or Indian devotee, in that he is not simply a contemplative monk, but really a priest, invested as he is by ordination obtained, after a long novitiate and serious studies, which confers upon him special powers, notably that of taking part at ceremonies of the cult, at the initiation and ordination of new monks.

But the Lama is not only a priest. In the midst of this ignorant people who surround him with a superstitious veneration and fear, he is the universal man, the *savant par excellence*: he is educator, teacher, (the monasteries are the only schools,) doctor, literary man, astrologer, sorcerer, architect, sculptor, painter, printer, and even merchant. He is not, indeed, compelled, like the *Bhikshu*, to take the vow of poverty, but may possess a personal fortune and can increase it by all possible means, even by usury.

The Lamas are divided into two classes: the orthodox ones or *dGe-lugs-pas*, also called yellow Lamas from the colour of their costume, and the *rNyg-ma-pas* or red Lamas; these again are subdivided into several sects, of which many permit marriage among their adherents. They are extremely numerous in consequence of the custom of dedicating at least one son from each family to the religious life, a custom which is explained by the fact that the Lamas hold all functions — in fact, if not by right. It has been said that, by themselves, they constitute a seventh or eighth part of the entire population of Tibet.

For the most part they live in monasteries, vast conglomerations of houses surrounded by walls, some of which accommodate several thousand monks; veritable universities, where the people come from all parts of the country to study the religious sciences under renowned masters. These

monasteries, enriched by royal donations, and by the pious gifts of the lay-population, possess large tracts of rich land, managed by their steward or treasurer, which they increase, not only by trading with the produce of their lands, but also by devoting themselves to all kinds of commerce; almost all the export, import, and transport trade is thus in the hands of the Lamas.

It is easy to understand what importance such wealth gives to the superiors or abbots of the great monasteries, even from a political point of view. Thus the ecclesiastical history of Tibet is entirely filled with tales of rivalries and struggles, sometimes sanguinary, between the abbots of the more important monasteries, especially when they belong to different sects. But although they are jealous of one another, they are wise enough to cease tearing one another to pieces in order to seize any scrap of power from the civil authority and afterwards to divide the booty.

Toward the commencement of the 13th century, the leading position was held by the sect named Sa-skyapa, from the name of its principal monastery. A monk of this sect, surnamed 'Phags-pa, sent as a missionary to Mongolia, finding himself by chance on the route of the illustrious Khubilai Khan, when he was about to invade China, prophesied that he would gain the victory and the empire. Becoming master of the Chinese empire, and emperor, Khubilai remembered the monk and his prediction and called him to his court (Tārānātha, the official historian of Tibetan Buddhism, says that, 'Phags-pa, being dead, it was his nephew and successor Lo-dai Gyaltsan, who came to the court of Khubilai). It is from this epoch that the expansion of Lamaism in China dates. But the emperor's recognition was not limited to empty honours. By decree he conferred on 'Phags-pa and his successors, as superiors of the Sa-skyapa sect, the religious and political sovereignty of Tibet, but without suppressing the king of that country, who continued to govern it under the authority, more nominal than real, of the Sa-skyapa priests.

Besides a doubtful recognition, political causes may be assigned to the act of Khubilai: on the one hand, the desire to flatter his Mongol subjects, for the most part Lamaists; on the other, the hope of putting an end to the continual incursions of the Tibetans into Chinese territory. In fact, from this moment dates Chinese influence in Tibet.

The successors of Khubilai continued his policy with regard to Tibet and Lamaism, but do not appear to have attained the desired end, for, under their rule, the incursions of the Tibetans were more frequent and more audacious than ever, to say nothing of the difficulties stirred up by the tyranny of the Sa-skyapa sect, over their rivals, and notably the burning of the Kargyutpa monastery of Dikung in 1320. Thus the dynasty of the Mings (1368—1616), which succeeded them, changed its policy with regard to Tibet. It set itself to diminish the power of the Sa-skyapa sect, which was much too great, by giving to the abbots of the monasteries of Dikung (of the Kargyutpa sect) and of Ts'al (of the Khadampa sect), a rank and authority equal to those of the Grand Lama of Sa-skyapa by cleverly exciting their rivalry, by covering with honours and by granting pensions to the chief men of the country in order to bind them to themselves.

About this time, in 1355 at Khum-bum, in the district of Am-do, was born the celebrated 6Tson-kha-pa, who, indignant at the vice and corruption of the monks of his time, at the superstitious practices, and the rites of sorcery, which degraded Lamaism, undertook to re-call it to the purity of primitive Buddhism, promptly gathered together, under the name of the dGe-lugs-pa sect, a number of disciples, to whom, in order to distinguish them, he gave a yellow costume (the other Lamas were dressed in red) and founded in 1409 the monastery of dGa-ldan, of which he remained superior until his death in 1417.

It is commonly, though erroneously, said, that 6Tson-kha-pa was the first Dalai Lama. He never had any title but that of dGa-ldan, as also had his successor dGe-dun-grub. This title and dignity only appeared during the pontificate of Ngag-dbañ 6Lo-bzañ the fourth successor of the latter (1617—1680).

Profoundly ambitious, a clever politician, marvellously advised by his old teacher the abbot of Tashi-lhunpo, *Ō Nag-dbañ Ō Lo-bzañ* knew how to exploit with acuteness the growing power of the *dGe-lugs-pa*, and the popularity of *Ō Tsoñ-kha-pa* was kept alive in all classes of society. Taking vigorously in hand the interests of his sect, which he identified with those of religion, he did not hesitate to enter into open conflict with the king of Tibet, and, under pretext of the safety of religion, menaced in its purity by the tyranny of this king, the protector of the red Lamas, he asked assistance from Guchi-Khūn, prince of the Koshot Mongols, who, after having vanquished and deposed the king, made a present of Tibet to the astute *Ō Nag-dbañ Ō Lo-bzañ*.

The latter then assumed the dignity of *rGyal-ba Rin-po-che*, "Precious Majesty," and the Mongol title *Salai*, "Ocean (of Grandeur)," in Tibetan *ṛḡya-mtsho*, which Europeans have transformed into "Dalai-Lama," titles which, in order to create for himself a sort of genealogy, he extended to *dGe-'dun-grub*, who thus became the first Dalai Lama, and at the same time he gave his counsellor, the abbot of Tashi-lhunpo, the first place after himself in the ecclesiastical hierarchy, with the title of *Pañ-chhen Rin-po-ché*, and handed over to him in appanage the vassal sovereignty of the province of Tsang.

Thus it is believed that *Ō Nag-dbañ Ō Lo-bzañ* was the inventor of the fiction of the perpetual incarnation of the *Dhyāni-Bodhisattva Chanrési* (*Avalokiteśvara*) in the person of the Dalai Lamas and that of the *Dhyāni Buddha 'Od-dpag-med* (*Amitābha*) in the *Pañ-chhen Rin-po-ché*s, thus giving to these great persons a sort of divine relationship, an example which was immediately followed by all the superiors of the larger monasteries except that of *dGa-ldan*, who called themselves perpetual incarnations of the *Bodhisattva Mañjuśrī*, the god or saint, patron of their sect or of their convent.

The theory of incarnation was not in itself a novelty. From time immemorial it has been said in India, perhaps simply as a manner of speech, that illustrious men, especially in the religious order, were incarnations of such or such a god or saint, personifying the chief qualities by which they were known (a metaphor borrowed, doubtless, from the *avatāra* of *Vishṇu*), and in Tibet even the king *Sroñ-btsan-sgam-po*, who introduced Buddhism into that country, was considered as an incarnation of *Chanrési* and his minister *Thu-mi Sambhoṭa* passed as an *avatār* of *'Jam-dpal* (*Mañjuśrī*), the patron *Bodhisattva* of Science. What is new is the ingenious idea of the perpetuity of incarnation. It may surprise us that *Ō Nag-dbañ Ō Lo-bzañ* made himself the incarnation of a simple *Bodhisattva*, while he attributed to his counsellor that of an eternal Buddha. But it must not be forgotten that *Chanrési* is the usual patron of Tibet; the clever Dalai Lama thus benefited by the popularity of this divine person and at the same time created for himself a divine relationship with the first sovereign of the country, which justified his pretensions to royal power. On the other hand, if we remember, that all the sacred books of India call the counsellor the "spiritual father" of his disciples, it becomes quite natural that *Ō Nag-dbañ Ō Lo-bzañ* should make his instructor the incarnation of *'Od-dpag-med* the spiritual father of *Chanrési*.

In consequence of the doctrine of perpetual incarnation, the Dalai Lamas, the *Pañ-chhen Rin-po-ché*s and the other incarnated Lamas never die. When the body of a Dalai Lama is worn out by sickness or old age, the god, whose spirit animates it, quits the body to seek for another in better health; in other words, becomes incarnate in the course of from one to four years in some young infant, who, by miracles, reveals his divine nature and thus manifests himself. As soon as informed of the re-incarnation of *Chanrési*, the sacred college of the *mKhan-pos* send a commission to the dwelling of the parents of the infant, charged to subject him to a series of trials, such as, for example, to recognise, from among other similar objects, those made use of by preference by the former Dalai Lama, and if he comes successfully out of it he is carried in great pomp to the pontifical palace, where he receives an education befitting the high rank which he is to occupy. Matters take place naturally in the same way in the case of *Pañ-chhen Rin-po-ché* or of any other incarnated Lama or living Buddha.

But to return to Nag-dbañ bLo-bzan. The gift, which Guchi-Khân had made to him of Tibet conquered by his arms, constituted merely a possession in fact, not by absolute right, and he might with reason fear, that he would be dispossessed of it, either by a revolt stirred up by the dethroned king, or by an intervention of his powerful neighbour, the Chinese empire. Thus he hastened, at the risk of compromising the independence of Tibet, to send an ambassador to the emperor Sâi-tsung Oen-Hoang, to recognise him as spiritual and temporal sovereign of Tibet, as a tributary title, and on the condition that henceforth the election of the Dalai Lamas should be confirmed by the court of Peking. On his side Guchi-Khân received the title of viceroy, with charge of the political administration of the kingdom (1642). Some years later, in 1662, this official acknowledgment was confirmed anew by the emperor Khang-hi, after the suppression of several revolts, which necessitated the intervention of the Chinese armies.

Nag-dbañ bLo-bzan died in 1680. His death was kept secret for 16 years by the viceroy of the time, who used this interregnum in order to attempt to seize the sovereign authority. But this becoming known, provoked the intervention of the Mongol chief Lhazang-Khân, who proceeded to elect the sixth Dalai Lama, soon deposed however, in consequence of indignity and irregularities in his election, following close upon the revolt, raised under pretext of restoring religion, by a chief of a tribe named Tsé-Oang Arabdan. These disorders provoked another interference on the part of the emperor Khang-hi, who proceeded, with the help of his army, to the proclamation and definite enthronement of the sixth Dalai Lama — bLo-bzañ sKal-ldan (1705—1758).

In 1750 a new revolt against the authority of the Dalai Lama, incited by the viceroy Gyrmed Namgyal, rendered the intervention of the emperor Kien-lung necessary, upon which the title and function of viceroy was suppressed, and the country entirely submitted to the absolute authority of the Dalai Lama, 1751, the Chinese Government always reserving to itself the right of supervision and the direction of foreign relations entrusted to two Chinese functionaries invested, as a mark of honour, with the title of ambassador.

From this time the spiritual and temporal authority of the Dalai Lamas² is no longer disputed and, except for small revolts of no consequence, they exercise in peace their double sovereignty under the protectorate of China; but for this tranquillity they paid the price of their independence. Little by little the Chinese Government has mixed more in the affairs of Tibet and has exercised an influence more and more marked on the elections of the Dalai Lamas and the Pañ-chen Rin-po-chês who are no longer chosen only in unimportant, local and pious families in China. Under colour of showing his profound respect for them, the emperor grants them an annual sum, and they end by being merely docile instrument in the hands of China, of the functionaries of the Empire.

It is unnecessary to call attention to the striking resemblances existing between the two institutions of the Catholic Papacy and the pontificate of the Dalai Lamas. Like the Pope the Dalai Lama is a religious leader, whose decisions and orders, from a dogmatic and moral point of view, ought to be blindly accepted without discussion. He is infallible in virtue of the infallibility of the divine spirit, of whom he is the representative, the incarnation on earth. Like the Pope's, his jurisdiction extends to the boundaries of his kingdom, in Ladak, Nepâl, Bhutan, Sikkim, China (in Peking alone there are thirteen Lama monasteries), Mongolia, Siberia among the Buriats, even in Russia among the hordes of Kirghises, — and he claims the universal imposition of it. He is invested with temporal power, as also was the Pope for long; and finally, another curious resemblance, — it was

² The Dalai Lamas in succession to bLo-bzañ sKal-ldan (1705—1758) were (Grünwedel, *Mythol. des Buddhismus in Tibet*, S. 206) as follows:—

bLo-bzañ 'Jam-dpal (1759—1805);
 bLo-bzañ Lun-rtogs (1806—1815);
 bLo-bzañ Tshul-khrims (1817—1837);
 bLo-bzañ dGe-dmu (1838—1855);
 bLo-bzañ Phrin-las (1856—1874);
 Nag-dbañ bLo-bzañ Thub-ldan, 1875. — J. B.

a conqueror, Charlemagne, who founded the temporal power of the Papacy; it was two conquerors, Khubilai-Khan, and, later Guchi-Khân, who gave temporal power to the Dalai Lama.

It remains to say a word on the actual situation of the Lamaist pontificate, the existence of which now appears to be threatened. In Tibet and Mongolia persistent rumours are circulated of the approaching cessation of the re-incarnations of the Dalai Lama, and of the next re-incarnation of the Pan-chen, which, contrary to the invariable custom, is to take place in Mongolia³. Are these rumours the echo of dissent among the Dalai Lamas and the Pan-chen Rin-po-chê? Have they not, as a starting point, the ambition of the latter, to take the place of the Dalai? Are they propagated by the Tibetan party, hostile to China, or perhaps by the Chinese Government, in quest of an excuse for interfering further in Tibetan affairs?

For my part, I incline to the latter theory, for it seems that the government of the Dalai Lama inclines to Europeans, to the detriment of China. I see in it the index to the repeated assertions, of high Tibetan functionaries, to our travellers, of their willingness to open wide the frontiers of the country to strangers, a willingness thwarted, they say, by the checking policy of China, and still less heard of, by the official envoy at St. Petersburg of a very high functionary of the court of Lhasa, the former counsellor of the present Dalai Lama, the Lharamba Tsanit Khanpo-Lama Aguan Dorji, sent to make a pastoral tour among the Buriats of Siberia and the Kirghis of Southern Russia. This emissary took advantage of his mission to make a tour in Europe for his personal information, and, no doubt, to be able on return to render an account to his Government of his impressions and observations; you might have seen him in Paris, and even in the Musée Guimet, where he took part in a function in the library on 26th June 1899.

And in this connection, permit me to say, in conclusion, that, perhaps the Musée Guimet was not strange to him in coming to Paris, as M. Aguan Dorji told me, that his curiosity was awakened by reading at Lhasa the reports of the Japanese priests who took part at two Buddhist ceremonies at the Museum in 1891 and 1893.

SOME ANGLO-INDIAN TERMS FROM A XVIITH CENTURY MS.

BY SIR RICHARD C. TEMPLE, BART.

(Concluded from p. 258.)

RAJA.

Fol. 25. where y^e Countrey is Governed by y^e Gentue Naiques or Radja's as some terme themselves w^{ch} signifieth Vice Kinge.

Fol. 50. but many of y^e Gentues and Braohmans hold lands there [in y^e Golcondah Kingdoms] and call themselves Radjas.

Fol. 59. Orixa: This Kingdome . . . Subject to y^e Great Mogoll for y^e most part but not altogether by reason of Severall Radjas.

Fol. 65. y^e Kingdoms wholly Submittinge to him [Emir Jemla] Save y^e Radjas of Orixa.

Fol. 131. he hath a Governour here [Janselone] whom y^e Natives Entitle Radja (Vis?) Kinge, as indeed he is a Vice Kinge to the great Kinge of Syam.

³ For an account of these spiritual guides, see *Jour. As. Soc. Beng.* Vol. LI. pp. 19 ff., where portraits are given of them. From the 18th century the list is as follows:—

Sa-skya Panqita, born in 1182.

gYun-ston rDo-rje dpal, b. 1284, d. 1376.

mKhas-grub dGe-legs dpal bzan, b. 1385, d. 1439.

bSod-nams phyogs glan, 1439—1506.

rGyal-ba dBen-sa-ba bLo-bzan-don-grub, 1505—1570.

Pan-chen bLo-bzan oh-ho-kyi rgyal-mtshan, 1569—1662.

Pan-chen bLo-bzan ye-she dpal-bzan-po, 1662—1737.

Pan-chen bLo-bzan dpal-ldan ye-she, 1737—1779.

rJe bTan Pa'i nyi-ma, 1781—1854.

rJe dPal-ldan oh-ho-kyi-grags-pa bTan-pai, 1854—1882.

dGe-legs rNam-rgyal, 1883. — J. B.

Fol. 138. Vnder y^e **Radja** of Janselone's protection.

Fol. 139. yet not Sooner then y^e **Radja** and counceel of Ianselone to y^e **Radja** and all Officers whatsoever upon y^e Jsland of Ianselone.

Fol. 140. the Kinge of Syam Sent a New **Radja** (a Mogol bred and borne) by name Mahomed Beake : and his Brother Jshmael: Beake to be his Secound [to Janselone].

Fol. 159. There are Severall **Radjas** Vpon Sumatra, that doe take Vpon them y^e absolute Title and assume the absolute Government of Kings.

Fol. 161. The Men in Office y^t (Vnder theire Queene) governe this Kingdome [Achin] are Entitled as followeth: **The Meer Raja** : viz^t y^e Lord Treasurer.

See Yule, *s. v.* Raja, whose quotations, however, are poor. [The above are valuable as showing that in the 17th Century the true position of a Raja was understood by the merchants and traders of the time: a point that is missed by Yule.]

RAJMAHAL.

Fol. 65. Hee makes Dacca y^e Metropolitan beinge a fairer and Stronger Citty then **Radja Mehal** the antient Metropolis.

Fol. 68. Many of the Grandees of these 3 Kingdomes mett their Prince at Pattana and the rest at **Radja Mehal** he left Dacca before y^e Prince came from **Radja Mehal**.

Fol. 73. y^e English Nation, whose Chiefe here by name M^r Matt: Vincent went up to **Radja Mehal** before he [the Nabob] arrived at Dacca.

Not in Yule. [Once a place of great importance in Bengal.]

RAJPOOT.

Fol. 13. his retinue were as followeth 500 **Rashboot** Soldiers.

Fol. 41. his Retinue of Attendants and Menial Servants are in great number
. . . **Resbutes**.

Fol. 41. **Resbutes** are of another Cast, they are accepted a most Valiant people that live by y^e Sword but these are but Scarecrows to y^e poore ignorant natives, for I have Seen them take themselves to their heels, and make a Runnings fight, when a Small number of frenchmen not Exceedinge one dozen, drove above 200 of them before them.

Fol. 54. Severall **Resbutes** and Others danceinge Round him with great drawne Swords after y^e manner of fenceinge.

See Yule, *s. v.* Rajpoot. [The above quotations are valuable as showing that by "Rajpūt" the old British trader meant the squalid "military" retinue of the petty chiefs and dignitaries he came across in his work.]

RAMBOTANG.

Fol. 175. This Countrey (Achin) affordeth Severall Excellent good fruites Namely
. . . **Ramastines**.

See Yule, *s. v.* Rambotang.

RAMDAM.

Fol. 45. it beginneth on y^e New Moone in y^e Month of October and continneth y^e whole Moone, they doe call it y^e **Ramasan**.

See Yule, *s. v.* Randam. [Anglo-Indians, however, usually call it **Ramān**, as the author did no doubt. *N. and E.* for 27th September 1680, p. 35, has: — "Intimation is also given of the King's intention to take his progress into these parts after their **Ramasan** moone is over."]

RATTAN.

Fol. 38. Onely his leggs Seized a foot asunder wth **Rattans**.

Fol. 137. Most of theire houses both here [Janselone] and all this Coast over all [are] wholly built wth them [bamboos] and **Rattans** to Seize y^e pieces together.

Fol. 150. Their buildings in this Generall are but of a very meane Sort built of bamboos and rattans, and Stand for y^e most part Vpon Stilts of wood.

Fol. 158. from y^e West Coast of this Jsland [Sumatra] Rattans.

Fol. 172. the Executioners frapp the sticks togeather wth Splitt rattans.

See Yule, s. v. Rattan.

RINGO ROOT.

Fol. 82. They [Portugals] make many Sorts of Sweetmeats vizt Ringo Roots.

Not in Yule. [A very obscure form : probably means some form of ginger.]

ROOMAULS.

Fol. 61. This Kingdome [Bengala] most plentifully doth abound with Rammals.

See Yule, s. v. Roomauls, kerchiefs. [N. and E. has for 19th June, 1680, p. 24 : "Cotton Romalls."]

ROUNDEL.

Fol. 41. his Retinue of Attendants and Menial Servants are in great number, he keeps . . . Roundels.

Fol. 42. Roundels: Are in these Warne Climats very Necesarie, to keep y^e O from Scorchinge a man, they may alsoe and are Serviceable to keep y^e raine off, most men of accompt maintaine one 2: or 3 roundelliers, whose office is onely to attend theire Masters Motion, they are Very light but of Exceedinge Stiffnesse, beinge for y^e most part made of Rhinocerots hide, very decently painted and Guilded, with what flowrs they best admire, on y^e inside exactly in y^e midst thereof is fixed a Smooth handle (made of wood) by w^{ch} y^e Roundeliere doth carry it, holdinge it up with one hand a foot or more above his Master's head directinge y^e Centre thereof as Opposite to y^e O as possibly he may . . . any man whatever, that will goe to y^e Charge of it w^{ch} is noe great Matter may have one or more Catysola to attend him, but not a Roundell: Vnlesse he be a Governour or One of y^e Councell: The Same Custome y^e English hold good amongst their own people whereby they may be distinguished by y^e Natives.

See Yule, s. v. Roundel. [A state umbrella, and a constant source of bickering in the old Anglo-Indian days. N. and E., p. 15, for 5th April 1680, has a valuable quotation here : — "To Verona's adopted son was given the name of Muddoo Verona and a Rundell to be carried over him in respect to the Memory of Verona."]

RUPEES.

Fol. 53. ffort S^t Georg's . . . Rupees are worth 0016 02s 03½d . . . The Syam Ticull Values one rupee ¼ or 00 03 07.

Fol. 64. great Store of treasure vizt Gold and Silver Rupees.

Fol. 67. his revenue came to a lack vizt 100000 rupees . . . he Sent the Emperour 80 lacks of rupees.

Fol. 70. his demands off Some were 10: 20: 30: 40: 50: thousand rupees. . . The Nabob (Smileinge Vpon him) demandeth wth all Speed one lack of rupees i e: 100000 . . . for he was robbed of 1500000: rupees in this his journey into y^e Countrey . . . he made many Apologies and feed Some of y^e Nabob's counsell: whereby he got off for 50000 Rupees.

Fol. 71. now thought he had an Opportunitie fallen into his hand of acquireinge one lack or two of rup^{es} . . . demanded noe lesse then 2 lack of Rupees.

Fol. 80. with an addition of 100000: rupees towards Satisfaction for theire great injurries received at y^e hands of this Governour's ffather.

Fol. 82. A Very good Cow is Sold [at Hugly] for foure Shillings Six pence Vizt 2 rupees, a good hogg for $\frac{1}{2}$ of a Rupee, 45 or 50 fowls for one Rupee, 6 : 7 : and Sometimes 8 maund of rice for one Rupee.

Fol. 86. y^e poore Orixas, whoe Indeed I may well call poore . . . I have often been in theire Villages, and where there have been more then 20 families of them, they cold not all change one Rupee into cowries, whereby to be paid for a little milke or fish (or what else wee had of them) in y^e currant moneys of this Kingdome & Orixa : and Arackan.

Fol. 86. [Cowries] agreat quantitie passe for one Rupee not lesse then 3200.

Fol. 94. The Coynded Currant moneys of this Kingdome [Bengala] are rupees, halfe rupees and quarters . . . They alsoe Coyne Rupees here of y^e finest refined Gold, w^{ch} are called Gold Moors . . . The Rupee att 00*lb* 02*s* 03*d*.

Fol. 102. yet they are as good here as ready Rupees.

See Yule, *s. v.* Rupee. [The above quotations are interesting as additional evidence that the form "rupee" had become fixed by the last quarter of the 17th Century.]

ST. THOMAS'S MOUNT.

Fol. 29. Six miles to the Southwards of ffort S^t Georges standeth Severall mountains pretty high y^e One of w^{ch} is called S^t Thomas's Mount . . . Vpon y^e top of Mount S^t Thomas groweth naturaly a very remarkable tree.

Not in Yule.

ST. THOME.

Fol. 25. A Naique that liued neare Mylapore vizt S^t Thomæ.

Fol. 29. y^e ffrench who in y^e yeare 1672 tooke y^e Citty S^t Thomæ from y^e Moor's forces.

Not in Yule. [Now a part of Madras town. *N. and E.*, 1680, has St. Thoma throughout pp. 38, 39, 43.]

SALAAM.

Fol. 24. This Silly Creature . . . Salam'd to all her friends, Especially to y^e Brachmans.

Fol. 73. and this he accompted a Salam.

Fol. 91. before whom they doe and must dance and Singe and make many Salams.

See Yule, *s. v.* Salaam. [I know of no earlier instance of the use of "Salaam" as a verb.]

SALEMPOORY.

Fol. 31. Very Considerable quantities of these followinge Commodities are here [Pettipolee] wrought and Sold to fforeign Merchants viz : . . . Salampores.

Fol. 134. The most Proper and beneficiall Commôdities w^{ch} are for this place [Janselone] : be . . . Sallampores.

Fol. 158. ffrqm y^e Coast of India and Choromandell are brought hither . . . Longcloth Salampore's, white and blew.

See Yule, *s. v.* Salempoory. [? Divinity. *N. and E.* p. 16, for 22nd April 1680 : — Salampores Blew, at 14 Pagodas per corge [score]—P. 17 for 6th May, "in Longcloth and Salampores for England." P. 24 for 19th June, "Salampores, fine : Salampores, ordinary." The Salempoory was probably therefore an article of a definite size, like the Palempore, or bed-spread.]

SALLEETER.

Fol. 131. jmmmediately they giue it out that y^e Salesters came up to y^e towne in y^e night and committed that and many more Villanies . . . The Salesters are absolute Piratts and often cruiseinge about Janselone & Pullo Sambelon &c. Jales neare this Shore [Malay Coast].

Fol. 144. Anno Domini: 1675: A Small Vessell belonging to y^e English was Sent from Achin hither [Queda] laden with very fine goods and was mett with y^e Pirats commonly called Sal-leeters neare to y^e Roade of Queda.

Not in Yule. [No doubt the Cellates of the Portuguese writers. See Crawford, *Dict. of Indian Archipel.*, s. v. Malacca, p. 242 f.]

SAMCAU.

Fol. 135. All the fruite this countrey [Janselone] affordeth is . . . Samcau . . . but noe fruit see plenty here as the Plantan and Samcau whose figure here follow: [illustration]. The Samcau is not a whit pleasant to y^e tast Vnlesse it be boyled in fish or flesh broth or else stewed.

Not in Yule. [De la Loubère in his *Historical Relation of the Kingdom of Siam*, ed. 1693, p. 23, has: — "Amongst the sweet Oranges the best have the Peel very green and rough; they [the Siamese] call them Soum-keou, or Crystal Oranges . . . They give of these Soum-keou to their sick." Compare also Sir John Bowring's Journal in his *Kingdom and People of Siam*, under date 30th March, 1855, Vol. II. p. 155: — "They gave us the Siamese names of the fruits on the table: — Som, orange; Som-kiou-wang, small orange"]

SANAS.

Fol. 101. from Hugly and Ballasore: Sanas.

See Yule, s. v. Piece Goods. He has no quotations. [A cotton cloth of the class now known as *sâliâ*.]

SAR LASHKAR.

Fol. 56. [Chicacol] is y^e residence of S^r Lashkare y^e Kings deputy or Viceroy, Who bears as great Sway Over this Coast in Generall as y^e Kinge his Master doth in Golcondah.

Not in Yule. [The General (Sar-i-Lashkar) or Viceroy of the "Golcondah Coast," constantly mentioned in the records of the period. *N. and E.*, p. 20, for 25th May and 27th May 1680, has characteristic entries: — "One Sheake Ahmud came to Towne slyly with several peons dropping in after him, bringing letters from Fatty Chaun at Chingulputt and Ruccas [notes] from the Ser Lascar Nabob Mahmud Ibrahim, and pretending that he had the king's Phyrmaund to warrant his beating his drum and carrying his flag as Avaldar of the Towne, and that he was ordered to take the government thereof on the plea that the Towne produced more than formerly and 'hat Verona the Dubass was dead: whereupon he was ordered to remain outside the Towne until his business was known: In the evening three files of soldiers were sent to bring him into the Fort where he was examined and produced his letters." "The person that came to be Avaldar is sent away with a letter in answer to Fatty Chaun."]

SASH.

Fol. 101. from Cosumbazar fine Sashes.

Not in Yule. [Probably fine muslin made up into sizes for sashes round the waist.]

SAUGOR ISLAND.

Fol. 91. The Riuer of Ganges is of large and wonderful Extent: . . . and came into y^e great Riuer w^{ch} rather deserves to be called the Sea of Ganges: y^e breadth of it there I cannot certainly affirme, but judge it is not lesse then 10 English leags broad, w^{ch} is about 40 miles within Ganga Sagar: or y^e mouth of it.

See Yule, s. v. Saugor Island, at the mouth of the Hugli. [The quotation above is unique for accuracy of description and correctness of the form of the name.]

SCARLET.

Fol. 43. With a Scarlet or broadcloth coveringe.

Fol. 71. Where-Vpon he gave in his present of fine Scarlet.

Fol. 102. The Staple Commodities brought into these 3 Kingdomes (namely Orixa : Bengala: & Pattana) are **Scarlet**.

Fol. 158. Some Commodities from England; viz: **Scarlet**.

See Yule, *s. v.* **Scarlet** and **Suclat**. ["**Scarlet**" in old English was "broadcloth" of any colour.] *N. and E.* for 5th April 1680, p. 15: "It being necessary to appoint one as the Company's Chief merchant (Verona being deceased), resolved Bera Pedda Vincatadry do succeed and that Tasheriffs be given to him and the rest of the principal Merchants, viz., 3 yards **scarlett** to Pedda Vincatadry and $2\frac{1}{2}$ yards each to four others, the ceremony being for the better grace performed before the rest of the merchants in the Council Chamber."

SCREETORE.

Fol. 37. Metchlipatam. Affordeth many very good and fine Commodities, viz: . . .

Screetores finely wrought inlaid with turtle Shell or jvory.

Fol. 158. from Syam . . . **Screetores** both plaine and lackared, &c:

Not in Yule. [A writing case: see *ante*, Vol. XXIX. pp. 116, 307; XXX. p. 163.]

SEEDY.

Fol. 171. he was by y^e **Siddy** or **Bishop** of Achin freed from y^e death his consorts [comrades] died.

See Yule, *s. v.* **Seedy**: a corruption of *Saiyyid*. [The quotation is valuable for the history of the Anglo-Indian term: now in common parlance an East African negro.]

SEER.

Fol. 94. They weigh p^r y^e Maund, **Seere**, $\frac{1}{2}$ **Seere**, and $\frac{1}{4}$ **Seere** . . . The Maund bigg or little is equally divided into 40 Equall parts and are called **Seers**, w^{ch} alsoe are halfed and quartered.

Fol. 99. Notwthstandinge Pattana be soe fertile to afford graine to Such a plentifull countrey as Bengala: yett in y^e yeare of our Lord 1670 they had as great a Scarotie in soe much y^e one Pattana **Seere** weight of rice (y^e plentifullest graine in y^e countrey) was Sold for one rupee, y^e **Seere** cont^g onely 27 Ounces [i. e., 6 oz. short weight].

See Yule, *s. v.* **Seer**, the well-known Indian weight, standardised nowadays at roughly 2 lbs. In the text the big maund [Bengal] was 82 lbs. and the little maund [Madras] 25 lbs.: so the seer should have varied between 10 and 33 oz.]

SHABUNDER.

Fol. 132. as Soone as wee come Vp wee are invited into a house where Speedily come to waite Vpon us y^e **Shabandar**.

Fol. 133. The **Shabandars** and what Others of y^e Chiefe of y^e King's Officers wee invite doe very Sociably sit downe and eat and drinke wth us.

Fol. 134. Two of y^e Grandees of his Councill must alsoe be Piscashed wth 6 pieces of fine Callicoes or Chint each of them: and y^e **Shahbandar** of Banquala wth 3 pieces Jdem.

Fol. 140. Anno Doñ: 1677: I Voyaged once more to Ianselone, and was kindly Entertained . . . Especially by Some of y^e Old **Shabandars** and merchants.

Fol. 139. All w^{ch} Orders if not most Strictly and Speedily put in Execution y^e **Radja** and 2 of his chiefest councellours wth y^e 3 **Shabandars** Shold loose theire heads . . . w^{ch} Startled him and his Councell soe much that they immediately Sent y^e 3 **Shabandars**.

Fol. 141. he jmmmediately turned out of Office most of y^e Syamers both Councellours Secretaries **Shabandares**.

Fol. 143. next to whom [the Sultan] are y^e **Leximana**: **Orongkays**: and **Shabandars**.

Fol. 144. Sold the goods to Sarajah Cawn: a Chulyar & chiefe Shabandar of Quedah: (and rogue Enough too).

Fol. 153. y^e Kinge giueth positive Order to y^e Shabandare.

Fol. 161. y^e great Orongkay is Lord Chiefe Justice, there are other Orongkays & under this, as alsoe Shabandars under them. . . . and acquainteth one of y^e Shabandares.

Fol. 162. but in y^e interim y^e Shabandar & Dnbashee and one or Other belongeinge to this great man the [Orongkay] doth accompanie him and discourse most friendly.

See Yule, *s. v.* Shabunder. [The above quotations show clearly that in the Malay States the Shabandar was a high officer of State controlling the seaborne trade.]

SHROFF.

Fol. 39. Shroffs vis^t Changers of money.

See Yule, *s. v.* Shroff. [N. and E. p. 31, for 5th Aug. 1680, has: — "Report of the weight of 2 chests of gold and 2 Bags of Ryalls of § delivered to the Sharoffs for alloy."]

SIAM.

Fol. 77. The Elephants of Ceylone are best Esteemed of here . . . and Endowed with more Sence and reason then those of Tanasaree Queda or Syam.

Fol. 131. [Janselone] wholly belongeth to y^e Kinge of Syam The Inhabitants Vp in y^e Countrey are Naturall Syamers.

Fol. 134. The English Nation in Generall is free from all Such duties in y^e Kingdome of Syam.

Fol. 140. A few Months afterwards y^e Kinge of Syam, tooke it into consideration, that an Austere man, one that had been bred a Warriour was a fitter person to Governe this Island (then the Syam^r that now did).

Fol. 148. y^e Kinge of Syam . . . haveinge a warre of greater consequence in hand namely wth y^e Kinge of Pegu [1677].

See Yule, *s. v.* Siam.

SOLLA.

Fol. 143. but y^e Old Kinge taketh vp his residence att Solla: a very large town in y^e very middle of his Kingdome [of Queda].

Fol. 145. Save a Very handsome and well favoured boy of about 11 years of age, whoe for his good countenance y^e Kinge kept in his Pallace att Solla.

Fol. 146. prepareth Some of y^e King's boats, and goeth alonge wth him in Person to Solla (y^e place of y^e Old Kings residence).

Fol. 148. This good Old Kinge . . . Anno Domⁱ: 1677 . . . fledd up to y^e Mountains and left Queda: Solla: and many Other places destitute of inhabitants, for Some time.

Not in Yule.

SOMBRERO.

Fol. 42. Sumbareros or Catysols.

See Yule, *s. v.* Sombrero. [An umbrella, not a hat.]

STICKLACK.

Fol. 158. from Bengala Sticklack from Pegu . . . very Excellent Sticklack.

Not in Yule. [But see Yule, *s. v.* Lac.]

STRIPES.

Fol. 7. alsoe very ingenuous in workinge Striped Cloth of Gold and Silver.

Fol. 101. from Cosumbazar Stripes interwoven wth gold and Silver.

Fol. 158. are brought hither **Striped Stuffs** of Golcondah & Pettipolee.
Not in Yule. [Cotton cloth interwoven with gold and silver.]

SULTAN.

Fol. 143. **y^e King's Son** (by y^e Natives stiled **Sultan**) [at Queda] There are Several men in Office y^e doe governe here, and beare great Sway over y^e people (Vnder y^e **Sultan** or **Younge Kinge**).

See Yule, *s. v.* Sultan. [The above is a valuable quotation as showing that in the Malay States it sometimes meant the heir-apparent, "second king," Skr. *yuva-rāja*, Pali *upa-rāja* [corrupted by the way into **Upper-Roger** by old writers on Burma, a term which should be in Yule]: the Eng-shê-him of Burma, the Jub-rāj of Manipur and so on.]

SUMATRA.

Fol. 157. The Citty Achin is Vpon y^e North End of y^e great Island **Sumatra**, w^{ch} Extendeth from 05^h 40' South Lattitude, to 05^h 40' North Lattitude, soe y^e the Equinoctiall Line divideth this Jsland into 2 Equall parts [the Road of Achin] almost land locked wth y^e head of **Sumatra** with infinite Numbers of Prows from y^e Malay Shore and West Coast of this Jsland **Sumatra**.

See Yule, *s. v.* Sumatra. [The above quotation is valuable for description.]

SUMBRA.

Fol. 165. he must receive them with great reverence Standinge Vp and makeinge a **Sumbra** to y^e Queen's Windows.

Not in Yule. [Malay, a salutation.]

SURAT.

Fol. 142. and tell them in private what our goods cost upon y^e Coast: or in **Suratt**: or Bengala: or elsewhere, w^{ch} doth many Christians a great Prejudice.

Fol. 146. When y^e Companie's Shipp arriveth from **Suratt** as generally there doth one every yeare (if not more).

Fol. 153. There are not above 4 or 5 Ships and Vessels [to Queda] p^r Annum from **Suratt** Choromandell and Bengala that Vse this Countrey.

Fol. 157. Many Ships and Vessels doe att all Seasons of the yeare arrive in this Port [Achin] from Several places, namely **Suratt** The Chiefe Commodities brought hither from **Suratt**.

Fol. 166. When a Present is Sent to y^e Queen [of Achin] from y^e President of **Suratt**: or Agent and Governour of ffort S^t Georg's.

See Yule, *s. v.* Surat. [The last quotation shows the accuracy of the writer's information. The "Presidency" was not transferred to Bombay till 1687.]

TAEL.

Fol. 152. 16 mace is one **Taille** [in Queda].

Fol. 162. And there wee pay for y^e Chopp 4 **tailes** in moneys viz^t four pounds Sterlinge Here y^e Orongkay must be presented wth one piece of Baftos to y^e Value of 2 **tailes** The Contract been [?] between] us and the Court of Achin hath been of longe Standinge 50 **tails** p^r Ship, if laden wth fine goods (admitt y^e Ship be great or Small) they are to make an abatement of 10: 15: or 20 **tails**, accordinge as y^e quantitie is.

Fol. 173. gave y^e fellow 5 **tailes** Viz^t five pounds Sterlinge.

See Yule, *s. v.* Tael : see *ante*, Vol. XXVII. p. 37 ff. The quotations are remarkable as to values. The *tael* was roughly an ounce and in silver was worth 5s. to 6s. 8d. sterling. The writer must mean a tael in gold, and if the gold tael was worth £1 sterling, as he more than once states, then gold valued in the Malay States at £1 the oz. and the ratio of silver to gold there varied between 4 and 3 to 1. A remarkable but by no means impossible occurrence, *vide ante*, Vol. XXVI. p. 309 and footnotes.

TAMARIND.

Fol. 17. One Old flackeer I very well remember, that tooke up his habitation Vnder y^e Shade of a great tamarin tree in Hugly (in Bengala).

Fol. 69. [Cattack] adorned with . . . delicate Groves of . . . tamarin.

Fol. 153. they carry hence [Queda] . . . Tamarin.

See Yule, *s. v.* Tamarind.

TANK.

Fol. 4. the great Pond or tanke where they frequently wash themselves all over, before they assume to enter the Pagod. *

Fol. 22. went wth all Expedition into a great tanke of water wth was very nigh.

Fol. 57. they have many delicate groves, tanks of water

See Yule, *s. v.* Tank.

TARRA.

Fol. 139. y^e Kinge of Syam Sent a Tarrash to y^e Radja and all Officers whatsoever upon y^e Island of Ianselone : wth gaue a most Severe and Strict charge unto them never to come to any composition wth the Dutch . . . Hee likewise in y^e generall letter to y^e Radja &c : gaue positive Orders I was discourasinge wth y^e Radja when this Tarrash arrived.

Fol. 148. untill a Tarra came from Syam wth letters and a Gold Cappe for a present to him [King of Queda], after a friendly but Monarchiall manner biddinge him lue poore Slave and Enjoy his Countrey in peace.

Not in Yule. [Frequently used in old books about Indo-China for letters-patent, the Indian *firman* [firman, phyrmaund, &c.]

TARRA.

Fol. 152. Noe Other Coyned moneys in this Kingdome [Queda], Save Small Coppar moneys tinned over called Tarra: 96 of wth make one Copan.

Not in Yule. [The small tara, tare of Yule, is another coin altogether.]

TENASSERIM.

Fol. 38. The Kinge of Golcondah hath Severall Ships y^e trade yearely to . . . Tanas- saree.

Fol. 77. that annually trade to Sea, Some to Ceylone Some to Tanassaree, those fetch Elephants The Elephants of Ceylone are best Esteemed of here . . . then those of Tanassaree.

Fol. 131. [Janselone] Is an Island that lyeth to y^e Southward of all the Jsles of Tanas- saree : nearest midway btweene y^e and Queda.

See Yule, *s. v.* Tenasserim.

TICAL.

Fol. 53. The Syam Ticall Values one rupee $\frac{1}{4}$ or 0018 03s 07d.

See Yule, *s. v.* Tical. [See *ante*, Vol. XXVI. p. 253 ff. for an exhaustive treatment of this word, weight and coin.]

TODDY.

Fol. 29. the Palmero tree affordeth that rare liquor formerly termed **Palme-Wine**, now vulgarly called **Toddy**, y^e **Palmito** . . . afford liquor alsoe . . . called **date Toddy**, not soe good as y^e Other, more licious but soon Eager.

Fol. 40. another Sort there is [of arack] y^e distilled from **Neep toddy** and y^e is commonly called **Nipa de Goa**.

See Yule, *s. v.* Toddy. [The quotations are valuable for the different kinds.]

TOMBOLEE RIVER.

Fol. 76. beinge timorous of driveinge too farre down viz^t upon the Shoals of y^e **Riuer Tombolee** (where y^e **Riuer** [**Hugly**] is most crooked).

Not in Yule. [But see Yule, *s. v.* Tumlook.] [Now the **Rûpnarain** running into the **Hugli** at the **James and Mary Shoal**.]

TOOTNAGUE.

Fol. 86. [The **Orixas**] withall soe ignorant that they know not **Silver** from **Tootanagga**.

Fol. 158. from **China** . . . **Totanagga**.

See Yule, *s. v.* tootnague: spelter. [The "white copper" of China is meant in the text. The same trick as that hinted at in the text is still played upon the **Nicobarese**, who cannot usually distinguish between silver and tootnague, *i. e.*, German silver.] See also *ante*, Vol. XXVI. p. 222 f., for a similar trick on **Java** by the **Chinese** in the 17th Century.

TRANQUEBAR.

Fol. 53. **Porto Novo & Trincombar**.

Fol. 78. That very yeare y^e **Danes** came from **Trincombar**: (a fine Garrison of y^e **Kinge** of **Denmarks**) the onely place they have in **Asia** 40 English leag^t to the Southward of fort **S^t George's** . . . The **Danes** findinge Small gaines to **Jssue** from this warre, did Anno Domⁱ: 1644: come downe from their Castle of **Trincombar** . . . All through y^e Simplicitie of a Mechanick fellow y^e the **Danes** Entitled theire **Comadore**, who rendred himselfe as he was really a most ridiculous man to y^e mightie disgrace of there whole Nation & fortification of **Trincombarre**.

Fol. 81. vntill they heard farther from the Castle of **Trincombar**.

See Yule, *s. v.* Tranquebar.

TRESSLETORE.

Fol. 4. Here followeth y^e fig^t of y^e **Pagod** called **Tressletore**, 5 & $\frac{1}{2}$ miles to y^e N^oward of fort **S^t Georg's**.

Not in Yule. [An old pagoda, once famous, near **Madras**, known under various forms, of which **Trivitore** in *Wheeler's Old Madras*, p. 528, is as near as may be expected to the correct form.]

TURBAN.

Fol. 70. he had pulled off his gold **Turban**.

Fol. 165. and from her is Sent to y^e English Commander a Silke Suite of cloths wth a **Turban** after the Malay fashion.

Fol. 176. Each of them wore his **Turbat** after the Arabian mode.

See Yule, *s. v.* Turban.

TUTICORIN.

Fol. 91. many of them have y^e Shackles on theire arms made of Chanke, a great Shell brought from **Tutacree** (a Dutch factorie neare y^e **Cape Comorin**).

See Yule, *s. v.* Tuticorin.

VISS.

Fol. 53. The Vsual Weights of this Coast [Choromandel] are y^o Veece. . . .
A Maund Cont: 8 Veece 1/3: or 025 Idem [pounds] A Veece Cont: 003 Idem.

Fol. 132. [Janselone] when a Small parcell then for soe many Viece or soe many great or Small puttas: 4 great puttas make a Viece 10 Small ones is a Viece.

See Yule, *s. v.* Viss: *ante*, Vol. XXVI. p. 327, Vol. XXVII. p. 58 ff. [The well-known S. Indian Indo-Chinese weight, about 3½ lbs.]

VIZAGAPATAM.

Fol. 56. beinge a Very Secure Coast to harbour in namely in Vizagapatam.

Not in Yule, but should be, as it turns up in all sorts of queer forms in the old books. [See *ante*, Vol. XXX. pp. 357, 400.]

WALTAIR.

Fol. 56. beinge a Very Secure Coast to harbour in namely in Wattara [? Waltara].

Not in Yule: practically part of Vizagapatam.

YAM.

Fol. 19. they feed for y^o most part vpon that web is very good, as
yamma.

See Yule, *s. v.* yam.

YAVANASATAKAM:

A HUNDRED STANZAS TRANSLATED FROM GREEK POETS.

BY PROFESSOR C. CAPPELLEB, Ph.D., JENA.

HOMER.

1

न राज्यं बहुभिः कार्यमेकः शास्तु प्रजा विभुः ।
लोकत्राणाय यो देवैः स्थापितः परमे क्षये ॥

Cf. Pañchat. III. 80.

B 204, 205.

2

यादृशानि हि पत्राणि तादृशाः सन्ति मानुषाः ।
यथा पक्षाणि वृक्षेभ्यो निपतन्ति महीतले ॥
रोहन्ति च पुनर्वतैः प्रेर्यमाणानि माधवैः ।
एवं कुलानि जायन्ते विनश्यन्ति च देहिनाम् ॥

Z 146—149.

3

न हि कश्चिज्जनो दैवमतिवर्तितुमर्हति ।
क्षुद्रकः स्यादुदारो वा जन्म यो लब्धवान्भुवि ॥

Z 488, 489.

4

अनग्निमनिकेतं च कुलघ्नं विद्धि तं नरम् ।
यो वैरं रमते कुर्वन्नकराष्ट्रनिवासिनाम् ॥

I 63, 64.

5

न हि प्राणिषु सर्वेषु महीतलविसर्पिषु ।
शोचनीयतरः कश्चिन्मनुष्यादिति मे मतिः ॥

Cf. v. 38.

P 446, 447.

6

सूक्ष्मा जिह्वा बहून्यस्यां विविधानि वचांसि च ।
यादृशं तु भवेदुक्तं प्रत्युक्तमपि तादृशम् ॥

Cf. Subhāshitārp. 192, 193.

Y 248—250.

7

एतद्भवति मर्त्यानां देवैः पूर्वविनिर्मितम् ।
दुःखादापतितुं दुःखं ते स्वयं सुखमासते ॥

a 525, 526.

8

तद्गीतं सर्वगीतानां प्रशंसन्ति हि मानुषाः ।
येनापूर्वेण कर्णानि ह्रियन्ते हृदयानि च ॥

a 351, 352.

9

बहुमान्यमधीशत्वमचिराद्भि महाधनैः ।
पूर्यते भवनं राज्ञो यशश्चैव विवर्धते ॥

Cf. v. 96.

a 392, 393.

10

समाः कतिपये सन्ति पापीयांसो न दुर्लभाः ।
श्रेयांसस्तु पितुः पुत्रा विद्यन्ते यदि पञ्चपाः ॥

B 276, 277.

11

न प्रशस्यतरं किञ्चिन्न तादृक्कृतिकारकम् ।
यथा भर्ता च भार्या च श्वान्योऽन्यवशानुगौ ।

CORRESPONDENCE.

SOME NOTES ON DIGAMBARA JAINA
ICONOGRAPHY.

SIR, — With reference to an article on Digambara Jaina Iconography by Dr. J. Burgess, *ante*, Vol. XXXII. pp. 459 ff., I beg to point out the following few inaccuracies, which may lead your readers to misunderstand some customs of the Digambara Jainas:—

1.

It is said that the Jaypūr Khandarwāls are Viśpanthīs or Thērapanthīs, and that the former worship standing and the latter sitting. First, this might lead one to think that the division into Viśpanthīs and Thērapanthīs is confined to the Digambara Khandarwāl Jainas only. As a matter of fact, the Svētāmbarīs and some of their sub-classes also may be Viśpanthīs. Also the Agarwāls and other minor classes of the

Digambara Jainas may be Viśpanthīs and Thērapanthīs. By the way, the term should be Tērā (i.e. 18) Panthīs and not Tērāpanthīs. Secondly, the attitude of worship of the two classes is quite reversed. It is the Viśpanthīs who worship sitting; whereas the Tērāpanthīs worship standing, and sit only when they propose to meditate or repeat their *mantras* on the beads of a rosary in a very low, almost inaudible, tone of voice.

It must, however, be said here that a class of Jaina laymen, who profess to be much more learned and spiritual than their other Jaina Tērāpanthī brethren, and who are called Bhattarakas, worship in a *sitting* posture. But these Bhattarakas are a less than microscopic minority and their practice, therefore, is the exception to the rule, which is recognized by the majority of the orthodox Digambara Jainas.

2.

Again, it is said that "they" (the Tērāpanthis) object to bathing themselves or the images, and worship with water, cocoanut-water or *panchdm-rita*." In this connection it is enough to say that it is one of the most important factors of the ritual connected with every Digambara Jaina temple, that some one — a male — should get up early in the morning, should bathe, and at sunrise, or only a little, not much, before it, should go to the temple and bathe the images of the Tirthankaras that are placed there. Also it must be noted that the bathing is generally — almost exclusively — done on the premises of the temple, to guard against the risk of the worshipper's body being again contaminated after bathing, if he bathes at his house and then goes to the temple.

3.

As to the "eleven grades of Jainas" enumerated by Dr. Burgess, I think these are the eleven stages in the life of a householder, which lead up from a simple belief in Jainism to an almost complete renunciation of the world, in perfect agreement with the essential teachings of the Jaina religion. These stages are called *pratimas*, and in Digambara books are enumerated as below:—

1. *Darsana*, or Faith in the true God, true teacher, and true religion.
2. *Vrata*, various kinds of abstinence and vows.
3. *Sāmayak*, saying prayers three times a day for fixed periods.
4. *Proshādhōpvas*, keeping fast for sixteen *pahars* on the eighth and the fourteenth days of each half of the month as reckoned in India.
5. *Sachita-tyāga*, abstaining from eating green vegetables.
6. *Nishkōjan-tyāga*, abstaining from four kinds of food at night, and from providing others with the same.
7. *Brahmacharyya*, keeping aloof from sexual intercourse altogether.
8. *Ārambha-tyāga*, abandonment of all engagements and occupations.
9. *Parigraha-tyāga*, renunciation of the two sorts of *Parigrahas*, external and internal.
10. *Anumōdana-Vrata*, vowing not to take part in any worldly or household concern. Also vowing not to take food uninvited.

11. *Uddhisht-Vrata*, becoming unclothed and living in a jungle with a *langoti* and *kamandalu* (alms-bowl); or retaining a *dhoti* (a waist-cloth), a piece of cloth to cover the body and an alms-bowl, and living in a temple or a *mandapa*, or in some lonely and unfrequented place, other than a *mandir* or temple.

Obviously the eleven grades of Jainas, as Dr. Burgess is informed, are inaccurate. Either he has been given wrong information, or he has misunderstood the explanations of his informant. The statement that the fourth-grade Jainas "observe all the Jaina precepts but are guilty of adultery" is altogether misleading. Perhaps in the above enumeration it corresponds to the sixth *pratimā*, the *Nishkōjan-tyāga*. For sometimes a part of its observance is said to be abstinence from sexual enjoyment in the day-time, which, of course, implies freedom of the enjoyment at other times. Now this implied permission to enjoy one's wedded spouse at night is misconstrued as adultery, and the inaccuracy of the statement in the article is obvious.

The fifth-grade Jainas are said to be 'dishonest.' But this is misleading, for dishonesty is neither enjoined nor permitted to the Jainas. Only they do not have to take a religious vow expressly to abstain from it at a certain stage of their life as a householder. Otherwise it is a part of the details of the second *pratimā Vrata*, even of the details of the first *pratimā Darsana*, that the Jaina householder shall not commit theft, and theft surely includes many kinds of dishonesty.

The misleading nature of the sixth statement that the Jainas "abet crimes, but do not commit them personally," is quite akin to the fifth. It is well known that the Jainas view their morality, and their asceticism also at times, from three points of view, *i.e.*, as they relate to the body, mind or tongue, *i.e.*, to act, thought or words.¹ Now it is not abetting of crimes that is enjoined upon or allowed to a householder of the sixth grade; it is the absence of *express prohibition* of committing deeds by words or by the instrumentality of others that is mistaken for permission to abet crimes.

4.

As to the distinctions that the article draws between the Digambara and the Svētāmbara Jainas, the fifth distinction, on p. 431, is inaccurate. The Svētāmbaras light lamps in their

[¹ Compare H. Jacobi's Introduction to *Jaina Sūtras*, Part II., Vol. XLV., S. B. E. p. xvii, where he institutes a comparison between some Jaina doctrines as referred to in the *Majjhima Nikāya*, with certain corresponding statements in the *Sūtrakṛitāṅga* and *Siddhānta Sūtras*.]

temples and worship their images at night. The Digambaras, particularly the Têrâpanthis, do not worship at night, although they light lamps in their temples for the purpose of reading their scriptures there.

As to the sixth distinction, it is not the Digambaras, especially Têrâpanthis, who bathe their images with *panchâmrta*. It is the Svêtâmbaras who do so, or else the Bhattâarakas, reference to whom has already been made above.

5.

As to the Yakshas and Yakshinis, general references to them in the body of the article, p. 463, ll. 29—32, are not in keeping with the plates given at the end of the article. Both Yakshas and Yakshinis do not, in all cases, hold their right hand up with palm foremost in front of the chest, and the left hand closed. As a matter of fact, (i) Trimukha Yaksha (3)² has his left hand closed but with a tendency to show the palm outwards; (ii) Isvara and Gauri (11) both hold up the left hand with their open palm outwards and the fingers hanging down; (iii) Kumâra (12) Yaksha holds the left hand as above—his Yakshini has it closed; (iv) Yakshini Kushmanpini (22) has two children in her two arms and

places both her hands before her near her thighs and with the palm inwards; (v) Yaksha and Yakshini (24) both hold up their left hand open, with its fingers hanging down and the palm inwards.

6.

Similarly, with regard to the feet of the Yakshas and Yakshinis, the general remark in the article is at variance with the figures on the plates. A complete classification would be as follows:—(i) Yaksha and Yakshini (1) have their left foot down and right tucked up in front; (ii) Yaksha (2) has his left foot down and right tucked up in front, and Yaksini (2) has her right foot down and left in front; (iii) Yakshas and Yakshinis (from Nos. 3 to 12) all have their left foot down and right tucked up in front; (iv) Both Yakshas and Yakshinis (Nos. 13 to 23) hold their right foot down and the left tucked up in front; (v) Yaksha (23) has his right foot down and left in front; Yakshini (23) has her left foot down, and right in front; (vi) Yaksha and Yakshini (24) both sit as above.

MISCELLANEA.

FURTHER NOTES ON SOME DOUBTFUL
COPPER COINS OF SOUTHERN INDIA.

SINCE the publication of my paper on Doubtful Copper Coins in Southern India in *ante*, Vol. XXXII. p. 313 ff., I have been able to identify a few of the coins there figured, and I now submit the following notes.

No. 17 E.—I am inclined to think that this is a Pândyan coin, and that the symbol at the top of the rev. is not a *lingam* and altar as I supposed. Above the back of the Nandi is a battle-axe.

The symbol above the axe seems to be separated by dotted lines from the axe and the bull. It may represent a mountain. One of my "Koneri Râyan" series, which seems to be certainly Pândyan, has a figure of a standing bull with a battle-axe above.

Nos. 43, A to D, are coins of the Dutch, and the legend on the reverse is *Puduchchêri* (Pondicherry). Count Maurin Nahuys has described them (pp. 13, 14) and figured them (Plates 6, 7, 8) in his paper on the "*Numismatique des Indes Néerlandaises*," published in the "*Revue Belge de Numismatique*," 1887.

No. 56 belongs to a South-Indian Bull-and-trisûla series of which I have several. Sir Walter Elliot has figured one (Plate IV., 174) and described it (p. 134) in his "*Coins of Southern India*," but he was unable to place it with any accuracy. I overlooked this point when preparing my List.

I take this opportunity of submitting for identification by experts, another coin from South India that has long been a puzzle to me.

It was omitted from my List accidentally, being, at the time my paper was prepared, in custody of Mr. Rapson of the British Museum, who, however, was unable to class it. The horse is somewhat similar to that on No. 56 of my "Doubtful" List, which may be a coin of Maisûr. But the Tamil letter *na* on the reverse seems to shew that the present coin has no connection with that principality.

R. SEWELL.

² Numerals enclosed in brackets denote the serial number of the figures in the plates.

 Amoghavarsha I. (Rāshtrakūṭa); he reigned
 from A. D. 814 or 815 to about 877-78,
 197; he probably ended his long reign by
 abdicating, 197, 199 f.; — his personal name
 probably either was Nārāyaṇa or else was
 a name beginning with Viṣṇu, 197 n.; his
 other *virūdas*, 197; some literary allusions
 which probably refer to him, 197 f.; — note
 on him as a patron of literature, 197 f.; — by
 the Digambaras, the composition of the
 Ratnamālīkā, q. v., is probably attributed
 to him, 198 ff.; he took, or was credited in
 the taking, a special interest in *alamkāra*,
 and directed or was credited with directing
 the composition of the *Kavirājamārga*, q. v.,
 200; — that work was really written, not by
 him, but under his patronage, by a writer
 named Kaviśvara 200, 258 ff., 278
 Amoghodaya, a mistaken rendering of the

INDIAN PALEOGRAPHY

BY

JOHANN GEORG BÜHLER.

EDITED

AS AN APPENDIX TO

THE INDIAN ANTIQUARY,

VOL. XXXIII, 1904,

BY

JOHN FAITHFULL FLEET,

INDIAN CIVIL SERVICE (RETD.), BOMBAY PRESIDENCY.

BOMBAY :

BOMBAY EDUCATION SOCIETY'S PRESS, BYCULLA.

INTRODUCTORY NOTE.

PROFESSOR BÜHLER's *Indische Palaeographie*, consisting of 96 pages of letter-press, with a portfolio of 9 plates of alphabetical characters and numerals and 8 tables of explanatory transliteration of them, was published in 1896 as Part II of Vol. I. of Dr. Karl J. Trübner's "*Grundriss der Indo-Arischen Philologie und Altertumskunde*," or "*Encyclopædia of Indo-Aryan Research*," which was planned and started by Professor Bühler himself, and was superintended by him up to the time of his death, in April, 1898.

There was always the intention of issuing the letter-press of the work in English also. The English version was made by Professor Bühler. And his manuscript of it was on its way to the Press at the time of his death. Steps were taken towards having it printed and published under the direction of Professor Kielhorn, who succeeded to the editorial management of the *Grundriss*. At that time, however, owing partly to the great interruption of business in India caused by the plague, partly to the manner in which the manuscript was written, and partly to a natural difficulty in the way of doing what had been contemplated, namely, of issuing the English version in such a form as to resemble the German original exactly in type and in arrangement page by page, the preparation for publication could not be taken far, and eventually had to be abandoned.

Feeling, myself, the want of the English version, and knowing that there must be others placed in the same position, in 1902 I made some inquiries and proposals about it. The result, with the consent and help of Professor Kielhorn, was a generous public-spirited response by Dr. Trübner, who, after consultation with Mrs. Bühler, agreed to transfer the copyright of the English version on practically nominal terms, subject to certain conditions as to the method of publication. Dr. Trübner's terms and conditions were accepted in a similar spirit by Colonel Sir Richard Temple, the proprietor of the "*Indian Antiquary*." And thus it came to me to take the work through the Press, and to arrange the issue of it in its present form as an Appendix to the "*Indian Antiquary*," Vol. XXXIII, 1904.

As far as the commencement of the second paragraph of § 16, A, on page 33, the English version has been produced from an advanced proof of 1900, prepared in the circumstances indicated in paragraph 2 above, and revised by Professor Kielhorn. From that point onwards, it has been done from

Professor Bühler's manuscript, written by himself. In order, however, to set the printers fairly at work, it was necessary, because of the very numerous and sometimes rather perplexing abbreviations to which Professor Bühler had had recourse, to furnish them with a fair copy. The copy was, of course, closely compared by me with the original manuscript. And it is hoped that no mistakes have been introduced, in interpreting any of the abbreviations in passages which are not in the German original.

A perusal of a very few pages of the English work, thus issued, will suffice to shew that it is not altogether a literal rendering of the German original. It is, therefore, sent forth as an English version, not as an actual translation. At the same time, the English version does not in any way supersede the German original. In the first place, as the stones were not preserved, it has not been practicable to issue with the English version the plates and tables which form so important a part of the whole work; however, there is available, for separate purchase, a limited number of copies of the plates and tables, printed off in excess of the number required for issue with the German original. In the second place, in writing his English version, Professor Bühler made here and there certain deviations, sometimes by insertion, sometimes by omission, from the German original. But these deviations, made chiefly in connection with the second edition, published in 1898, of his *Indian Studies*, No. III, on *The Origin of the Indian Brähma Alphabet*, are in points of detail, and do not in any way amount to a revised edition of his *Indische Palaeographie*.¹ The German original is still the text-book, as much as is the English version. The latter is for the benefit of those, interested in any way whatsoever in the subject, who are not able to utilise the German text.

This work of Professor Bühler has brought to a climax, for the present, the palaeographic line of Indian research. And it would be impossible to speak in too high terms of the manner in which he has handled the subject, and of the

¹ A final paragraph on page 96 of the German work mentions "some recent publications, amongst them Dr. Grierson's examination of the Gayā alphabet of the stone-masons," which could not be considered then, but were to be noticed in the second edition of *Indian Studies*, No. III. A treatment of them in that way explains the omission of that final paragraph in Professor Bühler's English manuscript. And it also, no doubt, accounts for the omission of the Brähma character for the guttural nasal, *ṇ*, in line 14 of col. VI. of the table on page 11, as compared with the same table on page 12 of the German text, and for the introduction of an inset illustration of that character in an additional remark made on page 35, under § 16, C, (12), in connection with which there is to be taken an observation made on page 14, under § 4, B, (4), (c). In a reference to the Gayā alphabet on page 29, in line 5 from the bottom, for *ṇa* read *ṇa*.

value of the results which he has placed before us. In the palæographic line, however, as also in the historical line, on which it is largely dependent, and, in fact, in every line of Indian research, we are steadily accumulating more facts and better materials, and making substantial progress, every year. I venture, therefore, to draw attention to a few details, which already might now be treated, or at least considered, from other points of view.

A notable point, regarding which I differ from the opinions of Professor Bühler as expressed in this work, is that of both the relative order and also the actual dates of the varieties of the Kharōshthī alphabet, indicated on page 25 under § 10, (3) and (4), which are found in the epigraphic records and on the coins of — (following the order in which, in my opinion, they should properly be placed) — Kanishka and Huvishka, 'Sudasa-'Soḍāsa and Patika, and Gondophernēs. Kanishka certainly founded the Mālava-Vikrama era, commencing B. C. 58. And in that era there are certainly dated, in addition to records of the times of him and his direct successors, the dated records of the times of 'Sudasa-'Soḍāsa, Patika, and Gondophernēs, and of Vāsudēva, who was a contemporary of Gondophernēs.²

A similar remark applies to the order and dates of the varieties of the Brāhma or Brāhmī alphabet, indicated on page 32, under § 15, (8, 9), from records of the times of Kanishka, Huvishka, 'Sudasa-'Soḍāsa, and Vāsudēva.

As regards the nomenclature of those same varieties of the Kharōshthī alphabet, it is now certain that it is erroneous to describe one of them, mentioned there and discussed on page 27 f., as a 'Saka variety. 'Sudasa-'Soḍāsa and Patika were not 'Sakas, or Sakas, if that should be the correct expression according to the original form of the name.³ None of the Sakas, 'Sakas, ever played a leading historical part in Northern India.

In respect of the Ēraṇ coin, mentioned first on page 8, which presents a reversed Brāhmī legend running from right to left, we must not lose sight of the possibility that the explanation is to be found, as has been suggested by

² See J.RAS. 1905, 232 ff. Regarding Vāsashka, Vāsushka, whom it has not been necessary to mention by name above, see *ibid.* 357 f.

It may be observed here that on page 40, line 7 from the bottom, in the words "or of the 4th century of the Seleucid era," and in the corresponding place on page 41, line 10, of the German text, there must be a slip of the pen. The alternative proposed initial date of Kanishka which Professor Bühler had in view, is certainly A. D. 89. And in that year there began the Seleucid year 401; that is, the first year of the fifth (not fourth) century of that era.

³ For the real meaning of the inscription P: on the Mathurā lion-capital, which has been supposed to mark them as Sakas, *i. e.* Sakas, see J.RAS. 1904, 703 ff., and 1905, 154 ff.

Professor Hultzsch in the "Indian Antiquary," Vol. XXVI, p. 336, in a mistake of the engraver of the die, who, like the die-sinker in the case of a certain coin of Hōlkar of the last century, may have forgotten that he ought to reverse the legend on the die itself. We have one instance of such remissness in ancient times in a coin of Rajula-Rājuvūla, the reverse of which presents a monogram, formed of the Greek letters E and Y, facing in the wrong direction; see Professor Gardner's Catalogue of the Coins of the Greek and Scythic Kings of Bactria and India, p. 67, No. 5. And we have another in the legend on a bronze stamp for making seals, where the engraver omitted to reverse the syllable *śrī*; see J.R.A.S. 1901, 98, plate, No. 9.

On page 67, under § 29, B, (2), there is a statement about the strongly cursive Kanarese *kh*, which is calculated to be misleading, and on the strength of which some erroneous assertions have already been made.⁴

In the plates and tables there are some selections that might have been avoided, and some incorrect details, which are due to two causes:⁵ partly to the fact, the explanation of which has been indicated in some remarks made by me in the "Epigraphia Indica," Vol. VI, p. 80, that, owing to the nature of the only available materials, the plates have sometimes been based upon reproductions of original records which are not actual facsimiles; partly to the fact, which we learn from the Concluding Remarks on page 102, that some of the details of the plates were not selected and filled in by Professor Bühler himself.

And in any revision of the work there would have to be added, in connection with § 20, D, on page 44, a notice of the more recently discovered peculiar variety of the southern alphabet which is illustrated in the Mayidavōlu plates of the Pallava king Siva-Skandavarman and the Konḍamudi plates of Jayavarman, edited by Professor Hultzsch in the "Epigraphia Indica," Vol. VI, pp. 84 ff., 315 ff.

⁴ See, for the present, my remarks about them in EI. 6, 77 ff.

⁵ For three instances of incorrect details, see some remarks by Professor Kielhorn, in EI. 8, 38, note 1, below the introduction to his edition of the Junāgaḍh inscription, or Gīrnār Prāsasti, of Rudradāman.

As instances of the other kind, I may mention the following. Col. IV. of plate VIII. is from a reproduction (IA. 18, 186), which is not an actual facsimile, of a record the authenticity of which is open to question. And col. VII. of the same plate is mostly from a lithograph (IA. 6, 138) which was made, at a time when our methods of dealing with the original records were still decidedly primitive, from a plain uninked estampage, made by myself, the ground of which was painted in by my own hand, with results which cannot exactly be taken as furnishing a thoroughly typical illustration of the Western Chālukya alphabet of the eleventh century A. D.

It would, however, have been contrary to the spirit of the arrangement with Dr. Trübner, to introduce any comments and additions of my own, either in the text or in footnotes. And I do not find it convenient or appropriate to present them here, beyond the extent of the indications given above. Anything of that kind must be left for other occasions.

My editorial functions in the issue of this English version of Professor Bühler's work have thus been confined to details of a formal kind: chiefly in the matter of giving more prominence to the titlings of the sections and the divisions of them; in transferring to a more convenient position, as separated footnotes at the bottom of the pages to which they belong, the notes which in the German original stand massed together at the end of each section;⁶ and in marking, by figures in square brackets in thick type, the commencement of each page of the German original, as closely as has been found convenient. Following, however, an example set by Professor Bühler himself in his manuscript, I have gone somewhat further still in breaking up some of the very long paragraphs of the original. Following his lead in another direction also, I have endeavoured to present everywhere the correct spelling, as far as it can be ascertained, of all the place-names which occur in the work; but, in conformity with his practice in this work, without discriminating between the long and the short forms of *e* and *o*. And I have corrected a few obvious mistakes; for instance, under § 29, A, in line 18 on page 66, I have substituted "Bādāmi" for the "Aihole" (properly Aihole) of the German original and of the manuscript translation.

In § 29, page 65 ff., and anywhere else where the word may occur, I have taken the liberty of substituting the word "Kanarese" for the "Kāṇara" of the German original and of the manuscript translation; and similarly, on page 46, line 4, and page 51, lines 21, 27 f., I have substituted "the Kanarese country" for the "Kāṇara" of the original and of the manuscript. The form "Kāṇara," with the lingual *n*, is nothing but an imaginative advance upon the official figment "Kānara," with the dental *n*, for which, itself, there is no basis in the Kanarese language, nor any necessity. I had thought at first of using, like the late Rev. Dr. Kittel and some other writers, the original vernacular word "Kannada,"—the source of our conventional "Canara, Kanara," which, however, do not mean the whole of the Kanarese country. And that word, which denotes both the country and its language and also their alphabetical characters,

⁶ In doing this, I have corrected a few wrong references which came to notice, and have added a very few new references which seemed likely to be of use.

would have been appropriate enough. But I decided eventually on "Kanarese:" partly because, though this term, also, is conventional, it is so well-established, familiar, and definitive; and partly because it was practically used, alongside of the word "Kānara," by Professor Bühler himself, in the "Kanaresische" and "Altkanaresische" of the original German work (*e. g.*, page 66, lines 4, 6), and in the "Canarese" and "Old Canarese" of corresponding passages in his English version.

Except, however, in such details as the above, and in the abolition of the inconvenient abbreviations of which mention has been made on page 2 above, the English version is simply a reproduction of Professor Bühler's manuscript.

In bringing this somewhat intricate work to a successful issue, I have been greatly indebted to the zeal and ability of Mr. J. S. Foghill, the Head Reader of the Bombay Education Society's Press. But for the extreme care with which he disposed of the first rough proofs before any proof was sent out for revision by me, I should certainly not have been able to take the work through, as has actually been done, on only one proof and a revise of it.

J. F. FLEET.

CORRECTIONS AND REMARKS.

Page 24, line 7 from the bottom ; *read* J.A. 1888, II, 280.

- „ 25, line 5 ; Kaldawa seems to be a mistake for Kaldarra (WZKM. 10, 327) or Kaladara Nadi (J.RAS. 1903, 14).
- „ „ line 19 ; *da* seems to be a mistake (of the original) for *dha*.
- „ 29, line 5 from the bottom ; for *na*, read *na*.
- „ 32, line 5, and in some subsequent places ; for Ghasundi, *read* Ghasundi.
- „ „ line 2 of the notes, and page 41, § 20, A ; for another reproduction of the Girnār Prasasti, or Junāgadh inscription, of the time of Rudradāman, which is the basis of col. VI. of plate III, see, now, EI. 8, 44.
- „ 40, line 9 ; for *Sudasa*, *read* *Sudasa*.
- „ „ line 7 from the bottom ; regarding the words “or of the 4th century of the Seleucid era,” see Introductory Note, p. 3, note 2.
- „ 61, note 1 ; for another reproduction of the Vakkālēri plates of A. D. 757, which are the basis of col. XVI. of plate VII, see, now, EI. 5, 202.
- „ 64, note 10, end ; *read* Sāntivarman (see, now, Ep. Carn. 7, Sk. 176, for one reproduction of this record, and EI. 8, 32, for another).
- „ 69, line 9 ; it may be remarked that the original identification of Kalinganagara with Kalingapattanam (Kalingapatam), on the coast, has been superseded ; the ancient city is represented by the site now covered by the villages Mukhalingam and Nagarakaṭakam and the ruins between them, inland in the Gañjām district ; see, *s. g.*, EI. 4, 187 f.
- „ 81, line 8 from the bottom ; the German original (p. 77, line 35) has “50, 60, 70 ;” in his English manuscript, Professor Bühler wrote “50, 60, 70,” and then corrected the 50 into 10.
- „ 86, bottom ; it may be remarked that this system of numeral notation is commonly called the Kaṭapayādi system, from the initial consonants of the four lines.

INDIAN PALEOGRAPHY

FROM ABOUT B. C. 350 TO ABOUT A. D. 1300

BY

G. BÜHLER.

I. THE ANTIQUITY OF WRITING IN INDIA AND THE ORIGIN OF THE OLDEST INDIAN ALPHABET.

§ 1. — The Indian tradition.¹

THE tradition of both the orthodox and the heterodox sects of India ascribes the invention of writing, or at least of the chief script, to the creator Brahmā, and thereby claims it as a national invention of the remotest antiquity. The former view is found in the Nārada-Smṛti,² a redaction of the Manusamhitā (mentioned by Bāṇa about A. D. 620), and in Bṛhaspati's Vārttika on Manu,³ as well as in Hsien Tsiang⁴ and in the Jaina Samavāyāṅga-Sūtra (traditional date about B. C. 300), the account of which latter work is repeated in the Paṇḍavānā-Sūtra (traditional date B. C. 168).⁵ The story is also indicated in the representations of Brahmā at Bādāmi of about A. D. 580, where the deity holds in one of his hands a bundle of palm-leaves,⁶ for which in later representations an inscribed sheet of paper is substituted.⁷

The story, according to which in particular the Indian script running from the left to the right is an invention of Brahmā (*Fan*), is told in full in the Chinese Buddhistic Fawanshulin.⁸ The two Jaina works mentioned above, and the Lalitavistara,⁹ indicate its existence by naming the most important script *bambhī* or *br̥hmī*. These traditional statements make it advisable to adopt the designation *Brāhmī* for the characters in which the majority of the Aśoka edicts are written, and for their later developments.

Beruni¹⁰ mentions a slightly different story. He says that the Hindus once had forgotten the art of writing, and that through a divine inspiration it was rediscovered by Vyāsa, the son of Parāśara. Accordingly, the history of the Indian alphabets would begin with the Kaliyuga, in B. C. 3101.

While these myths tend to show that the Hindus had forgotten the origin of their alphabet in early times, — perhaps already about B. C. 300, but certainly before the beginning of our era, — there are some other portions of their traditions which possess a greater and a positive value. The two Jaina Sūtras referred to above, contain a list of 18 separate alphabets; and the Lalitavistara¹¹ enumerates 64 scripts which are said to have existed in the time of Buddha. Several among the names of the two lists agree, and there are in particular four which, as may have been already recognised, have a claim to be considered authentic and historical.

¹⁰ India 1, 171 (SACHAU).

¹¹ loc. cit.; a third list, with about 30 mostly very corrupt names, in the Mahāvastu 1, 135 (SENART).

Besides the *brāhmī* or *bambhī*, which is the parent of all the still existing alphabets of India, two more can be identified with known scripts. The *kharoṣṭhī* or *kharoṣṭhī* is, as the Fawanshulin states,¹ the writing running from the right to the left, invented by one Kharoṣṭha, "Ass-lip,"² and is the same character which European scholars formerly used to call Bactrian, Indo-Bactrian, Bactro-Pali, Ariano-Pali, &c. The *drāviḍī* or *dāmiḷī* of the lists is very [2] probably the partly independent variety of the Brāhmī, which recently has become known through the relic vessels from the Stūpa of Bhāṭṭiprolu in the Kistna district.³ Besides, the name *puṣkarasāri* or *pukkharaśāriyā* is certainly historical, as it is evidently connected with the *nomen gentile* *Puṣkarasādi* or *Paṣkarasādi* (with the Northern Buddhists *Puṣkarasāri*) by which one or several ancient teachers of law and grammar are mentioned in Pāṇini's grammar, Āpastamba's Dharmasūtra, and other works. It appears not incredible that a member of the family of *Puṣkarasādi* may have invented a new alphabet or modified an existing one. The list of the Jains includes also the name *yavanāliḡā* or *yavanāliḡā*, which is identical with *yavanānī*, "the writing of the Yavanas or Greeks," of Pāṇini (traditional date about B. C. 350).⁴ An early acquaintance of the Hindus with the Greek alphabet may have been brought about by the expedition of Skylax to North-Western India in B. C. 509, or by the fact that Indian and Gandharian troops took part in Xerxes' war against Greece,⁵ and even by an ancient commercial intercourse. At all events, finds of Indian imitations of Attic drachmes with Greek inscriptions tend to prove the use of the Greek alphabet in North-Western India before the time of Alexander.⁶

As some names of the Jaina list are thus shown to be ancient by the results of epigraphic researches and by Pāṇini, as well as by the agreement of the independent tradition of the Northern Buddhists, the list is not without historical value. And it may be considered at least highly probable that a fairly large number of alphabets was known or used in India about B. C. 300. The exact number, 18, which the Jains mention, must however be taken merely as conventional, as it frequently occurs in traditional statements.

An extract from the lost *Drṣṭivāda* of the Jains also gives some further account of the ancient Brāhmī.⁷ It states that this alphabet contained only 46 radical signs, instead of the usual number of 50 or 51. The letters intended are without a doubt: *A, Ā, I, Ī, U, Ū, E, AI, O, AU* (10), *Am, Ah; ka, kha, ga, gha, ṅa, ca, cha, ja* (20), *jha, ṇa, ṭa, ṭha, ḍa, ḍha, ṇa, ta, tha, da* (30), *dha, na, pa, pha, ba, bha, ma, ya, ra, la* (40), *va, śa, ṣa, ṣa, ha, ḷa*; while the *mātrkāḥ* *R, Ṛ, L, Ī*, and the ligature *kṣa*, which in later times was often erroneously considered a *mātrkā*, were excluded. The four liquid vowels are wanting also in the alphabet of the Lalitavistara,⁸ and in that of the modern elementary schools. In the latter the instruction is based on the so-called *Bārākhadī* (Skt. *drādaśāksari*), a table of the combinations of the consonants with the twelve vowels mentioned above, e. g., *ka, kṛ, kaṃ, kaḥ*. The antiquity of the *Bārākhadī*, which from its Maṅgala *Oṃ namaḥ siddham* is at present sometimes called *Siddhākṣarasamāmnāya* or *Siddhamātrkā*, is attested by Hui-lin (A. D. 788—810),⁹ who mentions it as the first of the twelve *fan* or 'cycles' (evidently Hsien Tsiang's twelve *chang*)¹⁰ with which the Hindu boys began their studies. Further evidence for the omission of the vowels *R, Ṛ, L, Ī* is furnished by Hsien Tsiang's remark¹¹ that the Indian alphabet of his time contained 47 letters (the last one being probably the ligature *kṣa*), and by the fragments of the incomplete alphabet of Asoka's stone-masons at Gayā,¹² which may be restored as follows: *A, *Ā, *I, *Ī, *U, *Ū, *E, *AI, *O, *AU* (10), **Am* or **Ah, ka, *kha, *ga, *gha, ṅa, *ca, cha, *ja, *jha* (20), **ṇa, *ṭa*.

¹ BOR, I, 58.² Comp. WZKM. 9, 66, and B.I.S. III², 118 f.³ B.I. 2, 323 ff.⁴ Mahābhāṣya 2, 220 (KIELHORN).⁵ Herodotus, VII, 65, 66.⁶ B. V. HEND, Cat. of Greek Coins: Attica, p. XXXI. f., pp. 25—27.⁷ W.I.S. 18, 231.⁸ Sansk. text, Bibl. Ind. 145; LEHMANN, 137.⁹ B.I.S. III², 30.¹⁰ Siyuki I, 78 (HUAL); St. JULIEN, Mémoires des pèlerins Bouddhiques I; 72, and note.¹¹ Siyuki I, 77.¹² B.I.S. III², 81.

All these various points tend to show that the popular Brāhmī contained, as the Jaina tradition asserts, since the third century B. C. only 46 letters, and that, as the occurrence of the vowels *AI*, *AU*, *Am*, *Ah* and the consonant *ṣa* proves, it was adapted to the wants of the Sanskrit language. But it is not [3] improbable that the Brahmans already then used particular signs for the liquid vowels in their works on grammar and phonetics. The method, however, according to which the actually known signs for these sounds have been formed, differs from that adopted for the other vowel-signs. The medial *r*, *ṛ*, and *ṛ̣* were developed first, and the initials later; while in the case of *a*, *ā*, &c., the process was the contrary one (see below, § 4, and § 24, A, 6, 7). The Chinese have also preserved an Indian tradition asserting that *r*, *ṛ*, and *ṛ̣* are later additions to the original alphabet.¹

§ 2. — Literary evidence for the use of writing.

A. — Brahmanical literature.²

Among Vedic works, the Vāsiṣṭha Dharmasūtra, which according to Kumārila (about A. D. 750) originally belonged to a school of the Rgveda, and which is younger than the lost Mānava Dharmasūtra but older than the existing Manusmṛiti,³ offers clear evidence for the widely spread use of writing during the "Vedic" period. Vāsiṣṭha in XVI, 10, 14—15, mentions written documents as legal evidence, and the first of these sūtras is a quotation from an older work or from the traditional lore. Further, Pāṇini's grammar, which belongs to the Vedāṅgas, contains, besides the term *yavanāni* mentioned above, the compounds *lipikara* and *libikara*, "writer" (III, 2, 21), which sometimes have been rendered erroneously, against the authority of the Koṣas, by "maker of inscriptions."⁴ In addition to these few certain passages, the later Vedic works contain some technical terms, such as *akṣara*, *kāṇḍa*, *paṭala*, *grantha*, &c., which some scholars have quoted as evidence for writing. But others have explained them differently, and it is indeed not necessary to consider them as referring to written letters and MSS.⁵ Similarly, opinions are much divided with respect to the force of some other general arguments for the early use of written documents and MSS., drawn from the advanced state of Vedic civilisation, especially from the high development of trade and the complicated monetary transactions mentioned in Vedic works, from the use of prose in the Brāhmaṇas from the collection, the methodical arrangement, the numeration, and the analysis of the Vedic texts, and from the grammatical, phonetic, and lexicographic researches in the Vedāṅgas.⁶ Though some of these points, especially the first and the last, undeniably possess considerable weight, they have yet not gained general recognition, as will always happen if an *argumentum ex impossibili* is used, even if it should be supported by fuller special enquiries than Sanskrit scholars have hitherto devoted to these subjects.

While this kind of evidence will probably not be generally accepted very soon, it is to be hoped that the *argumentum ex silentio*, — the inference that a Vedic work which does not mention writing must have been composed when writing was unknown in India, — will be dropped. The *argumentum ex silentio* is certainly not conclusive, because the Hindus even at present, in spite of a long continued use of writing, esteem the written word less than the spoken one, because they base their whole literary and scientific intercourse on oral communications, and because, especially in scientific [4] works, writing and MSS. are mentioned very rarely. Though MSS., being *Sarasvatīmukha*, "the face of the goddess of speech," are

held sacred and are worshipped, the Veda and the Sāstras exist, even for the modern Hindu, only in the mouth of the teacher, whose word has more weight than a written text, and they can only be learned properly from a teacher, not from MSS. Even in our days, the Hindus esteem only the *mukhaśāhā vidyā*, the learning which the Pandit has imprinted on his memory. Even in our days, learned discussions are carried on with reference to living speech, and even the modern poets do not wish to be read, but hope that their verses will become "ornaments for the throats of the learned" (*śaśām kaṇṭhabhūṣaṇa*). As far as our observation reaches, this state of things has been always the same since the earliest times. Its ultimate cause probably is that the beginning of the Hindu Sāstras and poetry goes back to a time when writing was unknown, and that a system of oral teaching, already traceable in the R̥gveda, was fully developed before the introduction of written characters. The reasons just stated do not permit us to expect many traces of the use of writing in the works of the schools of priests or Pandits, or to look in them for frequent references to letters and written documents. But, on the other hand, there is nothing to bar the conjecture, repeatedly put forward, that, even during the Vedic period, MSS. were used as auxiliaries both in oral instruction and on other occasions. And, as an argument in favour of this conjecture, it is now possible to adduce the indisputable fact that the Brāhmī alphabet has been formed by phonologists or by grammarians and for scientific use.¹

But such Brahmanical works as the Epics, Purāṇas, Kāvya, dramas, &c., which describe actual life, or the metrical law-books which fully teach not only the sacred but also the civil and criminal law, as well as compositions such as the Nīti-, Nāṭya-, and Kāma-sāstras which exclusively refer to worldly matters, contain numerous references to writing and to written documents of various kinds, and likewise evidence for the occurrence of MSS. of literary works. Unfortunately, however, it is not possible to assert of any of the existing books of these classes, — excepting the two Epics, — that they are older than the period to which the oldest inscriptions belong. And even the evidence of the Epics may be impugned, since we cannot prove that every word of their texts goes back to a high antiquity. Professor JACOBI's examination of the several recensions of the Rāmāyaṇa has shown that the greater part of the verses, now read, did not belong to the original poem.² As far as is known at present, the MSS. of the Mahābhārata do not show equally great variations. But the existence of the majority of its chapters can be proved only for the eleventh century A. D.³ Though the testimony of the Epics can, therefore, only be used with due reserve, yet it is undeniable that their terms regarding writing and writers are archaic. Like the canonical works of the Southern Buddhists,⁴ they use the ancient expressions *likh*, *lekha*, *lekhaḥ*, and *lekhaṇa*, not the probably foreign word *lipi*.

The most important passages of the Epics, concerning writing, have been collected in the St. Petersburg Dictionary under the words mentioned, and by J. DAHLMANN, *Das Mahābhārata*, 185 ff. Regarding the passages on writing in Manu, see the Index in *Sacred Books of the East*, Vol. XXV, under "Documents," and for the legal documents, described in the later Smṛtis, see Vol. II. of this Encyclopedia, Part 8, Recht und Sitte, § 35. An interesting collection of statements regarding MSS. in the Purāṇas is found in Hemādri's *Dānakhaṇḍa*, Adhy. 7, p. 544 ff. (Bibl. Ind.). The Kāmasūtra I, 3 (p. 33, Durgāprasād) enumerates *puṣṭakavācana*, "the reading of MSS.," among the 64 kalās.

B. — Buddhist literature.⁵

[5] More important than the testimony of the Brahmans is that of the Ceylonese Tripiṭaka, where numerous passages bear witness not only to an acquaintance with writing, but also to its extensive use at the time when the Buddhist canon was composed. *Lekhā*, "writing,"

¹ See below, page 17.

² JACOBI, *Das Rām.* 3 ff.

³ KIRSTE in B.I.S. II, 27 ff.

⁴ See below, under B.

⁵ B.I.S. III, 2, 7—18; OLDENBERG, *SBE.* 13, XXXII ff.; D'ALWIS, *Introd. to Kaccāyana's Gram.* XXVI ff., CIV f., 72—103; WERNER, *Ind. Streifen* 2, 387 ff.

and *lekha*, "a writer," are mentioned in the Bhikkhu-Pācittiya 2, 2, and in the Bhikkhunī-Pācittiya 49, 2; and the former work praises writing as a branch of knowledge that is honoured in all countries. The Jātakas repeatedly speak of private¹ and official² letters. They also know of royal proclamations,³ of which Mahāvagga 1, 48 likewise mentions an instance; and they narrate that important family affairs or moral and political maxims were engraved on gold plates.⁴ Twice we hear of debtor's bonds (*inapanna*),⁵ and twice even of MSS. (*potthaka*).⁶ A game called *akkharikā* is mentioned repeatedly in the Vinayapitaka and the Nikāyas;⁷ according to Buddhaghosa, its main feature was that letters were read in the sky. The Pārājika section of the Vinayapitaka (3, 4, 4) declares that Buddhist monks shall not "incise" (*chind*) the rules which show how men may gain heaven, or riches and fame in the next life, through particular modes of suicide. From this passage it follows (1) that the ascetics of pre-Buddhist times used to give their lay-disciples rules, incised on bamboo or wooden tablets, concerning religious suicide, which the ancient Brahmans and the Jains strongly recommended, and (2) that the knowledge of the alphabet was widely spread among the people.

Finally, Jātaka No. 125, and Mahāvagga 1, 49,⁸ bear witness to the existence of elementary schools, in which the method of teaching and the matter taught were about the same as in the indigenous schools of modern India. The Jātaka mentions the wooden writing-board (*phalaka*), known (as well as the *varṇaka* or wooden pen) also to the Lalitavistara⁹ and to Bērūnī,¹⁰ and still used in Indian elementary schools. The passage of the Mahāvagga gives the curriculum of the schools, *lekha*, *gaṇanā* and *rāpa*, which three subjects, according to the Hāthigumpha inscription of the year 165 of the Maurya era,¹¹ king Khāravela of Kalinga learnt in his childhood. *Lekha*, of course, means "writing," and *gaṇanā*, "arithmetic," i.e., addition, subtraction and the multiplication-table formerly called *anka* and now *āṅk*, while *rāpa*, literally "forms," corresponds to applied arithmetic, the calculations with coins, of interest and wages, and to elementary mensuration. These three subjects are still "the three R's" taught in the indigenous schools called *gāmī nīāl*, *pāthālā*, *lehaḍ* or *toll*.

These very plain statements of the Ceylonese canon refer certainly to the actualities of the period between B. C. 500—400, possibly even of the sixth century.¹² Their antiquity is proved also by the fact that all the terms for writing, letters, writers, — *chindati*, *likhati*, *lekha*, *lekha*, *akkhara*, — as well as nearly all the writing materials, wood or bamboo, *panna* or leaves, and *suvannapaṭṭa* or gold plates, point to the oldest method of writing, the incision of the signs in hard materials. All traces of the use of ink are wanting, though the statements of Nearchos and Q. Curtius regarding the writing materials used at the time of Alexander's invasion (see below under C) make it very probable that ink was known in the fourth century B. C., and though an ink-inscription of the third or second century B. C. is found on the inner side of the lid of the relic vessel from Stūpa No. III. at Andher.¹³ Moreover, the Ceylonese books are not acquainted with the words *lipi*, *libi*, *dipi*, *dipati*, *dipapati*, *lipikara* and *libikara* for "writing," "to write," and "writer," of which the first six are found in the [6] Aśoka edicts and the last two, as stated above, in Pāṇini's grammar. *Dipi* and *lipi* are probably derived from the Old Persian *dīpi*, which cannot have reached India before the conquest of the Pañjāb by Darius about B. C. 500, and which later became *lipi*.¹⁴

C. — Foreign Works.

To the last quarter of the fourth century B. C. refer the statement of Nearchos,¹ according to which the Hindus wrote letters on well beaten cotton cloth, and the note of Q. Curtius,² which mentions the tender inner bark of trees as serving the same purpose, and clearly points to the early utilisation of the well known birch bark. The fact that, according to these two writers, two different *indigenous* Indian materials were used in B. C. 327—325, shows that the art of writing was then generally known and was nothing new. To a slightly later time belongs the fragment No. 36 a of Megasthenes,³ which speaks of mile-stones indicating the distances and the halting places on the high roads. In another often discussed passage,⁴ Megasthenes says that the Indians decided judicial cases according to unwritten laws, and adds in explanation that they knew no *γράμματα* and settled everything *ἀπὸ μνήμης*. According to the now usual interpretation, this statement has been caused by a misunderstanding. Megasthenes took the term *smṛti*, used by his informants, in the sense of *μνήμη*, "memory," while they meant it in the sense of "the sacred tradition concerning law," or "the lawbooks," which, according to Indian principles, can only be explained orally by one who knows the Dharma.

§ 3. — Paleographic evidence.⁵

The results of a paleographic examination of the most ancient Indian inscriptions fully agree with the literary evidence, which bears witness to the widely spread use of writing during the fifth century B. C. and perhaps even during the sixth. The characters of the Aśoka edicts, which have to be considered first, prove very clearly that writing was no recent invention in the third century B. C. The alphabet of the edicts is not homogeneous. All the letters, with the exception of *U*, *jha*, *ṇa*, *ṇā*, *ṭha*, *ṇa*, *tha* and *na*, have several often very dissimilar forms, which are partly local and partly cursive varieties. The number of the variants of one letter sometimes amounts to nine or ten. Thus plate II, 1, 2, cols. II—XII, shows for *A*, *Ā*, no less than ten forms, among which the eight most important ones may be placed here side by side: —

The first sign has hardly any resemblance to the last. But the sequence in the row shows their connection and their development. The first seven owe their existence to a predilection partly [7] for angles and partly for curves, — two mutually contradictory tendencies, which find their expression also in the forms of other letters of pl. II, such as *gha*, *ḍa*, *ḍa*, *la*, &c. The signs Nos. 1, 2, 3 of the series given above, are due to the first tendency, and Nos. 6, 7 to the second. Nos. 4, 5 show the transition from the angle to the curve, and No. 8 is a cursive simplification of No. 6. These eight signs are not found in all the versions of the Aśoka edicts, but are divided locally as follows. The angular forms Nos. 1, 2, 3 appear only in the south, in Gīrnār, Siddāpura, Dhauli, and Jaugada, side by side with Nos. 4 to 7. And it must be noted that the latter are rare in Gīrnār and Siddāpura, but in the majority in Dhauli and Jaugada. In the versions discovered north of the Narmadā or the Vindhya, we find mostly only Nos. 4 to 7, but in Kālsī No. 8 also is common, and it occurs a few times in Rāmpūrva. Hence the angular forms of *A*, *Ā*, appear to be specially southern ones, and they are no doubt also the most ancient. The first inference is confirmed by a comparison of the most nearly allied inscriptions. The relic vessels from Kolhāpur⁶ and Bhatīpota (pl. II, cols. XIII—XV), and the oldest Andhra inscription from the Nānāghāt (pl. II, cols. XXIII, XXIV) again show the angular *A*, *Ā*, either exclusively or

¹ Strabo, XV, 717.² Hist. Alex. VIII, 9; comp. C. MÜLLER, *Fragm. Hist. Graec.* 2, 421.³ C. MÜLLER, *op. cit.* 430.⁴ *Frag.* 27; C. MÜLLER, *op. cit.* 421; SCHWANBECK, *Megasthenes*, p. 50, n. 43; M.M.HASL. 515; B.E.S.I.P. 1; L.I.A. II², 724; WIEBER, *Ind. Skizzen* 131 f.⁵ B.I.S. III², 35—53.⁶ B.A.S.W.I. No. 10, 39, plate.

together with the mixed forms Nos. 4, 5, while the numerous inscriptions found further north on the Stūpas of Sāñci and Bharahut, in Pabhosa and Mathurā (pl. II, cols. XVIII—XX) on the coins of Agathocles, and in the Nāgārjunī cave (pl. II, col. XVII), offer either pure curved letters or mixed ones. An exception in Mahābodhi-Gayā¹ is probably explained by the fact that pilgrims from the south incised records of their donations at the famous sanctuary. Similar differences between northern and southern forms may be observed in the case of *kha*, *ja*, *ma*, *ra* and *sa*,² and they are all the more important as the circumstances under which the Aśoka edicts were incised did not favour the free use of local forms.³ But the existence of local forms always points to a long continued use of the alphabet in which it is observable.

Equally important is the occurrence of apparently or really advanced and cursive types which for the greater part reappear or become constant in the later inscriptions. The subjoined table shows in line *A* the most important modern looking signs from the Aśoka edicts, and in line *B* the corresponding ones from later inscriptions.

| | <i>a</i> | <i>ka</i> | <i>kha</i> | | | <i>ga</i> | <i>gha</i> | <i>cha</i> | <i>jā</i> | <i>da</i> | <i>ū</i> |
|----------|-----------|-----------|------------|------------|-----------|-----------|------------|------------|-----------|-----------|----------|
| <i>A</i> | H | + | 3 | ? | ? | h | L | 3 | E | ? | K |
| <i>B</i> | H | + | ? | ? | 3 | h | L | 3 | E | ? | K |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| | <i>da</i> | <i>ja</i> | <i>pha</i> | <i>bha</i> | <i>la</i> | | <i>va</i> | <i>va</i> | <i>sa</i> | <i>ha</i> | |
| <i>A</i> | 3 | 6 | 6 | d | √ | √ | b | 3 | 3 | h | L |
| <i>B</i> | 3 | L | 6 | d | √ | √ | | 3 | | L | L |
| | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 22 |

Four among these signs, Nos. 2, 7, 10, 21, are, as will appear further on,⁴ really archaic, but the remainder are partly secondary, partly tertiary cursive forms. To the last-mentioned belong in particular Nos. 4, 8, 11, 15 and 19. [8] Among the letters from the later inscriptions in line *B*, Nos. 9, 11, 12 and 19 appear in the Nāgārjunī cave inscriptions of Aśoka's grandson Daśaratha; Nos. 2, 6—8, 10, 13—16 and 21 in Khāravēla's Hāthigumphā inscription and in the oldest Andhra inscriptions. Nāsik No. 1 and Nānāghāt, as well as in the archaic Mathurā inscriptions, all of which documents belong to the period between about B. C. 170 and 150. Nos. 1, 3 and 22 are still later, and occur first in the inscriptions of the Kuṣanas from Mathurā and in the Andhra and Ābhira inscriptions from Nāsik of the first and second centuries A. D. Occasionally the Aśoka edicts show also the short top-stroke, the so-called *Serif*, which is so characteristic for the later alphabets and causes numerous modifications.⁵ Very commonly, too, appear the upward strokes for medial *ā* and *e*, the cursive rounded *i* (in Gīrnār sometimes not distinguishable from *ā*), more rarely the later straight *o*-stroke, and once a looped *o*.⁶ Finally, the Anusvāra sometimes stands, as is generally the case in later times, above the letter after which it is pronounced.⁷

The existence of so many local varieties, and of so very numerous cursive forms, proves in any case that writing had had a long history in Aśoka's time, and that the alphabet was then in a state of transition. The use of the cursive forms together with archaic ones may possibly be explained by the assumption that several, partly more archaic and partly more advanced, alphabets were simultaneously used during the third century B. C., and that

¹ C.M.G. pl. 10, 2.² See below, § 16, C.³ See below, § 16, B.⁴ See below, § 4, A.⁵ See below, § 16, C.⁶ See below, § 16, C.⁷ See below, § 16, D.

the writers, intending or ordered to use lapidary forms, through negligence mixed them with the more familiar cursive letters, as has also happened not rarely in later inscriptions. It is possible to adduce in favour of this view the above-mentioned tradition of the *Dr̥ṣṭivāda*, according to which a larger number of alphabets was in use about B. C. 300. The conjecture would become a certainty, if it could be shown that the word *seto*, "the white (elephant)," which has been added to Dhauli edict VI. in order to explain the sculpture above the middle column, was incised at the same time as the preceding edicts. The two characters of *seto* show the types of the Kuṣāṇa and Gupta inscriptions.¹ Though it is difficult to understand that, in later times, anybody should have cared to add the explanation of the relief, keeping exactly the line of the edict, the possibility of the assumption that this was actually done, is not altogether excluded.

The Eraṇ coin with the legend running from the right to the left,² offers a contribution to the earlier history of the Brāhmī. It shows the ancient *sa* with the straight side-stroke, but the later *ma* with the semicircular top, and the *dā* turned to the left. The coin probably dates from the time when the Brāhmī was written both from the right to the left and from the left to the right. Even if one makes due allowance for the fact that coins often reproduce archaic forms long gone out of fashion, one can only agree with CUNNINGHAM (CAI. 101), who thinks that the coin is older than the Maurya period; and one must allot it, if not to B. C. 400, at least to the middle of the fourth century. The time when the Brāhmī was written *Souvraṣṭhā* probably lies somewhat before the Maurya period, since the Aśoka edicts show only few traces of the writing from right to left, in the *O* of Jaugada and Dhauli and in the rare *dha* of Jaugada and Delhi-Sivālik (plate II, 8, VI, and 26, V, VI).³ In connection with this coin it is also necessary to mention the Patnā seals (C.ASR. 15, pl. 3, 1, 2), which very likely are older than the time of the Mauryas. The first with the legend *Nadāya* (*Nandāya*), "the seal of Nandā," shows a *da* open to the right, [9] and the second with the inscription *Agapālata* (*Amgapālata*) shows an *A* in its original position (pl. II, 1, I). More important results for the history of the Brāhmī may be obtained from the Drāviḍi of the relie caskets of Bhat-tiprolu,⁴ already referred to above. This alphabet contains, besides various characters agreeing with the southern variety of the Aśoka edicts, (1) three signs, *dh*, *d* and *dh*, in the position of the writing running from right to left; (2) three signs, *c*, *j* and *z*, which are more archaic than those of the Aśoka edicts and of the Eraṇ coin; (3) two signs, *l* and *l*, derived independently from the old Semitic originals; (4) one new sign, *gh*, derived from *g*, the *mātrkā* *gha* of the Brāhmī being at the same time discarded. The reasons for the assertions under 2 and 3 will be adduced in the next paragraph. But if the assertions themselves are true, it certainly follows that, whatever the age of the inscriptions may be, the Drāviḍa alphabet separated from the main stock of the Brāhmī long before the Eraṇ coin was struck, at the latest in the fifth century B. C.

This estimate carries us back to the period for which the Ceylonese canon proves the general use of writing in India, without however giving the name of the current alphabet. It seems therefore natural to conjecture that the alphabet known to the earliest Buddhist authors was a form of the Brāhmī; and there are some further facts which favour this view. Firstly, recent discoveries have made it evident that the Brāhmī has been commonly used since the earliest times even in North-Western India, and that it was indeed the real national script of all Hindus.⁵ In the ruins of Taxila, the modern Shāh-Derī in the Pañjāb, coins have been found which are struck according to the old Indian standard, and some of which bear inscriptions in Kharoṣṭhī, while the majority show legends in the oldest type of the Brāhmī, sometimes

¹ B. ASRSI. I, 115.

² C.CAI. pl. 11, 18, and plate II, col. I, of this work.

³ If according to C.CMI, 27, as Mr. A. V. SMITH points out to me, some coins of Mihirakula show inscriptions running from the right to the left, this peculiarity must be ascribed to Sassanian influence.

⁴ Plate II, cols. XIII—XV.

⁵ C.CAI. 38 f.

together with transcripts in Kharoṣṭhī.¹ These coins are certainly not later than the third century B. C. Perhaps they even date, as CUNNINGHAM thinks, from a much earlier time about B. C. 400. Some of them have been struck by *negamā* or guilds, those of the *Dojaka* or *Dujaka*, of the *Tālimata* and of the *Atakatakā* (?), and one with the inscription *Vatasvaka* probably was issued by a section of the tribe of the *Asvakas* (*Assakenoi*), named after the *vaṭa*-tree, the *Ficus religiosa*. These finds decidedly establish the popular use of the Brāhmī in the Pañjāb, side by side with the Kharoṣṭhī, at least for the third century B. C. Mr. RAPSON's discovery of Persian *sigloi* with letters in Kharoṣṭhī and in Brāhmī proves that both alphabets were used together much earlier.² For, in all probability these *sigloi* were current during the rule of the Akhaemenians over North-Western India, or before B. C. 331.

Secondly, Dr. TAYLOR's view regarding the origin of the Kharoṣṭhī has become more and more probable, and it must now be admitted that this alphabet was developed out of the later Aramaic characters after the conquest of the Pañjāb by Darius, which happened about B. C. 500.³ And it becomes more and more difficult to refuse credence to the conjecture of A. WEBER, E. THOMAS and A. CUNNINGHAM, according to which the principles ruling the already developed Brāhmī have been utilised in the formation of the Kharoṣṭhī.⁴ According to our present information, the Kharoṣṭhī is the only alphabet, besides the Brāhmī, to which the Buddhists possibly could refer. But as it was only a secondary script even in Gandhāra, and as it was developed only in the fifth century, the possibility suggested becomes improbable, and the Brāhmī alone has a claim to be considered as the alphabet known to the authors of the Ceylonese canon.

§ 4. — The origin of the Brāhma alphabet.⁵

[10] Among the numerous greatly differing proposals to explain the origin of the Brāhmī,⁶ there are five for which complete demonstrations have been attempted: — (1) A. CUNNINGHAM's derivation from indigenous Indian hieroglyphics;⁷ (2) A. WEBER's derivation from the most ancient Phœnician characters;⁸ (3) W. DEECKE's derivation from the Assyrian cuneiform characters, through an ancient South-Semitic alphabet which is also the parent of the Sabaean or Himyaritic script;⁹ (4) I. TAYLOR's derivation from a lost South-Arabian alphabet, the predecessor of the Sabaean;¹⁰ (5) J. HALÉVY's derivation from a mixture of Aramaic, Kharoṣṭhī and Greek letters of the last quarter of the fourth century B. C.¹¹

CUNNINGHAM's opinion, which was formerly shared by some eminent scholars, presupposes the use of Indian hieroglyphic pictures, of which hitherto no trace has been found. On the other hand, the legend of the Eran coin, which runs from the right to the left, and the letters seemingly turned round in the opposite direction which appear rarely in the Aśoka edicts and more frequently in the Bhatīprolu inscriptions, point to the correctness of the view taken as granted in all the other attempts at explanation, *viz.*, that Semitic signs are the prototypes of the Brāhma letters.

Among the remaining four proposals, J. HALÉVY's *a priori* improbable theory may be at once eliminated, as it does not agree with the literary and paleographic evidence just discussed, which makes it more than probable that the Brāhmī was used several centuries before the beginning of the Maurya period, and had had a long history at the time to which the earliest Indian inscriptions belong. It is more difficult to make a choice between A. WEBER's derivation from the oldest North-Semitic alphabet, and the view of W. DEECKE and I. TAYLOR, who derive the Brāhmī from an ancient South-Semitic script. Neither the one nor the other derivation can be declared to be *a priori* impossible; for, the results of modern researches make

a high antiquity probable for also the Sabaeen script, and point to the conclusion that this alphabet not only is older than the oldest Indian inscriptions, but that it existed at a period for which no evidence for the use of writing in India is available.¹ But according to these results, the question has to be put in a manner somewhat differing from that in which DEECKE and TAYLOR have put it. The point to be ascertained is no longer, whether the Brāhmī can be derived from an unknown predecessor of the Sabaeen alphabet, but whether it can be derived directly from the actually known Sabaeen characters.

In all attempts at the derivation of alphabets, it is necessary to keep in mind three fundamental maxims, without which no satisfactory results can be obtained:—

(1) For the comparison of the characters to be derived, the oldest and fullest forms must be used, and the originals from which they are derived must belong to the types of one and the same period.

(2) The comparison may include only such irregular equations as can be supported by analogies from other cases where nations have borrowed foreign alphabets.

(3) [11] In cases where the derivatives show considerable differences from the supposed prototypes, it is necessary to show that there are fixed principles, according to which the changes have been made.

If one wishes to keep to these principles in deriving the Brāhmī from Semitic signs, neither the Sabaeen alphabet, nor its perhaps a little more archaic variety, the Lihyanian or Thamudaeen,² will serve the purpose, in spite of a general resemblance in the *ductus* and of a special resemblance in two or three letters. The derivations proposed by DEECKE and TAYLOR do not fulfil the absolutely necessary conditions, and it will probably not be possible to obtain satisfactory results, even if all the impossible equations are given up, and the oldest Indian signs in every case are chosen for comparison. It would be necessary to assume that several Sabaeen letters, such as *Aleph*, *Gimel*, *Zain*, *Teth*, *Phē*, *Qoph*, *Resh*, which show strong modifications of the North-Semitic forms, had been again made similar to their prototypes on being converted by the Hindus into *Ḍ*, *ga*, *ja*, *tha*, *pa*, *kha* and *ra*. In other cases, it would be impossible to show any connection between the Sabaeen and the Indian signs. These difficulties disappear with the direct derivation of the Brāhmī from the oldest North-Semitic alphabet, which shows the same type from Phoenicia to Mesopotamia. The few inadmissible equations which WEBER's earlier attempt contains, may be easily removed with the help of recently discovered forms, and it is not difficult to recognise the principles, according to which the Semitic signs have been converted into Indian ones.

An examination of the old Indian alphabet in plate II. reveals the following peculiarities:—

(1) The letters are set up as straight as possible, and, with occasional exceptions in the case of *ḥa*, *ḥa* and *ba*, they are made equal in height.

(2) The majority consist of vertical lines with appendages attached mostly at the foot, occasionally at the foot and at the top, or rarely in the middle; but there is no case in which an appendage has been added to the top alone.

(3) At the top of the letters appear mostly the ends of verticals, less frequently short horizontal strokes, still more rarely curves on the tops of angles opening downwards, and, quite exceptionally, in *ma* and in one form of *jha*, two lines rising upwards. In no case does the top show several angles, placed side by side, with a vertical or slanting line hanging down, or a triangle or a circle with a pendant-line.

The causes of these characteristics of the Brāhmī are a certain pedantic formalism, found also in other Indian creations, a desire to frame signs suited for the formation of regular lines, and an aversion to top-heavy characters. The last peculiarity is probably due in part to the

¹ MORDTMANN and D. H. MÜLLER, *Sab. Denkmäler* (in DWA. Phil. Hist. Cl. 31), p. 108 f.

² D. H. MÜLLER, *Denkmäler aus Arabien* (DWA. Phil. Hist. Cl. 37), p. 15 ff.

A. — Borrowed signs.

No. 1, A, col. V, = *Aleph*, cols. I, II (WEBER doubtfully), [13] turned from right to left except on the Patnā seal (above, § 3, and pl. II, 1, I), with transposition of the vertical line to the end of the angle. — No. 2, ba, col. V, a, b, c, = *Beth*, cols. I, II (WEBER); the opening of the triangular top produced first a sign like that in col. IV, next the rhombus, col. V, a, and finally the square and the oblong, col. V, b, c. — No. 3, ga, col. V, = *Gimel*, cols. I, II. — No. 4, dha, col. V, a, b, = *Daleth*, cols. I, II (WEBER), set up straight with rounded back (compare the half-angular forms, pl. II, 26, IX, XIX, XXIII, and the triangular, pl. III, 24, VII—XIII), with or without the turn from right to left. — No. 5, ha, col. V, = *He* (WEBER doubtfully), the Siddāpura form, col. V, a, being probably derived from the *He* of col. III, a (Mina of Salmanassar, before B. C. 725), which was turned topsy-turvy and from right to left. The more similar *He* of the sixth century B. C. (col. III, b) cannot be the prototype, because it occurs in the period when the Brāhmī had been developed, and because then the Semitic *Aleph*, *Daleth*, *Cheth*, *Theth*, *Waw*, and *Qoph* had become cursive and had been changed so much that they could no longer have produced the Indian forms. — No. 6, va, col. V, a, b, = *Waw*, col. II (WEBER doubtfully), turned topsy-turvy and with the lower end shut. — No. 7, ja, col. V, = *Zain*, cols. I, II (WEBER); a displacement of the two bars produced the Drāviḍī letter, col. V, a; from this was derived, the letter being made with one stroke of the pen, the *ja* of the northern Brāhmī, col. V, b, with a loop, for which, owing to the use of ink, a dot was substituted in the *ja* of col. V, c. The usual Gīrnār form, col. V, d, was also derived from the Drāviḍa form, the letter being made with two strokes of the pen.

No. 8, gha, col. V, a, b, = *Cheth*, cols. I, II (TAYLOR), the Semitic sign being laid on its side, col. IV (on account of its often sloping position), and the upper horizontal bar being changed into a vertical. — No. 9, tha, col. V, = *Theth*, col. I (WEBER), with the substitution of a dot for the cross in the centre, just as in the Assyrian letter, col. III. — No. 10, ya, col. V, = *Yod* (WEBER), the *Yod* of cols. I, II, being laid on its side, col. IV, the central stroke being lengthened; and, the pendant on the right being turned upwards, hence first the *ya* of col. V, a, and later the cursive forms in col. V, b, c. — No. 11, ka, col. V, a, b, = *Kaph*, the upper side-bar of a form like that in col. II, having been converted into the top of the vertical, and the sign being then set up straight. — No. 12, la, col. V, = *Lamed*, cols. I, II (WEBER), preserved in its original position in the slightly differentiated *l* of the Drāviḍī, col. VI (see below, B, 4, c), and in the Eran form, col. IV, with the *Serif* on the top of the curve, turned from right to left in the usual form of the Aśoka edicts, col. V, a, and turned with a tail on the right, but without the *Serif*, in the Drāviḍī *l*, col. V, b. — No. 13, ma, col. V, = *Mem* (WEBER), derived from a form like that in col. II, with the change of the bent pendant into a loop, as in the hypothetical form in col. IV (analogous development in Euting, TSA. col. 58, a), and with superposition of the angle on the loop, col. V, a (analogous development in Euting, TSA. col. 59, c), whence the cursive form with semicircle at the top in col. V, b. — No. 14, na, col. V, = *Nun* (TAYLOR), the *Nun* in cols. I, II, being turned topsy-turvy as in col. IV, and the hook at the foot being converted into a straight stroke, for which development the *nā*, col. VI, a, formed out of the hypothetical sign by a regularisation of the hook and the addition of a differentiating bar at the top (see below B, 4, d), appears to be a witness.

No. 15, sa, ṣa, cols. V, IV, = *Samekh* (WEBER doubtfully); a *Samekh* like that of col. I, b, being made cursive by the Hindus, as shown in col. IV, and turned topsy-turvy, [14] whereby the Drāviḍa *s*, col. V, was obtained, which originally served both for *s* and *ṣ*. Later, this sign was divided into the signs for the etymologically connected *sa* and *ṣa*. By transferring the cross-bar to the outside of the curve, arose the *sa* of the southern Brāhmī in col. VI, a, and (turned round) that in col. VI, b, while the removal of the bar to the inside of the curve produced the *ṣa* of the same script, col. VI, c. The Drāviḍī adopted the new *sa* for its *s*, and retained the old sign for *ṣ*. The northern Brāhmī developed out of the southern *sa* that with

the curve, col. VI, *d*, and out of this a new *sa*, col. VI, *e*. An immediate derivation of the Drāviḍa *ṣ* from the *Samakḥ* of the sixth century B. C. in col. III. is not possible, for the reasons stated under No. 5, and because the characteristic ancient cross-bar is wanting in it. — No. 16, *E*, col. V, = *Ain*, cols. I, II (WEBER), the Indian sign being changed slightly or not at all in the ancient forms of Kālsī, col. IV. and col. V, *b*, as well as in that of Sāñci and Hāthigumphā, col. V, *a*, but later made triangular, col. V, *c*, *d*, *e*, in order to avoid a confusion with *ḥa* and *dha*. — No. 17, *pa*, col. V, = *Phe*, cols. I, II (WEBER), turned topsy-turvy; in its original position in the Erap form, col. IV; turned sideways in col. V.

No. 18, *ca*, col. V, = *Tsade*, cols. I, II, turned topsy-turvy, the second hook on the right being bent at the same time towards the vertical as in the hypothetical form of col. IV, whence arose, with the turn sideways, the angular or round *ca* of the Brāhmī in col. V, *a*, *b*, and the tailed one of the Drāviḍi, col. V, *c*. — No. 19, *kha*, col. V, = *Qoph*, cols. I, II, turned topsy-turvy with the addition of a curve at the top, col. V, *a*, in order to distinguish the letter from *va*. Owing to the use of ink, the circle at the foot was converted into a dot, col. V, *b*. — No. 20, *ra*, col. V, = *Resh*, cols. I, II (WEBER), the triangular head of the letter being opened and the vertical attached to the base of the former triangle, whence arose the forms in col. V, *a*, *b*, and later the ornamental ones, col. V, *c*, *d*, in which the angles were repeated. — No. 21, *śa*, col. V, = *Shin*, cols. I, II (WEBER), the two angles, standing side by side, being placed the one inside the other, and the sign being then turned topsy-turvy, col. V, *a*, *b*, *c*. The more closely resembling Aramaic *Shin* of the sixth century B. C., col. III, cannot be the prototype of *śa*, for the same reasons as those stated above under No. 5, and is merely an analogous transformation, which the Aramæans, Phœnicians and Ethiopians have made independently at various periods. The older form with two angles has been preserved in the western sign for 100 = *śu* (see my Indian Studies, III², 71, 117). — No. 22, *ta*, col. V, = *Taw*, cols. I, II (WEBER); from a form like that of Sinjirli, col. III, *b*, or the Assyrian of the time of Salmanassar, col. III, *a*, was derived the *ta* of col. V, *a*, *b*, and hence the regularised form of col. V, *c*.

B.—Derivative consonants and initial vowels.

The derivative signs, invented by the Hindus themselves, have been formed by means of the following contrivances:—

(1) One of the elements of a phonetically cognate letter is transposed: (*a*) in *sa* and *śa*, where the cross-bar of the oldest sign has been displaced (see above, A, No. 15); (*b*) in *da*, which has been derived from *dha* (WEBER) by dividing the vertical stroke, and by attaching the two pieces to the upper and lower ends of the curve, whence first the *da* of the Drāviḍi and of the Patnā seal, No. 4, col. VI, *a*, was derived, and, with the turn to the left, the ordinary form of the Brāhmī, No. 4, col. VI, *b*, and further the angular *da*, No. 4, col. VI, *f*.

(2) A borrowed or derivative letter is mutilated in order to obtain one with a similar phonetic value: (*a*) from *da*, No. 4, col. VI, *a*, comes [15] by the removal of the lower end the half round *ḍa* of Kālsī and the later southern inscriptions, col. VI, *c*; similarly, from the angular *da*, col. VI, *g*, the ordinary angular *ḍa*, col. VI, *h*, of the Aśoka edicts (WEBER); (*b*) from *ḥa*, No. 9, col. V, comes *ḥa*, col. VI, *a*, by the removal of the central dot; and from the latter again *ḥa*, col. VI, *b*, is derived by bisection, the round *ḥa* being considered as the product of an unaspirated letter and a curve of aspiration, which appears (see below, 5) in various other letters (WEBER); (*c*) from the triangular *E*, No. 16, col. V, *c*, *d*, *e*, comes the *I* with three dots, col. VI, B, *a*, *b*, *c*, which just indicate the outlines of the older sign (PARNSER), the derivation being suggested by the fact that grammatically *e* is the guṇa-vowel of *i*, for which therefore a lighter form of *e* appeared suitable; (*d*) through a bisection of the lower portion of *va*, No. 6, col. V, *b*, and a straightening of the remaining pendant, is derived *U*, col. VI, *a* (see

my Indian Studies, III², 74), the derivation being suggested by the fact that *u* commonly represents *va* in weak grammatical forms (*saṃprasāraṇa*); (*e*) if the later small circle (pl. IV, 38, VI) is the original form of the Anusvāra, No. 13, col. VI, *a*, *ḥ*, and the dot a cursive substitute, the sign may be explained as a mutilated small *ma*, which has lost the angle at the top, and has been thus treated like the small vowelless consonants appearing in the inscriptions of the first centuries A. D. (see, e. g., pl. III, 41, VIII); compare also the derivation of the Kharoṣṭhi Anusvāra from *ma* (see below, § 9, B, 4).

(3) Short horizontal strokes, which originally, before the change in the direction of the writing, stood on the left, are used to derive the long vowels *Ā*, No. 1, col. VI, and *Ū*, No. 6, col. VI, *d*, from short *A* and *U*. On account of the peculiar shape of *I*, a dot is used instead for the formation of *Ī*, No. 16, col. VI, *B*, *g*.

(4) Short horizontal strokes, originally added on the right, denote a change in the quality of the sounds: (*a*) in *O*, No. 6, col. VI, *f*, *g*, derived from *U*, col. VI, *a* (with the bar in the original and the later position), because grammatically *o* is the guṇa-vowel of *u*; (*b*) in *AI*, No. 16, col. VI, *A*, *b*, derived from *E*, because grammatically *ai* is the vṛddhi-vowel of *e*; (*c*) in the *!* of the Drāviḍi, No. 12, col. VI, from the original form of *la* (*Lamed*), cols. I, II, in which case the bar still stands on the right, because the letter has not been turned; (*d*) in *ṇa*, No. 14, col. VI, *a*, from the original inverted *Nun*, col. IV; compare above under *A*, No. 14; (*e*) in *ṇa* (see my Indian Studies, III², pp. 31, 76; also page 85, below, § 16, C, 12) from *na*, No. 14, col. V, with a displacement of the lower horizontal stroke towards the right, the letter being kept in its original position; (*f*) in *ṇa*, No. 14, col. VI, *b*, from *na*, the bar protruding at both sides of the vertical in order to avoid the identity with *nā*, *ne* and *O*.

(5) The aspiration is expressed by a curve in the *gh* of the Drāviḍi, No. 3, col. VI, formed out of *g*, and in the ordinary Brāhmī *ḍha*, No. 4, col. VI, *d*, from *ḍa*, col. VI, *c*, in *pha*, No. 17, col. VI, from *pa*, col. V, and in *cha*, No. 18, col. VI, *a*; in the last sign the curve has been attached to both ends of the vertical, and this proceeding led to the development of the cursive *cha* of col. VI, *b*. More rarely a hook is substituted for the curve, and then the original sign is mutilated; thus *bha*, No. 2, col. VI, is derived from *ba* by omitting the base-stroke, and *jha*, No. 7, col. VI, from the Drāviḍa *j*, col. V, *a*, by dropping both bars at the ends of the vertical. Both the hook and the curve are cursive substitutes for *ha*, which in the Tibetan alphabet¹ is used again in order to form *gha*, *bha*, &c.

(6) [16] The *ḷa* of the Brāhmī, No. 4, col. VI, *e*, has been derived, by the addition of a small semicircle, for which we have an open angle in Sāñci (pl. II, 41, XVIII), from the half round *ḍa* of col. VI, *c*, the derivation being very probably suggested by the phonetic affinity of *ḍa* to *ḷa*, which two letters are frequently exchanged in Vedic and classical Sanskrit and in the Prakrit dialects.

C.—Medial vowels and absence of vowel in ligatures.

(1)—The system of the Brāhmī.

In accordance with the expressions of the Sanskrit phonologists and grammarians, who take into account the spoken language alone² and who call the *k*-sound *ka-kāra*, the *g*-sound *ga-kāra*, &c., the medial *a* is inherent in all consonants, and consequently medial *ā* is expressed by the stroke which distinguishes *A* from *Ā*.

The other medial vowels are either the full initial vowel-signs or cursive derivatives from them, which are placed mostly at the top or rarely at the foot of the consonants. The identity of the medial *o* with the initial *O* is distinctly recognisable in all letters with verticals at the

¹ AR. 2, plate at p. 400.

² M.M.HASL. 506 ff.

top, as in *ko*, No. 6, col. VI, *h*, *i*, where, on the removal of the dagger-shaped *k* below the second cross-bar, the signs in col. VI, *f*, *g*, reappear; compare also *go* in *mago*, Girnār edict I, line 11, where an initial *O* has been placed above *g*. In the Jaugada edicts, where only the *O* of col. VI, *f*, occurs, the medial *o* has invariably the same form. But in Girnār we have both forms of *o*, though there is only the *O* of col. VI, *g*. Similarly, the full initial *U* is recognisable in the combinations with consonants ending in verticals, as in *ku*, pl. II, 9, V; *du*, 20, VII; *du*, 25, V; *ḍhu*, 31, III, V (compare § 16, D, 4); and in the *dhu* of Kālsī, No. 6, col. VI, *b*: more usually *u* is represented cursorily, either by the horizontal stroke of *U*, as in *dhu*, No. 6, col. VI, *c*, or by its vertical as in *cu*, pl. II, 13, III, and *dhu*, 26, II, &c. Medial *u* is identical with *Ū*, if combined with consonants ending in verticals; elsewhere it is cursorily expressed by two lines, commonly placed horizontally, as in *dhu*, No. 6, col. VI, *e*: but in the later inscriptions we occasionally find the *Ū* of the period used for the medial vowel.¹ Medial *i* was probably at first expressed by the three dots of the initial *I* (*ki*, No. 16, col. VI, B, *d*), which afterwards were joined cursorily by lines and converted into the angle used in most of the Aśoka edicts (*ki*, col. VI, B, *e*). The medial *i* has been developed out of the latter form by the addition of a stroke, indicating that the vowel is long (*ki*, col. VI, B, *f*; see above, under B, 3). In order to express medial *e*, the triangle of the initial *E* has been reduced cursorily first to an angle, open on the left, as in *ge*, pl. II, 11, III, and more commonly to a straight line (*ke*, No. 16, col. VI, A, *a*). In accordance with the form of the initial *AI*, which consists of *E* and a horizontal bar, medial *ai* is expressed by two parallel horizontal strokes (*thai*, No. 16, col. VI, A, *c*).

The absence of a vowel is indicated by interlacing the sign for the consonants immediately following each other, and in such ligatures the second sign is often mutilated; see below, § 16, E, 2. This proceeding appears to be a practical illustration of the term *saṃyuktākṣara*, "a joined or ligature syllable," by which the phonologists and grammarians denote a syllable beginning with more consonants than one.

(2) — The system of the Drāviḍi.

The notation of the medial vowels in the inscriptions of Bhaṭṭiprolu differs from the usual one in so far as medial *a* is marked by the Brāhmī sign for *ā*, and medial *ā* by a horizontal stroke from the end of which a vertical one hangs down; see *ka*, pl. II, 9, XIII; *kā*, 9, XIV. Hence the consonants have no inherent *a*. The device is no doubt of later origin, and has been invented in order to avoid the necessity for ligatures.

§ 5. — The time and the manner of the borrowing of the Semitic alphabet.²

[17] According to the preceding discussion, the great majority of the Brāhma letters agree with the oldest types of the North-Semitic signs, which are found in the archaic Phoenician inscriptions and on the stone of Mesa, incised about B. C. 890. But two characters, *ka* and *ta*, are derived from Mesopotamian forms of *He* and *Taw*, which belong to the middle of the eighth century B. C., and two, *sa-sa* and *ṣa*, resemble Aramaic signs of the sixth century B. C. As the literary and epigraphic evidence leaves no doubt that the Hindus were not unlettered during the period B. C. 600—500, and as the other signs of the Aramaic alphabet of this period, such as *Beth*, *Daleth*, *Waw*, &c., are too far advanced to be considered as the prototypes of the corresponding Brāhma letters, it becomes necessary to regard the seemingly modern forms of *sa*, *ṣa* and *ṣa* as the results of an Indian development, analogous to that of the corresponding Aramaic characters. This assumption, of course, remains tenable only as long as the two Aramaic letters are not shown to be more ancient by new epigraphic discoveries, which event, to judge from the results of the Sinjirli finds, does not seem to be impossible. But, for the present, they must be left out of consideration in fixing the *terminus a quo*

¹ See below, § 24, B, 3; pl. IV, 30, XII, XIV; pl. VII, 30, XII, XX, XXI.

² B. 18. III², 83—91.

for the importation of the Semitic alphabet into India; and this *terminus* falls between the time of the incision of Mesa's inscription and of those on the Assyrian weights, from about B. C. 890 to about B. C. 750, probably a little more towards the lower than towards the upper limit, or, roughly reckoning, about B. C. 800. And various circumstances make it probable that this was actually the time when the Semitic letters became known to the Hindus.

As the *ka* and the *ta* of the Brāhmī are derived from forms of *He* and *Taw* not found in the Phœnician inscriptions but only in Mesopotamia, it appears probable that this is the Semitic country from which the letters were brought over.¹ It agrees with this inference, that the most ancient Indian works speak of sea-voyages in the Indian Ocean at a very early period, and sea-borne trade, carried on by Hindu Vāṇias in the same waters, is mentioned in later, but still ancient, times. The well-known Bāveru Jātaka² bears witness to an early export trade of the Vāṇias to Babylon; and the form of the word, in which the second part *itu* is represented by *eru*, points to its having arisen in Western India, where *ra* is occasionally substituted for *la*, as in the Gīrnār and Shāhbāzgarhī form *Turamaya* for *Ptolemaia*. Several other Jātakas, e. g. No. 463, which describe sea-voyages, name the ancient ports of Western India, Bharukaccha (the modern Broach) and Śūrpāraka (now Supārā), which were centres of the trade with the Persian Gulf in the first centuries A. D. and much later. As according to the Jātakas the Vāṇias started from these towns, it is probable that these trade-routes were used much earlier. Two of the most ancient Dharmasūtras likewise bear witness to the earlier existence of trade by sea in India and particularly on the western coast. Baudhāyana, II, 2, 2, forbids Brahmins to undertake voyages by sea, and prescribes a severe penance for a breach of the rule. But he admits, 1, 2, 4, that the "Northerners," were not strict in this respect. As the other offences of the "Northerners," mentioned in the same passage, such as dealing in wool, selling animals with two rows of teeth, i. e. horses and mules, show, the term applies to the inhabitants of western and north-western India. It naturally follows that the sea-voyages referred to were made to western Asia. The same author, I, 18, 14, and the still older Gautama Dharmasūtra, 10, 33, mention the duties payable to the king on merchandise imported by sea.³ In accordance with my estimate of the age of the Dharmasūtras and of the materials out of which the Jātakas have been made up, I look upon these statements as referring to the 8th—6th centuries B. C.⁴ From still earlier times dates the well-known Vedic myth of the shipwreck of Bhujyu "in the ocean where there is no support, no rest for the foot or the hand," and of his being saved on the "hundred-oared galley" of the Aśvins.⁵ The scene of action must of course lie in the Indian Ocean, and the story points to the inference [18] that the Hindus navigated these waters during the earliest Vedic period. As, in addition, Semitic legends such as that of the Flood and of Manu's preservation by a miraculous fish occur in the Brāhmaṇas,⁶ we have a sufficient number of facts to furnish some support for the conjecture that Hindu traders, who probably learnt the language of the country, just as their modern descendants learn Arabic and Swahili and other African languages, may have imported from Mesopotamia not only the alphabet, but perhaps also other technical contrivances, such as brick-making which was so important for the construction of the ancient Brahmanical altars. With this assumption, which under the circumstances stated appears at least not quite unfounded, the Indian Vāṇias are credited with having rendered the same service to their countrymen which Sambhota or Thon-mi did to the Tibetans, when he fetched the elements of their alphabet from Magadha, between A. D. 630 and 660.⁷

¹ According to BENFAY, *Indien* 254, the Semitic alphabet came to India from Phœnicia; according to A. WEBER, *Ind. Skizzen* 137, either from Phœnicia or from Babylonia.

⁶ OLDENBERG, *op. cit.* 278.

⁷ J.ASE. 57, 41 f.

In any case, it is *a priori* probable that the Vāṇias were the first to adopt the Semitic alphabet;¹ for they, of course, came most into contact with foreigners, and they must have felt most strongly the want of some means for recording their business transactions. The Brahmans wanted the art of writing less urgently, since they possessed, as passages of the R̥gveda show,² from very early times a system of oral tradition for the preservation of their literary treasures.

Nevertheless, the oldest known form of the Brāhmī is, without a doubt, a script framed by learned Brahmans for writing Sanskrit. This assertion is borne out not only by the remnants of the Gayā alphabet of Aśoka's stone-masons, which must have contained signs for the Sanskrit vowels *AI* and *AU*, and which is arranged according to phonetic principles, but also by the influence of phonetic and grammatical principles which is clearly discernible in the formation of the derivative signs. The hand of the phonologist and grammarian is recognisable in the following points: (1) the development of five nasal letters and of a sign for nasalisation in general from two Semitic signs, as well as of a complete set of signs for the long vowels,³ which latter are very necessary for the phonologist and grammarian, but not for men of business, and are therefore unknown in other ancient alphabets; (2) the derivation of the signs for the phonetically very different, but grammatically cognate, *sa* and *śa* from one Semitic sign (*Samekā*); (3) the notation of *U* by the half of *va*, from which the vowel is frequently derived by *samprasāraṇa*; (4) the derivation of *O* from *U* (*o* being the guṇa-vowel of *u*) by the addition of a stroke; of *I* by a simplification of the sign for its guṇa-vowel *E*; of *AI*, the vṛddhi-vowel, from *E* the guṇa-vowel of *I*; and of *ja* from *ḍa*, the former consonant being frequently a substitute for the latter, as in *tīe* for *tḍe*; (5) the non-expression of medial *a*, in accordance with the teaching of the grammarians who consider it to inhere in every consonant; the expression of medial *ā* by the difference between *A* and *Ā*, and of the remaining medial vowels by combinations of the initial ones, or of cursive simplifications of the same, with the consonants, as well as of the absence of vowels by ligatures of the consonants, which apparently illustrate the grammatical term *samyuktākṣara*. All this has so learned an appearance and is so artificial that it can only have been invented by Pandits, not by traders or clerks. The fact that the Vāṇias and the accountants until recent times used to omit all medial vowels in their correspondence and account-books, permits even the inference that an Indian alphabet, elaborated by such men, would not possess any such vowel-signs. And it is immaterial for the correctness of this inference, whether the modern defective writing is a survival from the most ancient period or is due to the introduction of the Arabic alphabet in the middle ages.

A prolonged period must, of course, have elapsed between the first introduction of the Semitic alphabet by the merchants, its adoption by the Brahmans which probably did not take place at once, and the elaboration of the 46 radical signs of the Brāhmī together with its system of medial vowels and ligatures.

As, according to the results of the preceding enquiry, the elaboration of the Brāhmī was completed about B. C. 500, or perhaps even earlier, the *terminus a quo*, about B. C. 800, may be considered as the actual date of the introduction of the Semitic alphabet into India. This estimate is, however, [19] merely a provisional one, which may be modified by the discovery of new epigraphic documents in India or in the Semitic countries. If such a modification should become necessary, the results of the recent finds induce me to believe that the date of the introduction will prove to fall earlier, and that it will have to be fixed perhaps in the tenth century B. C., or even before that.

II. THE KHAROSTHI SCRIPT.

§ 6. — How it was deciphered.

The Indian alphabet running from right to left, the *Kharoṣṭhī lipi*,¹ has been deciphered exclusively by European scholars, among whom MASSON, J. PRINSEP, CH. LASSEN, E. NORRIS, and A. CUNNINGHAM must be particularly mentioned.² The coins of the Indo-Grecian and Indo-Scythian kings with Greek and Prākṛit inscriptions furnished the first clue to the value of the letters. The results, which the identifications of the royal names and titles seemed to furnish, were partly confirmed, partly rectified and enlarged, by the discovery of the Shāhbāzgarhī version of the Aśoka edicts and E. C. BAYLEY's Kāngrā inscription in Brāhmī and Kharoṣṭhī. The characters of the Aśoka edicts are readable with full certainty, with the exception of a few ligatures (see below, § 11, C, 3, 4). Similarly, the inscriptions of the Sakas offer no difficulties, and the new MS. of the Dhammapada from Khotan³ is in general not difficult to read. But considerable portions of the inscriptions of the Parthian Guduphara and of the Kuṣāna kings Kaniṣka and Huvīṣka, still resist the attempts of decipherers and interpreters.

§ 7. — Use and characteristics.

In its form, known to us at present, the Kharoṣṭhī is an ephemeral, chiefly epigraphic, alphabet of North-Western India. The majority of the inscriptions written in Kharoṣṭhī have been found between 69°—78° 30' E. Long. and 33°—35° N. Lat., in the ancient province of Gandhāra, the modern eastern Afghanistan and the northern Pañjāb; and the oldest documents are confined to the districts the capitals of which were Taxila (Shāh-Derī) to the east of the Indus, and Puṣkalāvati or Carsādā (Hashtnagar) to the west of the river. Single inscriptions have turned up further south-west in Bhāwalpur near Multān, south in Mathurā, and south-east in Kāngrā, and single words or letters in Bharahut, Ujjain and Maisūr (Siddāpura Aśoka edicts).⁴ Coins, cameos and MSS. with Kharoṣṭhī characters have been carried much further north and north-east. The period during which, according to the documentary evidence at present available, the Kharoṣṭhī seems to have been used in India, extends from the fourth century B. C. to about the third century A. D., the earliest letters occurring on the Persian *sigloī* (§ 8) and the latest perhaps on the Gandhāra sculptures and the Kuṣāna inscriptions.⁵ As the note in the Fawanshulīn of A. D. 668 (see above, § 1) shows, the Buddhists preserved a knowledge of the existence of the alphabet much longer.

Hitherto, the Kharoṣṭhī has been found (1) in stone-inscriptions, (2) on metal plates and vases, (3) on coins, (4) on cameos, and (5) on a longer known small piece of birch bark from a Stūpa in Afghanistan⁶ and on the Bhūrja MS. of the Dhammapada from Khotan. The latter MS. has probably been written in Gandhāra during the Kuṣāna period. The dialect of its text shows characteristic affinities to that of the Shāhbāzgarhī version of the Aśoka edicts, and

¹ Regarding the name, see § 1 above, and B.I.S. III², 113 f.

³ See the next paragraph.

⁴ B.I.S. III², 47—53; C.A.S.R. 2, 82 ff., pl. 59, 62; 3, 1 ff., pl. 16, 28; W.A.A. 55 ff.; C.OAI. 31 ff.

⁵ B.I.S. III², loc. cit.; the question of the lower limit of the use of the Kharoṣṭhī is difficult on account of the uncertainty regarding the dates of Kaniṣka and his two successors, all of whom S. LÉVI now places in the first cent. A. D. (JA. 1897, I, 1 ff.). The limit given above is based on the assumption that Kaniṣka's dates refer to the Saka era or to the fourth cent. of the Seleucid era. I still make use of it, not because I consider it to be unassailable, but for the reasons stated in WZKM. 1, 169. The letters in the inscriptions of Samvat 200 and 278 or 286 (Hashtnagar image) look more ancient than those of the Kuṣāna inscriptions. According to a communication from Dr. Th. Bloch, Prof. Hoernle has read dates of the fourth cent. of the same unknown Samvat on recently found Gandhāra sculptures.

⁶ W.A.A. pl. 3 at p. 54, No. II; similar twists have been found in other Stūpas, see op. cit. 59, 94, 94, 103; but the fragments in the British Museum, said to belong to them, show no letters.

its characters agree very closely with those of the Wardak vase.¹ On the metal plates and vases, [20] the letters frequently consist of rows of dots, or have been first punched in in this manner and afterwards scratched in with a stylus.² On stone vases they are sometimes written with ink.³

In spite of its frequent utilisation for epigraphic documents, the Kharoṣṭhī is a popular script, destined for clerks and men of business. This is proved by the throughout highly cursive character of the letters, by the absence of long vowels, which are useless for the purposes of common daily life, by the expression of groups of unaspirated double consonants by single ones (*ka* for *kka*) and of unaspirated and aspirated ones by the latter alone (*kāa* for *kkha*), and by the invariable use of the Anusvāra for all vowelless medial nasals.⁴ The discovery of the Khotan MS. makes it very improbable that there existed another form of the script which, being more similar to the Brāhmī in completeness, would have been more suitable for the Brahmanical Sāstras.

§ 8. — Origin.⁵

The direction of the Kharoṣṭhī from right to left made it *a priori* highly probable that its elements had been borrowed from the Semites; and the almost exact agreement of the forms for *na*, *ba*, *ra* and *va* with Aramaic signs of the transitional type induced E. THOMAS to assume a closer connection of the Kharoṣṭhī with this alphabet.⁶ His view has never been disputed; but of late it has been given a more precise form by I. TAYLOR and A. CUNNINGHAM, who assign the introduction of the Aramaic letters into India to the first Akhaemenians.⁷ The reasons which may be adduced for this opinion are as follows: — (1) The Aśoka edicts from the western Pañjāb use for "writing, edict," the word *dipi*, which evidently has been borrowed from the Old Persian, and they derive from it the verbs *dipati*, "he writes," and *dipapati*, "he causes to write;" see above, § 2, B. (2) The districts where Kharoṣṭhī inscriptions occur, especially in earlier times, are just those parts of India which probably were subject to the Persians, be it with or without interruptions, from about B. C. 500 to 331. (3) Among the Persian *sigloi*, there are some marked with single syllables in Kharoṣṭhī and Brāhmī,⁸ whence it may be inferred that they were struck in India during the Persian period, and that the Kharoṣṭhī was current during a great part of the fourth century B. C., certainly before the fall of the Persian empire in B. C. 331. Some considerable variations in the Kharoṣṭhī letters of the Aśoka edicts, as well as the strongly cursive forms of several ligatures, such as *sta*, *spa*, &c. (see below, § 11, C, 2, 3), likewise point to the conclusion that the alphabet had had a long history before the middle of the third century B. C. (4) Recent discoveries in Semitic epigraphy make it extremely probable that the Aramaic, which was used already in Assyria and Babylon for official and business purposes side by side with the cuneiform writing, was very widely spread during the rule of the Akhaemenians. Numerous Aramaic inscriptions of this period have been found in Egypt, Arabia, and Asia Minor, and one even in Persia. Besides, Egypt has furnished a number of official Aramaic papyri, and Asia Minor many coins with Aramaic legends, struck by Persian satraps.⁹ In addition, there is the curious statement in the Book of Ezra, IV, 7, according to which the Samaritans sent to Artaxerxes a letter written in the *Arāmi* script and language. Taking all these points together, there are sufficient reasons to warrant the assertion that Aramaic was commonly employed

¹ See S. v. OLDENBURG, *Predvaritel'nye samjetkac Buddhistskoj rukopisi, napisannoi pismenami Kharoṣṭhī*, St. Petersburg, 1897, and SEMANT, *Acad. des Inscriptions, Comptes rendus*, 1897, 261 ff.

not only in the offices of the satraps, but also in the royal secretariate at Susa. The ultimate cause for the official use of the Aramaic script and language during the Akhaemenian period was, no doubt, that numerous Aramaeans held appointments as clerks, accountants, mint-masters and so forth in the Persian Civil Service. [21] When the Persian empire was rapidly built up on the ruins of more ancient monarchies, its rulers must have found the employment of the trained subalterns of the former governments, among whom the Aramaeans were foremost, not only convenient, but absolutely unavoidable. In these circumstances, it is but natural to assume that, after the full organisation of the administration by Darius, the Persian satraps introduced Aramaean subordinates into the Indian provinces, and thereby forced their Indian subjects, especially the clerks of the native princes and of the heads of towns and villages, to learn Aramaic. At first, the intercourse between the Persian and the Indian offices probably led to the use of the Aramaic letters for the north-western Prākṛit, and later to modifications of this alphabet, which were made according to the principles of the older Indian Brāhmī,¹ and through which the Kharoṣṭhī finally arose. The adoption of the Arabic alphabet, during the middle ages and in modern times, for writing a number of Indian dialects, is somewhat analogous, as it likewise happened under foreign pressure, and as its characters were and are used either without or with modifications. (5) With these last conjectures agrees the general character of the Kharoṣṭhī, which is clearly intended for clerks and men of business; see above, § 7. (6) Finally, they are confirmed by the circumstance that the majority of the Kharoṣṭhī signs can be most easily derived from the Aramaic types of the fifth century B. C. which appear in the Saqqārah and Teima inscriptions of B. C. 482 and of about B. C. 500, while a few letters agree with somewhat earlier forms on the later Assyrian weights and the Babylonian seals and gems, and two or three are more closely allied to the later signs of the Lesser Teima inscription, the Stele Vaticana, and the Libation-table from the Serapeum. The whole *ductus* of the Kharoṣṭhī, with its long-drawn and long-tailed letters, is that of the characters on the Mesopotamian weights, seals and cameos, which re-occurs in the inscriptions of Saqqārah, Teima and the Serapeum. Others² have compared the writing of the Aramaic papyri from Egypt, which partly at least, like the Taurinensis, belong to the Akhaemenian period. But it does not suit so well. Many of its signs are so very cursive that they cannot be considered as the prototypes of the Kharoṣṭhī letters, and its *ductus* is that of a minute current handwriting. Some special resemblances appear to be, on a closer investigation, the results of analogous developments. Taking all these points together, the Kharoṣṭhī appears to have been elaborated in the fifth century B. C.

§ 9. — Details of the derivation.

The subjoined comparative table illustrates the details of the derivation. The signs in col. I. have been taken (with the exception of No. 10, col. I, a) from Euting's *Tabula Scripturae Aramaicae*, 1892, cols. 6, 8, 9, 11 and 12; those in col. II, from the same work, cols. 13, 14, 15, 17, 19, and those in cols. III, IV, from plate 1 of this manual; and all have been reproduced by photolithography.

A. — Borrowed signs.³

Preliminary remarks. — The changes of the Aramaic signs have been caused chiefly by the following principles: (1) by a decided predilection for long-tailed signs with appendages at the upper end, the foot being left free for the addition of *u*, *ra* and the Anusvāra, and by an aversion to appendages at the foot alone; (2) by an aversion to signs with heads containing

¹ WEBER, *Ind. Skizzen*, 144 f.; E. THOMAS, *P.I.A.* 2, 146; C. CAI, 83; and below, § 9, B, 4.

² J. HALÉVY, *J.A.* 1886, 2, 243—267, believes the Kharoṣṭhī to have been derived about B. C. 380 from 16 signs of the papyri and of a Cilician coin, and, *Revue Sémitique*, 1895, 372 ff., from the script of the papyri and of the ostraka from Egypt.

³ B.I.S. III², 99 ff.; compare the more or less differing attempts of E. THOMAS, *P.I.A.* 2, 147; I. TAYLOR, *The Alphabet*, 2, plate at p. 236 ff.; J. HALÉVY, *J.A.* 1886, 2, 252 ff., *Revue Sémitique*, 1895, 372 ff.

more than two lines rising upwards, [22] or with transverse strokes through the top-line, or with pendants hanging down from it,—all of which peculiarities would have been awkward for the insertion of the vowels *i*, *e* and *o*; (3) by a desire to differentiate the signs which, altered according to these principles, would have become identical.

No. 1, *A*, col. III, = *Aleph*, col. I, *a* (Saqqārah), with a cursive change of the head to a curve; the position and the size of the letter make a connection with the forms in col. I, *b*, or col. II, improbable. — No. 2, *ba*, col. III, = *Beth*, col. I, *a*, *b* (Teima, Saqqārah), with a cursive curve for the angle at the right; the cursive forms of the *Beth* of the papyri, [23] col. II, *b*, *c*, are further developed than the Kharoṣṭhī signs. — No. 3, *ga*, col. III, = *Gimel*, derived from col. I. or a similar form (compare col. II, and Euting, TSA. I, *a*), with a cursive loop on the right and a curve on the left; similar loops are common in later ligatures, see pl. I, 33, 35, 36, XII; 34, XIII; and they occur even in *ja*, pl. I, 12, XII. — No. 4, *da*, col. III, = *Daleth*, derived from a form like that in col. II, *b*, which, according to col. I, *a*, occurs already about

B. C. 600 on Assyrian weights. — No. 5, *ha*, col. III, = *He*, derived from a form like that in col. I, *a* (Teima), with the transposition of the pendant in the middle of the curve to the right end of the foot in order to facilitate the insertion of *i*, *e* and *o* (see preliminary remarks, 2, page 20 f., above, and below under No. 17). — No. 6, *va*, col. III, = *Waw*, col. I (Teima, Saqqārah) ; the papyri in col. II, show more advanced forms.

No. 7, *ja*, col. III, *a*, = *Zain*, derived from a form like those in col. I, *a*, *b* (Teima), the left corner being turned upwards still further, whence the usual Kharoṣṭhī letter in col. III, is derived by omitting the stroke at the foot ; the papyri, col. II, show more advanced forms unsuitable for comparison. — No. 8, *śa*, col. III, = *Cheth*, col. I (Teima), the sound of the Indian *śa* being very similar to a palatal *xa*, as in the German *ich*. — No. 9, *ya*, col. III, = *Yod*, derived either from a form like col. I, *b*, or directly from one like col. I, *a* (Assyrian weights), with the omission of the bar on the right (see preliminary remarks, 1) ; analogous forms occurring in later Palmyranian and Pahlavi (E.T.S.A. cols. 21—25, 30—32, 35—39, 58). — No. 10, *ka*, col. III, = *Kaph*, derived by a turn from right to left from col. I, *b* (Assyrian weights, Babylonian seals, etc.), and with the addition of a top-stroke, in order to distinguish the new sign from *la* (No. 11, col. III) and from *pa* (No. 15, col. III) ; the signs of the papyri, col. II, differ entirely. — No. 11, *la*, col. III, = *Lamed*, a form like those in col. I, *a*, *c* (Teima) being turned topsy-turvy owing to the aversion to signs with appendages at the foot alone (preliminary remarks, 1), and the curved line being broken and attached lower in order to distinguish the new letter from *A*.

No. 12, *ma*, col. III, *a*, *b*, = *Mem*, derived from a form like that in col. I, *a*, *b* (Saqqārah) with a curved head, by the omission of the transverse line and a rudimentary indication of the vertical standing originally on the right, whence comes the semicircular ordinary *ma* of the Aśoka edicts, col. III, *c*, still more mutilated on account of the vowel-signs ; the forms of the *Mem* of the papyri, col. II, are unsuited to be considered the prototypes of the Kharoṣṭhī *ma*. — No. 13, *na*, col. III, *a*, = *Nun*, col. I, *a*, *b* (Saqqārah), a later derivative being the *na* of col. III, *b* ; the *Nun* of the papyri, col. II, is again unsuited for comparison. — No. 14, *sa*, col. III, = *Samekh*, col. I (Teima), with transposition of the slanting bar to the left end of the top-stroke from which it hangs down, and with connection of its lower end with the tail of the sign, which has been pushed forward towards the left (see the figures in B.I.S. III², 105) ; analogous developments appear in Nabataean (E.T.S.A. cols. 46, 47) and in Hebrew. — No. 15, *pa*, col. III, *a*, = *Phe*, col. I (Teima), turned from right to left to distinguish it from *A* ; in the more usual *pa* of col. III, *b*, the curve has been pushed lower down. — No. 16, *ca*, col. III, = *Tsade*, derived from an acute-angled form like col. I, *a*, *b* (Teima), with the omission of the second hook on the right (see preliminary remarks, 2) and with the development of a hook below the head, because the vertical was made separately ; the analogous *Tsade* of col. II, *b*, has been developed, because the right stroke of the head was made separately and drawn to the vertical.

No. 17, *kha*, col. III, = *Qoph*, derived from a form like col. I, *a*, *b* (Serapeum) with the conversion of the central pendant into an elongation of the top-stroke on the left ; similarly, the pendant has been transferred to the right end of the letter in the Teima form (E.T.S.A. col. 10). — No. 18, *ra*, col. III, = *Resh*, col. I, *a*, *b* (Saqqārah), with complete removal of the angular protuberance on the right. — No. 19, *śa*, col. III, = *Shin*, col. I (Teima), turned topsy-turvy owing to the aversion to tops with more than two strokes rising upwards (preliminary remarks, 2), and with a lengthening of the central stroke owing to the predilection for long-tailed signs. — No. 20, *ta*, col. III, = *Taw*, derived from a form like that in col. I, *a* (Assyrian weights) or in col. I, *b* (Saqqārah), with the transposition of the bar to the top of the [24] vertical, as in col. II, *a*, the new sign at the same time being turned from right to left in order to avoid the resemblance to *pa* (No. 15), and being broadened in order to distinguish it

from *va* and *ra* (Nos. 6, 18); the older form and the intermediate steps appear in *tha* (No. 20, col. IV, *a*) and *ṭa* (No. 20, col. IV, *b*) where the original *Taw* has been preserved, and in *ṭa* (No. 20, col. IV, *c*) where the bar stands at the top; compare below, B, 1, *c*, and B, 2.

B. — Derivative signs.

(1) Aspiration. — The aspiration is expressed by the addition of a curve or a hook, which probably represent a cursive *ha* (TAYLOR), and for which cursively a simple stroke appears; at the same time, the original *mātrkā* is sometimes simplified. — (*a*) A curve or a hook is added to the right of the vertical of *ga* in *gha*, No. 3, col. IV, to the top of *da* in *dha*, No. 4, col. IV, *a*, and to the end of the second bar of *ṭa*, No. 20, col. IV, *c*, from which it rises upwards, in *ṭha*, No. 20, col. IV, *d* (properly *ṭho*). — (*b*) A hook, a curve, or cursively a slanting stroke, appears to the right of *ba* in *bha*, No. 2, col. IV, *a, b*, the head of *ba* being converted at the same time into a straight line and pushed somewhat more to the left, in order to avoid the identity with *ka*, No. 10, col. III. — (*c*) In the following aspirates appear only cursive straight strokes, added on the left in *jha*, No. 7, col. IV, and *pha*, No. 15, col. IV, and on the right in *cha*, No. 16, col. IV, *dha*, No. 4, col. IV, *c*, and *tha*, No. 20, col. IV, *a*, all of which letters show, however, additional peculiarities. In *cha*, the little pendant on the left of *ca* has been made horizontal and combined with the stroke of aspiration to a cross bar. In *dha*, the head of *da* has been flattened into a straight line. *Tha* has been formed out of the ancient Aramaic *Taw*, No. 20, col. I, *a*, turned from right to left, and the stroke of aspiration continues the bar of *Taw* towards the right.

(2) Linguals. — *ṭa* has been formed out of the older *Taw*, turned from the right to the left, by the addition of a short bar, which in the Aśoka edicts usually stands on the right and lower than that on the left, as in No. 20, col. IV, *b*. In col. IV, *c*, the sign of lingualisation stands on the left, below the *ṭa* with the bar at the top. This form of *ṭa*, which appears rarely in the Aśoka edicts, must formerly have been common, as the *ṭha* has been derived from it (see above, B, 1, *a*). The *ḍa* of No. 4, col. IV, *b*, exactly resembles the common Aramaic *Daleth* in col. I, *b* (Teima) and may be identical with it. If the alphabet imported into India contained two forms for *ḍa* (col. I, *a, b*), both may have been borrowed, and the more cumbersome one may have been used for the expression of the fuller sound. It is, however, also possible that the *ḍa* has been formed out of the *da* of No. 4, col. III, *a*, by the addition of the bar of lingualisation, placed vertically on the right. The *ṇa*, No. 13, col. IV, *a*, is likewise derived from *na*, col. III, *a, b*, by the addition of a straight stroke going downwards; compare what has been said above, § 4, B, 4, regarding the use of a short stroke for denoting the change of the quality of a borrowed or derivative sign in forming the *Ḍi*, *O*, *ṇa*, *ṇa* and *ṇa* of the Brāhmī.

(3) The palatal *ṇa*, No. 13, col. IV, *b, c*, consists of two *na* (col. III, *a*)-joined together (E. THOMAS), and illustrates the modern Indian name for *ṇa* and *ṇa*, which the Pandits often call the big *nakaras*. The sign, which is really not necessary for a clerk's alphabet, has perhaps been framed only because it existed in the Brāhmī, the Pandit's alphabet.

(4) Medial vowels, absence of vowel in ligatures, and Anusvāra. — Long vowels are not marked, and *a* inheres, just as in the Brāhmī, in every consonant. Other vowels are marked by straight strokes. In the case of *i*, the stroke passes through the left side of the top-line or top-lines of the consonant; in *u*, it stands to the left of the foot; in *e*, it descends on the left side of the top-line; in *o*, it hangs down from this line, see *ṭho*, No. 20, col. IV, *d*; for further details see below, § 11, B. Joined to *A*, the same strokes form *I*, *U*, *E* and *O* (No. 1, col. IV, *a—d*). The absence of a vowel between two dissimilar consonants, except nasals, is expressed, as in the Brāhmī, by the combination of the two signs into a ligature, in which the second letter is usually connected with the lower end of the first. But *ra* stands invariably at the foot

of the other consonant, whether it may have to be pronounced before or after it. Double [25] consonants, except nasals, are expressed by single ones, and non-aspirates and aspirates by the aspirates alone. Nasals immediately preceding other consonants, are always expressed by the Anusvāra, which, in the Aśoka edicts, is attached to the preceding *mātrkā*.

The non-expression of *a*, and the rules regarding the formation of the ligatures, no doubt, have been taken over from the Brāhmī, only minor modifications being introduced. And it seems probable that the use of straight strokes for *i*, *u*, *e* and *o* comes from the same source. For, already in the Brāhmī of all the Aśoka edicts, *u*, *e* and *o* are either regularly or occasionally expressed by simple strokes, and in Gīrnār *i* is represented by a shallow curve, often hardly distinguishable from a straight stroke; moreover, *i*, *e* and *o* stand in Brāhmī, just as in the Kharoṣṭhī, at the top of the consonants, and *a* at the foot. A connection of the two systems of medial vowel-signs is therefore undeniable, and that of the Brāhmī must be regarded as the original one, since its signs, as has been shown above, § 4, C, 1, evidently have been derived from the initial vowels.

The notation of *I*, *U*, *E* and *O* by combinations of *A* with the medial vowel-signs is peculiar to the Kharoṣṭhī, and is attributable to a desire to simplify the alphabet. Among the later Indian alphabets, the modern Devanāgarī offers an analogy with its *ई* and *औ*, and the Gujarātī with its *ઐ* *E*, *ઔ* *AI*, *઒* *O*, and *ઑ* *AU*. Several among the foreign alphabets derived from the Brāhmī, as e. g. the Tibetan, show the principle of the Kharoṣṭhī fully developed.

The Anusvāra, which is used, as in the Brāhmī, for all vowelless nasals, is derived from *ma* (E. THOMAS). In *maṃ*, No. 12, col. IV, it still has the full form of *ma*, but usually it undergoes cursive alterations; see below, § 11, B, 5.

§ 10. — The varieties of the Kharoṣṭhī of Plate I.¹

According to plate I, the Kharoṣṭhī shows four chief varieties, viz.: — (1) the archaic one of the fourth and third centuries B. C., found in the Aśoka edicts of Shāhbāzgarhī (photolithograph of edict VII. in ZDMG. 43, 151, and of edict XII. in EI. 1, 16) and of Mansehra (photolithograph of edicts I—VIII. in JA. 1888, 2, 330, = SENART, Notes d'Épigraphie Indienne, 1), with which the signature in the Aśoka edicts of Siddāpura (photolithographs in EI. 3, 138—140), the legends on the oldest coins (autotypes in C.CAI. pl. 3, Nos. 9, 12, 13) and the syllables on the Persian *sigloi* (autotypes in J.RAS. 1895, 865) fully agree.

(2) The variety of the second and first centuries B. C. on the coins of the Indo-Grecian kings, which is imitated by some later foreign kings (autotypes in P. GARDNER's Catalogue of Indian Coins in the British Museum, pl. 4—21).

¹ Preparation of PLATE I: —

1—37, cols. I—V, and 38, 39, cols. I—XIII, traced by DR. DENEKIND from DR. BURNES' impressions of the Aśoka edicts of Shāhbāzgarhī and Mansehra, and reduced by photography.

1—37, cols. VI, VII, and 38, 39, col. XIV, drawn by DR. W. CARTELLIERI from P. GARDNER's autotypes of Indo-Grecian coins.

1—37, cols. VIII, IX, and 22—25, col. XIII, traced from DR. BURNES' impressions of the Mathurā lion capital and the photograph of the Taxila copper-plate of which a collotype has since then been published in EI. 4, 53 (10 and 14, col. VIII, and 25, col. XIII).

1—37, cols. X—XII, and 31—37, col. XIII, traced or drawn according to DR. HOMBOLDT's facsimile of the Sūc Bihār inscription, supplemented by some signs from the Manikyāla stone and gelatine copies of the Wardak and Bimāran vases by DR. S. VON OLDENBURG.

23—30, col. XIII, drawn according to P. GARDNER's autotypes of the older Kuṣāna coins.

1—20, cols. XIII, XIV, numerals drawn according to the impressions and facsimiles of the Aśoka edicts and later inscriptions.

Older tables of the Kharoṣṭhī alphabet, in P.I.A. 2, 166, pl. 11; W.A.A. 262; C.I.A.(CH. 1), pl. 27; P. GARDNER, Cat. I. C. Br. Mus. p. LXX. f.; VON SALLER, Nachfolger Alex. d. Gr. (end); G. H. OSWA, The Ind. Pal. pl. 26.

(3) The variety of the Saka period, first century B. C. to first century A. D. (?), on the Taxila copper-plate of Patika (lithograph in J.RAS. 1863, 222, pl. 3, and collotype in EI. 4, 56), and on the lion-capital of the satrap Sodāsa or Sudasa from Mathurā, which occurs also on some sculptures from Gandhāra (autotype in J.ASB. 58, 144, pl. 10; Anzeig. phil. hist. Cl. WA. 1896), on the Kaldawa stone (WZKM. 10, 55, 327) and on the coins of several Saka and Kuṣāna kings (autotypes, P. GARDNER, op. cit., pl. 22—25).

(4) The strongly cursive script of the first and second centuries A. D. (?), which begins with the Takht-i-Bahi inscription of Gondopherres (autotype in JA. 1890, I, = S.NEI. 3, pl. 1, No. 1) and is fully developed in the inscriptions of the later Kuṣāna kings Kanishka and Huviṣka (autotype of the Zeda inscription in JA. 1890, I, = S.NEI. 3, pl. 1, No. 3, of the Manikyāla stone, JA. 1896, I, = S.NEI. 6, pl. 1, 2, of the Suś Bihār inscription, IA. 10, 324, lithograph of the Wardak vase, J.RAS. 1863, 256, pl. 10),¹ and occurs also in the MS. of the Dhammapada from Khotan; see above, § 7.

§ 11. — The archaic variety.²

A. — The radical signs.

(1) [26] A small stroke, rising upwards at an acute angle, may be added at the foot of every letter ending with a straight or slanting line, in order to mark its end (plate I, I, II; 6, II, V; 7, II; 8, II; &c). If a letter ends with two slanting lines, like *ya* and *śa* (34, II), the upstroke may be added to the left. In the Aśoka edicts of Mansehra, *ḍa* receives instead occasionally a straight base-stroke (18, V).

(2) *Ca* has three varieties, (a) head with obtuse angle (10, I, II, IV); (b) head with curve (10, V); (c) head with curve, connected by a vertical with the lower part (10, III). — (3) The head of *cha* is likewise sometimes angular (11, I, IV) and sometimes round (11, II), and loses occasionally the cross-bar below the head, as in the later types. — (4) The full form of *ja* occurs at least once in Shābbāzgarhī (12, I, V) and oftener in Mansehra, where once (edict V, l. 24) the bar stands to the left of the foot. The left side-stroke of *ja* is often curved (12, III). — (5) In *ṇa*, the second shortened *na* (see above, § 9, B, 3) is sometimes added on the right (14, I, V) and sometimes on the left (14, III, IV). Occasionally, the right side of the letter is converted cursively into a vertical, as in the later inscriptions (14, IX).

(6) The normal form of *ṣa* is that of 15, I, II; but the bar on the left stands occasionally lower than that on the right (15, V; 38, II), or both bars stand on the left (38, VI), or the bar on the right is omitted (commonly in Mansehra) (15, III).

(7) *Ta* (20) is mostly shorter and broader than *ra* (31), and either its two lines are of equal length, or the vertical one is shorter. Forms like 20, V, are rare. — (8) *Di* (22, II) shows twice, in Shābbāzgarhī edict IV, l. 8, and Mansehra edict VII, l. 33 (where the transcript in ZDMG. has erroneously *dri*), a curve to the right of the foot, which is probably nothing but an attempt to clearly distinguish *da* from *na*. — (9) *Dha* with the left end turned upwards (23, V) is rare and a secondary development (see above, § 9, B, 1). In the abnormal *dha* of 38, VIII (*dhra*), from Mansehra, the second bar is a substitute for a very sharp bend to the left (23, V). — (10) The *na* with the bent head (24, III) occurs not rarely in the syllable *ne*.

¹ Other facsimiles of Kharoṣṭhī inscriptions: — (1) Aśoka edicts in J.RAS. 1856, 153; C.IA (CII. 1), pl. 1, 2; C.ASE. 5, pl. 5; S.I.P. 1 (end); IA. 10, 107; — (2) later inscriptions in P.I.A. 1, 98 (pl. 6), 144 (pl. 9), 162 (pl. 19); W.A.A. 54 (pl. 2), 232; C.ASE. 2, 124 (pl. 59), 160 (pl. 63); 5, pl. 16, 28; J.RAS. 1863, 222 (pl. 3), 238 (pl. 4), 250 (pl. 9), 258 (pl. 10), and 1877, 144; J.ASB. 28, 57; 31, 176, 532; 39, 65; IA. 18, 257; S.NEI. Nos. 3 (JA. 1890, I, pl. 1, No. 2) and 5 (JA. 1894, II, pl. 5, Nos. 34, 36): all useless except the last three.

² Compare ZDMG. 43, 128 ff., 274 ff.

(11) The greatly mutilated *ma* (29, I) is more common than the forms with remnants of the old pendant (compare above, § 9, A, No. 12). It appears invariably in connection with vowel signs and owes its existence to such combinations.

(12) *La* with a curve on the left, as in the later inscriptions (32, VIII), is rare in the Aśoka edicts, but occurs in Mansehra edict VI, l. 29.

(13) The cursively rounded *sa* of 34, III, is rare; but once, in Shāhbāzgarhī edict XIII, l. 1, appears a *sa* hardly distinguishable from *ya*. — (14) The *sa* with a triangular head (36, II), and that with a rounded head (36, I, III, IV), are cursive developments from the old polygonal form (36, V). The vertical stroke of *sa* is occasionally omitted, as in Mansehra [27] edict VI, l. 27.

(15) The common forms of *ha* with a curve (37, I, IV) or a short hook (37, III, V) at the foot, are cursive developments of the *ha* of 37, II; see above, § 9, A, No. 5.

B. — Medial vowels and Anusvāra.

(1) The *i*-stroke goes regularly across the left side of the horizontal strokes of the consonants (6, III; 7, III; 15, II, III; &c.); in letters with two horizontal or slanting top-strokes, it passes through both (14, III; 16, III; 38, III, VI; &c.), likewise through both the top-strokes of *ṇa* (19, X). In *i* (2, I), *di* (22, II), and *ni*, it stands just below the head, and in *yi* (30, II) it hangs in the left side.

(2) The *e*-stroke corresponds in form and position to the upper half of the *i*-stroke (4, I; 6, IV; 12, II; 19, III; &c.); in *E* (4, II) it may also stand straight above the head of *A*.

(3) The *o*-stroke mostly corresponds in its position to the lower half of the *i*-stroke (5, I; 12, IV; 14, IV; &c.), but it stands further to the right in the angle, formed by the upper part of the letters, in *go*, *gho* (9, II) and *so* (36, IV).

(4) The *u*-stroke stands regularly at the left lower end of the consonant (3, I; 8, III; 10, IV; 12, III; &c.), but a little higher up if the foot of the consonant is curved to the left (*U*, 3, II), or to the right (*du*, 22, IV), or has a hook on the right (*pru*, 25, V; *hu*, 37, IV). In *mu* it stands to the left of the top of *ma* (see *mru*, 29, V).

(5) The Anusvāra has the full form of *ma* (see above, § 9, B, 4) only occasionally in *mam* (29, IV). More commonly it is represented cursively by a straight stroke as in *mam* (38, XI), or by two hooks at the sides of *ma* as in *mam* (38, X). In combination with other consonants ending in a single slanting or vertical line, the Anusvāra is marked by an angle, opening upwards, which the foot of the consonant bisects (8, IV; 11, IV; 17, V; 19, V; &c.), or, rarely in Shāhbāzgarhī, oftener in Mansehra, by a straight line, a substitute for the curve of *ma*, as in *tham* (21, V). If the foot of the consonant has some other appendage, the Anusvāra is attached higher up to the vertical, as in *ṇam* (14, V); *ḍam* (18, V); *vram* (33, V); *ham* (37, V). The angular Anusvāra is always divided in *yam* (30, V) and in *ṣam*, and the one half is added to the right end of the *mātrkā*, and the other to the left. This may also be done in *kam* and in *bham* (28, IV).

C. — Ligatures.

(1) *Bhye* (38, IX), *mma* (38, XII) and *nuya* (38, XII, b) show no changes or only very slight ones in the combined letters. In other cases, one or the other is usually mutilated.

(2) For *ra*, which must be pronounced sometimes before and sometimes after its *mātrkā* (exception in *rṣa* in Mansehra edict V, l. 24), appears, besides slightly mutilated forms (in *rṣi*, 38, IV, and *rva*, 39, I), (a) a slanting line, with or without a bend, which goes through the middle of the vertical of the combined consonant (as in *gra*, 38, I; *rṣa*, 38, II; *rṣi*, 38, III); (b) also a curved or straight stroke at the foot of the combined sign (*rṣi*, 38, V; *kra*, 6, V; *gra*, 8, V; *tra*, 20, V; *dhra*, 23, V; 38, VIII; *pru*, 25, V; *brā*, 27, V; *vram*, 33, V; *śru*, 34, V; *śri*, 39,

VIII, IX). In combination with *ma*, the *ra*-stroke stands invariably at the right top, as in *mrū* (29, V), and in *kra* and *bkra* (28, V), occasionally at the right end of the hooks of those letters. Sometimes, especially in Mansehra, a curve open above, as in *thra* (21, IV), is substituted for the straight stroke. The stroke and the curves, of course, are cursive substitutes for a full *ra*, attached to the foot of the combined consonants.

(3) In *vrū* (39, II) the two consonants have been pushed the one into the other, so that the vertical does duty both for the *va* and the *ra*. The same principle is followed in the formation of the ligature *sta* (which consists only in Shāhbāzgarhī edict I, l. 2, *srestamati*, of *sa* with a *ta* hooked into the vertical, 39, IV). At the same time *sa* is mutilated, the middle of its top remaining open and the hook on the left being omitted. This is clearly visible in *sti* (39, V) and *stri* (39, IX), while *sta* (39, III), *sti* (39, VI), *stu* (39, VII), and *stri* (39, VIII) are made more negligently. The ligature of *sa* and *pa* is formed according to [28] the same principles, but the *sa* is mutilated still more and merely indicated by a little hook at the top of the vertical of *pa* in *sapa* (39, X) and *spi* (39, XII).¹ In *sya* (39, XI) the hook stands on the side-limb of *pa*.

(4) The ligature in 38, VII, seems to have two different meanings. In Shāhbāzgarhī edict X, l. 21, the sign appears in the representative of the Sanskrit *tadātrāya*, which in the dialect of the Aśoka edicts might be either *tadāttrāye* or *tadattāye*, and in Mansehra it occurs frequently in the representative of the Sanskrit *ātman*. As the Kuṣāna inscriptions offer a similar sign (31, XIII) in the representative of the Sanskrit *sātvanām*, we have probably to read *tva* in Shāhbāzgarhī edict X, l. 21, and to assume that the curve at the foot of *ta* represents a *va*, just as it stands in *thra* (21, IV) for the similar *ra*. This explanation is confirmed by the ligatures 30, XIII, and 37, XIII, which most probably are equivalent to *śva* (*śvara*) and *śva* (*śharasvamini*). In Mansehra (especially edict XII) the sign 38, VII, has to be read *tma*.²

§ 12. — Changes in the later varieties.³

A. — The radical signs.

(1) The meaningless upward stroke connected with the foot of the verticals occurs only occasionally on the Indo-Grecian coins (7, VI; 20, VI; 36, VI). More frequently it appears detached to the left of the signs, as in *A* (1, VI), and even with *ka* (37, VI). A cursive substitute is the very common dot, as in *ka* (37, VII); compare also *ma* (29, VII). Finally, various letters, like *ta* (20, VII) and *na* (24, VII), receive on the Indo-Grecian coins a horizontal base-line (see above, § 11, A, 1). In the variety of the Saka period, the ends of the verticals show sometimes a meaningless hook, as in *ca* (10, VIII) and in *sa* (36, IX), or a straight stroke on the right, as in *si* (35, VIII). The same hook appears also in the cursive script of the Kuṣāna period (*sa*, 35, X), or a horizontal stroke to the left, as in *A* (1, XI), *ka* (6, X), *dka* (23, XI), *na* (24, XII), *bi* (27, XI), *ya* (30, X), as well as curves both to the right and left, as in *kha* (7, X), *ca* (10, XII), *dhi* (16, XI), *ghi* (9, X), *ba* (27, X), *mi* (29, XI), where the curve has been added to the vowel-stroke.

(2) In the Saka and Kuṣāna varieties, the head of *ka* is commonly converted into a curve (6, VIII), and in the Kuṣāna variety this curve is connected with the side-limb of *ka*

¹ O. FRANKF., Nachr. Gött. Ges. d. Wiss., 1895, 540, and ZDMG. 50, 803, proposes to read *fa* and *fi* for the signs which I read *sapa* and *spi*.

² The MS. of the Dhammapada shows this same sign both in the terminations of the absolutes in *tva* (*ttvā*) and in *ātma* (*ātman*), and thus further confirms the explanation proposed.

³ Regarding the characters on the Indo-Grecian coins, see WZKM. 8, 193 f.; regarding the script of the Saka and Kuṣāna inscriptions, see J.E.A.S. 1863, 238, pl. 4 (where, however, in l. 1 the second *ch* must be deleted, in l. 2 *sa* must be substituted for *si*, and *pha* for *ff*, and in l. 3 *ya* for *vi*, and the signs for *sy* in l. 4 are doubtful), and O. FRANKF., ZDMG. 50, 602 f.

(see 6, X). — (8) In all the later varieties, the top of *kha* is made longer and curved to the right (7, VI—XI; 39, XIV).

(4) In the Saka type, we have a cursive form of *ca*, derived from 10, III, in which the left end of the lower portion of the sign is attached to the short vertical below the top. Similar, still more cursive forms are common in the Kuṣana variety; see 10, X, and XII. — (5) All the later varieties show the *cha* without the cross-bar, and the vertical is occasionally made to slant so that the sign looks like *ma*. — (6) In the later varieties, the left side-limb of *ja* is nearly always rounded, and in the Kuṣana variety the head of the sign often consists of a shallow curve, from the left end of which the vertical hangs down (12, XI). Hence is developed the looped *ja* (12, XII) of the Bimāran vase. The full *ja* with the bar across or to the left of the foot occurs on the Indo-Grecian coins (12, VII). — (7) In all the later varieties, one side of *na* invariably shows a vertical (14, VIII, IX).

(8) The only known *ja* of the Saka period in the ligature *ste* (22, XIII) shows the archaic form with one bar on the left; compare 15, III. In the Kuṣana variety, the two bars to the right and left (15, I) are converted into a straight line, whereby *ja* becomes *tha* (15, X—XII). The small strokes at the top of *ju* (15, XI) are, as FLEET'S impression of the Sūś Bihār inscription shows, due to rents in the copper. The correct reading of the word, in which it occurs, is *kufubini* instead of *kichubini* (HOERNLE). — (9) In all [29] the later varieties, *tha* (16, VIII, X, XI) loses the hook at the end of the second bar.

(10) On the Indo-Grecian coins, *ta* (20) is very similar to *ra*; in the Saka inscriptions, it is only one-third of the size of *ra*, and in the Kuṣana variety the two letters are again very similar. — (11) The Saka *da* of *do* (22, IX) is derived from the form 22, II, while the signs 22, VIII, and X, come from the ordinary *da* of the Aśoka edicts. The Kuṣana form (22, XI) shows an inverted curve at the head.

(12) The inscription of Gondopheres, and some coins of that king and of Azilises (P. GARDNER, Cat. Ind. C. Br. Mus. p. 94, No. 22), show — the first in the king's name — a peculiar sign (26, X) usually read *pha*, but possibly meant for *ja*, as O. FRANKÉ proposes, ZDMG. 50, 603. — (13) In the Kuṣana variety, the right end of the horizontal top of *sha* is occasionally connected with the vertical (28, X), and sometimes the top-stroke is connected with the side-limb, just as in *ku* (6, XI). — (14) The fuller *ma* (29, VI) is common on the Indo-Grecian coins, and for its slanting stroke the later coins often show a dot (29, VII). In the *ma* of the Saka and Kuṣana varieties (29, IX, XII), *ma* is laid on its side, the right part of the semicircle rises high up, and the left is bent downwards; compare the late *muṃ* (33, XIII).

(15) In the Kuṣana inscriptions, *ya* often becomes a curve or rhombus-like figure, open below (30, XI, XII). — (16) In the later varieties, the left limb of *la* (32, VIII, X) is invariably round, and in the Kuṣana type it is often attached to the top of the vertical (32, XI, XII). — (17) In later times, the head of *va* (33, VIII, X) is invariably rounded.

(18) Equally, *śa* (34, VIII, X) is often made round and similar to *ya*. — (19) In later times, *sa* (36, VII—XI) invariably loses the line connecting the left side of the head with the tail, and the new form becomes in the Kuṣana inscriptions often highly cursive; see 36, XII.

B. — Medial vowels and Anusvāra.

(1) Medial *i* often crosses the vertical low down; see *i* (2, VII, VIII, X), *di* (22, XI), *ni* (24, XI), &c.; and in the Kuṣana variety it gets a hook in *mi* (29, XI). Medial *o* likewise is occasionally attached low down to the vertical, see *ro* (31, XI); *ho* (37, XII).

(2) The *e*-stroke stands in *E* invariably on the right of the *Δ* (4, VI—VIII), and it may sink down as low as the foot. The short stroke is then converted into a long bent line (4, X,

XII) or receives a hook at the end (4, XI). Occasionally *e* stands also at the foot of other letters, as in *śe* (34, IX, Mathurā lion-capital).

(3) On the Indo-Grecian coins, medial *u* keeps its old form; but in *ju* (12, VII) the stroke rises upwards on account of the base-line of *ja*, likewise in *pu* (25, VII) on account of the bend in the *pa*. In later times, *u* is represented by a curve or a loop, as in *U* (3, VIII), *ku* (6, XI), *khu* (7, XI), &c.; in *mu* (29, IX, XII), the curve opens to the right.

(4) The Anusvāra is marked by a *ma*, laid on its side, which either is connected with its *māṭṭkā*, as in *Aṃ* (1, VII), *Iṃ* (2, VII), *thiṃ* (16, XI), or stands separate to the left, as in *yaṃ* (30, VII), or may be placed below (see *mahantasa* in the Taxila copper-plate, line 1).

C. — Ligatures.

(1) The ligatures of the Indo-Grecian coins, such as *kra* (6, VII), *kāre* (39, XIV), *stra* (38, XIV), and those of the Saka inscriptions, *śte* (22, XIII), *khsa* (25, XIII), *sta* (23, XIII), show only small changes. The same remark applies to the ligatures on the coins of the Sakas and the older Kuṣānas, where, however, some new groups appear, such as *psa* (26, XIII), *rma* (28, XIII; compare the shape of *ma* in P. GARDNER, op. cit., pl. 25, 1, 2), *śpa* (29, XIII), which has been mostly misread *spa* on account of the Greek Spalyrises, *śva* (30, XIII) with the *va* turned into a curve (see above, § 11, C, 4), and the doubtful representative of *dphi* (27, XIII) in *Kadphises*, the upper part of which is plainly *pi*, while the lower one does not correspond to any known letter.

(2) Among the ligatures of the cursive Kuṣāna inscriptions, some, like *gra* (8, XI), *bhra* (28, XII), exactly agree with the archaic forms, and [30] during this period we still find even the old *vra* (*rva*) (39, I) in the word *sarva*. The ligatures *tra* (31, XIII), *tāa* (32, XIII), often misread as *tāa*, *śka* (35, XIII), and *śfu* (36, XIII), show the new Kuṣāna forms of the component parts. But the *sa* of *śva* (37, XIII) is badly mutilated, and the loops of *rya* (34, XIII), *rva* (33, XII), *śya* (35, XII), and *śya* (36, XII)¹ are new cursive formations. In all words where one would expect *sta*, the Kuṣāna inscriptions show *tha* (16, X, XI). Probably the omission of the bar on the right (compare 23, XIII) is merely cursive, and the sign has to be read both *tha* and *sta*, as the case may require. The MS. of the Dhammapada has both signs.

III. THE ANCIENT BRAHMI AND DRAVIDI FROM ABOUT B. C. 350 TO ABOUT A. D. 350.

§ 13. — How it was deciphered.

The first scholar who read, in 1826, an inscription in the oldest Brāhma characters, the legend on the coins of the Indo-Grecian king Agathocles, was CH. LASSEN.² But the whole alphabet was deciphered by J. PRINSEP in 1837-38.³ His table⁴ is, with the exception of the signs for *U* and *O*, quite correct, as far as it goes. Since his time, six missing signs have been found, among which *ī*, *ū*, *śa*, *ṣa* and *ḷa* have been given in plate II. of this manual, while *ṇa*, discovered by GRIERSON in Gayā, is figured in my Indian Studies, III², pp. 31, 76, and on page 35 below. The existence of *AU* in the third century B. C. is assured by the Gayā alphabet of Aśoka's masons.⁵ *ū* and *śa* have been first recognised by CUNNINGHAM.⁶ One form of *ṣa* has been first pointed out by SENART,⁷ and another by HOERNLE.⁸ I have found *ḷa* in the Sāñci votive inscriptions.⁹ Regarding *ī*, compare below, § 16, C, 4.

¹ O. FRANKL, op. cit. 604, proposes to read this *śva*; but compare 35, XIII, which can be only *śya*.

§ 14. — Common characteristics of the ancient inscriptions.

The forms of the Brāhmī and Drāviḍi, used during the first 600 years, are known at present only from inscriptions on stones, copper-plates, coins, seals and rings,¹ and there is only one instance of the use of ink from the third or second century B. C.² The view of the development of the characters during this period is, therefore, not complete. For, in accordance with the results of all paleographic research, the epigraphic alphabets are mostly more archaic than those used in daily life, as the very natural desire to employ monumental forms prevents the adoption of modern letters, and as, in the case of coins, the imitation of older specimens not rarely makes the alphabet retrograde. The occurrence of numerous cursive forms together with very archaic ones, both in the Aśoka edicts (see above, § 3) and also in later inscriptions, clearly proves³ that Indian writing makes no exception to the general rule. And it will be possible to use the numerous cursive letters for the reconstruction of the more advanced alphabets, which were employed for manuscripts and for business purposes.

The full recognition of the actual condition of the Indian writing is obscured also by the fact that the inscriptions of the earliest period, with two exceptions, are either in Prākṛit or in a mixed language (Gāthā dialect), and that the originals, from which they were transferred to stone or copper, were drafted by clerks and monks who possessed little or no education. In [§ 13] writing Prākṛit these persons adopted nearly throughout — (in writing the mixed dialect less constantly) — the practically convenient popular orthography, in which the notation of long vowels, especially of *i* and *ū*, and of the Anusvāra, is occasionally neglected as a matter of small importance, and in which double consonants are mostly represented by single ones, non-aspirates are omitted before aspirates, and the Anusvāra is put for all vowelless medial nasals.⁴ This mode of spelling continues in the Prākṛit inscriptions with great constancy until the second century A. D. The constant doubling of the consonants appears first in a Pāli inscription of *Hārītiṣṭha Sātakaṇṇi*, king of Banavāsī, which has been recently found by L. RICE.⁵ The longer known inscription of the same prince (IA. 14, 331) does not show it. Besides, we find in some other, partly much older, Prākṛit documents, faint traces of the phonetical and grammatical spelling of the Pandits. Thus, the Aśoka edicts of Shāhbāzgarhī offer some instances of *mma* (see above, § 9, B, 4), the Nāsik inscriptions Nos. 14, 15, and Kuḍā No. 5, have the word *siddha*, and Kanheri No. 14 *āyakena*.⁶ Such deviations from the rule indicate that the writers had learned a little Sanskrit, which fact is proved also for the writer who drafted the Kālsī edicts by the, for the Pāli absurd, form *baṃbhane* for *baṃbhane* (Kālsī edict XIII, l. 39).

With the exception of the Ghasundī (Nagari) inscription, which contains no word with a double consonant, all the documents in the mixed dialect offer instances of double consonants which sometimes even are not absolutely necessary. Pabhosa No. 1 has *Bahasatimittasa* and *Kāsiapiyāna*, No. 2 has *Tevaniputtasaya*, Nāsik No. 5 has *siddham*, and Kāle No. 21 has *Setapharanaputtasaya*.⁷ And the Jaina inscriptions from Mathurā furnish numerous analogous cases.⁸ The only known Sanskrit inscriptions of this period, the Gīrnār Prasāsti from the reign of Rudradāman and Kanheri No. 11,⁹ in general show the orthography approved by the phonologists and grammarians, with a few irregularities in the use of the Anusvāra, *e. g.*, *pratānam ā* (Gīrnār Prasāsti, l. 2), *saṃbandhā*¹⁰ (l. 12), which have been caused by the influence of the popular orthography, but are found in the best MSS. written by Pandits. The orthographic peculiarities, just discussed, have therefore nothing to do with the development of the alphabet, but merely show that in ancient, as in modern, India the spelling of the clerks differed from that of the learned Brahmans, and that both methods, then as now, mutually influenced each other and caused irregularities.

⁸ EI. 1, 371 ff.; 2, 195 ff.

⁹ B.ASRWI. 2, pl. 14; 5, pl. 51.

A second peculiarity,¹ found in many inscriptions in Prākṛit and in the mixed dialect, is the frequent erroneous employment of the signs for the sibilants. In the Aśoka edicts of Kālsī, of Siddāpura, and of Bairāt No. II,² on the Bhaṭṭiprolu vases, in the cave inscriptions of Nāgarjunī and of Rāmnāth,³ and in the Mathurā inscriptions of the Kuṣāna period, nay even in the two oldest Ceylonese inscriptions, *ṣa* or *śa* are used often for *sa*, and *śa* for *ṣa*, and *sa* for *śa* and *ṣa*. The reasons for this promiscuous use of the sibilants are, first, the circumstance that the school alphabet, which the clerks learned, was originally intended for Sanskrit and contained more sibilants than the ancient vernaculars possessed, and secondly, the negligent pronunciation of the classes destitute of grammatical training. The western and southern Prākṛits very probably possessed, then as now, both the palatal and the dental sibilants, and it was probably the custom, as is done also in our days, to exchange the two sounds in the same words. The natural consequence was that the feeling for the real value of the signs for *śa* and *sa* disappeared among the Prākṛit-speaking classes, while the *ṣa* of their school-alphabet, for which there was no corresponding sound in their vernaculars, must have appealed to them as a sign suitable to express sibilance. The Sanskrit inscriptions of all centuries, especially the land-grants which were drafted by common clerks, the MSS. of works written in the modern Prākṛits, and the documents from [32] the offices of modern India, with their countless mistakes in the use of the sibilants, offer abundant proof for the correctness of this explanation of the errors in the old inscriptions. The explanation is also confirmed by the occasional occurrence of *ṇa*⁴ for *na*, — once in the separate edicts of Dhauli and once of Jangada, — though *na* alone is permissible for their dialect. In these cases, too, the error seems to have been caused by the fact that the school alphabet contained both *ṇa* and *na*. The clerks, who had learned it, each made once a slip, and put in the, for them, redundant sign. The different opinion,⁵ according to which the exchange of the sibilants in the Aśoka edicts indicates that the values of the Brāhma signs were not completely settled in the third century B. C., rests on the, now untenable, assumption that the Brāhmī was elaborated, not for writing Sanskrit, but for the Prākṛit dialects.

§ 15. — The varieties of the Brāhmī and Drāviḍī in Plates II. and III.⁶

Plates II. and III. show the following fifteen scripts of the first period: —

(1) The variety of the Eraṇ coin, running from the right to the left (pl. II, col. I), which probably dates from the 4th century B. C.

Cols. XXI, XXII; drawn according to CUNNINGHAM's photograph of the Hāthigumphā inscription of Khāravela.

Cols. XXIII, XXIV; cuttings from facsimiles in B.ASRWI. 5, pl. 51, Nos. 1, 2.

PLATE III.

Cols. I, II; cuttings from facsimiles in EI. 2, 199, Nos. 2 and 5, and CUNNINGHAM's photograph of the ora well inscription: compare C.ASE. 20, pl. 5, No. 4. — (Note continued on the next page.)

(2) The older Maurya alphabet of the Aśoka edicts¹ (pl. II, cols. II—XII), which occurs also with local variations on the Persian *sigloi*² and the old coins from Taxila, &c.,³ in the majority of the inscriptions on the Bharahut Stūpa (pl. II, 6, XVIII; 45, XI), in Gayā,⁴ Sāñci,⁵ and Parkham,⁶ on the Patnā seals, on the Sohgauna copper-plate,⁷ and on the stone of Ghasundi or Nagari (pl. II, col. XVI), and probably prevailed at least in the latter half of the 4th and in the 3rd century B. C.

(3) The Drāviḍi of Bhaṭṭiprolu (pl. II, cols. XIII—XV), which is connected with the southern variety of the Maurya type, but includes many very archaic signs; about B. C. 200.

(4) The later Maurya alphabet of Daśaratha's inscription (pl. II, col. XVII), closely related to the characters on the coins of the Indo-Grecian kings Agathocles and Pantaleon;⁸ about B. C. 200 to 180.

(5) The Śuṅga alphabet of the Torana of Bharahut (pl. II, col. XVIII), which agrees with that of the Pabhosa inscriptions (pl. II, col. XIX), of the later votive inscriptions on the rails of the Bharahut and Sāñci Stūpas,⁹ of the oldest Mathurā inscriptions¹⁰ (pl. II, col. XX), of the Riwā inscription,¹¹ and so forth;¹² 2nd to 1st centuries B. C.

(6) The older Kāṭiṅga alphabet of the Katak (Hāthigumphā) caves (pl. II, cols. XXI, XXII); about B. C. 150.

(7) The archaic alphabet of the western Dekhaṇ in the Nānāghāt inscription (pl. II, cols. XXIII, XXIV), which is found also in Nāsik No. 1, in Pitalkhorā, and in Ajaṇṭā Nos. 1, 2;¹³ from about B. C. 150 to the 1st century A. D.

(8, 9) The precursors of the later northern alphabets, the alphabet of the inscriptions of the Northern Kṣatrapa Sodasa and of the archaic votive inscriptions from Mathurā (pl. III, cols. I, II), 1st century B. C. to 1st century A. D. (?), and the Kuṣana alphabet of the reigns of Kanishka, Huviṣka and Vāsudeva (pl. III, cols. III—V), 1st and 2nd (?) centuries A. D.

(10—15) The precursors of the later southern alphabets, the alphabet of Kāthiāvaḍ from the time of the Western Kṣatrapa Rudradāman (pl. III, col. VI), about A. D. 150; the archaistic type of the western Dekhaṇ from the time of the Kṣatrapa Nahapāna (pl. III, col. VII), beginning of the 2nd century A. D. (?); the more modern-looking alphabet of the same district (occasionally with only faint traces of southern peculiarities) from the time of Nahapāna (pl. III, cols. VIII, IX), of the Andhra king Gotamiputa Sātakaṇi (col. X), of the Andhra king Puṣyāyini (col. XI), of the Andhra king Gotamiputa Siriyāṇa Sātakaṇi (col. XII), of Nāsik No. 20 (col. XIII), and of the Ābhira king Īśvarasena (col. XIV), 2nd century A. D. :

Cols. III—V; cuttings from facsimiles of dated Kuṣana inscriptions in EI. 1, 371 ff., and 2, 195 ff.

Col. VI; drawn according to facsimile in B.ASRWI. 2, 128, pl. 14.

Cols. VII—XVI; cuttings from facsimiles in B.ASRWI. 4, pl. 51, No. 19; pl. 52, Nos. 5, 9, 10, 18, 19; pl. 53, Nos. 13, 14; pl. 55, No. 22; pl. 48, No. 3; and tracings for col. XV, from pl. 45, Nos. 5, 6, 11.

Cols. XVII, XVIII; cuttings from facsimiles in B.ASRWI. 1, pl. 62, 63.

Cols. XIX, XX; cuttings from facsimile in EI. 1, 1 ff.

The backgrounds of all the cuttings, and indistinct strokes, have been touched up.

Scale of Plate II. = 0.5 of the cuttings; except 13, II, and the signs in cols. VI, VII, XXIII, XXIV, which have the same size as in the facsimiles. Scale of Plate III. = 0.7.

the ornamental variety of the same district with more fully developed southern peculiarities, from the Kuḍā and [33] Jannar inscriptions (cols. XV, XVI), 2nd century A. D.; the highly ornamental variety of the eastern Dekhap from Jaggayyapeta (cols. XVII, XVIII), 3rd century A. D. (?); and the ancient cursive alphabet of the Prākṛit grant of the Pallava king Sivaskandavarman (cols. XIX, XX), 4th century A. D. (?).

§ 16. — The older Maurya alphabet; Plate II.

A. — Geographical extension and duration of use.¹

The older Maurya alphabet was used over the whole of India, and it seems to have found its way into Ceylon at the latest about B. C. 250. For, the two oldest Ceylonese inscriptions,² from the time of the king Abaya Gāmini, which probably belong to the end of the 2nd or the beginning of the 1st century B. C., show characters which appear to have been developed from those of the Aśoka edicts. And the close relations between Aśoka and Tissa of Ceylon, reported by the Southern Buddhists, make an importation of the Brāhmī from Magadha into Ceylon not improbable. It is, however, possible that the Brāhmī alphabet was introduced even earlier into Ceylon by Indian colonists.³

The upper limit of the use of the older Maurya alphabet cannot be fixed with any certainty. But the shape of some of the characters on the Persian *sigloi* (above § 15, 1) makes it probable that even its more advanced forms existed before the end of the Akhaemenian rule in India (B. C. 331). Its oldest primary forms, no doubt, go back to much earlier times, as also the statements of the tradition, discussed above, tend to show. [34] The lower limit of the use of this type cannot be very distant from the end of Aśoka's reign (about B. C. 221), and must fall about B. C. 200. This estimate is supported by the character of the writing in the inscriptions of Aśoka's grandson Daśaratha,⁴ which were incised "immediately after his coronation" (*ānuntatiyaṃ abhiṣitena*), i. e., probably just about the end of the 3rd century B. C., and of the legends on the coins of the Indo-Grecian kings Pantaleon and Agathocles, who ruled in the beginning of the 2nd century B. C.⁵ The letters of the Nāgārjunī cave inscriptions (pl. II, col. XVII) are sharply distinguished from those of the Aśoka edicts, partly by the far advanced forms of *ja*, *ta*, *da*, *la*, and partly by the invariable and considerable reduction of the vertical strokes. The second peculiarity re-occurs on the coins of the two Indo-Grecian kings, which show also a further development of the northern *ja* of pl. II, 15, III. Though the shortened letters were by no means unknown to the writers of the Aśoka edicts (see table on p. 7), their constant use for epigraphic documents is, to judge from the available materials, a characteristic of the types of the second and subsequent centuries. And I believe that all inscriptions showing long verticals must be assigned to the third century B. C., and those with short ones to later times.

B. — Local varieties.

The peculiar circumstances, under which the Aśoka edicts were incised, were most unfavourable to a full expression of the existing local varieties. First, the fact that all of them were first drawn up in the imperial secretariate at Pāṭaliputra and then forwarded to the governors of the provinces, must have proved a serious obstacle. As the differences in the grammatical forms and small alterations in the text indicate, the edicts were copied by the provincial clerks before they came into the hands of the stone-masons. It is a matter of course that the scribes of the Rājukas, in copying them, were influenced by the forms of the letters in the originals, and that they imitated them, be it involuntarily or out of respect for the head office. Further, it is probable that the provincial clerks were not always natives of those districts in which they

¹ Compare B. I. S. III², 49 ff.

² E. MÜLLER, *Ann. Inscri.* from Ceylon, pl. 1.

³ Compare M. DE ZILVA WICKRAMASINGHE in J. R. A. S., 1895, 895 ff.

⁴ L. I. A. II², 237 ff.

⁵ VON SALLER, *Nachfolger Alex. d. Gr.*, 31; P. GARDNER, *Cat. of Ind. Coins Br. Mus.*, XXVI.

served; and this circumstance must have contributed to efface or to modify the use of the local varieties. Most of Aśoka's governors will, no doubt, have been sent from Magadha, the home of the Maurya race, and many will have been transferred in the course of their service from one province to another. Those acquainted with the conditions of the Civil Service in the Native States of India, which still preserve the ancient forms common to the whole of Asia, will regard it as probable that the governors, on taking charge of their posts, imported their subordinates, or at least some of them, be it from their native country or from the districts which they formerly governed. The case of Paḍa, the writer of the Siddāpura edicts, confirms this inference. As he knew the Kharoṣṭhī, he probably had immigrated, or been transferred, to Māsūr from the north of India.

In spite of these unfavourable conditions it is possible to distinguish in the writing of the Aśoka edicts at least two, perhaps three, local varieties. First, there is a northern and a southern one, for which, as in the case of the later alphabets, the Vindhya or, as the Hindus say, the Narmadā, forms the dividing line. The southern variety is most strongly expressed in the Gīrnār and Siddāpura edicts, less clearly in the Dhauli and Jāugada edicts, by differences in the signs for *A*, *Ā*, *kha*, *ja*, *ma*, *ra*, *sa*, the medial *i*, and the ligatures with *ra* (see below, under C, D). A comparison of the characters of the most closely allied northern and southern inscriptions confirms the assumption that the differences are not accidental. If the characters of the Siddāpura edicts do not always agree with those of Gīrnār, [35] the discrepancies will have to be ascribed to the northern descent of the writer Paḍa or to his service in a northern office.

Even the writing in the northern versions is not quite homogeneous. The pillar edicts of Allahabad, Mathia, Nigliva, Paḍeria, Radhia, and Rāmpūrvā, form one very closely connected set, in which only occasionally minute differences can be traced, and the edicts of Bairāt No. I., Sahaśrām, Barābar, and Sāñci, do not much differ. A little further off stand the Dhauli separate edicts (where edict VII. has been written by a different hand from the rest), the Delhi-Mirat edicts, and the Allahabad Queen's edict, as these show the angular *da*. Very peculiar and altogether different is the writing of the rock edicts of Kālsī, with which some letters on the coins of Agathocles and Pantaleon (but also some in the Jāugada separate edicts) agree. Perhaps it is possible to speak also of a north-western variety of the older Maurya alphabet.¹

C.—The radical signs or Mātrkāś.

Signs beginning with verticals show already in the Aśoka edicts occasionally a thickening or a very short stroke (*Serif*) at the upper end, as in *cha* (pl. II, 14, II), *pa* (28, VII); compare the cases noted EI. 2, 448, and B.ARSI. 1, 115.

(1, 2)² In addition to the eight forms of *A*, *Ā*, given on page 6 above, the plate shows a ninth in col. XI. with an open square at the top (compare *ma*, 32, XI, XII); a tenth, with the angle separated from the vertical, occurs in No. 1 of the Siddāpura inscriptions, edict I, line 2, 3. The forms with the bent vertical (cols. VII, XI) have been caused by writing the upper and lower halves of the letter separately. The addition of the stroke, marking the length of the vowel, to the right top of the vertical (cols. VIII, IX), is a peculiarity of Gīrnār.

(3) The forms of *I* in cols. III, IV, are the common ones; that in col. X, which agrees with the *I* of the Gupta period and later types, is rare. (4) The rare *Ī*, which, as may be inferred from the Gayā alphabet of the masons, existed already in the 3rd century B. C., occurs also in the Mahābodhi-Gayā inscriptions, pl. 10, Nos. 9, 10, where CUNNINGHAM reads *Im*, because it appears in the representative of the Sanskrit *Indra*. Though this reading is possible, I consider it improbable, as it would be necessary to assume for *I* a not traceable form,

¹ Compare B.IS. III^a, 36 ff.

² The bracketed Arabic figures of section C. correspond with those of plate II; for § 16, C to E, compare also B.IS. III^a, 58 ff.

consisting of two dots side by side with a third dot above on the left, thus: . . In later times (see pl. VI, 4, V, VII) the angles of the square are turned towards the top and the bottom lines.

(5, 6) HULTZSCH (ZDMG. 40, 71) admits that the sign 6, XVIII, looks like *U*, but prefers to read *O* for linguistic reasons, which seems to be unnecessary according to E. MÜLLER, Simplified Pāli Grammar, 12 f. The existence of *U* in the 3rd century may be inferred from the Gayā alphabet of the masons.

(7) Add the horseshoe-form of *E* (Kālsī edict V, 16, &c.) from the comparative table on page 11 above, No. 16, col. V, *δ*. The half-round *E* of col. XXII. occurs also in Sāñci Stūpa I, No. 178. The *ΔI*, which has been placed in this row (col. XXI), existed in the 3rd century, as may be inferred from the Gayā alphabet of the masons. — (8) Regarding the *O* of Dhauli and Jaugada in col. VI, see above, § 4, B, 4, *a*.

(9) The dagger-shaped *ka* occurs occasionally in all versions of the Aśoka edicts, most rarely in Gīrnār. — (10) The oldest among the seven forms of *kha* is that in col. II (Kālsī) and col. VI (Jaugada separate edicts and Bharahut Stūpa inscription). Hence come first the northern *kha*, with the loop on the right, col. III (Kālsī and Bharahut), and a form, nearly identical with that of col. XVIII, in Jaugada separate edict I, l. 4. The next derivative from this is the *kha* with a bent vertical and a dot at the foot, in cols. IV, V. Likewise of northern origin is the *kha* with the triangle at the foot, in *kha*, 43, V; compare Mahābodhi-Gayā, pl. 10, No. 3, and Bharahut. Another derivative from the primary form in col. III. is the *kha* of cols. VII, IX—XII, with a point at the foot of the perfectly straight vertical, and it occurs both in the south in Gīrnār, Siddāpura, Dhauli, and Jaugada, and in the north in Allahabad, Delhi-Mirat, Mathia, Radhia, Rāmpūrvā, and Bairāt No. 1. The *kha*, consisting of a simple hook with the omission of the dot, in col. VIII, is confined to the southern versions and is particularly common in Gīrnār. — (11) The *ga*, which is originally pointed at the top, is sometimes slightly rounded, in cols. IV, VI, X—XII. — (12) The primary angular *gha* appears occasionally in Kālsī (col. III) and in the Jaugada separate edicts. — I add here the figure of *na* from the Gayā alphabet of the masons, which has been discovered after the preparation of the plates; compare my Indian Studies, III³, pp. 31, 76.

(13) The primary *ca* with tail (see above, § 4, A, 18) occurs also in Sāñci Stūpa I, Nos. 269 and 284 (EI. 2, 368). — (14) The primary *cha* with unequal [38] halves in cols. VI, VII, becomes first a circle, bisected by the vertical, cols. III, IV, and hence is derived the later usual form with two loops in col. II, and in the Gayā alphabet. — (15) The forms of *ja*, all of which have been derived from the *j* of the Drāviḍi (cols. XIII—XVI) may be divided (a) into essentially northern forms with a loop in col. III (Kālsī and Mathia), or with a dot in cols. IV, V (Allahabad, Delhi-Sivālik, Delhi-Mirat, Bairāt No. 1, Nigīva, Paḍeria, Dhauli, Jaugada, and Siddāpura), or with a short central stroke in col. II (Kālsī, Jaugada separate edicts, Sabasrām, and Rūpnāth), and (b) into southern forms, those in cols. VII, X, XI, XVI (Gīrnār, Dhauli, Jaugada, and Ghasundi), and that in col. IX (Gīrnār).

(18) In addition to the semicircular *ṣa*, we often find secondary forms, flattened above or below or at both ends, as in cols. II, XI, XVI. — (20) With the round-backed *ḍa* of Kālsī in col. III, compare also the similar *ḍi* in the Allahabad Queen's edict, line 3.

(23) From the primary *ta* in col. III, and 43, III (*tu*), which is often turned sideways (see comparative table at page 11 above No. 22, V, *δ*), comes (a) the form with the round side-limb in cols. IV, V, XVI, as well as that in col. VI, and 43, col. II (*ti*), and (b) the very common *ta* with the angle just below the vertical in col. XI, from which finally the tertiary form with the semicircle for the angle in col. XII (common in later times) appears to be derived. — (25) From the primary rounded *ḍa* in cols. II, III, comes (a) the angular form in cols. IV, V (Delhi-

Mirat, Delhi-Sivālik, Allahabad Kosambī edict, and Allahabad Queen's edict), and (δ) the cursive *da* in cols. VII, IX (Girnār, Jangada, &c., rarely). — (26) The original *dha* of cols. V--VII appears only in Delhi-Sivālik (rarely) and in the Jangada separate edicts (constantly).

(28, 29) The angular *pa* and *p̄ha* of col. XII. and col. VI. occurs here and there in various versions. — (30) Add the *ba* of the comparative table, page 11 above, No. 2, V, *a*, which is not rare in Kālsī and other versions. — (31) The secondary *bha* with the straight stroke on the right, col. XVI, and that with the rounded back, col. VI (Jangada separate edicts), appear also in Bharahut (constantly), Sāñci (often), Barābar, and Kālsī. — (32) The secondary *ma* with the semicircle at the top occurs throughout in the northern inscriptions, except in the Sohgaure copper-plate, which offers a *ma* with an open square, similar to that of Siddāpura, cols. XI, XII. The older *ma* with the angle above the circle, cols. VIII--X, is a southern form, and is confined to Girnār (exclusively) and Dhauli and Jangada (rarely).

(33) The notched *ya* in cols. IV, V, VII, XI, is used either constantly or chiefly in Delhi-Sivālik, Delhi-Mirat, Mathia, Radhia, Rāmpūrvā, Nigliva, Paderia, and Kālsī. It is also very common in Dhauli, Jangada, and Siddāpura. But in Girnār the *ya* with the curve below is the usual one, cols. VIII, X, XII, besides which that with the angle, col. IX, is found occasionally. In writing the notched *ya*, the left half of the sign has been made first, and the right half has been added afterwards. In the *ya* with the curve below, the vertical and the curve have been drawn separately, as may be seen from *iyam* in No. 1 of the Siddāpura inscriptions, edict I, line 4. — (34) Add the forms of *ra* from Girnār given in the comparative table on page 11 above, No. 20, V, *a* and *c*. The corkscrew-like *ra* of Ghasundi, col. XVI, and the tertiary, almost straight-lined, form of Rūpnāth (between cols. VII, VIII), seem to be northern cursive forms of the letter. — (35) The angular *la* of cols. III, V, appears occasionally in most versions, whereas the highly cursive form in col. VII. is confined to the Jangada separate edicts. — (36) Add the modern-looking *va* of the comparative table on page 7 above, No. 19 (Kālsī). The *va* of Siddāpura in col. XII, flattened below, and the triangular one of Ghasundi in col. XVI, appear occasionally in other versions. The *va* of col. IX, which resembles a *ca* turned round from right to left, is found also in *Vesagame*, Sohgaure, line 2.

(37) Add the broad-backed *śa* of the comparative table on page 11, No. 21, V, *c*; and compare the *śa* in Kālsī edict XIII, 1, lines 35, 37, 38; 2, lines 17, 19. — (38) The conjectural reading of the signs of Kālsī in cols. II, III, is based on SENART's *Inscriptions de Piyadasi*, 1, 33 f. The *śa* from which the later forms have been derived is that of col. XVI. — (39) The primary *sa* with the straight side-limb has been preserved only in the south (Girnār and Siddāpura). The cursive form in col. VII. occurs also in Kālsī.

(40) Add the probably primary *ha* of Siddāpura in the comparative table on page 11 above, No. 5, V, *a*, which [37] is found also in Kālsī. The cursive *ha* of col. VII. is confined to the Jangada separate edicts; a somewhat different cursive occurs in *mahamāta*, Allahabad Kosambī edict, line 1.

(41) A certain *ḷa* is not found in the known inscriptions of the 3rd century, as the *ḷi* of Sāñci, in col. XVIII, belongs without doubt to the 2nd century B. C. But it is possible that the *ḷa* with the dot, 20, col. VI (Radhia), has to be read *ḷa*. The sign appears in Delhi-Sivālik, Mathia, and Radhia (edict V) in the representative of the Sanskrit *dudī* or *duli*, and in Mathia and Radhia in the representative of *dvādaśa*, which in Pāli usually becomes *duvādaśa*. The dot may be, as in *kha* and *ja*, a substitute for a circle. If such a modification of *ḷa* was really used for *ḷa*, the sign must have been derived from the angular *ḷa* nearly in the same manner as the later *ḷa* was framed out of the round-backed *ḷa* (see above, § 4, B, 6).

D. — Medial vowels and Anusvāra.

(1) The originally straight stroke for *ā* is often turned upwards in Kālsī (see, for instance, *śā*, 37, III) and occasionally in other versions, after the manner prevalent in later times. In *kā* (10, V, VI), *jā* (15, VI, &c.), *ṭā* (18, II), *ṭhā* (19, II), *thā* (24, II), the *ā*-stroke is added to the middle of the letter. Bharahut offers also a *jā* like that of 15, XXI.

(2) The angular *i* (see, for instance, *khi*, 10, II) becomes, regularly in Gīrnār (see *dhi*, 21, IX) and rarely in the Jaugada separate edicts (see *khi*, 10, VII), a shallow curve, which in *khi* (10, VIII), in *ni* (27, IX), and other letters ending in verticals, may be attached to the middle of the consonant, and which frequently is very much like *ā*. In Kālsī edict XIII, 2, 10, the medial *i* of *ti* (43, II), stands twice to the left of its consonant, likewise in *tī* in Allahabad edict I (end), and in *hi* in the Sohgauna copper-plate, line 4. — (3) The medial *i* of Gīrnār usually consists of a shallow curve bisected by a vertical (*dī*, 25, IX); but in *ṭi* (18, IX) it is marked by two vertical strokes, and in *thi* (24, IX) by two slanting ones.

(4) The full *u* which is identical with *ū* occurs in the *dhu* (26, III) of Kālsī several times. It is also recognisable in *ku* (9, V), *gu* (11, IX), *ḍu* (20, VII), and other letters ending in verticals, which latter have to do double duty as parts of the consonants and of the vowel; see below, the remarks on some ligatures under E, 1. Elsewhere we have secondary forms: (a) such as omit the horizontal, in *dhu* (26, II), *pu* (28, III), &c.; (b) such as omit the vertical, in *tu* (23, V), &c. In *tu* the *u*-stroke is occasionally turned upwards, as in 23, VIII, and 43, III; compare the later *tū* of pl. III, 21, XIX. — (5) The identity of medial *u* with *ū* is still recognisable in letters ending in verticals, as in *dhū* (31, X), &c., where the vertical again does double duty. But mostly the vowel is expressed by two strokes, either parallel as in *dhū* (26, X) and in *yū* (33, VII) or placed otherwise as in *pū* (28, VIII, XVI).

(6) Signs like *ge* (11, IV) perhaps offer still remnants of the hook-form of medial *e*, into which the originally super-imposed triangle no doubt was reduced at first (see above, § 4, C, 1); and the *e*-strokes of *khe* (10, III), *ge* (11, III), and *gye* (42, VII), which slant downwards from the left to the right, may have to be interpreted in the same way. In *je* (15, VII), *te* (18, V), *ṭhe* (19, XII), and *the* (24, XII), the vowel stands opposite to the middle of the consonant; in *khe* it is often attached to the left end of the hook. — (7) Medial *ai* occurs only in *trai* (23, IX) and *thai* (24, X), both in Gīrnār, and in *ma* (32, XII; Siddāpura).

(8) Medial *o* preserves mostly the original shape of *O* very faithfully (see above, § 4, C, 1). The later cursive *o* with the two bars at the same height appears however in *go* (11, V; Delhi-Sivālik) and *ho* (40, V; Delhi-Sivālik), as well as in the *yo* of the Persian *sigloi*. In *mo* (32, VII, X; Jaugada separate edicts, Mathia, Radhia, and Gīrnār), the *o* has been formed in a similar manner. In the second form, the bars stand opposite the middle, and indicate that analogous *mā* and *me* existed already in the 3rd century B. C., just as later; see pl. III, 30, X, XVII. In the *no* of Kālsī edict V, line 14 we have a looped *o*, similar to that in *lo* of pl. III, 33, XX, and in later signs.

(9) The Anusvāra mostly stands opposite the middle of the preceding Mātṛkā, as in *maṃ* (32, VIII). But in connection with *i* it is placed regularly in [38] Delhi-Sivālik, Delhi-Mirat, Mathia, Radhia, Jaugada, and Dhauri, inside the angle of the vowel, as in *ṭiṃ* (18, VI). There are also other cases in which it occasionally appears, as in the later scripts, above its Mātṛkā, and sometimes, as in *maṃ* (32, II), it sinks to the foot of the latter; see above, § 4, B, 2 c.

E. — Ligatures.

(1) In the ordinary ligatures of the Aśoka edicts (42, II—VII, X—XII; 43, V—VIII, XI, XII; 44, III—VII, XI, XII; 45, IV, V, X), in those of Bharahut (45, XI) and of Ghasundi (42, 43, XVI), the consonants are placed below each other in their natural order and

suffer no material changes. Occasionally, however, as in *kyā* (42, II, IV), *kya* (42, III), *gyā* (42, VI), and *gye* (42, VII), a single vertical stroke does duty both for the upper and the lower consonant, just as in the modern ligatures *क्य*, *क्ये*, and so forth; compare also the Kharoṣṭhī ligatures, § 11 above, C, 3.

(2) But there are cases of greater irregularities, especially in Gīrnār, where (a) the second sign is sometimes greatly mutilated or made cursive, as in *vya* (44, II), *mya* (44, VIII), *sti* and *stu* (45, VIII, IX); (b) the sign for the second consonant is sometimes placed first (Gīrnār and Siddāpura) for convenience sake,¹ as in *stā*, *sti* (42, VIII, IX), *tpa*, *tpā* (43, IX, X), *vyā* (44, X, ?); and (c) in ligatures with *ra*, this sign is either (both in Gīrnār and Siddāpura) inserted in the vertical lines of the other consonant (*kra*, 9, X; *tram*, 23, X; *dra*, 25, XII; *brā*, 30, X; *vra*, 36, X; *aru*, 39, X), or (in Gīrnār alone) is indicated by a small hook at the top of the combined sign (*trai*, 28, IX; *pra*, *prā*, 28, IX, X; &c.). The position of *ra* always remains the same, whether it is to be pronounced before or after the combined consonant, and thus 36, X, has the value both of *ra* and of *gra*. The insertion of *ra* in the left vertical of *ba* in *brā* (30, X) probably goes back to the period when the writing went from the right to the left. Otherwise it ought to stand in the right vertical.

§ 17. — The Drāviḍi of Bhaṭṭiprolu; Plate II.

To the remarks on the value of the Drāviḍi of Bhaṭṭiprolu for the history of writing in India (above, page 8), and to the explanations of its peculiar signs (above, § 6, A, 3, 7, 12, 15, 18; B, 4 c, 5; and C, 2), I have now to add the reasons for the assumed reading of the sign in pl. II, 38, XIII—XV. It seems to me certain that originally it had the value of *ś*. For there can be no doubt that it expresses a sibilant, and that the Drāviḍi is, like the Brāhmī, an alphabet invented in order to write Sanskrit (see above, § 6, C, 2). As signs for two of the three Sanskrit sibilants are easily recognisable, — the palatal in 37, XIII, XIV, and the dental in 39, XIII, XIV, XV, — the third sign can only have been intended to express the lingual sibilant. But it is a different question, whether in the words of the Prākṛit Bhaṭṭiprolu inscriptions, in which the sign occurs, the lingual sibilant was actually pronounced, or whether, owing to the negligent orthography of the clerks, the sign has been put where the pronunciation was *ś* or *s*. A certain answer to this question is for the present impossible. It could be given only if we knew more about the ancient Prākṛit of the Kistna districts [39] than is actually the case. But the correct use of *śa* in *śamaṇudeśānaṃ* Bhaṭṭiprolu, No. X) indicates that the dialect possessed two sibilants; and it can only be doubted, whether *ś* has been put erroneously for *ś*, as often happens in the Jaina inscriptions from Mathurā (compare EI 1, 376), or whether it was still the lingual sibilant. Another point in the character of the Drāviḍi, which requires special mention, is, that its signs, which agree with those of the Brāhmī, in several cases present characteristic peculiarities of the southern variety. This may be seen (1) in the angular *A*, *Ā*; (2) in the *kh* (10, XIII, XV) consisting, like that of Gīrnār, merely of a vertical, with a hook at the top; (3) in the *dh*, which has the same position as that of the Jangada separate edicts and the Nānāghāt inscriptions; (4) in *m*, which, though turned topsy-turvy, retains the angle of the *ma* of Gīrnār; and (5) in *s*, which mostly has the straight side-limb, as in Gīrnār and Siddāpura.

As the inscription on the crystal prism (No. X), found with the stone vessels, shows the ordinary Brāhmī except in the *da* opening to the right, it follows that the Drāviḍi was not used exclusively even in the Kistna districts, but together with the common old Indian alphabet. The small number of the inscriptions hitherto found, makes it impossible to say anything definite regarding the spread of this alphabet. And it is equally difficult to fix with certainty the time and the duration of its use. As king Kubiraka or Khubiraka (Kabera) is not known from other sources, we can only fall back on the never absolutely certain paleographic indications.

¹ O. FRANK, *Gurupājānamudā* 26, thinks that these groups should be read *śā*, *śā*, as the are written.

The signs, which agree with the Brāhmī, point to the time immediately after Aśoka, or about B. C. 200. In favour of this estimate is particularly the occurrence of the long verticals, the invariably round *g*, and the *r*, which is always represented by a straight line.

§ 18. — The last four alphabets of Plate II.

In addition to the inscriptions of Daśaratha (col. XVII), which very probably belong just to the end of the 3rd century B. C. (see above, § 16, A), only those of the Ceta king Khāravēla of Kālīṅga (cols. XXI, XXII) and those of the Andhra queen Nāyanikā in the Nānāghāt cave (cols. XXIII, XXIV) can be dated approximately. Khāravēla's inscription must have been incised between B. C. 157 and 147, as the king's thirteenth year is said to correspond to the year 165 of "the time of the Muriya (Mauriya) kings,"¹ and it fixes also the time of the Nānāghāt inscription. For, according to line 4, Khāravēla assisted in the second year of his reign a western king called Sātakaṇi. This Sātakaṇi probably is identical with the first Andhra prince of that name mentioned in the Purāṇas, whose inscribed image is found in the Nānāghāt cave. Hence the date of the large inscription, which was incised during the regency of Sātakaṇi's widow Nāyanikā, cannot be much later than B. C. 150.²

Paleographic evidence is almost the only help for fixing the time of Dhanabhūti's inscription on the *torana* of the Bharahut Stūpa (col. XVIII), which was incised "during the rule of the Śuṅgas," as well as that of the Pabhosa cave inscriptions (col. XIX) and of the oldest votive documents from Mathurā (col. XX), all of which offer (see above, § 15, 5) the Śuṅga type of the ancient Brāhmī. To judge from the evidently close connection of their characters, partly with the younger Maurya alphabet and partly with the Kālīṅga script, the signs of cols. XVIII, XIX, probably belong to the second century B. C. Those of col. XX, may date from the first century B. C., as the elongation of the lower parts of the verticals of *A*, *Ā* (1, 2), the broad back of *śa* (37), the cursive *la* (41) and the subscribed *ra* in *dra* (42), which is twisted to the left, point to a later time.

The tendency to shorten the upper vertical lines, mentioned already above (§ 16, A), is, though here and there not fully carried through, common to all the four scripts. The broadening of the letter or of the lower parts of *ga*, *ta*, *pa*, *bha*, *ya*, *la*, *sa* and *ha*, is found only in the last [40] three alphabets; and the thickening of the tops of the upper verticals, and the use of the so-called *Serif*, are particularly remarkable only in the Śuṅga and Kālīṅga alphabets. Tendencies in the direction of later developments are found, not only in the letters of col. XX, already mentioned, but also in the round *ḍa* (20, XXII, XXIII), so characteristic for the later southern alphabets, in *ra* with the curved upper horizontal line (22, XVIII, XIX) in the partly or entirely angular *ma* (32, XIX, XXII) in the semicircular medial *ṛ* of *kṛ* (9, XXII), *ḥṛ* (30, XXII), and *vī* (36, XXIV), as well as in the detached *o* of *yo* (11, XXII), *ṭho* (19, XXIV) and *ṭho* (24, XXIV). The single medial *au* of the plate, in *pau* (28, XVIII), deserves to be noted.

As regards the geographical distribution of these types, the younger Maurya alphabet belongs not only to the north-east (Bihār), but also to the north-west, where its *ja* and *sa* are found on the coins of the two Indo-Grecian kings, mentioned above (§ 15, 4). The Kālīṅga alphabet is of course that of the south-eastern coast, and the type of the Nānāghāt inscriptions that of the western Dekhan. Finally, the Śuṅga type probably represents the script of the centre of India. It, however, extends also to the west, as the same or very similar characters are found in the caves of the Marāṭhā country; compare § 15 above, 5, note 3.

Very little can be said regarding the duration of the use of these scripts. The Indo-Grecian coins show that the younger Maurya characters were used in the first half of the 2nd

¹ Sixth Oriental Congress, 3, 2, 149; compare Österreichische Monatschr. für d. Or., 1884, 281 ff.

² Sixth Oriental Congress, 3, 2, 148; differently Bhāṇḍārkar, Early Hist. of the Dekkan², 34, who assigns Sātakaṇi to the period B. C. 40 to A. D. 16.

century B. C.¹ The Kalinga script is visible also in the inscriptions of Khāravela's next descendants.² If BURGESS has correctly fixed the time of the Pitalkhorā caves,³ it would follow that the script of the Nānāghāt inscriptions continued to be used in the first century A. D.

§ 19. — The precursors of the northern alphabets.

A. — The alphabet of the Northern Kṣatrapas; Plate III.

Immediately connected with the latest forms of the Śuṅga type in the oldest Jaina inscriptions from Mathurā (pl. II, col. XX) is the alphabet of the Northern Kṣatrapas on the coins and in the inscriptions of the Mahākṣatrapa Rājuvula or Rājubula and of his son Sodāsa or Sudāsa, who ruled in the first century B. C. or A. D. (?) over the same town.⁴ And some "archaic" votive inscriptions from Mathurā, as well as legends on certain Indian coins, exhibit the early letters of the same type.⁵

The characteristics of this type (plate III, cols. I, II) are the equalisation of all the upper verticals, except in *la* (33, I); the constant use of the *Serif*, occasionally replaced, as in *bha* (29, I), by a nail-head or wedge; and the constant use of angular forms for *gha* (10, I), *ja* (13, I, II), *pa* (26, I, II), *pha* (27, I), *ma* (30, I, II), *ka* (33, I), *sa* (36, I), and *ha* (38, I, II). Other, mostly cursive, innovations are found in the peculiar *ca* (11, I); in the slanting angular *da* (18, I); in *da* (23, I); in the broadened *bha* (29, I, II); in *ra* with the curve at the end (32, I, II), which occasionally reappears also later (see pl. IV, 33, IV) in northern inscriptions; in the medial vowels *ā* (which in *kā*, 38, II, rises upwards, but in *rā*, 32, I, keeps its ancient form), *i* (in *dī*, 23, I), *o* (in *gho*, 10, I, and *so*, 35, II); and in the position of the Anuvāra above the line (in *ṛām*, 20, I). The *ka* shows, besides the old form in 7, I, II, the later one with the bent bars in *kā* (40, I). The upper part of the abnormal *va* (34, II) with two triangles, which sometimes is found also in the Kuṣana inscriptions⁶ and elsewhere, [41], probably represents a hollow wedge. The inscriptions of this class for the first time show⁷ the medial *r* which consists, exactly like that of the Kuṣana inscriptions in *vr* (34, III), of a straight line slanting towards the left.

B. — The alphabet of the Kuṣana inscriptions; Plate III.

The next step in the development of the Brāhmī of Northern India is illustrated by the inscriptions from the time of the Kuṣana kings Kaniṣka, Huviṣka and Vāsuṣka or Vāsudeva (plate III, cols. III—V), the first among whom made an end of the rule of the older Sakas in the eastern and southern Pañjāb. The inscriptions with the names of these kings, which run from the year 4 to the year 98 (according to the usually accepted opinions, of the Śaka era of A. D. 77-78, or of the 4th century of the Seleucid era),⁸ are very numerous in Mathurā and its neighbourhood, and are found also in eastern Rājputāna and in the Central Indian Agency (Sāñci).⁹ In spite of great variations in the single letters, which occasionally exhibit the more modern forms in the older inscriptions and the earlier forms of the Northern Kṣatrapa type in the later documents, the alphabet possesses a very characteristic appearance, and nobody who once has seen the squat and broad letters of the Kuṣana period will ever make a mistake by assigning them to other times.

⁸ IA. 10, 213; C.OIS. 51 ff., 57; BRĀHMAṆS, Early Hist. of the Dekkan², 25, note 1, thinks that Kaniṣka ruled later; but S. Lévi, J.A. 1897, I, 5 ff., places even Vāsudeva in the first century A. D.; the years 4 and 5 of this era occur in EI. 2, 201, Nos. 11, 12; Kaniṣka, the year 7, EI. 1, 391, No. 19.

⁹ See facsimile, EI. 2, 369.

As regards the details, the following innovations deserve special mention:¹ — (1) Side by side with more ancient signs, the *A* of col. IV. shows a form leading up to the modern *A* of the Nāgarī of Western India; compare also pl. IV, 1, IX, XI ff. (2) The bar denoting the length of *A* is attached low down (2, III, IV); compare pl. IV, 2, VII ff. (3) Three strokes, one of which is set up vertically, take the place of the three dots of *I* (3, III). (4) The horizontal stroke of *U* occasionally shows a curve at the left end (4, IV). (5) The base of the triangular *E* (5, IV, V) is mostly at the top; compare pl. IV, 5, X ff. (6) The *kha* (8, III—V) is mostly triangular below, and its hook is often small. (7) One of the two originally horizontal strokes of *na* is always turned into a curve notched in the middle, and sometimes both are changed in this manner, as in 20, III, IV; occasionally the vertical is split up into two lines, which are attached to the ends of the left horizontal line, each bearing a portion of the curved top-bar (20, V). (8) The *ta* shows sometimes, but rarely, a loop, as in *sti* (43, IV). (9) The lower end of *da* (23, III—V) is drawn further to the right, and the bulge on the right becomes larger. (10) The *dha* (24, III, IV) becomes narrower and pointed at the ends. (11) The horizontal stroke of *na* is curved (25, III) or looped (25, IV), whereby the still more modern looking form in 25, V, is developed. (12) The *ya* (31, III—V) mostly has a hook or circle on the left limb, and in ligatures is either looped as in *ryya* (42, III), or bipartite as in *ryya* (41, V). (13) The *va* is occasionally rounded on the left (34, V), or becomes similar to *ca*, as in *vena* (42, IV). (14) The *śa* (35, III—V) becomes narrower, and its middle stroke lies horizontally across the interior; sometimes the left down-stroke bears a *Śrif* at the end, or the right one is made longer, just as in *ga* (9, V); compare pl. IV, 36, I ff. (15) The central bar of *sa* (36, III—V) goes straight across the interior of the letter. (16) The left limb of *sa* is occasionally, but rarely, turned into a loop (37, IV); compare plate IV, 38, I ff.

All these peculiarities, as well as the advanced forms of the medial vowels, of *ā* in *rā* (32, IV), of *u* in *ku* (7, IV, V) and in *stu* (43, V),² and of *o* in *to* (21, IV), reappear constantly in the northern alphabets of the next period, those of the Gupta inscriptions (pl. IV, cols. I—VII) and of the Bower MS (pl. VI, cols. I—III), or are precursors of the forms of those documents. The literary alphabets used in Mathurā during the first two centuries A. D., very likely were identical with or closely similar to the later ones, and the admixture of older forms, observable in the inscriptions of the Kuṣāna period, may be due purely to an imitation of older votive inscriptions.

Attention must be called to the medial *r* in *tr* (21, IV) and [42] in *vr* (34, III), for which we have also once³ the form of pl. IV, 3, III; likewise to the rather common final *m*, which resembles that in *adham* (41, VII), and to the Visarga, which looks exactly like the modern one (compare 41, 41, IX) and first appears in these inscriptions.⁴ The broad strokes of the letters and their thick tops indicate that they imitate an alphabet written with ink.

§ 20. — The precursors of the southern alphabets.

A. — The alphabet of the Kṣatrapas of Mālva and Gujarāt; Plate III.

While the inscriptions of Northern India thus show in the first and second centuries A. D. the beginning of the development of a new local variety of the Brāhmī, we find in the documents from Western and Central India, as well as from the Dekhaṇ, the first steps leading up to the later southern alphabets. The inscriptions and coins of the Kṣatrapa dynasty of Mālva and Gujarāt, descended from Caṣṭana or Tīastanes, illustrate the western writing, and col. VI, taken from the Gīrnār Praśasti of the reign of Rudradāman (about A. D. 160)⁵ gives a specimen of it. This script agrees with the later southern alphabets (§ 27, below) in the following characteristic points: — (1) in the curves at the ends of *A* and *Ā* (1, 2), *ka* (7),

¹ Compare my remarks, EI. I, 371 ff.; 2, 197.

² Compare the *tu* of plate II, 43, III.

³ EI. I, 389, No. 18.

⁴ Compare, for instance, *naḥ*, EI. I, 382, No. 3.

⁵ BHĀṆDĀRKA, Early Hist. of the Dekkan, 26 ff., C.C.M.I. 2—5; BHAGVĀNLĀL, J.RAS. 1890, 642; BÜHLER, Die ind. Inschr. u. das. Alter d. ind. Kunstpoesie, 46 ff.

ṛa (15), *ra* (32), and of medial *u* and *ā* (not in the plate); (2) in the round-backed *ḍa* (18); (3) in the *ba* (28), notched on the left; (4) in the *la* (33) with the vertical bent to the left; and (5) in the medial *r* (see *sr*, 37), which is difficult to distinguish from *ra*. Its other letters, for instance, *śa* (35) and the tripartite subscribed *ya* of *lya* (42), partly agree with those of the inscriptions of Śoḍāsa, and partly, — for instance, *kha* (8), *na* (25) with the bent base-line, *pa* (26) with the notch in the left vertical, *ya* (31) with the curve on the left, and the frequently rounded *va* (34), — with the types of the Kuṣāṇa period. Peculiar is its *ṣa* (16). Its cursive medial *a*, which is used only in *nā* (25) and in *rā* (compare pl. VII, 33, III), and the *au* in *yau* (31), besides which the older form of pl. II, 28, XVIII, is used, appear here for the first time.

The letters on the somewhat older coins¹ of Rudradāman's grandfather Caṣṭana and of his father Jayadāman, which probably were struck in Ujjain, exhibit no material differences. Among the later Kṣātrapa inscriptions,² that from Junāgaḥ, incised during the reign of Rudradāman's son Rudrasimha, fully agrees with the Girnār Praśasti. The Gunda inscription of the same prince from the year 103 (or, according to the usual assumption, from A. D. 180), and the Jaśdan inscription of Rudrasimha's son Rudrasena from the year 127 (?) or A. D. 204-205, show a few more advanced characters. Both these documents offer the bipartite subscribed *ya*; and the second has several times the northern *ma* of the Gupta period (pl. IV, 31, I ff.), as well as the *e* standing above the line (compare, for instance, *ne*, pl. VII, 27, V). The same *ma*, or a similar sign with a straight base-stroke, appears also frequently on the coins of the later Kṣātrapas.³ Its occurrence probably indicates a northern influence, perhaps that a northern alphabet was used at the same time; compare § 28 below, A.

B. — The alphabets of the cave-inscriptions of the western Dekhaṇ and the Koṅkaṇ; Plate III.

[43] The writing of the western Dekhaṇ and the Koṅkaṇ in the caves of Nāsik, Junnar, Kārle, Kaṣheri Kuḍā, &c, shows three varieties, an "archaistic" or retrograde type, a more advanced one with mostly faint traces of southern peculiarities, and an ornamental one. The first two appear in the oldest dated inscriptions of the Saka Uṣavadāta or Uṣabhadāta (Uṣabhadatta),⁴ the son-in-law of the Kṣāharāta king and Kṣātrapa Nahapāna from the years 41 to 45 of, according to the usual assumption, the Saka era,⁵ or from A. D. 112 to 122. The Kārle inscription No. 19 (col. VII) offers the "archaistic" or retrograde type, among the letters of which *gha* (10), *ja* (13), *da* (23), *bha* (29), *ya* (31), *la* (33), *sa* (37) and *ha* (38) come close to the forms in the older alphabets of pl. II, especially to those of the oldest Andhra inscriptions in cols. XXIII, XXIV. The same variety is found in some other, partly older, inscriptions of the same caves,⁶ and must be regarded as a direct development from the ancient Andhra type. It shows only very faint traces of the southern peculiarities enumerated above. The curves at the ends of the verticals are only rudimentary. The vertical of *la* is curved, but to the right. The triangular *dha* (24), which appears here for the first time, is found also in other alphabets of this plate (see col. XI ff.); the abnormal *kha* (8) is confined to Kārle No. 19.

Against this rather clumsy alphabet, we find in Uṣavadāta's inscriptions from Nāsik (cols. VIII, IX) very neatly made letters, the *ductus* of which resembles that of Śoḍāsa's inscriptions (col. I) and of the Girnār Praśasti (col. VI). They show no trace of archaic forms, and the traces of the southern peculiarities are faint or entirely wanting. Only the southern *da* (18) is distinct and constant. Noteworthy are *śa* (35, 42, VIII), which agrees with that of col. VI, the final *m* in *dilham* (41, VIII), and the tripartite subscribed *ya* in *bhyaḥ* (41, IX).

³ See the plates cited in note 1 above.

⁴ Uṣabhadāta only in Kārle No. 19, B.ASRWI. 4, pl. 51.

⁵ Thus BHAGYĀRKA, Early Hist. of the Dekhaṇ, 23, and BHAGYĀNLĀL, J.EAS. 1890, 642; see also BÜHLER, Die ind. Inschr. u. das. Alter der ind. Kunstpoesie, 57 f.; while Cunningham, CMI. 3 f., refers Nahapāna's dates to the Mālava era of B. C. 57-36, and OLDENBERG, IA. 10, 227, places Nahapāna between A. D. 55 and 100.

⁶ Kārle, Nos. 1—14, B.ASRWI. 4, pl. 47, 48; Nāsik, No. 4, op. cit., pl. 51.

Very similar to this script is that of the Nāsik inscriptions (No. 11, *a*, *b*, = col. X) of the Andhra king Gotamiputa Sātakaṇi, who destroyed the Kṣaharāta dynasty, — possibly just Nahapāna and Usavadāta, — and of his son Siri-Puṣumāyi, Puṣumāi or Pulimāvi (Nāsik No. 14, = col. XI), who is mentioned by Ptolemy as Siri-Polemaios or Polemios.¹ The only material difference occurs in the triangular *dha* (24, XI; compare col. VII), which however is by no means constant. Nearly of the same type are the alphabets shewn in col. XII. from the Nāsik inscription of the somewhat later Andhra king Gotamiputa Siriyāṇa Sātakaṇi, in col. XIII. from the undated inscription Nāsik No. 20, and in col. XIV. from Nāsik No. 12, incised during the reign of the Ābhīra king Īśvarasena.² In col. XII, however, we have a peculiar form of *ta* (21) developed from a looped form, a looped *na* (25) somewhat differing from the northern form in col. IV, a *ra* (32) with a stronger curve, and a *la* (33) with the vertical bent towards the left; further, in col. XIII. a looped *ta* (21), and in col. XIV. a *ta* (21) and a *na* (25) derived from looped forms, a *ya* (31) with a curve on the left, a *la* (33) bent towards the left, a cursive subscribed *āu* in *jūāḥ* (40), and a peculiar, *r*-like, medial *u* in *du* (23), which reappears in later southern inscriptions; compare, for instance, *ḍhu*, pl. VII, 30, XII, and the *ū* in *tū*, pl. III, 21, XVII. XIX.

Cols. XV, XVI, give two somewhat differing specimens of the ornamental variety of this period according to the undated inscriptions of Kuṇḍā (Nos. 1—6, 11, 20) and of Junnar (No. 3). Both agree in the ornamental treatment of medial *i* and *ī*. But the Kuṇḍā inscriptions extend it to the curves at the ends of all verticals, and show notches in the left [44] strokes of *pa* (26) and *ba* (28; compare col. VI). In col. XVI. there are two other noteworthy signs, the bipartite subscript *ya* in *yya* (40), and the *śa* with the horizontal bar in *śri* (41; compare 35, III—V). Ornamental forms, resembling those of cols. XV, XVI, are found also in the approximately datable inscriptions of Puṣumāyi in Kārlē Nos. 20, 22, and of the minister of the queen of his successor Vāsīṭhīputa Sātakaṇi in Kaṇheri No. 11. The first two of these documents show a looped *ta* and a *na* like that of col. XVII; the third exhibits the neat characters of Western Kṣātrapa inscriptions. It is, therefore, certain that during the 2nd century A. D. all these three varieties were used promiscuously in the western Dekhaṇ and the Koṅkaṇ,³ and the inscriptions from the Amarāvati Stūpa,⁴ prove that they occurred also on the eastern coast of India. The contemporaneous employment of more advanced types and of more archaic ones with an admixture of more modern signs will have to be explained in this, as in other cases, by a desire to select archaic and monumental forms for epigraphic purposes and a failure to completely carry out this intention.

C. — The alphabet of the Jaggayyapeṭa inscriptions; Plate III.

In the Kistna districts of the eastern coast, a still more ornamental alphabet, found in the Jaggayyapeṭa inscriptions from the time of the Ikṣvāku king Sirivīra Purisadatta (cols. XVII, XVIII), as well as in some Amarāvati inscriptions,⁵ was developed out of the ornamental variety just discussed, probably somewhat later, in the 3rd century A. D. One of its most prominent characteristics is the very considerable elongation of the verticals of *ḍ*, *ḍā*, *ka*, *ṇa*, *ra* and *la*, as well as of the medial *i*, *ī* and *u*. To a later time point the cursive forms of *tha* and *ka*, which latter agrees with the northern Gupta form (pl. IV, 39, I, VI), and the medial *e* of *me* (30), which, with its downward curve, agrees with the *e* of the later southern inscriptions (compare 30, XIX, XX, and pl. VII, 35, XII), and the medial *ū* in *tū* (21; compare col. XIX, and pl. VII, 30, XX). The medial *ū* of *tū* (40), in which the stroke expressing the length of the vowel has been attached to the head of the consonant, is entirely abnormal.

¹ See the works quoted in note 5 on page 42 above.

² According to BHAGVĀNĀL'S estimate, J.BAS. 1894, 667, "somewhat later than Nahapāna."

⁵ B.AS.E.S.I. 1, pl. 58, Nos. 35, 36; pl. 59, Nos. 33, 40—42; pl. 60, No. 46; pl. 61, No. 54; pl. 62.

D. — The alphabet of the Pallava Prākṛit land-grants; Plate III.

The highly cursive writing of the Prākṛit land-grants of the Pallava kings Vijayabuddhavarman and Sivaskandavarman from Kāñcī (Conjeveram) in the Tamil districts,¹ shows in its *ductus* a certain relationship to the Jaggayyapeta inscriptions. But it is not doubtful that these documents are much later, though it is for the present impossible to fix their dates exactly. The use of Prākṛit for official purposes perhaps indicates that they are not later than the first half of the 4th century A. D. The broad *E* (5, XX) with the rudimentary vertical to the right (compare pl. VII, 6, XI ff.), the *ḍa* with a tail in *ṇdam* (40, XX; compare pl. VII, 19, IV f.), the subscribed *tha* open on the right in *ttha* (41, XIX; compare pl. VII, 45, XX), and the constantly looped *o* in *lo* (33, XX; compare pl. VII, 34, III f., XIII, XVII) point to the later period.

IV. THE NORTHERN ALPHABETS FROM ABOUT A. D. 350.²

§ 21. — Definition and varieties.

[45] By the term "northern alphabets" I understand with BURGESS, FLEET,³ and others, that large group of epigraphic and literary scripts, which from about A. D. 350 conquers the whole

Scale of the three plates = two-thirds of the facsimiles.

³ F.GI (CII. 3), 3 f., and passim.

wide territory north of the Narmadā, with the exception of Kāthiāvāḍ and northern Gujarāt, and which, spreading in the course of time more and more, finally is used in a number of varieties for nearly all the Aryan languages of India. Their origin is to be found in the cursive forms, which first appear in the addition to the Aśoka edict VI. of Dhauli, and in a number of signs of the Kāśī version (see above, page 6 f.), and later are found, occasionally or constantly, in some of the Jaina votive inscriptions of the Kuṣāna period (see above, § 19, A). Their general type is that of a cursive alphabet with signs reduced at the top to the same height, and made throughout, as much as possible, equal in breadth. As the occurrence of ancient MSS. and various peculiarities of the letters, such as the formation of wedges out of the *Serifs* at the ends of the verticals, clearly prove, they were always written with a pen or a brush and ink. Their most important common characteristics are: — (1) The absence of curves at the lower ends of the verticals of *A*, *Ā*, *ka*, *ṇa*, &c. (with occasional exceptions for *ra*); (2) the use of the *Serif* at the left down-strokes of *kha*, *ga*, and *ṣa*; (3) the division of the original vertical of *na* and of its upper bar; (4) the use of a looped *na* and of a *ta* without a loop; (5) the transformation of the lower portion of *ma* into a small knob or loop attached to the left of the letter; (6) the shortening of the vertical of *la*; (7) the turn of the medial *i* to the left, which is soon followed by the twist of medial *i* to the right; (8) the development of curves, open to the left, at the end of the originally horizontal medial *u*; and (9) the use of a curve, open to the right, for medial *r*.

While all the alphabets represented in plates IV, V, VI, show these common characteristics or further developments from them, they may be divided, according to other peculiarities, into seven larger groups, most of which again comprise several varieties: —

(1) The epigraphic North-Indian alphabet of the 4th and 5th centuries, commonly called the Gupta alphabet, which, according to HOERNLE's researches,¹ has an eastern and a western variety, among which the second again has two branches, and with the western variety of which the literary alphabet of the Bower MS. and of some other documents from Kashgar is closely connected.

(2) The acute-angled or Siddhamātrkā (?) alphabet with wedges at the verticals of the letters, which is first found in the palm-leaves of Horiuzi, and towards the end of the 6th century in the Mahānāman inscription from Gayā and in the Lakkhamaṇḍal Prāsasti.

(3) The Nāgarī with its long-drawn, tailed, letters, and long top-strokes, the first certain traces of which occur in the 7th century.

(4) The Sāradā alphabet, a northern variety of the western Gupta type, first found about A. D. 800.

(5) The eastern Proto-Bengālī alphabet with much rounded, cursive letters, and with hooks or hollow triangles at the tops of the verticals, first traceable in the 11th century.

(6) The hooked alphabet of Nepāl, [46] which is closely connected with the Proto-Bengālī and occurs in MSS. from the 11th century onwards.

During the 4th and 5th centuries, the rule of these alphabets to the north of the Narmadā is by no means undisputed. In the west we find, as far north as Bijayagaḥ (Bhartpur), inscriptions in southern characters, or with an admixture of southern letters (see below, § 27). In the 6th and 7th centuries this mixture no longer occurs. Only the so-called "arrow-head" type (see below, § 26, C), the seventh variety on plates IV—VI, which appears in rather late times in Bengal and Nepāl, offers an instance of the importation of a southern script into Northern India.

¹ J.ASB. 60, 80 ff.; and IA. 21, 22 ff.

On the other hand, we meet, from the 7th century, with inscriptions in northern characters first on the coast, in the west in Gujarāt,¹ and in the east even beyond Madras.² Documents of this kind appear from the middle of the 8th century also in the central Dekhaṇ, and during the 12th and 13th centuries they penetrate as far as Vijayanagara in the Kanarese country (see below, § 23). But they never come into sole use beyond the northern limit of the Dravidian districts.

The ancient MSS. hitherto found in Kashgar, Japan and Nepāl, the oldest of which probably were written in the 4th century,³ show only northern letters. The palm-leaf MSS. of Western India, which begin in the 10th century, agree with the inscriptions of the period, and prove that the northern Nāgarī was generally used in Rājputāna, Gujarāt,⁴ and in the northern Dekhaṇ as far as Devagiri (Daulatābād).⁵ The gradual advance of the northern characters towards the south probably is explained by the predilection of many southern kings for northern customs, and by the immigration of northern Brahmans, castes of scribes, and Buddhist and Jaina monks, to which facts the statements in various inscriptions and the historical tradition bear witness.⁶

§ 22.—The so-called Gupta alphabet of the 4th and 5th centuries A. D.; Plate IV.

A.—Varieties.

The differences between the eastern and western varieties of the so-called Gupta [47] alphabet appear in the signs for *la*, *ṣa* and *ha*.⁷ In the eastern variety the left limb of *la* (plate IV, 34, I—III, V, VI) is turned sharply downwards; compare the *la* of the Jangada separate edicts (see above, § 16, C, 35). Further, the base-stroke of *ṣa* (IV, 37, I—III, V, VI) is made round and attached as a loop to the slanting central bar. Finally, the base-stroke of *ha* (IV, 39, I—III, V, VI) is suppressed, and its hook, attached to the vertical, is turned sharply to the left, exactly as in the Jaggayyapeṭa inscriptions (see above, § 20, C). In the western variety these three letters have the older and fuller forms.

The specimens of the eastern variety in plate IV. have been taken from the oldest Gupta inscription, Harīṣeṇa's Allahabad Prasasti (cols. I—III), which certainly was incised during the reign of Samudragupta,⁸ probably between A. D. 370 and 390, and from the Kahāṇḍ Prasasti of A. D. 460 (cols. V, VI) of the time of Skandagupta. It appears, besides, in FLEET's Gupta Inscriptions (CII. 3) Nos. 6—9, 15, 64, 65, 77; in BHAGVĀNLĀL's inscriptions from Nepāl, Nos. 1—3;⁹ and in CUNNINGHAM's Gayā inscription of Saṃvat 64.¹⁰ The fact that FLEET's No. 6 is found far west, near Bhilsa in Mālva, may be explained by its having been incised, during an expedition of Candragupta II. to Mālva, at the command of his minister, who calls himself an inhabitant of Pāṭaliputra. Nothing is known regarding the origin of FLEET's No. 77, which is incised on a seal, purchased in Lahore, but possibly manufactured in Eastern India.

¹ Fragments of inscriptions with northern characters of this period, from Valabhī, are preserved in the Museums of Bombay (the Branch of the Royal Asiatic Society) and Rājkoṭ. Compare also the sign-manuals on the Gurjara land-grants, J.RAS., 1835, 247 ff.

² B. EISP. 53, and plate 22, c; IA. 18, 161, 172.

³ I agree with HORNLE, who considers certain portions of the new Godfrey collection from Kashgar to be older than the Bower MS.; J.ASB. 66, 258.

⁴ KIELHORN, Report on Sanskrit MSS., 1880-81, 1 ff.; PETERSON, Second Report, Appendix I, and Third Report, Appendix I.

⁵ J.RAS. 1895, 247.

⁶ Compare B. EISP. 20, 53 ff.; FLEET in EI. 3, 2.

⁷ Compare HORNLE, J.ASB. 60, 81, who mentions *ṣa* alone, because his remarks refer also to the type discussed below in § 23.

⁸ SB.WA. 122, XI, 32 ff.

⁹ IA. 9, 163 ff.; in my opinion the era is not, as FLEET holds in Gupta Inscriptions (CII. 3), Introduction, 96, 177 ff., that of A. D. 318-19, but one peculiar to the Nepalese, the exact beginning of which has still to be determined.

¹⁰ C.M.G. pl. 25; the era may be that of the Guptas.

The western variety of the Gupta alphabet again appears in two forms, a cursive round-hand and an angular, monumental, type. The second form, which shews very characteristic thick top-lines and a hooked *ra* (33), is represented in plate IV, col. IV, by the alphabet of the Bilsad Prasasti of A. D. 415. Another fine example is found in FLEET's No. 32, from the Meharauli iron pillar near Delhi. Specimens of the cursive form are given in col. VII. from the Indor copper-plate of A. D. 465, in col. VIII. from Toramāpa's Kura inscription, probably of the second half of the 5th century,¹ and in col. IX. from the Kāritālī copper-plate of Jayanātha of Uccakalpa, dated the year 174 or probably A. D. 423.² The same type is found in FLEET's Nos. 4, 13, 16, 19, 22—31, 36, 61, 63, 66, 67, 69, 74, 76, and in the Jaina votive inscriptions from Mathurā, new series, Nos. 38, 39.³ It deserves to be noted that FLEET's No. 18 from Bhitari is found in a district where one would expect the eastern variety. FLEET's No. 61, the Jaina inscription from Udayagiri in Mālva, shows a mixture of the northern characters with southern ones, as it offers throughout *A*, *Ā*, with a curve, and once a southern *r*. Perhaps the same may be said of FLEET's No. 59, the Bijayagadh inscription from Bhartpur in Rājputāna, where *ra* shows a curve at the end and medial *i* and *ī* resemble those in plate III, col. XVI. The characters on the Gupta coins⁴ are frequently retrograde, and offer, *e. g.*, the angular *ma* of the Kuṣana period.

B. — Characteristics of the epigraphic Gupta alphabet.

The following particularly important or characteristic peculiarities of the Gupta inscriptions deserve to be noticed in detail: —

(1) The lower parts of the right-hand verticals of *A*, *Ā*, *ga*, *ḍa*, *ta*, *bha* and *śa* are so much elongated, and those of *ka* and *ra* remain so long, that these eight signs have about double the length of those without verticals. This is particularly visible in the older stone inscriptions; on the copper-plates they are often shortened.

(2) The right-hand portion of *gha*, *pa*, *pha*, *ṣa* and *so* shows an angle, whereby later the development of tails or verticals on the right of these signs has been caused.

(3) Since the middle of the 5th century, the lower portion of the left limb of *A* (1, IX, XI) shows the curve, open to the left, which appears in all the later forms of the letter; the sign of the length of *Ā* (2, VII—IX) [48] is attached to the foot of the right vertical.

(4) In addition to the *I* of the Kuṣana period (3, I, V), there occur, owing to the predilection for letters flattened at the top, the also later frequent *I* with two dots above (3, VII), and that consisting of a short horizontal line with two dots below (3, IX), which latter is the parent of the later southern *I* (plates VII, VIII, and § 28 below) and of that of the Nāgari (below, § 24, A, 4).

(5) The rudimentary curves at the left end of *U*, *Ū* and *O* are more fully developed in the 5th century; compare above, § 19, B, 4.

(6) The guttural *ṇa* begins to appear instead of the Anusvāra before *śa* and *ḥa* (11, VII), perhaps in consequence of the faulty pronunciation, blamed in the Śikṣās.⁵

(7) The third horizontal line of *ja* (14, I—III, VII, VIII) begins to slant downwards, and occasionally shows a curve at the end, whereby later the new forms of cols. XXI—XXIII. are caused.

¹ IA. 18, 225.

² According to FLEET, IA. 19, 227 f., the kings of Uccakalpa probably dated according to the Cedi or Kalaouri era of A. D. 249.

³ EI. 2, 210.

⁴ J.ASB. 53, pl. 2—4; J.BAS., 1889, pl. 1—4, and p. 34 ff., and 1893, pl. 2.

⁵ Haug, Wedischer Accent, 64.

(8) The palatal *ñi* (16, I, II; 42, I, VI, VII, XI) is frequently made cursive and round, and is occasionally laid on the side in order to save space; compare also *jñuḥ*, plate III, 40, XIV. But older, angular, forms likewise occur (42, V).

(9) The *ṣa* (17, I—III, IX) is often flattened down at the top.

(10) The *ṣa* of 21, I, II, shows a little stroke at the right end, caused by an inexact formation of the hook on the right, and in the second sign a cursive loop on the left; in 21, III, the letter has been laid on the side and somewhat resembles the Nāgarī *ṣa*.

(11) The *tha* (23, I, V—IX) is mostly elliptical or flattened on the right, and a cross-bar often replaces the dot in the centre; but the old form likewise survives (23, II, III).¹

(12) The *ya* (32, I—IX) is mostly tripartite, but sometimes, particularly in *ye*, *yai* and *yo*, transitional forms with the loop, like the later ones in 32, XIII, XVI, appear, which lead up to the bipartite *ya*.² The oldest instance of the independent looped *ya* is found in FLAHERTY's No. 59 of A. D. 371, but the Kuṣāna inscriptions show the looped subscript *ya* even earlier (see above, § 19, B, 12).

(13) The left limb of *sa* (38, I—III, V, VI, VIII) often becomes a loop, as happens already in some Kuṣāna inscriptions (§ 19, B, 16). A substitute for the loop is the triangle (probably giving the outlines of a wedge), which occurs in the three most ancient inscriptions from Nepāl; compare the later *sa* of 38, XII. But the older hook is equally common.

(14) The rare *ṣa* (40, I—III) is found also in FLAHERTY's No. 67, line 1.

(15) The signs for the medial vowels agree in many particulars with those of the Kuṣāna period. But the open semicircle for *ā* in *ṣā* (17, II), which is found also in *ṣā*, is an innovation. Further, the medial *i*, for instance, of *khi* (8, III, VI, IX), is drawn further to the left than in the earlier inscriptions. In some inscriptions like Mathurā, new series, Nos. 38, 39, the medial *i* consists merely of a curve, going to the right, though the form with two horns (as in *di*, 24, I), and a looped one (as in *bhi*, 30, IV), are more common. Medial *u* is mostly represented by the still used curve, which in *ru* (33, III, VI) appears abnormally at the end of *ra*; but in *gu* (8, II, VI), *tu*, *bhu* (30, I) and *ku* (36, III) the vowel rises upwards. For medial *ū* there are, besides an old form in *gū* (9, IV), other combinations in *bhū* (30, II, VI) and *ṣū* (42, II) and a later very common, cursive form in *dhū* (25, II, VI). One of the Mātrās of *ai* and *o* is often placed vertically, as in *gai*, 32, III; in *go*, 9, III; and in *ṣo*, 21, III.

(16) The desire to save space causes the cursive *ṣa*, *ṣa* (see *ṣa*, 45, IX) and *tha* (see *sthā*, 45, V; *stha*, 46, IX) to be laid on the side, in case they form the second elements of ligatures. From the 5th century, *rya* (45, VII) is expressed by a full *ra* with a subscript *ya*.

(17) The first certain Virāma (see *dhā*, 43, VII), consisting of a horizontal stroke above the small final, dates likewise from the 5th century; the northern Jihvāmūliya (*ḥka*, 46, II) and the Upadhmaniya (*ḥpā*, 46, III) occur already in the 4th century.

C.—The Gupta alphabet in manuscripts.

Among the types of the Bower MS., which belongs, according to HERNLE's and my own opinion,³ to the 5th century, I have given [49] in plate VI, cols. I—IV, only the alphabet of the portion which HERNLE marks A, since the published parts of his B. and C. are not sufficiently extensive for a paleographic enquiry. Its characters differ very little from those of the epigraphic documents of the Gupta period, especially from the copper-plates. The *Seri's* at the tops of the vertical strokes, however, are made more carefully and nearly throughout worked

¹ Compare facsimile in FLAHERTY's Gupta Inscriptions (CII. 8), No. 61.

² J.A.S.B. 60, 83 ff.

³ J.A.S.B. 60, 92 f.; WZKM. 5, 104 f. The discovery of an inscription of the 7th century with mostly tripartite *ya*, EI. 4, 29, makes a modification of HERNLE's argumentation necessary, but does not invalidate his final result.

up with the latter into real wedges. If a letter like *gha* (plate VI, 13, I—IV) has several upstrokes, the *Serifs* are added regularly to all of them. Similarly, the lower ends of vertical strokes more regularly bear *Serifs* or are converted into wedges or little buttons. The greater regularity of the writing is what may be expected in a good MS., the material of which offers fewer difficulties than stone or copper. The invariable use of the *Serifs* has led to the formation of the *ka* (15, IV) with the loop on the left¹ (compare 15, I, III), which appears occasionally in the Bower MS., but is noticeable only later, since A. D. 588-89 (see plate IV, 7, XIII), in the inscriptions. Further, the Bower MS. offers in rare cases, *e. g.* in *prajajayet* (fol. 31a, 11), an archaic form of the bipartite *ya*. Finally, it makes us acquainted with some signs which, owing to the rarity of the sounds expressed by them, cannot occur frequently in the inscriptions and hitherto have not been traced in those of the 4th and 5th centuries. To these belong the long *ī* (4, I), in which the upper and lower dots of the ancient sign (compare plate VI, 4, V, VII) have been converted into a straight stroke, and further the short *ṛ*, which clearly consists of a *ra* and a medial *r* (compare above, § 1; and below, § 24, A, 7), also the *AU* (14, I, II), which fully agrees with the epigraphic character of A. D. 532 (plate IV, 6, X), and the subscript *r* of *nr* (34, III) which consists of two *r*, placed horizontally side by side.

§ 23. — The acute-angled and Nāgarī types; Plates IV, V, VI.

About the beginning of the sixth century we find in the northern inscriptions, both of Eastern and Western India (plate IV, cols. X—XII),² distinct beginnings of a new development, which first leads to the forms of the Gayā inscription of A. D. 538-80 (plate IV, cols. XIII, XIV) and of the probably not much later Lakkhāmaṇḍal Praśasti (plate IV, cols. XV, XVI).³ Their chief characteristic is that the letters slope from the right to the left, and show acute angles at the lower or at the right ends, as well as that the tops of the vertical or slanting lines invariably bear small wedges, and their ends either show the same ornaments or protuberances on the right. These peculiarities are observable in a large number of inscriptions of the next four centuries, and it seems to me advisable to class the characters of the whole group as those of the "acute-angled alphabet." Formerly⁴ the term "nail-headed" was frequently applied to them. Of late this has been given up and no new generic name has been proposed. Thus FLEET says, in his edition of the Gayā inscription,⁵ only that the letters belong to the northern class of alphabets. Possibly the Indian name may have been Siddhamātrkā (*lipi*). For BERŪNĪ⁶ states that an alphabet [50] of this name was used in his time (about A. D. 1030) in Kashmir and in Benares, while the Nāgarī was current in Mālva. If the usual writing of Benares resembled that of Kashmir, it cannot have had the long horizontal top-strokes which always characterise the Nāgarī. BERŪNĪ's note is, however, too brief and vague for a definite settlement of the question.

The two inscriptions, mentioned above, which, like the other contemporaneous cognate documents, are connected with the western Gupta alphabet, mark the first step in the development of the acute angled alphabet during the sixth century. And to the same subdivision belong, among the MSS., the Horiuzi palm-leaves, which according to the Japanese tradition certainly existed in the second half of the 6th century.⁷ If fourteen years ago, when I wrote my paleographical essay on these leaves in the *Anecdota Oxoniensia*, the facsimiles of the Gayā and Lakkhāmaṇḍal inscriptions had been accessible, it would have sufficed to compare their letters in order to prove the correctness of the statements of the Japanese.

⁴ See, *e. g.*, TOD, *Annals of Rajasthan*, 1, 700 ff., Madras edition.

⁵ *India*, 1, 173 (SACHAU).

⁶ *Gupta Inscriptions* (CIL. 3), 274.

⁷ *Anec. Oxo n.*, Aryan Series, 1, 3, 64.

The characters of Amśuvarman's inscription of A. D. 635 (plate IV, col. XVII) and of the nearly contemporaneous Aphaṇḍ Prāsasti of Ādityasena (plate IV, cols. XVIII, XIX) show the further progress of the acute-angled alphabet during the 7th century. It must, however, be noted that Amśuvarman's inscriptions and other Nepalese documents of the same time have the round *ga* and thus are allied with the eastern Gupta character, while the Aphaṇḍ Prāsasti and its allies from India proper are connected with the western variety of the old northern alphabet.¹ FLEET calls this second variety, on account of the more marked twist of the lower ends of the strokes, "the Kuṣṭha variety of the Magadha alphabet of the 7th century."² I feel disinclined to adopt the term "Kuṣṭha," which was first used by PRINSEP,³ and since has been employed by many other writers, because it is based on an erroneous rendering of the expression *kuṣṭha akṣara* in the Deval Prāsasti.⁴ I would remove it from the paleographic terminology. KIELHORN likewise avoids it in his paleographic remarks on various inscriptions of this period.⁵

During the 8th—10th centuries, the development of the acute-angled or Siddhamātrkā alphabet progresses more and more in the direction of its successor, the Nāgarī alphabet, which latter in its old North-Indian form is distinguished merely by the substitution of straight top-strokes for the wedges on the verticals. Documents with a mixture of wedges and straight top-strokes are also found; and occasionally it becomes difficult to decide how a particular inscription is to be classed.

To this third and last variety⁶ of the acute-angled alphabet belong the characters of the Multāi copper-plates (plate IV, col. XX) of A. D. 708-709,⁷ of the Dighvā-Dubauli plate, probably of A. D. 761 (plate IV, col. XXI),⁸ of the Gwalior inscription of A. D. 876 (plate V, col. II), and of the Ghosrāva inscription of the 9th or 10th century (plate V, col. VI),⁹ as well as, among the MSS., those of the Cambridge MS. No. 1049 (plate VI, col. VII), dated in the year 252,¹⁰ probably of Amśuvarman's era of A. D. 594,¹¹ or in A. D. 846. An intermediate position between the acute-angled and the Nāgarī alphabets, is occupied by the letters of the Pehoa Prāsasti of about A. D. 900 (plate V, col. III), of the Deval Prāsasti of A. D. 992 or 993 (plate V, col. VIII) and of the copper-plates of the Paramāra king Vākpati II. of A. D. 974 (plate V, col. X).¹² They, no doubt, show the wedges; but these are so broad that they produce the same effect as the long straight top-strokes, and that, *e. g.*, the open tops of *A*, *Ā*, *gha*, *pa*, &c., are closed, just as in the Nāgarī inscriptions. Specimens of the mixture of wedges and straight top-strokes, mentioned above, are found in the Bādhanpur and Vanī-Diḍḍori copper-plates of the Rāṣṭrakūṭa king [51] Govinda III. of A. D. 807-808 (plate V, col. IV),¹³ and the Harṣa inscription of the Cāhamāna Vīraha II. of A. D. 973 (plate V, col. IX).¹⁴

¹ Compare also the facsimiles in IA. 9, 163 ff., Nos. 4—10, 12; BENDALL, *Journey in Nepāl*, 72, Nos. 1, 2; and HORSNELL's remarks in J.ASB. 60, 85.

² Gupta Inscriptions (CIL. 3), 201, 284; EI. 3, 328, note 1.

³ J.ASB. 6, 778, pl. 41.

⁴ EI. 1, 76. In confirmation of my explanation of the phrase *kuṣṭhānyakṣarāṇi viduṣā*, "by him who knows crooked letters," *i. e.*, letters difficult to read, I would point to Vikramānukarita, 18, 42, where we have the statement that queen Sūryamati did not allow herself to be cheated *kāyasthāiḥ kuṣṭha-lipībhiḥ*, "by writers using crooked alphabets."

¹⁴ Compare also facsimile, IA. 16, 174.

The last-mentioned two inscriptions are, however, by no means the oldest documents, in which Nāgarī letters occur. The first undoubtedly genuine specimens¹ are found in the signatures of the Gurjara princes on the copper-plates of Kaira (of A. D. 628 and 633), of Dabhoi (A. D. 642), of Nausāri (A. D. 705), and of Kāvī (A. D. 786),² the texts of which are written in a southern alphabet. In the first-mentioned three signatures, the Nāgarī letters are in the minority, as most of the signs show either more archaic northern or southern forms. Only in the fourth signature the Nāgarī is used throughout and is fully developed. But the most ancient document, written throughout in Nāgarī, is the Sāmāngad grant of the Rāṣtrakūṭa king Dantidurga of A. D. 754 (plate IV, col. XXII).³ Much of the same type are the characters of the Kaṇheri inscriptions Nos. 15 and 43 (plate V, col. V),⁴ which were respectively incised in A. D. 851 and 877 during the reigns of the Silāhāra princes Pullaśakti and Kapardin II.

The Sāmāngad and Kaṇheri inscriptions, together with some others of the 9th century,⁵ show the archaic variety of the southern Nāgarī, the fully developed form of which is exhibited in the copper-plates of Kaṇthem (plate V, col. XVII),⁶ which were incised during the reign of the Cālukya king Vikramāditya V, in A. D. 1009-10. The southern Nāgarī, of the 8th—11th centuries, which differs from its northern sister of the same period chiefly by the want of the small tails slanting to the right from the ends of the verticals, and in general by stiffer forms, besides occurs in numerous inscriptions of the Silāhāras and Yādavas from the Marāṭhā country and the Koṅkan, as well as of a Rāṭṭa prince from the Belgaum collectorate.⁷ Its latest development during the 13th—16th centuries is found in the inscriptions of the kings of Vijayanagara or Vidyānagara in the Kanarese country.⁸ It still survives in the Bālbodh or Devanāgarī of the Marāṭhā districts, and in Southern India it has produced the so-called Nandināgarī which is still used for MSS.⁹

In Northern and Central India, the Nāgarī appears first on the copper-plate of the Mahārāja Vināyakapāla of Mahodaya (plate IV, col. XXIII),¹⁰ probably of A. D. 794, which however exhibits some archaisms and peculiarities in the signs for *kha*, *ga*, and *na*, found also in later inscriptions from Eastern India. The fact that an earlier inscription from the Kanarese country, the incision of which is due to a Brahman from Northern India (see EI. 3, 1 ff.), shows a mixture of Nāgarī and acute-angled letters, makes it probable that the northern Nāgarī was in use at least since the beginning of the 8th century. From the next century, we have only a few inscriptions in northern Nāgarī.¹¹ But after A. D. 950 their number increases, and in the 11th century the script becomes paramount in nearly all the districts north of the Narmadā.

The characters of the Siyaḍoṇī inscriptions from Central India (plate V, col. VII), the dates of which run from A. D. 968, and those of the copper-plate of the first Cālukya of Gajarāt, incised in A. D. 987 (plate V, col. XI),¹² show the forms of the northern Nāgarī of the 10th century. The copper-plates of the Rāṣtrakūṭa (Gāhaḍaḥīla) king Madanapāla of Kanauj in Northern India, dated A. D. 1097 (plate V, col. XII), the Udaypur Prasasti of the Paramāra of Mālva (probable date about A. D. 1060) in the west of Central India (plate V, col. XIII), the Nanyaurā plates of the Cāndella Devavarman of A. D. 1050 (plate V, col. XIV) and of

¹ The genuineness of the earlier Umetā and Bagumrā plates (IA. 7, 68; 17, 199) is disputed (IA. 18, 91 ff.); their Nāgarī letters have been given in *Aneq. Oxon.*, Ary. Series, 1, 8, pl. 6.

¹¹ See the facsimile, IA. 13, 64.

the Kalacuri Karna of Tripura, dated A. D. 1042 (plate V, col. XV), both from the eastern part of Central India, and the plates of the Caulukya Bhīma I. of Gujārāt, dated A. D. 1029 (plate V, col. XVI), give specimens of the northern Nāgarī of the 11th century.¹ Finally, the northern Nāgarī of A. D. 1100—1207 is illustrated by the alphabets of a plate of Jayaccandra, the last Rāṣṭrakūṭa (Gāhādavāla) king of Kanauj, dated A. D. 1175 (plate V, col. XX), of the plates of the last Caulukya of Gujārāt, Bhīma II., dated A. D. 1199 and 1207 [52] (plate V, col. XXI), of the plate of the Paramāra Udayavarman of Mālva, dated A. D. 1200 (plate V, col. XXII), and of the Ratnapur stone inscription from the reign of the Kalacuri Jājalla of Tripura, dated A. D. 1114 (plate V, col. XXIII).²

With the characters of these Nāgarī inscriptions, agree those of the now numerous ancient palm-leaf MSS. from Gujārāt, Rājputāna and the northern Dekhan, the dates of which run certainly from the 11th, and possibly from the 10th century. Cols. XV—XVII. of plate VI. exhibit their alphabet chiefly according to LEUMANN's photographs and tracings of the Viśeṣāśyaśakabhāṣyaśikā, dated A. D. 1061, together with some supplements from the Royal Asiatic Society's Gujārātnamahodadhī, of A. D. 1229.³ But a number of MSS. from Nepāl, belonging to the 11th and 12th centuries, show the northern Nāgarī of the preceding century. And col. XIII. of plate VI. offers a specimen from No. 866, the oldest Cambridge MS. of this class, which is dated A. D. 1008.⁴ Of the same type is the alphabet of plate VI, col. XIV, taken from the reproduction of col. 1 of WYLIE's copy of the Vajracchedikā in Anecdota Oxoniensia, Aryan Series, 1, 1, plate 4.

§ 24. — Details of the changes in the acute-angled and the Nāgarī alphabets.⁵

A. — The Mātrkāḥ.

Among the numerous changes, which the letters of the acute-angled and Nāgarī scripts undergo in course of time, the following more important ones, affecting the Mātrkāḥ or radical signs, deserve special mention: —

(1) The signs for *E*, *gha*, *ca*, *tha*, *dha*, *pa*, *ba*, *ma*, *ya*, *la*, *va*, *ṣa* and *sa*, develop gradually, — the later the more distinctly, — shorter or longer tails, which first slant off towards the right below the bottom-line of the letters, but later, in the Nāgarī, become vertical strokes, except in the case of *E*. [53] From the 10th century similar pendent lines appear in the middle of *cha* (plate V, 16, II, III, &c.), and of *dha* (plate V, 23, II), of *pha* (plate V, III, &c.) and of *ha* (plate V, 42, II—IV, &c.), which the Nāgarī, too, retains in *cha* and *ha* and converts into a medial vertical in the case of *pha*. In the acute-angled script, *kha*, *ga*, *tha*, *dha*, and *ṣa* frequently show on the right a small horn-like protuberance or an elongation of the vertical, which, owing to the flattening of the tops, the Nāgarī again discards except in the case of *dha*. Both the last-mentioned peculiarities are due to the circumstance that the writers drew the left and right portions of the letters separately and neglected to join carefully the two halves.⁶ In course of time these irregularities became characteristic features of most of the letters.

¹ See above, § 21, p. 4, note 2; compare also the facsimiles at IA. 6, 53, 54; 8, 40; 12, 126, 202; 15, 36; 16, 208; 18, 34; EI. 1. 2. 6, 316; 3, 50.

² See above, § 21 p. 44, note 2; compare, e. g., the facsimiles at IA. 11, 72; 17, 226; 18, 130.

³ KIELHORN, Report on Sanskrit MSS. for 1880-81, pp. VII, 97; J.R.A.S. 1895, 247, 504; compare also the facsimiles, Pal. Soc. Or. Series, pl. 1, 2, 3, 58; Cat. Berlin Sanskr. und Präkr. Hdschft., Band 2, 3, pl. 1. In the marginal glosses of the Viśeṣāśyaśaka and other MSS., frequently appear other cursive alphabets; see LEUMANN's edition, pl. 35.

⁴ BENDALL, Cat. Buddh. Sanskrit MSS. from Nepāl, pp. XXIV f., 1 f.; compare also the facsimile, Pal. Soc. Or. Series, pl. 13. According to S. v. OLDENBURG (letter of 7th April, 1897), the alphabet of these Nepalese MSS. is the so-called Lañjā script, in which is written a complete MS. of the Saddharmapundarika, preserved in St. Petersburg.

⁵ Compare, for this paragraph, BENDALL, Cat. Cambridge Buddhist MSS. from Nepāl, XLIII—LI; Anec. Oxon., Aryan Series, 1, 3, 73—87.

⁶ Anec. Oxon., Aryan Series, 1, 3, 70.

(2) In consequence of the elongation of the ends of the wedges and of the use of long straight top-strokes, the heads of *A*, *Ā*, *gha*, *pa*, *pha*, *ma*, *ya*, *sa*, and *śa* are gradually closed, both in the acute-angled and the Nāgarī scripts.¹

(3) The lower portion of the left half of *A* and *Ā* almost invariably consists of a curve, open towards the left, which first appears occasionally in the Kuṣāṇa inscriptions (see above, § 19, B, 1) and later regularly on the Uccakalpa plates (plate IV, 1, IX). It is preserved in the Bālbodh of the Marāṭhās and is common in the Bombay editions of Sanskrit works. In other late specimens of the Nāgarī, it is replaced by two slanting strokes (plate V, 1, 2, XVI), to which a third, a remnant of an earlier wedge at the foot of the vertical, is added lower down. This form is the parent of the *A*, *Ā*, used in the Benares and Calcutta prints. Up to the 8th century, the long *Ā* is invariably differentiated by the addition of a curve to the right end of *A*. Later, its mark is a downward stroke, which is attached either to the right of the top (e. g., plate IV, 2, XXI) or to the middle (plate IV, 2, XXII) and thus reoccupies the same positions which the corresponding horizontal bar has in the Aśoka edicts.² In the MSS., the downstroke at the top is found even earlier (plate VI, 2, VI).

(4) The sign for *I* is mostly derived from the Gupta form of *I*udor (plate IV, 3, VII) by the substitution of a curve for the third dot (plate IV, 3, XI—XXIII; V, 3, II—IV, &c.; VI, 3, V—IX). But in addition there is (plate V, 3, V, XII, XIII, &c.; VI, 3, XII—XV) a derivative from the *I* of the Uccakalpa plates (IV, 3, IX), in which the upper dot is replaced by a straight line; and this *I* is the parent of the modern Devanāgarī *I*, in which the two lower dots have been changed into curves and finally have been connected. In Jaina MSS., the *I* with two dots above and a curve below occurs occasionally as late as the 15th and 16th centuries. The unique early forms of the long *Ī* (plate VI, 4, V, VII), as well as their later development (plate VI, 4, XV), which has followed the analogy of *I*, deserve attention.

(5) *U* and *Ū* invariably show at the lower end a tail, drawn towards the left, which in course of time is developed more and more fully.

(6) The curve of *R*, attached to the right of the *ra*, becomes very shallow and long in the Horiuzi palm-leaves (plate VI, 7, V), and this shallow curve is the precursor of the vertical line of the later palm-leaf MSS. of Western India (plate VI, 7, XV—XVII). In the Cambridge MS. No. 1049 (plate VI, 7, VII) and in No. 1691, the *r*-curve is attached to the lower end of the *ra*.

(7) Among the signs for *Ṛ*, *Ḍ* and *Ḍ̄*, which are first traceable in the MSS. of this period (plate VII, 8—10, V, VII, X), the long *Ṛ* is clearly formed by the addition of a second *r*-curve to the short *R*. In the Cambridge MSS. Nos. 1049 and 1691, *Ḍ* is represented by a cursive southern *la* (see plate VII, 34, VI—IX), just as the oldest medial *l* in *kḷ* (VII, 42, XIV) is identical with another form of *la*; and the long *Ḍ̄* is derived from the short vowel by the addition of a second *la*, turned in the opposite direction. In the *Ḍ* and *Ḍ̄* of the Horiuzi palm-leaves (plate VI, 9, 10, V), the *la* has been turned round towards the left, and respectively one and two *r*-curves have been attached to the foot. And the combination *l(u)-r* remains [54] also in the Nāgarī both of the palm-leaves from Western India (plate VI, 9, 10, XV) and of our days, the reason being no doubt the pronunciation *lr*, which is customary both there and in other parts of India. These paleographical facts agree with the tradition of the Chinese Buddhists, who, as S. Lévi has discovered,³ ascribe the invention of the signs for the liquid vowels to a South-Indian, either to Sarvavarman, the minister of the Andhra king Śātavāhana, or to the great Buddhist teacher Nāgārjuna.

¹ See above, § 23, page 50.

² Communication by letter.

³ See above, § 16, D, 1, 2; and plate II, 2, II—X.

(8) *E* and *AI* invariably turn the base of the triangle upwards, and this innovation is found already in the inscriptions with transitional forms (plate IV, 5, X, XI).

(9) *Ka* shows almost invariably¹ on the left a loop, caused by the connection of the end of the bent cross-bar with the *Serif* or wedge at the foot of the vertical, except in combinations with the subscribed vowels *u* and *r* (see, e. g., plate IV, 7, XIV; V, 10, III; VI, 15, XVI, XVII) or with other consonants (see, e. g., plate IV, 41, XVI; V, 43, II, III; VI, 49, V, XV, XVII). In the Nāgari inscriptions, the looped form occurs, however, not rarely also in the latter cases (see, e. g., plate IV, 7, XX, XXII; V, 43, V(I, X—XIII).

(10) The loop or triangle of *kha*, which represents the ancient circle (plate II, 10, VI, and above, § 3, A, 19), stands, in all the greatly varying forms of the letters, at the left of the verticals. The very considerable differences in the shape of the left limb are partly due to the flattening of the top of the letter and still more to the various ornamental changes of the wedge, which first was added to the lower end of the ancient hook.

(11) The dot to the right of *ṅa*, which is so characteristic in the modern Devanāgarī letter, appears already on the Benares copper-plate of Karna of A. D. 1042 in the word *jaṅgama* (line 11, end),² while our plates offer only an example from a much later document (see plate V, 14, XIX). The dot may possibly have been derived from the protuberance, which is often found at the end of the top-stroke of the letter (see, e. g., plate V, 14, V, VI, VIII).

(12) The central bar of *ja* first is made to slant downwards (plate IV, 14, XXI—XXIII, &c.) and then changed into a vertical (V, 17, XIII, &c.; VI, 22, XII, &c.). At the same time, the upper bar becomes the top-stroke of the letter, and the lowest is gradually converted into a double curve.

(13) The right limb of the independent *ṅa* of the Horiuzi palm-leaves (VI, 24, V) is turned upwards, and the same form occurs occasionally in ligatures. But in the latter the sign is usually laid on its side, its angles are converted into curves and the right limb is attached to the end of the greatly shortened vertical. Hence it often looks like *ga* (see plate IV, 16, XI, &c.; V, 19, IV, V, &c.). In the Nāgari of the 11th and later centuries, the subscript *ṅa* is attached to the left limb of *ja* (plate V, 19, XII—XIV; VI, 24, XVI), and the cursive *jṅa* of the modern Devanāgarī, which the Hindus now consider to be a *Mātrkā*, is due to a simplification of this form.

(14) Since the 6th century, a wedge is often placed above the lingual *ṭa* (plate IV, 17, XVII; V, 20, II, VI; VI, 25, VI); and in the Nāgari a horizontal line with a short vertical or slanting stroke appears in the place of the wedge (plate IV, 17, XXI, XXII; V, 20, XIII, &c.; VI, 25, XV).

(15) Similar additions appear above the lingual *ṭha* since the 10th century (plate V, 21, X, &c.; VI, 26, XV).

(16) Since the 9th century, the round-backed lingual *ḍa* of the southern alphabets, ending with a curve open to the left, comes into use (plate V, 22, II, VIII, &c.).

(17) The suppression of the original base-stroke of the lingual *ṇa* occurs in ligatures (*ṇa*, plate IV, 21, XIX) since the 7th century, and in the uncombined sign since the 8th century (plate V, 24, III); compare also above, § 22, B, 10, and plate IV, 21, III. The sign soon after assumes the modern form and consists of a straight top-stroke with three lines hanging down from it (plate V, 24, VII, &c.; VI, 29, XV, &c.).

¹ An exception is, e. g., the Jhālrapāṭaṇ inscription, IA. V, 180, which shows throughout the old dagger-shaped form.

² EI. 2, 297.

(18) The modern form of *ta* with the vertical on the right, which occurs already in the Aśoka edicts, reappears in the 8th century (plate IV, 22, XXI) and becomes the regular one in the 10th century.

(19) The modern form of *tha*, which has been derived from the notched one of the 7th century (plate IV, 23, XVII), is found already in the inscriptions of the same period (plate IV, 23, XVIII, &c.).

(20) [55] In the 7th century, the lower end of *da* is more clearly defined by a *Serif* (plate IV, 24, XVII, &c.), which soon after is changed into the characteristic tail of the modern letter.

(21) Already in the 7th century, the right side of *na* becomes occasionally a vertical, to the left of which the loop is attached (plate IV, 26, XVIII, XIX); compare also below, § 30.

(22) On the transformation of *pha* by the development of a central vertical (see above, under 1), the curve of aspiration is attached first to the top of the new sign (plate IV, 28, XXII; V, 31, III, &c.). But in the 11th century it sinks lower down (plate V, 31, XII), and it occupies already in the 12th century the position which it has in the modern Devanāgarī letter (plate V, 31, XX—XXIII). Retrograde archaic forms, like those in plate V, 31, II, XIV, are, however, not rare. Their occurrence has probably to be explained by the influence of the popular cursive alphabets.

(23) As *va* was very generally pronounced *ba*, the ancient sign for *ba* was lost in Northern, Central and Western India, and it was replaced by *va* in the inscriptions of the 7th and later centuries (plate IV, 29, XX; V, 32, II, &c.). In the MSS. the substitution occurs even earlier (plate VI, 37, V, VI). A new *ba*, consisting of *va* with a dot in the centre of the loop, occurs since the 11th century (plate V, 32, XVI), and this form is the parent of the modern Devanāgarī letter.

(24) The left limb of *bha*, mostly an inverted wedge with the point towards the right, is frequently changed into a triangle, open at the apex, from which the lower portion of the original vertical hangs down (plate IV, 30, XIX, &c.; V, 33, II, &c.). The modern Devanāgarī *bha* appears in the 12th century (plate V, 33, XX, &c.) and seems to be derived from the form with the wedge, for which latter a *Serif* was substituted.

(25) Since the 8th century, *ma* usually has on the left a cursive loop (plate IV, 31, XX, XXI), which in the MSS. is mostly filled in with ink (plate VI, 39, XV—XVII).

(26) Both the MSS., and most inscriptions, with the exception of one from Udaypur (above, page 48, note 3) and some from Nepāl (page 50), offer exclusively the looped or the bipartite *ya*, which latter occurs already in the inscriptions of the Kuṣāṇa period,¹ and has been derived from the looped form.² In the Nepalese inscriptions of the 7th century, which show the eastern *ṣa*,³ we find a tripartite *ya* with a small circle at the top of the first upstroke (plate IV, 32, XVII); the Udaypur inscription has both the ordinary tripartite *ya* of the Gupta period, and also the bipartite letter.

(27) The right extremity of the wedge at the lower end of *ra* is often greatly elongated in the inscriptions of the 7th and later centuries (plate IV, 33, XVIII—XXI, &c.), and sometimes only the outlines of the wedge are marked. These forms are the precursors of the modern tailed *ra*.

(28) Since the 7th century, we find a cursive *śa* (plate IV, 36, XVIII; 42, XIX; V, 39, II, III, &c.; VI, 44, XV—XVII), the left half of which has been turned into a loop with a little tail on the right.

¹ See above, § 19, B, 12.

² J.ASB. 60, 87.

³ J.ASB. 60, 85.

B. — Medial vowels and so forth.

(1) Medial *ā*, *e*, *o*, *au*, as well as one of the Mātrās of *ai*, are placed very frequently above the line, and are then, particularly in the stone inscriptions, treated more or less ornamentally (see, *e. g.*, plate IV, cols. XIII—XVIII). More rarely, medial *i* and *ī* are treated in the same way.

(2) The tails of the curves of medial *i* and *ī* are regularly drawn down low, respectively to the left and the right of the Mātrkā; while the differences in the curves at the top disappear. These forms lead up to the *i* and *ī* of the modern Devanāgarī.

(3) Medial *ā* is expressed very frequently by the initial *Ū* of the period (plate IV, 30. XII, XIV, XVI, XX; VI, 44, VI). [56] But an older form, found, *e. g.*, in *pā* (IV, 27, VI), is also common and appears to be the parent of the modern *ā*, which occurs already in the western palm-leaf MSS. (see *pā*, plate VI, 35, XVI).

(4) Since the 7th century,¹ — first on the Banskherā plate of Harṣa, — the Jihvāmūliya is occasionally expressed by a cursive sign, consisting of a loop under the wedge of *ka* (plate V, 47, III).

(5) Since the 7th century, the Upadhmāniya is occasionally expressed by a curve open above, with curled ends and sometimes with a dot in the centre. This sign is attached to the left side of the Mātrkā (plate IV, 46, XXIII; V, 48, VII). It seems to be derived from a form like that in plate VII, 46, IV.

(6) In the older inscriptions, the Virāma is still frequently placed above the vowelless consonant, for which invariably a final form is used; and it receives a tail, which is drawn downwards to the right of the Mātrkā (see, *e. g.*, plate IV, 22, XIV). But even more commonly it stands below the consonant, and it occurs in this position already in the inscriptions with transitional forms (plate IV, 22, XI).²

C. — The ligatures.

(1) Both in the inscriptions and in the MSS. of the 6th and later centuries, we find occasionally ligatures, in which the second consonant is placed to the right of the first, instead of below it (see, *e. g.*, plate IV, 45, XI; V, 47, II; VI, 51, VI).³

(2) For the stone inscriptions of the acute-angled alphabet, the subscript *ya* frequently is made ornamental and drawn far to the left. Since the 7th century, and occasionally even earlier, the right-hand upstroke of *ya* is drawn up as far as the upper line of the whole sign (see, *e. g.*, plate IV, 48, VIII, XIX; 43, 45, XIII; VI, 51, VI).

(3) *Ra*, being the first part of a compound consonant, usually stands above the line and is expressed by a wedge, or by an angle or a curve open to the right. But in *rma* the left side of *ma* is shortened, and the top of the wedge, which is placed on this shortened line, does not protrude above the upper line (plate VI, 49, VI). Similar depressions of the superscribed *ra* are found in connection with other consonants in the Aphaś inscription,⁴ on Harṣa's copper-plates, and in some MSS. (plate VI, 51, XIII, XIV). Until the 9th century, *rya* is often expressed by a full *ra* with a subscribed *ya* (see, *e. g.*, plate IV, 44, XVIII; 45, VII; and compare EI, 3, 103).

¹ Compare the facsimile of the Jhāirāpāṭan inscription, IA. 5, 180; see also IA. 13, 162.

² This is the regular form since the 9th century.

³ Anec. Oxon., Aryan Series, 1, 3, 87.

§ 25. — The Sāradā alphabet; Plates V. and VI.

A. — The Sāradā script,¹ which is easily recognised as a descendant of the western Gupta alphabet, appears since about A. D. 800 in Kashmīr and in the north-eastern Pañjāb (Kāngra and Chambā). The oldest known Sāradā inscriptions are the two Baijnāth Prasastis from Kīrāgrāma (Kāngra), dated A. D. 804; see plate V, col. I. Not much later are the coins of the Varma dynasty of Kashmīr, where the Sāradā forms are likewise fully developed.² And it is not improbable that the Bakhshālī MS., found in the Yusufzai district (plate VI, col. VIII), belongs to the same or even a somewhat earlier period.³ The third specimen of the Sāradā in plate VI, col. IX, which ultimately is derived from BURKHARD's plate I. in his edition of the Kashmīrian Sākuntala,⁴ dates perhaps only from the 16th or 17th century; it has been given merely because at present no reproductions of more ancient MSS. are accessible.⁵ In consequence of the frequent emigrations of the travel-loving Kashmīrian Pandits, Sāradā MSS. are found in many towns of North-Western India and further east in Benares, and marginal glosses in Sāradā characters are found even in ancient Nāgarī MSS. from Western India.⁶ A [57] modern cursive variety of the Sāradā is the so-called Takkari or Tākari⁷ of the Dogrās in Jammū and the neighbourhood, which of late has been imported also into Kashmīr.

B. — A general characteristic of the Sāradā of all periods is found in the stiff, thick, strokes, which give the characters an uncouth appearance and a certain resemblance to those of the Kuṣāna period. The following signs show, already in the earliest period, peculiar developments:—

(1) The *ī*, which consists of two dots, placed side by side, and (compare the *ī* of the Bower MS.) a *ra*-like figure below, which represents the other two dots (plate V, 4, I; VI, 4, IX).

(2) The quadrangular *ca* (plate V, 15, I; VI, 20, VIII, IX).

(3) The lingual *ḍa*, which shows in the middle a loop, instead of an acute angle, and a wedge at the end (plate V, 22, I; VI, 27, VIII, IX).

(4) The dental *ṭa*, which, being derived from a looped form, has lost its left half, while the right has been converted into a curve (plate V, 25, I; VI, 30, VIII, IX).

(5) The dental *dha*, which is flattened at the top and is below so broad that it resembles a Devanāgarī *pa*.

(6) The *va*, which, owing to the connection of the left side of the curve with the top-stroke, closely resembles *dha* (plate V, 38, I; VI, 43, VIII, IX).

(7) The quadrangular *ṣa*, which exactly resembles a Nāgarī *sa* (plate V, 39, I; VI, 44, VIII, IX).

(8) The angular medial *r* (plate V, 43, I; VI, 43, VIII), and the detached *o*, which stands by itself above the line (plate V, 24, I; VI, 31, IX), and without doubt is derived from the Gupta *o* (plate IV, 34, IV).

(9) The *ra*, which, as a first part of ligatures, is inserted into the left side of the second letter, just as in the Aḥṣad inscription.⁸

The other letters of the earlier documents differ very little from those of the western Gupta alphabet, and the changes, which are found, all occur also in the acute-angled script.

¹ Compare, for this paragraph, Kashmīr Report (J.BRAS. 12), 31; J.AS. 60, 83.

² C.CMI. pl. 4, 5.

³ Seventh Oriental Congress, Aryan Section, 133; IA. 17, 83, 275.

⁴ SB.WA. CVII.

⁵ A good facsimile from a Sāradā MS. of the same period is found in the Catalogue of the Berlin Sanskrit and Prakrit MSS., Vol. 2, 3, pl. 2; an inferior one, from the India Office MS. 3176, together with a table of the letters and ligatures, in Pal. Soc., Or. Ser., pl. 44.

⁶ SB.WA. CXVI, 534.

⁷ Kashmīr Report (J.BRAS. 12), 32; for the alphabet, see J.RAS. 1891, 362.

⁸ See above, § 24, C, 3.

The constant use of the bipartite *ya*, of the *ṇa* with the suppressed base-stroke (see above, § 24, A, 17), of the *i* and *ī*, drawn down respectively to the left and the right of the consonant (§ 24, B, 2), and of the simplified Jihvāmūliya (plate V, 47, I), indicates that the separation of the Sāradā from the Gupta alphabet did not take place before the 7th century.

In the later Sāradā (plate VI, col. IX), further abnormal developments are noticeable in *ū*, *E*, *AI*, *O*, *AU*, *ja*, *ṇa*, *bha*, *rtha* (which latter occurs also in plate VI, col. VIII), and owing to the use of long top-strokes the heads of several letters, such as *A*, *Ā* and *ya*, are closed.

§ 26. — Eastern varieties of the Nāgarī alphabet and the arrow-head script.

A. — Proto-Bengālī; Plates V. and VI.

Towards the end of the 11th century, the Nāgarī inscriptions of Eastern India shew such distinct traces of changes leading up to the modern Bengālī writing, and these changes become so numerous in the 12th century, that it is possible to class their alphabets as Proto-Bengālī. An approximate idea of the development of the Proto-Bengālī may be obtained by comparing the characters of the following documents, represented in our plates: — (1) of the Deopārā Prasasti¹ of about A. D. 1080-90 (plate V, col. XVIII), which includes the Bengālī *E*, *kha*, *ṇa*, *ta*, *tha*, *ma*, *ra*, *la*, and *sa*; (2) of Vaidyadeva's land-grant² of A. D. 1142 (plate V, col. XIX), with the Bengālī *Ṛ*, *E*, *AI*, *kha*, *ga*, *ṇa*, *ta*, *tha*, *dha*, *ra*, and *va*; and (3) of the Cambridge MSS. No. 1699, 1, 2,³ of A. D. 1158-99 (plate VI, col. X), which offers the Bengālī *A*, *Ā*, *ū*, *Ṛ*, *Ṛ*, *Ṛ*, *Ṛ*, *E*, *AI*, *AU*, *ka*, *kha*, *ga*, *ta*, *tha*, *na*, *ma*, *ya*, *ra*, *va* and *sa*, as well as transitional forms of *gha*, *ṇa*, *ṇa* and *śa*.

Only a few among the Proto-Bengālī letters are new local formations. The great majority occurs already in other older scripts, be it in exactly the same or in similar shape. [58] Thus, its *Ṛ*, *Ṛ*, *Ṛ* and *Ṛ* agree closely with the corresponding characters of the Horiuzi MS. (plate VI, 7-10, V), its *ū* with that of the oldest MS. from Nepāl (plate VI, 6, VII; compare also the Sāradā, VI, 6, IX), and its *AU* with that of the Bower MS. (plate VI, 14, I, II). Its signs for *A*, *Ā*, *ka*, *na*, *ma*, *ya*, *va*, *ṇa*, and *sa* occur repeatedly in various alphabets of the 8th-10th centuries, given in plates IV, V. Its *kha*, opened on the right, finds an analogy in that of the Bower MS. (plate VI, 16, I), and its *tha*, likewise opened on the right, somewhat resembles that of plate V, 26, IX. Finally, the *ga* and *ṇa* with the verticals, rising on the right above the line, have precursors in the letters of the 9th and 10th centuries with horn-like protuberances (plate V, 12, 24, II-IV, VI; compare also above, § 24, A, 1). Even the *ra*, resembling *va* (plate V, 36, XIX; VI, 41, 49, X), may easily be recognised as due to a slightly abnormal development of the wedge at the end of the letter, for which, forms from Western and Central India in plate V, 36, XIII, XIV, offer more or less close analogies. Only the *E* and *AI*, open on the left, and the peculiar *ṇa* in *ṇa* (plate V, 19, XVIII) and in *jṇa* (plate VI, 24, X), appear to be purely local new formations. And this may be true also of the *va* (plate V, 25, XVIII, XIX; VI, 30, X), which, however, does not differ much from the Sāradā sign and from the final *t* of some other alphabets.

The most striking and important among the peculiarities of the Proto-Bengālī, discarded in the modern Bengālī script, are the small triangles with the rounded lower side and the "Nepalese hooks," which are attached to the left of the tops of various letters. The triangle is found in *ksi* (plate V, 47, XVIII) and in very many letters of plate V, col. XIX; while the hook occurs in the *ka* and *ta* of plate V, 25 and 43, XVIII.⁴ If further we compare the Tarpan-Dighī inscription of Lakṣmanasena,⁵ where the triangles and hooks frequently appear alternately in connection with the same letters, it becomes evident that the "Nepalese hook"

² EI, 2, 347.

³ Compare BRINDALL, who slightly differs in Cal. Sanskrit MSS. from Nepāl, XXXVI, and letter-press of Pal. Soc., Or. Series, pl. 81.

⁴ Both the triangle and the hook are found in the Gayā inscription, IA, 10, 342.

⁵ J.A.S.B. 41, pl. 1, 2.

is a cursive substitute for the triangle. The triangle itself is a modification of the top-stroke with a semi-circle below, occasionally met with in ornamental inscriptions from Northern and Central India, as, e. g., in Vināyakapāla's plate (letters with this peculiarity have not been given in plate IV, col. XXIII) and in the Cāndella inscription in CUNNINGHAM's Archaeological Reports, Vol. 10, plate 33, No. 3. This last-mentioned form again is connected with, and gives the outlines of, the thick top-strokes, rounded off at both ends, which are not rare in ornamental MSS. like that figured by BENDALL, Catalogue of Sanskrit Buddhist MSS. from Nepāl, plate 2, Nos. 1, 2, and in the alphabet of plate VI, col. XIV (see particularly lines 5, 7, 15, 30, 34, 37, 49).

Among the abnormal single signs, not received into the modern Bengālī, the following deserve special remarks:—

(1) The forms of *I* in plate V, 3, XVIII, and VI, 3, X, are cursive developments of the ancient *I* in plate IV, 3, IX, &c. But the *I* and *ī* of plate V, 3, 4, XIX, appear to be southern forms; compare plate VII, 3, IV—VI.

(2) The curious *ṭa* of plate V, 20, XIX, seems to have been produced by an abnormally strong development of a "Nepalese hook" with a *Serif* at the end, placed above the ancient round *ṭa*, which is represented by the second lower curve on the left; compare the *ṭa* of col. XVIII, and that of the Cambridge MS. No. 1693 (BENDALL, op. cit. plate 4).

(3) The *na* of plate V, 29, XIX, without a connecting stroke between the loop and the vertical, is due to the strongly developed predilection for cursive forms, which is visible also in other letters of Vaidyadeva's inscription, such as *A*, *Ā*, *śa* and the ligature *thr* (plate V, 47, XIX).

(4) The triangular medial *u*, for instance of *ku* (plate V, 10, XIX), which appears also in Lakṣmaṇasena's Tarpan-Dighī grant and other eastern inscriptions, gives the outline of the older wedge-shaped form, found, e. g., in *thu* (plate V, 26, XVIII) and in *su* (plate VI, 45, II).

(5) The Anusvāra of *vaṃ* (plate V, 38, XIX) and of *kaṃ* (plate VI, 15, X) has been placed on the line, as in the Old-Kanarese (see below, § 29, C, 5) and the modern Grantha, and a Virāma stands below it.

(6) In the *Om* of plate V, 9, XVIII, we have the oldest example of the occurrence of the modern Anunāsika. In this case, it shows a little circle instead of the more usual dot, which is found in the *Om* of plate VI, 13, XI. Both forms are rather frequent in the eastern inscriptions of the 12th century,¹ whereas in the west² they are more rare and are confined to the word *Om*. The Anunāsika, which I have not found in any Indian inscription older than the 11th century, probably is an intentional modification of the Anusvāra, invented because in Vedic MSS. the Anunāsika must be substituted for an Anusvāra followed by liquid consonants, sibilants and *ha*.

(7) [59] The Visarga of *vaḥ* (plate V, 38, XVIII) carries a wedge at the top, which addition appears also in other ornamental scripts (see, e. g., plate VI, 30, XIV); in the *ḥ* of plate VI, 51, X (compare also VI, 41, XI, and the Gayā inscription), it has been changed cursively into a form resembling our figure 8. In the Gayā inscription (IA, 10, 342), as well as in MSS. of this period,³ it receives also a small tail (compare *tāḥ*, plate VI, 30, XIV).

¹ Compare the Gayā inscriptions in C.A.S.R. 3, pl. 37, No. 12; pl. 38, No. 13.

² See the Mahoba inscription, C.A.S.R. 21, pl. 21.

³ Compare the facsimiles of Bengālī MSS. in Pal. Soc., Or. Series, pl. 38, 62, 69; RAJENDRALĀL MITRA, Notices of Sanskrit MSS., Vol. 2, pl. 5, 6; Vols. 5 and 6; and the Proto-Bengālī inscription, J.A.S.B. 43, 318, pl. 18.

B.—The Nepalese hooked characters; Plate VI.

According to BENDALL's careful examination of the MSS. from Nepāl,¹ the hooked characters first occur in the 12th century and disappear towards the end of the 15th. The facts, stated above, which prove the occurrence of the "Nepalese hooks" in Bengal inscriptions of the 12th century and explain their origin, leave no doubt that the introduction of this modification of the top-strokes is due to the influence of Bengal, which, as BENDALL has recognised,² makes itself felt also in other points.

The first of the two specimens of this character in plate VI, col. XI, which is derived from the Cambridge MS. No. 1691, of A. D. 1179,³ shows in the majority of the letters the forms of the Horiuzi palm-leaves and of the Cambridge MS. No. 1049 (cols. V—VII), with a few small modifications, such as might be expected in a much later document. Irrespective of the hooks, special Bengālī peculiarities are observable only in *I*, *ī*, *E* and *AI*. Generally speaking, these remarks hold good also for the second specimen in plate VI, col. XII, from the British Museum MS., Oriental No. 1439, of A. D. 1286.⁴ But in this script the Bengālī influence is visible in *E*, *ṇa*, *dha* and *śa* (compare the transitional forms of V, 39, XVIII, XIX), while its *I* is very archaic.⁵

Nepāl and Tibet seem to have preserved a number of other, mostly ornamental, alphabets of Eastern India,⁶ hand-drawn tables of which have been given by B. HONGSON (*Asiatic Researches*, Vol. 16) and by SARAT CANDRADĀS (*J.A.S.B.*, Vol. 57, plates 1 to 7). But up to the present time no reliable materials are available, on which a paleographical examination of these scripts could be based.

C.—The arrow-head alphabet; Plate VI.

The arrow-head alphabet, plate VI, cols. XVIII, XIX, which C. BENDALL, its discoverer,⁷ is inclined to identify with Berūnī's *bhaikṣukī lipi*, appears to be confined to Eastern India. It, of course, has no connection with the Nāgarī, but, as BENDALL points out in his very careful description, is the immediate offspring of an ancient form of the Brāhmī. It would seem that the *A*, *Ā*, *ka*, *ṇa*, *ra* and perhaps also the *ḥa* of the present alphabet have curves at the lower end. This peculiarity, as well as the peculiar *E*, noted by BENDALL (compare plate VIII, 8, VIII) and the absence of a difference between *r* and *ra*, seem to indicate that the present alphabet belonged to the southern scripts, for which these points are characteristic (compare plate III, cols. X—XX, and plates VII, VIII). Its pointed *kha*, *ga*, and *śa* likewise occur in southern alphabets (see plate III, 8, VII; VII, 9, XI, XIV; VII, 11, XVII; 36, IV, XVI, XX). And the forms of *ṇa*, *ta*, and *na* perhaps point rather to the south-west than to the south (compare plate VII, cols. I, II, &c.). Only in the case of the looped *śa* it is possible to think of northern (Gupta) influence; but the possibility that it is an independent new formation is not excluded. An inscription in the same alphabet, and shewing wedges instead of arrow-heads at the top of the letters, has been discussed by BENDALL in IA. 19, 77 f.

V. THE SOUTHERN ALPHABETS.

§ 27. — Definition and varieties.

[80] With BURNELL and FLEET, I understand by the term "southern alphabets" the scripts of plates VII. and VIII,¹ which, developed out of the characters of the Andhra period, have been generally used since about A. D. 350 in the territories south of the Vindhya, and most of which still survive in the modern alphabets of the Dravidian districts.

Their most important common characteristics are: —

(1) The retention of the ancient forms, open at the top, of *gha*, *pa*, *pha*, *sa* and *sa*, of the old *ma*, and of the tripartite *ya* which is looped only occasionally, especially in the Grantha.

(2) The retention of the long stroke on the right of *la*, which however is mostly bent towards the left.

(3) The *da* with the round back.

(4) The curves, originally open at the top, at the ends of the long verticals of *A*, *Ā*, *ka*, *ṇa* and *ra*, as well as of the subscript *ra* and of medial *u* and *ṛ*.

(5) The medial *r* with a curled curve on the left, with occasional exceptions occurring in *kr*.

Cols. XIX, XX; from plate at EI. 3, 72, the lower part.

Cols. XXI, XXII; from plate at EI. 3, 72, the upper part.

According to other peculiarities, the southern alphabets may be divided into the following varieties:¹—

(1) The western variety, which, being strongly influenced by the northern alphabets, is the ruling script between about A. D. 400 and about A. D. 900 in *Rāṣṭrāvaḍ*, Gujarāt, the western portion of the Marāṭhā districts, *i. e.* the Collectorates of Nāsik, Khāndesh and Sātārā, in the part of Haidarābād (Ajanṭā) contiguous to Khāndesh, and in the Koṅkaṇ, and which during the 5th century occasionally occurs also in Rājputāna and the Central Indian Agency, but altogether disappears in the 9th century in consequence of the inroads of the Nāgarī alphabet (see above, § 21).

(2) The Central-Indian script, which in its simplest form closely agrees with the western variety, but in its more developed form, the so-called "box-headed alphabet," shows greater differences, and which from the end of the 4th century is common in northern Haidarābād, the Central Provinces and parts of the Central-Indian Agency (Bundelkhāṇḍ), but appears also occasionally further south in the Bombay Presidency and even in Maisūr.

(3) The script of the Kanarese and Telugu districts of the Dekhaṇ, — *i. e.* of the southern portion of the Bombay Presidency (the Southern Marāṭhā States, Sholāpur, Bijāpur, Belgaum, Dhārwar and Kārwar), of the southern territory of Haidarābād (roughly speaking south of Bidar), of Maisūr, and of the north-east portion of the Madras Presidency (Vizagapatam, Godāvāri, Kistna, Karnūl, Bellary, Anantpur, Cuddapah, Nellore), — which appears first in the Kadamba inscriptions of the 5th and 6th centuries, and after a long development leads to the very similar and temporarily identical Kanarese and Telugu round-hand.

(4) The later Kalinga alphabet of the north-eastern coast of the Madras Presidency between Cicacole and the frontier of Orissa (Gaṇjām), which is strongly mixed with northern letters and in later times also with Grantha and Kanarese-Telugu characters, and which occurs in inscriptions of the 7th—12th centuries.

(5) The Grantha alphabet of the eastern coast of Madras, south of Pulikat (North and South Arcot, Salem, Trichinopoly, Madura and Tinneveli), which first appears in the ancient Sanskrit inscriptions of the Pallava dynasties, and survives in the modern Grantha and its varieties, the Malayāḷam and the Tulu.

The Tamil alphabet of the same districts and of the western coast of Madras (Malabar) probably is derived from a northern script, imported in the 4th or 5th century, but greatly modified by the influence of the Grantha. A cursive variety of the Tamil alphabet is found in the *Vaṭṭeḷuttu* (the "round-hand," BURNELL) or *Cera-Pāṇḍya* (HULTZSCH),² which is known through inscriptions from the western coast and the extreme south of the Peninsula, and according to BURNELL [61] has fallen into disuse only in recent times.³ Though these two alphabets come from a different source, they have been included in this chapter, because they occur in the same districts as the other five.

§ 28. — The western script and the script of Central India; Plates VII. and VIII.

A. — The western script.

The western variety of the southern alphabets is found in the inscriptions of the Imperial Guptas and their vassals since the time of Candragupta II.,⁴ of the kings of Valabhi,⁵ of the Gurjaras of Broach,⁶ of some of the Calukyas of Bādāmi (Pulakeśin II. and Vijayabhaṭṭa-

⁵ Compare the facsimiles in F. (CH. 3), Nos. 38, 39, plates 24, 25; IA. 1, 17; 5, 204 ff.; 6, 14 ff.; 7, 63 ff.; 8, 302; 9, 238; 14, 323; J.BERAS. 11, 363; EI. 3, 320.

⁶ Compare the facsimiles at J.LAS. 1865, 247; IA. 13, 78; [7, 62; 13, 116; 17, 200; disputed]; EI. 2, 19 ff.

rikā), and of Nāsik and Gujarāt and their vassals,¹ of the Traikūṭakas,² of the Aśmakas (?) of Khāndesh,³ and of the Rāṣṭrakūṭas of Gujarāt,⁴ as well as in numerous votive inscriptions in the caves of Kaṇheri, Nāsik and Ajanṭā.⁵ Ordinarily, its characters no doubt were written with ink, just like those of the northern alphabets (see above, § 21). This is made highly probable by the use of wedges on the tops of the letters during the Gupta period (see plate VII, cols. I—III) and by the thick, frequently knob-like, heads of the signs of the Valabhī, Gurjara and Rāṣṭrakūṭa grants (plate VII, cols. IV—IX, and plate VIII, col. I), both of which ornaments can only be drawn with ink. Another argument is furnished by the fact that all the copper-plates from Gujarāt have been cut according to the ordinary size of the Bhūrja leaves (BURNELL), on which it is not possible to write with a *stilus*.

The finds of nearly or quite contemporaneous inscriptions with northern characters in Rājputāna, the Central-Indian Agency,⁶ and Valabhī, as well as the Nāgarī signatures of the Gurjara princes,⁷ prove that northern scripts were being used simultaneously with this southern alphabet. And this circumstance is no doubt the cause of its showing traces of northern peculiarities in the following letters: — (1) in the *kha* with a large loop and a small hook (plate VII, 9, I—IX; VIII, 12, I), instead of which the true southern form appears only very rarely;⁸ (2) in the *ca*, rounded off on the right (plate VII, 13, I—IX; VIII, 16, I); (3) in the ancient *ta* without a loop (plate VII, 22, I—IX; VIII, 25, I); (4) in the narrow *dha* (plate VII, 25, I—IX; VIII, 28, I; compare plate IV, 25, I—III); (5) in the looped *na* (plate VII, 26, I—IX; VIII, 29, I), which agrees more exactly with the northern forms of plate IV, 26, than with the southern one of VII, 26, XIII (compare below, § 29, A); (6) in the Mātrās often placed above the line in medial *e* (plate VII, 26, V), *ai* (plate VII, 10, IV) and *ō* (plate VIII, 35, I), which latter, however, has a peculiar looped form in *lō* (plate VII, 34, III, IV); (7) in the medial *au*, consisting of three strokes above the line (VII, 25, V; 36, III); and compare plate IV, 7, IV); (8) in the subscript *ñā*, which occasionally, as in plate VII, 42, VII, shows the northern cursive form. The inscriptions Nos. 17 and 62 of FLEET'S Gupta Inscriptions (CII. 3), plates 10, 38 B, which are not represented in plate VII, show, [62] besides, the northern *A* and *kā* without the curve at the foot. A *kā* of this description occurs also sometimes in the Valabhī inscriptions (plate VII, 8, V).

Irrespective of these northern peculiarities, which throughout remain almost unchanged, the characters of this script show three stages in their development, that of the 5th century (plate VII, cols. I—III), that of the 6th and 7th centuries (cols. IV—VI, VIII), and that of the 8th (col. IX) and 9th centuries (plate VIII, col. I) which last is very markedly cursive.

Among the single letters the following deserve special remarks: —

(1) The *I* (plate VII, 3, IV, ff.; VIII, 3, I), which here, as in most southern alphabets, consists of a curved line with a notch in the centre and of two dots below, and which appears to be a modification of a form like that in plate IV, 3, IX.

(2) The *ī* (plate VII, 3, I; VIII, 4, I), which, like that of the Bower MS. (plate VI, 4, I), has been developed by the transformation of two dots into a line, but in addition has the curved tail, characteristic of the southern alphabets.

(3) The *E*, which usually consists of a triangle with the apex at the top, and is irregularly broadened on the left (plate VII, 6, I; and compare *AI* in VII, 6, VII), and which from

⁷ Compare above, § 21 end.

⁸ Compare, for instance, *likhitam*, facsimile at IA. 7, 73

the end of the 6th century frequently, especially in Gurjara inscriptions, is opened at the top (plate VII, 6, VI) and finally resembles a northern *la* (plate VIII, 8, I).

(4) The *da*, which in its oldest form (plate VII, 19, II), as mostly in the southern alphabets, is undistinguishable from *da*, but from the 6th century develops a little tail (plate VII, 19, IV—IX), or, in some inscriptions of the 8th and 9th centuries, a loop at the end (plate VII, 43, VII; plate VIII, 22, I).

(5) The *tha* with a ringlet on the base-line (plate VII, 28, III, IV, VI) instead of the cross-bar (plate VII, 23, I, II), developed out of the ancient dot, or since the end of the 6th century with the southern notch in the base (plate VII, 23, VII—IX; plate VIII, 26, I).¹

(6) The *la* with the diminutive main portion of the original sign and the enormous tail (plate VII, 34, VI, VIII), which latter since the 7th century frequently becomes the sole representative of the letter (plate VII, 34, VII, IX).

(7) The *sa*, which shows regularly in the Gurjara inscriptions (plate VIII, 39, I) and the Nāsik Calukya inscription,² and occasionally in the Valabhī inscriptions,³ a cursive combination of the cross-bar with the vertical on the right, which occurs also in the north.⁴

(8) The *sa*, which occasionally shows (plate VII, 38, V) a cursive combination of the left limb with the *Serif* occurring also in southern scripts (plate VIII, 41, XI).

(9) A number of cursive forms in ligatures, thus:—(a) The prefixed *ña* which often loses the hook on the right and looks like *na* (compare also plate V, 19, V, VII). (b) The prefixed *na*, which especially before *ta*, *tha*, *dha* and *na* (see the *nta* of *anumantaryah*, plate VII, 42, V) consists of a horizontal or bent stroke and looks like *ta*.⁵ (c) The subscript *ka*, which occasionally, as in *śka* (plate VII, 46, VIII), is looped on the left (compare IA. 11, 305). (d) The subscript *ca* of *ñca* (plate VII, 41, VIII, IX), which since the 6th century remains open on the right and bears the hook of *ña* on its base. (e) The subscript *na*, which already since early times is merely indicated by a loop (see *ṛṇṇa*, plate VII, 41, IV). (f) The subscript *tha*, which, as in other southern alphabets (compare, e. g., plate VII, 45, XX), is changed to a double curve open on the right (plate VII, 45, IV; plate VIII, 49, I).

B. — The script of Central India.

The Central-Indian script is found fully developed in the inscriptions of Samudragupta at Eran and of Candragupta II. at Udayagiri,⁶ on the copper-plates of the kings of Sarabhapura,⁷ of the Vākṣapakas,⁸ and of Tivara king of Kosala,⁹ and in two early Kadamba inscriptions.¹⁰ In all these documents, the heads of the letters bear small squares, which are either hollow (plate VII, col. XI) or filled in (plate VII, col. X). These squares, to which on account of their resemblances to small boxes the script owes the name "box-headed," are, like the wedges, artificial developments of the *Serif*. The solid, filled in, squares probably have been invented by writers who [63] used ink, and the hollow ones by persons writing with a *stilus*, who feared to tear their palm-leaves. Both varieties of "box-heads" occur occasionally or constantly in other districts and in connection with other alphabets (see, e. g., the Valabhī

¹ Transitional forms occur in the Calukya inscriptions.

¹⁰ Op. cit., Nos. 40, 41, plates 26, 27.

inscription of plate VII, col. V, the archaic Kadamba inscription of plate VII, col. XII, the Pallava inscription of plate VII, col. XX), and even in Nos. 21 and 21, A, of the Campā inscriptions from Further India.¹ But the very peculiar appearance of the Central-Indian inscriptions of this class is due to the more or less rigorous modification of the letters by the contraction of their breadth and the conversion of all curves into angular strokes. This is best visible in the grants, figured in EI. 3, 260, and in FLEET's Gupta Inscriptions (CII. 3), Nos. 40, 41, 56, 81, plates 26, 27, 35, 45, among which No. 56 is represented in col. XI. of our plate VII, while col. X. offers the less carefully modified characters of F.GI (CII. 3), No. 55, plate 34. Both these inscriptions were issued in the same year from the *Dharmādihikarāṇa* of the Vākāṭaka king Pravarasena II.

Traces of the influence of the northern alphabets are visible in this script just as in the western variety, and particularly in the letters *ta*, *dha*, *na*, and in the Mātrās of medial *e*, *ai* and *o*, which in F.GI (CII. 3), No. 81, plate 45 (not in our plate), shew the peculiar tailed northern form of the 7th and 8th centuries. But in the ligatures (see, for instance, *ṣṭa*, plate VII, 43, X), we meet repeatedly with the looped *ta* and with the *na* without the loop, and even an independent looped *ta* appears exceptionally² in the word *snātānām* (No. 55, line 7; No. 56, line 6). Medial *au* has the tripartite western and northern form in F.GI (CII. 3), Nos. 2, 3, 40, 81, plates 2, A, B, 26, 45, but the southern bipartite form (see *dau*, plate VII, 24, XI) in the Vākāṭaka inscriptions. The *kha*, which has a big hook and small loop, and the oblong *ca* with the vertical on the right, likewise agree with the southern forms. But F.GI (CII. 3), No. 2, line 17, offers once, in *śulka*, the northern *ka* without the curve at the foot.

The other letters of this script frequently show greater or smaller variations. Our plate offers a few in the case of *Ḍ*, *ja*, *tha*, *ba* and *la*. More have been pointed out by FLEET and KIELHORN in their editions of the inscriptions in F.GI (CII. 3) and in EI. 3. I may add to FLEET's remarks, that his Nos. 40, 41, and 81 have the angular form of *ma* of the later Kanarese-Telugu alphabet (see below. § 29, B, 6).

§ 29. — The Kanarese and Telugu alphabet; Plates VII. and VIII.

A. — The archaic variety.

[64] The archaic variety of this script is found: — (a) In the west, in the inscriptions of the Kadambas of Vaijayantī or Banavāsi (plate VII, cols. XII, XIII), and of the early Calukyas of Vātāpi or Bādāmi, e.g. of Kirtivarman I. and Maṅgaleśa (plate VII, col. XIV), Pulakeśin II., and Vikramāditya I. (sometimes). (b) In the east, on the Śālaṅkāyana plates, and on those of the first two Calukyas of Veṅgi, Viṣṇuvardhana I. and Jayasimha I. (plate VII, col. XVII).³ The date of the Śālaṅkāyana plates, which used to be assigned to the 4th century,⁴ is uncertain.⁵ The Kadamba grants probably belong partly to the 5th and partly to the 6th centuries; for, Kākusthavarman, who issued the oldest known record, was the contemporary of one of the Imperial Guptas, probably of Samudragupta,⁶ and his descendants all ruled before the overthrow of the Kadamba kingdom by Kirtivarman I., between A. D. 566-67 and 596-97. The archaic Calukya inscriptions fall between A. D. 578 and about 660.⁷

During this period, the characters of the western and eastern documents do not differ much. The alphabet of the Śālaṅkāyana plates⁸ agrees very closely with that of plate VII,

¹ BERGGAONER-BARTS, *Inscriptions Sanskrit du Campā et du Cambodge*, 2, 23; the Campā inscriptions show the northern *ka* and *ra* without curves at the end.

² FLEET and KIELHORN assume that the writers by mistake put *na* for *ta* and *vice versa*.

³ Compare facsimiles of Śālaṅkāyana inscriptions at B.ESIP. plate 24; IA. 5, 176; EI. 4, 144; of Kadamba inscriptions at IA. 6, 23 ff.; 7, 38 ff.; J.BRAS. 12, 300; of Western Calukya inscriptions at IA. 6, 72, 75; 8, 44, 237; 9, 100; 10, 58; 19, 68; and of Eastern Calukya inscriptions at B.ESIP. pl. 27.

⁷ See FLEET's dates of the Calukyas, EI. 3, table at p. 2; IA. 30, 95 ff.

⁸ B.ESIP. pl. 1.

col. XIII; and in the first half of the 7th century the letters of the Calukya inscriptions from Vātāpi and from Veṅgi show an almost perfect resemblance.¹ But the more considerable differences between cols. XII. and XIII, which both are derived from grants of the Kadamba Mṛgeśavarman issued within a period of only five years, have to be explained by the assumption that the letters of col. XIII, with which nearly all the other Kadamba inscriptions agree, imitate writing with ink, and those of col. XII. writing with the *stilus*. This explanation is suggested by the thinness of the signs of col. XII, and by the much greater thickness of those in col. XIII, and by the wedges and solid squares at their heads (compare above, § 28, B).

The letters of the older documents of this period remain very similar to those of the Andhra inscriptions of plate III, the so-called "cave-characters." In the Śālaṅkāyana grant, and in those of the Kadambas Kākusthavarman, Śāntivarman, Mṛgeśavarman and Ravivarman, we find only few, and by no means constant, traces of the development of the later characteristic round forms. Thus, col. XII, no doubt offers rather far advanced signs for *A* and *ra*, but at the same time a more archaic *Ā*, and the facsimile frequently shows even an angular *ra* with a not very long upward stroke. In the grants of the last Kadamba king Harivarman and in those of the Calukyas between A. D. 578 and 660, the *A*, *Ā*, *ka* and *ra*, characteristic of the next stage of development, occur not rarely, but never constantly. Thus col. XIV, derived from the Bādāmi inscription of Kīrtivarman I. and Maṅgaleśa, has the *ka* closed on the left. But this form is the only one used there, and it never appears on Maṅgaleśa's copper-plate, nor on the Haidarābād plates of his successor Pulakeśin II.² Further, this *ka*, as well as the closed *ra* of 33, col. XV, occur on the Nerūr plates of Pulakeśin II.³ Finally, the Aihole stone inscription, of the time of Pulakeśin II.,⁴ has exclusively the older *ka* and *ra*, but occasionally the later *A* of col. XV. This vacillation indicates that between A. D. 578 and 660, and perhaps even earlier, the round-hand forms of the middle Kanarese alphabet existed, but that they either had not completely displaced the older ones, or that they were not yet considered as really suitable for inscriptions, though the clerks occasionally introduced them by mistake into the official documents (compare above, § 3, page 8).

Among the other signs, the following may be noted especially :—

(1) The *ṇa* (plate VII; 21, XII—XIV, XVII) which is never looped, but looks as if it were cursively developed from a looped form similar to that of col. I, ff.

(2) The *ta*, which keeps the old form of the western inscriptions without a loop in 22, XIII, but shows in cols. XII, XIV, XVII, a cursive development from the looped *ta* of cols. XX—XXIII, which likewise is not rare in Kadamba and Calukya inscriptions of this period.

(3) The tailed *da* (24, XIV, XVII) agreeing exactly with the western form [65] of *ḍa* (19, IV—IX).

(4) The *na*, which sometimes has the looped form (26, XIII), and more frequently that without the loop (26, XII, XIV—XVII); the latter being, however, apparently derived from the looped one.

(5) The very exceptionally looped *ya* (in *yā*, 45, XIV), which thus is identical with the much older northern form.

(6) The medial vowels:—(a) *ā* in *pā* (27, XIII), a cursive substitute for the *ā* of *yā* (32, VI), *cā* (13, IV), &c.; (b) the subscript *r* of *kr* (8, XII, XVII; 41, XIV), somewhat resembling a northern *r* (which latter actually occurs once on the seal figured in IA. 6, 24, in *Mṛgeśa*), but probably independently derived from a not uncommon *r* in the shape of an

¹ Compare also the facsimile at IA. 6, 72, and B.E.S.I.P. pl. 27.

² IA. 8, 44.

³ IA. 6, 72.

⁴ See the plates at IA. 8, 241; EI. 6, 6.

unconnected semicircle before *ka*; (c) the exceedingly rare *!* of *k!* (42, XIV), which, differing from the northern subscript *!* (plate VI, 35, XVII), but agreeing with the northern initial sign of the Cambridge MS., consists merely of a cursive *la*; (d) the Mātrā of *e* (in *ge*, 21, XII), of *ai* (in *cai*, 13, XII; and *vai*, 35, XIII), and of *o* and *au* (in *thau*, 23, XII), which, except in connection with *le* (see *le*, 34, XII, and *lo*, 34, XIII, XVII), frequently stands at the foot of the consonant; (e) the *au* (in *pau*, 27, XII, XIV), the right-hand portion of which invariably and in all southern alphabets consists of a hook, formed by a cursive combination of the second Mātrā with the *ā*-stroke (compare *yau*, plate III, 31, VI).

B. — The middle variety.

This second variety is found from about A. D. 650 to about A. D. 950: — (a) In the west, in the inscriptions of the Calukyas of Vātāpi or Bādāmi, of their successors the Rāṣtrakūṭas of Mānyakheṭa (in cases when they did not use the Nāgarī, see above, page 51), of the Gaṅgas of Maisūr, and of some smaller dynasties; (b) in the east, on the copper-plates of the Calukyas of Veṅgi and of their vassals. During this period, some marked differences are observable in the *ductus* between the several classes of documents. The copper-plates of the Western Calukyas (plate VII, col. XVI)¹ mostly show carelessly drawn cursive signs sloping towards the right, and their stone inscriptions (plate VII, col. XV) upright, carefully made, letters, which especially in the ligatures are abnormally large. With the characters of the latter agree those of the inscriptions of the Rāṣtrakūṭas (plate VIII, cols. II, III),² with the exception of the sign-manual on the Baroda copper-plate of Dhruva II.³ In this royal signature and in the inscriptions of the Calukyas of Veṅgi (plate VIII, cols. IV, V), the letters are broader and shorter, and in this respect resemble very closely the Old-Kanarese.⁴

In addition to the above-mentioned rounded forms of *A*, *Ā*, *ka* and *ra*, which become constant during this period, the following letters deserve special remarks: —

(1) The very rare *R* (plate VII, 5, XVI; compare also the earlier letter in the facsimile at IA. 6, 23, end), which seems to be a modification of the northern form of plate VI, 7, I, II.

(2) The strongly cursive *kha* (plate VIII, 12, III—V), which is identical with the Old-Kanarese letter, and which according to FLEET⁵ never occurs before about A. D. 800, but actually appears in the cognate Pallava inscriptions (plate VII, 9, XXIII; compare below, § 31, B, 4) already since the 7th century.

(3) The *ca*, which from the 9th century begins to open in *āca* (plate VII, 41, XIX; plate VIII, 19, III, IV).

(4) The *da* (plate VIII, 27, II, IV, V) the tail of which begins to turn upwards since the 9th century.

(5) The *ba*, opened above (plate VIII, 32, V), which according to FLEET⁶ first occurs about A. D. 850.

(6) The *ma* (plate VII, 31, XVII; VIII, 34, II—V), the upper part of which is drawn towards the right and placed nearly on the same level as the lower one, and which thus becomes the precursor of the Old-Kanarese *ma*.

(7) The abnormal cursive *la* (plate VII, 34, XVI), which elsewhere appears only as the second part of ligatures (as in *ilo*, plate VII, 44, XVIII).

² Compare the facsimiles at IA. 10, 61 ff., 104, 166, 170; 11, 126; 20, 76; Ep. Carn. 8, 80, 87, 92 (for the last of these see also EI. 6, 54).

³ See the facsimile at IA. 14, 300.

⁴ Compare the facsimiles at IA. 12, 92; 13, 214, 248; EI. 3, 194.

⁵ EI. 3, 163 f.

⁶ EI. 3, 163.

(8) The Mātrās, which occasionally stand below the consonant (as in *dhe*, plate VIII, 28, V).

(9) The vertical Virāma, above final *m* (plate VII, 41, XVIII; plate VIII, 46, V) and final *n* (plate VIII, 45, V).

(10) The Dravidian *ra* (plate VII, 45, XV, XVIII; 46, XVI; plate VIII, 47, II, III) [66] and *la* (plate VII, 46, XV, XVIII; plate VIII, 49, II, V), which first appear in the 7th century. The first of them, *ra*, may possibly represent two round *ra*, and *la* may be a modification of a *la* like that in plate VII, 40, XIV, XVI. The occurrence of these signs proves that the Kanarese language had a literature already in the 7th century.

C. — The Old-Kanarese alphabet.

The third and last variety of the Kanarese-Telugu alphabet, which BURNELL calls "the transitional" and FLEET more appropriately "Old-Kanarese," does not differ much from the modern Kanarese and Telugu scripts. In the east, it first appears in the Veṅgi inscriptions of the 11th century; in the west, a little earlier, in a Gaṅga inscription of A. D. 978 and in a not much later Calukya inscription.¹ Some of its characteristics, like the opening of the loop of *ma* and of the head of *va*, appear however in the sign-manual of Dhruva II. on the Baroda plates, mentioned above under B. The specimens of this script² in plate VIII, among which cols. VI. and VII. date from the 11th century, col. VIII. from the 12th, and col. IX (according to HULTZSCH, Telugu) from the 14th, show the gradual progress very distinctly.

One of the most characteristic marks of the Old-Kanarese consists in the angles over all Mātrikās which do not bear superscribed vowel-signs. These angles, which in col. VI. resemble those of the modern Telugu and in cols. VII, VIII, those of the modern Kanarese, probably are cursive representatives of wedges, and have been invented because the latter did not suit the writing with the *stilus*. Since the 6th century, they occur more or less frequently in single inscriptions from other districts, such as Guhasena's grant of A. D. 559-60 (plate VII, col. IV) and Ravikirti's Aihole Prāsaśti,³ sometimes together with wedges. But it is only in this alphabet that they become a constant distinctive feature.

The most important among the changes in the several signs are: —

(1) The opening of the heads of *E* (plate VIII, 8, VI, VIII), of *ea* (16, VI—IX), of *bha* (33, VI—IX, which in col. IX. becomes identical with *ba* by the connection of the two base-strokes), and of *va* (38, VII—IX), as well as of the loop of *ma* (34, VI, VIII) and of the right limb of *cha* (17, VI—IX; compare also col. V).

(2) The cursive looped forms of *A*, *Ā* (1, 2, VII—IX), and of *I*, *Ī* (3, 4, VI—IX; compare their precursors in 3, II, and 4, III, V), and of *śa* (39, VII—IX), the central cross-bar of which is connected with the curved end of the right side.

(3) The conversion of the long drawn loops of *ka* (11, VI—IX) and of *ra* (36, VI—IX) into much smaller circles.

(4) The cursive rounding off of the angles of *ṇa* (24, VI—IX), *na* (29, VI—IX), and *sa* (41, VI—IX).

(5) The development of new loops or ringlets to the right of the top of *R* (7, IX), *na* (16, VIII, IX) and *ja* (18, VI—IX; compare col. V).

¹ BURNES and FLEET, *Pāli, Sanskrit, and Old-Kanarese inscriptions*, Nos. 271, 214; see also, for the Gaṅga record, IA. 6, 102.

² Compare also the facsimiles at IA. 9, 74; 14, 56; EI. 8, 26, 88, 194, 228; Ep. Carn. 3, 116, 121; BASWI. No. 10, 100; and J.BAS. 1891, 135 (the original of PRINSEP's Kistna alphabet, which is archaic and retrograded *A*, *ka*, *va*, *la*).

³ IA. 8, 241; EI. 6, 6.

(6) The exclusive employment of the medial *u* turning upwards on the right (see, for instance, *pu*, 30, IX), which in earlier times is restricted to *gu*, *tu*, *bhu* and *śu*, but later appears also in *su* (plate VIII, 41, II, III).

(7) Finally, the appearance of the Anusvāra on the line (see *ram*, 36, VIII), which cannot be a survival from ancient times, but must be an innovation intended to make the lines more equal (compare page 59 above, § 26, A, 5).¹

§ 30. — The later Kalinga script; Plates VII. and VIII.

[37] This script has been found hitherto only on the copper-plates of the Gaṅga kings of Kalinganagara, the modern Kalingapattanam in Gaṅjām, which in olden times was the residence of the Ceta king Khāravela and his successors (see page 39 f. above). The dates of these documents run from the year 87 of the Gāṅgeya era. Though its exact beginning has not yet been determined, FLEET has shown that the oldest Gaṅga grants probably belong to the 7th century.²

The signs of these documents resemble, up to the Gāṅgeya year 183, partly the letters of the Central-Indian script (above, § 28, B) and partly those of the western variety, which exhibits the medial *au*, of the Ajaṇṭa inscriptions (above, § 28, A), and they show only a few peculiar forms. A specimen of the Kalinga script of the latter kind has been given in plate VII, col. XIX, from the Cicacole grant of the Gāṅgeya year 148, in which only the Grantha-like *ā* (2, XIX), and the *ga* (10, XIX) and *śa* (36, XIX) with curves on the left, differ greatly from the corresponding Valabhi letters. The alphabet of the Acyutapuram plates³ of the Gāṅgeya year 87, which exhibits angular forms with solid box-heads, closely resembles the Central-Indian writing; but its *na* is identical with that of the modern Nāgarī. The Cicacole plates⁴ of the Gāṅgeya year 128 show in general the same type; but they offer the ordinary looped *na* of the north and west, and the looped *ta* of the archaic Grantha (22, XX, ff.). Finally, the Cicacole plates⁵ of the Gāṅgeya year 183 come close to the script of plate VII, col. X; but their *na* is again that of the late Nāgarī, and their medial *ā* mostly stands above the line, as in various northern and also Grantha documents of the 7th and 8th centuries.

In the grants of the 3rd and 4th centuries of the Gāṅgeya era, and in a late undated inscription, the mixture of the characters is much greater, and the same letter is often expressed by greatly differing signs. In plate VIII, col. X, from the Cicacole plates of the Gāṅgeya year 51, that is 251,⁶ and in col. XI, from the Vizagapatam plates of the year 254, and in col. XII, from the Alamaṇḍa plates of the year 304, we find a northern *ā*, *ā* (1, 2, X—XII), *ī* (3, XI), *ū* (5, X), *ka* (44, XI, XII), *kha* (12, XI), *ṅa* (15, X), *ṅka* (15, XII); *ja* (18, XII), *ṇa* (in *jā*, 19, X), *dā* (22, XII), *ṇa* (24, XI, XII), *dha* (28, 45, XI), *na* (48, X), and *pra* (47, XII). The other letters are of southern origin, and belong partly to the middle Kanarese, partly to the middle Grantha, or are peculiar developments. The restricted space available in plate VIII. has made it impossible to enter all the variants for each letter. But the three different forms of *ja* (18, 46, and 47, X) show how very great the variations are.

Still stronger are the mixture and variations in the Cicacole plates of the Gāṅgeya year 351,⁷ and in the undated grant of Vajrabasta from the 11th century (KIELHORN),⁸ neither of which is represented in our plate. In the first-named document each letter has, according to

¹ Compare for this paragraph B.ES1P. 15 ff.

² IA. 13, 274; 15, 133.

³ EI. 3, 128.

⁴ IA. 13, 120; compare 16, 131 f.

⁵ EI. 3, 132.

⁶ The words *śata-dvaya* probably have been left out by mistake after *sahvatsara*.

⁷ IA. 14, 10 f.; HULTZSCH's undoubtedly correct reading of the date has been adopted by FLEET in his *Dynasties of the Kanarese Districts*, Bombay Gazetteer, vol. 1, part 2, p. 297, note 8, the printed sheets of which I owe to the author's courtesy. FLEET declares this inscription, as well as those represented in plate VIII, cols. X, XII, to be suspicious, — in my opinion, without sufficient reasons.

⁸ EI. 3, 220.

FLEET, at least two, but sometimes three or four forms. The majority of the signs belong to the southern Nāgarī. But Old-Kanarese and late Grantha signs likewise occur. In Vajrabasta's grant there are, according to KIELHORN's calculation, 320 Nāgarī letters and 410 southern ones of different types, and each letter again has at least two and sometimes [68] four or more forms. KIELHORN points out that the writer has shown a certain art in the grouping of the variants; and he is no doubt right in hinting that the mixture is due to the vanity of royal scribes, who wished to show that they were acquainted with a number of alphabets. For the same reason, the writer of the Cicacole plates of the Gāngeya year 183 has used three different systems of numeral notation in expressing the date (see below, § 34). The kingdom of the Gāngas of Kalinga lay between the districts in which the Nāgarī and the Kanarese-Telugu scripts were used, and it was not far from the territory of the Grantha. Its population was probably mixed, and used all these scripts,¹ as well as, in earlier times, those employed in the older western and Central-Indian inscriptions. The professional clerks and writers of course had to master all the alphabets.

§ 31. — The Grantha alphabet; Plates VII. and VIII.

A. — The archaic variety.

For the history of the Sanskrit alphabets in the Tamil districts during the period after A. D. 350, we have only the Sanskrit inscriptions of the Pallavas, Colas and Pāṇḍyas from the eastern coast, among which only those of the first-named dynasty can lay claim to a higher antiquity. Corresponding inscriptions from the western coast are hitherto wanting. For this reason, and because only a small number of the eastern documents have been published with good facsimiles, it is as yet impossible to give a complete view of the gradual development of the letters.

The most archaic forms of the Sanskrit scripts of the Tamil districts, which usually are classed as "Grantha," are found on the copper-plates of the Pallava kings of Palakkada and (? or) Daśanapura² (plate VII, cols. XX, XXI) from the 5th or the 6th century (?), with which the ancient inscriptions, Nos. 1 to 16, of the Dharmarājaraṭha (plate VII, col. XXII)³ closely agree. These inscriptions, together with a few others,⁴ exhibit what may be called the archaic Grantha, the latest example of which occurs in the Bādāmi inscription, incised, according to FLEET's newest researches,⁵ by the Pallava Narasiṃha I., during his expedition against the Calukya Pulakeśin II. (A. D. 609 and about 642) in the second quarter of the 7th century; and it seems to have gone out soon after, as the Kūram plates of Narasiṃha's son Paramēśvara I. show letters of a much more advanced type. It is met with also in the stone inscription from Jambu in Java; see I.A. 4, 356.

The characters of the archaic Grantha in general agree with those of the archaic Kanarese-Telugu (see above, § 29, A), but shew a few peculiarities which remain constant in the later varieties: thus:—

(1) The *tha*, the central dot of which is converted into a loop, attached to the right side (plate VII, 23, XXI); compare the *tha* of col. XX, where the straight stroke of the Kanarese-Telugu script appears.

² The use of northern characters is proved by the Buguḍa plates, EI. 3, 41; compare also B.E.SIP. 53, and plate 32 b.

³ I.A. 5, 50, 154; compare B.E.SIP. 36, note 2.

⁴ I saw the facsimiles of this inscription and of those used for pl. VII, col. XXIV, and pl. VIII, col. XIII, to HULTSCH's kindness; see now his SII. 3, part 3.

⁵ I.A. 9, 100, No. 92, 102, No. 85; 18, 46; EI. 1, 397.

⁶ *Dynasties of the Kanarese Districts*, Bombay Gazetteer, vol. 1, part 2, p. 323.

(2) The *śa* with the cross-bar converted into a curve or loop and attached to the right side (plate VII, 36, XX—XXII, 45, XXII); compare also the cursive *śa* of the western script, mentioned above, § 28, A, 7.

(3) The *ṣa* with the cross-bar treated similarly (plate VII, 37, XX); compare the *ṣa* of col. XXI, which shows the older form.

The characters of plate VII, cols. XX, XXI, show no closer connection with those of the Prākṛit inscriptions of the Pallavas, discussed above in § 20, D.

B. — The middle variety.

The earliest inscription of the much more advanced forms of the second variety or the middle Grantha, is found on the Kūram copper-plates (plate VII, col. XXIV) of the reign of Parameśvara I., the adversary of the Western Calukya Vikramāditya I. (A. D. 655—680).¹ [69] Compared with this document, which appears to offer a real clerk's script, the monumental inscription of the Kailāsanātha temple (plate VII, col. XXIII), built according to FLEET² by Narasimha II., the son of Parameśvara I., is retrograde, and shows more archaic forms for several paleographically important letters. On the other hand, the Kaśākūḍi copper-plates (plate VIII, col. XIII), incised in the time of Nandivarman who succeeded Mahendra III., the second son of Narasimha II., and warred with the Western Calukya Vikramāditya II. (A. D. 733—749),³ agree more closely with the Kūram plates, and offer, besides some archaic forms, also much more advanced ones.

The most important innovations, either constantly or occasionally observable in this second variety of the Grantha, are: —

(1) The development of a second vertical in *A*, *Ā*, *ka* and *ra* (plate VII, 1, 2, 8, 33, XXIII, XXIV; plate VIII, 1, 2, 11, 36, XIII), as well as in medial *u* and *ṛ* (plate VII, 31, 38, XXIV; plate VIII, 34, 40, XIII), out of the ancient hook; compare the transitional forms in the facsimiles at IA. 9; 100, 102.

(2) The connection of one of the dots of *I* with the upper curved line (plate VII, 3, XXIII, XXIV; plate VIII, 3, XIII, *a*, *ḍ*).

(3) The opening of the top of *E* (plate VII, 5, XXIV), which however shows closed up forms in col. XXIII, and in plate VIII, 8, XIII.

(4) The development of a loop to the left of the foot of *kha*, and the opening up of the right side of the letter (plate VII, 9, XXIII), as in the Kanarese-Telugu script (see above, § 29, B, 2).

(5) The upward turn of the *Serif* at the left-hand lines of *ga* and *śa* (plate VII, 10, 36, XXIV; plate VIII, 13, 39, XIII; not in plate VII, col. XXIII).

(6) The opening up of the loops of *cha* (plate VIII, 17, XIII), and perhaps also in the indistinct *cha* of the Kūram plates, i, line 5.

(7) The transposition of the vertical of *ja* to the right end of the top-bar, and the conversion of the central bar into a loop connected with the lowest bar (plate VII, 15, XXIV; plate VIII, 18, XIII; not in plate VII, col. XXIII).

(8) The incipient opening up of the tops of *dka* and *tha* (plate VII, 23, 25, XXIII, XXIV; plate VIII, 26, 28, XIII).

(9) The opening up of the top of *ḍa*, and the transposition of the original top-line to the left of the left-hand vertical (plate VII, 29, XXIV; plate VIII, 32, XIII; not in plate VII, col. XXIII).

¹ HULTSCH, III. 1, 144 ff.; FLEET, op. cit. (preceding note), 323 f.

² FLEET, op. cit., 339 f.

³ FLEET, op. cit., 323 ff.

(10) The adoption of the later northern *ḥa* (see above, § 24, A, 24), or the development of an exactly similar sign (plate VII, 30, XXIV; plate VIII, 33, XIII; not in plate VII, col. XXIII).

(11) The combination of the left-hand vertical of *sa* with the left end of the old side-limb, and of the right end of the side-limb with the base-stroke (plate VII, 38, XXIV; a transitional form in col. XXII, and a different cursive form in plate VIII, 41, XIII).

(12) The frequent separation of medial *ā*, *e*, *ai*, *o*, *au*, from the Mātrkā (constant in plate VIII, col. XIII), as well as the use of the *ā* standing above the line, as in the northern alphabet of this period and in the Central-Indian script (compare plate VII, 17, 19, 21, 31—33, XXIII; 8, 24, XXIV).

(13) The expression of the Virāma (as in the Kanarese-Telugu script) by a vertical stroke above, or in the Kaśākūḍi plate also to the right of, the final consonant (plate VII, 41, XXIII; plate VIII, 47, XIII; and compare the facsimiles).

(14) The transposition of the Anusvāra to the right of the Mātrkā (plate VII, 38, XXIV) below the level of the top-line, as in the Kanarese-Telugu script.

(15) The occasional development of small angles, open above, at the tops of the verticals, for the left part of which a dot usually appears in plate VIII, col. XIII.

The fully-developed and very constant characteristics of the alphabet of the Kūram plates make it probable that they have not arisen within the period of twenty to thirty years, which lies between the issue of the Kūram grant and the incision of the much more archaic Bādāmi inscription of Narasiṃha I. (see above, under *A*). Very likely the Kūram alphabet had a longer history.

C.—The transitional Grantha.

The series of the published datable Pallava inscriptions of the 8th century ends for the present with the Kaśākūḍi plates; and facsimiles of documents of the next following centuries [70] are not accessible to me. I am, therefore, unable to exactly fix the time when the third or transitional variety of the Grantha, BURNELL's Coḷa or middle Grantha, came into use, which is found in the inscriptions from the reign of the Bāṇa king Vikramāditya¹ about A. D. 1150 (plate VIII, col. XIV) and of Sundara-Pāṇḍya,² A. D. 1250 (plate VIII, col. XV), as well as in other documents.³ It would however appear, both from the Grantha signs occurring in the Gaṅga inscriptions (plate VIII, cols. XI, XII) and from BURNELL's Coḷa-Grantha alphabet of A. D. 1080,⁴ that the new developments originated partly towards the end of the 8th century and partly in the 9th and 10th, about the same time when the Old-Kanarese script (above, § 29, C) was formed.

The most important changes, which the transitional Grantha shows, are as follows :—

(1) The suppression of the last remaining dot of *ī* (plate VIII, 3, XIV, XV; compare 3, XIII, *a*).

(2) The formation of a still more cursive *ē* (8, XIV) out of the Kūram letter (plate VII, 6, XXIV).

(3) The formation of a still more cursive *ḥa* (plate VIII, 12, XIV, XV), closely resembling the later Kanarese-Telugu sign (plate VIII, 12, III, ff.), out of the letter of plate VII, 9, XXIII.

¹ EI. 3, 75.

² EI. 3, 8.

³ Compare facsimiles at IA, 6, 142; 8, 274; 9, 46 (EI. 3, 79 f.); EI. 3, 228; Ep. Carn. 3, 166; SIL. 2, pl. 2; the last inscription and the last but two are older than the 11th century.

⁴ B.E.S.P. plate 18.

- (4) The development of a single or double curve to the left of *gha* (plate VIII, 14, XIV, XV).
- (5) The opening up of the top of *ca*, and the conversion of its left side into an acute angle (plate VIII, 16, XIV, XV).
- (6) The addition of a curve to the right end of *ḍa* (plate VIII, 22, XIV, XV).
- (7) The development of an additional loop in *ṇa* (plate VIII, 24, XIV, XV), in accordance with the practice of the Tamil alphabet (see below, § 32, A).
- (8) The complete opening up of the tops of *tha* and *dha* (plate VIII, 26, 28, XIV, XV).
- (9) The development of a curve at the left side of *pa* (plate VIII, 30, XIV, XV).
- (10) The closing up of the top of *ma* (plate VIII, 34, XIV, XV), found already in the Gaṅga inscription of about A. D. 775 (plate VIII, 46, XI).
- (11) The suppression of the circle or loop on the right side of *ya* (plate VIII, 35, XIV, XV), whereby the letter obtains a very archaic appearance.
- (12) The opening up of the top of *va*, and the addition of a curve to its left side (plate VIII, 38, XVI, XV).
- (13) The complete separation of medial *ā*, *e*, *ai*, *o* from the *Mātrkāḥ*, and the formation of a separate sign for the second half of *au*, consisting of two small curves with a vertical on the right.

It is worthy of note that the later alphabet of col. XV. has some more archaic signs than the earlier one of col. XIV. The reason no doubt is that the latter imitates the hand of the clerks of the royal office, while the former shows the monumental forms, suited for a public building. All the Grantha inscriptions imitate characters written with a *stilus*.

§ 32. — The Tamil and Vaṭṭeḷuttu alphabets; Plate VIII.

A. — The Tamil.

The Tamil, as well as its southern and western cursive variety, the Vaṭṭeḷuttu or "round-hand," differs from the Sanskrit alphabet by the absence not only of the ligatures, but also of the signs for the aspirates, for the *mediae* (expressed by the corresponding *tenues*), for the sibilants (among which the palatal one is expressed by *ca*), for the spirant *ha*, for the Anusvāra and for the Visarga, as well as by the development of new letters for final *ṇ*, and for *ṛa*, *ḷa* and *ḷa*, which latter three characters do not resemble those for the corresponding sounds in the Kanarese-Telugu script. The great simplicity of the alphabet fully agrees with the theories of the Tamil grammarians, and is explained by the peculiar phonetics of the Tamil language. Like all the older Dravidian dialects, the Tamil possesses no aspirates and no spirant. Further, it has no *ja*, and only one sibilant, which, according to CALDWELL, lies between *śa*, *ṣa* and *ca*, and which, if doubled, becomes a distinct *cca*. [71] The use of separate signs for the *tenues* and *mediae* was unnecessary on account of their mutual convertibility. The Tamil uses in the beginning of words only *tenues*, and in the middle only double *tenues* or single *mediae*. Hence, all words and affixes beginning with gutturals, linguals, dentals and labials, have double forms.¹ A knowledge of these simple rules makes mistakes, regarding the real phonetic value of *ka*, *ṭa*, *ta* and *pa*, impossible. The use of ligatures probably has been discarded because the Tamil allows even in loan-words no other combinations of consonants but repetitions of the same sound, and because it seemed more convenient to use in these cases the *Virāma*.²

¹ CALDWELL, Comparative Grammar of the Dravidian Languages, 21–27.

² Differently BURNELL, ESIP. 44, 47 ff., who considers the Vaṭṭeḷuttu as independent of the Brāhmī, but likewise of Semitic origin, and declares the Tamil alphabet to be the result of a Brahmanical adaptation of the Grantha letters to the phonetical system of the Vaṭṭeḷuttu. This view has already been characterised "as hardly in accordance with the facts" by CALDWELL, op. cit., 9.

The occurrence of signs for the Dravidian liquids, which, though the sounds correspond with those of the older Kanarese and Telugu, differ from the characters of the Kanarese-Telugu script, indicates that the Tamil alphabet is independent of the latter and has been derived from a different source. HULTZSCH's important discovery of the Kūram plates,¹ with a large section in the Tamil script and language of the 7th century, confirms this inference. The Tamil alphabet of these plates agrees only in part with their Grantha, and many of its letters offer characteristics of the northern alphabets.

Specific Grantha forms occur in *U* (plate VIII, 5, XVI; compare plate VII, 4, XXIV); in *O* (plate VIII, 9, XVI; compare col. XV); in *ta* (plate VIII, 25—28, XVI; compare plate VII, 22, XXIV); in *na* (plate VIII, 29, XVI; compare plate VII, 26, XXIV); in *ya* (plate VIII, 35, XVI; compare plate VII, 32, XXIV); in medial *u* in *ku* (plate VIII, 14, XVI; compare 44, XIII); in medial *e* (in *te*, plate VIII, 28, XVI; compare *khe*, plate VII, 9, XXIV); and in the vertical Virāma, which mostly stands above the vowelless consonant but to the right of *n* and *r* (compare *ñ*, plate VIII, 15, XVI; *m*, 34; *l*, 43; *ṇ*, 49). The Tamil *ai* (for instance, *nai*, plate VIII, 29, XVI) appears to be a peculiar derivative from the Grantha *ai*, the two Mātrās having been placed, not one above the other, but one behind the other.

Unmodified or only slightly modified northern forms appear in *A* and *Ā* (plate VIII, 1, 2, XVI), with the single vertical without a curve at the end (compare plate IV, 1, 2, I ff.), and with the loop on the left, which is found in recently discovered inscriptions from Swāt as well as in the Grantha; in *ka* (plate VIII, 11—14, XVI; compare plate IV, 7, I ff.); in *ca* (plate VIII, 16—18, XVI; compare plate III, 11, III); in *ta* (plate VIII, 20—22, XVI; compare plate IV, 17, VII, VIII); in *pa* (plate VIII, 30—33, XVI; compare plate IV, 27, I ff.); in *ra* (plate VIII, 36, XVI; compare plate IV, 33, I ff.); in *la* (plate VIII, 37, XVI; compare plate IV, 34, VII ff.); in the medial *u* of *pu*, *mu*, *yu*, *vu* (plate VIII, 32, 40, XVI; compare plate IV, 27, II), and of *ru* (plate VIII, 36, XVI; compare plate IV, 33, III); and in the medial *ū* of *lū* and *lū* (plate VIII, 44, 46, XVI; compare *pū*, plate IV, 27, IV).

The *ñ* (plate VIII, 15, XVI) is more strongly modified, as it has been formed out of the angular northern *ña* (plate IV, 11, I ff.) by the addition of a stroke rising upwards on the right; and the *ma* (plate VIII, 34, XVI) is probably a cursive derivative from the so-called Gupta *ma* (plate IV, 31, I ff.).

The signs for the Dravidian liquids, too, may be considered as developments of northern signs. The upper portion of the *la* (plate VIII, 43, 44, XVI) looks like a small cursive northern *la*, to which a long vertical, descending downwards, has been added on the right. The *ra* (plate VIII, 47, 48, XVI) may consist of a small slanting northern *ra* and a hook added to the top. And the *ḷa* (plate VIII, 45, 46, XVI) is perhaps derived from a northern *ḷa* (plate IV, 40, II), the end of the horizontal line being looped and connected with the little pendent stroke below; compare also the looped *ḷa* (read erroneously *ḍha*) in the Amarāvati inscription, J.R.A.S. 1891, plate at p. 142.

The origin of the remaining signs is doubtful. Some, such as *va* (plate VIII, 38—40, XVI) and medial *ā* (see *kā*, plate VIII, 12, XVI), occur both in northern and in southern scripts. Others are modifications of letters common to the north and the south. The final *ṇ* (plate VIII, 49, XVI) is evidently the result of a slight transformation of both the northern and the southern *ṇa* with two hooks [72] (plate III, 20, V, XX; plate IV, 21, VII f.; plate VII, 21, IV ff.); and from this comes the Tamil *ṇa* (plate VIII, 24, XVI) by the addition of another curve. The parent of the peculiar *E* (plate VIII, 8, XVI) may be either that of plate IV, 5, X ff., or that of plate VII, 5, XXIII. Similarly, the angular medial *u* in *tu* (plate VIII, 27, XVI) and in *ru* (plate VIII, 48, XVI) is due to a peculiar modification of the curve, rising upwards on the right, which is found in connection both with northern and with southern letters (see *ṣu*, plate IV,

¹ III. 1, 147; compare 2, plate 12; the characters of the Vallam Cave inscription, op. cit., 2, plate 10, fully agree.

36, III, XVII, and plate VII, 36, II, IV). Finally, the greatly cursive *I* (plate VIII, 3, XVI) appears to be the result of a peculiar combination of three curves, which replaced the ancient dots. But an *I* of this kind has hitherto not been traced.

This analysis of the Tamil alphabet of the 7th century makes it probable that it is derived from a northern alphabet of the 4th or 5th century, which in the course of time was strongly influenced by the Grantha, used in the same districts for writing Sanskrit.

The next oldest specimen of the Tamil script, which is found in the Kaśākūḍi plate¹ of about A. D. 740 (not represented in plate VIII), shows no essential change except in the adoption of the later Tamil *ma*.

But the inscriptions of the 10th, 11th and later centuries² (plate VIII, cols. XVII—XX) offer a new variety, which is more strongly modified through the influence of the Grantha. The *ṭa*, *pa* and *va* have now the peculiar Grantha forms. Besides, in the 11th century begins the development of the little strokes, hanging down on the left of the tops of *ka*, *ṇa*, *ca*, *ta* and *na*. In the 15th century (plate VIII, cols. XIX, XX) these pendants are fully formed, and *ka* shows a loop on the left. It is worthy of note that in the later Tamil inscriptions the use of the Virāma (Pulli) first becomes rarer and finally ceases,³ while in the quite modern writing the Virāma is again marked by a dot.

B.—The Vaṭṭeḷuttu.

Among the Vaṭṭeḷuttu inscriptions, the Sāsanas of Bhāskara-Ravivarman in favour of the Jews (pl. VIII, cols. XXI, XXII) and of the Syrians of Kocin,⁴ as well as the Tirunelli copper-plates of the same king,⁵ have been published with facsimiles. Trusting to rather weak arguments, BURNELL ascribes the first-named two documents to the 8th century.⁶ But the Grantha letters occurring in the Sāsana of the Jews belong to the third and latest variety of that alphabet, and the Nāgarī *śā* or *śi* (probably for *śri*) at the end of the document, to which HULTZSCH has called attention,⁷ resembles the northern forms of the 10th and 11th centuries (compare plate V, 39, 47, VIII; 48, X).

From a paleographical point of view, the Vaṭṭeḷuttu may be described as a cursive script, which bears the same relation to the Tamil as the modern northern alphabets of the clerks and merchants to their originals, *e. g.*, the Modī of the Marāṭhās to the Bālbodh and the Ṭākārī of the Dogrās to the Sārādā.⁸ With the exception of the *I*, probably borrowed from the Grantha, all its letters are made with a single stroke from the left to the right, and are mostly inclined towards the left. Several among them, such as the *ṇa* (plate VIII, 15, XXI) with the curve and hook on the left, the *va* with the open top and the hook on the left (plate VIII, 38, XXI, XXII; compare cols. XVII—XX) and the round *ṛa* (plate VIII, 45, 46, XXI, XXII; compare 47, XVII—XX), show the characteristics of the second variety of the Tamil of the 11th and later centuries. And with the usage of the later Tamil inscriptions agrees the constant omission of the Virāma. Some other characters, such as the round *ṭa* (plate VIII, 20—23, XXI, XXII; compare col. XVI), the *ma* with the curve on the right (plate VIII, 34, XXI, XXII; compare col. XVI), and the *ya* with the loop on the left (plate VIII, 35, XXI, XXII; compare col. XVI), seem to go back to the forms of the earlier Tamil. And three, the rounded *U* (plate VIII, 5, XXI), the pointed *E* (plate VIII, 8, XXI) and the *ṛa* with a single notch (plate VIII, 26, XXI, XXII), possibly show characteristics dating from a still earlier period.

¹ SIL 2, plates 14, 15.

² Compare the facsimiles, of 10th and 11th centuries, at EI. 3, 284; SIL 2, plates 2—4; of the 15th century, at SIL 2, plate 5; uncertain, at SIL 2, plate 8; IA. 6, 142; alphabet, B.ESIP. plates 18, 19.

³ Compare VENKAYYA, EI. 3, 278 ff.

⁴ Madras Journ. Lit. Soc. 13, 2, 1; IA. 3, 333; B.ESIP. pl. 32 a; EI. 3, 73; alphabet, IA. 1, 229; B.ESIP. pl. 17.

⁵ IA. 20, 292.

⁶ EI. 3, 67.

⁷ IA. 1, 229; B.ESIP. 49; disputed by HULTZSCH, IA. 20, 289.

⁸ Compare above, § 25, note 8.

Perhaps it may be assumed that the "round-hand" arose already before the 7th century, but was modified in the course of time by the further development of the Tamil and the Grantha scripts. Owing to the small [73] number of the accessible inscriptions, this conjecture is however by no means certain.

The transformation of the *Vatṭeḷuttu ka* (plate VIII, 11—14, XXI, XXII), which seems to be derived from a looped form, is analogous to that of the figure 4 in the decimal system of numeral notation (compare plate IX, B, 4, V—VII, and IX). The curious *ta* (plate VIII, 25—28, XXI, XXII) has been developed by the change of the loop of the Tamil letter (compare cols. XVII, XVIII) into a notch and the prolongation of the tail up to the head. The still more extraordinary *na* (plate VIII, 29, XXI) may be explained as a cursive derivative of the later Tamil *na* with the stroke hanging down from the top.

VI. NUMERAL NOTATION.

§ 33. — The numerals of the Kharoṣṭhī; Plate I.¹

In the Kharoṣṭhī inscriptions of the Sakas, of Gondopherres, and of the Kuṣanas, from the 1st century B. C. and the 1st and 2nd centuries A. D., as well as in other probably later documents, we find a system of numeral notation (plate I, col. XIV)² which Dowson first explained with the help of the Taxila copper-plate.³

Its fundamental signs are: — (a) One, two and three vertical strokes for 1, 2, 3. (b) An inclined cross for 4. (c) A sign, similar to the Kharoṣṭhī 4, for 10. (d) A double curve, looking like a cursive combination of two 10 (BAYLEY), for 20. (e) A sign, resembling a Brāhmī *ta* or *tra*, for 100, to the right of which stands a vertical stroke, whereby the whole becomes equivalent to 100.

The numbers lying between these elements are expressed by groups, in which the additional ones invariably are placed on the left. Thus, for 5 we have 4 (+) 1; for 6, 4 (+) 2; for 8, 4 (+) 4; for 50, 20 (+) 20 (+) 10; for 60, 20 (+) 20 (+) 20; for 70, 20 (+) 20 (+) 20 (+) 10. Groups formed of the signs for 10 (+) 1 to 10 (+) 9, and 20 (+) 1 to 20 (+) 9, and so forth, are used to express the numerals 11 to 19, and 21 to 29, &c.

The higher numerals beyond 100 are expressed according to the same principle; thus, 103 is 100 (+) 3 or IC III. The sign for 200 consists of 100, preceded on the right by two vertical strokes. And the highest known number is IIC XX XX XX X IV, which means 274.⁴

The few numeral signs in the Aśoka edicts of Shāhbāzgarhī and Mansehra (plate I, col. XIII)⁵ show that in the 3rd century B. C. the Kharoṣṭhī system of numeral notation differed from the later one at least in one important point. Both in Shāhbāzgarhī, where the signs for 1, 2, 4, 5 occur, and in Mansehra, which offers 1, 2, 5, the inclined cross for 4 is absent, and 4 is expressed by four parallel vertical strokes, and 5 by five. It is as yet not ascertainable, how the other signs looked in the 3rd century B. C.

BURNELL and others⁶ have stated long ago that the Kharoṣṭhī numerals are of Semitic origin. And it may now be added that probably they have been borrowed from the Aramaeans.

¹ Compare E. C. BAYLEY, the Genealogy of the Modern Numerals, J.RAS, N.S., 14, 335 ff.; 15, 1 ff.

² The signs of col. XIV. have been drawn according to S.NEI, 3, pl. 1 (JA. 1890, I, pl. 15); J.ASB. 58, pl. 10; FLEER's photograph of the Taxila copper-plate (EI. 4, 56); and a gelatine copy of the Wardak vase, kindly presented by S. VON OLDENBURG.

³ J.RAS. 20, 228.

⁴ Thus CUNNINGHAM. SENART, op. cit., 17, reads 84, doubting the existence of 200 (which however is plain in the autotype of J.ASB. 58, pl. 10), while BARTH reads 234. There is at least one unpublished inscription with 200, and, according to a communication from BLOCH, also one with 300.

⁵ Drawn according to BURNELL's impression of Shāhbāzgarhī edicts I—III, XIII.

⁶ B.E.SIP. 64; J.ASB. 32, 150.

and that, with the exception of the cross-shaped 4, they have been introduced together with the Aramaic letters. According to [74] Euting's table of the ancient Aramaic numerals,¹ 1 to 10 are marked, as in the Aśoka edicts, by vortical strokes, which however, contrary to the Indian practice, are divided into groups of three. The Kharoṣṭhī 10 comes close to that of the Teima inscription, 7, and the 20 resembles the sign of the Satrap coins, 3, which is also found in the papyrus Blacas² (5th century B. C.), and somewhat modified in the papyrus Vaticanus. Both the Aramaeans and the Phoenicians used the signs for 10 and 20 in the same manner as the Hindus, in order to express 30, 40, and so forth.

For the Kharoṣṭhī 100, Euting's table offers no corresponding Aramaic sign, and that given in his edition of the Saqqārah inscription³ is, as he informs me, not certain. Hence, there remain only the Phoenician symbols ρ, ϕ, which are suitable for comparison. But the close relationship of Phoenician and Aramaic writing makes it not improbable that the latter, too, possessed in earlier times a 100, standing upright. The Kharoṣṭhī practice of prefixing the signs for 1 and 2 to the 100 is found in all the Semitic systems of numeral notation.

The inclined cross, used to express the 4 in the later Kharoṣṭhī inscriptions, is found only in Nabataean inscriptions incised after the beginning of our era, and is used there only rarely for the expression of the higher units. The late occurrence of the sign both in Indian and in Semitic inscriptions makes it probable that both the Hindus and the Semites independently invented this cursive combination of the original four strokes.

§ 34. — The numerals of the Brāhmī; Plate IX.

A. — The ancient letter-numerals.*

In the Brāhmī inscriptions and coin-legends we find a peculiar system of numeral notation, the explanation of which is chiefly due to J. STEVENSON, E. THOMAS, A. CUNNINGHAM, BHĀṬ DAJĪ and BHAGVĀNLĀL INDRĀJĪ.⁵ Up to the year A. D. 594-95 it is used exclusively, and later together with the decimal system.⁶ It appears also exclusively in the Bower MS. and in the other MSS. from Kashgar,⁷ as well as together with the decimal system, — chiefly in the pagination, — in the old MSS. of the Jainas of Western India and of the Bauddhas of Nepāl as late as the 16th century.⁸ And the Malayālam MSS. have preserved it to the present day.⁹

In this system, 1 to 3 are expressed by horizontal strokes or cursive combinations of such; 4 to 9, 10 to 90, 100, and 1000, each by a separate sign (usually a Mātrkā or a ligature); the intermediate and the higher numbers by groups or ligatures of the fundamental signs. In

³ Palaeographical Society, Or. Ser., plate 63.

⁴ Compare BHAGVĀNLĀL, IA. 6, 42 ff.; BESIP. 59 ff., and pl. 23; E. C. BAYLEY, On the Genealogy of the modern Numerals, J.RAS. N.S., 14, 335 ff.; 15, 1 ff.

⁵ J.BRAS. 5, 35, and pl. 18; P.IA. 2, 90 ff.; CASB. I, XLII, and J.ASB. 33, 38; J.BBRAS. 8, 225 ff.; the results of the last article belong chiefly to BHAGVĀNLĀL INDRĀJĪ, though his name is not mentioned.

⁶ Compare below, § 34, B. The latest epigraphic date in letter-numerals is probably the Nevār year 250 in BENDALL's Journey in Nepāl, 81, No. 6; compare also FLEET, GI (CII. 3), 209, note 1.

⁷ See HOERNLE, "The Bower MS.," WZKM. 7, 260 ff. The Bower MS. occasionally has the decimal 3.

⁸ Compare BHAGVĀNLĀL's table, IA. 6, 42 f.; KIRLHOEN, Report on the Search for Sanskrit MSS., 1880-81, VIII. ff.; PETERSON, First Report, 57 f., and Third Report, App. I, *passim*; LEUMANN, Śilāṅka's Commentary on the Viśeṣāraṇyaka (especially table 35); COWELL and EGGELING, Cat. Sanskrit Buddhist MSS., 52 (J.RAS. 1875); BENDALL, Cat. Cambridge Sanskrit Buddhist MSS., LII ff., and table of numerals. In BENDALL's Nos. 1049 and 1161, the letter-numerals are also used for dates. The latest date in letter-numerals from Nepāl (BENDALL's table of numerals) is A. D. 1583. Letter-numerals are usually only found in Jaina palm-leaf MSS. up to about A. D. 1450; but the Berlin paper MS. No. 1769 (WEBER, Verzeichniss d. Skt. und Prak. Hdschrft., 2, 1, 268; compare D.WA., 37, 250) shows some traces of them.

⁹ BENDALL, J.RAS. 1896, 789 ff.

order to express figures consisting of tens and units, or of hundreds, tens and units, and so forth, the symbols for the smaller numbers are placed either unconnected to the right of, or vertically below, the higher ones. The first principle is followed in all inscriptions and on most coins, the second on a few coins¹ and in the pagination of all manuscripts. In order to express 200 and 2000, one short stroke is added to the right of 100 and 1000. Similarly, 300 and 3000 are formed by the addition of two strokes to the same elements. [75] Ligatures of 100 and 1000 with the signs for 4 to 9 and 4 to 70, stood for 400 to 900 and 4000 to 70000 (the highest known figure), and the smaller figures are connected with the right side of the larger ones.

The Jaina MSS. offer, however, an exception in the case of 400. In the pagination of their MSS., both the Jainas and the Bauddhas use mostly the decimal figures for 1 to 3 (plate IX A, cols. XIX—XXVI), more rarely the Akṣaras *E* (*eka*), *dvi*, *tri*, or *śva* (1), *sti* (2), *śrī* (3),² the three syllables of the well-known Maṅgala, with which written documents frequently begin. Occasionally the same documents combine the naught and other figures of the decimal system³ with the ancient numeral symbols. Similar mixtures occur also in some late inscriptions. Thus, the year 183 of Devendravarman's Cīcācole plates is given first in words and next expressed by the symbol for 100, the decimal 8, and the syllable *lo*, i. e. *loka* = 8 (see below, § 35, A), while the day of the month, 20, is given only in decimal figures.⁴

In the MSS., the signs of this system are always distinct letters or syllables of that alphabet in which the manuscript is written. They are however not always the same. Very frequently they are slightly differentiated, probably in order to distinguish the signs with numeral values from those with letter values. In other cases there are very considerable variants, which appear to have been caused by misreadings of older signs or dialectic differences in pronunciation. The fact that these symbols really are letters is also acknowledged by the name *akṣarapalli*, which the Jainas occasionally give to this system, in order to distinguish it from the decimal notation, the *aṅkapalli*.⁵ A remark of the Jaina commentator Malayagiri⁶ (12th century), who calls the sign for 4 the *ñkaśabda*, "the word *ñka*," indicates that he really pronounced, not *catuḥ*, but *ñka*.

The phonetical values of the symbols in plate IX, A, cols. XIX—XXVI,⁷ and of some others, given by BENDALL (B.), BHAGVĀNLĀL INDRĀJĪ (Bh.), KIELHORN (K.), LEUMANN (L.), and PETERSON (P., see note 8 on page 77 above), are:—

4 = *ñka* (XIX; compare L., p. 1); with intentional differentiation, *rñka* (L., p. 1.) and *rñkā* (XXV); with *ṇa* for *ña* and additions, *ṇka* (XXVI; B., Bh.), *rṇka* (XXIV; compare K.), or *pka* (XX, XXI), or *hka* (XXIII; B.).

5 = *tr* (XIX, XXI, XXV, XXVI; B., Bh., K.); with intentional differentiation, *rtṛ* (Bh., K.); with a mistaken interpretation of the top-stroke as *ā*, *r/ā* (XXIV); with

⁷ Preparation of Plate IX, A, cols. XIX—XXVI:—Col. XIX; from facsimiles in HOERNLE's "The Bower MS."

Cols. XX—XXIII, and XXVI; cuttings from BENDALL'S Table of Numerals, Nos. 1049, 1702, 826, 1648, 1688.

Col. XXIV; drawn according to the tables of BHAGVĀNLĀL, KIELHORN, and LEUMANN.

Col. XXV; drawn from the same sources; but 8, 9, 100, are cuttings from ZACHARIAE's photograph of the Śāhasāṇkacarita of the Royal Asiatic Society.

Col. XXVI; see above, under cols. XX—XXIII.

a misinterpretation of the curved *ta* (compare the sign of B.'s No. 1464), also *hr* (compare the sign of B.'s No. 1645 ff.) or *hva* (XXIII).

6 = *phra* (XIX, XXI, XXVI; B., Bh.) or *phu* (K.); and with intentional differentiation, *rphu* or *rphru* (XXIV; K.); with a misinterpretation of an old *pha*, also *ghra* (XXII); and with dialectic softening of the *tenuis*, *bhra* (XXIII; compare B., p. LIV).

7 = *gra* (XIX, XXI, XXVI; Bh.) or *grā* (XXV; B., Bh., K.); with intentional differentiation and misinterpretation of the *ra*-stroke, *rggā* (XXIV; P.); with misinterpretation of *ga*, *bhra* (XX; compare B., p. LIV) or *ṇa* (XXIII; compare B., LIV).

8 = *hra* (XIX, XXI, XXIII, XXVI; B., Bh.; partly with irregular addition of the *ra*-stroke to the hook of *ha*) or *hrā* (XXV; B., Bh., K.); and with intentional differentiation, *rhra* (K.) or *rhrā* (XXIV; K.).

9 = *o* (XIX, XXI, XXIII, XXIV, XXVI; B., Bh.) or *Om* (XXV; K.).

10 = *ṇṛ* (XIX), formed out of the ancient *ṭhū* (cols. IV—VI) through the opening of the circle of *ṭha*; or *ḍā* (XX, XXIII; B., Bh.), the Nepalese representative of older *ḷa* (cols. X, XI; compare IA. 6, 47), which likewise is a derivative from *ṭhū*; or, especially in Nāgarī MSS., *ḷ* (XXI, XXV, XXVI; Bh., K.), through a misinterpretation of *ḷa*; and with intentional differentiation, *rḷ* (XXIV; K.).

20 = *tha*² or *thā* (XIX—XXI, XXIII, XXIV, XXVI; B., Bh., K.); or with intentional differentiation, *rtha* and *rthā* (XXV; K.).

30 = *la* or *lā* (XIX—XXI, XXIII, XXIV, XXVI; B., Bh., K., P.); or with intentional [76] differentiation, *rla* and *rlā* (XXV; K.).

40 = *pta* and *ptā* (XX, XXI, XXIII, XXIV, XXVI; B., Bh., K.); or with intentional differentiation, *rpta* and *rptā* (XXV; K.).

50 = Anunāsika (? BHAGVĀNLĀL), but corresponding only in col. XXIV. to an actually traceable form of this nasal (IA. 6, 47); occasionally turned round (XX; B.: XXIII; K.).

60 = *eu*, frequent in Nepalese MSS. (XX, XXI, XXIII), or *thu*, regular in Nāgarī MSS. (XXV, XXVI; Bh., K.); and with intentional differentiation, *rthu*³ (XXIV; K.).

70 = *cū*, frequent in Nepalese MSS. (XX, XXI, XXIII; B., Bh.) or *thū*, regular in Nāgarī MSS. (XXV, XXVI); and with intentional differentiation, *rthū* (XXIV; K.).

80 = Upadhmāniya with one central bar (XXIII, XXVI; B., Bh.: compare plate IV, 46, III), or later modified forms of that sign (XXI, XXIV; Bh., K.), which appear also in MSS. (K.) and in inscriptions (plate IV, 46, XXIII).

90 = Upadhmāniya with two cross-shaped bars (XXI, XXIII, XXVI; compare plate VII, 46, V, VI), and cursive forms of that sign (XXIV), or perhaps Jihvāmūliya (XXV; Bh.) derived from the *ma*-like sign of plate VII, 46, III, XIII.

100 = *su* in Nāgarī MSS. (XXIV, XXV; Bh., K.); or *ḷ* in Nepalese MSS., owing to a misinterpretation of *su* (XX, XXIII, B., Bh.); or *lu* in Nepalese and Bengālī MSS., the result of another misinterpretation (XXI, XXVI; B., Bh.).

200 = *sū* in Nāgarī MSS. (XXIV, XXV; Bh., K.), or *ḷ* in Nepalese MSS. (XX, XXIII; B., Bh.), or *lū* in Nepalese and Bengālī MSS. (XXVI; Bh., B.).

300 = *sū-ā* in Nāgarī MSS. (XXIV, XXV; Bh.: read *stā* by K.), or *ḷ-ā* in Nepalese MSS. (XX).

400 = *sū-o* (XXV; read *sto* by K.) in Nāgarī MSS.

¹ For this *pha*, compare plate VI, 33, V.

² Common also in the Bower MS. PETERSON's *gha* is due to a misreading of the old *tha*.

³ PETERSON's *rphu* is a misreading.

In the inscriptions, the phonetical values of the signs often differ from those in the MSS. and vary very considerably, and almost every one of the vertical and horizontal columns (plate IX, A, I—XVIII)¹ shows at least some, occasionally a great many, cursive or intentionally modified forms, which possess hardly any resemblance to letters :—

4 = *ka* (I), *kī* (III, in 400, 4000; IV, A; V, A; VI, B), *kri* (V, B; IX, A), *pha* (III, A; VI, A; VIII, A; IX, B), *hka* (X, A), *lka* (facsimile IA. 5, 154), *yka*.

5 = *ta*, mostly with irregular addition of the *ra*-stroke to the vertical of *ta* (V, A; VIII, A, B; IX, B; X, A; XV, A), *trā* (VII, A), *tu* (IX, A), *nu* (IV, B), *na*, *nā* (XI, A, B), *ṭ* (XIII, A), *hr* (XIII, B; XIV, A; XVII, A), *hra* (XVI, A), together with two cursive signs without phonetic value in V, A, B.

6 = *ja*, *sa*² (I, II; compare plate II, 15, III; 39, VII), *phra* (III, in 6000; IV, V), *phrā* (IX, XI), *phā* (XIII), *pha* (XIV), together with four cursive signs (VI—VIII, XV), among which the first is probably derived from *ja*, the second from *sa*, and the other two from *phra*.

7 = *gra* or *gu* (III—VI, IX—XI, XIII, XV), *ga* (VII) with a cursive sign (XII) derived from a *gra* like that in XIII.

8 = *hra* with irregular addition of the *ra*-stroke to the end of *hz* (IV, A, B; VI, A), *ha* (VI, B), *hā* (VII, A; X), *hrā* (XI, XVII, XVIII) or in eastern inscriptions *pu* (VIII, B; XV, A; XVI) probably a cursive derivative from *hra*, together with five cursive signs without phonetic value (V, A; VIII, A; IX, A, B; XV, B), among which the second and the fifth are derived from *pu*, the first from *hra*, the third from *hrā*, and the fourth from *hā*.

9 = *o*; really occurring letter-forms in col. V (compare plate IV, 6, IX), in col. VI (compare AU, plate VII, 7, X), in col. IX (compare plate VI, 13, I), in cols. XI, XII (compare plate V, 47, IX), in col. XIV (compare plate V, 9, XV), in col. XVII (compare plate VI, 13, V ff.), different from the most ancient form (III, IV) in cols. VII. and XIII, cursive in cols. X. and XVI.

10 = *thū*³ (III, in 10000; IV, A, B; V, A; VI, A), hence a cursive sign, derived by the opening of the circle of *tha* (V, B; VI, B; VII A; VIII, IX), which later is converted into *a* (X, XI, A, B), or into *rya* (XVI, A), or, as in the MSS., into *!* (XIII, A, B; XVII, A), or into *kha* and *ce* (XV, A, B).

20 = *tha* (III, in 20000; XV), or, as in the MSS., *tha*, *thā*, of the type of the period.

30 = *la*, as in the MSS.; occasionally with small modification.

¹ Preparation of Plate IX, A, cols. I—XVIII :—

Col. I; the 4, cutting from BUNCESS' facsimile of the Kālsī edict XIII, EI. 2, 455; the 6, 50, 200, drawn according to facsimiles of the Sahaerām and Rūpnāth edicts, IA. 6, 155 ff.

Col. II; cuttings from facsimile of the Siddāpura edict, EI. 3, 188.

Col. III; cuttings from facsimiles of Nāpāghāt inscriptions, B.ASRWI. 5, pl. 51.

Col. IV; cuttings from facsimiles of Nāsik inscriptions, B.ASRWI. 4, pl. 52, Nos. 5, 9, 18, 19; pl. 53, Nos. 12—14; the 70 drawn according to the Gīrnār Prasasti, B.ASRWI. 2, pl. 14.

Col. V; drawn according to facsimiles of Ksatrapa coins, J.EAS. 1890, plate at 639.

Col. VI, VII; cuttings from facsimiles at EI. 1, 381 ff.; 2, 201 ff.

Col. VIII; cuttings from facsimiles at B.ASRESI. 1, pl. 62, and EI. 1, 2 ff.

² Probably to be read thus; not as a modification of *phra* or *phu*.

³ Thus BAYLEY, doubtfully; for the *ū* of the sign in IV, B, compare *nū*, plate III, 25, 6.

Cols. IX, X; cuttings from facsimiles at F.GI (CH. 3), Nos. 2, 3, 5, 7, 9, 11, 19, 23, 23, 59, 63, 70, 71.

Col. XI; cuttings from facsimiles at F.GI (CH. 3), Nos. 38, 39; IA. 6, 9 ff., and other Valabhi inscriptions.

Col. XII; drawn according to facsimile at J.BBRAS. 16, 108.

Cols. XIII, XIV; drawn according to facsimiles at IA. 9, 164 ff.

Col. XV; drawn according to facsimiles at IA. 18, 120 ff.; EI. 3, 127 ff.

Col. XVI; cutting from facsimiles at F.GI (CH. 3), Nos. 40, 41, 55, 56, 81.

Col. XVII; cutting from facsimiles at IA. 15, 112, 141.

Col. XVIII; drawn according to facsimile at J.ASB. 40, pl. 2.

Cuttings reduced by one-third.

40 = *pta*, as in the MSS., for which occasionally a cursive cross (V, A) or a *sa* through a transposition of the *ta* (V, B; XI, B; XV).

50 = [77] *Anunāsika* (? *Bhagvānlāl*), as in the MSS., facing either the right or the left, occasionally with small modification.

60 = *pu* (IX), together with four different cursive signs without phonetic value.

70 = *pū* (IV—VI; IX; XI, A), or *prā* (XII), together with a cursive cross (VII) and another cursive sign (XI, B), both possibly derived from *pū*.

80 = *Upadhmāniya* with a diagonal bar, and cursive forms of the *Upadhmāniya* exactly as in the MSS.

90 = *Upadhmāniya* with the central cross, as in the MSS.

100 = either *su* (I, in 200; III; IX, A, B; X; XIII, in 300; XIII, in 400; XIV, in 400), for which, through a misreading, appears *Δ* in the Nepāl inscriptions of the 7th and 8th centuries (XIII, A, B; XIV, in 300), and *lu* in eastern inscriptions¹ of the 6th and later centuries (X, in 200; XVIII, in 200), or *śu* (probably owing to the dialectic permutation of *śa* and *sa*) in the western² and Kalinga inscriptions (IV; V; XI; XII, in 400; XV, A, B), for which, through a misreading, *O* (XVII, A, B) appears in late northern inscriptions.

200 and 300 are formed by the addition of respectively one and two horizontal bars to the right of the *akṣara* for 100; but in the Rūpnāth sign (I) by the prolongation of the vertical of *sa*. A distinct *ū*, as in the MSS., appears only in the 200 of col. XVIII.

400 = *su-ki* (III), or *su-pla* (X; XIII; XIV), but *śu-pla* (XI). 500 = *śu-tra* (IV). 600 = *śu-phra* (XII). 700 = *su-gra* (III).

1,000 = *ro* (III), or *cu* (probable in IV, distinct in XV, in 8,000), or *dhu* (IV, in 2,000; IV, in 70,000). 2,000 and 3,000 = *dhu* with one or two horizontal strokes (IV). 4,000 = *ro-ki* (II), or *dhu-ki* (IV). 6,000 = *ro-phra* (III). 8,000 = *dhu-hra* (IV), or *cu-pu* (XVI).

10,000 = *ro-thū* (III). 20,000 = *ro-tha* (III). 70,000 = *dhu* with the cursive sign for 70.

The above details show: — (1) That the inscriptions of all periods, even the Aśoka edicts in the case of 100, differ from the MSS. by offering, side by side with distinct letters, numerous cursive or intentionally modified forms, and that, in the case of 50 and 60, just the older inscriptions show no real *Akṣaras*.

(2) That, excepting 7, 9, 30, 40, 80, 90, the phonetical value of the letters varies already since the earliest times, and that in many cases, as in those of 6, 10, 60, 70, 100, 1000, the variations are very considerable.

(3) That occasionally, as in the case of 10, 60, 70, the distinct letters, used in the later inscriptions and the MSS., are derived in various ways from cursive signs without a phonetical value.

These facts, as well as the incompleteness of our knowledge of the most ancient forms, make an explanation of the origin of the system for the present very difficult. *BHAGVĀNLĀL INDRĀJĪ*, who first attempted the solution of the problem, conjectured that the numeral symbols of the Brāhmī are of Indian origin, and due to a peculiar use of the *Mātrkāś* and certain ligatures for numeral notation. But he declared himself unable to find the key of the system.

¹ Earliest instance in the inscription of Mahānāman, F.GI (CII. 8), No. 71; 200 in col. X.

² Compare also the date of the Gujarāt Calukya inscription, Seventh Oriental Congress, Aryan Section, 211 ff.; and the facsimile at J.BBRAS, 16, 1 ff.; and the Valabhi form at EI. 3, 320, l. 14, where a *śa* of the period, mutilated on the left, is used; and the date of the Kota inscription, I.A. 14, 351, with a distinct *śa* of the 9th century. The form *su* occurs in a western inscription, lately found at Udepur by G. H. Ojha, in the numeral *sū-u* or *sū-ā*, = 300.

In 1877, I agreed with him, and KERN¹ likewise concurred, but explained the 4 and 5 as combinations of four and five strokes, arranged in the form of letters. But BURNELL differed entirely. He denied that the older "cave-numerals," with the exception of rare cases, resemble letters, and dwelt strongly on the impossibility of finding a principle, according to which the Akṣaras of the MSS. have been converted into numerals. He further pointed out the general agreement of the principles of the Indian system with those of the Demotic notation of the Egyptians. From this fact, as well as from the resemblance [76] of the Demotic signs for 1 to 9 to the corresponding Indian symbols, he inferred that the "cave-numerals" have been borrowed from Egypt, and after further modifications have been converted into Akṣaras. Finally, E. C. BAYLEY tried to show in his lengthy essay, quoted above, that, though the principles of the Indian system have been derived from the hieroglyphic notation of the Egyptians, the majority of the Indian symbols have been borrowed from Phoenician, Bactrian, and Akkadian figures or letters, while for a few a foreign origin is not demonstrable.

BAYLEY's explanation offers great difficulties, *inter alia* by the assumption that the Hindus borrowed from four or five different, partly very ancient and partly more modern, sources. But the comparative table of the Egyptian and Indian signs given in his paper, and his remarks about the agreement of their methods in marking the hundreds, induce me to give up BHAGVĀNLĀL's hypothesis, and to adopt, with certain modifications, the view of BURNELL, with whom also BARTH concurs.² It seems to me probable that the Brāhma numeral symbols are derived from the Egyptian Hieratic figures, and that the Hindus effected their transformation into Akṣaras, because they were already accustomed to express numerals by words (compare below, § 35, A).

This derivation, the details of which, however, still present difficulties and cannot be called certain, has been given in Appendix II. to the 2nd edition of my Indian Studies No. III. But two other important points may be considered as certain: — (1) That the varying forms in the Aśoka edicts show these numerals to have had a longer history in the 3rd century B. C.; and (2) that the signs have been developed by Brahmanical schoolmen, since they include two forms of the Upadhmāniya, which without doubt has been invented by the teachers of the Siksā.

B. — The decimal notation,

For the decimal notation, now occasionally called *anṅkapālī*, the Hindus used originally the *anṅkas* or the units of the ancient system, together with the cipher or naught,³ which originally consisted of the *śūnyalindu*, the dot (marking a blank, see below, § 35, E), called by abbreviated names *śūnya* and *lindu* (see BW.). Very likely this system is an invention of the Hindu mathematicians and astronomers, made with the help of the Abacus (BURNELL, BAYLEY). If HOERNLE's very probable estimate of the antiquity of the arithmetical treatise, contained in the Bakshālī MS., is correct,⁴ its invention dates from the beginning of our era or even earlier. For, in that work the decimal notation is used throughout. At all events, it was known to Varāhamihira (6th century A. D.), who employs the word *anṅka*, "the decimal figures," in order to express the numeral 9 (Pañcasiddhāntikā, 18, 33; compare below, § 35, A). Its most important element, the cipher or naught, is mentioned in Subandhu's Vāsavadattā, which Bāṇa (about A. D. 620) praises as a famous book. Subandhu compares the stars with "ciphers (*śūnyabīndavaḥ*) which the Creator, while calculating (the value of) the universe, on account of the absolute worthlessness of the Samsāra marked with his chalk, the crescent of the moon, all over the firmament which the darkness made similar to a skin blackened with ink."⁵ The cipher, known to Subandhu, of course consisted of a dot, like that of the Bakshālī MS. (plate IX, B, col. IX.).

¹ IA. 6, 143.

² Compare HOERNLE's explanation, Seventh Oriental Congress, Aryan Section, 192; IA. 17, 35.

³ IA. 17, 36.

⁴ B. ESIP, 66, note 1.

⁵ Vāsavadattā (ed. F. E. HALL), p. 182.

The earliest epigraphic instance of the use of the decimal notation occurs in the Gurjara inscription of the Cedi year 346, or A. D. 595,¹ where the signs (plate IX, B, col. I) are identical with the numeral symbols of the country and of the period (compare the Valabhī column of plate IX, A).² The same remark applies to the 2 in the date of the month of the Cicacole plate mentioned on page 78 above, in which document we find also the later circular cipher and [79] a decimal 8 in the shape of a cursive sign derived from *pu*. Another inscription of the 8th century, the Sāmāṅgaḍ plates of Sakasamvat 675, or A. D. 754, offers only strongly modified cursive signs (plate IX, B, col. II.).

In the specimens³ (plate IX, B, cols. III—VIII, XIII) from inscriptions of the 9th and later centuries, when the use of the decimal figures is the rule, we have likewise only cursive signs, which in the 11th and 12th centuries (compare cols. VII, VIII, and XIII) show local differences in the west, east and south. But all their figures have been derived either directly from the letter-numerals of the older system, or from letters with the same phonetic value. The last remark applies to the 9 of cols. III, V, VI ff., which is identical with the signs for *O* used in later inscriptions in the word *Om* (compare, e.g., IA. 6, 194 ff., Nos. 3—6).

Among the specimens from MSS. (plate IX, B, cols. IX—XII), the decimal figures of the Bakhshālī MS. show the ancient letter-numerals for 4 and 9.

The Tamil numerals, which greatly differ from the usual ones and preserve the old signs for 10, 100 and 1000, have been given by BURNELL, ESIP. plate 23 (compare *id.* page 68). Those from Kābul are contained in the table accompanying E. C. BAYLEY's paper, Numismatic Chronicle, 3rd Series, 2, 128 ff.

§ 35. — Numeral notation by words and letters.

A. — The word-numerals.

[80] In many manuals of astronomy, mathematics and metrics, as well as in the dates of inscriptions and of MSS., the numerals are expressed by the names of things, beings or ideas, which, naturally or in accordance with the teaching of the Sāstras, connote numbers. The earliest traces of this custom have been discovered by A. WEBER in the Śrautasūtras of Kātyāyana and Lātyāyana.⁴ A few examples are found in the Vedic Jyotiṣa and in the arithmetic of the Bakhshālī MS. More numerous instances occur in Piṅgala's manual of metrics, and from about A. D. 500 we find, first in Varāhamihira's Pañcasiddhāntikā, a system of this description, which, gradually becoming more and more perfect, extends to the cipher or naught, and to nearly all the numbers between 1 and 49. During this latter period any synonym may be used for the words expressing numbers, and in some cases the same word may be used for different numbers. If the words are compounds, they may be represented by their first or second part.

¹ Compare facsimiles at EI. 2, 19 ff.; and see FLEET in GI (CHI. 3), 209, note 1.

² The apparent difference in 6 is due to a fault of the impression.

³ Preparation of Plate IX, B, cols. III—XIII (for cols. I, II, see the text, above); all hand-drawn:—

Col. III; from facsimiles of Rāṣṭrakūṭa inscriptions at Kāpūrī, Nos. 15, 43 A, B.

⁴ W.IS, 8, 166 f.

This system of numeral notation, of course, has been invented in order to facilitate the composition of metrical handbooks of astronomy and so forth. The most important words, used to express numbers, are as follows :¹—

The cipher, 0, is expressed by (a) *śūnya* (Var., Ber.), "a void ;"² (b) *ambara, ākāśa, &c.*, "the (empty) space of heaven" (Var., Ber., Bro.), *ananta* (Bro.).

1 is expressed by (a) *rūpa* (Jyo., Bakh., Piñg., Var.) "one piece;" (b) *indu, śasin, śitarāśmi, &c.* (Var., Ber., Bro.), or abbreviated into *raśmi* (Ber.), "the moon;" (c) *bhū, mahī, &c.* (Var., Ber., Bro., Bur.), "the earth;" (d) *ādi* (Ber.), "beginning;" (e) *pīlāmaha* (Ber.), "Brahman;" (f) *nāyaka* (Bro.), "the hero" (of a play); (g) *tanu* (Bro.), "the body."

2 is expressed by (a) *yama, yamala* (Var., Ber.), "twins;" (b) *āśvin, dasra* (Var., Ber.), "the two Aśvins;" (c) *pakṣa* (Var., Ber.), "the two wings, or the halves of the body;" (d) *kara, &c.* (Var., Bur.), "the hands;" (e) *naṣana, &c.* (Var., Ber., Bur.), "the eyes;" (f) *bāhu* (Bro.), "the arms;" (g) *karṇa* (Bro.), "the ears;" (h) *kuṣumba* (Bro.), "the family," i. e., husband and wife; (i) *ravīcandrau* (Ber.), "sun and moon."

3 is expressed by (a) *agni, hotṛ, &c.* (Var., Ber., Bro., Bur.), "the sacrificial fires;" (b) *rāmāh* (Var., Bro.), "the three Rāmas" (of epic poetry); (c) *guṇa* (Var.), *triṣuṇa* (Ber.), "the qualities of matter;" (d) *trijagat, loka* (Ber.), "the three worlds;" (e) *trikāla* (Ber.), "the three times;" (f) *trigata*⁴ (Ber.), "sounds, &c., with three meanings;" (g) *sahodarāḥ* (Bro.), "the three uterine brothers;"⁵ (h) *trīnetra, &c.* (Bro.), "the three eyes of Siva."

4 is expressed by (a) *aya, āya* (Jyo.), *kṛta*⁶ (Var., Ber.), "the (four) dice;" (b) *veda, śrutī* (Piñg., Var., Ber.), "the Vedas;" (c) *abhihi, jaladhi, &c.* (Piñg., Var., Ber., Bur.), abbreviated *jala* (Var.), *dadhi* (Ber.), "the oceans;" (d) *diś* (Ber.), "the cardinal points;" (e) *yuga* (Bro.), "the (four) ages of the world;" (f) *bandhu* (Bro.), "the (four) brothers;"⁷ (g) *koṣṭha* (Bro.), (?); (h) *varṇa* (manuscript), "the (four) principal castes."

5 is expressed by (a) *indriya, &c.* (Piñg., Var., Bur.), "the organs of sense;" [81] (b) *artha, viśaya, &c.* (Var., Ber.), "the objects of the senses;" (c) *bhūta* (Piñg., Var., Ber.), "the elements;" (d) *iṣu, &c.* (Var., Ber., Bur.), "the arrows of Kāma;" (e) *pāṇḍava* (Ber.), abbreviated (*pāṇḍu*)-*suta, putra* (Bro.), "the (five) Pāṇḍu sons;" (f) *prāṇa* (Bro.), "the vital airs;" (g) *ratna*⁸ (Ber.) "the (five) jewels."

6 is expressed by (a) *rasa* (Bakh., Piñg., Var., Ber.), "the (six) flavours;" (b) *ṛtu* (Piñg., Var., Ber.), "the seasons;" (c) *aṅga* (Ber.), "the auxiliary sciences of Vedic studies;" (d) *māsārdha* (Ber.), "one half of the (twelve) months;" (e) *darśana, &c.* (Bro.), "the (six) philosophical systems;" (f) *rāga* (Bro.), "the (six) principal tunes;" (g) *ari* (Bro.), "the (internal) foes (of men);" (h) *kāya*⁹ (inscription), "the bodies" (?).

7 is expressed by (a) *ṛṣi, muni* (Piñg., Var.), "the (seven) seers;" or by *atṛi*, the first among them (Bro.); (b) *svara* (Piñg., Var., Bro.), "the notes" (of the octave); (c) *śvara*

¹ The abbreviations mark the sources from which the words have been collected, as follows:—

Bakh. = the Bakhshālī MS., HOERNLE, 130.

Ber. = Beruni's India, SACHAU, I, 178.

Bro. = C. P. BROWN's list, as quoted by BURNELL,

ESIP. 77 f.

Bur. = BURNELL's additions, ESIP. 77 f.

Jyo. = the Jyotiṣa, WEBER's edition, 6.

Piñg. = Piñgala, WEBER, Indische Studien, 8, 167 f.

² Śūnya may either mean "the empty place on the Abacus," or be an abbreviation of *śūnyabindu* (see above,

§ 34, B).

³ See *Pañchasiddhāntikā*, 8, 6. This is equivalent to *agni*, because Agni is the Hotṛ-priest of the gods.

⁴ See BRW. *sub hac voce*.

⁵ Thus BRW. *sub hac voce*; possibly *kṛta* may stand for *kṛtādi yuga*.

⁶ See ARTE, Sanskrit Dictionary, *sub hac voce*.

Var. = Varāhamihira's *Pañchasiddhāntikā*, THIBAUT's edition.

A few other instances are given from manuscripts and inscriptions.

The numerous synonyms, being unnecessary for Sanskritists, have been mostly omitted; but such omissions have been indicated by "&c."

⁷ Rāma, Lakṣmaṇa, &c.

⁸ Compare EI. I, 324, line 48.

⁹ Yudhiṣṭhira, Bhīma and Arjuna (CARTELLIERI).

(Var., Bro.), "the horses" (of the sun); (d) *aga*, &c. (Var., Ber., Bur.), "the (primeval) mountains;" (e) *dhātu* (Bro.), "the elements" (of the body); (f) *chandas* (Bro.), "the (classes of the) metres;" (g) *dhi* (Ber.), (?); (h) *kalatra* (Bro.), (?).

8 is expressed by (a) *anuṣṭubh* (Piṅg.), a metre with octo-syllabic Pādas or lines; (b) *vasu* (Piṅg., Var.), "the Vasu gods;" (c) *ahi*, &c. (Ber., Bur.), "the (eight classes of) snakes;" (d) *goja*, &c. (Ber., Bur.), "the elephants (guarding the eight points of the horizon);" (e) *maṅgala, bhūti* (Ber., Bro.), "the (eight kinds of) auspicious things;"¹ (f) *siddhi* (manuscript), "the supernatural powers."

9 is expressed by (a) *aṅka* (Var., Bro.), "the decimal figures;" (b) *nanda* (Var., Ber.), "the (nine) Nandas;" (c) *ohidra*, &c. (Ber.), "the cavities of the body;" (d) *go, graha* (Ber., Bro., Bur.), "the planets;" (e) *nidhi* (Bur.), "the treasures (of Kubera);" (f) *pavana* (Ber.), (?).

10 is expressed by (a) *diśah*, &c. (Piṅg., Var., Ber.), "the (ten) points of the horizon;" (b) *rāvaṇasīras* (Ber.), "the heads of Rāvaṇa;" (c) *avatāra* (Bro.), "the incarnations (of Viṣṇu);" (d) *karman* (Ber.), "the (ten Gṛhya)-ceremonies;" (e) *kṛendu* (Ber.), cipher (0) and moon (1), *i.e.* 10.²

11 is expressed by (a) *rudra* (Piṅg., Var., Ber.), "the (eleven) Rudras," or by *īśa, śiva*, &c. (Var., Ber.), the first of the eleven Rudras; (b, c) *akṣauhīṇī, lābha* (Bro.), (?).

12 is expressed by (a) *āditya, arka*, &c. (Piṅg., Var., Ber.), "the (twelve) sun-gods," or "suns;" (b) *vyaya* (Bro.), (?).

13 is expressed by (a) *viśvedevāḥ*, abbreviated *viśva* (Var., Ber.), "the (thirteen) all-gods;"³ or by *kāma*, the most famous among them (Bro.); (b) *atijagati* (Var.), a metre with thirteen syllables in each Pāda; (c) *aghoṣa* (Jagadūcarita),⁴ "the surd consonants."

14 is expressed by (a) *manu* (Var., Ber.), "the (fourteen) Manns;" (b) *indra* (Var., Ber.), "the (fourteen) Indras;" (c) *loka* (Bro.), "the (fourteen) worlds."

15 is expressed by (a) *tithi* (Var., Ber.), "the lunar days (of a half-month);" (b) *ahan* (Bro.), "the solar days (of a half-month);" (c) *pakṣa* (Bro.), "half a month (fifteen days)."

16 is expressed by (a) *aṣṭi* (Var., Ber.), a metre with sixteen syllables in the Pāda; (b) *bhūpa*, &c. (Var., Ber.), "the (famous sixteen) kings;"⁵ (c) *kalā* (Bro.), "the digits of the moon."

17 to 19 are expressed by *atyāṣṭi* (Ber.), *dhṛti, atidhṛti* (Var., Ber.), metres with seventeen to nineteen syllables in the Pāda.

20 is expressed by (a) *kṛti* (Var., Ber.), a metre with twenty syllables in the Pāda; (b) *nakha* (Var., Ber.), "the nails (of the hands and feet)."

21 is expressed by (a) *utkṛti* (Ber.);⁶ (b) *svarga* (Bro.), "heaven."

22 is expressed by *jāti* (Bro.), (?).

24 is expressed by *jina* (Var., Ber.), "the (twenty-four) Tirthamkaras of the Jainas."

25 is expressed by *tattva* (Ber.), "the principles of the Sāṅkhya philosophy."

26 is expressed by *utkṛti* (Var.), a metre with twenty-six syllables in the Pāda.

27 is expressed by *bhasamūha* (Jyo.), *nakṣatra* (Bro.), "the lunar mansions."

32 is expressed by *danta*, &c. (Var., Bro.), "the teeth."

¹ Compare *aṣṭamaṅgala*.

² STEIN KONOW, Deutsche Litt. Int., 1897.

³ Compare F. E. HALL, *Viṣṇupurāṇa*, 8, 192.

⁴ SB. WA. 126, 5, 58.

⁵ Described in the *śoḍaśarājakiya-parvan* of the *Mahābhārata*, 7, 65—71 (CARTILLIERI).

⁶ Probably a mistake for *prākṛti*, a metre with twenty-one syllables in the Pāda.

33 is expressed by *sura*, &c. (Var., Bro.), "the gods."

40 is expressed by *naraka* (Var., Pañcasiddhāntikā, 4, 6), "the bells."

49 is expressed by *tāna* (Bro.), "the notes."

[82] In the Jyotiṣa and in the arithmetic of the Bakshālī MS., only single words are used to indicate numbers.

In Piṅgala's and other metrical manuals, the words with numeral meanings often form (sometimes together with ordinary numerals) Dvandva compounds, which must be dissolved by "or." Thus, *vedartusamudrāḥ* means "4 or 6 or 4."

In the works of Varāhamihira and other astronomers, we find, in addition, longer Dvandva compounds, consisting of such word-numerals (be it alone, or associated with ordinary numerals), which have to be dissolved by "and," and then yield long rows of figures to be read from the right to the left.¹ Thus, in the Pañcasiddhāntikā, 4, 44, we have:—

$$\begin{array}{ccccccc} 10 & 0 & 4 & 4 & 1 & & \\ kha-kha-veda-samudra-ṭṭaraśmayah & = & 14,400; \end{array}$$

and in 9, 9 of the same work, we have:—

$$\begin{array}{cccc} 0 & 0 & 16 & 2 \\ kha-kh-āṣṭi-yamāḥ & = & 21,600. \end{array}$$

Such Dvandva compounds, which presuppose the existence of the decimal notation, are used also for the dates of inscriptions. Dates expressed in this manner, are found in the Kamboja and Campā inscriptions of the 7th century.² In Java they occur in the 8th century.³ And about the same time appears the first trace of such a notation in an Indian document, the Cicacole copper-plate inscription mentioned on page 78 above, where *lo*, = 3, is an abbreviation of *loka*. Next follow the dates of the Kadāb plates of A. D. 813,⁴ and of the Dholpur stone inscription of A. D. 842,⁵ which are expressed in word-numerals; and, in the next century, the plates issued by the Eastern Calukya Amma II. in A. D. 945.⁶ In later times the epigraphic instances become more frequent, and the ancient palm-leaf MSS. of the Jains,⁷ as well as the later paper MSS., offer a good many. The notations of this kind have been caused sometimes by the vanity of the clerks and copyists, who wished to prove their acquaintance with the methods of the astronomers, and perhaps still more frequently by metrical reasons in the case of dates given in verse.

B. — Numeral notation by letters.

Two systems of numeral notation, according to BURNELL originally South-Indian, which both employ the phonetically arranged characters of the alphabet, have still to be described, as they are not without interest for paleography. In the first system,⁸ only the vowelless consonants have any importance, and their numeral values are:—

| | | | | | | | | | | | | | | | | | | | | |
|----------|-----------|----------|-----------|----------|----------|-----------|----------|-----------|----------|-----|---|---|---|---|---|---|---|---|---|---|
| <i>k</i> | <i>kh</i> | <i>g</i> | <i>gh</i> | <i>ṅ</i> | <i>c</i> | <i>ch</i> | <i>j</i> | <i>jh</i> | <i>ñ</i> | = | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 0 |
| <i>t</i> | <i>th</i> | <i>d</i> | <i>dh</i> | <i>ṇ</i> | <i>t</i> | <i>th</i> | <i>d</i> | <i>dh</i> | <i>n</i> | = | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 0 |
| <i>p</i> | <i>ph</i> | <i>b</i> | <i>bh</i> | <i>m</i> | | | | | | = | 1 | 2 | 3 | 4 | 5 | | | | | |
| <i>y</i> | <i>r</i> | <i>l</i> | <i>v</i> | <i>ś</i> | <i>ṣ</i> | <i>s</i> | <i>h</i> | <i>ḥ</i> | <i>ḷ</i> | ... | = | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

¹ According to BURNELL, in some modern inscriptions the word-numerals are placed in the usual order of the decimal figures.

² A. BARTH, *Inscr. Sansk. du Cambodge*, No. 5 ff.; BERGAIENE-BARTH, *Inscr. Sansk. de Campā et du Cambodge*, No. 22 ff.

³ IA. 21, 48, No. 2.

⁴ IA. 12, 11; declared to be suspicious by FLEET, *Kanarese Dynasties*, Bombay Gazetteer, i, ii, 399, note 7.

⁵ ZDMG. 40, 42, verse 28; pointed out by KIELHORN.

⁶ KIELHORN, *Report*, 1880-81, No. 58; PETERSON, *Third Rep.*, App. I, Nos. 187^a, 251, 253, 256, 270, &c.

⁷ Compare B.E.SIP. 79; W.IS. 8, 160; IA. 4, 207.

The consonants are, however, not used by themselves, but for the formation of chronograms, containing any vowels and also compound consonants, of which the last element alone has numerical value. In the figures, resulting from those chronograms, the units invariably stand on the left, and the whole sum has to be turned round. An interesting instance of this notation, probably the most ancient hitherto discovered, occurs at the end of Śaṅguruśiṣya's commentary on the Sarvānukramanī (MACDONELL, page 168), where the chronogram, according to KIELHORN's undoubtedly correct emendation, is :¹ —

2 3 1 5 6 5 1

khajo=ntyān=meṣam=āpa.

As the author himself adds, this has the value of 1,565,132. And this figure corresponds, as the author likewise says, to the number of the days elapsed since the beginning of the Kaliyuga, and yields the vernal equinox, 24th March, A. D. 1184, as the date of the completion of the work. The equinox is indicated also by the verbal meaning of the chronogram : — “ (Coming) from the last (sign of the Zodiac), the sun reached Aries.”

The second system to be considered,² which is still used in Ceylon, Siam and Burma for the pagination of MSS., and according to BURNELL formerly also [83] occurred in Southern India, utilises the Brahmanical *Bārākhadī* (see page 2 above). According to BURNELL, the Akṣaras *ka* to *ṣa* are equivalent to 1 to 34; *kā* to *lā* = 35 to 68; *ki* to *li* = 69 to 102; and so on. But in the Pali MSS. of the Viennese Court Library from Burma, I find *ka* to *kaḥ* = 1 to 12; *kha* to *khaḥ* = 13 to 24; and so on: and in those from Ceylon, where the *Bārākhadī* includes the vowels *ṛ*, *ṝ*, *ḷ*, and *ḹ*, *ka* to *kaḥ* = 1 to 16, and *kha* to *khaḥ* = 17 to 32, whereby a somewhat different employment of the Akṣaras results.³ FAUSBÖLL has kindly informed me that the last two methods alone (not that mentioned by BURNELL) are used in the Pali MSS. known to him. And he adds that, after the exhaustion of the whole *Bārākhadī*, the Ceylonese MSS. begin again with 2 *ka*, 2 *kā*, and so on, and further that the pagination of Siamese MSS. agrees exactly with those from Burma.

VII. THE EXTERNAL ARRANGEMENT OF INSCRIPTIONS AND MANUSCRIPTS.

§ 36. — The lines, grouping of words, interpunctuation, and other details.

A. — The lines.

Already in the earliest inscriptions incised on smoothed stones, the Hindus have tried to form regular straight lines and to make the upper ends of the Mātrkāś of equal height. Aśoka's masons, however, have rarely succeeded, even in the pillar edicts and in the rock edicts of Girnār, Dhauli and Jaugada, to keep the line in more than a few consecutive words, mostly those of one group (see below, under B). But in other documents of the same period, as in the Ghasundī stone inscription (see page 32 above), the later⁴ and still valid principle has been more carefully observed, according to which only the vowel-signs, the superscribed *ra* and similar additions may protrude above the upper line. This regularity probably has been attained by marking the upper line with chalk, as is still done, or by other mechanical appliances.

The lines of the MSS. are always very regular, even in the oldest specimens, such as the Dhammapada from Khotan, and probably have been made with the help of a ruler (see below, § 37, J). In the ancient palm-leaf MSS. and in many later ones on paper, the ends of the lines are marked by vertical double strokes, running across the whole breadth of the leaves.

¹ IA. 21, 49 f., No. 4.

² B.E.SIP. 80.

³ Compare Gurupūjākaumudī, 110.

⁴ Thus already in most of the inscriptions from the western caves, and at Amarāvati, Mathurā, &c.; compare the facsimiles in B.ASIEWI. vols. 4 and 5; B.ASIESI. vol. I; EI. 2, 195 ff.; and others.

In the MSS., the lines always run horizontally, and from the top to the bottom; and this is also the case in most inscriptions. But there are a few inscriptions which have to be read from below.¹

Vertical lines sometimes occur on coins, especially on those of the Kuṣanas and the Guptas.² The cause of the latter arrangement of the letters was probably the want of space.

B. — The grouping of words.

[84] In addition to the still usual method of writing the words continuously without a break, up to the end of a line, of a verse, half-verse or other division, we find already in some of the oldest documents, such as certain Aśoka edicts,³ instances of the separation of single words, or of groups of words which belong together, either according to their sense or according to the clerks' manner of reading. A similar grouping of the words occurs also in some prose inscriptions of the Andhras and the Western Ksatrapas at Nāsik; compare Nos. 5, 11 A, B, and 13. In the carefully written metrical inscriptions of the later times, the Pādas or the half-verses occasionally are separated by blank spaces,⁴ and each line contains a half verse or a verse.⁵

Similarly, in the Kharoṣṭhī Dhammapada from Khotan, each line contains one Gāthā, and the Pādas are divided off by blanks. In other old MSS., as the Bower MS., single words and groups of words are often written separately, apparently without any certain principle.

In inscriptions, the Maṅgala, especially when it is the word *siddham*, often stands by itself on the margin.⁶

C. — Interpunctuation.⁷

Signs of interpunctuation are not found in the Kharoṣṭhī inscriptions. But the Dhammapada from Khotan offers at the end of each verse a circular mark, often made negligently, but resembling the modern cipher.⁸ At the end of a Vagga appears a sign, which is found at the end of various inscriptions, e. g., F.GI (CII. 3), No. 71, plate 41 A, and which probably is intended to represent a lotus.

In connection with the Brāhmī, signs of interpunctuation occur since the earliest times, and the signs employed are the following :—

(1) A single vertical stroke (*daṇḍa*) is used (irregularly and sometimes wrongly) in some Aśoka edicts⁹ for the separation of single words or of groups. In later times it serves to separate prose from verse,¹⁰ or occurs at the end of portions of sentences,¹¹ of sentences,¹² of half-verses¹³ or verses,¹⁴ and occasionally even marks the end of documents.¹⁵ In the inscriptions of the Eastern Calukyas¹⁶ the *daṇḍa* has occasionally a small horizontal top-bar; thus, 7.

¹ WZKM. 5, 230 f.; add a lately discovered Kharoṣṭhī inscription from Swāt.

² J.R.A.S. 1889, pl. 1; Num. Chron., 1893, pls. 8—10.

³ Thus in the pillar edicts (excepting Allahabad), and in Kāśī edicts I—XI (see facsimiles EI. 2, 524), and in Nigliva and Padaria.

¹¹ See, e. g., facsimile, F.GI (CII. 3), No. 42, pl. 28.

¹² See, e. g., facsimile, F.GI (CII. 3), No. 38, pl. 24, line 35.

¹³ See, e. g., facsimile, F.GI (CII. 3), No. 19, pl. 12 A.

¹⁴ See, e. g., facsimile, F.GI (CII. 3), No. 21, line 16.

¹⁵ See the same facsimile.

¹⁶ See, e. g., facsimiles, IA. 12, 92; 13, 213.

(2) A double vertical stroke, ||, appears in the Junnar inscriptions Nos. 24—29 after numerals, and once after the name of the donor. Later it occurs at the end of sentences,¹ half-verses,² verses,³ larger prose sections and documents.⁴ From the fifth century, a hook is often added to the top of the first stroke; thus, 𑀓.⁵ Or both strokes receive such additions; thus, 𑀔.⁶ Curves and hooks are added also to the foot of one of the strokes or of both.⁷ From the end of the 8th century, a bar is attached on the left, to the middle of the first stroke; thus, 𑀕.⁸ In the inscriptions of the Eastern Calukyas, bars stand at the top of the strokes; thus, TT: and a Kalinga inscription has similarly 𑀖.⁹

(3) A triple vertical stroke marks occasionally the end of inscriptions.¹⁰

(4) A single short horizontal stroke, placed on the left below the first sign of the last line, marks in the Aśoka edicts of Dhauī and Jaugada the end of an edict. From the 2nd century B. C.¹¹ to the 7th century A. D., this sign, which is often curved or bears a hook at one of its ends, serves the same purposes as the single vertical stroke.¹²

(5) A double horizontal stroke, often bent, appears from the 1st to the 8th century A. D. in the place of the double vertical.¹³ The Kuṣāna inscriptions and some later ones offer in its stead a double dot,¹⁴ which looks exactly like a Visarga.

(6) A double vertical, followed by a horizontal stroke, occasionally marks the end of inscriptions.¹⁵

(7) A crescent-like stroke, 𑀗, marks the ends of the Aśoka edicts at Kālsī, Nos. I—XI.

(8) A crescent-like stroke with a bar in the middle, 𑀘, stands twice in Kuṣāna inscriptions after the Maṅgala *siddham*.¹⁶

Besides, numeral figures alone occasionally mark the ends of verses, see, e. g., F.GI (CII. 3), Nos. 1, 2, and similarly Maṅgala-symbols (see below, under D) stand at the end of inscriptions or of sections of the text, especially in ancient MSS., such as the Bower MS.

Finally, it is necessary to call attention to the frames surrounding the Aśoka edicts in the Gīrnār version, the Jaugada separate edicts, and the Dhauī separate edict No. I.

What the inscriptions teach us regarding the history of the Indian interpunctuation may be briefly summed up, as follows. During the earliest period up to the beginning of our era, only single strokes, either straight or curved, are used, and their use is rare. After the beginning of our era, we find more complicated signs. [85] But up to the 5th century their use remains irregular. From that time onwards, we have, especially in the Prāsastis on stone, more regular systems of interpunctuation. And the Mandasor Prāsasti of A. D. 473-74, F.GI (CII. 3), No. 18, plate 11, first proves the existence of the still valid principle, which

requires one stroke after a half-verse and two strokes at the end of a verse. But up to the 8th century there are various copper-plates and stone inscriptions, especially from Southern India, without any interpunctuation.¹ Its methodical development is due to the Brahmanical schoolmen. In the offices, interpunctuation apparently never became a favourite. As a comparison of the documents of one and the same dynasty easily shows, the degree of regularity with which the signs are used, depends not upon the age of the Śāsanas, but on individual qualities of the writers, their learning and their carefulness.

D. — Maṅgalas and ornamentation.

In accordance with the ancient Brahmanical maxim, which requires a Maṅgala, a benediction or an auspicious word, at the beginning, in the middle and at the end of a composition in order to insure its completion and preservation, sacred symbols of auspicious import are found at the beginning and the end of two Aśoka edicts² and of many inscriptions of the next four centuries.³ The most common Maṅgala-symbols, employed in this way, are the well-known Svastika, the trident or the so-called Triratna symbol resting on the Dharmacakra, and the conventional representation of a Caitya tree.⁴ But there are also others, the names of which are as yet unknown. Once⁵ the Svastika appears after the word *siddham*.

In later times, we find also Maṅgala-symbols with greatly modified forms, partly in the texts at the end of larger sections and partly at the end of documents or literary works. A very common sign of this description is a large circle with a smaller one, or with one or several dots in the middle.⁶ This may be a conventional representation either of the Dharmacakra which is still distinctly visible in front of F.GI (CIL. 3), No. 63, plate 39, A, or of the lotus, which likewise occurs. As a circle with a dot, ○, corresponds to the ancient *tha*, other signs, closely resembling or identical with later forms of *tha*, are used as substitutes.⁷ And the modern MSS. finally offer the well-known ☞, which corresponds to one of the medieval forms of *tha*, but is now read *cha*.

Since the 5th century, we find also new symbols, consisting of highly ornamental forms of the ancient *O* of the word *Om* (plate IV, 6, XVIII; plate V, 47, IX), which latter is a great Maṅgala. They are used both at the beginning and at the end of inscriptions and occasionally even on the margin of copper-plates.⁸

Many of the sculptures, found in connection with stone inscriptions, appear to have the same meaning as the Maṅgala-symbols just mentioned. Of this kind are, e. g., several of the reliefs above BHAGVĀNLĀL's Nepāl inscriptions,⁹ such as the Śaṅkhas (No. 3), the lotuses (Nos. 5, 15), the bull Nandi (Nos. 7, 12), the fish (No. 9), the sun-wheel and the stars (No. 10). It is however possible that the lotus of No. 15 may refer also to the donation of a silver lotus, the dedication of which the inscription records. Again, the sun-wheel and the stars of No. 10

¹ See, e. g., facsimiles, IA, 6, 83; 7, 163; 8, 23; 10, 62—64, 164—171.

⁹ IA. 9, 163 ff.

may also be intended to indicate the wish, often expressed explicitly in words, that the donation, to which the inscription refers, may last "as long as sun and stars endure."

Similar illustrations of the contents of the inscriptions and symbolical representations of the wishes¹ and of other matters expressed in them, are not rare. Corresponding engravings on the copper-plates are less common. But on these the royal coat of arms is sometimes engraved below or by the side of the text, instead of on a separate seal, and the stone inscriptions, too, occasionally exhibit such devices.² Among the MSS., those of the Nepalese Buddhists and of the Jainas of Gujarāt are often richly ornamented and perfectly illustrated.³ Specimens of illuminated Brahmanical MSS. are, however, not wanting.

E. — Corrections, omissions, and abbreviations.⁴

In the earliest inscriptions, as in the Aśoka edicts (see, e. g., Kālsī edict XII, line 31) erroneous passages [86] are simply scored out. Later, dots or short strokes above or below the line are used to indicate clerical errors. The same signs occur in MSS., where, however, in late times the *delenda* are covered with turmeric or a yellow paste. On the copper-plates, they are frequently beaten out with a hammer, and the corrections are then engraved on the smoothed spot. We possess even entire palimpsests of this kind.⁵

In the Aśoka edicts and other early inscriptions, letters and words, left out by mistake, are added above or below the line without any indication of the place to which they belong,⁶ or they are also entered in the interstices between the letters. In the later inscriptions and the MSS., the spot of the omission is indicated by a small upright or inclined cross, the so-called *kākapada* or *hamsapada*, and the addenda are given either in the margin⁷ or between the lines.

A Svastika is sometimes put instead of the cross.⁸ In South-Indian MSS., the cross is used also to indicate intentional omissions, made in Sūtras with commentaries.⁹ Elsewhere, intentional omissions, or such as have been caused by defects in the original of the copy, are marked by dots on the line or by short strokes above the line.¹⁰ The modern sign for the elision of an initial *A*, the so-called *Avagraha*, has been traced first on the Baroda copper-plate of the Rāṣṭrakūṭa king Dhruva, dated A. D. 834-35.¹¹ A *kuṇḍala*, "ring," or a Svastika, served to mark unintelligible passages; see Kāshmir Report, 71, and KIELHORN, *Mahābhāṣya*, 2, 10, note.

In Western India, abbreviations are found first in an inscription of the Andhra king Siri-Puṣumāyī (Nāsik, No. 15) of about A. D. 150, and in the nearly contemporaneous one of Śirīsenā or Sakasena-Mādhariputa (Kaṇheri, No. 14). In the north-west, they are very common in the inscriptions of the Kuṣāṇa period. The commonest instances are: — *saṃva*, *sava*, *saṃ* and *sa* for *saṃvatsara*; *grī*, *gr* or *gi* for *grīsmāḥ* or *gimhāṇaḥ*; *va* for *varṣāḥ*; *he* for *hemantaḥ*; *pa* for *pakṣe*; and *diva* or *di* for *divasa*; and they are only found when the dates are expressed by figures. In this connection, they are used regularly in the later inscriptions and even in our days. But in these later times we find usually *saṃvat*, which

¹ Thus, the wish for the duration of the grant is expressed by representations of the sun and moon.

sometimes even is inflected,¹ before the dates of the years; but, before the dates of the month falling in the bright half, *śu* or *su di* for *śuddha-* or *śukla-pakṣa-dina*, or in Kashmir *śu* or *su ti* (*tithi*), and before those falling in the dark half, *ba* or *va di* for *bahula-* or *vahula-pakṣa-dina*, or in Kashmir *ba ti*.

From the 6th century, the inscriptions of Western India offer here and there abbreviations of other words, such as *dū* for *dūtaka*, *dvi* for *dvitīya*.²

Later, especially since the 11th century, abbreviations of titles and the names of tribes, castes and so forth become very common. In the MSS. they are noticeable since the earliest times. Thus, the Khotan Dhammapada (Paris fragment) has, at the end of a Vagga, *ga 30* for *gāthā 30*; and in the Bower MS., plate II, *ślo* for *śloka* and *pā* for *pāda* often occur in connection with figures at the end of a section. In the inscriptions and MSS. of the 12th century we find with names, not with dates, the small circle or *bindu*,³ which is still used to indicate abbreviations; e. g., *ṣ°* for *ṣhakkura*. The same sign is used in Prakrit MSS. to indicate the omission of one or several letters that can be easily supplied; e. g., *a°tabhavan* for *attabhavan*, *di°thā* for *dīṭhā*.⁴

F. — Pagination.

The Hindus number only the leaves (*patra*), not the pages (*prsthā*), of their MSS.; and in the Dravidian districts the figure stands on the first page of each leaf, in all other parts of India on the second (*sāṅkaprsthā*).⁵ The same rule holds good in the case of copper-plates, the sheets of which sometimes (but rarely) are numbered.⁶

G. — Seals.

According to the law-books,⁷ all *Śāsanas* [§7] must bear the royal seal. Consequently, seals, welded to the plates or to the rings connecting the plates, or attached to them by pins, are found with the majority of the grants. They show the royal coat of arms (mostly the representation of an animal or of a deity), or, in addition to such emblems, a shorter or longer inscription, giving the name of the king or of the founder of the dynasty, or the whole pedigree, and sometimes merely an inscription.⁸

VIII. WRITING MATERIALS, LIBRARIES, AND WRITERS.

§ 37. — Writing materials.⁹

A. — Birch-bark.

[§8] The inner bark of the *Bhūrja*-tree (*Bactula bhojpatra*), which the Himālaya produces in great quantity, probably is alluded to already by Q. Curtius (see above, page 6) as a writing material used by the Hindus at the time of Alexander's invasion, and later it is frequently named as such in Northern Buddhist and Brahmanical Sanskrit works.¹⁰ It is even called *lekhana*, "the writing material," and written documents go by the name of *bhūrja*. According to Beruni,¹¹ pieces, one ell in length and one span in breadth, were prepared for use

¹ According to a letter from KIELKORN.

² IA. 7, 73, pl. 2, line 20; 13, 84, lines 37, 40; 15, 340, line 57.

³ See, e. g., IA. 6, 194 ff., No. 4 ff.; EI. 1, 317, line 9.

⁴ Compare S. P. PANDIT, *Mālavikāgnimitra*², p. V, who, as also BURNELL, makes *di°thā* stand for *dīṭhā*; see also FISCHER, *Nachr. Gött. Gel. Ges.*, 1873, 203.

⁵ On an apparent exception, see WZKM. 7, 231.

⁶ Compare, e. g., B.ESIP. pl. 24; facsimiles at EI. 1, 1 ff.; 3, 156, 300.

⁷ JOLLY, *Recht und Sitte*, Grundriss, II, 8, 114.

⁸ See, e. g., the collections of seals in plates at B.ESIP. 106, and EI. 3, 104; 4, 244: see also F.GI (CH. 3), plates 30, 32, 33, 37, 43.

⁹ Compare B.ESIP. 84—93; RĀJENDRALĀL MITRA, in Gough's *Papers relating to the Collection and Preservation of Ancient Sanskrit MSS.*, p. 15 ff.; FÜHRER, *Zeitschrift f. Bibliothekswesen* 1, 420 ff., 2, 41 ff.

¹⁰ BRW., sub voce *bhūrja*.

¹¹ India, 1, 171 (SACHAC); the description seems to fit the Kharoṣṭhī Dhammapada from Khotan.

by rubbing them with oil and polishing them. The art of the preparation has however been lost in Kashmir, when the introduction of paper during the Moghal period furnished a more convenient material.¹ But a not inconsiderable number of old birch-bark MSS. still exist in the libraries of the Kashmir Pandits. According to a statement made to me by BHĀŪ DĀSĪ, birch-bark MSS. occur also in Orissa, and amulets, written on Bhūrja, are still used throughout all the Aryan districts of India.² The use of the *bhūrjapāṭra* of course began in the north-west; but it seems to have spread in early times, as the copper-plates of Central, Eastern and Western India appear to have been cut according to the size of the Bhūrja, which in Kashmir mostly corresponds to our quarto (BURNELL). As stated in many classical Sanskrit works and by Berūnī, all letters were written on Bhūrja at least in Northern, Central, Eastern and Western India.

The oldest documents on Bhūrja, which have been found, are the Kharoṣṭhī Dhammapada from Khotan, and the inscribed "twists," tied up with threads, which MASSON discovered in the Stūpas of Afghanistan (see above, page 18, and note 6). Next come the fragments from the Godfrey Collection and the Bower MS., the leaves of which have been cut according to the size of palm-leaves, and, like these, are pierced in the middle in order to pass a string through, intended to hold them together.³ Next in age is the Bakhshālī MS., and then follow after a considerable interval the birch-bark MSS. from Kashmir in the libraries of Poona, London, Oxford, Vienna, Berlin, &c., none of which probably date earlier than the 15th century.

B. — Cotton cloth.

The use of well-beaten cotton cloth is mentioned by Nearchos (see above, page 6), and some metrical Smṛtis, as well as some inscriptions of the Andhra period, state that official and private documents were written on *paṭa*, *paṭikā* or *kārpāsika paṭa*.⁴ According to BURNELL, and RICE (Mysore and Coorg Gazetteer, 1877, 1, 408), the Kanarese traders still use for their books of business a kind of cloth, called *kaḍatam*, which is covered with a paste of tamarind-seed and afterwards blackened with charcoal. The letters are written with chalk or steatite pencils, and the writing is white or black. In the Brhājñānaśa at Jessaimīr, I found a silk band with the list of the Jaina Sūtras, written with ink. Recently PETERSON (Fifth Report, 113) has discovered at Aṅṭilvād Pāṭaṇ a MS., dated Vikrama-Saṃvat 1418 (A. D. 1361-62), which is written on cloth.

C. — Wooden boards.

The passage of the Vinayapitaka (see above, page 5), which forbids "the incising" of precepts for religious suicide, bears witness to a very early use of wooden boards or bamboo chips as writing materials. Equally, the Jātakas, and also later works, mention the writing board, used in the elementary schools. Chips of bamboo (*śalākā*), with the name of the bearers, served as passports for Buddhist monks (BURNOUR, *Introd. à l'histoire du Bouddhisme*, 259, note). An inscription from the time of the Western Kṣātrapa Nabapāna⁵ speaks of boards (*phalaka*) in the guildhall, on which agreements regarding loans were placarded, and Kātyāyana prescribes that plaints are to be entered on boards with *pāṇḍulekha*, i. e., with chalk.⁶ Dandin narrates, in the Daśakumāracarita, that Apahāravarman wrote his declaration, addressed to the sleeping princess, on a varnished board.⁷ MSS. on varnished boards, which are common in Burma, have hitherto not been discovered in India proper; but there are indications that the Hindus, too, used boards for literary purposes. WINTERNITZ informs me that the Bodleian

¹ Kashmir Report, J.BRAS. 12, App., 29 ff.

⁵ Nāśik inscription No. 7, line 4, in B.ASRWI. 4, 102.

⁶ B.E.SIP. 87, note 2.

⁷ Daśakumāracarita, Uccyāsa 2, towards the end.

Library possesses a MS. on wooden boards, which comes from Assam. [89] And RĀJENDRALĀL MITRA asserts, in Gough's Papers, p. 18, that in the North-West Provinces poor people copy religious works with chalk on black boards.

D. — Leaves.

According to the canon of the Southern Buddhists (see above, page 5), leaves (*paṇṇa*) were in ancient times the most common writing material. Though the texts¹ do not mention the plants which furnished these leaves, it is not doubtful that they came then, as in later times, chiefly from the large-leaved palm-trees, the *tāḍa* or *tāla* (*Borassus flabelliformis*) and the *tādī* or *tālī* (*Corypha umbraculifera*, or *C. taliera*), which, originally indigenous in the Dekhan, are found at present even in the Pañjāb. The earliest witness² for the general use of palm-leaves throughout the whole of India is Hiuen Tsiang (7th century). But we possess clear proof that they were used even in north-west India during much earlier times. The Horiuzi palm-leaf MS. certainly goes back to the 6th century, and some fragments in the recently discovered Godfrey Collection from Kashgar belong, as HOERNLE has shown on the paleographical evidence, at least to the 4th century, and are older than the Bower MS.³ Again, the *Śhūrjapattā* leaves of the Bower MS. are cut according to the size of palm-leaves, and that is also the case with the Taxila copper-plate (see above, page 25), which certainly is not later than the 1st century A. D. As the coppersmith then chose a palm-leaf for his model, it follows that palm-leaves must have been commonly used for writing, even in the Pañjāb. A Buddhist tradition, preserved in the Life of Hiuen Tsiang,⁴ asserts that the Canon was written on palm-leaves at the first Council held immediately after Buddha's death. And the story regarding Saṃghabhadra's "dotted MS. of the Vinaya," published by TAKAKUSU in J.R.A.S. 1896, 436 f., shows that this tradition is at least two centuries older; one inference, which may be drawn from it, is, that about A. D. 400 the Buddhists believed palm-leaves to have been used for writing since immemorial times.

According to RĀJENDRALĀL MITRA,⁵ the palm-leaves, to be used for writing, are first dried, next boiled or soaked in water, then again dried, and finally polished with stones or conch-shells and cut to the proper size. It agrees with this statement, that the leaves of the ancient MSS. from Nepāl and Western India frequently show traces of an artificial preparation. Their length varies between one and three feet, and their breadth between one and a quarter and four inches.⁶ Against this, BURNELL⁷ asserts that the people of Southern India take no trouble with the preparation, and mostly even neglect to trim the leaves properly. The last assertion is not borne out by the appearance of the South-Indian MSS. known to me, though it is no doubt true of the leaves used by clerks and men of business in offices and for letters.

The Horiuzi MS., and the fragments in the Godfrey Collection, as well as the numerous palm-leaf MSS. of the 3th and later centuries from Nepāl, Bengal, Rājputāna, Gujarāt and the northern Dekhan, prove that since ancient times the palm-leaves were written on with ink all over Northern, Eastern, Central and Western India. Since the introduction of paper, they are no longer used in these districts, except in Bengal for MSS. of the *Caṇḍīpāṭha*.⁸

In the Dravidiān districts and in Orissa, the letters were, and still are, incised with a *stīla* and afterwards blackened with soot or charcoal. The oldest MS., found in the south, dates according to BURNELL⁹ from A. D. 1428.

⁶ See Gough's Papers, 102, and the measurements in KIELHORN'S Report for 1880-81, and PETERSEN'S Third Report.

⁷ P. ESIP. 88.

⁸ RĀJENDRALĀL MITRA, Gough's Papers, 102.

⁹ B. ESIP. 87; further researches in Southern India will probably show that older MSS. exist.

All palm-leaf MSS. are pierced either with one hole, usually in the middle, more rarely, in specimens from Kashgar, on the left, or with two holes on the left and the right, through which strings (*sūtra* or *śarayantraka*)¹ are passed in order to keep the leaves together.

In Southern India, raw palm-leaves were, and still are, commonly used for letters, for private and official documents, as well as in the indigenous schools. For the latter purpose they are also employed in Bengal.² According to ADAMS,³ the pupils of the *śāls* write also with lamp-soot on the large *Banānā* and *Sāl* leaves.

E. — Animal substances.

D'ALWIS⁴ asserts that Buddhist works mention skins among the writing materials, but neglects to quote the passages. It is possible to infer from the passage of the *Vāsavadattā*, quoted above (page 82, § 34, B) that in Subandhu's time skins were used for writing. But the fact that leather is ritually impure makes the inference hazardous. And hitherto no MS. on leather has turned up in India, though pieces of leather from Kashgar, inscribed with Indian characters, are said to exist in the Petersburg collections. A blank piece of parchment [90] lay among the MSS. of the *Jesalmīr Bṛhajjñānakōśa*.

Manuscripts on thin plates of ivory occur in Burma, and the British Museum possesses two specimens.⁵

F. — Metals.

The *Jātakas*⁶ state repeatedly that the important family records of rich merchants, and verses and moral maxims, were engraved on gold plates, and BURNELL⁷ mentions that they were used for royal letters and for land-grants. A gold plate with a votive inscription in *Kharoṣṭhī* has been found in a *Stūpa* at *Gāngu* near the ruins of *Taxila*.⁸ Specimens of small MSS. and official documents on silver likewise are preserved,⁹ and among them is one from the ancient *Stūpa* at *Bhaṭṭiprolu*. In the British Museum there are also MSS. on gilt and silver plated palm-leaves.

It is a matter of course that the precious metals were used only in rare and exceptional cases. But, as the exceedingly numerous finds prove, copper-plates (*tāmrapaṭa*, *tāmrapaṭra*, *tāmrāsana*, abbreviated *tāmra*) were since ancient times the favourite material for engraving various kinds of documents which were intended to last, and especially land-grants, to the donees of which they served as title-deeds.

According to *Fahian* (about A. D. 400), the Buddhist monasteries possessed grants engraved on copper, the oldest of which dated from Buddha's time.¹⁰ Though this statement requires confirmation, the *Sohgaura* plate (see above, page 32) teaches us that during the *Maurya* period official decrees were committed to copper. Another Buddhist tradition, preserved by *Hsien Tsiang*,¹¹ asserts that *Kaṇiṣka* caused the sacred books to be engraved on sheets of copper. And a similar story, which BURNELL declares to be untrustworthy, is told regarding *Sāyaṇa*'s commentaries on the *Vedas*.¹² But it is undeniable that copper has been used also for the preservation of literary works, as plates with such contents have been found at *Tripatty*, and specimens from *Burma* and *Ceylon* (some of which are gilt) are now in the British Museum.¹³ Photographs of quite modern copper-plates with lists of goods in *Gurumukhī* and *Nāgarī*, sent from *Kashgar* to *St. Petersburg*, have reached me through the kindness of *S. von Oldenburg*.

¹³ J. Pālī T. Soc., 1883, 136 ff.

As regards the technical preparation, the oldest *lāmraśāsana* known, the Sohgaure copper-plate (see above, page 32), has been cast in a mould of sand, into which the letters and the emblems above them had been previously scratched with a *stilus* or a pointed piece of wood. Hence both the letters and the emblems appear on the plate in relief. All other copper-plates have been fashioned with the hammer, and many among them show distinct traces of the blows. Their thickness and size vary very considerably. Some are very thin sheets, which could be bent double and weigh only a few ounces; others are exceedingly massive and are eight or nine pounds in weight or even heavier.¹ Their size is partly determined by the nature of the writing material commonly used in the districts where they were issued, and partly by the extent of the document to be engraved, the size of the clerk's writing, and so forth. The smiths always imitated the originals given them. If these were written on palm-leaves, the plates were made narrow and long. If the material was birch-bark, the plates became much broader, often almost square. Of the first description are all the copper-plates from Southern India, with the exception of those of the Yādavas of Vijayanagara, which imitate stone *stelae*.² To the second class belong all the Śāsanas issued further north, with the exception of the Taxila plate, which, as stated already, is the size of a palm-leaf. A comparison of the numerous plates of the Valabhi kings shows very clearly how their size gradually grows with the increasing length of the Praśasti.

If, as is mostly the case, several plates were required for one document, they were usually connected by copper rings passed through round holes in the plates. The single ring is usually found in Śāsanas from Southern India, and then the hole is usually made in the left side of the plate. If there are two rings, the holes go through the lower part of the first plate, the upper part of the second, and so on alternately. The rings correspond to the threads which keep the palm-leaves together, and they make of many *lāmraśāsanas* small volumes,³ which can be opened quite conveniently. The lines run always, except in the Vijayanagara plates, [91] parallel to the broadest side of the plate. The letters have mostly been incised with a chisel, rarely with a graver (compare above, page 19). In order to protect the writing, the rims of the plates are usually thickened, and slightly raised,⁴ and the first side of the first plate, as well as the second side of the last, is left blank. The copper seals attached to the plates seem to have been cast, and their inscriptions and emblems are raised on a counter-sunk surface. According to Bāṇa,⁵ the state seal of king Harṣa was made of gold.

Various copper statues show votive inscriptions on their bases. A single inscription on iron, that on the iron pillar of Mehrauli, near Delhi,⁶ has become known. The British Museum possesses a Buddhist MS. on tin.⁷

G. — Stone and brick.

Stones of the most various kinds, rough and artificially smoothed blocks of basalt or trap, as well as artistically carved columns of sandstone, or even prisms of crystal, have been since the most ancient times the most common materials for making documents, as Aśoka expresses himself, *ciraḥkittka*, "such as to endure for a long time." And it is indifferent whether the documents are official or private, whether they contain royal proclamations, treaties between kings, or agreements between private individuals, grants and donations or poetical effusions. There are even some instances of the incision of larger literary works; large fragments of

¹ The Taxila plate weighs 8½ ounces and was found bent double; the Alinā plates of Śīlāditya VI. of Valabhi weigh together 17 pounds, 8½ ounces, see F.GI (CIL. 3), 172. But there are still heavier plates, see B.ESIP. 92, where however the historical notes require correction.

² B.ESIP. 92; compare the facsimiles at EI. 3, 26, 38, &c.

³ The Kaśikūṭi grant (8th century) is written on eleven plates, the Hirabadgalli grant (4th century), EI. 1, 1 ff., on eight.

⁴ See FLEET, GI (CIL. 3), 68, note 6.

⁵ F.GI (CIL. 3), 139.

⁶ Harṣacarita, 227 (Nirṇayāsagar Press ed.).

⁷ See the list, J. Pali T. Soc. 1893, 134 ff.

plays by the Cāhamāna king Vighraha IV., and by his post-laureate Somadeva, have been found at Ajmīr,¹ and a large Jaina Sthalapurāṇa in a number of Sargas, impressions of which (unpublished) I owe to FÜHRER and G. H. OJHA, exists in Bijholli (Rājputāna).

Bricks, showing single or a few letters, have been known for some time, as specimens have been found by CUNNINGHAM,² FÜHRER and others in various parts of India, and even in Burma. But recently a set has been discovered in the North-West Provinces by HOEY, on which Buddhist Sūtras are inscribed, the characters having apparently been scratched on the moist clay, before it was baked.³

H. — Paper.

During the period to which this work refers, paper was hardly known or at least little used in India, as its introduction is only due to the Muhammadans. RĀJENDRALĀL MITRA, however, asserts⁴ that a "letter-writer" by king Bhoja of Dhārā proves its use in Mālva during the 11th century. The oldest paper MS. in Gujarāt is said to date from A. D. 1223-24.⁵

Paper MSS. dated Vikrama-Samvat 1384 and 1394 (A. D. 1327-28 and 1337-38), the leaves of which are cut according to the size of palm-leaves, have been discovered by PETERSON at Anhilvād Pāṭan.⁶ It is very doubtful if any of the ancient MSS. from Kashgar, which are written on a peculiar paper, covered with a layer of gypsum, are of Indian origin; HOERNLE believes that all of them were written in Central Asia.⁷

I. — Ink.

The oldest undoubtedly Indian term for ink is *maṣi* or *maṣī*, frequently spelt *masi* or *maṣī*. The word, which occurs as a *varia lectio* already in a Grhyasūtra, is derived from the verb *maṣ* (*himsāyām*), and means etymologically "powder."⁸ Further, it serves to denote several kinds of pulverised charcoal, which were mixed with water, gum, sugar and so forth, and used for the preparation of ink.⁹ BURNELL is mistaken when he asserts that in classical Sanskrit literature *maṣī*, "ink," occurs only in late works; it was known to Bāṇa (about A. D. 620) and to his predecessor Subandhu.¹⁰

BENFEY, HINCKS and ~~WATER~~ have derived *melā*, another word for "ink," from the Greek *μαλας*. But it is, no doubt, the feminine (*viz.*, *maṣī*) of the common Prakrit adjective *maṣa*, "dirty, black," which cannot have been borrowed from the Greeks.¹¹ *Melā*, likewise, was known to Subandhu, who uses the denominative *melānandūyate*, "becomes an inkstand."¹² The Koṣas offer for "inkstand" also *melāmandā*, *melāndhu*, *melāndhukā*, and *maṣimaṇi*, and the Purāṇas *maṣīpātra*, *maṣībhaṇḍa* and *maṣīkūpikā*.¹³

The statements of Nearchos and Q. Curtius (see above, page 6), according to which the Hindus wrote on cotton cloth and on the inner bark of trees, *i. e.*, Bhūrja, make it very probable that they used ink already in the 4th century B. C. To the same conclusion points the fact, that in some letters of the Aśoka edicts dots are occasionally substituted for loops.¹⁴ The oldest specimen of writing with ink, on the relic-vase of the Stūpa [92] of Andher (see

¹³ *Mandā* and *nandā*, 'water-vessel' (compare also *nandikā*, *nādi*, 'well,' and *nādikapāṭa*, 'cover of a well'), are derived from *nandayati* and *mandayati*, 'to cause to rejoice, to refresh.'

¹⁴ B.IS. III², 61 f. 69.

above, page 5), is certainly not later than the 2nd century B.C. From the first centuries A.D. dates the Kharoṣṭhī Dhammapada from Khotan, as well as the twists of Bhūrja and the stone vessels with Kharoṣṭhī letters in ink from the Stūpas of Afghanistan. Somewhat later are the ancient Bhūrja and palm-leaf MSS. with Brāhma characters. Painted inscriptions occur still in the caves of Ajanṭā.¹

Coloured ink, which in later times the Jains especially have used extensively for their MSS.,² is mentioned also in Brabmanical works, e. g., in the sections of the Purāṇas on the donation of MSS.³ Besides chalk (see above, page 82, § 34, B), red lead or minium (*kiṅgula*) was used, already in ancient times, as a substitute for ink.⁴

J. — Pens, pencils, &c.

The general name of "an instrument for writing" is *lekhaṇī*, which of course includes the *stilus*, pencils, brushes, reed and wooden pens, and is found already in the epics.⁵

The *varṇaka*, mentioned in the Lalitavistara, no doubt refers to the little stick without a slit, with which the school-boys still draw the letters on the writing-board (see above, page 5). The Koṣas offer the variant *varṇikā*. The *varṇavartikā*, which occurs in the passage of the Daśakumāracarita referred to above (see page 98 above, and note 7), must be a brush or coloured pencil, as, according to other passages, the *vartikā* was used for drawing or painting.⁶ *Tūli* or *tūlikā* probably denoted originally "a brush," though it is explained also by the modern *saṭai*, "graver," a *stilus*.⁷

The most usual name of the reed pen is the word *kalama*, *καλαμος*, Calamus, which occurs in all eastern languages; the rarer indigenous Indian name is *iṣṭkā* or *iṣikā*, literally "reed."⁸ Pieces of reed, bamboo or wood, cut after the manner of our pens, are used in all parts of India where the use of ink prevails,⁹ and all the existing ancient MSS. on palm-leaves and Bhūrja probably have been written with such pens.¹⁰ The Sanskrit name of the *stilus* used in Southern India is *śalākā*, in Marāṭhī *saṭai*.

Regarding the now very generally used "ruler," a piece of wood or cardboard with strings fixed at equal distances, and regarding its probable predecessors, see Anecdota Oxoniensia, Aryan Series, 1, 3, 66, and Anzeiger d. W. Akademie, 1897, No. VIII, where photographs of two specimens have been given. According to a letter from C. KLEMM (April 21, 1897), the Ethnological Museum of Berlin possesses two specimens, one from Calcutta with the inscription *nivedanapattrā* and one from Madras called *kiṅgula*.

§ 38. — The preservation of manuscripts and copper-plates, and the treatment of letters.

A. — Manuscripts and libraries.

[93] Wooden covers, cut according to the size of the sheets, were placed on the Bhūrja and palm-leaves, which had been drawn on strings, and this is still the custom even with the paper MSS.¹¹ In Southern India the covers are mostly pierced by holes, through which the long strings are passed. The latter are wound round the covers and knotted. This procedure was usual already in early times¹² and was observed in the case of the old palm-leaf MSS.

from Western and Northern India. But in Nepāl the covers of particularly valuable MSS. sometimes are made of embossed metal; the MSS. (*pustaka*) which have been prepared in this manner are usually wrapped up in dyed or even embroidered cloth. Only in the Jaina libraries the palm-leaf MSS. sometimes are kept in small sacks of white cotton cloth, which again are fitted into small boxes of white metal. The collections of MSS., which frequently are catalogued, and occasionally, in monasteries and in royal courts, are placed under librarians, generally are preserved in boxes of wood or cardboard. Only in Kashmīr, where in accordance with Muhammadan usage the MSS. are bound in leather, they are put on shelves, like our books.

The ancient Indian name of a library, *bhāratibhāṇḍāgāra*, "treasury of the goddess of speech," occurs frequently in Jaina works; more rarely the modern synonym, *sarasvatibhāṇḍāgāra*. Such Bhāṇḍāgāras were, and still are, found in temples,¹ colleges (*vidyāmaṭha*), monasteries (*maṭha*, *upāśraya*, *vihāra*, *saṅghārāma*),² at the courts of princes and in the houses of many private individuals. The Purāṇas declare it to be the sacred duty of the wealthy to make donations of books to temples and so forth.³ Equally, such donations are obligatory on the Jaina and Bauddha laymen, and the Praśastis of the old MSS. prove that the obligation was fulfilled in the most liberal manner. A famous royal library of the middle ages was that of king Bhoja of Dhārā (11th century); on the conquest of Mālva, about A. D. 1140, Siddharāja-Jayasimha transferred it to Anhilvād;⁴ there it seems to have been amalgamated with the court library of the Caulukyas, which is repeatedly mentioned in works of the 13th century. The *bhāratibhāṇḍāgāra* of the Caulukya Viśaladeva or Viśvamalla (A. D. 1242—1262) furnished, according to an unpublished Praśasti, the copy of the Naishadhiya, on which Vidyādhara wrote the first commentary of the poem, and the MS. of the Kāmasūtra, according to which Yaśodhara composed his Jayamaṅgalāṭikā.⁵ One of the manuscripts of the Rāmāyaṇa in the library of the University of Bonn has been derived from a copy of Viśaladeva's collection.⁶

The search for Sanskrit MSS., instituted by the Government of India, has shown that there are still a good many royal libraries in India, and the catalogues of several, such as those of Alwar, Bikāner, Jammu, Mysore, and Tanjore, has been published. The documents, published in connection with the search, have brought to light also a surprisingly large number of private libraries. And various notes in older Sanskrit works make it apparent that considerable private libraries existed in early times. Thus, Bāṇa (about A. D. 620) tells us that he kept a particular reader (*pustaka-vācaka*), whose manipulation of the MS. of the Vāyupurāṇa he describes in his Harṣacarita.⁷ BURNELL's remarks,⁸ regarding the bad treatment of the MSS. by the Brahmans, do not hold good for the whole of India, perhaps not even for the whole of Southern India. In Gujārāt, Rājputāna and the Marāṭhā country, as well as in Northern and Central India, I have seen, besides some ill-kept collections, very carefully preserved libraries in the possession of Brahmans and Jaina monks. The treatment of the books usually depends only upon the worldly circumstances of the owner.⁹

B. — Copper-plates.

The way in which private individuals kept their copper-plate grants, seems to have been very peculiar. In many places, e. g., in the ruins of Valabhi, near the modern Valā, they have been found immured in the walls or even in the foundations of the houses of the owners. In

many other cases [94] the grants have turned up in those fields to the donation of which they refer, often hidden in small *caches* constructed of bricks.

The finders or poor owners often sell or pledge plates to the Vāṇiās, and this custom explains why they frequently come into the hands of European collectors at great distances from the places of issue. The originals of the grants, according to which the plates were prepared, probably remained in the royal Daftar, the keeper of which, the *akṣapātālīka*, is frequently mentioned.¹

C. — The treatment of letters.

The Jātakas already mention the custom of wrapping up important letters in white cloth and sealing the packet.² At present, official or ceremonial letters often are sent in bags of silk or brocade. In the case of ordinary letters on palm-leaves, the proceeding is simpler; the leaves are folded, their ends are split and joined, and the whole is tied up with a thread.³ It is probable that letters on Bhūrja were treated similarly. According to Bāṇa,⁴ the postal runner (*dīrghādhvaga*, *lekhaḥāraka*) tied each separately to a strip of cloth and wound this round his head.

§ 39. — Writers, engravers, and stone-masons.

Though the oldest Indian alphabet is a creation of the Brahmanical schoolmen (see above, page 17), and though the instruction in writing has remained even in recent times chiefly in the hands of Brahmans, there are yet indications that professional writers, and perhaps even castes of professional writers, existed already at an early period. The oldest name of these men is *lekhaḥaka*, used in the canon of the Southern Buddhists and the epics (see above, page 5). In the Sāñcī inscription, Stūpa I, No. 143,⁵ it is clearly used to designate the profession of the donor; it may, however, be doubted if it means, as I have translated it, "copyist of MSS." or "writer, clerk." In various later inscriptions,⁶ *lekhaḥaka* undoubtedly denotes the person who prepared the documents to be incised on copper or stone. But in the present day a *lekhaḥak* is always a man who copies MSS., and this profession is usually the resource of poor Brahmans, and sometimes of worn-out clerks (*Kāyasths*, *Kārkūns*). Such men were, and are, employed also by the Jainas. But many Jaina MSS. have been copied, as their Praśastis show, by monks or novices, and even by nuns. Similarly, we find, among the copyists of the Bauddha MSS. from Nepāl, Bhikṣus, Vajrācūryas and so forth.⁷

Another name of the professional writers, which was used already in the 4th century B. C., is the word *lipikara* or *libikara*, discussed above, page 5. In the Koṣas⁸ it is given as a synonym of *lekhaḥaka*, and in the Vāsavadattā⁹ it means "writer" in general. Aśoka uses it in the 14th rock edict as a designation of his clerks. Similarly, Pada, who copied the Siddhāpura edicts, calls himself *lipikara*, and in the Sāñcī inscription, Stūpa I, No. 49,¹⁰ the donor Subāhita-Gotiputa takes the higher title *rājālipikara*, "a writer of the king." In the earlier times, *lipikara* probably was an equivalent for "clerk."

In a number of Valabhī inscriptions of the 7th and 8th centuries, the writer of the documents, who is usually "the minister for alliances and war" (*sandhiti-grahādhipatyā*),

¹⁰ EI. 2, 102.

receives the title *divirapati* or *divirapati*, and the simple word *divira* occurs even earlier in a Central-Indian inscription of A. D. 521-52.¹ *Divira* or *divira* is the Persian *debir*, "writer," which probably became domesticated in Western India during the time of the Sassanians, when [95] the trade and intercourse between Persia and India was greatly developed. *Divira* appears also in the *Rājatarāṅgī*, and in other Kashmirian works of the 11th and 12th centuries. Kṣemendra's *Lokaprakāśa* mentions even various sub-divisions, *gaṇjādivira*, "bazaar-writers," *grāma-divira*, "village-writers," *nagara-divira*, "town-writers," and *khavāsādivira* (?).²

The two works just mentioned, as well as other contemporaneous ones, designate the writers also by the term *kāyastha*, which first occurs in the *Yājñavalkya-Smṛti*, I, 335, and even at present is common in Northern and Eastern India. The *Kāyasthas*, however, form a strictly separate caste, which, though according to the Brahmanical account it is mixed with *Sūdra* blood, yet claims a high rank,³ and in reality frequently has possessed a great political influence. In the inscriptions, the *Kāyasthas* occur since the 8th century, first in the *Kaṇasva* inscription of A. D. 738-39 from *Rājputāna*.⁴

Other designations of the writers in the inscriptions are *karāṇa*,⁵ *karāṇika*⁶ or more rarely *karāṇin*,⁷ *śāsanika*⁸ and *dharmalekhin*.⁹ *Karāṇa* is perhaps only a synonym of *kāyastha*,¹⁰ as the law-books mention the *Karāṇas* as one of the mixed castes. The other terms, among which *karāṇika* has to be rendered, according to KIELHOHN, by "writer of legal documents (*karāṇa*)," appear to be merely official titles without any reference to caste. The development of the Indian alphabets, and the invention of new forms of the letters, no doubt is due partly to the Brahmins and the Jaina and Bauddha monks, but much more to the professional writers and to the writer castes. The opinion, according to which the modifications have been introduced by the stone-masons and the engravers of the copper-plates, is less probable, because these persons were not suited for such work by their education and their occupation.¹¹

As the remarks at the end of many inscriptions show, it was customary to make over a *Prasasti* or *Kāvya*, which was to be incised on stone, to a professional writer, who prepared a fair copy, and to set the mason (*sūtradhāra*, *śilāhūta*, *ripakāra*, *śilpin*) to work according to the latter.¹² This custom was observed also in a case which fell under my personal observation. The mason received a sheet with the fair copy of the document (the *Prasasti* of a temple) exactly of the size of a stone on which it was to be incised. He first drew the letters on the stone under the supervision of a Pandit, and then incised them. In some exceptional cases, the authors of the poems assert that they have done the work of the masons,¹³ and in others the masons say that they have made the fair copies of the inscriptions.¹⁴

The statements regarding the preparation of the copper-plate *Śāsanas* are less accurate and explicit. Usually, the inscriptions mention only the person who drew up or wrote the document. And they mostly name as such either a high official (*amātya*, *sāndhivigrahika*,

¹³ This is stated by the poet Kubja in BION's unpublished *Tālgund Prasasti* — [now edited by BION, *EC*, 7, Sk. 176, and by KIELHOHN, EI. 8, 31]; — and by Divākaraśaṅkita in the *Aśjaneri* inscription, IA. 12, 127.

¹⁴ Compare IA. 11, 106, 107; 17, 140.

rahasika) or a general (*sonāpati*, *balādhikṛta*). Occasionally, they assert that the drafting was done by a stone-mason, a *sūtradhāra*¹ or *vaṣṭā*,² who, however, in reality merely engraved the grant. According to Kalhaṇa,³ the Kashmirian kings kept a special official for this work; he bore the title *paṭṭopādhyāya*, "the teacher (charged with the preparation) of title-deeds," and belonged to the *akṣapatāla* office, which STRIN believes to be the Accountant-General's Office, while I take it to be the Record Office or Court of Rolls (*Daftar*).

The Sāsanas name only rarely, and in late times, the person by whom the plates were engraved (*utkṛta*, *vanmilita*). The engravers mentioned are various artisans, a *pīṭaladhāra*, *lohaḥāra* or *ayaskāra*,⁴ i. e., the Kansār or coppersmith of the present day, a *sūtradhāra*,⁵ "stone-mason," a *hemakāra* or *sunara*⁶ (probably equivalent to *sonāra*), "goldsmith," a *śilpīn*⁷ or *vijñānika*,⁸ "an artisan." In the Kalinga Sāsanas, we find in their stead an *akṣasālin*, *akṣasālikā*, *akṣasālin*, or *akṣasāle*,⁹ whereby a member of the goldsmith caste, now called *Aksāle*,¹⁰ is meant.

Finally, the existence of manuals for clerks and writers must be mentioned. We still possess several works of this kind, among which the *Lekhapañcśāikā* gives the rules for drafting not only private letters, but also land-grants and the treaties between kings, while a section of Kṣemendra-Vyāsādāsa's *Lokaprakāśa* shows how the various kinds of bonds, bills of exchange (*huqūq*) and so forth ought to be done.¹¹

CONCLUDING REMARKS.

[96] DR. W. CANTILLIERI, whose name appears at the bottom of the Plates, is responsible for the drawing and tracing of the letters for which no cuttings from facsimiles were available, as well as for the arrangement and the *retouches* of the cuttings, except in the case of plates VII—IX, which were finished by a young lithographer, Mr. HÖRM. I have also to acknowledge Dr. CANTILLIERI's assistance in the selection of the signs, which in a few cases he has made independently, and in others has been influenced by a revision of my proposals; and I have to thank him for various ingenious remarks on the Indian alphabets, as well as for a collection of the variants in the Aśoka edicts.

If I have been able to illustrate most of the Indian alphabets by cuttings from facsimiles, instead of by hand-drawn signs, I owe this chiefly to my friend Dr. J. BURGESS, who during many years has kindly furnished me with separate copies of his excellent reproductions of Indian inscriptions. Some other donors of facsimiles or photographs, Dr. E. HULTSCH, PROFESSOR E. LEUMANN, and Dr. S. VON OLDENBURG, have already been mentioned in the notes.

¹ IA. 19, 248; J.BBRAS. 13, 4.

² EI. 3, 158, 250, where it is said that the *vaṣṭā* Virapñcārya wrote the grants of Agyatarāya and Venkaṭa-rāya, as well as that of Sadāśivarāya dated A. D. 1556.

³ Rājatarānginī. V, 897 f. (STRIN).

⁴ IA. 15, 860.

⁵ EI. 3, 314; IA. 18, 17.

⁶ EI. 4, 176; IA. 17, 227, 230, 233.

⁷ IA. 17, 234.

⁸ IA. 16, 206; the *lohaḥāra* Kūke is likewise called *vināṭa*, i. e. *vijñānika*, IA. 17, 230.

⁹ IA. 18, 123; 18, 146; EI. 3, 19, 218, and the correction of the translation (p. 21) at the end of the volume.

¹⁰ BAYNES, Imperial Census Report, 2, 8, where the *Aksāles* of Madras are mentioned. They are found, however, also in the Kanarese districts of the Bombay Presidency.
